Based on all applications issued in May 2005, the average waiting time expressed in days from receipt of a Disclosure application form to the issue of a Disclosure is 10.7 days for Standard Disclosures and 28.2 days for Enhanced Disclosures. This includes the time taken for applications that are returned to customers for further information. This provides an average waiting time of 26.3 days for all Disclosures issued in May 2005.

However, it is worth stating that the average waiting time for 95 per cent. of Standard Disclosures was 7.6 days and 22 days for 95 per cent. of Enhanced Disclosures, resulting in an average waiting time of 20.2 days for 95 per cent. of all Disclosures, including the time spent with customers. The CRB has published service standards of issuing 93 per cent. of Standard Disclosures within two weeks and 90 per cent. of Enhanced Disclosures within four weeks. This service standard does not include the time taken for applications that are returned to customers.

The CRB has consistently achieved the service standard for Standard Disclosures. For Enhanced Disclosures, where an additional check is performed by local police forces for any relevant non-conviction information, the CRB has over recent months failed to achieve the service standard. For May 2005, the CRB issued 88.9 per cent. of Enhanced Disclosures within four weeks.

The CRB and the Association of Chief Police Officers are continuing to work together to improve the timeliness of the work conducted within all local police force Disclosure Units.

Dispersal Orders

Mr. Gordon Prentice: To ask the Secretary of State for the Home Department how many dispersal orders are in force; and what assessment he has made of the effectiveness of dispersal orders. [2728]

Hazel Blears: We do not normally collect information on the number of areas in which dispersal powers are currently authorised. It is estimated from a specific exercise undertaken last year that dispersal powers were authorised in over 400 areas between January 2004, when the powers came into force and September 2004. We are in close touch with practitioners from both police and local authorities who consider dispersal powers to be a key tool for tackling antisocial behaviour, often used in conjunction with other measures.

Mr. Jenkins: To ask the Secretary of State for the Home Department how many dispersal orders have been issued to Tamworth residents since January 2004. [3908]

Hazel Blears: The chief constable of Staffordshire tells me that no dispersal orders have been issued as no area of Tamworth has been designated under Section 30 of the Anti-social Behaviour Act 2003 since January 2004.

Dr. Jerry Vlasak (Animal Rights)

Mr. Wallace: To ask the Secretary of State for the Home Department what representations he has received concerning the proposed visit by animal rights activist Dr. Jerry Vlasak to the United Kingdom. [3696]

Paul Goggins: I have received no representations about Dr. Jerry Vlasak.

Drink-driving

Tom Brake: To ask the Secretary of State for the Home Department how many convictions for drink-driving resulted in custodial sentences in 2003, broken down by police authority. [2292]

Paul Goggins: Information taken from the Home Office Court Proceedings Database on convictions and custodial sentences for drink-driving offences by police force area in 2003 is given in the table.

Findings of guilt and immediate custodial sentences at all courts for offences of driving etc. after consuming alcohol or taking drugs by police force area, 2003

Number of offences

Police force area	*Findings of guilt*	*Immediate custody*[1]
Avon and Somerset	2,666	167

North Wales	1,326	76
South Wales	2,840	211
Wales	6,310	427
England and Wales	93,707	6,308

[1] Immediate Custody includes sentences of Detention and Training Order, Young Offender Institution and Unsuspended sentences of imprisonment.

Election Offences

Mr. Gordon Prentice: To ask the Secretary of State for the Home Department how many police forces in England have dedicated teams responsible for investigating election offences; and if he will make a statement. [2736]

Hazel Blears: The information requested is not collected centrally.

EU Immigrants

Mr. Malins: To ask the Secretary of State for the Home Department how many people from the new member states of the EU had registered to work in the UK on 1 June. [3629]

Mr. McNulty: The latest management information from the Worker Registration Scheme for the period 1 May 2004 to 31 March 2005 was published on the 26 May 2005. The total number of applicants to the scheme during this period was 176,000. The next set of figures, incorporating the second quarter of 2005 (April to June 2005) will be published in August 2005.

Fixed Penalty Notices

Mr. Malins: To ask the Secretary of State for the Home Department what the total value was of fixed penalty notices handed out by the police in the Greater London area in the last 12 months for which figures are available; and what percentage of this sum remains unrecovered. [2965]

Hazel Blears: The total value of fixed penalty notices issued is not collected centrally.

Human Trafficking

Mr. Hancock: To ask the Secretary of State for the Home Department what his timetable is for adopting the European convention on trafficking in human beings; and if he will make a statement. [334]

Paul Goggins: The UK has not yet taken the decision on whether or not to sign the Council of Europe convention on action against trafficking in human beings and has no timetable for adoption at present. There are certain provisions in the convention which present concerns for the UK and which remain under active consideration. We want to resolve these issues before taking a decision on signature. We support fully all of the aims of the convention and we too want to see

widespread action to tackle this abhorrent trade at source, to protect and support the victims and bring those responsible to justice.

During the UK's forthcoming presidency of the EU the Government intend to treat combating trafficking in human beings as one of their justice and home affairs priorities. We are committed to agreeing a wide ranging EU action plan before the end of 2005 and will jointly host with Eurojust a conference focusing on investigating and prosecuting traffickers. We are considering other ways of highlighting this issue during our presidencies of the G8 and EU, both at ministerial and official levels.

The Government are committed to tackling trafficking in human beings, domestically and internationally, and are determined that the measures we take bring the criminals responsible for it to justice, while protecting the victims of trafficking, but without undermining our ability to control our borders.

Mr. Donaldson: To ask the Secretary of State for the Home Department what steps he is taking to control the trafficking of human beings into the UK. [3863]

Paul Goggins *[holding answer 13 June 2005]:* The Government are committed to tackling trafficking in human beings and have a comprehensive strategy including legislation, law enforcement, prevention, international co-operation and support of victims. We provide £20 million annually to Reflex, the multi-agency task force which co-ordinates the law enforcement response to organised immigration crime including people trafficking. Reflex operations continue to result in the disruption of organised crime groups.

The Serious Organised Crime Agency, due to become operational in April 2006, will have a strong focus on tackling organised immigration crime.

We have made human trafficking a priority during our EU presidency. We want to encourage greater police co-operation through EUROPOL and the sharing of best practice on investigations and prosecutions.

To be truly effective, the Government have recognised that they must also tackle trafficking at the source. There are a range of schemes in source countries, involving FCO and DfID, aimed at raising awareness of trafficking. We are also involved in capacity building work in source and transit countries.

Hunting Act (Policing Costs)

Mr. Gordon Prentice: To ask the Secretary of State for the Home Department what estimate he has made of the cost to date of policing the Hunting Act 2004. [3176]

Hazel Blears: The Association of Chief Police Officers informs me that this information has not been collected as a separate cost. It would therefore be very difficult to establish such costs from general policing costs in the countryside.

Identity Cards

Mr. Khan: To ask the Secretary of State for the Home Department what the penalty will be for those unwilling to pay the £1,000 civil penalty for not obtaining an identity card. [4139]

Mr. McNulty: Clause 6 of the Identity Cards Bill enables the Secretary of State to make an order imposing an obligation on individuals of a specified description to be entered in the Register. An individual could only be required to register once Parliament has agreed via a "super-affirmative" procedure to make registration compulsory. An individual who fails to register when required to do so under clause 6 will be liable to a civil penalty not exceeding £2,500.

Where an individual fails to satisfy his obligations under clause 6 subsections (2) and (3), he is liable for a further civil penalty not exceeding £2,500 in respect of each time the Secretary of State gives him notice requiring him to make an application and he fails to do so before the set deadline.

The Secretary of State must issue a code of practice setting out the matters that he will consider when determining the amount to be imposed by way of a civil penalty and before issuing the code, the Secretary of State must lay a draft of it before Parliament.

The Secretary of State must have regard to the code when imposing a civil penalty or considering a notice of objection under clause 34.

Clause 33 of the Bill sets out the requirements that apply to the Secretary of State when imposing a notice of a civil penalty. A person may object to the Secretary of State about the imposition of the civil penalty on the grounds that: he is not liable for it, that the circumstances of the contravention make the imposition of the penalty unreasonable or that the amount of the penalty is too high. This is set out in clause 34 of the Bill. A person may also appeal against the imposition of a civil penalty, as set out on clause 35 of the Bill, to the county court in England, Wales or Northern Ireland or to the Sheriff in Scotland.

In the case of non-payment of a civil penalty the Secretary of State will enforce the debt through the civil courts.

Ms Butler: To ask the Secretary of State for the Home Department what the penalties will be for UK residents who refuse to register for the proposed identity card. [4414]

Mr. McNulty: An individual who refused to comply with the registration requirements when applying for a document designated under clause 4 of the Identity Cards Bill (such as a passport) would not be issued with the designated document.

Clause 6 of the Identity Cards Bill enables the Secretary of State to make an order imposing an obligation on individuals of a specified description to be entered in the Register. An individual could only be required to register once Parliament has agreed via a "super-affirmative" procedure to make registration compulsory. An individual who fails to register when required to do so under clause six will be liable to a civil penalty not exceeding £2,500.

Where an individual fails to satisfy his obligations under clause 6 subsections (2) and (3), he is liable for a further civil penalty not exceeding £2,500 in respect of each time the Secretary of State gives him notice requiring him to make an application and he fails to do so before the set deadline.

The Secretary of State must issue a code of practice setting out the matters that he will consider when determining the amount to be imposed by way of a civil penalty and before issuing the code, the Secretary of State must lay a draft of it before Parliament. The Secretary of State must have regard to the code when imposing a civil penalty or considering a notice of objection under clause 34.

Clause 33 of the Bill sets out the requirements that apply to the Secretary of State when imposing a notice of a civil penalty. A person may object to the Secretary of State about the imposition of the civil penalty on the grounds that: he is not liable for it, that the circumstances of the contravention make the imposition of the penalty unreasonable or that the amount of the penalty is too high. This is set out in clause 34 of the Bill. A person may also appeal against the imposition of a civil penalty, as set out on clause 35 of the Bill, to the county court in England, Wales or Northern Ireland or to the Sheriff in Scotland.

In the case of non-payment of a civil penalty the Secretary of State will enforce the debt through the civil courts.

Mr. Khan: To ask the Secretary of State for the Home Department what assessment he has made of the likely effects of identity cards on vulnerable groups in society. [4133]

Mr. McNulty: We are taking close consideration of the needs of vulnerable groups in designing the requirements for the identity cards system.

The Special Issues ID cards research conducted at the end of 2004 and the United Kingdom Passport Service biometric enrolment trial published in May 2005 have consulted a range of faith, race and nationality groups as well as stakeholders representing people with disabilities and disadvantaged groups (for example organisations representing blind people, deaf people, the elderly and physically and mentally disabled, transgender groups, Gypsies or the homeless).

Consultations with groups representing more vulnerable groups in society will continue to ensure that their requirements are fed into the design of the scheme.

Mr. Khan: To ask the Secretary of State for the Home Department whether there are plans to include *(a)* DNA and *(b)* medical records on the National Identity Register in the second stage of the identity cards process. [4172]

Mr. McNulty: The Identity Cards Scheme is not proposing to use DNA as one of the biometric identifiers. Clause 43 of the Identity Cards Bill defines biometric information as data about a person's external characteristics, e.g. facial image, iris pattern or fingerprints and therefore excludes DNA. DNA is not included in the list of information at Schedule one of the Identity Cards Bill that may be held on the National Identity Register and there is no power under Clause five of the Bill (applications relating to entries in the Register) for the Secretary of State to require a person to provide a DNA sample.

The Identity Cards Scheme is not proposing to include medical records on the National Identity Register. Clause one and Schedule one of the Identity Cards Bill sets out what information could be held on the Register. In general the storage of medical information on the Register would not be allowed by the Bill as medical information does not fall within the definition of registerable facts as set out in Clause 1(5) of the Bill.

The Bill does allow for the storage of voluntary information with the consent of both the person who is registered and the Secretary of State.

Mr. Hancock: To ask the Secretary of State for the Home Department what provisions for financially disadvantaged individuals will be made to offset the cost of the proposed identification cards. [4525]

Mr. McNulty: The Identity Cards Bill gives the Secretary of State the power to set fees to cover the costs of the scheme, subject to Parliament's consent. This is set out in clause 37 of the Bill. No decisions have yet been made on the fee schedule or concessionary fees and the final say will rest with Parliament.

Harry Cohen: To ask the Secretary of State for the Home Department whether consent in the proposed Identity Card Bill will be defined by reference to Directive 95/46/EC. [4577]

Mr. McNulty: Clause 14 of the Identity Cards Bill as introduced into Parliament on 25 May 2005 contains provisions relating to situations in which a card-holder authorises, or otherwise consents to, a service provider's checking the national identity register against his identity card. The clause restricts the information which may be provided to a subset of information confirming identity. Clause 14 does not define consent as it is a commonly used and understood term.

Harry Cohen: To ask the Secretary of State for the Home Department if he will make a statement on the access that the police, security services and tax officials will be given to any national register established under legislation on identity cards. [4578]

Mr. McNulty: Other than properly authorised staff involved in the administration of the scheme no individual or organisation will have direct access to the National Identity Register itself.

Instead they will be allowed to verify information, or in certain circumstances, be able to obtain some information from the Register through the proposed agency. However, information from the Register can only be provided if specifically authorised by or under the powers in the Identity Cards Bill.

In the case of police, security services and tax officials, this can occur both with consent, as outlined in Clause 14 in the Identity Cards Bill and also without cardholder consent as long as it is within terms of Clauses 19–23.

Powers to provide information without consent in Clauses 19–23 are strictly limited. Information may be disclosed without consent to Security and Intelligence Agencies for the purposes of carrying out their functions.

The Police and the Commissioners of Her Majesty's Revenue and Customs may also be provided with information held on the scheme but the type of information and the circumstances in which it may be provided are limited by Clauses 19(3), 19(4) and 20(4).

Clause 20(4) in particular limits the provision of information on when a person's record on the Register has been checked to purposes connected with the prevention and detection of serious crime.

The Bill ensures that provision of information without consent will be properly regulated and subject to independent oversight. Unauthorised disclosure of information from the Register is a criminal offence under Clause 29 of the Bill.

Immigration and Asylum

Lynne Jones: To ask the Secretary of State for the Home Department how many failed asylum seekers were in receipt of section 4 support on *(a)* 1 January 2004, *(b)* 1 July 2004, *(c)* 1 December 2004, *(d)* 1 January 2005, *(e)* 1 February 2005 and *(f)* 1 March 2005. [3301]

Mr. McNulty: The information is not available in the precise format requested. The information available is as follows:

Number of people supported under section 4 of the Immigration and Asylum Act 1999 broken down by region

Region	*Number supported as at 1 April 2005*[1]
East Midlands	440
East of England	25
Greater London	475
North East	320
North West	965
Scotland	100
South East	40
South West	185
Wales	155
West Midlands	1,140
Yorkshire and the Humber	1,335
Total	5,180

[1] Numbers are provisional and rounded to nearest 5. As a consequence they may not sum due to rounding

Mr. Oaten: To ask the Secretary of State for the Home Department how many asylum seekers are being held in Prison Service establishments. [4681]

Mr. McNulty: Quarterly snapshots are published showing the number of people detained under Immigration Act powers on the last Saturday of each quarter.

The number of individuals recorded as having sought asylum at some stage detained in Prison Service establishments solely under Immigration Act powers as at 26 March 2005 was 125. This figure has been rounded to the nearest five, in accordance with National Statistics protocols.

Information on persons detained solely under Immigration Act powers is published on the Home Office Research Development and Statistics Directorate website athttp://www.homeoffice.gov.uk/rds/immigration1.html.

Lynne Jones: To ask the Secretary of State for the Home Department how many failed asylum seekers are in receipt of section 4 support, broken down by *(a)* nationality, *(b)* regional location, *(c)* type of accommodation provided and *(d)* accommodation provider. [3302]

Mr. McNulty: Information on the number of failed asylum seekers in receipt of support under section 4 of the Immigration and Nationality Act 1999 is provided in the table. Information on the nationality of those in receipt of support is not readily available and could be produced only by examination of individual records. Information on the type of accommodation provided by individual providers is provided in the table.

List of section 4 accommodation providers and type of support provided

Name of provider	*Total number of asylum seekers including dependants supported*[1]	*Type of support provided*
M&Q	3,980	Accommodation and vouchers for food
RCA	365	Accommodation and vouchers for food
YMCA	180	Mixture of full board accommodation (including food) and accommodation only with vouchers for food
Clearsprings	205	Accommodation and vouchers for food
Angel	260	Mixture of full board accommodation (including food) and accommodation only with vouchers for food
Caradon	195	Accommodation and vouchers for food
Others	5	Accommodation and vouchers for food

[1] All figures are provisional and rounded to nearest 5. Figures may not sum due to rounding.

Number of people supported under section 4 of the Immigration and Asylum Act 1999 broken down by region

Region	*Number supported as at 1 April 2005*[1]
East Midlands	440
East of England	25
Greater London	475
North east	320
North west	965
Scotland	100
South east	40
South west	185
Wales	155
West Midlands	1,140
Yorkshire and the Humber	1,335
Total	5,180

[1] Numbers are provisional and rounded to nearest 5. As a consequence they may not sum due to rounding.

Mr. Lidington: To ask the Secretary of State for the Home Department what his target timetable is for clearing the backlog of decisions on applications for Indefinite Leave to Remain by failed asylum seekers who were granted Exceptional Leave to Remain; and if he will make a statement. [56]

Mr. McNulty: The current aim is to reduce the backlog of applications for Indefinite Leave to Remain from persons who were granted Exceptional Leave to Remain to levels consistent with meeting service standards by March 2006.

Mr. Amess: To ask the Secretary of State for the Home Department what recent assessment he has made of measures he has taken to control *(a)* illegal immigration and *(b)* unfounded asylum claims. [3703]

Mr. McNulty: We have already made significant improvements to border controls by expanding our juxtaposed controls, deploying new detection technology and increasing our airline liaison network overseas. This has had a significant impact both on deterring illegal immigration and reducing asylum intake.

Recent measures to tackle unfounded asylum applications have been very successful—the number of claims (and unfounded claims) has reduced significantly since 2002. We are taking further steps to deal with this issue, as set out in the five year strategy for asylum and immigration, "Controlling our Borders: Making migration work for Britain" which was published in February 2005 [Cm 6472]. This includes plans to introduce faster, tightly-managed processes for all new asylum claimants and maintaining existing detained processes alongside new, faster, non- detained processes which are currently being developed and will be implemented in phases.

Interception of Communications

Harry Cohen: To ask the Secretary of State for the Home Department how many complaints have been made in relation to the interception of communications under *(a)* the Interception of Communications Act 1985 and *(b)* the Regulation of Investigatory Powers Act 2000 for each year since such complaints have been permitted; and how many complaints were upheld in each year. [4575]

Hazel Blears: The information requested is as follows:

(a) The records of the Interception of Communications Tribunal show that the number of complaints they received since its inception were as follows:

	Number
1985–86	[1]30
1987	45
1988	30
1989	49
1990	59
1991	58
1992	44
1993	41
1994	37
1995	64
1996	52
1997	79
1998	75
1999	69
2000–01	[2]60

[1] First year of operation
[2] Last year of operation

The Interception of Communications Tribunal found that there had been no contravention of sections 2 to 5 of IOCA. Consequently, no complaints were upheld.

(b) The Investigatory Powers Tribunal (IPT), established under the Regulation of Investigatory Powers Act (RIPA), came into being on 2 October 2000. From that date the IPT assumed responsibility for the jurisdiction previously held by, amongst others, the Interception of Communications Tribunal.

In his Annual Reports to the Prime Minister, the Interception of Communications Commissioner explained that complaints to the IPT could not be easily "categorised" under the three tribunal system that existed before RIPA (i.e. the Interception of Communications Tribunal, the Security Service Tribunal and the Intelligence Services Tribunal). Consequently it is not possible to detail the number of complaints lodged with the IPT that relate to the interception of communications that would have previously been considered by the Interception of Communications Tribunal.

The total number of complaints received by the IPT are as follows:

	Number
2000	[1]11
2001	91
2002	130
2003	109
2004	[2]—

[1] First three months of operation
[2] Figures to be published soon in the Commissioner's Annual 2004 Report

On no occasion did the Investigatory Powers Tribunal conclude that there had been a contravention of RIPA or the Human Rights Act 1998. Consequently, no complaints were upheld.

The Investigatory Powers Tribunal, like the Interception of Communications Tribunal before it, is a wholly independent body made up of senior members of the legal profession.

Israel

Mark Lazarowicz: To ask the Secretary of State for the Home Department what representations he has made to the Israeli authorities concerning the passage through the Separation Wall of farmers from the Jayyous area to their land. [4265]

Dr. Howells: I have been asked to reply.

While Israel has a legitimate right to defend itself against terrorist attacks, we consider that the construction of the barrier on occupied land is unlawful. My right hon. Friend the Foreign Secretary raised his concerns about the route of the barrier with Israeli Foreign Minister Silvan Shalom during his visit to Israel on 7 June.

Diplomats at the British Consulate General in Jerusalem monitor conditions in Jayyous, where the impact of the barrier on the local Palestinian population is especially severe. The British Embassy in Tel Aviv has made specific representations to the Israeli Government on the impact of its actions in this area.

Licensed Premises (Violent Crime)

Mr. Don Foster: To ask the Secretary of State for the Home Department how many violent offences committed in connection with licensed premises there were in each police area in each year from 1997; and if he will make a statement. [3047]

Hazel Blears: The available information is for 2002–03 and 2003–04 and is given in the table. Information for earlier years is not currently available.

These figures relate to violence recorded by the police rather than violence committed. Therefore they should not be taken as a complete illustration of the number of violent offences committed in connection with licensed premises.

For example, in certain areas where alcohol-related violence is particularly prevalent, local police are more likely to police city centres on Friday and Saturday nights thus recording more incidents of violent offences committed in connection with licensed premises. If football-related violence is a problem, the choice to send police officers to the match will undoubtedly lead to more violent crime being recorded than if they did not attend. There are other examples, such as the pro-active policing of antisocial behaviour.

Number of violent offences committed in connection with licensed premises by force for 2002–03 and 2003–04

Force	*2002–03*	*2003–04*

Magic Mushrooms

Mr. Oaten: To ask the Secretary of State for the Home Department if he will place in the Library a copy of the advice provided to him by the Advisory Council on the Misuse of Drugs in relation to the change in the law on magic mushrooms under the Drugs Act 2005. [4673]

Paul Goggins: The Advisory Council was informed of the clarification of the law on magic mushrooms in a letter from the Home Office on 6 December 2004. The Chair of the Advisory Council, Sir Michael Rawlins wrote to me on 2 June setting out the Advisory Council's support for the measure. A copy of the letter will be placed in the Library.

Missing Children

Helen Southworth: To ask the Secretary of State for the Home Department how many children were reported to the police as missing from home in the last year for which figures are available, broken down by *(a)* region, *(b)* age and *(c)* gender. [2647]

Hazel Blears: The Home Office does not collect data on the number of children who go missing from home.

National Firearms Register

Danny Alexander: To ask the Secretary of State for the Home Department when, and at what cost to public funds the National Firearms Register became operational; and if he will make a statement. [1583]

Hazel Blears: The Government remain fully committed to a National Firearms Licensing Management System (NFLMS). The main purpose of pilot testing is to reveal any potential problems that may arise. Acceptance testing last summer did highlight a number of issues but a full investigation was launched immediately to resolve them and to re-instate the roll-out programme. The NFLMS is scheduled to start going live on 11 July 2005 and will be ready for forces to take once it has been successfully signed off.

The total cost of the project to date is in the region of £5.4 million.

Offences Against the Person Act

Andrew Selous: To ask the Secretary of State for the Home Department how many prosecutions there were under the Offences Against the Person Act 1861, section 16 (as amended), for repeated threats to kill in *(a)* 2002, *(b)* 2003 and *(c)* 2004. [1287]

Hazel Blears: The data contained in the table gives the number of defendants proceeded against for "making threats to kill" under the Offences Against the Person Act 1861, Section 16 (as amended), England and Wales 2002 to 2003.

Statistics on court proceedings for 2004 will be published in the autumn.

Number of defendants proceeded against for "making threats to kill" under Offences Against the Person Act 1861, section 16 (as amended) [1]
England and Wales 2002 to 2003

	Proceeded against
2002	3,462
2003	3,721

[1] These data are on the principal offence basis.

Overseas Corruption

Malcolm Bruce: To ask the Secretary of State for the Home Department how many of the allegations of overseas corruption held by the National Criminal Intelligence Service come from *(a)* Africa, *(b)* Latin

America, *(c)* the Caribbean, *(d)* the Middle East, *(e)* North Africa, *(f)* North America, *(g)* Central Asia, *(h)* South Asia, *(i)* Europe and *(j)* the Pacific. [4227]

Hazel Blears: The information is as follows:

		Number
(a)	Africa	15
(b)	Latin America	2
(c)	The Caribbean	2
(d)	The Middle East	5
(e)	North Africa	0
(f)	North America	3
(g)	Central Asia	0
(h)	South Asia	4
(i)	Europe	11
(j)	The Pacific	1

Malcolm Bruce: To ask the Secretary of State for the Home Department how many allegations are on the register of allegations of overseas corruption held by the National Criminal Intelligence Service. [4228]

Hazel Blears: The National Criminal Intelligence Service currently has 44 referrals on the Anti-terrorism, Crime and Security Act register.

Pedicabs/Rickshaws

Mrs. Dunwoody: To ask the Secretary of State for the Home Department what discussions he has had with the police about parking and traffic offences committed by the riders of pedicabs or rickshaws. [3178]

Hazel Blears: I have held no discussions specifically on this issue.

Mrs. Dunwoody: To ask the Secretary of State for the Home Department what recent discussions he has had with the police about assaults committed by the riders of pedicabs or rickshaws. [3180]

Hazel Blears: I have had no discussions specifically on this issue. Investigation of offences is an operational matter for individual chief officers of police.

Mrs. Dunwoody: To ask the Secretary of State for the Home Department how many *(a)* parking and *(b)* traffic offences have been committed by the riders of pedicabs and rickshaws in the last 12 months. [3181]

Paul Goggins: It is not possible to identify how many riders of pedicabs or rickshaws have been convicted of these offences from the data held on the Home Office Court Proceedings database, as this information is not centrally collected.

Police

Lynne Featherstone: To ask the Secretary of State for the Home Department how many police officers are subject to *(a)* internal investigations and *(b)* disciplinary proceedings; and if he will make a statement. [4662]

Hazel Blears: Information about the number of police officers subject to internal investigations and disciplinary proceedings is not held centrally by the Home Office. It could therefore be obtained only at disproportionate cost.

Mr. Malins: To ask the Secretary of State for the Home Department if he will list the forms completed by the police following *(a)* the report of a criminal offence and *(b)* the arrest of a suspect. [2966]

Hazel Blears: A crime report form will be completed following every report of a criminal offence. Depending on the nature of the offence reported, a witness and/or victim statement will be taken at the beginning of the investigation.

For a person arrested and taken to the police station, a custody record will be completed in all cases. A custody record must be made under Section 37(4) of the Police and Criminal Evidence Act 1984 by the custody officer for every person detained in a police station before charge. The content and number of entries will vary according to what happens to the detained person, the period of detention, the course of the investigation and the outcome.

Lynne Jones: To ask the Secretary of State for the Home Department what guidelines *(a)* his Department and *(b)* the Association of Chief Police Officers have issued to police forces on the destruction of (i) paper-based and (ii) computer-based files and crime reports; and if he will make a statement. [3045]

Hazel Blears: The Home Office does not issue guidance on these matters. I understand that the following relevant guidelines have been issued by the Association of Chief Police Officers (ACPO): General Rules for Criminal Record Weeding on Police Systems (issued November 2000); ACPO Data Protection Code of Practice (October 2002); Guidance on the Disposal and Retention of Police Records (November 2003). The Rules for Criminal Record Weeding are currently under active review and will be replaced by new Retention Guidelines.

Lynne Featherstone: To ask the Secretary of State for the Home Department how many attacks there have been on police officers in each of the last five years, broken down by police authority; how many people have been successfully prosecuted for carrying out such attacks; how many prosecutions are ongoing; and if he will make a statement. [4157]

Hazel Blears *[holding answer 15 June 2005]:* The available information relates to offences of assault on a constable. Table 1 gives the number of offences recorded by the police by police force area for 1999–2000 to 2003–04. Because of the introduction of the National Crime Recording Standard in April 2002, figures before and after that date are not directly comparable.

Table 2 gives the number of persons found guilty of such offences and covers the period 1999 to 2000.

Because recorded crime data relates to offences and court proceedings data relates to defendants, the two datasets are not directly comparable.

Table 1: Recorded offences of assault on a constable, England and Wales 1999–2000 to 2003–04

Number of offences

Police force area	*1999–2000*	*2000–01*	*2001–02*	*2002–03*[1]	*2003–04*

[1] Offence includes assault on a constable under the Police Act 1996 Sec. 89(1) as well as offences against similar provisions in local acts.
[2] These data are on a principal offence basis.
[3] Staffordshire police force were only able to submit sample data for persons proceeded against and convicted in the magistrates' courts for the year 2000. Although sufficient to estimate higher orders of data, these data are not robust enough at a detailed level and have been excluded from the table.

Daniel Kawczynski: To ask the Secretary of State for the Home Department if he will take steps to ensure West Mercia police force continues to patrol the parish of Pontesbury, Shropshire. [2793]

Hazel Blears: The deployment of patrolling officers is an operational matter for the chief constable of West Mercia police force.

The Government support visible and accessible policing and have made a commitment that by 2008, every area in England and Wales will benefit from dedicated neighbourhood policing teams. These teams will provide a responsive police presence in rural and urban areas.

Lynne Featherstone: To ask the Secretary of State for the Home Department how many *(a)* fatal and *(b)* non-fatal accidents involving police service vehicles there were in each year since 1995, broken down by police authority; and if he will make a statement. [2892]

Hazel Blears: Figures for road traffic collisions are currently available from 2002–03.

The available information for the numbers of casualties and degree of injury from road traffic collisions resulting from immediate/emergency response and police pursuits on public roads involving all police forces in England and Wales is provided in the table.

[1] Data is not available in 2003–04

Helen Jones: To ask the Secretary of State for the Home Department what recent discussions he has had regarding the future of the Bruche police training centre; and what decisions have been made about the future of the centre. [1131]

Hazel Blears *[holding answer 26 May 2005]:* The Bruche police training centre is the property of the Central Police Training and Development Agency (Centrex) and, as such, its future is the responsibility of the Centrex board and the organisation's chief executive, Norman Bettison.

Centrex are in the process of reviewing and producing an updated version of their estates strategy.

Lynne Featherstone: To ask the Secretary of State for the Home Department how many *(a)* police patrol vehicles, *(b)* police vans, *(c)* unmarked police vehicles and *(d)* other police vehicles are available in each London borough; and if he will make a statement. [2895]

Hazel Blears: The information requested is not collected centrally.

Prisons (Staff Vacancies)

Lynne Featherstone: To ask the Secretary of State for the Home Department how many staff vacancies there were at each *(a)* prison and *(b)* young offenders institution on 31 December (i) 2002, (ii) 2003 and (iii) 2004; and if he will make a statement. [2893]

Fiona Mactaggart: Information on staff vacancies against operational staffing requirement at 31 December 2002, 2003 and 2004 for each public sector prison establishment is contained in the table. Operational posts are highlighted separately within the table. The figures represent a snapshot of the staffing position in establishments. Details about levels of vacancies within privately managed establishments are not routinely collected and are therefore not included in the table.

The Service has had considerable success in filling posts over the past three years and shortfalls among operational staff over the past three years have fallen steadily. To cover vacancies in the short-term certain establishments are allowing officers to work additional hours as part of the 'Contracted Supplementary Hours Scheme'. This scheme contributed the equivalent of 463 full-time officers at 31 December 2004. At that time the total operational staff availability was 25,383 compared with an operational staffing requirement of 25,704, resulting in a Service-wide shortfall of just 1.2 per cent., well within an acceptable operating margin.

Staffing levels in non-operational roles are more fluid and vacancy figures reflect a number of reviews taking place across the Prison Service and work to introduce greater efficiencies. This led to decisions to leave posts unfilled.

Race Relations

Keith Vaz: To ask the Secretary of State for the Home Department what arrangements are in place to ensure that bodies within the responsibility of his Department comply with the requirements of the Race Relations (Amendment) Act 2000. [3550]

Paul Goggins: The Race Relations (Amendment) Act 2000 places a general duty on Government Departments to have regard to the need to *(a)* eliminate unlawful racial discrimination; and *(b)* promote equality of opportunity and good relations between persons of different racial groups. The general duty also applies to a large number of specified public authorities.

The Home Secretary has also made Orders under the Act to place the "specific duties" on named public authorities. The list of bodies subject to the general and specific duties is updated periodically in consultation with the Commission for Racial Equality and other Government Departments. One of these specific duties is to produce a Race Equality Scheme that sets out their arrangements for complying with the Act.

The Home Office published its revised race equality scheme on 26 May 2005. In addition to the legislative requirements the scheme also sets out key challenges, objectives and targets on race equality. The Home Office race equality scheme encompasses a number of associate schemes such as the Prison Service, United Kingdom Passport Service and National Probation Directorate and includes the associate race equality scheme for Her Majesty's inspectorate of constabulary. The Home Office will continue to ensure that other public bodies comply with the Race Relations (Amendment) Act.

Speed Cameras

Mr. Amess: To ask the Secretary of State for the Home Department how many tickets issued following infringements caught on speed cameras have been challenged and upheld in each year since their introduction in *(a)* Essex and *(b)* Southend. [4586]

Paul Goggins: Information is not available centrally on the number of people prosecuted for speeding offences detected by camera who elect to challenge a fixed penalty notice.

David Davis: To ask the Secretary of State for the Home Department how much was raised in fines from speed cameras in the Humberside area in each of the past three years. [3593]

Paul Goggins: Information on the revenue raised from speed offences detected by camera is not available.

However the table shows, for the Humberside police force area, the number of fixed penalties ordered to be paid and the number of court fines for such offences in the calendar years 2001 to 2003 (latest available). Information for 2004 is not yet available.

Not all fines and fixed penalties will have been paid.

Fixed penalty and court proceedings data for speed offences detected by cameras[1] within the Humberside police force area, 2001, 2002 and 2003[2]

Number of offences

	Fixed Penalties		Court Proceedings[3]		
	Number of tickets[4]	*Estimated revenue*[5] *(£)*	*Number of fines*	*Total amount of fine (£)*	*Average fine (£)*
2001[6]	13,600	816,200	15	3,150	210
2002[7]	5,300	320,100	11	1,650	150
2003[2]	23,800	1,426,000	10	1,300	127

[1] Offences under the Road Traffic Regulation Act 1984 and The Motor Vehicles (Speed Limits on Motorways) Regulations 1973.
[2] Humberside police joined the Safety Camera Funding Scheme in 2003.
[3] Includes cases where fixed penalty notices were originally issued but not paid and subsequently referred to court.
[4] Only covers tickets paid where there is no further action.
[5] Estimate based on £60 fixed penalty charge.
[6] A single month's shortfall was found for court proceedings summary motoring offences within Humberside police force in 2001.
[7] Includes six months fixed penalty notice data only.

Under-age Sales Prosecutions

Sarah Teather: To ask the Secretary of State for the Home Department how many businesses were prosecuted for selling *(a)* alcohol, *(b)* glue products and *(c)* fireworks to people under age in (i) Brent East and (ii) each London borough in each of the last five years. [2550]

Hazel Blears: The available information is contained in the tables and gives the number of defendants proceeded against at magistrates' courts/London borough, 1999 to 2003 for: selling alcohol and fireworks to persons underage. There were no prosecutions as notified to the Home Office Court Proceedings for retailers supplying intoxicating substances to persons under 18.

Statistics on court proceedings for 2004 will be published in the autumn.

Number of defendants[1] proceeded against at magistrates courts for "selling alcohol to persons underage"[2], by magistrates courts/London borough, 1999 to 2003

[1] These data are on the principal offence basis.
[2] Includes: "Selling intoxicating liquor to persons under 18 for consumption on the premises" and "Wholesaler selling intoxicating liquor to person under 18".

Vehicle Recovery Costs

Lynne Featherstone: To ask the Secretary of State for the Home Department how many vehicles were recovered by police forces in each of the last 10 years; and at what cost; and if he will make a statement. [4612]

Hazel Blears: Information on stolen vehicles recovered ceased to be collected from 2001–02. Prior to that date the available figures were published annually in chapter 2 of the Command Paper "Criminal Statistics, England and Wales". Copies of the all the relevant publications are available in the Library.

Information is not collected centrally on the cost of recovery of stolen vehicles.

Victim Support National Office

Chris Grayling: To ask the Secretary of State for the Home Department what assessment he has made of the paper approved by the National Council of Victim Support in March on an external review of the role, scope and location of the Victim Support National Office; and if he will make a statement. [2699]

Fiona Mactaggart: The Home Office has no formal seat on Victim Support's National Council; and has not therefore conducted an assessment of the paper submitted to the organisation's National Council.

As a condition of grant in aid the Home Office requires Victim Support to have a management and organisational structure capable of delivering Criminal Justice System objectives effectively, economically and efficiently. The Home Office expects Victim Support to maximise the use of staff skills, volunteers' skills and other resources and to deliver good value for money.

Youth Justice and Criminal Evidence Act

Vera Baird: To ask the Secretary of State for the Home Department (1) when he will publish the research carried out by London Metropolitan University into section 41 of the Youth Justice and Criminal Evidence Act 1999; [733]

(2) what audit is carried out by his Department of the applications made to admit previous sexual history in rape trials. [591]

Paul Goggins: Provisions on the admission of evidence and questioning relating to previous sexual history in criminal proceedings are set out in sections 41 to 43 of the Youth Justice and Criminal Evidence Act 1999. The Home Office commissioned London Metropolitan University to carry out during 2003–04 research on the working of these provisions. The findings of this research are due to be published this autumn. Although the statistical data requested are not identifiable within the data regularly collected centrally, this research study is expected to provide some information on the proportion of rape trials in which applications to admit previous sexual history evidence are made and the success rate of applications.

Zimbabwe

Lynne Jones: To ask the Secretary of State for the Home Department if the Government will implement the UNHCR's recommendation for states to suspend all removals to Zimbabwe. [3306]

Mr. McNulty: Asylum and human rights claims by Zimbabwean nationals are considered on their individual merits in accordance with our obligations under the 1951 UN Refugee Convention and the European convention on human rights (ECHR). As with any other nationality, Zimbabweans who meet the definition of a refugee in the 1951 Convention are granted asylum. If they do not qualify for asylum, but there are other circumstances that make them particularly vulnerable and engage our obligations under the ECHR, they are granted humanitarian protection or discretionary leave. If their application is refused, they have a right of appeal to the independent Asylum and Immigration Tribunal. In this way we ensure that we provide protection to those Zimbabweans who need it.

Each application is considered against the background of the latest available country information from a wide range of reliable sources including international organisations, non-governmental organisations and the media. In addition, we are in continual dialogue with the Foreign and Commonwealth Office about country conditions in Zimbabwe.

Asylum decisions are based on the circumstances of the individual claimant and, while we are aware of the United Nations High Commissioner for Refugees' advice based on a general assessment of conditions in Zimbabwe, that does not mean that it would be unsafe for failed Zimbabwean asylum seekers to return to Zimbabwe. Where it is clear that there are Zimbabweans in need of international protection and the asylum system will continue to provide that, but if an asylum and human rights claim is refused, and any appeal to the independent Asylum and Immigration Tribunal is unsuccessful, that means that it would be safe for that particular individual to return to Zimbabwe.

HEALTH

Abortion

Mr. Laxton: To ask the Secretary of State for Health how much has been given in grants to support abortion clinics outside the NHS in each of the last five years. [5196]

Caroline Flint: The Department has not provided any grants to approved independent sector abortion clinics in the last five years. Primary care trusts (PCTs) are responsible for providing reproductive health services which meet the needs of their local populations. Some may choose to contract services with the independent sector. No information is collected centrally on PCT expenditure on the provision of abortion services in non-national health service settings.

Acts of Parliament (Internet Access)

Mr. Gordon Prentice: To ask the Secretary of State for Health if she will take steps to make all Acts of Parliament published before 1988 for which her Department is responsible available online. [3719]

Jane Kennedy: The Controller of Her Majesty's Stationery Office (HMSO) within the Cabinet Office is the Queen's Printer of Acts of Parliament, and responsible for the publication of Acts of Parliament. HMSO have considered the publication of Acts prior to 1988, which is the earliest date when these were available electronically, but have decided not to do so as many have been heavily amended and to publish them in their original form would be misleading for many users. The Government are, however, taking forward development of a statute law database, which will contain the fully revised and updated text of all legislation from 1275. It is expected that this will be made available to the general public during 2006.

Alcohol Programmes

Tim Loughton: To ask the Secretary of State for Health how much was spent by the NHS on *(a)* alcohol awareness programmes and *(b)* alcohol-related treatment in the last period for which figures are available. [5496]

Caroline Flint: Primary care trusts are responsible for providing alcohol services and programmes from their core budgets. There are no centrally held figures on such expenditure. The Department has commissioned a national alcohol needs assessment for England, which will be published in July 2005.

Allergy Specialists

Mr. Rob Wilson: To ask the Secretary of State for Health what progress has been made in implementing the recommendations of the Health Select Committee in November 2004 that 40 new allergy specialists should be trained in the national health service. [5387]

Mr. Byrne: In its response to the Health Committee report on the provision of allergy services, the Government undertook to carry out a review of the available data and research on the epidemiology of allergic conditions, the demand for and provision of treatment and the effectiveness of relevant interventions. The Chief Medical Officer is overseeing this review of the evidence, which we hope to complete by the end of June 2006. It will inform decisions about what steps could be taken to address any gaps and pressures that it reveals.

Asthma

Mr. Jenkins: To ask the Secretary of State for Health how many *(a)* adults and *(b)* children in Burntwood, Lichfield and Tamworth primary care trust have been recorded as suffering from asthma in each year since 1997. [3321]

Ms Rosie Winterton: The information is not available in the requested format. However, information relating to the number of finished consultant episodes (FCEs) for the Burntwood, Lichfield and Tamworth primary care trust (PCT) area are shown in the tables. The data is split into age groups: 0 to 17 years—children and 18 years and over—adult.

Count of FCEs for asthma (ICD-10 Codes = J45, J46), PCT of residence—Burntwood, Lichfield and Tamworth. Data years: 1997–98 to 2003–04

Table 1. Primary diagnosis count of episodes where asthma is the primary diagnosis

	Age group	
	0–17 years	*18 years and over*
1997–98	143	171
1998–99	83	137
1999–2000	100	140
2000–01	86	106
2001–02	98	135
2002–03	75	104
2003–04	68	129

Table 2. Primary diagnosis count of episodes where asthma is mentioned in any of the primary or secondary diagnosis fields.

	Age group	
	0–17 years	*18 years and over*
1997–98	177	320
1998–99	124	273
1999–2000	133	330
2000–01	145	331
2001–02	119	400
2002–03	102	389
2003–04	104	423

Notes:

1. A FCE is defined as a period of admitted patient care under one consultant within one health care provider. Please note that the figures do not represent the number of patients, as a person may have more than one episode of care within the year.
2. Hospital episode statistics (HES) are compiled from data sent by over 300 national health service trusts and PCTs in England. The Health and Social Care Information Centre liaises closely with these organisations to encourage submission of complete and valid data and seeks to minimise inaccuracies and the effect of missing and invalid data via HES processes. While this brings about improvement over time, some shortcomings remain.
3. The primary diagnosis is the first of up to 14 (seven prior to 2002–03) diagnosis fields in the HES data set and provides the main reason why the patient was in hospital.
4. As well as the primary diagnosis, there are up to 13 (six prior to 2002–03) secondary diagnosis fields in HES that show other diagnoses relevant to the episode of care.
5. "All Diagnoses count of episodes" figures represent a count of all FCE's where the diagnosis was mentioned in any of the 14 (seven prior to 2002–03) diagnosis fields in a HES record.
6. Figures have not been adjusted for shortfalls in data, that is the data is ungrossed.

Source:

HES, Health and Social Care Information Centre.

Breast Cancer (Waiting Times)

Mr. Lansley: To ask the Secretary of State for Health whether she plans to introduce a target to measure the period between GP referral and first outpatient appointment for women suffering from breast cancer but routinely referred; and how she plans to monitor the time women wait. [3446]

Ms Rosie Winterton: The target that women with suspected breast cancer should be seen by a specialist within two weeks of urgent referral by their general practitioner was introduced in April 1999 and currently 99.8 per cent. of women are seen within this target. The Labour Party manifesto gave the commitment that all women with breast symptoms should be seen within two

weeks of referral by their GP by 2008. Details of the introduction of this commitment and how it will be monitored are being finalised.

CAT/MRI Scanners

Tim Loughton: To ask the Secretary of State for Health which NHS hospitals are operating *(a)* NHS-owned and *(b)* privately-owned (i) CAT scanners and (ii) MRI scanners on NHS premises. [4636]

Ms Rosie Winterton: There are approximately 267 magnetic resonance imaging (MRI) scanners and 361 computed tomography (CT) fixed site scanners installed in national health service hospitals. Of these, 42 MRI scanners and 30 CT scanners are leased from privately-owned providers.

In addition, during July 2004-April 2005, 85 NHS sites also received mobile MRI scanning services as part of the Alliance Medical mobile MRI procurement programme.

Information on hospitals with MRI and CT scanners and NHS sites which have received mobile services has been placed in the Library.

Childhood Leukaemia (Power Lines)

Mrs. Dean: To ask the Secretary of State for Health (1) what plans she has to fund research projects into whether electromagnetic fields are a cause of childhood leukaemia; [4423]

(2) what advice she is giving to *(a)* other Government Departments and *(b)* local authorities with regard to the construction of new homes and schools in the vicinity of overhead power lines following publication of the Draper Report. [4424]

Caroline Flint: The Department provides funding under its radiation protection research programme for investigating the potential biological and health effects of electromagnetic fields at power frequencies. The work by Dr. Draper and colleagues on leukaemia and distance from power lines, recently published in the *British Medical Journal*, was funded under this programme (BMJ Vol. 330, 4 June 2005). The Department, together with the Health and Safety Executive, has also supported the World Health Organization (WHO) electromagnetic fields project since 1997. The WHO is due to review the health risks from power frequency fields later this year. The Health Protection Agency (HPA) has statutory responsibilities to advise on health risks from electromagnetic exposure and undertakes its own research to support this advice.

In 2004, on the basis of a comprehensive review of the existing body of research to date, the HPA's radiation protection division, previously the National Radiological Protection Board, recommended that in view of the scientific uncertainties the Government "consider the need for further precautionary measures" in relation to power frequency electromagnetic fields. It has also noted that the majority of higher magnetic fields are due to variations in the electricity supply and distribution system, the presence of substations and equipment in the home rather than proximity to power lines. Practical precautionary measures are now being considered in detail by a stakeholder group that includes Government Departments, agencies, the electricity industry, specialists and public concern groups. The latest work by Dr. Draper has increased the interest in these issues but the complex nature of the scientific and social issues mean that no immediate decisions will be made.

Dr. Tony Wright: To ask the Secretary of State for Health what action she is taking following the findings of the Draper report on the relationship between childhood leukaemia and proximity to high voltage power lines. [4552]

Caroline Flint: The recent publication by Dr. Draper and colleagues on leukaemia and distance from power lines have reinforced the need for continued departmental support for research into the causes of leukaemia and the role of electromagnetic fields (EMF). Measurements of EMF will be included in the next phase of Dr. Draper's work. The Department, together with the Health and Safety Executive, is continuing to fund the World Health Organisation (WHO) EMF project that started in 1997. The WHO is due to review the health risks from power frequency fields later this year.

The Health Protection Agency's (HPA) radiation protection division (RPD), which have statutory responsibilities to advise on health risks from electromagnetic field exposure, also undertakes research in support of its advice. In 2004, the HPA-RPD, when it was the National Radiological Protection Board, published a comprehensive scientific review in support of its new EMF guidelines. It recommended that, in view of the scientific uncertainties in relation to power frequency EMF, the Government should

"consider the need for further precautionary measures".

The HPA have also noted that the majority of higher magnetic fields are due to variations in the electricity supply and distribution system, the presence of substations and equipment in the home rather than proximity to power lines.

In addition to funding research, therefore, the Department is leading a stakeholder group to consider practical precautionary measures. The group includes Government departments, agencies, the electricity industry, specialists and public concern groups. The latest work by Dr. Draper has increased the interest in these issues but the complex nature of the scientific and social issues mean that no immediate decisions will be made.

Tim Loughton: To ask the Secretary of State for Health (1) what research her Department has carried out into *(a)* the causes of childhood leukaemia and *(b)* whether there is a link with electromagnetic fields; [4634]

(2) what assessment she has made of whether there is a link between electricity pylons and cancer in children; and if she will make a statement. [4644]

Caroline Flint: The Department provides funding under its radiation protection research programme for investigating the potential biological and health effects of electromagnetic fields at power frequencies. The work by Dr. Draper and colleagues on leukaemia and distance from power lines, recently published in the *British Medical Journal*, was funded under this programme

(BMJ Vol. 330, 4 June 2005). Electromagnetic field measurements will be included in the next phase of this study.

Details of other research concerned with childhood leukaemia supported by the National Cancer Research Institute's 15 partners, the largest Government and charitable funders of cancer research in the United Kingdom, can be found on the international cancer research portfolio database at www.cancerportfolio.org/faq.jsf#icrp.

The Department, together with the Health and Safety Executive, has supported the World Health Organization (WHO) electromagnetic fields project since 1997. The WHO is due to review the health risks from power frequency fields later this year. The Health Protection Agency (HPA), which has statutory responsibilities to advise on health risks from electromagnetic exposure, undertakes its own research to support this advice.

In 2004, on the basis of a comprehensive review of the existing body of research to date, the HPA's radiation protection division, previously the National Radiological Protection Board, recommended that, in view of the scientific uncertainties, the Government

"consider the need for further precautionary measures"

in relation to power frequency electromagnetic fields. It has also noted that the majority of higher magnetic fields are due to variations in the electricity supply and distribution system, the presence of substations and equipment in the home, rather than proximity to power lines. Practical precautionary measures are now being considered in detail by a stakeholder group that includes Government Departments, agencies, the electricity industry, specialists and public concern groups. The latest work by Dr. Draper has increased the interest in these issues but the complex nature of the scientific and social issues mean that no immediate decisions will be made.

Civil Servants

Dr. Cable: To ask the Secretary of State for Health what value for money procurement savings were identified and what reduction in civil service posts occurred in her Department in 2004–05. [4542]

Jane Kennedy: In the 2004 pre-Budget report, my right hon. Friend the Chancellor of the Exchequer reported Office of Government Commerce (OGC) value for money gains in central civil Government procurement for 2003–04 of £2 billion. OGC value for money procurement gains for 2004–05 are being calculated and will be published in the 2005 Treasury autumn performance report.

In the Budget 2005, my right hon. Friend announced a headcount reduction of 12,500 posts by the end of 2004–05, towards the Government's target of a gross reduction of 84,000 civil service and administrative posts by 2008.

The reduction of posts within the Department for the year 2004–05 are shown in the table.

Strength	*Full time equivalents*
April 2004	2,964
April 2005	[1]2,189

[1] Of which 139 are designated to transfer.

Consultant Cardiologists

Mr. Lansley: To ask the Secretary of State for Health how many *(a)* full-time equivalent and *(b)* headcount consultant cardiologists were working in the NHS in each year since 1997; if she will estimate the optimum number of consultant cardiologists required by the NHS in England; and if she will make a statement. [3362]

Mr. Byrne: The number of headcount and full-time equivalent consultant cardiologists working in the national health service in each year since 1997 is shown in the table.

Hospital, public health medicine and community health services medical consultants with a specialty in cardiology: England

	Number	*Number (headcount) and full- time equivalent*
1997	405	364
1998	458	415
1999	467	425
2000	546	483
2001	576	512
2002	609	561
2003	659	609
2004	710	663
December 2004	716	667

Note:
All data as at 30 September each year, except where stated for 31 December 2004.
Source:
NHS health and social care information centre medical and dental workforce census.

NHS plan commitments to increase the number of cardiologists and cardiothoracic surgeons between 1999 and 2004 have been exceeded.

It is the responsibility of primary care trusts and strategic health authorities to analyse their local situation and develop plans, in liaison with their local NHS trusts, to deliver high quality cardiology services and recruit the appropriate staff required to deliver these services.

Contraceptive Pill

Mr. Laxton: To ask the Secretary of State for Health how many prescriptions for the contraceptive pill were made in *(a)* 2002–03 and *(b)* 2003–04. [3385]

Jane Kennedy: The number of prescription items of contraceptives dispensed in the community in England was 8.6 million in 2002–03 and 8.7 million in 2003–04.

Correspondence

Mr. Steen: To ask the Secretary of State for Health when the Secretary of the Advisory Committee on Novel Foods and Processes on the Food Standards Agency will reply to the letter *(a)* from the hon. Member for Totnes dated 17 March and *(b)* from the

director of Genetic Food Alert dated 6 December 2004; and if she will make a statement on the reasons for the time to respond. [4780]

Caroline Flint *[holding answer 16 June 2005]:* The chairman of the Advisory Committee on Novel Foods and Processes (ACNFP) replied to the letter from the director of Genetic Food Alert on 14 June 2005. A reply to the letter from the hon. Member will be forwarded by the secretary of the ACNFP upon receipt of a copy of the reply issued by the ACNFP chairman.

A delay was incurred in replying to this letter due to the need for further information to be collated in relation to the request from Genetic Food Alert.

Dentistry

Mr. Evans: To ask the Secretary of State for Health how many full-time dentists there were in 1997; and how many there were in the last period for which figures are available. [4361]

Ms Rosie Winterton: Information on a whole time equivalent basis is not available, as dentists are able to vary the amount of hours they work and to vary their national health service commitment.

The numbers of NHS primary care dentists in England for each of the years requested are shown in the table.

Year[1]	*Number*
1997	16,462
2005	20,088

[1] As at 31 March each year

Tim Loughton: To ask the Secretary of State for Health how many registered dentists are practising in Sussex; and what the number was in 1997. [4473]

Ms Rosie Winterton: In Surrey and Sussex Strategic Health Authority area, the numbers of national health service dentists in each of the years requested are shown in the following table.

	Number
1997[1]	1,111
2005[1]	1,388

[1] As at 31 March each year.

Note:
This data is from the Dental Practice Board and relates to the number of dentists working in the general dental service and personal dental service. This is the latest available data as of 1 March 2005.

Mr. Chope: To ask the Secretary of State for Health if the Government will support the establishment of a new dental school at Southampton University. [4561]

Ms Rosie Winterton *[holding answer 14 June 2005]:* We are funding the biggest expansion of dental education since the inception of the national health service, involving the creation of an additional 170 training places for dental undergraduates. To support this 25 per cent., increase in capacity, we have allocated revenue funds growing to £29 million by 2010–11 and £20 million capital in each of the four years 2005–06 to 2008–09. A joint implementation group (JIG) comprising the Department and the Higher Education Funding Council for England is managing the expansion programme. The JIG invited all higher education institutions in England to make expressions of interest in having a new dental school by 26 May. These bids will be evaluated by the JIG at its meeting on 22 June and the short-listed respondents will be asked to submit a full business case and to make a presentation to the JIG later in the year.

Mr. Chope: To ask the Secretary of State for Health (1) pursuant to the statement by the Under-Secretary of State for Health on 7 June 2005, *Official Report*, column 114WH, on NHS dentistry, whether all those people registered as NHS patients at Robinsons dental practice will be able to migrate to the Whitecross dental care practice; and when the Whitecross dental practice will be operating with five full-time dentists; [4668]

(2) pursuant to the statement by the Under-Secretary of State for Health on 7 June 2005, *Official Report*, column 114WH, on NHS dentistry, what the conclusions were of the meeting between local practitioners and her Department on 8th June. [4669]

Ms Rosie Winterton *[holding answer 14 June 2005]:* The meeting between officials in the Department and the South and East Dorset Primary Care Trust (PCT) on June 8 2005 was positive. A number of applications for local practitioners to move to personal dental services (PDS) pilot contracts were reviewed, including the establishment of new practices. The applications for two of the new practices were subsequently agreed by the Department on June 10 2005, including the application for the new Whitecross dental practice in Christchurch. The two new practices will include a total of nine new full-time national health service dentists, delivering care to 22,500 patients. The PCT has assured me that all patients currently registered as NHS patients at the Robinsons dental practice will be able to transfer to the new Whitecross dental practice in Christchurch when it becomes operational in August 2005.

Mr. Lansley: To ask the Secretary of State for Health what assessment she has made of the number of trainee dentists in dental schools planning to undertake only NHS work when qualified. [3440]

Ms. Rosie Winterton: Each year, some 700 students graduate from dental schools in the United Kingdom. Almost all these newly qualified dentists undertake one year's vocational training in an attachment to a dental practice where patients are treated under the national health service. Through our reforms, we are seeking to make NHS dentistry more attractive to dentists so that, when they become eligible to practise independently, they maintain a significant commitment to the NHS.

Diabetes

Lynne Featherstone: To ask the Secretary of State for Health how much Government funding has been allocated to research into the causes of diabetes in each of the last five years; and if she will make a statement. [3068]

Ms Rosie Winterton: The main agency through which the Government supports medical and clinical research is the Medical Research Council (MRC). The MRC is

an independent body, funded by the Department of Trade and Industry via the Office of Science and Technology.

The MRC does not normally allocate funds to particular topics. Research proposals in all areas compete for the funding available. When appropriate, high quality research in particular areas of strategic importance may be given priority in competition for funds, but research excellence and importance to health continues to be the primary considerations in funding decisions. The MRC always welcomes high quality applications for support into any aspect of human health and these are judged in open competition with other demands on funding.

MRC expenditure on research concerned with diabetes since 1999[1] is shown in table 1.

[1] A composite figure for 2003–04 is not yet available.

Table 1

£ million

	Amount
1999–2000	6.5
2000–01	8.6
2001–02	9.8
2002–03	11.4

Over 75 per cent. of the Department's total expenditure on health research is devolved to and managed by national health service organisations. Table 2 shows NHS-reported spending from this funding in support of diabetes[1].

[1] This data was not collected centrally prior to 2001.

Table 2

£ million

	Amount
2001–02	13.9
2002–03	17.5
2003–04	18.2

Health Finance (Oxfordshire)

Mr. Andrew Smith: To ask the Secretary of State for Health how much money has been allocated to each of the health trusts serving Oxfordshire for 2005–06; and what the amount was in each of the previous five years. [4571]

Caroline Flint *[holding answer 16 June 2005]:* In 2000–01 to 2002–03, revenue allocations were made to health authorities (HAs). Table 1 shows the 2000–01 to 2002–03 revenue allocations to Berkshire, Buckinghamshire and Oxfordshire HAs. This area is now covered by Thames Valley Strategic Health Authority (SHA).

Table 1: Revenue allocations to HAs 2000–01 to 2002–03

HA name	*2000–01*	*2001–02*	*2002–03*
Berkshire	484,623	527,723	588,572
Buckinghamshire	407,599	443,321	493,959
Oxfordshire	364,378	396,426	445,458

2003–04 was the first time revenue allocations were made to primary care trusts (PCTs) for three years. Thames Valley SHA covers the Oxfordshire area. Table 2 shows the allocations made to those PCTs covered by the Thames Valley SHA for 2003–04 to 2005–06.

Table 2: Revenue allocations to PCTs within Thames Valley SHA

PCT name	*2003–04*	*2004–05*	*2005–06*
Bracknell Forest	76,897	83,840	91,268
Newbury and Community	74,039	81,251	89,016
Reading	160,450	175,771	192,392
Slough	98,923	108,728	119,200
Windsor, Ascot and Maidenhead	129,700	141,407	153,916
Wokingham	100,104	109,406	119,512
Chiltern and South Bucks	117,675	128,126	139,308
Milton Keynes	167,638	183,498	200,679
Vale of Aylesbury	143,593	157,179	171,899
Wycombe	107,852	117,956	128,925
Cherwell Vale	91,592	100,434	109,922
North East Oxfordshire	50,193	54,983	60,151
Oxford City	142,974	155,681	169,243
South East Oxfordshire	57,710	63,163	69,075
South West Oxfordshire	139,950	152,859	166,890

Note:

Comparisons cannot be made between allocation rounds. Prior to 2003–04 revenue allocations were made to HAs on an annual basis. In 2003–04, revenue allocations were for the first time made direct to PCTs for three years. In addition, comparisons cannot be made between allocations rounds, as the services covered by each allocation round may vary.

Mr. Andrew Smith: To ask the Secretary of State for Health what reports she has received of financial difficulties facing health trusts in Oxfordshire; and if she will make a statement. [4572]

Caroline Flint *[holding answer 16 June 2005]:* There have been no representations from Oxfordshire national health service trusts about financial difficulties. Oxfordshire health trusts all submitted balanced delivery plans.

It is now the responsibility of strategic health authorities to deliver both overall financial balance for their local health communities and to ensure the local NHS achieves financial balance.

Hearing Aids

Mr. Steen: To ask the Secretary of State for Health what the average waiting time for digital hearing aids is in *(a)* Devon and *(b)* England. [4779]

Mr. Byrne *[holding answer 16 June 2005]:* The information requested is not collected centrally.

Heart Disease (Children)

Tim Loughton: To ask the Secretary of State for Health how many children have been treated for heart disease; how many have been screened for signs of heart defects; and how many children have died from heart-related conditions in each of the last five years. [4466]

Mr. Byrne: Table 1 following shows numbers of admissions for cardiac conditions for children under 16 in England in the last five years for which data is available.

Table 1

	Admissions
1999–2000	2,125
2000–01	2,089
2001–02	2,232
2002–03	2,312
2003–04	2,475

Source:
Hospital episode statistics, Health and Social Care Information Centre. Figures are for cardiac conditions as a primary diagnosis. Patients may have more than one admission in a year.

No data is available on screening of children for signs of heart defects.

Table 2 following shows the latest available data on child deaths from heart-related conditions. In this table, children are defined as those under 16 years old, including neonates.

Table 2

	Deaths
1999	872
2000	781
2001	667
2002	621
2003	663

Source:
Office of National Statistics mortality data. Figures are for all deaths in England and Wales where heart disease is mentioned in the death certificate and include congenital malformations.

Hemel Hempstead Hospital

Mike Penning: To ask the Secretary of State for Health what representations she has received on changes to services at Hemel Hempstead hospital. [3991]

Ms Rosie Winterton: Since 1 January 2004, the Department has received several written representations from the hon. Member, hon. and right hon. Members both past and present and members of the public about Hemel Hempstead hospital.

Hepatitis C

Graham Stringer: To ask the Secretary of State for Health if she will update the Action Plan on hepatitis C. [3137]

Caroline Flint: The Hepatitis C Action Plan was published in July 2004. It serves as a broad framework for implementation of the Government's Hepatitis C Strategy for England Many of the actions set out in the plan will take time to effect. Implementation of the plan will be assessed via ongoing epidemiological surveillance and performance management. There are currently no plans to update the action plan.

Tim Loughton: To ask the Secretary of State for Health what estimate she has made of the number of people infected with hepatitis C; and how many people are currently receiving treatment for it. [4461]

Caroline Flint: It is estimated that around 200,000 people in England have been chronically infected with hepatitis C, though the majority may not be aware of their infection.

Currently treatment is not recommended for all patients diagnosed with chronic hepatitis C. In 2004, the then National Institute for Clinical Excellence, now the National Institute for Health and Clinical Excellence, recommended treatment for cases of moderate to severe chronic hepatitis. Cases with mild disease should remain under observation. Treatment is for a finite time; either six or 12 months. The Department does not hold figures for those currently receiving treatment.

Hertfordshire Hospitals

Mike Penning: To ask the Secretary of State for Health if she will list Hertfordshire hospitals which had ward closures in each year since May 1997, broken down by medical specialty. [4001]

Ms Rosie Winterton: The information requested is not held centrally. However, the opening and closing of wards is commonplace, to reflect demand and operational need at individual national health service trusts.

London Ambulance Service

Mr. Burstow: To ask the Secretary of State for Health what response her Department has made to the London Ambulance Service Patients Forum's letter of 11 May concerning the proliferation of mimic emergency ambulances in London. [3305]

Mr. Byrne: A copy of this letter has been placed in the Library.

Mental Health

Tim Loughton: To ask the Secretary of State for Health what the change in spending on mental health services has been in cash terms and as a percentage of overall NHS spending in each of the last five years. [4637]

Ms Rosie Winterton: The latest information available on national health service hospital and community health service (HCHS) expenditure is at 31 March 2003. The data shown in the table excludes social care spend on people with mental health problems and expenditure concerning people treated in primary care for whom specific diagnosis has not been reached. The figures therefore underestimate the total mental health expenditure.

Mental health service: NHS HCHS programme gross expenditure in cash terms over the five years from 1998–99 to 2002–03 in England

	1998–99	*1999–2000*	*2000–01*	*2001–02*	*2002–03*
Gross expenditure (cash terms)					
Total mental health (£ million)	3,051	3,411	3,826	4,062	4,598
Total increase in cash terms (£ million)	—	360	415	236	536
Total HCHS	25,494	27,633	30,099	31,977	35,087
Mental health proportion (percentages)	11.97	12.34	12.71	12.70	13.11

Mixed Sex Wards

Tim Loughton: To ask the Secretary of State for Health which NHS hospitals are operating mixed sex wards. [4635]

Ms Rosie Winterton: The information is not available in the format requested. The Department do not collect information on the number of single-sex or mixed-sex wards in use in national health service hospitals.

Guidance issued to the NHS requires the provision of single-sex accommodation, which can take a number of forms. NHS trusts may provide single rooms, single-sex bays, single-sex wards or combinations of these accommodation types.

The provision of single-sex accommodation is measured by compliance with three specific objectives set by the Department. These are designed to deliver separate sleeping areas for men and women, separate bathrooms and toilet facilities for men and women, and for those trusts delivering mental health services, safe facilities for patients in hospital who are mentally ill.

Compliance with the objectives is measured at trust level. The position of each NHS trust was published on 26 May 2005 and is available on the Department's website at www.dh.gov.uk and in the Library.

Mobile Telephones

John Hemming: To ask the Secretary of State for Health pursuant to the answer of 7 June 2005, *Official Report*, columns 531–32W, on mobile telephones, if she will commission research into the effect of interference from a mobile phone in a breast pocket on the variables in the dynamic equilibrium that forms part of the cardio-vascular system. [4663]

Caroline Flint: The Department has no immediate plans to commission further research into the effect of interference from a mobile phone on the cardiovascular system. The mobile telecommunications and health research (MTHR) programme in this country supports a range of studies including one on the effects of mobile phones on blood pressure and cardiac function in healthy people. The decisions on the scientific research priorities for this programme are in the hands of an independent programme management committee. Details of the MTHR programme and descriptions of all the studies are available on the MTHR website at www.mthr.org.uk.

Mumps

Tim Loughton: To ask the Secretary of State for Health how many cases of mumps among children have been reported in the last 12 months. [4641]

Mr. Byrne: The provisional annual total for laboratory confirmed cases of mumps aged under 15 years in 2004 is 736 and the provisional total for the first 22 weeks of 2005 is 1,149.

Information about confirmed cases of mumps by age and region is available on the Health Protection Agency's website at www.hpa.org.uk/infections/topics_az/mumps/data_reg age_htm.

Neonatal Care

Tim Loughton: To ask the Secretary of State for Health what the mortality rate for *(a)* babies and *(b)* infants was in each of the last 10 years. [4471]

John Healey: I have been asked to reply.

The information requested falls within the responsibility of the National Statistician, who has been asked to reply.

Letter from Colin Mowl to Mr. Tim Loughton, dated 20 June 2005:

The National Statistician has been asked to reply to your recent Parliamentary Question asking what the mortality rate for *(a)* babies and *(b)* infants was in each of the last 10 years. I am replying in his absence. (4471)

Figures on infant mortality are available by age at death for England and Wales. The most recent year for which figures are available is 2003. Numbers and rates in each of the last 10 years are shown in the attached table.

Infant mortality numbers and rates by age at death; 1994 to 2003, England and Wales

	Early neonatal (< 7 days)		*Neonatal (< 28 days)*		*Infant (< 1 year)*	
	Number	*Rate*[1]	*Number*	*Rate*[1]	*Number*	*Rate*[1]
1994	2,142	3.2	2,749	4.1	4,120	6.2
1995	2,104	3.2	2,698	4.2	3,982	6.1
1996	2,066	3.2	2,645	4.1	3,959	6.1
1997	1,941	3.0	2,517	3.9	3,799	5.9
1998	1,844	2.9	2,418	3.8	3,625	5.7
1999	1,833	2.9	2,435	3.9	3,621	5.8
2000	1,753	2.9	2,335	3.9	3,377	5.6
2001	1,598	2.7	2,137	3.6	3,240	5.4
2002	1,620	2.7	2,126	3.6	3,127	5.2
2003	1,749	2.8	2,264	3.6	3,306	5.3

[1] Rates per 1,000 live births

Series DH3 'Mortality statistics: Childhood, infant and perinatal' No. 36, Table 1

NHS Direct

Lynne Featherstone: To ask the Secretary of State for Health how many staff were employed by NHS Direct at 31 December *(a)* 2004, *(b)* 2003, *(c)* 2002 and *(d)* 2001; and if she will make a statement. [2883]

Mr. Byrne: The information is not collected centrally by the Department. However, the NHS Direct special health authority collects information on the number of nurses and call handlers in post for years 2002, 2003 and 2004, as shown in the following table. Data prior to 2002 is not available.

December	*Nurse*[1]	*Call handler*[1]
2002	1,037	516
2003	1,054	569
2004	1,034	611

[1] Data are shown as full time equivalent.

Lynne Featherstone: To ask the Secretary of State for Health what evaluation has taken place of the performance of NHS Direct; and if she will make a statement. [2885]

Mr. Byrne: Two evaluations have been made regarding NHS Direct, which can be found at: www.shef.ac.uk/scharr/mcru/reports.htm and www.healthcarecommission.org.uk/Homepage/fs/en

NHS Finance

Mr. Paul Goodman: To ask the Secretary of State for Health whether the *(a)* Thames Valley strategic health authority, *(b)* Buckinghamshire Hospitals NHS Trust, *(c)* Wycombe Primary Care Trust, *(d)* Buckinghamshire Mental Health Trust and *(e)* Two Shires Ambulance Trust is in (i) surplus and (ii) deficit; and if she will make a statement. [3235]

Caroline Flint: The latest year for which audited data on the financial position of national health service organisations is available is 2003–04. The financial position for Thames Valley strategic health authority (SHA), Buckinghamshire Hospitals NHS Trust, Wycombe primary care trust (PCT), Buckinghamshire Mental Health Trust and Two Shires Ambulance Trust is shown in the table.

Financial position of NHS organisations for 2003–04

Organisation	*Underspend*	*(Overspend)*
Thames Valley SHA	4,221,000	—
Buckinghamshire Hospitals NHS Trust	—	(5,237,000)
Wycombe PCT	536,000	—
Buckinghamshire Mental Health Trust	—	(1,689,000)
Two Shires Ambulance NHS Trust	3,000	—

Prescription Charges

Mr. Kidney: To ask the Secretary of State for Health what recent representations she has received on establishing more exemptions from prescription charges for patients with long-term conditions. [2753]

Jane Kennedy: Representations received since 1 January 2005 have been identified in respect of the following long-term conditions:

Alzheimer's disease/dementia
Arthritis
Asthma
Cancer
Coeliac
Crohn's disease
Cystic fibrosis
Foot conditions
Hearing impairment
Heart condition
Hormone replacement treatment
Hypertension
Impotence
Kidney transplants
Klinefelter syndrome
Lupus
Mental health (various)
Multiple sclerosis
Optical and dental care
Pancreatitis (chronic)
Spina bifida
Thrombosis
Turner's syndrome
Ulcerative colitis.

Private Finance Initiative

Mr. Philip Hammond: To ask the Secretary of State for Health if she will list the Private Finance Initiative and Public Private Partnership projects her Department is undertaking; and what the status of each is. [2365]

Mr. Byrne: The information requested is given as follows. The list is broken down into three categories: private finance initiative (PFI), national health service local improvement finance trust (LIFT) schemes and treatment centres. It lists those that are operational and those that have reached financial close but are not providing a full service.

PFI Schemes

1. Operational

Dartford and Gravesham Hospital NHS Trust
North Cumbria Acute Hospitals NHS Trust
Buckinghamshire Hospitals NHS Trust
Norfolk and Norwich Health Care NHS Trust
County Durham and Darlington Acute Hospitals NHS Trust
South Manchester University Hospitals NHS Trust
Queen Elizabeth Hospital NHS Trust
Calderdale and Huddersfield NHS Trust

Avon and Wiltshire Mental Health Partnership NHS Trust
University Hospitals Coventry and Warwickshire NHS Trust
East Lancashire Hospitals NHS Trust—Blackburn
Lewisham Hospital NHS Trust
Barking, Havering and Redbridge Hospitals NHS Trust
Brighton and Sussex University Hospitals NHS Trust—Royal Alexander
Oxford Radcliffe Hospitals NHS Trust
Newcastle Upon Tyne Hospitals NHS Trust
Derby Hospitals NHS Trust
Leeds Teaching Hospitals NHS Trust—Oncology
Central Manchester and Manchester Children's Hospital NHS Trust
Doncaster and South Humber Healthcare NHS Trust
Sandwell and West Birmingham Hospitals NHS Trust—City Hospital
North Kirklees PCT
Wandsworth PCT—Queen Mary's Roehampton
Salisbury Healthcare NHS Trust
Newcastle, North Tyneside and Northumberland Mental Health NHS Trust—Morpeth
Nuffield Orthopaedic NHS Trust
Kingston Hospital NHS Trust
Newham University Hospital NHS Trust
East Lancashire Hospitals NHS Trust—Burnley
Buckinghamshire Hospitals NHS Trust—Stoke Mandeville
Sheffield Teaching Hospitals NHS Trust
The Whittington Hospital NHS Trust
New Forest PCT—Lymington
Cambridge University Hospital NHS Trust—Addenbrookes
Nottinghamshire Healthcare NHS Trust
Daventry and South Northamptonshire PCT

NHS LIFT Projects

1. Operational

East London and City
Barnsley
Ashton, Leigh and Wigan
Norfolk
Newcastle and North Tyne
East Lancashire
Sandwell
Barking and Havering
Liverpool and Sefton

2. Under Construction

Camden and Islington
Manchester, Salford and Trafford
Birmingham and Solihull
Bradford
Cornwall and Isles of Scilly
Coventry
Hull
Leicester City
Medway
North Staffordshire
Redbridge and Waltham Forest
Barnet, Enfield and Haringey
Brent, Harrow and Hillingdon
Bristol
Bromley, Bexley and Greenwich
Colchester and Tendring
Ealing, Hammersmith and Hounslow
East Hampshire, Fareham and Gosport
Greater Nottingham
Leeds
Oldham
Oxford City
Plymouth
Southern Derbyshire
South West London
St. Helens and Knowsley
Tees Valley
Wolverhampton

Treatment centres

1. Operational

Daventry
Greater Manchester
Plymouth
Redwood
Opthalmology Chain—ophthalmology activity delivered through a number of mobile treatment facilities
Spine chain—eight treatment centres
MRI scanning and reporting—12 mobile magnetic resonance imaging scanning units visit NHS sites nationally.
Plus elective activity delivered through a number of existing independent sector treatment centres around the country.

2. Under Construction

Bradford
Burton
Trent
Somerset
Worcestershire, Cheshire and Merseyside—two treatment centres
South East—four treatment centres
Plus elective activity delivered through a number of existing independent sector treatment centres around the country.

Sudden Cardiac Deaths

Mr. Drew: To ask the Secretary of State for Health how many cases of sudden cardiac death were reported in Gloucestershire in the last year for which figures are available; and how many were people aged *(a)* under 18, *(b)* 19 to 25 and *(c)* 26 to 35 years. [4343]

John Healey: I have been asked to reply.

The information requested falls within the responsibility of the National Statistician, who has been asked to reply.

Letter from Len Cook to Mr. David Drew, dated 20 June 2005:

As National Statistician I have been asked to reply to your recent Parliamentary Question asking how many cases of sudden cardiac deaths were reported in Gloucestershire in the last year for which figures are available; and how many were people were aged *(a)* under 18, *(b)* 19 to 35 and *(c)* 26 to 35 years. (4343)

It is not possible to provide reliable figures on the number of cardiac deaths which occurred suddenly, as certifiers are not required to indicate at death registration whether or not a death was sudden. Figures are therefore provided for all heart diseases, sudden cardiac death (so described), acute ischaemic heart disease and cardiac arrhythmias.[1]

Figures are provided in the table below for 2004, the latest year for which data are currently available.

Number of deaths from (a) all heart diseases, (b) sudden cardiac death, so described, (c) acute ischaemic heart disease and (d) cardiac arrhythmias1 in persons, by age, for usual residents of Gloucestershire registered in 2004

Numbers of deaths

		Under 18	*18–25*	*26–35*	*All ages*
(a)	AH heart diseases	1	0	1	1,334
(b)	Sudden cardiac death, so described	0	0	0	2
(c)	Acute ischaemic heart disease	0	0	0	514
(d)	Cardiac arrhythmias	0	0	0	29

[1] The cause of death was defined using the International Classification of Disease (ICD-10). Deaths were selected where the original underlying cause of death was one of the following codes:

AII heart diseases ICD-10 120–15

Sudden cardiac death, so described ICD-10146.1

Acute ischaemic heart disease ICD-JO121

Cardiac arrhythmias ICD-10144–149.

Surrey and Sussex Strategic Health Authority

Tim Loughton: To ask the Secretary of State for Health how many people are employed by the Surrey and Sussex Strategic Health Authority. [4458]

Caroline Flint: Information about the number of people directly employed by the Surrey and Sussex Strategic Health Authority (SHA) is shown in the following table.

National health service hospital, public health medicine and community health services (HCHS) medical and non-medical staff, within Surrey and Sussex SHA organisation

As at 30 September 2004

	Number (headcount)
All staff	139
of which:	
HCHS medical and dental staff	10
All non-medical staff	129
of which:	
Professionally qualified clinical staff	2
Qualified nurses	1
Qualified scientific, therapeutic and technical	1
NHS infrastructure support	127
Central functions	72
Managers and senior managers	55

Source:

NHS Health and Social Care Information Centre non-medical workforce census 2004.

NHS Health and Social Care Information Centre medical and dental workforce census 2004.

Tim Loughton: To ask the Secretary of State for Health what has been the budget of the Surrey and Sussex Strategic Health Authority in each year since its inception; and what its budget is for 2005–06. [4459]

Caroline Flint: The first full year of operation for Surrey and Sussex Strategic Health Authority (SHA) was 2003–04. The SHA budgets for 2003–04 and 2004–05 are shown in the following table. The budget for 2005–06 has not yet been finalised.

Surrey and Sussex SHA budget

£ thousand

	Budget
2003–04	4,700
2004–05	5,057

Tourist Health (Cornwall)

Julia Goldsworthy: To ask the Secretary of State for Health (1) what representations she has received regarding payment to NHS and primary care trusts in Cornwall for treating tourists from other parts of the UK in the summer months; if she will ensure that appropriate payment is made to NHS and primary care trusts for such treatment; and if she will make a statement; [3753]

(2) whether the formula for allocating funding to *(a)* NHS trusts and *(b)* primary care trusts in Cornwall takes account of the costs of administering the recovery of payments for treating tourists from other parts of the UK in the summer months. [3754]

Caroline Flint *[holding answer 13 June 2005]:* The Department has received no recent representations on this matter. There are procedures in place for the funding and reimbursement of the costs of treating patients away from their home and these are available on the Department's website at http://www.dh.gov.uk/assetRoot/04/10/92/19/04109219.pdf.

With the introduction of payment by results, we are introducing a new system based on quarterly billing, which is designed to reimburse providers in a more timely manner while keeping administration costs to a minimum. The new approach is based on in-year activity, so areas with increased activity will be reimbursed within year.

The formula used to inform the revenue allocations to primary care trusts (PCTs) does not specifically take account of the administrative costs associated with the recovery of payments for treating tourists from other parts of the UK in the summer months. The administrative cost of the process for reimbursing for out of area treatments falls on all PCTs, and there should not be a material difference in these costs between PCTs.

Trust Staff

Mr. Jenkins: To ask the Secretary of State for Health how many *(a)* clinical and *(b)* non-clinical NHS staff have been employed in Burntwood, Lichfield and Tamworth primary care trust in each year since 1997. [3320]

Ms Rosie Winterton: The information requested is shown in the table.

Hospital, public health medicine and community health services (HCHS) staff, general medical practitioners and practice staff, clinical and non-clinical staff in specified organisations, 1997–2004: England

Numbers (headcount)

	1997	*1998*	*1999*	*2000*
Q26—Shropshire and Staffordshire strategic health authority	29,047	30,148	30,156	31,183

Practice staff (excluding practice nurses)[5]	236	154	282	129

[1] Excludes hospital medical hospital practitioners and hospital medical clinical assistants, most of whom are GPs working part time in hospitals.
[2] General medical practitioners (excluding retainers and registrars) includes contracted GP's general medical service (GMS) others and personal medical service (PMS) others. Prior to September 2004, this group included GMS unrestricted principals, PMS contracted GPs, PMS salaried GPs, restricted principals, assistants, salaried doctors (Para 52 SFA), PMS other, flexible career scheme GPs and GP returners.
[3] Non-medical clinical staff are qualified nursing, midwifery and health visiting staff, qualified scientific, therapeutic and technical staff and qualified ambulance staff.
[4] Non-medical non-clinical staff are support to clinical staff, national health service infrastructure support staff and a number of unknown and unclassifiable staff.
[5] Practice staff (excluding practice nurses) includes direct patient care, administrative and clerical staff and other.

SOLICITOR-GENERAL

Advice to Cabinet

Lynne Jones: To ask the Solicitor-General on how many occasions since 1997 law officers' advice had been presented to the Cabinet orally, prior to the Attorney-General's oral presentation to the Cabinet of his advice on the legality of the war in Iraq. [5919]

The Solicitor-General: The proceedings of Cabinet and Cabinet Committee meetings are not normally disclosed, in order to ensure the protection of information whose disclosure would harm the frankness and candour of internal discussion.

Camp Breadbasket

Adam Price: To ask the Solicitor-General what action the Government have taken as a result of the witness statements from Camp Breadbasket victims sent to the Attorney-General earlier this year. [5541]

The Solicitor-General: Three short unsigned draft witness statements were provided by a solicitor Mr. Phil Shiner to the Army Prosecuting Authority. The prosecutor decided not to seek an adjournment because there was inadequate evidence to confirm the authenticity of the statements, the trial was at an advanced state, and it was not possible to ascertain the required length of the potential adjournment as there was insufficient information to identify the whereabouts of the makers. As the statements appear to support charges other than those before the court, if the witnesses can be identified, further charges can be brought. The material was provided to the defence who also took the view that they did not wish to seek an adjournment, so the trial continued.

The Judge Advocate was made aware of the existence of the material but was not asked for any ruling on it.

The material was passed to the Special Investigation Branch of the Royal Military Police who have twice written to Mr. Shiner to seek his assistance in identifying the makers of the draft statements. This has proved difficult because though they are identified by name and employment, no address is provided and so it is not possible to trace them. Mr. Shiner replied on 21 April saying that he would provide a substantive reply within 28 days. No further reply has been received. While the RMP will seek to trace the makers of the draft statements, on the basis of the scant information provided it may not be possible.

Domestic Violence Homicide Cases

Julie Morgan: To ask the Solicitor-General if he will make a statement on prosecutions of domestic violence homicide cases. [4879]

The Solicitor-General: We are committed to tackling domestic violence on every front. Although domestic violence is chronically under-reported, research indicates that it accounts for 16 per cent. of all violent crime and claims the lives of two women each week.

The Crown Prosecution Service recognises that stopping domestic violence and bringing perpetrators to justice must be a priority for our society. It is determined to play its part by prosecuting all such cases, including homicides, effectively.

Iraq

David Howarth: To ask the Solicitor-General whether the advice set out in paragraphs 34 and 35 of the Attorney's advice on the legality of war in Iraq on 17 March 2003 remains the policy of the Law Officers. [5662]

The Solicitor-General: The Attorney-General, in his parliamentary statement of 17 March 2003, set out his view that the use of force in Iraq was lawful. He considers that any challenge to the use of force would not succeed.

NHS Staff (Attacks)

Mr. Baron: To ask the Solicitor-General if he will assess the merits of issuing guidance similar to that issued in Scotland by the Lord Advocate on decisions to prosecute those who attack health service staff in the summary court or on indictment to the Crown Prosecution Service in respect of similar cases in England and Wales. [5365]

The Solicitor-General: The Crown Prosecution Service (CPS) decides whether or not to prosecute those who attack health service staff in accordance with the principles set out in the Code for Crown Prosecutors.

The code already provides that a prosecution is likely to be in the public interest if the offence was committed against a person serving the; public, and illustrates the point with the example of a nurse. As such, existing guidance to prosecutors in England and Wales favours the prosecution of anyone assaulting health service staff. There are no plans to change this.

CONSTITUTIONAL AFFAIRS

Civil Servants

Dr. Cable: To ask the Minister of State, Department for Constitutional Affairs what value-for-money procurement savings were identified and what reduction in civil service posts occurred in her Department in 2004–05. [4550]

Ms Harman: In pre-Budget report 2004 the Chancellor reported OGC value for money gains in central civil Government procurement for 2003–04 of £2 billion. OGC value for money procurement gains for 2004–05 are being calculated and will be published in the 2005 Treasury Autumn Performance report.

In Budget 2005 the Chancellor announced a headcount reduction of 12,500 posts by the end of 2004–05, towards the Government's target of a gross reduction of 84,000 civil service and administrative posts by 2008.

The Department for Constitutional Affairs were not required to make a contribution to the headcount reduction of 12,500 by the end of 2004–05. The Department's target headcount reduction over the SR 04 period is 1,100 by March 2008.

Community Justice Centre (Liverpool)

Mr. Djanogly: To ask the Minister of State, Department for Constitutional Affairs what percentage of defendants attending the Community Justice Centre in North Liverpool have *(a)* re-offended and *(b)* complied with their sentence since the centre opened. [5164]

Ms Harman: Between 14 December 2004 and 5 May 2005 34 community sentences have been made (only one offender had more than one case). Of those 33 offenders three have been convicted of a further offence while nine have breached their order.

Mr. Djanogly: To ask the Minister of State, Department for Constitutional Affairs what assessment she has made of crime figures in the area covered by the Community Justice Centre in North Liverpool over the period during which the centre has been in operation. [5165]

Ms Harman: The geographical area covered by the North Liverpool Community Justice Centre, shows a small decrease in 'all crime' between January and June this year, when compared with a similar period in 2004.

At this stage we are unable to break that 'all crime' category down into the CJC targeted offences.

It is too early in the pilot to assess the impact of what is being done at the Centre and its relationship to crime in the area it serves.

Mr. Djanogly: To ask the Minister of State, Department for Constitutional Affairs how many defendants have attended the Community Justice Centre in North Liverpool. [5166]

Ms Harman: Between 9 December 2004 and 10 June2005 over 385 defendants have appeared before His Honour Judge Fletcher, at the North Liverpool Community Justice Centre.

The figures can be further broken down into 349 adult defendants and 39 youth defendants.

Mr. Djanogly: To ask the Minister of State, Department for Constitutional Affairs if she will make a statement on the future of Community Justice Centres following the North Liverpool pilot. [5167]

Ms Harman: The North Liverpool Community Justice Centre is a pilot. It will be fully evaluated to examine whether the Community Justice Centre model should be replicated. In the interim, a second initiative is being developed in Salford. This will test how Community Justice principles, such as responding to local people's priorities about antisocial behaviour, can be applied in magistrates courts. These are the only projects currently planned. Any decisions about the development of future Community Justice initiatives will be taken following the evaluations of these projects.

Coronors Act

Mr. David Jones: To ask the Minister of State, Department for Constitutional Affairs on how many occasions the procedure provided for under Section 17A of the Coroners Act 1988 has been implemented since 1 January 2000. [5216]

Ms Harman: Section 17A of the Coroners Act 1988 has been invoked six times since 1 January 2000.

Criminal Justice

Mr. Allen: To ask the Minister of State, Department for Constitutional Affairs how many personnel are employed by the Department to explain the operation of the criminal justice system to the public. [2828]

Ms Harman: As at 1 April 2005 the Department for Constitutional Affairs employed a total of 15,173 staff working in criminal justice related roles. Of these 12,243 are in the magistrates courts, 2,673 in the Crown court (including those in combined courts); and 115 in the Criminal Appeals Office. Her Majesty's Courts Service, an executive agency of the Department for Constitutional Affairs, also employs 142 staff in central roles relating to Criminal Justice.

Whilst these staff are trained in customer service skills, it is not possible to identify those whose role directly involves explaining the operation of the Criminal Justice system to the public.

Crown Court Trials

Mr. Heald: To ask the Minister of State, Department for Constitutional Affairs how many trials in the Crown court lasted for a duration of nine months or more in each of the last 10 years. [1760]

Ms Harman: I will write to the hon. Member for North East Hertfordshire once the information is available.

Data Protection Act

Harry Cohen: To ask the Minister of State, Department for Constitutional Affairs (1) what concerns the European Commission has formally expressed in relation to the definition of personal data as defined in the Data Protection Act 1998; and if she will make a statement on the implementation of the definition of personal data in Directive 95/46/EC; [4597]

(2) what concerns the European Commission has formally expressed in relation to the powers of the Information Commissioner under the Data Protection Act 1998; [4598]

(3) whether she will list the concerns that the European Commission has formally expressed in relation to the provisions in the Data Protection Act 1998 which pertain to the transfer of personal data outside the European economic area, and if she will make a statement on the implementation of articles 25 and 26 of Directive 95/46/EC through the Data Protection Act 1998. [4599]

Bridget Prentice: The European Commission, as part of its review of the implementation of the 1995 Data Protection Directive by each member state, have raised a number of issues with the UK. We are in discussion with the Commission about these issues. We currently have no plans to disclose the detail of those discussions as the formal Commission investigation process is still taking place. If the Government were to disclose the information requested, it would prejudice the negotiating process between the UK and the Commission and so prejudice UK interests. We believe that the UK *has* properly implemented the Data Protection Directive via the Data Protection Act 1998 and other relevant provisions of UK law.

Faith Communities (Consultations)

Mr. Paul Goodman: To ask the Minister of State, Department for Constitutional Affairs what recent consultations have been carried out by her Department with representatives of faith communities; and if she will make a statement. [3227]

Ms Harman: Within the last twelve months, there have been six consultations with faith communities by officials of this Department.

There were two consultations regarding prospective legislation:

Mental Capacity Act 2005

Gender Recognition (Exception to Offence of Disclosure) Order

One regarding diversity in the judiciary:

Increasing Diversity in the Judiciary

Three regarding children's issues:

Review of looked After Children'

Draft Court Rules Adoption and Children Act 2002

Disclosure of information in family proceedings cases involving children

General Election Register (Woking)

John Hemming: To ask the Minister of State, Department for Constitutional Affairs whether the marked register for the 2005 General Election for the Woking constituency has been lost. [5103]

Ms Harman: The whereabouts of the marked registers for Woking are being investigated by the Returning Officer and the storage company, Pickfords Records Management.

Inquests (Belfast Coroner)

Mrs. Iris Robinson: To ask the Minister of State, Department for Constitutional Affairs what the average time between death and inquest in the jurisdiction of the Belfast Coroner was in each of the last three years; and if he will make a statement. [5340]

Bridget Prentice: The average time between death and inquest in the Coroners District of Greater Belfast in the last three years was: 2002—69 weeks, 2003—83 weeks and 2004—87 weeks.

Laptop Computers

Lynne Featherstone: To ask the Minister of State, Department for Constitutional Affairs how many laptop computers have been used by *(a)* Ministers, *(b)* special advisers and *(c)* officials in her Department in each year since 1995; how many have been (i) lost and (ii) stolen in that period; what the cost was of the use of laptops in that period; and if she will make a statement. [4130]

Ms Harman: For my Department, information on the number and cost of laptops is available from 1999. Ministers and special advisers have been supplied with laptops since 2003. Information on lost and stolen laptops is available from 1995.

Figures for individual years for *(a)* Ministers and *(b)* are as follows:

Number

	(a) Ministers' laptops	*(b) Special advisers' laptops*
2003	3	1
2004	4	1

(c) Number of laptops issued to officials, together with the overall cost of the Department's laptops:

	Number of laptops	*Cost of the use of laptops for the calendar year (£)*
1999	658	101,808
2000	667	120,960
2001	346	132,864
2002	444	361,594
2003	594	630,367
2004	597	700,626

Number of laptops (i) lost or (ii) stolen

	(i) Number of laptops lost	*(ii) Number of laptops stolen*
1995	0	10
1996	0	16
1997	0	4
1998	0	4
1999	0	4
2000	2	3
2001	1	12
2002	1	16
2003	0	6
2004	1	14

Legal Aid

Keith Vaz: To ask the Minister of State, Department for Constitutional Affairs what steps the Legal Services Commission are taking to ensure that black and minority ethnic firms are treated fairly in the distribution of legal aid contracts. [5620]

Bridget Prentice: The Legal Services Commission (LSC) is strongly committed to promoting race equality and eliminating discrimination on the basis of race. Under the Race Relations (Amendment) Act 2000, the LSC has a statutory obligation to monitor and assess the impact of policies relating to the distribution of legal aid contracts upon different racial groups.

The LSC monitors the diversity of suppliers contracted to provide legal advice and services via an annual survey conducted by the Legal Services Research Centre (LSRC). Results are published on the LSRC website. The findings of these monitoring activities help inform and influence policy-making.

Race equality impact assessments are carried out for any proposal to amend the way in which legal aid contracts are awarded. The LSC consults on race equality impact assessments and encourages BME firms and their representative organisations to respond to consultations.

The LSC is currently tendering for research into the issues faced by BME firms within the legal aid supplier base. The research is due to report in December 2005.

Magistrates

Mr. Allen: To ask the Minister of State, Department for Constitutional Affairs if she will make it her policy *(a)* to collect data on the socio-economic class of magistrates and *(b)* to track and publish changes in the composition of the magistracy. [5465]

Ms Harman: The Department currently collects data on magistrates grouping them by gender, ethnicity, age, geographical spread, and occupational and industrial categories. There are no plans to change this. The composition of the magistracy is tracked in the groupings stated. Details of age, gender and ethnic background are published annually in Judicial Appointments.

Mental Capacity Act

Mr. Burstow: To ask the Minister of State, Department for Constitutional Affairs what the timescale is for public consultation on the details of the role of independent mental capacity advocates. [4775]

Bridget Prentice: The Department of Health intends to hold a full public consultation shortly on a range of issues relating to the Independent Mental Capacity Advocate service.

Mr. Burstow: To ask the Minister of State, Department for Constitutional Affairs (1) what plans she has for public awareness campaigns to raise awareness of the codes of practice of the Mental Capacity Act 2005 among the general public; [4810]

(2) what representations she has *(a)* made to and *(b)* received from the voluntary sector on disseminating information about the Mental Capacity Act 2005 codes of practice to family members and carers of incapacitated individuals. [4811]

Bridget Prentice: Disseminating and raising awareness of the Act and code of practice is a key component of our implementation plans. We want to undertake this important work in consultation with stakeholders, including those in the voluntary sector, and are currently seeking views from them on how they will want to work with us in this area of implementation.

Mr. Burstow: To ask the Minister of State, Department for Constitutional Affairs what mechanisms her Department will introduce to monitor compliance with the Codes of Practice laid out in the Mental Capacity Act 2005 with regard to *(a)* lasting powers of attorney donees, *(b)* court appointed deputies and *(c)* independent mental capacity advocates. [4852]

Bridget Prentice: Lasting Powers of Attorney and court appointed deputies will be registered with the Office of the Public Guardian (OPG). The OPG will respond to any complaints about their conduct either directly or in co-ordination with other agencies. Complaints about the conduct of a deputy or attorney might include complaints about an attorney or deputy not complying with their duty to have regard to the Code. In addition deputies will be subject to supervision by the OPG and required to provide reports to the OPG. The Department for Health will issue a consultation paper shortly on details of the Independent Mental Capacity Advocate (IMCA) service.

Rape Trials

Vera Baird: To ask the Minister of State, Department for Constitutional Affairs (1) what proportion of applications to admit previous sexual history in rape trials was successful during *(a)* 2003 and *(b)* 2004; [588]

(2) how many applications to admit previous sexual history were made in rape trials in England and Wales in *(a)* 2003 and *(b)* 2004. [592]

Paul Goggins: I have been asked to reply.

Provisions on the admission of evidence and questioning relating to previous sexual history in criminal proceedings are set out in sections 41 to 43 of the Youth Justice and Criminal Evidence Act 1999. The Home Office commissioned London Metropolitan University to carry out during 2003–04 research on the working of these provisions. The findings of this research are due to be published this autumn. Although the statistical data requested are not identifiable within the data regularly collected centrally, this research study

is expected to provide some information on the proportion of rape trials in which applications to admit previous sexual history evidence are made and the success rate of applications.

DEPUTY PRIME MINISTER

Affordable Housing

Lynne Featherstone: To ask the Deputy Prime Minister how many affordable homes have been *(a)* started and *(b)* completed in the last five years in the London borough of Haringey council area; and if he will make a statement. [3079]

Yvette Cooper: The number of affordable homes provided on behalf of Haringey in each of the last five financial years are shown as follows.

	Number
2000–01	265
2001–02	286
2002–03	167
2003–04	349
2004–05	272

Source:
Housing Corporation

In 2004–05 there were 493 starts-on-site on behalf of Haringey (figures for earlier years are not available).

The numbers include homes for both rent and low cost home ownership provided through new build dwellings, acquisitions and refurbishments via the Housing Corporation's Approved Development Programme including Key Worker Living in 2004–05 and exclude the Transitional Local Authority Social Housing Grant, the Starter Homes Initiative (not delivered through the Approved Development Programme) and S106 agreements where there was no Housing Corporation funding.

Mrs. Spelman: To ask the Deputy Prime Minister what the Government's definitions are of the terms *(a)* affordable housing and *(b)* key worker. [4276]

Yvette Cooper: The Government defines affordable housing as including social rented housing and other forms of sub-market housing (known as intermediate housing). Sub-market housing include forms of low cost home ownership such as shared ownership and Homebuy and housing available at intermediate rents (above social rent but below market rent).

For the Key Worker Living programme which operates throughout the London, South East and Eastern regions there is a priority list of public sector key worker groups, established in consultation with sponsor Departments/employers who are making a financial contribution to the programme. Key workers being helped through the programme include nurses and other NHS clinical staff, teachers in schools and further education, police officers and some civilian staff in participating police forces, prison and probation service staff, social workers, occupation therapists, education psychologists, fire service staff in Hertfordshire and in London, local authority planners.

Beyond the Key Worker Living programme, there is no set definition. Definitions will vary by scheme and location and will depend on a range of factors including funding sources and local pressures.

Mr. Jim Cunningham: To ask the Deputy Prime Minister what steps are being taken to ensure an adequate long-term supply of low-cost housing for those with housing needs in Coventry, South. [4822]

Yvette Cooper: It is not possible to provide separate figures for Coventry, South.

£7.4 million was allocated from the Regional Housing Pot, for the period 2004 to 2006, to fund 174 new units of affordable housing in Coventry.

During 2004–05 Coventry city council delivered, across the city, 142 new affordable homes for rent, 21 new shared ownership homes, and 55 homes achieved through S106 planning gain.

Development of the second West Midlands Regional Housing Strategy, which has been subject to broad consultation, will inform Regional Housing Pot allocations for housing in the region for 2006 to 2008, details of which will be announced in December 2005.

The new Strategy, which will shortly be submitted for endorsement by the West Midlands Regional Assembly, has been based on a range of comprehensive research, including a region-wide assessment of the need for affordable housing in the region.

Agricultural Land

Mr. Lidington: To ask the Deputy Prime Minister if he will make a statement on the development of his policy on the sub-division of agricultural land into small plots for sale since his Department's letter of 19 April 2004 to chief planning officers. [4084]

Yvette Cooper: Sub-division of fields and woods into small plots for sale can lead to neglect and other unsightly consequences. In January the Office of the Deputy Prime Minister issued new Best Practice Guidance which, among other things, encourages local authorities to use notices under section 215 of the Town and Country Planning Act 1990 to require landowners to remedy damage to rural amenity. Later this year, as part of our review of permitted development rights, we will consult on proposed improvements to the procedure for making article 4 directions. Article 4 directions can prevent permitted development where it would significantly threaten the amenity of the countryside.

Mr. Lidington: To ask the Deputy Prime Minister what guidance he has issued to local planning authorities on the application of temporary stop notice powers, as provided under the Planning and Compulsory Purchase Act 2004, to cases in which agricultural land has been divided into small plots for sale. [4085]

Yvette Cooper: ODPM Circular 02/2005 'Temporary Stop Notice' gives guidance on the use of temporary stop notices. It advises that a single temporary stop notice may apply to the whole of the site in

circumstances where a field is sub-divided into plots, irrespective of the fact that the field may not be in single ownership.

Barker Report

Mr. Amess: To ask the Deputy Prime Minister (1) if he will make a statement on implementation of the Barker report; [3749]

(2) what recommendations of the Barker review the Government have *(a)* already implemented and *(b)* intends to implement. [4316]

Yvette Cooper: The Government's initial response to Kate Barker's report was provided by my right hon. Friends the Chancellor and the Deputy Prime Minister alongside the Budget on 17 March 2004. We said then that we intend to bring forward a package of measures to address the recommendations of the Barker review by the end of 2005.

Kate Barker's proposals build on the approach adopted in the communities plan, launched by my right hon. Friend the Deputy Prime Minister in February 2003. Her analysis have reinforced our case and strategy for more homes to address rising demand. In particular, the Government have accepted Kate Barker's central recommendation that there should be a step change in housing supply.

In advance of the wider package, and in response to one of Kate Barker's recommendations, the Government consulted last year on proposals to strengthen regional integration by bringing together regional planning bodies and regional housing boards and to provide the merged bodies with independent advice. In the pamphlet "Extending Home Ownership", launched by my right hon. Friends the Deputy Prime Minister and the Chancellor on 25 May, we confirmed that the merger of regional planning bodies and regional housing boards would go ahead. We also said that we would shortly announce further details about how independent evidence and analysis to support regional planning bodies would be strengthened.

In the 2004 spending review, we made a start on infrastructure investment in creating a community infrastructure fund, as recommended by Kate Barker. An extra £50 million in 2006–07 and £150 million in 2007–08 will be available to finance transport projects needed to sustain housing growth. My right hon. Friend the Chancellor also allocated funds which, with additional PFI funding and efficiency gains, aim to provide an extra 10,000 new homes for social let annually by 2007–08.

The Government plan to consult in summer 2005 on changes to planning policy guidance on housing (PPG3).

Business Rate

Mr. Paul Goodman: To ask the Deputy Prime Minister if he will list the business rates set by each local authority area in England for 2004–05. [5531]

Mr. Woolas: The rate used to calculate business rate bills is set nationally. For 2004–05, the rate was 0.456. Bills for that year were calculated by multiplying this rate by the rateable value of the particular business hereditament and applying any reliefs.

Buy to Let

Mr. Dismore: To ask the Deputy Prime Minister what assessment he has made of the effect of buy-to-let on the cost and availability of private rented accommodation in London; and if he will make a statement. [4370]

Yvette Cooper: The Government have not carried out any studies into the impact of 'buy-to-let'. It is not easily assessed, although the mortgage lenders have produced some detailed statistics. 'Buy to let' mortgages as a proportion of all mortgages has risen nationally from 2 per cent. in 1999 to 9 per cent. in the second half of 2004. However, their impact on the London housing market has been generally declining (from almost 7 per cent. early 2001 when data was first collected), and in 2004–05 accounted for 3.9 per cent. of mortgages.

So far 'buy to let' has not led to a significant growth in the size of the private rented sector. However, inasmuch as it has led to more and better quality property coming onto the market it will have had a favourable impact on the cost and availability of private rented accommodation.

Children's Accommodation

Sarah Teather: To ask the Deputy Prime Minister what estimate he has made of *(a)* the number of families with children and *(b)* the number of children in (i) temporary accommodation, (ii) non-decent accommodation and (iii) overcrowded accommodation. [2433]

Yvette Cooper: Information reported each quarter by local authorities about their activities under homelessness legislation includes the number of households in temporary accommodation on the last day of the quarter, distinguishing those that include dependent children or a pregnant woman, and the numbers of children. On 31 December 2004 it is estimated that there were 72,800 such households in England, containing some 125,000 children or expected children.

Based on information collected through the English House Condition Survey, in 2001 there were an estimated 1,736,000 households containing some 3,123,000 children under 16 years of age living in non-decent homes. Since then there has been further progress towards the Government's decent homes target. Already the number of non-decent homes in the social sector has dropped by 1 million since 1997.

From information derived from the Survey of English Housing for 2003–04 it is estimated there were 360,000 households containing 845,000 dependent children living in conditions regarded as overcrowded in relation to the bedroom standard.

Contingency Plans

Sarah Teather: To ask the Deputy Prime Minister which regions have conducted training exercises to assess contingency plans, as proposed by the Civil Resilience Directorate; and if he will make a statement. [2443]

Jim Fitzpatrick: All regions have conducted training exercises to test emergency plans and procedures.

Council Tax

Mrs. Spelman: To ask the Deputy Prime Minister (1) how much was raised from fines for non-payment of council tax in each year since 1997; [4215]

(2) how many fines were levied for non-payment of council tax in each year since 1997. [4240]

Mr. Woolas: There are no powers under which it is possible to impose a fine for the non-payment of council tax.

Mrs. Spelman: To ask the Deputy Prime Minister how transitional relief for the 2007 council tax revaluation in England will be funded. [4246]

Mr. Woolas: The Government's intention is that the transitional relief scheme will be self-financing.

Departmental Press Office

Mrs. Spelman: To ask the Deputy Prime Minister how many full-time equivalent staff have been employed by his Department's Press Office in each year since its creation; and if he will list the responsibilities of each current staff member. [4244]

Jim Fitzpatrick: The number of full-time equivalent (FTE) press officers employed by the Office of the Deputy Prime Minister were as follows:

As at April:	*Number*
2003	21.8
2004	23
2005	20

All current press officers provide media handling services for all ODPM Ministers and officials across the full range of the Office's responsibilities.

Derelict Land

Norman Baker: To ask the Deputy Prime Minister what estimate he has made of the *(a)* number and *(b)* area of sites designated as derelict land in 2004, broken down by region. [4435]

Yvette Cooper: The National Land Use Database of Previously-Developed Land provides estimates are tabled as follows:

Derelict land and buildings in England, 2004

	Number of sites reported by local authorities	*Estimated total area (hectares)*
North East	132	1,430
North West	1,193	5,690
Yorkshire and the Humber	495	2,960
East Midlands	392	2,040
West Midlands	464	1,840
East of England	182	2,310
London	76	290
South East	207	1,410
South West	325	1,900
England	3,466	19,870

Note:
The estimates of total areas include an allowance for incomplete reporting.

Education Finance (London)

Sarah Teather: To ask the Deputy Prime Minister how much was spent by each London borough on education per 1,000 population in each of the last five years. [2485]

Jim Fitzpatrick: Table A provides combined LEA and school based expenditure per pupil for each London borough from 1999–2000 to 2003–04. This does not take into account non school-based education e.g. adult/community education.

Table A: Combined LEA and school based expenditure[1,2] per pupil[3] (1999–2000 to 2003–04)[4,5]

[1] The combined LEA and school based expenditure includes all expenditure on the education of children in LEA maintained establishments and pupils educated by the LEA other than in maintained establishments. This includes both school based expenditure and all elements of central LEA expenditure except youth and community and capital expenditure from revenue (CERA). A sector breakdown for combined LEA and school based expenditure is not available in 2002–03 and consequently this table shows the total LEA recurrent expenditure (except youth and community) per pupil by LEA since 1994–95.

[2] 1999–2000 saw a change in data source when the data collection moved from the RO1 form collected by the ODPM to the Section 52 form from the DfES. 2002–03 saw a further break in the time series following the introduction of Consistent Financial Reporting (CFR) and the associated restructuring of the outturn tables. The change in sources is shown in italic. In 2002–03 the combined LEA and school based expenditure is calculated by Section 52 Outturn Table A line 51 net current expenditure (NCE) plus line 60 NCE (with adjustments to income to take account of School Standards Grant and Standards Fund scored here) plus lines 61 to 74 NCE. For 2001–02 and earlier years the expenditure is calculated as line 27 NCE after recharges for columns *(b)* to *(f)* and *(h)* plus line 15 from the remaining continuing education column (g, i and j). This is taken from Section 52 Outturn Table 3 for 1999–00 to 2001–02 and from the RO1 form previously.

[3] Pupil figures include all pre-primary pupils, including those under 5s funded by the LEA and being educated in private settings, pupils educated in maintained mainstream schools and other LEA maintained pupils. The pupil data for pupils attending maintained nursery, primary, secondary and special schools are taken from the DfES Annual Schools Census. Private voluntary and independent (PVI) under 5 pupil numbers are taken from the Early Years census but are only include for 1999–2000 onwards. For 1995–96 onwards other LEA maintained pupils are included in the pupil count. This includes all pupils attending schools not maintained by the Authority for whom the Authority is paying full tuition fees, or educated otherwise than in schools and pupil referral units under arrangements made by the Authority drawn from the Form 8b submitted to the DfES. Also included as other LEA maintained pupils are all pupils attending pupil referral units who are not registered at a maintained mainstream school drawn from the DfES Annual Schools Census. All pupil numbers are adjusted to be on a financial year basis.

[4] Spending in 1997–98 reflects the transfer of monies from local government to central Government for the nursery vouchers scheme. These were returned to local government from 1998–99. The 1999–2000 figures reflect the return of GM schools to local authority maintenance.

[5] In 2002–03 the combined LEA and school based unit cost for England showed a cash terms increase of 5 per cent. compared with a 10 per cent. increase in 2001–02. This is in part due to known misreporting of funding by some LEAs which had the estimated effect of reducing the 2002–03 England unit cost by around £50 per pupil (in cash terms).

[6] 2003–04 remains provisional at this time and is subject to change by LEAs.

Fire Service

Sarah Teather: To ask the Deputy Prime Minister how many malicious false alarms were *(a)* registered and *(b)* attended by each fire authority in each year since 1997. [2447]

Jim Fitzpatrick: The information is as follows:

(a) The number of malicious false alarm calls processed by fire and rescue service control room staff is not available centrally.

(b) The number of malicious fire false alarm calls attended by each fire and rescue service in England in each year from 1997–98 to 2003–04 is shown in the following table.

Malicious fire false alarms attended

Fire and rescue authority	*1997–98*	*1998–99*	*1999–2000*	*2000–01*

Note:
Data includes estimates for incidents not recorded during periods of national industrial action in 2002 and 2003.
Source:
Fire and Rescue Service FDR1 returns to ODPM.

Dr. Pugh: To ask the Deputy Prime Minister if the Government will introduce legislation to provide additional protection from harassment and attack to firefighters responding to emergency calls. [3984]

Jim Fitzpatrick: The Fire and Rescue Services Act 2004 makes it an offence to obstruct or interfere with an employee of a Fire and Rescue Authority. In addition there is a hierarchy of offences against the person where injury results. This goes from grievous bodily harm through actual bodily harm to common law offences of assault and battery, depending on the injuries inflicted. It is important that such incidents are reported to the police. During the passage of the Act the question of further provision was considered and we were not persuaded that it would assist.

Green Belt

Mrs. Spelman: To ask the Deputy Prime Minister how many hectares of designated green belt land there were in each local authority area, in *(a)* 1997 and *(b)* the latest year for which figures are available. [4284]

Yvette Cooper: Data on the extent of designated green belt in each local authority area in England in 1997 and 2003 were published by the Office of the Deputy Prime Minister on 16 September 2004. Copies of the publication are available in the Library of the House. The publication is also available on the Office of the Deputy Prime Minister's website at

http//www.odpm.gov.uk/stellent/groups/odpm_planning/documents/page/odpm_plan_031125.hcsp

The area of green belt has increased by 19,300 hectares in the period 1997 to 2003.

Mrs. Spelman: To ask the Deputy Prime Minister what assessment the Government have made of the number of park and ride sites proposed for development on green belt land since the revision of planning policy guidance 13 in 2001. [4355]

Yvette Cooper: This information is not held centrally and could be provided only at disproportionate cost.

High Hedges

Mrs. Spelman: To ask the Deputy Prime Minister (1) what estimate the Government have made of the cost to local authorities of implementing the new regulations on high hedges; and if he will make a statement; [4290]

(2) what the *(a)* set-up and *(b)* ongoing costs are to local authorities of the implementation and enforcement of the high hedges provisions of the Anti-social Behaviour Act 2003. [4308]

Yvette Cooper: The Office of the Deputy Prime Minister published the 'Regulatory Impact Assessment: High Hedges—Implementing Part 8 of the Anti-social Behaviour Act 2003' on 23 March 2005. It contains estimates of the costs to local authorities of implementing and enforcing the new legislation on high hedges, including set-up and ongoing costs.

Copies of the Regulatory Impact Assessment are available in the House Library.

Home Condition Reports

Mr. Kidney: To ask the Deputy Prime Minister what progress he has made in ensuring an adequate supply of trained inspectors to meet the requirement of the Housing Act 2004 for home condition reports. [3705]

Yvette Cooper: National Occupational Standards for home inspectors have been approved by the Qualifications and Curriculum Authority. An awarding body has been approved for the new qualification in home inspection, and four assessment centres have been approved so far to assess courses offered by educational institutions and other organisations. The Office of the Deputy Prime Minister is assisting recruitment of home inspectors with awareness initiatives aimed at publicising this new career opportunity. A highly successful national conference and trade fair held on 25 November 2004 was attended by between 800 and 1,000 potential home inspectors. Four regional conferences have been well attended, and further regional events are planned. We expect to see the number of trained inspectors rise quickly in the second half of 2005 and during 2006, ready for introducing home information packs in early 2007 and we will work with the industry to this end.

Homebuy

Mr. Drew: To ask the Deputy Prime Minister what the *(a)* minimum and *(b)* maximum average earnings are for eligibility for social homebuy. [2924]

Yvette Cooper: The Office of the Deputy Prime Minister's proposals for social homebuy are set out in the consultation document 'HomeBuy—Expanding the Opportunity to Own' (a copy of which is available from the Library of the House). Under our proposals, participating social tenants would buy as large a share of their home as they can afford, and would have to be able to afford at least 50 per cent. of the home's discounted value. There would be rigorous and transparent affordability checks to ensure that they can afford to sustain the ongoing obligations the home ownership brings. We have published an assessment of the income that would be required to purchase a 50 per cent. share of a typical starter home under social homebuy in 'HomeBuy—Expanding the Opportunity to Own: Supporting Document' (a copy of which is available in the Library of the House, or at the following address on the internet:

http://www.odpm.gov.uk/stellent/groups/odpm_housing/documents/page/odpm_house_038088.hcsp)

Mrs. Spelman: To ask the Deputy Prime Minister what estimate he has made of the proportion of housing associations expected to offer social homebuy to their social tenants. [4271]

Yvette Cooper: Social homebuy will be voluntary, with housing associations and local authorities able to choose whether or not to offer the opportunity to their tenants. We are currently consulting on the details of our proposals for social homebuy, as set out in the consultation document 'HomeBuy—Expanding the Opportunity to Own' (a copy of which is available from the Library of the House). It is therefore not possible to provide an estimate of the proportion of housing associations expected to offer social homebuy at the present time.

As part of the consultation document a number of housing associations have approached us, expressing interest in piloting the scheme. Discussions on these pilots are currently ongoing.

Mrs. Spelman: To ask the Deputy Prime Minister whether the social homebuy scheme will allow social tenants to purchase 100 per cent. of their equity; and if he will make a statement. [4272]

Yvette Cooper: Our proposals for social homebuy are set out in the consultation document 'HomeBuy—Expanding the Opportunity to Own' (a copy of which is available from the Library of the House). Under them, in most cases, buyers will have the option to purchase further equity shares in 10 per cent. tranches to 100 per cent. ownership.

In some exceptional cases, for example in particularly high-value areas or small rural settlements where replacing affordable housing would be difficult, buyers may be restricted to purchasing less than 100 per cent. of the property. Buyers would be informed of this restriction at the initial point of purchase.

Mr. Drew: To ask the Deputy Prime Minister if he will list the sites designated for social homebuy. [2925]

Yvette Cooper: The Office of the Deputy Prime Minister's proposals for social homebuy are set out in the consultation document 'HomeBuy—Expanding the Opportunity to Own' (a copy of which is available from the Library of the House). The scheme will be voluntary, with housing associations and local authorities able to choose whether to offer the opportunity to their tenants. The consultation has not yet concluded and therefore it is not possible at the present time to identify which housing associations and local authorities will do so.

Housing

Mr. Dismore: To ask the Deputy Prime Minister what his most recent estimate is of the number of *(a)* households and *(b)* children living in overcrowded housing. [4366]

Yvette Cooper: Using data from the Survey of English Housing it is estimated that in 2003–04 in England there were *(a)* 473,000 households, and *(b)* 767,000 children under 16 living in households which do not pass the "bedroom standard". This represented 2 per cent. of all households and 8 per cent. of all children.

Mr. Dismore: To ask the Deputy Prime Minister what his most recent estimate is of the number of households in overcrowded accommodation, broken down by *(a)* region and *(b)* property tenure; and what the figures were in 1991. [4368]

Yvette Cooper: The most recent estimates of the number of households in overcrowded accommodation which fails the "bedroom standard", broken down by *(a)* region and *(b)* property tenure, are shown in the following tables, alongside equivalent figures for 1991. These figures suggest a significant overall decline in overcrowding between 1991 and 2003–04 of 43 per cent.

Households in England in overcrowded accommodation, by region: 1991 and 2003–04

Thousand

Standard Statistical Region	*1991*	*2003–04*
North	37	22
Yorkshire and the Humber	77	31
North West	120	44
East Midlands	53	24
West Midlands	92	51
East Anglia	23	12
London	208	187
South East	154	76
South West	70	26
All regions	834	473

Sources:

1991 DOE Labour Force Survey Housing Trailer

2003–04 ODPM Survey of English Housing

Mr. Kidney: To ask the Deputy Prime Minister what guidance he *(a)* has published and *(b)* plans to publish to assist local authorities in the discharge of their new licensing functions under the provisions of the Housing Act 2004. [3706]

Yvette Cooper: Advice to local authorities and landlords is available on the Office of the Deputy Prime Minister's website www.odpm.gov.uk and a number of statutory instruments will be laid before Parliament shortly which will help define the framework within which licensing will operate.

Discussions are also under way with local government, landlords and other stakeholder organisations on the training required by key staff and on how best to disseminate information about the new arrangements and examples of good practice.

Andrew Rosindell: To ask the Deputy Prime Minister how many houses his Department has planned should be built in *(a)* Essex and *(b)* London borough of Havering. [2222]

Yvette Cooper: Regional Planning Guidance for the South East (RPG9) makes provision for 5,240 new homes in Essex per annum. The final Regional Spatial Strategy for the East of England will be published by the First Secretary of State around the end of 2006.

In London, housing targets are set by the Mayor of London and the London boroughs. The Mayor's London Plan states that housing provision up to 2006 will be monitored against a minimum target of 23,000 additional homes per year. The target for Havering for the period 1997–2016 is 6,900 additional homes (350 per year.)

Land Stabilisation Programme

Mr. Cox: To ask the Deputy Prime Minister if he will make a statement on the future funding of the Land Stabilisation Programme administered by English Partnerships; and what assessment he has made of the implications of this funding for the programme's ongoing projects, with particular reference to those in Horrabridge and Tavistock, West Devon. [4177]

Yvette Cooper: The Land Stabilisation Programme is currently under review and an announcement regarding its future is expected in autumn 2005.

The English Partnerships' (EP) Business Plan has been set for the four years 2005–06 to 2008–09 and within that an annual allocation has been made for Land Stabilisation Programme funding to continue for projects that have an existing approval or where an approval is currently in the process of being completed. Where a project comes to EP in the future with a sufficiently high risk rating and no other options are available to tackle the problem, a re-evaluation exercise will have to be undertaken to determine how such a project could be accommodated into LSP.

A report on the investigations into Horrabridge is due to be published in June which will help inform the ongoing discussions with West Devon borough council and the owner.

Drake Gardens has a higher level of risk placed upon it by the geo-technical consultants acting for the council and West Devon Homes (RSL) with 12 properties are highlighted as being at risk of collapse. West Devon borough council monitoring does not show any progressive movement in any of the houses. The council has applied for LSP funding assessed at £53,000 to complete the site investigations undertaken and paid for so far by the council, two private owners and West Devon Homes. A redevelopment proposal for the 12 properties has been proposed by the council that it is hoped will cover the ground remediation costs and English Partnerships are in discussion with the council regarding this proposal.

Leisure Facilities (Brent)

Sarah Teather: To ask the Deputy Prime Minister what assessment the Audit Commission has made of leisure facilities in Brent. [2509]

Mr. Woolas: This is an operational matter for the Audit Commission. I will ask the Chief Executive to write to the hon. Member and to ensure the answer is made available in the Library the House.

Letter from Steve Bundred to Sarah Teather, dated 8 June 2005:

The Office of the Deputy Prime Minister has referred your parliamentary question on leisure services in Brent to me for reply.

The Audit Commission has carried out two inspections in Brent which include leisure facilities. The first, in April 2002, was an inspection of sport and leisure services, which were judged to be poor with poor prospects for improvement. The second, a whole service inspection on culture services was carried out in July 2004. The service inspected consisted of the parks service and sports service which are located within the environment directorate and the library service, heritage service, out of school support service and cultural services which are located within the directorate for education, arts and libraries. Culture services were judged to be good with promising prospects for improvement.

I am enclosing some more details of the two inspections. It was rather difficult from the PQ wording to work out what sort of information you were looking for, so apologies if this does not fit the bill. If you need further, or just different, information, please do contact me again and we will do all we can to help.

LB Brent—AC activity with respect to leisure facilities

We have carried out two inspections at Brent which include leisure facilities. The second inspection by its very nature (a whole service inspection of culture services—July 2004) did not focus solely on leisure facilities.

April 2002—An inspection of sport and leisure was undertaken at Brent. The service was judged to be poor with poor prospects for improvement.

The service was judged to be poor because:

The council at the time did not have clear aims and the service lacked focus and direction

Some aspects of service delivery to the customer were unacceptable in terms of quality and user focus

Service and performance data was incomplete and too unreliable to make comparisons.

The service was judged to have poor prospects for improvement because:

The service at the time lacked political, financial and managerial commitment and leadership

Provision of the service was fragmented

The council's own planning and performance management was weak

There was no on-going consultation about the service with local community and relationships with local stakeholders are poor

July 2004—A culture whole service inspection was carried out in July 2004 at Brent. The service inspected consisted of the parks service and sports service which are located within the environment directorate and the library service, heritage service, out of school support service and cultural services which are located within the directorate for education, arts and libraries. Culture services were judged to be good with promising prospects for improvement.

Key findings from the inspection include:

Clear links can be demonstrated between the ambition for cultural services' and the ambition for the local area. This has been developed through extensive consultation with local stakeholders;

projects to improve physical access have now been addressed in light of DDA legislation and the website has been developed as an effective tool to encourage participation;

all the cultural services can demonstrate outcomes against local priorities and are applying programmes targeted at the needs of local people in this diverse community;

though not all service areas are delivering to a consistent standard the progress made in sport over the past eighteen months is significant and the quality of service in parks and libraries is strong; and

A sports strategy entitled, 'A strategy for Sport and Physical activity' has been developed and approved by the Executive.

However:

satisfaction ratings in the sports service as measured by MORI are low at 38 per cent;

while improvements are noted in the sports service, these now need to be sustained in the long term and the pace of improvement maintained; and

The outcomes and impacts of some local projects are not being measured and it is therefore difficult for the council to demonstrate the added value of such projects.

Prospects for improvement are promising because:

clear leadership from councillors and senior mangers is evident and the two directorates which share responsibility for the provision of these services work and communicate effectively together;

capacity has been increased and performance management systems are in place to support further improvement;

the directorates have mainstreamed equality and diversity issues into service planning and partnerships have been used to increase capacity and attract resources; and

The strategic planning framework effectively links cultural priorities with relevant priorities in corporate plans and other directorate plans and these have benefited from external stakeholder engagement. However it is early days in the embedding of this framework and the council needs to keep focussed on ensuring appropriate mechanisms are in place for monitoring and reviewing existing and future plans.

However:

With some exceptions, the quality of the building stock is deteriorating. While this is partly related to the age of facilities it does also demonstrate corporate weaknesses in asset management in recent years;

Improving the infrastructure for cultural services will require significant levels of investment. The challenge of identifying these levels and then putting in a robust framework to attract them has not yet been tackled; and

Whilst we found some service operational plans to be of a high standard, some need to be more rigorous in their specification of targets, action, deadlines and the assignment of tasks to staff.

Local Government

David Howarth: To ask the Deputy Prime Minister what estimate he has made of the cost to local authorities, including the time of officers, of hosting, preparing for and following up inspections and reviews by bodies for which his Department is responsible in the 2004–05 financial year; what evaluation procedures the Government have to assess the effectiveness of those bodies in bringing about improvement in local government services; and what steps are taken to ensure that the remits of those organisations do not *(a)* overlap and *(b)* conflict. [5367]

Mr. Woolas: The Office of the Deputy Prime Minister is responsible for sponsorship of the Audit Commission, which undertakes inspection of local authority services and inspection by its Housing Inspectorate of registered social landlords. There are no agreed or reliable figures to calculate the indirect costs of inspection to local government (i.e. staff time).

Mrs. Spelman: To ask the Deputy Prime Minister pursuant to his answer of 6 June 2005, *Official Report*, column 406W, how many representations he has received from local councils advocating *(a)* local government restructuring and *(b)* unitary local government subsequent to the result of the north east regional referendum. [4516]

Mr. Woolas: Since November last year we have received a number of representations from local government covering a range of views from, on the one hand, advocating the establishment of unitary authorities, to others favouring the status quo.

David Howarth: To ask the Deputy Prime Minister (1) if he will list the organisations for which his Department is responsible which *(a)* inspect, *(b)* review, *(c)* train and *(d)* support local authorities; how much financial support each received from central government funds in the 2004–05 financial year; how much each raised in fees and charges from local authorities in that year; how many staff each employed (i) directly and (ii) as consultants in each year; and what proportion of those staff normally work on-site in local authorities; [5532]

(2) if he will list the organisations financially supported by his Department in the 2004–05 financial year which *(a)* inspect, *(b)* review, *(c)* train, *(d)* support and *(e)* represent local authorities; and how much financial support each received from his Department in that year. [5533]

Mr. Woolas: A number of bodies which provide services for local authorities are specified by the Secretary of State to receive funding from the Revenue Support Grant. Details of these bodies and their RSG funding for 2004–05 are tabled as follows:

	RSG funding
Improvement and Development Agency for Local Government	21,097,000
Employers' Organisation for Local Government	11,763,000
The Fire Services Examination Board	488,000
The National Foundation for Educational Research in England and Wales	1,311,000
The National Institute of Adult Continuing Education	694,000
The Local Government International Bureau	1,666,000
The Local Authorities Co-ordinating body on Food and Trading Standards	1,755,000
Public Private Partnerships Programme	2,947,000
National Youth Agency	1,461,000
The Commission for Local Administration in England	11,058,000

In addition, the Office of the Deputy Prime Minister (ODPM) is responsible for the sponsorship of the Audit Commission, which has a statutory responsibility to regulate the audit of local government and NHS bodies in England, to carry out inspections of best value authorities and to assess the performance of local authorities. These responsibilities extended to Wales for the year ended 31 March 2005.

In respect of its local Government activities, the Commission received the following financial support from central Government in 2004–05:

	£ million
ODPM	18.1
Welsh Assembly Government	1.6
Other	0.4
Total	20.1

ODPM is also responsible for and financially supports other organisations, which are occasionally involved in supporting and representing local authorities' interests. We do not have reliable information on whether these organisations engaged in local authority interests for the 2004–05 period. To gather such information would be at a disproportionate cost.

Mr. Walker: To ask the Deputy Prime Minister how many new homes are forecast to be built in Hertfordshire in *(a)* 2005, *(b)* 2006, *(c)* 2007, *(d)* 2008, *(e)* 2009, *(f)* 2010 and *(g)* 2011; and if he will make a statement. [3218]

Yvette Cooper: The Hertfordshire structure plan sets an annual average of 3,250 new homes in the period to 2011. The average rate achieved during the period 2001 to 2004 was 3,125. The Regional Spatial Strategy (RSS) for the east of England is currently under review and will set out future plans for new homes in Hertfordshire. It is expected that the RSS will be published around the end of 2006.

Local Government Standards Board

Mr. Dismore: To ask the Deputy Prime Minister how many complaints to the Local Government Standards Board against a councillor in each of the last three years were made *(a)* by a member of the public, *(b)* by another councillor, *(c)* by a councillor from the same political party, *(d)* by a councillor from another political party, *(e)* by an officer of a council, *(f)* by the chief executive of the council and *(g)* by the monitoring officer of the council, where the monitoring officer is not the chief executive; how many were (i) upheld, (ii) dismissed and (iii) resulted in no penalty being imposed in each case; and if he will make a statement. [3895]

Mr. Woolas: The information which can be provided is tabled as follows:

	Number of allegations received		
	2002–03	*2003–04*	*2004–05*
Members of the public			
Total	1,191	1,680	2,359
Not referred for investigation	862	1,219	1,955
Referred for investigation	329	461	404
Councillors			
Total	1,277	1,316	1,266
Not referred for investigation	703	841	875
Referred for investigation	574	475	391
Monitoring officers			
Total	276	45	27
Not referred for investigation	58	9	5
Referred for investigation	218	36	22
Other local authority officers			
Total	123	84	146
Not referred for investigation	40	54	82
Referred for investigation	83	30	64

The Standards Board does not record information regarding the political affiliation of councillors who have submitted allegations. Its records do not distinguish between allegations submitted by chief executives and other local authority officers or whether there are cases where monitoring officers are also chief executives.

Information is not available on the detailed outcome of cases in respect of each particular category of complainant.

Mr. Dismore: To ask the Deputy Prime Minister how many hours of Standards Board officers' time were spent on the case of Councillor Paul Dimoldenberg, broken down by grade of officer; and if he will make a statement. [3900]

Mr. Woolas: The Standards Board does not record the amount of time spent by staff on any particular investigation.

Mobile Advertising

Mr. Drew: To ask the Deputy Prime Minister if he will take steps to ban mobile advertising hoardings in the countryside. [3060]

Yvette Cooper: Outdoor advertisements, such as these, are controlled by local planning authorities under the provisions of the Town and Country Planning (Control of Advertisements) Regulations 1992 and require the express consent of the local planning authority before they can be displayed lawfully.

It is for the relevant local planning authority to determine whether a particular advertisement should be permitted and the most appropriate course of action to take when an advertisement is displayed in contravention of the regulations.

The Office of the Deputy Prime Minister intends to write to local authorities shortly, reminding them of their powers to act in these cases.

Mobile Phone Masts

Anne Milton: To ask the Deputy Prime Minister when the Government expect to conclude their review of planning regulations for mobile phone masts. [3370]

Yvette Cooper: In September last year the Office of the Deputy Prime Minister commissioned the University of Reading and Arup to undertake an independent study to assess the impact that the code of best practice on mobile phone network development has had since its introduction. The report will be published in due course. On 4 April I announced the Government will be commissioning further research to identify the future direction of mobile phone technology and the future need for mast developments.

National Spatial Address Infrastructure

Mrs. Spelman: To ask the Deputy Prime Minister whether he will lead the Government agency with responsibility for the National Spatial Address Infrastructure. [4267]

Mr. Woolas: The proposed specification and plans to deliver the National Spatial Address Infrastructure are set out in the outline prospectus published by the Office of the Deputy Prime Minister on 26 May 2005.

The proposals state that the new infrastructure will be provided by Ordnance Survey on behalf of the user community under direction of the Office of the Deputy Prime Minister and there will be a new governance structure that will ensure that interests of stakeholders are protected.

The main partners, Ordnance Survey and the Local Government Information House (LGIH), a wholly owned subsidiary of the Improvement and Development Agency (IDeA) have agreed heads of terms for the development process.

Ordnance Survey, the National Mapping Agency, is a trading fund that reports to Parliament through Ministers in the Office of the Deputy Prime Minister.

Non-departmental Bodies

Mrs. Spelman: To ask the Deputy Prime Minister if he will list each non-departmental public body, executive agency, quango or taskforce which *(a)* has regional offices or *(b)* is based around a Government office region; and what the date of establishment was of each. [4295]

Yvette Cooper: This information is not held centrally and could be provided only at disproportionate cost.

Pensions

Mrs. Spelman: To ask the Deputy Prime Minister whether he will publish a regulatory impact assessment for his plans to revoke the Local Government Pension Scheme (Amendment) (No. 2) Regulations 2004. [4306]

Mr. Woolas: A final decision to revoke the Local Government Pension Scheme (Amendment) (No. 2) Regulations 2004 will require the preparation of a regulatory impact assessment which will be published.

Planning Appeals/Policy Guidance

Mrs. Spelman: To ask the Deputy Prime Minister what changes the Government have made to planning guidance relating to park-and-ride sites since May 1997. [4248]

Yvette Cooper: Since May 1997, the Government have issued planning policy guidance note (PPG) 13 Transport (March 2001), which covers park-and-ride schemes at paragraphs 59 to 63, and also at annex E provides an amendment to PPG2 Green Belts, adding new paragraphs 3.17–3.20.

Mrs. Spelman: To ask the Deputy Prime Minister for what reasons planning appeal decisions by the planning inspectorate are not accessible to the public via their website; and if he will make a statement. [4309]

Yvette Cooper: The planning inspectorate is in the process of rolling out an online appeals service the Planning Casework Service (PCS).

The PCS is available via the Planning Portal (www.planningportal.gov.uk). It enables people to complete, submit, view, track progress, comment on, and search for appeals online.

The PCS is being rolled out in stages. It is currently live for access restriction appeals and enforcement appeals and will go live for new planning appeals later this year.

Mrs. Spelman: To ask the Deputy Prime Minister what changes the Government have made to planning guidance on *(a)* the density of residential development, *(b)* infill development and *(c)* suburban development, since May 1997. [4242]

Yvette Cooper: 'Planning Policy Guidance Note 3: Housing' was published by the then Department of the Environment, Transport and the Regions (DETR) in 2000. It introduced a new approach to planning for housing, including guidelines for the density of residential development.

Other relevant changes to planning policy include 'Planning Policy Statement 1: Delivering Sustainable Development' and 'Planning Policy Statement 6: Planning for Town Centres', both published by the Office of the Deputy Prime Minister in 2005, and 'Planning Policy Guidance Note 13: Transport' published by DETR in 2001.

Mrs. Spelman: To ask the Deputy Prime Minister (1) what plans the Government have to revise Planning Policy Guidance 3; [4247]

(2) what plans he has to revise planning guidance relating *(a)* to the green belt, *(b)* residential housing development and *(c)* infill development; and if he will make a statement; [4315]

(3) what plans the Government have to amend planning guidance on infill development; and if he will make a statement. [4322]

Yvette Cooper: I refer the hon. Member to the written statement made by my right hon. Friend the then Minister for Housing and Planning on 17 June 2004, *Official Report* column 45WS, which set out the Government's plans for revising planning policy guidance.

Since this written statement was made, the Government have published Planning Policy Guidance Note 3: Housing consultation paper entitled 'Planning for Mixed Communities' and have announced the intention that they will consult this summer on an updated approach to planning for the supply of land for housing.

Population Distribution

Mr. Walker: To ask the Deputy Prime Minister what measures he is taking to encourage population growth away from the east and south-east of England; and if he will make a statement. [3215]

Yvette Cooper: The Government are committed to helping those who wish to live and work in the region where they were born and brought up to do so. That is why it is looking at how it can secure sustainable growth and affordable housing in the wider south-east. Constraining growth in the more prosperous regions would not necessarily benefit other regions. Investment displaced from the wider south-east might well go abroad, or simply not happen.

Nevertheless the Government do have a range of initiatives in place to encourage growth in other regions. For example, work is under way to implement the proposals that emerged from the Lyons Review of Public Sector Relocation, which reviewed the scope for relocating public sector jobs out of London and the south-east. Departments have confirmed 20,000 jobs for dispersal from London and the south, which should be completed by 2010.

The Government have a PSA target to improve the economic performance of all the English regions by 2008 and over the long-term reduce the persistent gap in growth rates between the regions, demonstrating progress by 2006. Furthermore, the Government are actively supporting the Regional Development Agencies and their partners in the north, Midlands and south-west in developing inter-regional growth strategies to achieve economic growth in their regions. For example, the Northern Way Growth Strategy which was published in September 2004.

Regional Bodies

Mrs. Spelman: To ask the Deputy Prime Minister what the address is of the offices of each *(a)* regional chamber, *(b)* regional housing board and *(c)* regional observatory. [4512]

Yvette Cooper: The information is as follows.

(a) Regional chambers

East of England Regional Assembly
Flempton House
Flempton
Bury St. Edmunds
IP28 6EG

East Midlands Regional Assembly
Belvoir Suite
Council Offices
Nottingham Road
Melton Mowbray
LE13 OVL

North East Assembly
The Guildhall
Quayside
Newcastle upon Tyne
NE1 3AF

North West Regional Assembly
Wigan Investment Centre
Waterside Drive
Wigan
WN3 5BA

Mrs. Spelman: To ask the Deputy Prime Minister if he will list the powers and responsibilities of the regional housing boards. [4277]

Yvette Cooper: Regional Housing Boards meet at the request of Ministers. They are not statutory bodies and therefore have no powers. Each one has been given responsibility for producing its region's Housing Strategy and for making recommendations to Ministers on how resources for housing capital investment should be targeted.

Mrs. Spelman: To ask the Deputy Prime Minister if he will make a statement on the timetable for the Government's plans to merge the regional housing boards with regional planning bodies. [4280]

Yvette Cooper: We are considering a number of points of detail and will be making an announcement soon.

Right to Buy

Mr. Amess: To ask the Deputy Prime Minister if he will make a statement on the right to buy for *(a)* housing association and *(b)* council house tenants. [3748]

Yvette Cooper: The right to buy is available to secure tenants of local authorities and Registered Social Landlords (RSLs). In addition, assured tenants of RSLs who have transferred with their homes from local authorities have a preserved right to buy. Around 2.9 million tenants have the right to buy or preserved right to buy.

Mrs. Spelman: To ask the Deputy Prime Minister how many housing association tenants are eligible for *(a)* the right to buy, *(b)* the preserved right to buy, *(c)* the right to acquire and *(d)* voluntary purchase grants. [4274]

Yvette Cooper: Approximately 65,000 housing association tenants have the Right to Buy.

Another 930,000 housing association tenants who have transferred with their homes from local authorities have a Preserved Right to Buy.

A further 146,000 housing association tenants may qualify for the Right to Acquire scheme introduced by the Housing Act 1996 because their homes have been built with public funds since April 1997. Some of the tenants who have transferred from local authorities may also qualify for the Right to Acquire scheme.

It is not possible to say how many tenants are eligible for Voluntary Purchase Grants. This scheme is offered at the discretion of housing associations, which bid to the Housing Corporation for funds to cover the discount offered to the tenant. Eligibility therefore depends on whether housing associations choose to participate in the scheme, which properties are included, and the availability of funding.

Social Housing

Mrs. Spelman: To ask the Deputy Prime Minister if he will publish figures for the number of households in *(a)* council housing and *(b)* housing associations in England in each year since 1997. [4273]

Yvette Cooper: The numbers of local authority and housing association (registered social landlord) dwellings at 31 March each year since 1997 are tabled as follows:

Units: thousands of dwellings

	Local authority	*Registered social landlord*
1997	3,401	985
1998	3,309	1,040
1999	3,178	1,146
2000	3,012	1,273
2001	2,812	1,424
2002	2,706	1,467
2003	2,457	1,621
2004	2,335	1,665

Source:
Local Authority HSSA returns to ODPM; Housing Association RSR returns to Housing Corporation

Solent Gateway

Mrs. Spelman: To ask the Deputy Prime Minister if he will state how much *(a)* greenfield and *(b)* green belt land there is in the Solent Gateway area. [4173]

Yvette Cooper: The Government do not collect statistics on the proportions of greenfield land, and there is no land designated as green belt in the Southampton, Eastleigh, Fareham, Gosport, Portsmouth and Havant areas.

Spatial Strategy (Water)

Anne Main: To ask the Deputy Prime Minister what mechanisms the panel established to conduct the examination in public into the Draft Regional Spatial Strategy will use *(a)* to calculate the amount of water required for each new dwelling, *(b)* to establish the source for the water of each dwelling, *(c)* to establish the sustainability of the source of water for each new dwelling and *(d)* to establish the impact on local rivers, the environment and the biodiversity of the area. [4078]

Yvette Cooper: The Environment Agency is responsible for protecting and improving the environment in England and Wales, and will be presenting evidence to the forthcoming examination in public of the East of England plan.

The water companies' water resource plans, which must be submitted for periodic scrutiny and review by the Environment Agency, provide the mechanisms for calculating the amount of water required for each new dwelling and the source, or sources, likely to be available. The current plans were rolled forward in 2004, and the Environment Agency published its advice to Ministers in July 2004. The next full review is due in 2009, but plans will be monitored by the agency, and revised and updated by the water companies, on an annual basis.

The water companies have generally allowed for the level of growth currently planned to 2016; hence the panel's role will be to test whether the water companies' plans have allowed for the additional development proposed in the East of England plan. Where they have not, the panel will wish to be satisfied that, on the evidence presented by the water companies, the Environment Agency and others, it is reasonable to conclude that any forecast increase in demand can be met when it arises.

The agency has indicated that it intends to make the results of its most recent water resource modelling available to the examination. As part of the testing process, the panel will consider the sustainability of proposals for meeting additional demand and possible environmental impact. From 2008 onwards, this will

include considering the links with the river basin plans which the Environment Agency will be producing to implement the Water Framework Directive.

Special Advisers

Mrs. Spelman: To ask the Deputy Prime Minister if he will list the names of the special advisers currently employed in his Department. [4287]

Jim Fitzpatrick: Joan Hammell, Mick Halloran and Alan Schofield are currently employed as special advisers to my right hon. Friend the Deputy Prime Minister; Tim Williams is currently employed as special adviser to my right hon. Friend the Minister of Communities and Local Government.

Telephone Boxes

Sarah Teather: To ask the Deputy Prime Minister what powers his Department has given to local authorities to remove derelict telephone boxes. [2494]

Mr. Woolas: Outside designated areas, licensed electronic communications code system operators are authorised under the Town and Country Planning (General Permitted Development) Order 1995 (GPDO) (as amended by SI 2115/2003) to install public call boxes. Under permitted development rights telecommunications apparatus should be removed as soon as reasonably practicable after it is no longer required for telecommunications purposes. If this is not carried out the local planning authority may serve a breach of condition notice requiring the removal of the equipment.

NORTHERN IRELAND

Abortion

Mr. Dodds: To ask the Secretary of State for Northern Ireland what the membership is of the working party established to develop guidance on abortion in Northern Ireland; how many times it has met; and where each meeting was held. [4053]

Mr. Woodward: Following the order made by the Court of Appeal on 26 November 2004, a small departmental working group was subsequently established to consider how best we might meet the requirements of the order. The working group comprises the Department's director of family and elderly care, representatives from family policy unit and departmental solicitor's office, chief medical officer, chief nursing officer, a senior medical officer and the head of midwifery at the Royal jubilee maternity service.

A sub group with the specific remit of developing guidance on abortion has not yet been established.

Academically Gifted Children

Lady Hermon: To ask the Secretary of State for Northern Ireland what *(a)* guidance is issued and *(b)* research has been undertaken by his Department in relation to educating academically gifted children (i) exclusively with other academically gifted children and (ii) with non-academically gifted children. [3492]

Angela E. Smith: The Department of Education has not issued specific guidance to schools or undertaken research in relation to the education of academically gifted children.

Ards and Down Area Plan

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland what the status of the Draft Ards and Down Area Plan is following the Judicial Review; and if he will make a statement. [4105]

Angela E. Smith: The status of the Draft Ards and Down Area Plan have not altered following the application for a Judicial Review. It remains a material consideration in the determination of planning applications.

Following consideration of the written judgment of the High Court, which clarified a number of important issues, the Department of the Environment has withdrawn the precautionary appeal and has written to the Planning Appeals Commission setting out a framework within which it is anticipated that the public inquiry can proceed.

Mr. McGrady: To ask the Secretary of State for Northern Ireland if he will make a statement on the public inquiry into the Draft Ards and Down Area Plan. [5738]

Angela E. Smith: The Department of the Environment has recently written to the Planning Appeals Commission setting out a framework within which it is anticipated that the public inquiry can proceed. We understand that the Planning Appeals Commission is to hold a meeting on 28 June 2005 to consider the timetable for the resumption of the inquiry.

Belfast Regeneration Office

Mr. Dodds: To ask the Secretary of State for Northern Ireland how much has been spent by the Belfast Regeneration Office in each year since its formation. [4393]

Mr. Hanson: Belfast Regeneration Office (BRO) was formed in 1997–98 financial year. The following table details the amount of money spent by RO (excluding receipts) through its three main funding streams, namely; Action Plan; Making Belfast Work (Area Teams); and Physical, since its formation. It should be noted that the amounts supplied in this table differ from information provided in response to an earlier parliamentary question on 9 March 2005, *Official Report*, column 1878, on BRO expenditure. I apologise to the hon. Gentleman as this was due to an administrative oversight which resulted in physical expenditure being excluded. It should also be noted that since 2002–03 and the 2003–04 financial years respectively BRO has no longer had responsibility for EU expenditure or Belfast City Centre. This has been a contributory factor to the decline in expenditure recorded against BRO.

	Amount (£)
1997–98	25,513,497
1998–99	13,912,247
1999–2000	22,649,589

	Amount (£)
2000–01	21,079,449
2001–02	18,189,856
2002–03	17,236,077
2003–04	7,899,261
2002–05	5,890,176
2005–06 (to date)	1,178,918

Breast Cancer

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland how many women have been diagnosed with breast cancer in Northern Ireland in each of the last five years. [1442]

Mr. Woodward: The following table details the number of incidences of breast cancer in women in Northern Ireland for the years 1998–2002.

Breast cancer incidences in women in Northern Ireland from 1998–2002

Year of diagnosis	Northern Ireland total
1998	916
1999	947
2000	966
2001	916
2002	943

This information has been provided by the Northern Ireland Cancer Registry and is the most up to date currently available.

Bullying

Lady Hermon: To ask the Secretary of State for Northern Ireland how many pupils in each education and library board area in Northern Ireland were withdrawn from school in each of the past five years because they were victims of bullying. [3493]

Angela E. Smith: The Department of Education does not collect the information requested. Pupils withdrawn from school because of bullying may be referred to the Education Welfare Service as non-attenders. While information on non-attendance referrals is collected, data on the reason for the poor attendance is not.

Cardiac Surgery

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland how many patients in each health board area are currently awaiting cardiac surgery in the Province. [1424]

Mr. Woodward: The number of people, in each health and social services board, who were awaiting admission to hospital in the cardiac surgery specialty, at 31 March 2005, is detailed in the following table.

Health board of residence	Total waiting
Eastern HSS Board	101
Northern HSS Board	66
Southern HSS Board	54
Western HSS Board	33
Northern Ireland	254

Figures exclude private patients and those resident outside Northern Ireland awaiting treatment in health and personal social services hospitals.

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland how many cardiac operations were performed in the Province in each of the last five years. [1425]

Mr. Woodward: The number of operations performed in the cardiac surgery specialty in hospitals in Northern Ireland in each of the last five years, is detailed in the following table.

	Number of operations
2003–04	1,022
2002–03	1,128
2001–02	1,007
2000–01	1,088
1999–2000	1,135

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland how many cardiac operations are scheduled to be performed in the Province in *(a)* 2005 and *(b)* 2006. [1427]

Mr. Woodward: The Royal Group of Hospitals Health and Social Services Trust is the regional provider of cardiac surgery for the people of Northern Ireland. Currently there are 800 patients expected to receive cardiac surgery at the Royal in 2005–06; each of these patients may require more than one operation. A similar figure has been estimated for 2006–07.

Care Home (Resident Numbers)

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland what his latest estimate is of the number of persons in the Province aged over *(a)* 65, *(b)* 75 and *(c)* 85 years of age resident in (i) residential care homes, (ii) nursing homes and (iii) their own homes and receiving domiciliary care; and what the equivalent figures were (A) five and (B) 10 years ago. [1407]

Mr. Woodward: This information is not collected centrally. However, information is available for 2001 from the Northern Ireland Census of Population on the number of people resident in communal establishments including residential homes and nursing homes, and in private households, by age, and is shown in the following table. Comparable figures for 1991 are not available.

	Age		
Place of Residence	65 and over	75 and over	85 and over
Residential homes	3,325	2,891	1,573
Nursing homes	6,171	5,382	3,023
Other communal establishments	3,142	2,400	1,037
Private households	210,687	89,459	17,668
Total	223,325	100,132	23,301

Children in Need

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland when he expects that the Children in Need strategy will be published for public consultation. [1421]

Mr. Woodward: The Department of Health, Social Services and Public Safety is currently developing a strategic framework for children, young people and families. Consultation with key stakeholders from both the statutory and voluntary sectors will take place in the next few months at a series of workshops followed by a widespread public consultation in early 2006.

Classroom Assistants

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland when the job evaluation process for classroom assistants is expected to be finalised; and if he will make a statement. [4070]

Angela E. Smith: Classroom Assistants are employees of the local Education and Library Boards and issues relating to their terms and conditions of employment are therefore a matter for the Boards as employers. I understand that there are important issues that remain to be resolved between the Boards and Trade Union Side in respect of classroom assistants. I am assured that negotiations remain on-going and that their completion is a priority for all five Boards. In these circumstances, it would not be appropriate for me to comment further beyond confirming that funding has already been made available by the Department for arrears linked to this particular job evaluation exercise and is not affected by the current financial position of the Boards.

Cognitive Behavioural Therapy

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland what the current *(a)* average and *(b)* longest waiting time for (i) assessment for cognitive behavioural therapy (CBT) and (ii) commencement of CBT in each health board area in the Province is. [1435]

Mr. Woodward: The information requested is not available.

Cold-related Deaths

Mr. Dodds: To ask the Secretary of State for Northern Ireland how many deaths are estimated to have been caused by cold related illnesses in Northern Ireland in each year since 1997. [4151]

Angela E. Smith: Numbers of cold-related deaths are not available, as cold is not recorded as a cause of death in itself. For the period 1997 to 2004 the number of deaths registered in Northern Ireland each year where hypothermia[1] was mentioned on the death certificate is given in the following table.

Deaths registered in Northern Ireland with hypothermia mentioned on the death certificate, 1997 to 2004

	Number
1997	22
1998	22
1999	12
2000	12
2001	16
2002	14
2003	8
2004 (provisional)	11

[1] Deaths with a mention of hypothermia defined using the International Classification of Diseases, Ninth Revision (ICD-9) code 991.6 for the years 1997 to 2000 and, for the years 2001 to 2004, the International Classification of Diseases, Tenth Revision (ICD-10) code T68.

Constituency Boundaries

Mr. Gregory Campbell: To ask the Secretary of State for Northern Ireland when he expects hearings arising from responses to the draft recommendations for parliamentary election boundaries in Northern Ireland to take place. [5507]

Mr. Hain: A public notice and press release were issued by the Boundary Commission for Northern Ireland on 14 June announcing that there would be three public Local Inquiries to be held in respect of all 14 parliamentary constituencies affected by the Boundary Commission's Provisional Recommendations published on 6 May 2004. They will begin on 5 September in Belfast, 14 September in Ballymena, and 19 September in Newcastle, Co Down.

Crime Detection Rates

Mr. Dodds: To ask the Secretary of State for Northern Ireland how he defines the clearance of offences for the purposes of determining the success of the Police Service of Northern Ireland crime detection rates. [4389]

Mr. Woodward: The PSNI state that a crime is deemed to be cleared when a notifiable offence has been committed and recorded; a suspect has been made aware that they will be recorded as being responsible for the crime; and there is sufficient evidence to charge the suspect with the crime.

There are a number of methods of clearance. Those involving a formal sanction are as follows:

- Charging or issuing a summons to an offender
- Issuing a caution to an offender
- Having the crime accepted for consideration in court
- The offender is a juvenile who is dealt with by means of an informed warning or restorative caution.

Crimes not involving a formal sanction but still regarded as 'cleared' are those where the police take no further action for the following reasons:

- Offender, victim or essential witness is dead or too ill
- Victim refuses or is unable to give evidence
- Offender is under the age of criminal responsibility
- Police or Public Prosecution Service decides that no useful purpose would be served by proceeding
- Time limit of six months for commencing prosecution has been exceeded.

Cross-border Rail Links

Mr. Hayes: To ask the Secretary of State for Northern Ireland if he will make a statement on cross-border rail connections with the Republic of Ireland. [5221]

Mr. Woodward: The important rail service between Belfast and Dublin has operated for 150 years. The service is currently provided jointly by Northern Ireland Railways and Iarnrod Eireann, the Republic of Ireland operator. There are eight journeys in each direction from Monday to Saturday inclusive and five journeys each way on Sundays. Recent engineering works that have caused disruption to services have now been completed. The focus can now be on delivering improved punctuality and reliability.

Dentistry

Lady Hermon: To ask the Secretary of State for Northern Ireland how many NHS dentists there were in Northern Ireland in each of the past five years; and what steps he is taking to increase the numbers of dentists in Northern Ireland. [5502]

Mr. Woodward: The information requested is provided in the following table.

Number of health service general dental practitioners registered in Northern Ireland each year since 2001

As at 1 April each year	*Headcount*
2005	726
2004	720
2003	696
2002	689
2001	673

The vast majority of dentists are independent contractors and are not directly employed within the health and personal social services.

In order to facilitate the supply of suitably qualified dentists, the Department funds a one year vocational training (VT) scheme and a two-year general professional training (GPT) scheme. Prior to August 2000 there were 20 VT places, this has been increased to the current level of 24 VT places and four dental trainees in each year of the GPT scheme. This represents an annual total of 28 health service training places for graduate dentists in Northern Ireland.

The requirements for dentists are monitored through the Department's ongoing workforce planning process.

Digital Hearing Aids

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland what assessment he has made of the merits of introducing a target in Northern Ireland for time from referral of patients to receipt of digital hearing aids. [1408]

Mr. Woodward: Digital hearing aids have been provided in Northern Ireland since October 2003. A target of 5,000 digital hearing aids to issue each year was determined at that time. However, that expectation has been exceeded with over 15,000 digital hearing aids issued to date. The latest statistical information has indicated that the majority of those seeking digital hearing aids are seen within three months and that 85 per cent. are seen within six months. The Department is considering how it might extend partnerships with the private sector to further increase the provision of digital hearing aids.

Drugs

Sammy Wilson: To ask the Secretary of State for Northern Ireland (1) how many reported incidents of illegal drug use *(a)* in and *(b)* outside schools in the Province there were in each of the last 10 years; [5308]

(2) how many cases of illegal drugs possession by school pupils on school premises occurred in each of the Province's education board areas in each of the last five years; [5309]

(3) how many needle stick injuries resulting from discarded needles on school premises have occurred in the Province in each of the last 10 years. [5310]

Angela E. Smith: The information requested is not available. The Department does not require schools to notify it, or the education and library boards, of incidents of illegal drug use, illegal drug possession or needle stick injuries. Schools have a duty in law to notify the police where they believe or suspect a pupil to be in possession of a controlled drug.

Education and Library Board Services

Lady Hermon: To ask the Secretary of State for Northern Ireland what the change in funding for education and library board services in Northern Ireland is for 2005–06, taking employment, pension, superannuation and other costs outside their budgets into account. [3487]

Angela E. Smith: The delegated budgets for schools funded through the education and library boards under Local Management of Schools arrangements increased by £59 million from £669 million in 2004–05 to £728 million in 2005–06, an increase of almost 9 per cent. Excluding increased superannuation costs for both teaching and non teaching staff and the costs of teachers progressing to point 2 of the upper pay scale, and taking account of falling pupil numbers, the percentage increase is 3.3 per cent. on a like for like basis.

Education and Library Board non-earmarked centre budgets rose by £19 million from £333 million in 2004–05 to £352 million in 2005–06, an increase of almost 6 per cent. Taking into account the increased costs referred to above, the percentage increase is almost 3 per cent. on a like for like basis.

Since these allocations were announced, the Government have also made available a further £2.5 million for Education and Library Boards, to support collaborative working across Boards.

Election Procedure

Mr. Gregory Campbell: To ask the Secretary of State for Northern Ireland how many and what proportion of people used each of the four approved forms of identification at the general election in Northern Ireland on 5 May. [2799]

Mr. Hanson: The number and the proportion of people that used the four approved forms of identification at the general election in Northern Ireland on 5 May that were recorded by polling staff were as follows.

	Number	Percentage of total
Driving Licence	342500	51.6
Passport	189872	28.6
Senior SmartPass	74141	11.2
Electoral ID Card	56916	8.6
Total Recorded	663429	—
Total Poll	723768	—

The difference in the total recorded and the total poll is made up of voters who came to the polling station that polling staff did not count and the 24,200 who voted by post.

EU Accession Country Workers

Lady Hermon: To ask the Secretary of State for Northern Ireland what assessment he has made of the effect of the use of output-related payments to labour market intermediaries on the delivery of services to *(a)* ethnic minorities and *(b)* migrant workers from the EU Accession countries; and what plans he has to review the system. [5524]

Angela E. Smith: The Labour Market Intermediaries exist in three pilot areas of Belfast. They are supported by the Department for Employment and Learning. Job seekers from ethnic minorities and EU Accession countries who are legally entitled to work in Northern Ireland can avail of the services of the LMIs. An assessment of the LMI funding support arrangements, including the element that is output-related, will be undertaken as part of their formal evaluation which is scheduled to begin in September 2005.

Farmers (Loans)

Lady Hermon: To ask the Secretary of State for Northern Ireland how many people he expects to benefit from his recent announcement of low interest loans for young farmers in Northern Ireland. [5521]

Angela E. Smith: The new entrants scheme opened for applications on 6 June 2005. While it is difficult to estimate the level of demand, the Department of Agriculture and Rural Development has a target uptake of 600 young farmers over the next three years.

Forensic Examinations

Mr. Lidington: To ask the Secretary of State for Northern Ireland whether he plans to propose changes to the law to enhance the powers of civilian scenes of crime officers in Northern Ireland to carry out a forensic examination on a non-consenting suspect. [4086]

Mr. Woodward: There are currently no plans to change the law to enhance the powers of crime scene investigators (CSIs), as they are known within the PSNI, to carry out a forensic examination on a non-consenting suspect. CSIs currently have the power to take non-intimate samples with the written consent from a detained person (unless that person is detained under the Terrorism Act). Provisions are in place to facilitate forensic examinations on non-consenting suspects by constables and forensic medical officers.

I have been advised by the PSNI that they have recently increased the numbers of police officers trained within the serious crime branch investigation teams, in the process of cartridge discharge residue swabbing. This ensures the facilitation of forensic examination on non-consenting suspects, as required, and allows CSIs to be better utilized by being deployed at the scene of incidents that give rise to the detention of prisoners rather than in the processing of the prisoners themselves.

General Practitioners

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland what extra resources are being provided to assist general practitioners in the Province in *(a)* the appraisal process for and *(b)* delivering special interest services. [1423]

Mr. Woodward: Since the introduction of the appraisal scheme in 2003–04, an additional payment of £300 per annum has been made to each general practitioner being appraised and a further payment of £300 is made to the GP appraiser for each appraisal carried out.

In relation to general practitioners delivering special interest services, no formal extra central funding is presently made available for this specific purpose, but Health and Social Services Boards do fund a small number of general practitioners for providing certain specialised services although the overall amount is not readily available.

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland how many general practitioner surgeries in the Province have been *(a)* built and *(b)* modernised since June 1997. [1447]

Mr. Woodward: There are 32 general practitioner surgeries that have been built and 189 general practitioner surgeries have been modernised since 1997. The Eastern health and Social Services Board have only been able to provide information on modernized surgeries from 2001.

A further 13 surgeries are currently being modernised.

In addition, all 365 surgeries across the Province have benefited from improvement grants in respect of *(a)* security and *(b)* adaptations in relation to the Disability Discrimination Act 1995.

Hare Coursing

Mr. Drew: To ask the Secretary of State for Northern Ireland how many applications he has received for the netting of hares for hare coursing; and if he will defer any decision on these applications until he has received the results of the survey of Irish hare numbers which the Department of Environment has recently commissioned. [4700]

Angela E. Smith: One application for a licence to net hares for hare coursing in October 205 has been received from the Ballymena Coursing Club.

My noble Friend, Lord Rooker, will take into account the status of the Irish hare population in considering that application.

Health Care Trusts

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland how many procedures each health

trust in the Province has bought *(a)* within and *(b)* outside the Province; and what the resultant costs were in each of the last five years. [1439]

Mr. Woodward: Health and social services trusts do not purchase procedures either within or outside Northern Ireland, any transfer of patients is the responsibility of the health and social services boards.

Higher Education Funding

Lady Hermon: To ask the Secretary of State for Northern Ireland how much funding for higher education colleges was made available by his Department in each education and library board area in Northern Ireland in each of the past five years; and how much was made available for the North Down and Ards Institute. [2181]

Angela E. Smith: In 1999 responsibility for the funding of the further education colleges in Northern Ireland passed from the education and library boards to the Department for Higher and Further Education Training and Employment, now the Department for Employment and Learning. In the academic years 1999/2000, 2000/01, 2001/02, 2002/03 and 2003/04 North Down and Ards Institute of Further and Higher Education received total FE recurrent and capital funding of £6.912 million, £7.869 million, £9.093 million, £10.846 million and £11.72 million respectively. The academic year runs from 1 August until 31 July and therefore the last full academic year for which details are available is year ended 31 July 2004. Detailed in the following table is the total recurrent and capital funding paid to all the further education colleges over the last five academic years.

DEL grants as per college audited accounts

£000

	Year end 31 July:				
College	*2000*	*2001*	*2002*	*2003*	*2004*
Armagh	3,873	3,734	3,986	5,060	5,788
BIFHE	23,111	27,813	28,243	34,785	33,968
Castlereagh	3,275	3,908	4,130	5,840	5,961
Causeway	4,230	4,686	5,202	5,190	6,392
East Antrim	4,808	6,493	7,168	7,972	8,071
East Down	4,441	4,848	5,239	5,826	5,710
East Tyrone	3,780	4,120	3,993	4,337	4,835
Fermanagh	4,247	4,246	4,650	5,888	6,578
Limavady	3,382	4,203	4,399	4,704	5,910
Lisburn	3,961	3,994	5,469	6,199	6,123
Newry and Kilkeel	5,978	6,577	7,892	9,762	10,838
NI Hotel and Catering College	1,898	1,817	1,974	[1]	—
North Down	6,912	7,869	9,093	10,846	11,720
North East	7,315	8,957	9,655	10,095	11,064
North West	11,822	14,097	16,017	18,138	18,953
Omagh	3,373	3,793	4,306	4,840	4,909
Upper Bann	6,312	7,056	7,555	7,958	9,377
Total	102,718	118,211	128,971	147,440	156,197

[1] Amalgamated with university of Ulster.

Home Teaching

Lady Hermon: To ask the Secretary of State for Northern Ireland how many pupils in each education and library board area in Northern Ireland are taught at home; and what guidance or assistance is offered to those parents or guardians wishing to teach their children at home. [3494]

Angela E. Smith: On 1 June 2005 the number of children being educated at home in each education and library board is as follows:

Board area	*Number of pupils*
BELB	5
WELB	28
NEELB	49
SEELB	16
SELB	60
Total	158

A parent seeking advice on educating their child at home will be directed to an appropriate source such as an education and library board or council for the curriculum, examinations and assessment (CCEA).

Hospital Meals

Mr. Gregory Campbell: To ask the Secretary of State for Northern Ireland whether patients in Northern Ireland hospitals have been surveyed in 2005 to establish the level of satisfaction with hospital meals. [5548]

Mr. Woodward: The Department of Health, Social Services and Public Safety has conducted a Public Attitudes Survey of the Health and Personal Social Services annually since 2003. Fieldwork for the 2005 survey has recently been completed but results are not yet available. The 2004 survey questioned 1,500 members of the public on their experience of using the Health Service in Northern Ireland. Fourteen percent of all respondents had an overnight stay in hospital during the previous twelve months. Those who had an overnight stay were asked to rate the quality of the hospital food, and for those who expressed an opinion, the results were as follows:

Satisfaction rating of the quality of hospital food	*Percentage*
Excellent	15.7
Good	36.5
Fair	24.9
Poor	22.8

When the figures are combined this shows that 52.2 per cent. of respondents rated the quality of hospital food as either good or excellent, while 47.8 per cent. rated it as either fair or poor.

Hydebank Prison

Lady Hermon: To ask the Secretary of State for Northern Ireland what steps he is taking to implement the recommendations of the chief inspector of Criminal Justice and HM chief inspector of prisons following their recent inspection of Hydebank prison. [3505]

Mr. Woodward: Following the joint inspection last November, the Northern Ireland Prison Service published its action plan on the Prison Service's website which will be updated quarterly. The action plan responds to each of the 96 recommendations, around one-third of which have been implemented since the publication of the Inspection report on 26 May.

Two senior managers from HM Prison Service have been seconded to assist in the development of policy for female prisoners and Hydebank Wood has dedicated a

NIPS female governor exclusively to Ash House. A policy team whose role will include liaison with female prisoners and consultation with external organisations has also been appointed. Policies will be subject to consultation wherever appropriate.

Identity Cards

Lady Hermon: To ask the Secretary of State for Northern Ireland what discussions he has had with the Chief Constable of the Police Service of Northern Ireland on the Government's plan to introduce a national identity card scheme. [3514]

Mr. Hain: The Association of Chief Police Officers, of which the Chief Constable of the PSNI is a member, has been involved in extensive consultation with the Home Office about the Government's proposal for a national identity card scheme across the UK.

Incapacity/Industrial Injury Benefits

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland how many residents in *(a)* Newtownards, *(b)* Comber, *(c)* Dundonald, *(d)* Carryduff and *(e)* Killyleagh were in receipt of (i) incapacity benefit and (ii) industrial injury benefits in each of the last three years. [5325]

Mr. Hanson: The information requested is as follows.

Incapacity benefit as at August each year

Number

Area	*2002*	*2003*	*2004*
Newtownards	3,610	3,765	3,777
Comber	396	412	403
Dundonald	109	111	111
Carryduff	236	243	230
Killyleagh	143	132	129

Industrial injuries as at August each year

Number

Area	*2002*	*2003*	*2004*
Newtownards	n/a	593	623
Comber	n/a	77	76
Dundonald	n/a	34	34
Carryduff	n/a	34	39
Killyleagh	n/a	10	13

A geographical breakdown of industrial injuries benefit claimants is unavailable for 2002.

Inter-departmental Group on Personal Care

Mr. Dodds: To ask the Secretary of State for Northern Ireland who the members are of the inter-departmental group on personal care; and how many times the group has met in each year since its formation. [4386]

Mr. Woodward: The membership of the inter-departmental group on personal care convened in September 2001 comprised senior officials from the Office of the First Minister and Deputy First Minister, the Department of Finance and Personnel, the Department of Health, Social Services and Public Safety and the Department for Social Development. The inter-development group was supported by a sub-group which brought forward its findings for consideration and agreement by the inter-departmental group.

The groups met regularly in the course of preparing the report submitted to the Executive on 8 August 2002. The work on costed options has been updated annually following the collapse of the devolved administration.

Libraries

Mr. Gregory Campbell: To ask the Secretary of State for Northern Ireland how many libraries he expects will be operational in Northern Ireland in 2006. [5505]

Mr. Hanson: My expectation is that there will be 115 branch libraries in 2006. In addition there are 33 mobile libraries.

Mr. Gregory Campbell: To ask the Secretary of State for Northern Ireland how much was spent on the purchase of new books for libraries in each education board area in each of the last five years. [5506]

Mr. Hanson: The following table sets out details of the amount spent by each of the Education and Library Boards on the purchase of new books in each of the last five years.

£000

	2000–01	*2001–02*	*2002–03*	*2003–04*	*2004–05*
BELB	445	371	497	125	[1]173
NEELB	336	274	577	342	[1]173
SEELB	490	565	472	266	[1]118
SELB	394	[2]228	334	119	[1]117
WELB	89	262	332	143	[1]176

[1] Information sourced directly from boards, published figures not yet available.

[2] Figure sourced directly from board, not included in published returns for this year

Note:

This information includes monies spent on reference books, adult fiction, adult non-fiction and children's books. It does not cover newspapers, periodicals, magazines or electronic media.

Source:

Remainder of figures sourced from the Chartered Institute of Public Finance and Accountancy (CIPFA) Public Library Statistics Publication.

Lady Hermon: To ask the Secretary of State for Northern Ireland what regulation his Department carries out of *(a)* charging levels and *(b)* practices relating to the delivery of services in public libraries in Northern Ireland. [5525]

Mr. Hanson: Charging levels for library services are a matter for the Education and Library Boards to determine. The Department of Culture, Arts and Leisure has meetings three times a year with the Chief Librarians and twice a year with other senior officers of the boards at which a range of practice issues, among other matters, are discussed.

Lady Hermon: To ask the Secretary of State for Northern Ireland what plans he has to review the public private partnership arrangement between the Department of Education and Amey plc for the delivery of some library services. [5527]

Mr. Hanson: The contract for the Electronic Libraries for Northern Ireland (ELFNI) project was signed in 2002 by the North Eastern Education and Library Board and Amey BPO Services Ltd., and runs until 2012 under a public-private partnership. The Department of Culture, Arts and Leisure, which has responsibility for the public library service, has no plans to review this arrangement.

The Department, together with the five Education and Library Boards, monitors the delivery and effectiveness of the project through regular monitoring arrangements.

Life Sentences

Mr. Dodds: To ask the Secretary of State for Northern Ireland whether he plans to introduce a statutory framework for life sentence tariffs in Northern Ireland. [4383]

Mr. Hanson: The Government have been considering the responses received from the public consultation carried out in Northern Ireland last year on minimum terms in life sentence cases. A separate consultation on a review of the sentencing framework in Northern Ireland has recently ended. I will now be considering the way forward in light of both consultations.

Listed Buildings (Portstewart)

Mr. Gregory Campbell: To ask the Secretary of State for Northern Ireland what the cost to the Department of the Environment in Northern Ireland, excluding legal costs, was in connection with the case pursued by the Department on the demolition of listed buildings at the Diamond in Portstewart during August 2003. [5504]

Angela E. Smith: The cost to the Department of the Environment (excluding legal costs) for the preparation of the prosecution case for the demolition of 9/11 the Diamond, Portstewart was in the region of £8,500.

In addition to the prosecution case, the Department was also dealing with retrospective applications for planning permission and listed-building consent at the site and also the subsequent appeals. It is not possible to apportion the time spent on each of these as they are all interlinked and the Department does not keep itemised records of staff time spent on each case.

Lock Out Crime Scheme

Lady Hermon: To ask the Secretary of State for Northern Ireland (1) what assessment he has made of the effectiveness of the lock out crime scheme in tackling crime in the areas in which it has been in operation; and what plans he has to extend it throughout Northern Ireland; [3484]

(2) how many people have applied for assistance under the lock out crime scheme since its inception; and how many of these applicants were successful; [3485]

(3) if he will make a statement on the criteria used when assessing applicants to the lock out crime scheme. [3486]

Mr. Hanson: The lock out crime scheme aims to provide additional home security in the form of door and window locks, exterior lighting and front door security free of charge to all those in Northern Ireland aged 65 and over, who are in receipt of housing benefit of rate rebate. The scheme is funded by the Northern Ireland Office and delivered by the Northern Ireland Housing Executive.

There is no application process. The Housing Executive identify all eligible older people and write to each one individually offering the benefits of the scheme. To date 19,500 letters have been issued and 5,526 individuals have returned forms and will be admitted to the scheme. A further 7,500 letters have also been issued on which final information about returns have not yet been compiled. The scheme applies right across Northern Ireland, but has been rolled out on a district council basis. All those eligible aged 75 and over will be contacted by July 2005 and those aged 65 and over by mid 2006.

The criteria used in the scheme targets those older people in the community least able to afford home security. There are almost 250,000 older people in Northern Ireland and the Government could not offer the free supply and installation of home security measures under the lock out crime (LOC) scheme universally within current resources. I was however pleased to recently announce a reduction in the age criteria for the scheme from 75 to 65.

There are no plans to carry out a formal evaluation of LOC. Recipients of LOC are asked to complete a satisfaction survey after completion of the work and the NIHE undertake random evaluation from scheme recipients.

While NIHE do intend to provide information about their findings from this survey it was not possible in the time available from notification about this PQ to provide any meaningful data. However anecdotal and first hand information from recipients clearly indicate that the additional security makes them feel more secure, particularly at night.

Marfan Syndrome

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland what provision there is in the Province for sufferers of Marfan syndrome. [1399]

Mr. Woodward: Marfan's syndrome is a rare, but distressing, condition that affects a small number of people in Northern Ireland. Currently, patients suffering from this syndrome are treated by consultants working in the Regional Genetics Centre at Belfast City Hospital and other appropriate specialists, particularly those within the cardiology unit at the Royal Group of hospitals. The specialist clinicians in this area already work quite closely with one another to provide quality care for all patients and their families. They are moving towards closer and more formal links to further improve the care provided to families in terms of screening for genetic abnormalities, counselling and appropriate treatment.

Mental Health

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland if he will implement the recommendations of the Appleby Report on the National Service Framework for Mental Health. [1402]

Mr. Woodward: The National Service Framework for Mental Health is a vision for mental health in England and Wales. It does not apply to Northern Ireland. At present, mental health services are being considered by the Review of Mental Health and Learning Disability chaired by Professor David Bamford.

MRI Scans

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland what assessment he has made of the merits of instituting MRI waiting list initiative schemes throughout Northern Ireland. [1418]

Mr. Woodward: There are currently nine MRI scanners in Northern Ireland, with two more planned to come into operation in 2006.

Health and social services boards in Northern Ireland have in recent years undertaken a range of MRI waiting list initiatives which have contributed to alleviating waiting lists and improving waiting times for MRI scans. These include engaging mobile MRI scanning units, introducing evening scanning sessions and utilising private MRI facilities within Northern Ireland and elsewhere.

As MRI capacity within the health and personal social services develops, the need for further waiting list initiatives will be kept under review.

Multi-storey Car Parking (Coleraine)

Mr. Gregory Campbell: To ask the Secretary of State for Northern Ireland when he expects multi-storey car parking provision to be made available in Coleraine. [5545]

Mr. Hanson: Despite the best endeavours of Roads Service to develop a multi-storey car park on the existing ground level car park in Abbey Street, the legal advice is that the statutory powers vested in the Agency would not be sufficient for the type of development required.

The powers for development of such lands are vested in the Department for Social Development (DSD) under Article 87 of the Planning (Northern Ireland) Order 1991. The Department for Social Development is considering how best to take forward developments on the Mall and Abbey Street car parks in Coleraine town centre. Subject to the response from the private sector to the development opportunities presented by the sites, it is anticipated that work could begin during 2006.

Neighbourhood Renewal (North Belfast)

Mr. Dodds: To ask the Secretary of State for Northern Ireland what progress has been made on the Neighbourhood Renewal Strategy in North Belfast. [5346]

Mr. Hanson: Since the launch of Government's Neighbourhood Renewal Strategy "People and Place" in June 2003 by the then Minister for Social Development, (Mr. Spellar), good progress has been made in North Belfast.

To date 15 organisation's have received funding totalling £923,390 under phases 1 and 2 of the Neighbourhood Renewal Investment Fund with a further 11 organisations currently under consideration.

Work is also underway to create Neighbourhood Partnerships in each of the four Neighbourhood Renewal Area's namely: Inner City North Belfast; Crumlin/ Ardoyne; Upper Ardoyne/Ligoniel; and Rathcoole.

The Inner City North Belfast Partnership has submitted a "Statement of Readiness" to the Department for Social Development and it is expected this will receive approval in the next few days. At that stage the Partnership will commence work in developing the Neighbourhood "Vision Framework" and "Action Plan" for the Neighbourhood Renewal Area.

Mr. Dodds: To ask the Secretary of State for Northern Ireland how much has been spent on *(a)* new build housing, *(b)* urban renewal areas and *(c)* renovation and repair in the social housing sector in North Belfast in each year since 2001. [5347]

Mr. Hanson: The information requested is set out in the following table and shows land and property acquisition costs which are an essential complement to the expenditure on urban renewal areas but not forming part of that expenditure.

£ million

		Urban renewal areas and associated land and property acquisition			*Renovation and repair*	
	New build social housing	*Urban renewal areas*	*Land acquisition*	*Property acquisitions*	*Capital improvement*	*Revenue maintenance*
2001–2002	16.0	0.7	1.3	0.6	17.4	6.1
2002–2003	19.2	2.1	1	0.9	3	9
2003–2004	31.6	4.8	1.4	0.8	1.8	6.5
2004–2005	27.5	2.5	1.2	1.4	3.4	3. 2

NHS Overseas Staff

Mr. Gregory Campbell: To ask the Secretary of State for Northern Ireland how many overseas staff are employed in the NHS in Northern Ireland. [5549]

Mr. Woodward: The information is not available in the format requested.

Parades

Jim Dobbin: To ask the Secretary of State for Northern Ireland what the total cost was of policing parades for which a form 11/1 was *(a)* completed and *(b)* not completed in each of the last five years. [3828]

Mr. Woodward: The cost of policing each separate parade held in Northern Ireland, whether an 11/1

(application to parade) form is completed or not completed, is not centrally held and is difficult to place an exact figure upon. To obtain such information would involve a manual trawl across records held by 29 District Command Units. This question can therefore only be answered by incurring disproportionate costs.

Patient Waiting Times

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland what percentage of patients experienced waits of longer than *(a)* two and *(b)* four hours in each accident and emergency department in the Province in each of the last five years. [5350]

Mr. Woodward: This information is not collected in the format requested.

Personal Care (Elderly People)

Mr. Dodds: To ask the Secretary of State for Northern Ireland what his policy is on the introduction of free personal care for the elderly in Northern Ireland. [4387]

Mr. Woodward: The inter-departmental group's report on free personal are was submitted to the First Minister and Deputy First Minister on 8 August 2002. Following discussion at the Executive, Ministers asked for further work on costed options to be undertaken.

The further work was completed but could not be reported back to the Executive because of the suspension of the devolved administration. I have, however, asked officials to bring forward the findings so that I may consider them in the context of other Budget priorities.

Phoenix Natural Gas

Dr. Alasdair McDonnell: To ask the Secretary of State for Northern Ireland what steps the Government *(a)* has taken and *(b)* plans to take to assess the effect on consumers of the proposed acquisition of Phoenix Natural Gas as part of East Surrey Holdings by Terra Firma Capital Partners Ltd. [1057]

Angela E. Smith: The Department has a statutory role in relation to the Phoenix Natural Gas licence in the event of any change of ownership. Specialist consultants have been appointed to assist the Department in its assessment of the proposed Terra Firma transaction. The Department will consider all information relating to the transfer in accordance with its statutory obligation to promote the development of an efficient, economic and co-ordinated gas industry in Northern Ireland.

Police Oversight Commissioner

Lady Hermon: To ask the Secretary of State for Northern Ireland what the cost of the operation of the office of the Police Oversight Commissioner has been in each year since its formation. [5522]

Mr. Woodward: I have been informed by the office of the Police Oversight Commissioner that the operational costs since its establishment are as follows.

	£
May 2000 to March 2001	404,434
Year ending March:	
2002	653,823
2003	785,930
2004	735,175
2005	715,206

Political Parties (Donations)

Mr. Heald: To ask the Secretary of State for Northern Ireland what requirements there are on Northern Ireland political parties to publish information on donations; and if he will make a statement. [1265]

Mr. Hanson: Northern Ireland parties are currently exempted from the requirement to comply with part IV of the Political Parties, Elections and Referendums Act 2000 that set out the control and disclosure of donations to registered parties. However, the Government have made clear that there should be a move to greater transparency in the political donation requirements in Northern Ireland, and we are currently reflecting on how best to achieve this.

The main Northern Ireland political parties, like other UK parties, are required to submit an annual statement of accounts to the Electoral Commission, who publish these statements. Parties whose total income or gross expenditure is less than £250,000 are required to submit a statement of accounts within three months of their year end. Those parties that exceed this limit are required to submit their statement of accounts within six months of their year end.

Post-primary Education

Lady Hermon: To ask the Secretary of State for Northern Ireland when he will answer the letter to him dated 11 April from the hon. Member for North Down in relation to the future of post-primary education in Northern Ireland. [5551]

Ms Angela E. Smith: The hon. Lady's letter of 11 April was replied to on 27 April.

Prison Service Efficiency Programme

Lady Hermon: To ask the Secretary of State for Northern Ireland what the timetable is for the implementation of the recommendations arising from the review of the Northern Ireland Prison Service Efficiency Programme. [3470]

Mr. Woodward: Following publication of an independent review of the Prison Service's Efficiency Programme on 6 June, the Director General announced a strategic programme for the development of the service over the next 10 to 15 years. This wider programme encompasses the existing efficiency work.

The main plan is due to be prepared before the end of this year. However the full implementation of the plan will take a number of years, depending on various factors including consultation with interested parties and the availability of resources.

Private Finance Initiative Projects

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland what the total value is of private finance initiative projects in the Province granted approval in each year since 1997, broken down by department. [1412]

Angela E. Smith: The capital values of PFI projects which have been granted approval and a contract awarded are detailed as follows.

Contract awarded/Department	*Capital value (£ million)*
1997	
Health, Social Services and Public Safety	3.3
1998	
Education	3.3
Employment and Learning	[1]38
Health, Social Services and Public Safety	22.3
1999	
Education	6.5
Employment and Learning	10
Finance and Personnel	[1]45
Health, Social Services and Public Safety	3.7
Regional Development	12
2000	
Education	28.5
Employment and Learning	20
Social Development	[1]26.5
2001	
Education	[1]15.9
Environment	14
2002	
Culture, Arts and Leisure	[1]36.5
Education	[1]26.2
2003	
Education	[1]126.2
Employment and Learning	32
Health, Social Services and Public Safety	42
2004	
Culture, Arts and Leisure	3
Enterprise, Trade and Investment	[2]53
2005	
Health, Social Services and Public Safety	15.7

[1] These figures relate to the estimated costs for the provision of Information Technology Systems and services over the life of the contracts rather than capital values.

[2] This figure relates to the estimated costs of a contract for the provision of office accommodation services for a period of 25 years rather than the capital value.

Pupil Expulsions

Lady Hermon: To ask the Secretary of State for Northern Ireland how many pupils were *(a)* suspended and *(b)* expelled from schools in each education and library board area in Northern Ireland in the last three years for which figures are available. [3495]

Angela E. Smith: The information requested is as follows.

(a) Number of pupils suspended in each education and library board

	BELB	*WELB*	*NEELB*	*SEELB*	*SELB*	*Total*
2001–02	1,277	882	1,107	919	914	5,099
2002–03	1,014	906	1,201	992	1,169	5,282
2003–04	1,191	936	1,286	987	1,085	5,485

(b) Number of pupils expelled in each education and library board area

	BELB	*WELB*	*NEELB*	*SEELB*	*SELB*	*Total*
2001–02	7	16	18	12	23	76
2002–03	18	12	17	16	7	70
2003–04	6	12	15	12	26	71

Racist Attacks

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland how many racist attacks have occurred in each parliamentary constituency in Northern Ireland over the last three years; and what steps have been taken by the agencies to combat such attacks. [4069]

Mr. Woodward: The statistics are not available in the format requested as the Police Service of Northern Ireland record statistics by District Command Unit rather than by parliamentary constituency. These statistics are set out in the following table:

Number of racial incidents[1]—2002–03 and 2003–04

District command unit	*2002–03*	*2003–04*	*2004–05[2]*
Urban region			
North Belfast	16	27	76
South Belfast	58	147	159
East Belfast	11	32	54
West Belfast	0	11	13

Craigavon	35	31	79
Cookstown	14	11	16
Down	1	5	8
Newry and Mourne	2	11	15
Dungannon and South Tyrone	7	21	69
Total for Region	85	164	368
Overall Total	226	453	813

[1] Racial incidents include murder, physical assault, verbal abuse/ threat, attack on home, attack on property, graffiti and written material.

[2] Not directly comparable with earlier years.

A new method of recording these figures was introduced in 2004–05. The statistics issued by the Chief Constable are now aligned with Home Office practice and as a result the figures for 2004–05 are not directly comparable with the figures for 2002–03 and 2003–04.

PSNI believe the rise in figures to be due to an increase in racially motivated offences, improved confidence in the PSNI amongst minority ethnic communities and improved recording systems.

The Government are currently taking steps to tackle the issue of racially motivated incidents. The Criminal Justice (No2) (Northern Ireland) Order 2004 has already been introduced. This directs the courts to take account during sentencing of any offence where there is evidence of hostility based on, among other things, race, and it increases the maximum sentences available for certain specified, mainly violent offences including where racial aggravation is proven.

The Police Service of Northern Ireland is investing considerable time and effort in addressing race crime. Recent initiatives include the introduction of an on-line reporting system on the PSNI website as part of the "Hate Crime is Wrong" campaign. minority liaison officers have been appointed in each District Command Unit. Their role is to record and monitor racially motivated and other types of hate crime in their area, advise and support victims of such crime, and work in partnership with statutory and voluntary agencies to address these issues. The PSNI has also introduced targeted patrolling in areas where people are deemed to be at greatest risk of attack and are working in partnership with other agencies to develop solution to the problem.

The PSNI is determined to investigate fully all hate related incidents and where possible to secure sufficient evidence to prosecute offenders.

Rates Reform

Mrs. Spelman: To ask the Secretary of State for Northern Ireland whether the proposals for domestic rates reform will be revenue-neutral. [4328]

Angela E. Smith: Yes. The level of annual rates increases will be considered in the course of the Budget process.

Mrs. Spelman: To ask the Secretary of State for Northern Ireland what the timetable is for reform of domestic rates. [4329]

Angela E. Smith: The reforms of the domestic rating system in Northern Ireland will be introduced in April 2007.

Recorded Crime (North Belfast)

Mr. Dodds: To ask the Secretary of State for Northern Ireland how many crimes have been recorded in *(a)* North Belfast and *(b)* Northern Ireland in each year since 1997; in how many cases there was a detection; in how many cases proceedings were commenced; and in how many cases convictions were secured. [4390]

Mr. Woodward: The Police Service of Northern Ireland has provided the following statistics in relation to the number of crimes recorded and cleared by the police since 2000: Unfortunately PSNI Statistics Branch does not hold information prior to this date.

	2000–01	*2001–02*	*2002–03*	*2003–04*	*2004–05*
(a) North Belfast District Command Unit					
Crimes recorded	10,029	12,605	12,137	9,698	8,637
Crimes cleared by method of clearance:					
Charge/summons	1,133	667	1,032	939	1,032
Adult caution/informed warning	192	77	129	83	68
Taken into consideration by the court	26	1	6	1	11
Juvenile restorative caution/informed warning	108	55	113	55	41
Offender under age	20	8	10	18	11
Complainant declined to prosecute	628	378	557	796	573
DCU Commander/DPP/PPS direct no prosecution	120	58	31	29	20
Otherwise disposed of	18	21	21	21	13
Total crimes cleared	2,245	1,265	1,899	1,942	1,769
(b) Northern Ireland					
Crimes recorded	119,912	139,786	142,496	127,953	118,124
Crimes cleared by method of clearance:					
Charge/summons	13,052	11,808	13,896	14,375	14,631
Adult caution/informed warning	2,795	2,079	2,393	2,227	2,206
Taken into consideration by the court	1,151	439	612	534	457
Juvenile restorative caution/informed warning	1,927	1,427	1,554	1,427	1,421
Offender under age	245	219	177	169	211
Complainant declined to prosecute	10,874	10,140	12,051	14,361	12,230
DCU Commander /DPP/PPS direct no prosecution	2,232	1,652	1,438	1,542	1,788
Otherwise disposed of	246	378	685	458	400
Total crimes cleared	32,522	28,142	32,806	35,093	33,344

Statistics relating to prosecution and convictions are provided in the following table:

	Prosecutions		*Convictions*	
	Northern Ireland	*North Belfast*	*Northern Ireland*	*North Belfast*
1997	35,599	1,566	30,964	1,422
1998	31,127	1,296	26,880	1,136
1999	30,439	1,166	26,524	1,057
2000	30,492	—	26,618	—
2001	28,563	—	24,350	—
2002	28,044	—	24,100	—
2003	30,937	—	26,675	—

Notes:

1. The figures above are based on the principal offence rule so only the most serious offence for which a person is proceeded against is included.
2. From 2000, prosecutions data are drawn from the PSNI Integrated Crime Information System, which only records the District Command Unit to which an offender's address relates. Figures are not therefore available for proceedings stemming from crimes reported to North Belfast after 1999.
3. Information is not yet available for prosecutions and convictions made after 2003.

Roads and Street Works Legislation

Lady Hermon: To ask the Secretary of State for Northern Ireland if he will subject the roads and water services, along with private developers and utility companies, to an independent regulator to ensure full compliance with the terms of roads and street works legislation in Northern Ireland. [3604]

Mr. Woodward: The Street Works (Northern Ireland) Order 1995 is the Northern Ireland equivalent of GB legislation, designed to regulate the opening and reinstatement of public roads by utilities. Also, any private developer placing or retaining apparatus in the street must have a street works licence and comply with the requirements of the Street Works Order. This regime is regulated and enforced by Roads Service. I believe this regulation is effective, and there is no need for an additional regulator. Water Service aims to comply fully with the terms of the order; however, as it is an agency of the Crown it cannot currently be prosecuted as other utilities. This will change when Water Service becomes a Government owned company. In the interim, any offences by Water Service, which would be prosecutable under the legislation, will be recorded in a register along with the remedial actions agreed with Roads Service.

Works for roads purposes, on the other hand, is specifically excluded from the Street Works Order. This is the same as the position in the rest of the UK, where in no instance is the work of highway authorities covered by the street works legislation, nor is it subject to independent regulation.

The safety of the work operations themselves is subject to the Health and Safety legislation, which is enforced by the Health and Safety Executive. This would apply to promote safe working practices, such as avoiding underground pipes or cables being damaged. All of the parties you mention are treated equally under this legislation.

Roads Service is ultimately responsible for the maintenance of the road infrastructure to keep it safe, effective and reliable and to preserve the value of the asset. With utilities making over 45,000 openings each year I am sure that you will appreciate it is important that Roads Service retains enforcement responsibilities for Street Works in respect of the various agencies working there.

I can confirm there are no plans for Roads Service to relinquish this authority by introducing an independent regulator.

School Crossing Patrols

Lady Hermon: To ask the Secretary of State for Northern Ireland what assessment his Department has made of whether there will be an effect on child safety of the recent decision of the south eastern education and library board to cut school crossing patrol services within its catchment area. [3620]

Angela E. Smith: Education and library boards apply nationally agreed guidelines to assess the level of risk before reaching decisions on the future provision of specific school crossing patrols. The assessed risk is based on factors such as sight-lines, volume and type of traffic, width of road, availability of footpaths, central refuges/pedestrian crossings/traffic signals, etc. Boards decisions are, therefore, based on ensuring that the safety of pupils is not jeopardised.

Special Needs Children

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland what the longest time was that a special needs child waited to be statemented within each of the education and library boards in Northern Ireland in the last year for which figures are available; and if he will make a statement. [4107]

Angela E. Smith: The majority of statutory assessments are completed and formal statements of special educational needs made within 18 weeks from the date of request, in line with the Education (NI) Order 1996 and the Code of Practice on the Identification and Assessment of Special Educational Needs 1998. However, in some circumstances delays occur for a range of reasons related to the specific case, including levels of parental co-operation with the required process.

The longest times taken from receipt of request to the making of the formal statements are:

	Length of time taken from receipt of request
BELB	11 years
NEELB	41 weeks
SEELB	2 years
SELB	27 months
WELB	64.5 weeks

Speed Cameras

Lady Hermon: To ask the Secretary of State for Northern Ireland how much revenue was generated by

speed cameras in each police district command unit area in Northern Ireland in the last year for which figures are available; and how much of this money was spent on road safety initiatives. [3504]

Mr. Woodward: The revenue generated by speed cameras in each police district command unit area is as detailed in the following table. All such fine revenue is paid into the UK consolidated fund. The unique nature of how the PSNI is funded means that the PSNI currently only recovers costs associated with the operation and maintenance of the N.I. Safety Camera scheme. As such, none of the revenue generated by the scheme is returned to PSNI for the express purpose of funding road safety initiatives at present.

DCU area	*Number of notices paid*	*Total fines (£60 per notice)*
PSNI rural region

Suicide

Lady Hermon: To ask the Secretary of State for Northern Ireland how many deaths by suicide were recorded in each health trust area in Northern Ireland in each of the last five years for which figures are available. [3475]

Angela E. Smith: The following table gives the number of deaths in Northern Ireland of residents of each health and social services trust area for the years 2000 to 2004, where the cause of death was recorded as either 'suicide and self-inflicted injury'[1] or 'undetermined injury whether accidentally or purposefully inflicted'[2].

[1] International Classification of Diseases, Tenth Revision codes X60-X84, Y87.0 for years 2001–04 and Ninth Revision codes E950-E959 for 2000.

[2] International Classification of Diseases, Tenth Revision codes Y10-Y34, Y87.2 for years 2001–04 and Ninth Revision codes E980-E989 for 2000.

Number of deaths in Northern Ireland of residents of each health and social services board and trust area by year due to 'suicide and self-inflicted injury' or 'undetermined injury whether accidentally or purposefully inflicted'

	2000	*2001*	*2002*	*2003*	*2004*[1]	*2000–04*[1]

Northern Ireland	185	158	183	144	145	815

[1] Data for 2004 is provisional

Mr. McGrady: To ask the Secretary of State for Northern Ireland if he will introduce a regional strategy for the prevention of suicides in Northern Ireland. [1356]

Mr. Woodward: The Promoting Mental Health Strategy and Action Plan, launched in January 2003 includes a specific section on preventing suicide. Following the recommendation of the Strategy Implementation Group we have recently established a small group to consider the actions in the strategy relating to suicide prevention. This group has been tasked to make recommendations by the end of October 2005 on what further measures need to be put in place to address the issue.

Surgical Site Infections

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland whether occurrences of surgical site infections are *(a)* reported and *(b)* recorded in the Province. [1409]

Mr. Woodward: The Northern Ireland Healthcare Associated Infection Surveillance Centre (HISC) leads on surveillance of surgical site infection (SSI). HISC assists acute trusts in Northern Ireland in undertaking health care associated infection (HCAI) surveillance. A regional surveillance programme for surgical site infection in elective orthopaedics is in place which makes it mandatory for all hospitals in Northern Ireland performing adult elective orthopaedic surgery to provide data on HCAI to HISC. Data can be accessed via website: www.hisc.n-i.nhs.uk. The Royal Jubilee Maternity Unit has piloted post-discharge surveillance of caesarean section site infection. This will be reported on and a regional approach determined.

The 'Strategy for the Prevention and Control of Healthcare Associated Infection (HCAI) In Northern Ireland' is scheduled to be issued for formal public consultation at the end of June 2005. Included in the strategy are a number of recommendations aimed to further develop comprehensive HCAI surveillance programmes in acute trusts in Northern Ireland.

Traffic Calming (Strangford)

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland how many successful requests for traffic calming measures are awaiting action by the Department of Regional Developments Roads Service section within the Strangford constituency; what the average time between approval and completion of work was in the last period for which figures are available; and if he will make a statement. [4104]

Mr. Woodward: The Chief Executive of Roads Service (Dr. Malcolm McKibbin) has been asked to write to the hon. Lady in response to this question.

Letter from Dr. Malcolm McKibbin to Mrs Iris Robinson, dated 14 June 2005:

You recently asked the Secretary of State for Northern Ireland a Parliamentary Question:

"how many successful requests for traffic calming measures are awaiting action by the Department of Regional Development's Roads Service section within the Strangford constituency; what the average time between approval and completion of work was in the last period for which figures are available; and if he will make a statement."

I have been asked to reply as this issue falls within my responsibility as Chief Executive of Roads Service.

As you will be aware, the Strangford Constituency incorporates parts of both our Eastern and Southern Divisions. The schemes currently listed for the 2005/06 and 2006/07 years are as follows:

Schemes currently listed

2005–06	
Scrabo Estate (N'ards)	Ready to commence construction
Railway St (Comber)	Currently dealing with objections
Portaferry (approach to town)	Consultation began 20 May 2005
Saintfield (approach to town)	Consultation began 13 June 2005
Killynure Road (Carryduff)	At design stage
Moneyrea Village	At design stage
Gransha Road (Dundonald)	At design stage

Schemes currently listed

2006–07	
Movilla St (N'ards)	Programmed
Killinchy (approach to village)	Programmed
Parsonage Rd (Kircubbin)	Programmed
Old Ballygowan Rd (Comber)	Programmed
Downpatrick Rd Crossgar	Programmed

(No schemes have been listed for our Eastern Divisional area for 06/07 year as their traffic calming programme has yet to be finalised.)

The time between approval of a scheme and completion of the work may vary from two months to one year depending on the consultation process and the contractor's workload and logistics, but an average timescale would normally be six months. However, I should point out that schemes completed in the 2004/05 financial year in the Strangford constituency averaged 8 months due to a problem with the supply of signs that has since been resolved.

Video Identification

Mr. Lidington: To ask the Secretary of State for Northern Ireland if he will make a statement on the Government's policy on the use of video identification in place of identity parades in Northern Ireland. [4087]

Mr. Woodward: The Police Service of Northern Ireland plans to introduce the Video Identification Parade Electronic Recording (VIPER) system in Northern Ireland later this year.

The Government see considerable merit in the use of video identification technology, which has already proved very successful in England and Wales. It will significantly enhance the effectiveness of the current identification procedures and remove many of the operational difficulties experienced by the PSNI in arranging live identification parades. Its introduction in Northern Ireland will benefit all those involved in the Criminal Justice system, including the Police Service, the Prosecution Service, the legal profession, suspects and witnesses.

My officials have therefore been working closely with police colleagues on arrangements which will facilitate the early introduction of the new system.

Water Services

Mr. McGrady: To ask the Secretary of State for Northern Ireland what steps are being taken to identify which households in Northern Ireland are not connected to mains water or sewerage. [5741]

Mr. Woodward: The Chief Executive of Water Service (Mrs. Katharine Bryan) has been asked to write to the hon. Gentleman in response to this question.

Letter from Katharine Bryan to Mr. Eddie McGrady, dated 17 June 2005:

You recently asked a Parliamentary Question asking what steps are being taken to identify which households in Northern Ireland are not connected to mains water or sewerage (5741). I have been asked to reply as this issue falls within my responsibility as Chief Executive of Water Service.

Around 99% of households are connected to the public water supply and around 83% are served by public sewers. We do not currently hold comprehensive records of all households connected to mains water or sewerage services and are therefore not aware of the details of those households not connected. Water Service

applies a system of reasonable cost allowance to determine whether applications for new first time services can be fully met at public expense.

However, in preparation for the proposed introduction of domestic charging a comprehensive Customer Database is being developed. This process includes liaison with other government agencies and available data is matched with our water and sewerage infrastructure records. This is a significant task and we are going to considerable lengths to ensure maximum accuracy in the data which will be required to support future customer services.

Lady Hermon: To ask the Secretary of State for Northern Ireland what action he is taking to improve water quality at the Northern Ireland beaches where water quality failed to meet the mandatory European Community standard. [3506]

Angela E. Smith: In 2004, 14 of the 16 (87.5 per cent.) identified bathing waters met the mandatory standards of the Directive, however, those at Castlerock and Ballyholme failed to comply.

The failure to meet mandatory standards was due mainly to the wet weather during the summer period Studies have shown there is a direct correlation between bathing water compliance levels and the frequency and intensity of rainfall during the bathing season. Heavier rainfall leads to an increase in the number of spills from combined sewer overflows and an increase in agricultural run-off.

To address the sewerage problems, Water Service has commenced construction of a new wastewater treatment works to serve the North Coast. It is scheduled for completion in the spring of 2007. The works will treat all wastewater from Portrush, Portstewart, Coleraine, Castlerock and Articlave. This should result in an overall improvement in the bathing water quality in the North Coast area.

Water Service plans to construct a new wastewater treatment works at Donaghadee to treat the wastewater from Bangor, Donaghadee and Millisle. The project is schedule for completion in December 2007. In addition, a number of Drainage Area Studies in the North Down area, have been completed and have identified approximately £13 million of networks improvements. Major programmes of work to implement the necessary improvements will be implemented on a phased basis from 2006. Completion of this investment will result in an overall improvement in the bathing water quality in the area.

Action is also being taken to control diffuse pollution from agricultural sources through the imminent introduction of an action programme under the EC Nitrates Directive.

Mr. Gregory Campbell: To ask the Secretary of State for Northern Ireland whether health and safety procedures at water service installations have been reviewed since the fatal accident at Carnmoney, County Londonderry on 2 June. [3027]

Mr. Woodward: Firstly I would like to take this further opportunity to express my deepest sympathy to the family of Mr. Stevenson, who so tragically lost his life in the accident at Carmoney.

Following the events of 2 June, an independent inquiry by the Health and Safety Executive (NI) is under way. Water Service is liaising closely with them as their investigation proceeds and will, of course, take immediate action to implement any actions, should they be recommended as a result of this investigation.

In the meantime, Water Service has completed a precautionary inspection at all other 18 similar installations across Northern Ireland, which are essential for the maintenance of drinking water quality and is satisfied that the health and safety procedures are robust. I am assured that it is safe for the installations to continue operating.

Working Time Directive

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland what action has been taken to penalise health service bodies who remain non-compliant with the European Working Time Directive, as applied in Northern Ireland. [1404]

Mr. Woodward: Health and Personal Social Services employers would be liable under Health and Safety Legislation if they breach the European Working Time Directive requirements. This liability may take the form of financial penalties. The Department has been working with Health and Personal Social Services employers to ensure that they do all they can to avoid being subject to penalties.

Written Answers to Questions

Tuesday 21 June 2005

LEADER OF THE HOUSE

Grand Committees

Mr. Peter Robinson: To ask the Leader of the House how many times the *(a)* Scottish and *(b)* Welsh Grand Committees have met outside the Houses of Parliament in each of the last four years. [6130]

Mr. Hoon: Neither the Scottish Grand Committee nor the Welsh Grand Committee met outside the Houses of Parliament in any of the past four sessions. The Welsh Grand Committee met in Wales in March 2001.

Mr. Peter Robinson: To ask the Leader of the House for what reason the Northern Ireland Grand Committee has not met outside Westminster. [6131]

Mr. Hoon: There has never been cross-party agreement for the Northern Ireland Grand Committee to meet outside Westminster. Were agreement reached, the Government would be ready to consider facilitating one.

PRIME MINISTER

EU Presidency

Keith Vaz: To ask the Prime Minister which areas of reform will be given priority during the UK Presidency of the EU. [3951]

The Prime Minister: Like any EU presidency, the UK Government will take forward the work begun by its predecessors. This includes work on economic reform issues such as the better regulation agenda, the Services directive, and, EU/US economic co-operation. But this Government believes that the recent referenda in France and the Netherlands require a wider debate within the EU about how Europe can meet the challenges of globalisation.

On the external agenda, we shall take forward new commitments to: Africa; promote development and eradicate poverty worldwide; tackle climate change; and, aim to advance trade liberalisation and development through the WTO trade talks in December. We shall also take forward the EU's enlargement agenda.

Iraq

Mike Penning: To ask the Prime Minister what assessment he has made of the level of looting of Iraqi heritage sites; and if he will raise the issue of the protection of these sites with *(a)* the Italian Prime Minister, *(b)* EU leaders and *(c)* G8 leaders when they next meet. [5316]

The Prime Minister: The Government takes very seriously the need to respect Iraq's cultural heritage. As United Nations Security Council resolution 1546 (June 2004) stressed, all parties need to respect and protect Iraq's archaeological, historical, cultural, and religious heritage. Our EU and G8 partners are aware of these requirements.

Race Relations

Keith Vaz: To ask the Prime Minister what arrangements are in place to ensure that bodies or organisations within the responsibility of his Office comply with the requirements of the Race Relations (Amendment) Act 2000. [3562]

The Prime Minister: For these purposes my office forms part of the Cabinet Office. I refer my hon. Friend to the answer given to him by my right hon. Friend the Chancellor of the Duchy of Lancaster (Mr. Hutton) today, at column 925W.

HOUSE OF COMMONS COMMISSION

Cleaning Contract

Mr. Winnick: To ask the hon. Member for Middlesbrough, representing the House of Commons Commission what the annual value of the contract for cleaning the House has been in each year since the last contract was signed; and if he will make a statement. [6127]

Nick Harvey: I have been asked to reply.

The main cleaning contract for both Houses of Parliament is worth about £2.2 million per annum of which 60 per cent. (£1.32 million) falls to the House of Commons. The contract commenced in September 2003, and runs for five years.

Mr. Winnick: To ask the hon. Member for Middlesbrough, representing the House of Commons Commission what is the average hourly wage paid to cleaners in the House. [6128]

Nick Harvey: I have been asked to reply.

The in-house cleaning staff who clean sensitive areas are paid an average of £6.81 per hour. I understand that the main contract cleaners who clean common areas are paid a basic rate of £5.00 per hour.

Mr. Winnick: To ask the hon. Member for Middlesbrough, representing the House of Commons Commission if he will make a statement on discussions between the House authorities and its cleaning contractors concerning the pay of cleaners in the House. [6129]

Nick Harvey: I have been asked to reply.

The House authorities have been working with the management of MITIE, the cleaning contractor, to identify economies in the cleaning contract that could help to fund an increase in pay for the cleaners. Both parties have identified some such economies.

SOLICITOR-GENERAL

Domestic Violence

Mr. Malins: To ask the Solicitor-General what Government policy is on prosecutions for domestic violence; and what guidelines have been issued to prosecutors on the subject. [5287]

The Solicitor-General: Stopping domestic violence and bringing perpetrators to justice is a priority for the CPS. In February 2005, it published its updated policy for prosecuting cases of domestic violence. The policy document explains the role of the Crown Prosecution Service and how prosecution decisions are made, and gives information on aspects of the legal process. It is available on the CPS website.

At the same time as the policy was published, the CPS issued revised detailed guidance to its prosecutors. The guidance reflects increased emphasis on the safety of victims and children, concentrates on effective evidence gathering to build strong cases and advises on proceeding where a victim is unwilling to give evidence.

Jury Trial (Fraud Cases)

Mr. Grieve: To ask the Solicitor-General on what basis and for what reasons the responsibility for the use of juries in long and complex trials has been transferred to the Law Officers. [6074]

The Solicitor-General: It has not. The use of juries in long and complex fraud trials is the responsibility of all three Criminal Justice System Ministers, who are being advised by the tri-lateral Office for Criminal Justice Reform.

DEPUTY PRIME MINISTER

BMG Consulting

Mr. Swayne: To ask the Deputy Prime Minister how many questionnaires have been issued by BMG Consulting on behalf of his Department; and what the cost has been of this exercise. [5152]

Jim Fitzpatrick: BMG have sent 8,000 questionnaires to individuals across England as part of a national survey of public satisfaction with local government and its services that they are undertaking for the Office of the Deputy Prime Minister (ODPM).

BMG will be paid £36,000 plus VAT by ODPM for the national survey of public-satisfaction with local government and its services. This survey is currently in the field.

Brownfield Land

Mrs. Spelman: To ask the Deputy Prime Minister what the Government's definition is of brownfield land. [5588]

Yvette Cooper: Annex C of Planning Policy Guidance Note 3 Housing sets out the Government's definition of previously developed land (sometimes referred to as 'brownfield land') for the purposes for planning for housing and the collection of data on previously developed land for the National Land Use Database.

Council Tax

Mrs. Spelman: To ask the Deputy Prime Minister how many homes in England were in each council tax band in each year since the introduction of council tax. [5575]

Mr. Woolas: The number of homes in England in each council tax band in each year since 1993, when council tax was introduced, are shown in the following table.

	Bandings				
	A	*B*	*C*	*D*	*E*

Affordable Housing

Lynne Featherstone: To ask the Deputy Prime Minister how many people in *(a)* the London borough of Haringey and *(b)* Hornsey and Wood Green constituency he estimates will be eligible for his Department's extended home ownership programme; and if he will make a statement. [4803]

Yvette Cooper: The Office of the Deputy Prime Minister is currently consulting on the details of our proposals for making our low cost home ownership schemes simpler and fairer, as set out in the consultation document 'HomeBuy—Expanding the Opportunity to Own' (a copy of which is available in the Library of the House).

We will make our decisions in the light of responses to consultation and the recommendations from the Regional Housing Boards. Locations will also reflect the quality and value for money of bids received under the programme.

Fire Officers (Attacks)

Mr. Evans: To ask the Deputy Prime Minister how many firemen have been hospitalised following assaults whilst on active duty in each of the last five years. [4886]

Jim Fitzpatrick: Attacks on firefighters have only been recorded since 1 April 2004. Since 1 April 2004 a total of six firefighters have been hospitalised due to an assault.

High Hedges

Mr. Fallon: To ask the Deputy Prime Minister if he will set a maximum level of fees to be levied by local authorities in respect of charges for applications under the high hedges provisions of the Anti-Social Behaviour Act 2003. [4933]

Yvette Cooper: I refer the hon. Member to the written ministerial statement made by my hon. Friend the Parliamentary Under-Secretary of State at the Office of the Deputy Prime Minister on 23 March 2005, *Official Report*, column 70WS.

Home Information Packs

Robert Key: To ask the Deputy Prime Minister on what date he expects to implement those parts of the Housing Act 2004 relating to home information packs; and if he will make a statement. [4856]

Yvette Cooper: The Office of the Deputy Prime Minister (ODPM) intends to introduce home information packs throughout England and Wales as early as possible in 2007 and we are discussing with key stakeholders how this might best be achieved. The regulations required for the introduction of home information packs will be made at different times during 2005 and 2006, commencing with those prescribing the contents of the packs in September 2005. Details of the proposed contents have been published on the ODPM website at www.odpm.gov.uk

Home Inspectors (Diploma)

Robert Key: To ask the Deputy Prime Minister how many diploma courses for home inspectors are in operation; and how many people are training on them. [4855]

Yvette Cooper: The Awarding Body for the Built Environment (ABBE) has developed a Diploma in Home Inspection in consultation with the industry. The ABBE Diploma has been approved by the Qualifications and Curriculum Authority and comprises of a vocationally related qualification rather than a course. Over 1,000 such candidates are registered with assessment centres for the Diploma. ABBE has approved four assessment centres and a further three centres are currently seeking approval.

House Prices

Mrs. Spelman: To ask the Deputy Prime Minister what the average house price was in each Government office region in *(a)* 1991, *(b)* 2003 and *(c)* the latest year for which figures are available. [5564]

Yvette Cooper: Data are not available for Government office regions on a consistent basis before 1993, and later for the north-west Government office region.

Mix-adjusted house price by Government office region

£

Government office region	*1993*	*2004*
North-east	51,569	121,260
North-west	n/a	133,647
Yorkshire and the Humber	55,325	131,279
East midlands	54,540	151,339
West midlands	60,032	154,758
East	67,463	197,187
London	83,109	257,266
South-east	77,798	227,726
South-west	61,714	191,426

Source:
Survey of Mortgage Lenders

Mix-adjusted average house prices from 1993 for Government office regions are published as Live Table 507 on the ODPM website at:

http://www.odpm.gov.uk/stellent/groups/odpm_housing/documents/page/odpm_house_604092.xls.

Prior to 1993, simple average house price data are available for Standard Statistical Regions and are published as Live Table 512 on the ODPM website at:

http://www.odpm.gov.uk/stellent/groups/odpm_housing/documents/page/odpm_house_604071.xls.

Local Authority Staff

Sarah Teather: To ask the Deputy Prime Minister how many *(a)* full-time and *(b)* part-time staff were employed by each local authority per 1,000 population in the last year for which figures are available. [5258]

Jim Fitzpatrick: This information is not held centrally and could only be provided at disproportionate cost.

Park and Ride Schemes

Mrs. Spelman: To ask the Deputy Prime Minister (1) what the location is of each park and ride scheme in operation in England; and on what date the construction of each was approved by the relevant government office for the region; [5583]

(2) what the location is of each proposed park and ride scheme that has been given approval by the relevant government office for the region. [5584]

Yvette Cooper: The Government do not collect information on the number or location of existing or proposed park and ride schemes. Government offices for the regions do not approve park and ride schemes. Their planning role is to act on behalf of my right hon. Friend the Deputy Prime Minister, on land use planning matters in the region.

Mrs. Spelman: To ask the Deputy Prime Minister what guidance the Government have issued to *(a)* local authorities and *(b)* government offices for the regions on park and ride schemes. [5585]

Yvette Cooper: The Government have issued planning policy guidance note (PPG) 13 Transport which gives national planning guidance on park and

ride. The Government have not issued separate guidance to either local authorities or government offices for the regions.

Planning (Polytunnels)

Mr. Keetch: To ask the Deputy Prime Minister what plans he has to change planning requirements for polytunnels; and if he will make a statement. [5668]

Yvette Cooper *[holding answer 20 June 2005]*: Where polytunnels are placed temporarily on agricultural land and used for horticulture, they may be deemed to be a use of land for agriculture and therefore exempt from planning controls under the provisions of section 55 of the Town and Country Planning Act 1990. Where the erection of polytunnels for agricultural purposes is deemed to constitute 'development' under these provisions, 'permitted development rights' under part six of the General Permitted Development Order (GPDO) 1995 may be available, subject to criteria set out in the Order. The Government currently have no proposals to change these statutory provisions.

Public Conveniences

Mrs. Spelman: To ask the Deputy Prime Minister whether public conveniences run by local authorities are liable for business rates; and if he will make a statement. [5579]

Mr. Woolas: Non-domestic rates are payable on non-domestic property, including public conveniences. The rateable value of each non-domestic property represents its annual rental value at the set date of 1 April 2003.

John Hemming: To ask the Deputy Prime Minister how many public toilets were available in each *(a)* unitary and *(b)* district council area on 1 January (i) 2000, (ii) 2002, (iii) 2003 and (iv) 2004. [4829]

Mr. Woolas: I refer the hon. Member to the answer I gave on 6 June 2005, *Official Report*, columns 562–63W. I have deposited in the Library of the House a table that has been obtained from Office of the Deputy Prime Minister's analyses of commercial and industrial property data held by the Valuation Office Agency.

The table gives the number of public conveniences as at 1 October 2000 and 1 April for 2002, 2003 and 2004. No data prior to 2000 and for 2001 are currently available.

Referendums

Mrs. Spelman: To ask the Deputy Prime Minister which Department is responsible for *(a)* mayoral referendums and *(b)* local referendums held under the Local Government Act 2003. [5572]

Mr. Woolas: The Department for Constitutional Affairs is responsible for policy on the conduct of mayoral and local referendums. Policy and legislation about when such referendums can be held and for what purpose are the responsibility of the Office of the Deputy Prime Minister.

Social Housing Grant

Daniel Kawczynski: To ask the Deputy Prime Minister (1) what representations he received before the abolition of the Local Authority Social Housing Grant; and from whom; [2560]

(2) what representations he received, and from whom, on extending the transitional arrangements put in place to oversee the abolition of the Local Authority Social Housing Grant. [2562]

Yvette Cooper: A summary of responses to the consultation 'The Way Forward for Housing Capital Finance' was placed in the Libraries of both Houses on 19 May 2004. The summary includes, among other things, details of consultees who responded to the suggestion about the future of Local Authority Social Housing Grant (LASHG) in that paper. In addition, representations were received prior to the abolition of LASHG from the right hon. and hon. Members for:

Barking

Surplus Land

Tim Loughton: To ask the Deputy Prime Minister what progress has been made with the sale and development of the surplus land on the Southlands hospital site in Shoreham, West Sussex. [4629]

Yvette Cooper: Following the announcement by my right hon. Friends the Deputy Prime Minister and the Secretary of State for Health last year, the first tranche of 67 surplus hospital sites transferred from Department of Health to English Partnerships on 6 April 2005. Other surplus sites, including the Southlands hospital site in Shoreham, will transfer to English Partnerships in 2005–06 and 2006–07. The land will be used to help deliver growth and regeneration including the provision of more affordable homes. English Partnerships is now working up future plans for the sites in discussion with local planning authorities.

Tim Loughton: To ask the Deputy Prime Minister which of those surplus NHS sites transferred to his Department *(a)* have been sold for development, *(b)* have secured planning permission for development and *(c)* are to be developed by his Department. [4647]

Yvette Cooper: The first tranche of 67 surplus hospital sites, out of a total portfolio of 96, transferred from the Department of Health to English Partnerships on 6 April 2005. All of the sites will be assessed by English Partnerships for their development potential. Appropriate plans will then be drawn up in consultation with local planning authorities. No sites have yet been sold by English Partnerships for development. A number of sites in the portfolio have existing planning consents. It is likely that all sites will be taken forward by or in partnership with the private sector.

Tim Loughton: To ask the Deputy Prime Minister what percentage of houses to be built on surplus NHS sites transferred to his Department will be affordable homes. [4648]

Yvette Cooper: The first tranche of 67 surplus hospital sites transferred from the Department of Health to English Partnerships on 6 April 2005. Other surplus sites will transfer to English Partnerships. Residential housing development, including the provision for a mix of tenures, will take place where sites are assessed as suitable. Such decisions will be made on a site by site basis taking account of local development plans and local needs. It is estimated that the total portfolio of 96 sites transferring to English Partnerships has the potential to deliver about 15,000 new homes, at least 5,000 of them affordable.

Sustainable Communities Plan

Mrs. Spelman: To ask the Deputy Prime Minister how the Sustainable Communities Plan will amend green belt designation in each of the growth areas. [4283]

Yvette Cooper: Any proposals to change the general extent of green belt boundaries in the growth areas should be considered as part of a review of the regional spatial strategy or the London plan in the first instance, through the statutory development plan process. Government policy set out in the Sustainable Communities Plan is that every region should maintain or increase the area of green belt designated in local plans.

ENVIRONMENT, FOOD AND RURAL AFFAIRS

Air Transport (Emissions)

Mr. Letwin: To ask the Secretary of State for Environment, Food and Rural Affairs what proportion of *(a)* carbon dioxide emissions and *(b)* Kyoto basket emissions are estimated to have come from air transport flights taking off from and landing in UK airports in 2003. [694]

Margaret Beckett *[pursuant to the reply, 26 May 2005, Official Report, c.179W]:* The original answer mixed units of million tonnes carbon equivalent per year (MtCeq/yr) and million tonnes carbon dioxide equivalent per year ($MtCO_2$ eq/yr). This resulted in an incorrect percentage to be calculated for the Kyoto basket emissions. All units are now presented as $MtCO_2$ eq/yr. A revised table is given as follows.

	(a) CO_2	*(b)* GHG
Emissions from domestic aviation million tonnes of carbon equivalent ($MtCO_2$ eq/yr)	2.11	2.14
Total UK emissions inventory ($MtCO_2$ eq/yr)	572.2	665.8
UK domestic aviation as a proportion of total emissions (%)	0.37	0.32

The original answer also contained an error in the units in the final sentence of text. The text referred to MtCeq/yr, this should have been presented as $MtCO_2$ eq/yr. The rest of the answer remains correct.

Bovine TB

Miss McIntosh: To ask the Secretary of State for Environment, Food and Rural Affairs what steps she is taking to ensure that badgers killed in road accidents in North Yorkshire are tested to see whether they are free of tuberculosis. [4868]

Mr. Bradshaw: The Road Traffic Accident (RTA) survey is limited to seven counties in England (Cornwall, Devon, Gloucestershire, Herefordshire, Worcestershire, Shropshire and Dorset). We are awaiting the results of the validation of the survey before taking any decisions about extending the survey area further. There are also logistical and budgetary problems in extending the RTA survey.

Miss McIntosh: To ask the Secretary of State for Environment, Food and Rural Affairs what steps she is taking to allow *(a)* land owners and *(b)* land occupiers to test badger setts humanely to ensure they are tuberculosis free. [4870]

Mr. Bradshaw: There is currently no reliable diagnostic test for TB in live badgers. We are funding research into the development of a number of alternative immunological assays for the detection of *M. bovis* infection in badgers at the Veterinary Laboratories Agency. Further evaluation is being undertaken and results should be available by the end of 2005.

Post-mortem inspection and laboratory culture of *M. bovis* remains the most sensitive method of diagnosis.

Miss McIntosh: To ask the Secretary of State for Environment, Food and Rural Affairs what steps she is taking to ensure that areas, with particular reference to North Yorkshire, remain tuberculosis free in their cattle population. [4871]

Mr. Bradshaw: We announced new measures last November to tighten surveillance and reduce risk of TB spreading to new areas. These include changes to testing frequency and the imposition of movement restrictions immediately a test becomes overdue from February 2005.

The "Government Strategic Framework for the Sustainable Control of Bovine Tuberculosis in Great Britain" was published on 1 March. Specific disease control policies will be tailored to reflect the regional variation in disease and risk, and adjusted to make best use of emerging scientific findings.

In addition, we are also considering a proposal for pre-movement testing in Great Britain, developed by a farmer-chaired stakeholder group. The group delivered its report on 29 April, and published on DEFRA website on 1 June. The group's recommendations will be carefully considered.

Great Britain's pre-movement testing policy would need agreement from the Scottish Executive and Welsh Assembly. We aim to consult later this year on the detailed proposal.

Apiculture

Lynne Featherstone: To ask the Secretary of State for Environment, Food and Rural Affairs what assessment has been made of the impact of the small hive beetle on the UK's bee population; and if she will make a statement. [4806]

Jim Knight: The small hive beetle is a notifiable pest of bees. It is indigenous to Africa and widespread in the USA. EU import controls have been extended to reduce the risk of its introduction. The beetle has not yet been reported within the Community beyond a single finding in a consignment of bees imported into Portugal last October.

The National Bee Unit's assessment of this pest is that if it became established it could have a serious impact on the sustainability and economic prosperity of UK and European apiculture. Accordingly, the unit has been providing advice to beekeepers to raise awareness, and has increased its surveillance programme to monitor for its presence. We are also developing contingency measures to deal with any future finding of the pest in England.

Lynne Featherstone: To ask the Secretary of State for Environment, Food and Rural Affairs what recent representations she has received on the National Bee Unit health programme; and if she will make a statement. [4807]

Jim Knight: The Department has received many written representations from beekeepers in recent months about our proposals to reduce expenditure with the National Bee Unit from 2008. Defra officials are maintaining a regular dialogue with representatives of the national beekeeping associations in England and have met them on three occasions so far this year to discuss their concerns and the possible impact of our proposals on future bee disease prevention and control.

Climate Change (Insect Population)

Norman Baker: To ask the Secretary of State for Environment, Food and Rural Affairs if she will estimate the insect population in England; and what the predicted numbers are in the event of a (i) one per cent., (ii) two per cent. and (iii) three per cent. increase in current average temperatures due to climate change. [4447]

Mr. Morley: I am not aware of an estimate of the insect population in England.

Scenarios of climate change published by the UK Climate Impacts Programme indicate that in future, the UK is likely to experience warmer, wetter winters, and hotter, probably drier, summers, with extreme high temperatures and rainfall events likely to occur more often. A collaborative research project led by English Nature ("Modelling Natural Resource Responses to Climate Change"—Monarch) used these climate change scenarios to investigate impacts on the UK's flora and fauna.

While there is no assessment of total numbers, the project notes that as the climate warms, those insect species suited to warmer conditions will spread north. Those species suited to cooler conditions may become extinct in Britain. It is unlikely that insects will become more abundant overall under possible climate change scenarios. Some species may increase in number, while others will decline, according to their temperature and humidity preferences and changes in their habitats.

Non-climate factors (such as changes in land-use, and in the populations of insect predators) will also have a significant influence on insect populations in future.

Animal Diseases

Mr. Drew: To ask the Secretary of State for Environment, Food and Rural Affairs if she will set up a national surveillance agency to give early warning of suspected animal diseases and to monitor the spread of those diseases using satellite intelligence. [5042]

Mr. Bradshaw: The Government recognise the importance of disease surveillance to allow early identification of new and emerging diseases. To this effect a strategy for enhancing veterinary surveillance in the UK was launched by the Department in October 2003 and is being implemented in partnership with a wide range of interested parties.

Surveillance work is currently carried out on a national basis by two Defra agencies, the Veterinary Laboratories Agency and the State Veterinary Service, with additional surveillance widely commissioned elsewhere according to need. The Department also collects and monitors worldwide information on animal disease. Disease surveillance reports are published at regular intervals in the Veterinary Record . Given this existing activity, it is not planned to set up a further agency.

The Government are funding the development of a unique surveillance information management system, RADAR (rapid analysis and detection of animal-related risks). RADAR incorporates the use of geographical information systems which are capable of analysing data captured by a variety of sources, including satellites. Comprehensive information about surveillance activities and RADAR is available at http://defraweb/animalh/diseases/vetsurveillance/index.htm.

Nuclear Waste

Harry Cohen: To ask the Secretary of State for Environment, Food and Rural Affairs if she will list the sites where nuclear waste is kept. [4880]

Mr. Morley: The following is a list of sites that currently store varying quantities of radioactive waste:

Aldermaston
Amersham
Berkeley
Bradwell
Capenhurst
Cardiff
Chapelcross
Clyde
Culham
Devonport
Donnington
Dounreay
Drigg
Dungeness
Eskmeals
Fort Halstead
Heysham
Hinkley Point
Hartlepool
Harwell
Hunterston
Oldbury
Portsmouth
Rosyth
Sellafield/Calder Hall
Sizewell
Springfields
Stafford
Torness
Trawsfynydd
Vulcan
Windscale
Winfrith
Wylfa

Harry Cohen: To ask the Secretary of State for Environment, Food and Rural Affairs if she will make a statement on the Government's plan for the long-term storage of nuclear waste. [4881]

Mr. Morley: The UK Government and devolved administrations set up the independent Committee on Radioactive Waste Management (CoRWM) in 2003, under the "Managing Radioactive Waste Safely" programme. Its task is to provide a recommendation on the option, or combination of options, for the long-term management of the UK's higher level radioactive waste.

CoRWM launched the second phase of its Public and Stakeholder Engagement consultation programme in April 2005. The committee have evaluated 15 options and is now consulting on its proposal to carry out further assessments on a shortlist of four:

Deep geological disposal
Phased deep geological disposal
Near-surface disposal of short-lived waste
Long-term interim storage

CoRWM will finalise its shortlist of options for assessment, in light of its consultations, by July 2005. It is due to provide its recommendations to Ministers, for their consideration, in July 2006.

Patio Heaters

Norman Baker: To ask the Secretary of State for Environment, Food and Rural Affairs if she will estimate the *(a)* carbon dioxide and *(b)* greenhouse gas emissions created by outdoor patio heaters in (i) the most recent year for which information is available and (ii) each of the next five years. [4450]

Mr. Morley: Only very limited information is currently available about the number of outdoor patio heaters in use in the UK.

Using this information the Government's Market Transformation Programme (MTP) has made a preliminary estimate of the number of these appliances in use in the UK—estimating that there are 630,000 in use in the domestic sector and between 26,000 and 105,000 in the hospitality sector (pubs, restaurants and hotels).

Making reasonable assumptions about fuel, power rating, and level of usage, MTP estimates annual energy consumption to be approximately 670 GWh in the domestic sector and between 280 and 1100 GWh in the hospitality sector. The corresponding annual carbon dioxide emissions are 140,000 tonnes of carbon dioxide in the domestic sector and between 60,000 and 240,000 tonnes of carbon dioxide in the in the hospitality sector.

No information is available about projected carbon dioxide emission from outdoor patio heaters over the next five years.

No information on other greenhouse gas emissions from outdoor patio heaters is available.

Primates

Mr. Hancock: To ask the Secretary of State for Environment, Food and Rural Affairs how many primates have been imported for the purpose of *(a)* laboratory experimentation and *(b)* sale as pets in each of the last five years. [5227]

Jim Knight: Under the provisions of the Convention on International Trade in Endangered Species (CITES), the international movement of certain species (including all primates) is regulated by the issue of export and or import permits. The permits specify the purpose for which the animals are being moved.

The number of primates for which import permits were issued for biomedical research or scientific purposes are detailed in the following table.

	Number
2000	1,752
2001	2,012
2002	2,226
2003	1,861
2004	1,970

No permits were issued to import primates for sale as pets.

Mr. Hancock: To ask the Secretary of State for Environment, Food and Rural Affairs if she will make it her policy to ban the *(a)* importation and *(b)* sale of primates for commercial purposes. [5229]

Jim Knight: It is our view that primates are not suitable for the general pet trade and imports are therefore already limited to zoos, scientific institutions, or specialised private keepers. Commercial trade in the more endangered primate species is also prohibited.

Earlier this month I announced the Government's intention to go out to public consultation regarding the use of powers under Article 8.2 of Council Regulation 338/97 by the end of July. This is essentially a conservation measure but we shall certainly consider whether it would be appropriate to use these powers to restrict the keeping of primates as pets.

Veterinary Medicines

Mr. Letwin: To ask the Secretary of State for Environment, Food and Rural Affairs what representations she has received about the new dispensing regulation proposed by the Veterinary Medicines Directorate. [3112]

Margaret Beckett: The Veterinary Medicines Directorate (VMD) is developing new Regulations setting out controls on all aspects of veterinary medicines. These will take forward relevant recommendations made in the Marsh and Competition Commission reports on the dispensing of veterinary prescription only medicines (POMs) in the UK, implement an amending EU Directive and replace the existing voluminous and outdated UK legislation on veterinary medicines with a single set of Regulations.

The new Regulations contain a number of provisions that relate to the supply and dispensing of veterinary medicines, including proposed new distribution categories. We have received correspondence about issues relating to some of these and other provisions from a number of individuals including veterinary surgeons and animal owners/keepers.

During the initial stages of developing the proposals, officials at the VMD consulted informally with a wide range of interest groups. Following further development, a formal consultation package was published on the VMD website on 4 January 2005 and a letter sent to some 350 interested organisations and individuals. Consultees were allowed four months, until 5 May, to comment. Over 300 responses have been received and the comments are currently being considered and will be taken into account in finalising the draft Regulations. The VMD has kept interested parties informed of developments on key issues by publishing a series of reaction notes and has arranged public meetings on 21 and 22 June to discuss the outcome of the formal consultation. The consultation package remains available on the VMD website www.vmd.gov.uk under "Consultations" "Previous".

HOME DEPARTMENT

Magistracy

Mr. Malins: To ask the Secretary of State for the Home Department what percentage of cases set down for committal by magistrates in the Greater London area has not been ready for committal on the due date. [2701]

Ms Harman: I have been asked to reply.

Information on the effectiveness of committal hearings in the magistrates courts is not held centrally and could be produced only at disproportion cost. However, figures provided by the Crown Prosecution Service suggest that 1,133 committals were discharged during the period but comprehensive reasons for these are not recorded.

Public Order Act

John Hemming: To ask the Secretary of State for the Home Department how many prosecutions have occurred under sections *(a)* 18, *(b)* 19, *(c)* 20, *(d)* 21 and *(e)* 23 of the Public Order Act 1986 in each year since 2000; and how many convictions resulted, broken down by subsection under which each occurred. [4987]

The Solicitor-General: I have been asked to reply.

The following table show the number of defendants prosecuted for an offence or offences contrary to sections 18–21 and 23 of the Public Order Act 1986 for the period 2000–04. The relevant statistics are recorded by reference to the year in which cases were referred to the Crown Prosecution Service by the police. There is no table provided for 2005 as no prosecutions have resulted, to date, from cases referred to the CPS by the police in 2005. It is not possible to specify the subsections concerned in each case as this information is not held centrally.

Section	*Defendants convicted*	*Defendants prosecuted*
2000		
18	0	0
19	4	2
20	0	0
21	0	0
23	2	1
Both 19 and 23	2	1 to date (other case ongoing)
2001		
18	0	0
19	1	0
20	0	0
21	0	0
23	0	0
Both 19 and 23	1	1 (only convicted of s 23)
2002		
18	0	0
19	0	0
20	0	0
21	0	0
23	0	0
19, 21 and 23	1	1
2003

19	5	All 5 ongoing
20	0	0
21	0	0
23	0	0
Both 18 and 23	1	Ongoing
Both 19 and 23	1	Ongoing
19, 21 and 23	1	Ongoing
2004		
18	3	All 3 ongoing
19	2	Both ongoing
20	0	0
21	0	0
23	0	0

Student Visas

Ben Chapman: To ask the Secretary of State for the Home Department what assessment he has made of the likely impact of the new charge for renewal of visas on the number of overseas students attending university in the UK. [4814]

Mr. McNulty: In September 2004 my right hon. Friend the former Minister of State for Immigration and Nationality (Des Browne) commissioned a joint project team to undertake an assessment of the likely impact of increased leave to remain fees to attract more international students to the UK. The team comprised representatives from the Department for Education and Skills, the Home Office and the British Council. The outcomes of this work are available, alongside a Regulatory Impact Assessment for the education sector on the Home Office website. Des Browne's statement of 7 February commissioned a new Joint Education Task Force, including representatives from the education sector and other key stakeholders, to further develop this work.

CULTURE, MEDIA AND SPORT

Libraries

Sarah Teather: To ask the Secretary of State for Culture, Media and Sport how many local authority-run libraries there have been in each London borough since 1997. [6416]

Mr. Lammy: The table shows the aggregated number of public libraries, including mobile libraries, across inner and outer London for the period 1997–98 to 2003–04. This information is drawn from the Chartered Institute of Public Finance and Accountancy (CIPFA) Public Library Statistics Actuals. The CIPFA statistics show figures for individual library authorities. Copies are held in the House Library.

	Number of London libraries
1997–98	406
1998–99	495
1999–2000	402
2000–01	397
2001–02	397

	Number of London libraries
2002–03	392
2003–04	395

Note:
The table includes the libraries in the London borough of Hounslow which are run for the authority by a not for profit trust.

Licensing Act

Mr. Amess: To ask the Secretary of State for Culture, Media and Sport if she will make a statement on the outcomes of the first High Level Ministers/Senior Official Group on the implementation of the Licensing Act 2003. [5925]

James Purnell: The High Level Ministers/Senior Officials Group is one of the mechanisms put in place to monitor and evaluate implementation of the Licensing Act 2003. The minutes of the first meeting of 22 March are included on my Department's website at www.culture.gov.uk, under alcohol and entertainment. The key outcomes of that meeting were agreements on:

The terms of reference, to be reviewed in early 2006;

The conduct of future meetings, including the regularity of meetings, and the need for a basic position report to be tabled for each meeting during transition;

Various specific issues arising from the implementation of the 2003 Act.

Two other meetings have since been held—on 4 and 23 May. The minutes to the second meeting are now available on our web site as will be the minutes to subsequent meetings.

Memorial to Women

Mr. Swire: To ask the Secretary of State for Culture, Media and Sport what discussions she has had regarding the siting of the memorial to the women of the second world war in Whitehall. [6038]

Mr. Lammy: Discussions were held with the patrons and trustees of the Memorial to the Women of World War II Fund and their technical advisers, the Royal Household, the Cabinet Office, the Ministry of Defence, the Office of Government Commerce, the Office of the Deputy Prime Minister, the City of Westminster, and the National Heritage Memorial Fund.

National Lottery

Mr. Amess: To ask the Secretary of State for Culture, Media and Sport whether it is her policy that the heritage sector will continue to benefit from the National Lottery after 2009. [5924]

Mr. Lammy: The heritage good cause will continue. A decision on the shares for arts, heritage and sport good causes after 2009 will be made in June 2006, following public consultation on what is worth funding within these good causes.

Ofcom

Mr. Laurence Robertson: To ask the Secretary of State for Culture, Media and Sport (1) what guidelines Ofcom work to when deciding whether to investigate complaints made against television programmes; and if she will make a statement; [6176]

(2) how many complaints were received by Ofcom concerning the programme, "Jerry Springer The Opera"; what investigations took place into the programme; and if she will make a statement. [6177]

James Purnell: The matters raised are the responsibility of the Office of Communications (Ofcom) as independent regulator. Accordingly, my officials have asked the Chief Executive of Ofcom to respond directly to the hon. Member. Copies of the Chief Executive's letter will be placed in the Libraries of both Houses.

Queen Mother Memorial

Mr. Swire: To ask the Secretary of State for Culture, Media and Sport what discussions she has had with *(a)* other Government Departments, *(b)* heritage organisations and *(c)* the London Assembly about the proposed memorial to the late Queen Mother. [6055]

Mr. Lammy: Discussions have been held with HM Treasury, The Royal Household and The Royal Parks about the proposed memorial.

Television Licence

Sarah Teather: To ask the Secretary of State for Culture, Media and Sport how many TV licence inspectors there were in London in each year since 1997. [5260]

James Purnell: The BBC has statutory responsibility for the administration of the television licensing system and TV Licensing carries out the day to day administration under contract to the Corporation. I have therefore asked the BBC's Head of Revenue Management to consider the question raised by the hon. Member and to write to her direct, placing a copy of the reply in the Libraries of both Houses.

Trooping the Colour

Andrew Rosindell: To ask the Secretary of State for Culture, Media and Sport how much funding the Government have allocated for Trooping the Colour in each year since 1996. [5409]

Mr. Lammy: The Queen's Birthday Parade (Trooping the Colour) is part of the core activities of the Ministry of Defence, and no extra funding is allocated. The only expenditure the Government allocate for Trooping the Colour is for flag flying and preparing and sanding all roads and gun salute areas and preparing the parade ground and clearing up after the event. The Department for Culture, Media and Sport is responsible for flying the Union flags down the Mall and the Commonwealth flags along Horseguards Road; the Royal Parks are responsible for preparing the Royal Parks for the event. The following table shows the total amount of funding allocated by the Government from 1996.

Financial year	Amount of Government funding (£)
1996–97	[1]7,483
1997–98	[1]11,361
1998–99	83,094
1999–2000	88,968
2000–01	87,023
2001–02	117,446

Financial year	Amount of Government funding (£)
2002–03	144,033
2003–04	139,555
2004–05	[2]77,214
2005–06	[3]105,148

[1] As other figures are unavailable
[2] Provisional
[3] Proposed expenditure

Village Hall Committees

Mr. Peter Ainsworth: To ask the Secretary of State for Culture, Media and Sport what evidence she has collated of village hall committees carrying on a business without an appropriate licence. [5908]

James Purnell *[holding answer 20 June 2005]:* Evidence of this sort is not collated centrally. It is for the appropriate enforcement authorities, such as the police and licensing authorities, to consider matters of this sort.

DEFENCE

Armoured Vehicles

Ann Winterton: To ask the Secretary of State for Defence whether the assessment phase of the Future Rapid Effects System undertaken by Atkins will have to comply with the objectives and criteria of the European Defence Agency. [5379]

Mr. Ingram: The FRES Assessment Phase is not required to comply with any European Defence Agency (EDA) objectives or criteria. However, the United Kingdom supports the EDA in its work to ascertain the potential for co-operation/collaboration in the future procurement of Armoured Fighting Vehicles. The FRES Assessment Phase will take account of information from a number of sources, one of which will be the EDA, albeit the work of the EDA is still at an early stage.

Executive Agency Costs

Mr. Hancock: To ask the Secretary of State for Defence what the forecasted estimated annual running costs were of the *(a)* Medical Supplies Agency and *(b)* Warship Supply Agency if it had operated as a stand-alone agency. [3960]

Mr. Ingram: The estimated annual running costs for the Medical Supplies Agency (not including Stock Consumption of £40.5 million) for financial year 2004–05 are £28.5million. This is extracted from MSA Annual Accounts, which are in the process of being audited by the National Audit Office and therefore, may be subject to change.

Had the MSA continued operating as an Agency the estimated running costs (again not including Stock Consumption) for FY 2005–06 are £21.5 million.

The Warship Support Agency's net operating costs for 2004–05 were some £2,664 million. This is also taken from the Agency's Annual Accounts, which are being audited by the National Audit Office and therefore may be subject to change.

Had the WSA continued operating as an Agency the estimated running costs for FY 2005–06 are £2,623 million.

Fylingdales

Mr. Drew: To ask the Secretary of State for Defence what provision is made in the contract between his Department and the US authorities for the continuing use of Fylingdales. [6135]

Mr. Ingram: The operation and maintenance of RAF Fylingdales is governed by an Exchange of Notes, under which the US provides the specialist equipment there while the UK operates and maintains the Station. The data produced by the radar at RAF Fylingdales are shared between the UK and the US under the terms of a UK-US Combined Operating Agreement.

Military Afloat Reach and Sustainability Programme

Mr. Keetch: To ask the Secretary of State for Defence what the *(a)* class and role, *(b)* date of entry into service, *(c)* expected date of removal from service, *(d)* average annual cost of maintenance over the period of service and *(e)* cost of building is of each ship proposed by the Military Afloat Reach and Sustainability programme; and if he will make a statement. [6170]

Mr. Ingram: The Military Afloat Reach and Sustainability (MARS) programme is currently in the Concept Phase and no decisions have yet been made on the class and role, timing or costs of the programme. These matters will be addressed during the Assessment Phase, which is planned to commence shortly.

Potton Island

Harry Cohen: To ask the Secretary of State for Defence what the former defence base at Potton Island, near Southend, is used for; whether consideration has been given to its release for a non-military purpose; what assessment has been made of impediments to a non-military use arising from his Department's use of the land; and if he will make a statement. [5007]

Mr. Touhig: Potton Island continues to be part of the group of islands that make up the Test and Evaluation Ranges at Shoeburyness and is used as part of the safety zone for the testing that takes place at the Ranges. A significant area of Potton Island is, however, leased for farming. Potton Island has been included in the Land Quality Assessment that is being carried out on the whole of Shoeburyness. Once the information from this assessment is available the future of the site will be reviewed.

Typhoon Aircraft

Mr. Hoyle: To ask the Secretary of State for Defence if he will re-examine the case for operating Typhoon aircraft from the new aircraft carriers. [5761]

Mr. Ingram: As I have previously indicated, we have no current plans for Typhoon to operate from our future aircraft carriers.

TRADE AND INDUSTRY

Support for Exhibitions and Seminars Abroad Scheme

Mr. Arbuthnot: To ask the Secretary of State for Trade and Industry what plans he has for the Support for Exhibitions and Seminars Abroad scheme; and if he will make a statement. [6158]

Ian Pearson: UK Trade and Investment will continue to run a substantial event programme to assist small and medium sized enterprises to enter overseas markets. Assistance will be given to those who stand to benefit most, namely new-to-export companies. The purpose of this support will be to enable such companies to acquire market knowledge and international experience as part of a strategic approach to exporting. The implementation details for the scheme in 2006–07 will be finalised after discussions with stakeholders during the summer.

Mr. Salmond: To ask the Secretary of State for Trade and Industry how many companies based in *(a)* Scotland and *(b)* the rest of the UK have received assistance under the Support for Exhibitions and Seminars Abroad Scheme in each year since 1997; what the average payment was in each case in each year; what assessment he has made of the impact of the scheme on exporters; and if he will make a statement. [1182]

Ian Pearson: Companies receiving grants from the Support for Exhibitions and Seminars Abroad scheme (and its predecessor, the Trade Fair Support Scheme, in 1997–98 and 1998–99):

	Scotland	*Rest of UK*
1997–98	294	4,117
1998–99	353	4,915
1999–2000	325	4,888
2000–01	366	5,414
2001–02	336	5,106
2002–03	396	5,523
2003–04	374	5,214
2004–05	423	5,843

The average grant payment during this period cannot be calculated but the average for 2004–05 is approximately £1,900.

UK Trade and Investment will continue to run a substantial programme to assist small and medium sized enterprises to enter overseas markets through an events-based scheme. Assistance will be given to those who stand to benefit the most, namely new-to-export companies. The purpose of support is to enable such companies to acquire market knowledge and experience as part of a strategic approach to exporting.

Internet Access

Sarah Teather: To ask the Secretary of State for Trade and Industry what the estimated number of people per 1,000 population is that *(a)* own a home computer, *(b)* have access to the internet via normal telephone line and *(c)* have access to the internet via broadband in each London borough. [5148]

Alun Michael: The information is as follows:

(a) In the latest Consumer Durables survey by ONS in 2002–03, 54 per cent. of households owned a home computer. This information is not available at a London borough level.

(b) and *(c)* The following table shows the percentage of households that have a dial-up internet connection or a broadband connection for each of the London boroughs.

London borough	*Percentage of households with a dial-up internet connection*	*Percentage of households with a broadband internet connection*
Barking and Dagenham	31.8	21.1
Barnet	38.0	26.6
Bexley	35.5	23.6
Brent	34.9	26.3
Bromley	37.3	25.3
Camden	39.9	26.5
City of London	43.9	31.8
Croydon	38.2	25.0
Ealing	36.7	27.3
Enfield	35.9	24.1
Greenwich	35.0	23.2
Hackney	36.0	23.8
Hammersmith and Fulham	37.5	29.3
Haringey	38.1	25.3
Harrow	37.0	26.4
Havering	35.8	21.8
Hillingdon	36.8	24.7
Hounslow	38.0	25.3
Islington	38.1	25.3
Kensington and Chelsea	39.8	28.8
Kingston upon Thames	40.1	26.5
Lambeth	37.6	27.4
Lewisham	36.7	25.1
Merton	39.5	26.5
Newham	33.2	22.9
Redbridge	37.0	24.5
Richmond on Thames	42.1	28.3
Southwark	35.7	25.8
Sutton	38.1	25.3
Tower Hamlets	34.0	26.5
Waltham Forest	36.3	24.1
Wandsworth	38.7	30.8
Westminster	40.2	26.8

Source:
Point Topic

Export Control and Non-proliferation Directorate

Mr. Arbuthnot: To ask the Secretary of State for Trade and Industry what estimated cost savings were cited by ASE Consulting in the report which considered privatising the Export Control and Non-proliferation Directorate; and if he will make a statement. [6157]

Malcolm Wicks: The report focused on whether outsourcing as a means of service delivery was compatible with the executive functions of the Export Control Organisation and as such did not set out a detailed business case containing cost savings.

MG Rover

Charles Hendry: To ask the Secretary of State for Trade and Industry which parties other than the MG Rover management team and his Department were informed that MG Rover had entered administration before the Secretary of State declared the insolvency on national television on Thursday 7 April; and if he will make a statement. [5863]

Ian Pearson *[holding answer 20 June 2005]:* Tony Woodley (TGWU) and Derek Simpson (Amicus), were present when my right hon. Friend the Secretary of State was informed of the Directors decision to call in administrators and make a statement. Representatives of No. 10 and HM Treasury were also present.

Charles Hendry: To ask the Secretary of State for Trade and Industry whether any of the conditions applied to the bridging loan offered by the Government to the Shanghai Automotive Industry Corporation in relation to MG Rover were changed by the Government during the week commencing Monday 4 April; and if he will make a statement. [5864]

Ian Pearson *[holding answer 20 June 2005]:* I can confirm the criteria against which the DTI considered the offer of a bridging loan to MG Rover were not changed in the week commencing Monday 4 April.

Charles Hendry: To ask the Secretary of State for Trade and Industry if he will make a statement on the reasons why the Shanghai Automotive Industry Corporation decided not to pursue the deal to secure MG Rover. [5865]

Ian Pearson *[holding answer 20 June 2005]:* That is a question for SAIC. However, as my right hon. Friend the former Secretary of State noted in her statement on 7 April, SAIC made it clear that they were not confident about the future solvency of MG Rover, and that bridging loan finance would not have solved their concerns.

Charles Hendry: To ask the Secretary of State for Trade and Industry what the length of the repayment period was on the £100 million bridging finance offered by the Government in advance of MG Rover entering administration; and whether the length of this repayment period was changed after it was offered. [5866]

Ian Pearson *[holding answer 20 June 2005]:* The terms of the proposed loan required repayment by 31 May 2005. This requirement was not changed. No negotiations on the term of repayment took place as it became clear that the deal was not going ahead.

Lynne Jones: To ask the Secretary of State for Trade and Industry if he will publish the terms of reference for the investigation into the affairs of the MG Rover Group. [5923]

Ian Pearson: The inspectors have been asked to examine issues raised by the Financial Reporting Review Panel in their report to my right hon. Friend the Secretary of State and the events leading up to the appointment of administrators on 8 April 2005.

Pay Phones

Sir Michael Spicer: To ask the Secretary of State for Trade and Industry if he will discuss with British Telecom its proposal to remove the last remaining pay phone in the village of Longdon in Worcestershire. [6077]

Alun Michael: The matter raised is the responsibility of the Office of Communications (Ofcom) as independent regulator. Accordingly, DTI officials have asked the chief executive of Ofcom to respond directly to the hon. Member. Copies of the chief executive's letter will be placed in the Libraries of the House.

Miners' Compensation

John Mann: To ask the Secretary of State for Trade and Industry how much has been paid in costs to Raleys Solicitors since the inception of the vibration white finger and chronic obstructive pulmonary disease compensation scheme. [6120]

Malcolm Wicks: The total costs paid to Raleys solicitors are as follows:

Total solicitors costs paid[1]

	£ million
Chronic obstructive pulmonary disease	38.8
Vibration white finger	7.3

[1] Solicitor's costs include VAT on solicitor's profit costs and disbursements, but exclude generic costs (which are paid to those solicitors involved in the initial litigation and in co-ordinating the claims handling framework).

John Mann: To ask the Secretary of State for Trade and Industry how many cases have received *(a)* interim settlements and *(b)* full and final settlements under the Vendside and Union of Democratic Mineworkers' chronic obstructive pulmonary disease and vibration white finger schemes. [6121]

Malcolm Wicks: The numbers of payments and settlements under the Vendside and Union of Democratic Mineworkers' schemes are as follows:

Policy	*Interim payments*[1]	*Settled by payment*	*Settled by denial/ withdrawal*	*Total settled*
COPD	2,852	15,351	1,743	17,094
VWF	11,140	14,465	5,300	19,765
Total	13,992	29,816	7,043	36,859

[1] Interim payments reflects the "number of claimants" who have received an interim payment, rather than the number of payments made (some cases receive more than one interim).

John Mann: To ask the Secretary of State for Trade and Industry how much has been paid in costs under the Union of Democratic Mineworkers and Vendside scheme for chronic obstructive pulmonary disease and vibration white finger in each year since 1999. [6123]

Malcolm Wicks: The total costs paid by year under the Union of Democratic Mineworkers/ Vendside schemes are as follows:

£ million

	Chronic obstructive pulmonary disease[1]	*Vibration white finger*
1999	—	0.7
2000	0.1	0.9
2001	1.1	2.8
2002	3.8	2.0
2003	11.1	2.9
2004	9.2	1.7
2005	4.1	0.7
Total	29.4	11.6

[1] Solicitor's costs include VAT on solicitor's profit costs and disbursements, but exclude generic costs (which are paid to those solicitors involved in the initial litigation and in coordinating the claims handling framework).

FOREIGN AND COMMONWEALTH OFFICE

Cyprus

5. **Bob Spink:** To ask the Secretary of State for Foreign and Commonwealth Affairs what recent discussions he has had with the UN on new talks on Cyprus. [5699]

Mr. Douglas Alexander: There have been no recent discussions with the UN at ministerial level about new talks on Cyprus.

We look forward, however, to hearing Sir Kieran Prendergast's ideas about the possibility of future talks when he reports to the UN Security Council following his fact-finding mission to the region.

Non-proliferation Treaty

13. **Mr. Maples:** To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on the outcome of the non-proliferation treaty review conference. [5707]

Dr. Howells: The UK's objective for the NPT review conference was to achieve a substantive outcome that strengthened the treaty. Regrettably, failure by states parties to agree an agenda meant there was not enough time to negotiate a substantive final document. Even so, the conference was able to discuss practical ways to strengthen the non-proliferation regime. We will take forward these ideas wherever we can over the coming months.

African Union

14. **Tony Baldry:** To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on the support provided by international organisations for the African Union in Darfur. [5708]

Ian Pearson: NATO, the EU and the UN are working closely together to provide co-ordinated and complementary assistance to the African Union mission in Darfur. We continue to play a leading role in supporting the African Union mission, and are in close contact with all three organisations on this issue.

Middle East

16. **Mr. McGovern:** To ask the Secretary of State for Foreign and Commonwealth Affairs what recent progress has been made on the Middle East Roadmap to peace. [5710]

Dr. Howells: There have been some encouraging signs, including increased contact between the parties and a substantial reduction of violence. The situation is fragile, but we will work with the parties and international partners to maintain the momentum of progress. We will continue to work towards progress on the Roadmap.

Joan Ruddock: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on progress on Israeli disengagement from Gaza. [5709]

Dr. Howells: Israeli disengagement from Gaza and part of the West Bank is due to start in mid-August. Disengagement is an important step. Withdrawal should be as full as possible and co-ordinated with the Palestinians. And we encourage the Palestinian Authority to make the most of this opportunity. We welcome the work of James Wolfensohn as the Quartet's representative on disengagement.

James Brokenshire: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on Government policy on the Middle East peace process. [5712]

Dr. Howells: The UK remains committed to progress on the Roadmap. We welcome disengagement as an important first step. We are working with the parties and the international community in order to maximise the benefits of disengagement and keep up the momentum of recent progress. In doing so we support the work of US security co-ordinator General Ward and the Quartet's disengagement representative James Wolfensohn.

Hamas

Mr. Keith Simpson: To ask the Secretary of State for Foreign and Commonwealth Affairs pursuant to the Answer on 13 June 2005, *Official Report*, column 136W, on Hamas, on what date *(a)* officials and *(b)* representatives in the region advised him to authorise contacts with members of Hamas. [6214]

Dr. Howells: Circumstances in the occupied territories changed last December when members of Hamas, who had previously boycotted the democratic process, participated in, and were elected in, local elections. Discussions with officials and representatives in the region since this time led to the authorisation of some low-level contacts with elected representatives. No further meetings are currently planned.

Mr. Keith Simpson: To ask the Secretary of State for Foreign and Commonwealth Affairs pursuant to the Answer on 13 June 2005, *Official Report*, column 136W, on Hamas, on what dates he has held discussions with *(a)* Israel and *(b)* the Palestinian authority concerning meetings between his officials and members of Hamas; and if he will make a statement. [6215]

Dr. Howells: I refer the hon. Member to the reply I gave to him on 13 June 2005, *Official Report*, column 136W.

My right hon. Friend the Foreign Secretary discussed these contacts with the Israeli Foreign Minister, Silvan Shalom and Israeli Deputy Prime Minister Ehud Olmert on 7 June and Abu Mazen on 8 June.

Iraq

17. **Mrs. James:** To ask the Secretary of State for Foreign and Commonwealth Affairs what recent discussions he has had with the Iraqi authorities on the proposed new constitution for Iraq. [5711]

Dr. Howells: The Secretary of State discussed Iraq's constitutional process with the members of the Iraqi Government, the National Assembly, and other political groups when he accompanied the EU Troika to Baghdad on 9 June.

I had discussions yesterday with representatives from the Iraqi Islamic Party on the constitution process and they told me that they will be examining the question of choosing 15 additional Sunni members to be added to the Constitutional Committee (that is drafting the new constitution) and the 10 Sunni advisors to that Committee.

Turkey (EU Accession)

19. **Jeremy Wright:** To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on progress towards Turkey's accession to the European Union. [5713]

Mr. Douglas Alexander: The EU agreed at the European Council in December 2004 to open accession negotiations with Turkey on 3 October 2005 provided that Turkey brought into force six pieces of outstanding legislation and signed the Protocol extending the Ankara Agreement to the 10 new member states.

All six pieces of legislation are now in force, and we expect the Protocol to be signed soon. The European Council on Friday unanimously adopted conclusions which

> "referred to its conclusions of December 2004 on enlargement and highlighted the need to implement them fully".

The position is therefore clear. Provided it meets the conditions, accession negotiations with Turkey should open on 3 October.

Ben Chapman: To ask the Secretary of State for Foreign and Commonwealth Affairs what assessment he has made of the effect of the Netherlands and France voting against the EU Constitution on the prospect for the accession of Turkey to the EU. [5695]

Mr. Douglas Alexander: The European Council unanimously adopted conclusions on 17 June which

> "referred to its conclusions of June and December 2004 on enlargement and highlighted the need to implement them fully."

The December 2004 European Council agreed to open accession negotiations with Turkey on 3 October 2005 provided that Turkey brought into force six pieces of outstanding legislation and signed the Protocol extending the Ankara Agreement to the 10 new member states. The position is therefore clear. Provided it meets the conditions, accession negotiations with Turkey should open on 3 October.

North Korea

21. **Richard Ottaway:** To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on UK relations with North Korea. [5715]

Ian Pearson: Embassies opened in Pyongyang and London after the establishment of full diplomatic relations between the UK and the DPRK in December 2000. Our relationship with the DPRK is one of constructive engagement. We take every opportunity to make clear our views on issues of international concern, notably the DPRK's nuclear weapons programme and widespread reports of human rights abuses.

Falkland Islands

22. **Mr. Lindsay Hoyle:** To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on relations between the Falkland Islands Government and the Argentinian Government. [5716]

Mr. Douglas Alexander: The Falkland Islands are a United Kingdom overseas territory and as such the United Kingdom Government are responsible for their international relations.

The United Kingdom values its relationship with Argentina and wants it to be as constructive and as positive as possible.

European Constitutional Treaty

23. **Mr. Harper:** To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on the ratification of the treaty establishing a constitution for Europe. [5717]

Mr. Douglas Alexander: I refer the hon. Member for Forest Dean to the statement to the House made yesterday by my right hon. Friend the Prime Minister, *Official Report*, column 523.

24. **Ann Winterton:** To ask the Secretary of State for Foreign and Commonwealth Affairs what recent discussions he has had with his EU counterparts on progress on the treaty establishing a constitution for Europe. [5718]

Mr. Douglas Alexander: I refer the hon. member for Congleton to the statement to the House made yesterday by my right hon. Friend the Prime Minister, *Official Report*, column 523.

Mr. Brady: To ask the Secretary of State for Foreign and Commonwealth Affairs pursuant to the oral statement of 6 June 2005, *Official Report*, column 1005, on the EU constitutional treaty, if he will list the articles of the Maastricht treaty under which the European Defence Agency was established; and what the basis was for his statement that the European Defence Agency is not in the EU constitutional treaty, with particular reference to article I-41(3) of that treaty. [4975]

Mr. Douglas Alexander: The European Defence Agency was formally established on 12 July 2004 by a unanimous decision by Heads of State and Government. It was established under the Council Joint Action 2004/551/CFSP on the basis of article 14 of the treaty on the European Union (Maastricht).

The establishment of the EDA is referred to in the text of the constitutional treaty (article IV/438). If and when the constitutional treaty comes into force it will provide a new legal base for the EDA; unless and until that time the Council Joint Action is sufficient legal base.

China (Religious Policy)

Mr. Drew: To ask the Secretary of State for Foreign and Commonwealth Affairs what reports he has received concerning raids and arrests in late May by Chinese police in house churches in the Changchun area of China; and what representations he has made to the Chinese Government. [6341]

Ian Pearson: We are aware of the arrests to which my hon. Friend refers and are monitoring the situation.

We are concerned about the issue of religious freedom in China. During his most recent trip to China in January 2005, my right hon. Friend the Foreign Secretary raised progress on the ratification of the International Covenant on Civil and Political Rights, which contains provisions on freedom of conscience and religion. The case of house church leader, Pastor Zhang Rongliang, was also discussed.

We also raised our concerns on religion with the Chinese Government at the latest round of our biannual UK/China human rights dialogue, held in London on 6 June.

Colombia

Mr. McGrady: To ask the Secretary of State for Foreign and Commonwealth Affairs how the UK Government plan to monitor implementation of the UN human rights recommendations referred to in the UNCHR Chair's Statement on Colombia; and if the Government will take steps to ensure that appropriate *(a)* international organisations and *(b)* other countries take steps to monitor the implementation of those recommendations through an appropriate six months monitoring mechanism. [5743]

Mr. Douglas Alexander: The United Nations Commission for Human Rights (UNCHR) Chairperson's statement on Colombia calls for the prompt implementation of UN human rights recommendations. Although it does not specifically seek to establish a formal six months monitoring mechanism to help achieve this aim, the international community will continue to closely monitor progress in implementation of the recommendations. They will do so through the regular contacts which the G24, the group drawn from participants the 2003 London meeting of international support for Colombia which includes the EU, has with the Colombia office of the UN high commissioner for human rights, the Colombian Government and Colombian and international civil society. The international community will also continue to look for ways to encourage and assist the Colombian Government to improve the human rights situation in Colombia.

Craig Alden

Derek Wyatt: To ask the Secretary of State for Foreign and Commonwealth Affairs when he last met the family of Craig Alden. [5765]

Mr. Douglas Alexander *[holding answer 20 June 2005]:* My right hon. Friend the Foreign Secretary met with Mrs. Alden, Craig's mother; and her then Member of Parliament, the former Member for Cambridgeshire, North-West, (Sir Brian Mawhinney), in April 2004. The Foreign Secretary has since been regularly updated on this case. Senior Foreign and Commonwealth Office officials maintain a regular dialogue with Craig's family and have twice met with Mrs. Alden in the last four months.

Derek Wyatt: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make representations to the Government of Brazil on the case of Craig Alden. [5766]

Mr. Douglas Alexander *[holding answer 20 June 2005]:* My right hon. Friend the Foreign Secretary wrote to his Brazilian counterpart on 30 March regarding Mr. Alden's case based on conclusions in the reports produced by Mr. Alden's pro bono lawyer. The Foreign Secretary's letter is being followed up by our Ambassador in Brasilia on a regular basis.

Derek Wyatt: To ask the Secretary of State for Foreign and Commonwealth Affairs when he last met the Brazilian Ambassador to discuss the case of Craig Alden. [5767]

Mr. Douglas Alexander *[holding answer 20 June 2005]:* My right hon. Friend the Foreign Secretary has never discussed the case of Mr. Craig Alden with the Brazilian Ambassador. He wrote to the Brazilian Foreign Minister about Mr. Alden's case on 30 March.

Ethiopia

Mr. Jim Cunningham: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on the political situation in Ethiopia. [5169]

Ian Pearson: I refer my hon. Friend to the reply I gave to my hon. Friend the Member for Northampton, North (Ms Keeble) on 20 June 2005, *Official Report*, column 741W.

Robert Key: To ask the Secretary of State for Foreign and Commonwealth Affairs what assessment he has made of whether the recent parliamentary elections in Ethiopia were free and fair. [5214]

Ian Pearson: It would be premature to speculate on the final outcome of the Ethiopian election. The National Electoral Board is still investigating reports of irregularities in some 300 constituencies. We will await the final assessment of the EU Election Monitoring Mission on the conduct of the election.

Robert Key: To ask the Secretary of State for Foreign and Commonwealth Affairs what assessment he has made of the causes of civil unrest in Addis Ababa following the announcement of the provisional results of the recent parliamentary election. [5215]

Ian Pearson: The civil unrest appears to have been caused by the delay in confirming the results of the 15 May elections and the allegations of malpractice. The parties have now agreed on the procedure for the investigation of complaints to enable the National Electoral Board to complete its work impartially. We have urged all the parties to respect the constitutionally established law and the democratic institutions and to exercise restraint.

EU Embassies

Mr. Redwood: To ask the Secretary of State for Foreign and Commonwealth Affairs how many embassies the EU has; and how many new ones are planned. [5211]

Mr. Douglas Alexander: The European Union does not have any embassies overseas and there are no plans to open any. However, the European Commission has 123 missions to third countries, five missions to international organisations, four representations and offices, and seven technical offices. These represent the EU in areas of Commission competence such as external trade and European Commission development assistance. The first Commission overseas mission was established in 1954.

European Defence Agency

Mr. Redwood: To ask the Secretary of State for Foreign and Commonwealth Affairs what the budget is for the first year of the European Defence Agency. [5203]

Mr. Douglas Alexander: The European Defence Agency was established in July 2004. Its budget from July 2004 to the end of 2004 was €1.8 million. The Agency has a budget of €19.9 million for 2005. For 2005 the United Kingdom will pay €3,596, 803, met from the Ministry of Defences's budget.

Mr. Redwood: To ask the Secretary of State for Foreign and Commonwealth Affairs what steps the EU is taking to set up the European Defence Agency. [5204]

Mr. Douglas Alexander: The European Defence Agency was formally established on 12 July 2004 by a unanimous decision by Heads of State and Government. It was established under the Council Joint Action 2004/5 51/CFSP on the basis of Article 14 of the treaty on the European Union (Maastricht).

Mr. Redwood: To ask the Secretary of State for Foreign and Commonwealth Affairs how many staff are planned to be employed by the European Defence Agency. [5213]

Mr. Douglas Alexander: The Agency has a budget to employ 80 staff in 2005. The UK has worked to ensure that staffing levels in the EDA remain low. The EDA's chief executive is Nick Witney, a former UK Ministry of Defence civil servant.

European Fundamental Rights Agency

Mr. Redwood: To ask the Secretary of State for Foreign and Commonwealth Affairs what steps are being taken by the EU to set up a European fundamental rights agency. [5205]

Mr. Douglas Alexander: The EU is taking the following steps to set up the European fundamental rights agency:

The European Council decided in December 2003 to extend the remit of the Vienna-based EU Monitoring Centre on Racism and Xenophobia (EUMC) to become a human rights agency. In December 2004, the European Council called for further implementation of this decision.

In October 2004, the European Commission published a communication in order to seek the views of member state Governments and civil society on the agency. In January 2005, the UK Government published its response to the communication, which is available at

http://europa.eu.int/comm/justice_home/news/consulting_public/fundamental_rights_agency/doc/contribution_uk_en.pdf).

The Commission is shortly expected to publish a proposal for a legal instrument establishing the fundamental rights agency.

European Strategy Committee

Kate Hoey: To ask the Secretary of State for Foreign and Commonwealth Affairs how many times the European Strategy Committee have met; and whether further meetings are planned. [1649]

Mr. Hutton: I have been asked to reply.

Although the Government publish the title, membership and terms of reference of cabinet committees, it has been the practice of successive governments not to disclose when they meet or the details of their proceedings, including the dates they meet.

Liberia

Mr. Martyn Jones: To ask the Secretary of State for Foreign and Commonwealth Affairs what assessment he has made of progress on the comprehensive peace agreement in Liberia. [5691]

Ian Pearson: Since the comprehensive peace accord was signed in August 2003, fighting in Liberia has ended. The United Nations Mission in Liberia has established control of the country; disarmament of ex-combatants has been completed; and the country is preparing for elections in October. Progress has been positive, but further steps must be taken towards improved governance and economic accountability within the National Transitional Government of Liberia.

Nigeria

Andrew Rosindell: To ask the Secretary of State for Foreign and Commonwealth Affairs what steps the Government are taking to help relieve ethnic tensions in Nigeria. [5334]

Ian Pearson: Representatives from the British high commission in Abuja regularly raise incidents of ethnic unrest in Nigeria with the relevant federal and state authorities. Specific initiatives we are supporting to address ethnic tension include funding the work of Coventry Cathedral's International Centre for Reconciliation to decrease violence in Plateau State, and working with the Nigerian Presidential Implementation Committee to put in place their recently agreed strategic conflict assessment.

Russia

Mr. Keith Simpson: To ask the Secretary of State for Foreign and Commonwealth Affairs when he last met the Russian Foreign Minister to discuss *(a)* legal reform and *(b)* judicial independence in Russia. [5537]

Mr. Douglas Alexander *[holding answer 20 June 2005]:* My right hon. Friend the Foreign Secretary talked about the independence of the judiciary in Russia

with Russian Foreign Minister Lavrov when they met in London on 1 March this year. The Foreign Secretary and Mr. Lavrov also discussed the state of human rights and democracy in Russia in the context of Russia's membership of the Organisation for Security and Co-operation in Europe. More recently my right hon. Friend the Prime Minister discussed the present state of Russia and its future development, including judicial reform, with President Putin in Moscow on 13 June.

We have made clear the importance we attach to the rule of law and its impact on investor confidence through our regular Ministerial as well as Embassy contacts with the Russian Government. These contacts include a bilateral human rights dialogue with the Russian Government. The latest round of talks was held in Moscow on 23 May 2005. Discussion included questions about progress on judicial reform in Russia as well as opportunities for building on on-going project work in the area of penal reform.

We are also engaged, with our European partners, in biannual EU-Russia human rights consultations. The first session of consultations took place in Luxembourg on 1 March 2005. The next round of consultations is scheduled to take place under the UK presidency of the EU on 8 September 2005.

Mr. Keith Simpson: To ask the Secretary of State for Foreign and Commonwealth Affairs what further reforms relating to the rule of law in Russia the UK would require to be put in place before agreeing to Russia being accepted as a member of the World Trade Organisation. [5538]

Mr. Douglas Alexander *[holding answer 20 June 2005]:* The European Commission leads on World Trade Organisation issues on behalf of EU member states. WTO accession negotiations between the EU and Russia were concluded in May 2004. Russian WTO membership is now pending the successful conclusion of negotiations with other WTO members.

Rwanda/Burundi

Mr. Martyn Jones: To ask the Secretary of State for Foreign and Commonwealth Affairs what representations he has made to the Burundian authorities on the deportation of Rwandan asylum seekers; and if he will make a statement. [5690]

Ian Pearson: We have spoken to both the Burundian and Rwandan Governments to remind them of their obligations under relevant international law, particularly the principles set out in the 1951 Refugee Convention and 1974 Organization of African Unity Convention, to which both countries are signatories. We have urged both Governments to co-operate fully with staff of the UN high commission for refugees and other UN agencies.

Sudan

John Bercow: To ask the Secretary of State for Foreign and Commonwealth Affairs what discussions his Department has had with the Home Office regarding Sudanese refugees facing torture in Sudan. [4931]

Ian Pearson: We hold regular discussions with the Home Office regarding the status of Sudanese refugees who could face torture in Sudan. The Foreign and Commonwealth Office provides regular updates and responds to specific requests from the Home Office on the situation and conditions in Sudan, which inform asylum caseworkers' decisions.

Our embassy in Khartoum, both bilaterally and as part of the EU-Sudan dialogue, makes regular representations to the Sudanese Government on the need for it to abide by international humanitarian law, including international human rights treaties. We have also committed £7.2 million for a programme to reform the Sudanese judicial sector and ensure it complements Sudan's international human rights obligations, including by ratifying and implementing the UN Convention Against Torture.

John Bercow: To ask the Secretary of State for Foreign and Commonwealth Affairs (1) what assessment he has made of the statement by the UN High Commissioner for Human Rights that the Janjaweed have operated with impunity and in close co-ordination with the forces of the Government of Sudan; [4969]

(2) what steps his Department is taking to implement the UN Security Council's resolution of 30 July 2004 to disarm the Janjaweed militia. [4925]

Ian Pearson: On 7 May 2004 the UN High Commissioner for Human Rights issued a report in which he outlined his concerns that Janjaweed militias were operating with impunity and in close co-ordination with the forces of the Government of Sudan (GoS).

United Nations Security Council Resolution 1556, passed on 30 July 2004, demanded that the GoS disarm the Janjaweed militias and apprehend and bring to justice Janjaweed leaders responsible for violations of human rights and international humanitarian law. We have made clear to the Government that we expect it to tackle the climate of impunity and to comply with this Resolution, and all other commitments it has made.

On 31 March 2005, the Security Council also passed resolution 1593, which we sponsored, referring the situation in Darfur to the International Criminal Court. We are pressing the GoS to co-operate in full with the court.

Only a political solution to this conflict will create the necessary conditions for long-term peace and a sustainable disarmament process in Darfur. We therefore welcome the resumption, on 10 June, of the Abuja peace talks for Darfur. A UK Observer is attending the talks.

John Bercow: To ask the Secretary of State for Foreign and Commonwealth Affairs what plans are being developed *(a)* to return the displaced people of Darfur to their homes and *(b)* to provide them with security. [4923]

Ian Pearson: We have made clear to the Government of Sudan (GoS) that all returns must be voluntary, and carried out in full accordance with the established international mechanisms.

Improving the security situation is key if those who have been displaced are to return to their homes. We are pressing the GoS to ensure the safety of its civilians and improve the security situation there, but the African Union (AU) mission also has a key role to play.

We welcome the planned expansion of the AU mission to over 7,700 personnel and have allocated £19 million in support of this. Where AU troops are deployed, they have helped create the necessary conditions for some Internally Displaced Persons returns. For example in Labado and Khor Abeche the AU presence has, according to the UN, enabled 15,000 and 4,500 people respectively to return to their homes. The additional troops will enable the AU to provide greater geographical coverage in Darfur, and a more permanent presence in areas where it is already deployed.

John Bercow: To ask the Secretary of State for Foreign and Commonwealth Affairs what representations he has made to the Arab League about the killing of African Muslims in Darfur. [4971]

Ian Pearson: I refer the hon. Member to the reply I gave to the hon. Member for Shrewsbury and Atcham (Daniel Kawczynski) on 13 June 2005, *Official Report*, column 477W.

John Bercow: To ask the Secretary of State for Foreign and Commonwealth Affairs what steps his Department is taking to establish a no-fly zone over Darfur. [4972]

Ian Pearson: The Government of Sudan (GoS) signed the Abuja Security Protocol on 9 November 2004, which commits them to refrain from all hostile military overflights over Darfur. Under United Nations Security Council Resolution 1591, the African Union (AU) is requested to monitor compliance by GoS with this commitment. We continue to make clear to both the GoS and the rebels that they must abide fully by the commitments they have made, and the UN Security Council Resolution.

In early February the GoS announced that they would remove their Antonov aircraft from Darfur and refrain from hostile use of aircraft there. The Antonovs appear to have been withdrawn. Although helicopter gunships remain in Darfur, the AU and the UN Secretary-General report that the Government has not conducted any air attacks since January.

Mr. Drew: To ask the Secretary of State for Foreign and Commonwealth Affairs which international organisation is funding the airlift of African Union troops into Darfur; and if he will make a statement. [5002]

Ian Pearson: Both NATO and the EU are committed to supporting expansion of the African Union's (AU) mission in Darfur and are considering, in response to AU requests, assistance across a range of areas, including support for the airlift of AU troops into Darfur. Neither the EU nor NATO has yet made formal detailed offers of assistance to the AU. but both organisations are expected to play a role in co-ordinating offers from their members of aircraft and funds to support the airlift of AU troops. In this context, the UK will provide—subject to AU requirements and other donors' contributions—financial assistance to support the airlift, co-ordinated by NATO, of up to three battalions.

Uganda

Mr. Hancock: To ask the Secretary of State for Foreign and Commonwealth Affairs what assessment he has made of the recent statement made by the World Bank on the future of Uganda. [4076]

Ian Pearson: The World Bank has not shared any recent statement on the future of Uganda with us.

Mr. Hancock: To ask the Secretary of State for Foreign and Commonwealth Affairs on what dates *(a)* he and *(b)* his officials met organisations representing the Ugandan Government; and which organisations were involved. [5877]

Ian Pearson: Officials at the British high commission in Kampala met a representative from Hill and Knowlton PR company on 15 March. Another of the company's representatives accompanied Ugandan Ministers Kutesa and Mbabazi on a call at the Foreign and Commonwealth Office on 14 April. We maintain a wide range of contacts on Uganda with Government representatives, NGOs, members of the diaspora and others

Mr. Drew: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on the situation in Northern Uganda; and what steps he is taking *(a)* to advance a cease-fire, *(b)* to help bring to account those who have committed war crimes through the International Criminal Court and *(c)* to assist land reform. [5975]

Ian Pearson: We remain concerned at the continuing conflict in the north of Uganda. A sustainable peace will require more than simply a military solution and we are continuing to support Betty Bigombe's, former Minister for the North, locally led mediation efforts.

We are working closely with the International Criminal Court (ICC). The prosecutor of the ICC announced his decision to launch a formal investigation into the situation in Northern Uganda in July 2004. Because of the need to respect his independence, and to protect the integrity of the Court's operations, we cannot comment on the operational aspects of specific ICC investigations, nor reveal what support the UK is providing.

The Ugandan Government are currently finalising the Land Use Policy, which covers Uganda as a whole. It aims to link land reform to poverty reduction and other important issues, including strengthening women's rights. The UK was instrumental in developing the Land Act, which preceded the policy. In the north, most of the population is currently displaced. It will be important to ensure that their access and property rights are protected. We are monitoring this issue very closely.

Uzbekistan

Mr. Drew: To ask the Secretary of State for Foreign and Commonwealth Affairs (1) what representations he has made to the Uzbek National Parliament on the role of the Parliamentary Commission in investigating the recent troubles; [5244]

(2) whether the UK was invited to be part of the task force set up by the Uzbek Government to investigate Andijan. [5974]

Mr. Douglas Alexander: The UK has made no representations to the Uzbek National Parliament on the role of the Parliamentary Committee in investigating the recent unrest in Andizhan (Andijan). But at the General Affairs External Relations Council on 13 June, the UK and its EU partners made it clear to the Uzbek authorities that the parliamentary inquiry was an inadequate response, and called on them to reconsider their position on an independent international inquiry. It is only in this way that we will form a clear understanding of the events of 12–13 May, and the circumstances surrounding them.

The UK was not invited to monitor the Uzbek Parliamentary investigation.

Mr. Drew: To ask the Secretary of State for Foreign and Commonwealth Affairs what assessment he has made of the involvement of foreign nationals in the recent disorders in Andijan. [5245]

Mr. Douglas Alexander: We do not yet have a clear understanding of what happened in Andizhan (Andijan). It is for this reason, given the reports of a disproportionate use of force, that my right hon. Friend the Foreign Secretary has repeatedly called for an immediate, independent and international inquiry into the events that occurred in Andizhan on 12–13 May 2005.

TRANSPORT

MOT Testing

Mr. Greg Knight: To ask the Secretary of State for Transport if he will defer the introduction of computerised MOT testing of vehicles until he has ascertained that the computerised procedure will save time; and if he will make a statement. [5168]

Dr. Ladyman: The computerisation of the MOT system is designed to deliver a number of benefits and a reduction in time taken was not among those planned.

Air Transport (London)

Sarah Teather: To ask the Secretary of State for Transport how many flights there were *(a)* from and *(b)* to (i) Gatwick, (ii) Heathrow, (iii) Stansted and (iv) London City airport in each of the last five years. [5313]

Ms Buck: The table shows the number of air transport movements to and from Gatwick, Heathrow, Stansted and London City airport for each of the last five years.

Number of flights at UK airports: 2000–04

Thousand

To:	*2000*	*2001*	*2002*	*2003*	*2004*
Gatwick	126	122	117	117	120
Heathrow	230	229	230	228	235
Stansted	72	75	76	84	88
London City	25	27	26	24	27
From:					
Gatwick	126	122	117	117	121
Heathrow	230	229	230	229	235
Stansted	72	75	77	85	89
London City	24	27	26	24	27

Blue Badge Scheme

Mr. Laurence Robertson: To ask the Secretary of State for Transport if he will make a statement on the operation of the blue badge scheme, with particular reference to the requirement to *(a)* display the badge and *(b)* produce it on demand. [6148]

Ms Buck: The blue badge scheme provides a national arrangement of parking concessions primarily for people with severe walking difficulties, which is administered by local authorities. Their role includes the assessment of applications, the issue of blue badges as well as enforcement of the scheme itself.

Display of the badge

To use the concessions under the scheme badge holders must display the badge on the dashboard or fascia panel of the vehicle, with the front facing forward, so that the relevant details are clearly legible from outside of the vehicle.

Production of the badge for inspection

At present there is no requirement for a badge holder to produce the badge for inspection. However, following a recent review of the blue badge scheme, the Government accepted a number of recommendations from our statutory advisers, the Disabled Persons Transport Advisory Committee, including the provision for a power to inspect blue badges. This was successfully introduced in the Traffic Management Act 2004. The new power will be implemented later in the year by Commencement Order. This will allow us the time to produce and consult on the necessary guidance that will be required by enforcement officers and badge holders themselves.

Civil Servants

Dr. Cable: To ask the Secretary of State for Transport what value for money procurement savings were identified and what reduction in civil service posts occurred in his Department in 2004–05. [4543]

Ms Buck: In pre-Budget report 2004 the Chancellor reported OGC value for money gains in central civil Government procurement for 2003–04 of £2 billion. OGC value for money procurement gains for 2004–05 are being calculated and will be published in the 2005 Treasury Autumn Performance Report.

In Budget 2005 the Chancellor announced a headcount reduction of 12,500 posts by the end of 2004–05, towards the Government's target of a gross reduction of 84,000 civil service and administrative posts by 2008.

The number of filled civil service posts measured on a full-time equivalent basis, including both permanent and casual staff, released due to efficiency in the Department for Transport between 1 April 2004 and 1 April 2005 was 352.

The Department has necessarily had to recruit additional staff to its priority frontline areas during 2004–05, including the Transport Security & Contingencies Directorate and the Accident Investigation Branches (rail, aviation and marine) within the central Department, traffic officers within the Highways Agency and driving examiners within the Driving Standards Agency.

Crossrail

Andrew Rosindell: To ask the Secretary of State for Transport what measures Crossrail is taking to compensate for loss of facility *(a)* on Westlands playing field and *(b)* at St. Edward's school due to construction works. [5415]

Derek Twigg: The impacts, both temporary and permanent, of the land take from Westlands playing fields and St. Edward's school required to construct the Crossrail depot are recognised. Measures to mitigate these impacts are currently under discussion with the London borough of Havering.

Andrew Rosindell: To ask the Secretary of State for Transport what the latest estimate is of the cost of construction of the Crossrail project, including the Romford maintenance depot and related works on the north-eastern branch. [5421]

Derek Twigg: The Estimate of Expense submitted with the Crossrail hybrid Bill estimates the cost of Crossrail as £10.292 billion in first quarter 2002 prices.

Andrew Rosindell: To ask the Secretary of State for Transport what estimate he has made of the likely cost of construction of the Crossrail project, including maintenance depot and related works, on the north-eastern route, if the depot were to be built at site *(a)* GE1, Cowbridge Grange Farm, *(b)* GE2, Little Cowbridge Grange, *(c)* GE7, Arnold's Wood, *(d)* GE9, Brentwood Allotments, *(e)* GE10, Brentwood A12 Hotel site and *(f)* GE12, Harold Court. [5422]

Derek Twigg: No such estimates have been made for these sites as they were discounted after stage one of Cross London Rail Links depot location assessment. A report detailing the depot site selection process was released by Cross London Rail Links on 26 May 2005 and is available on their website.

Andrew Rosindell: To ask the Secretary of State for Transport what estimate has been made of the incremental *(a)* net present value and *(b)* cost-benefit ratio to Crossrail for (i) Whitechapel station and (ii) the Shenfield branch line to Liverpool Street. [5424]

Derek Twigg: I understand from Cross London Rail Links that the incremental benefit: cost ratio for the Shenfield branch is 8.7:1 (calculated by adding that branch to a base scheme of Paddington to Isle of Dogs). The Net Present Value (defined as the Present Value of Benefits minus the Present Value of Costs) for the Shenfield branch is + £6,258 million. Their estimates are at first quarter 2002 prices.

The analysis of costs and benefits is not disaggregated to the level of individual stations. However, the incremental cost of Whitechapel station is some £320 million, including risk and contingency, at first quarter 2002 prices.

Andrew Rosindell: To ask the Secretary of State for Transport what assessment Network Rail has made of Crossrail plans for *(a)* operations over the great eastern main line and *(b)* increased services from Stansted and Hertford East into London. [5425]

Derek Twigg: As part of ongoing discussion between Network Rail, Department for Transport and Cross London Rail Links Ltd. (CLRL), timetabling information and modelling studies for Crossrail undertaken by CLRL are being shared with Network Rail for their comment, further development and, in due course, verification.

By releasing platform capacity at Liverpool Street, Crossrail would improve the potential for expansion of services from the Lea Valley.

Andrew Rosindell: To ask the Secretary of State for Transport whether provision has been made for extension of the Crossrail system beyond the routes included in the current Bill. [5426]

Derek Twigg: In order to facilitate extension of Crossrail in the long-term, a direction to safeguard a section of the north Kent line between Abbey Wood and a proposed new station at Ebbsfleet was issued on 24 February 2005. As soon as practicable we will begin consultation on safeguarding land for potential infrastructure enhancements along this section.

We have said that we will consult on the possibility of safeguarding a potential westward extension of Crossrail to Reading. We will start that consultation as soon as practicable.

Andrew Rosindell: To ask the Secretary of State for Transport what the estimated cost is for the construction of the Crossrail maintenance depot and related works in Romford. [5427]

Derek Twigg: The estimated cost for the construction of the Crossrail maintenance depot and related works at Romford is £430 million.

Andrew Rosindell: To ask the Secretary of State for Transport how many Crossrail trains are expected to travel from *(a)* Abbey Wood to Heathrow and *(b)* Shenfield to Heathrow without the need for passenger transfer. [5428]

Derek Twigg: For project appraisal purposes, Cross London Rail Links Ltd. (CLRL) has assumed that, typically, four trains per hour will operate directly between Abbey Wood and Heathrow airport. On this basis, there would be no direct service from Shenfield to Heathrow; passengers would change at any Central London station and catch a Crossrail train on the same platform to Heathrow. These service patterns are indicative at this stage.

The final service pattern will be decided when the operational working timetable is planned.

Andrew Rosindell: To ask the Secretary of State for Transport what steps the Government are taking to ensure that green belt land is preserved in relation to the building of Crossrail facilities in Romford. [5430]

Derek Twigg: In developing the Crossrail route Cross London Rail Links Limited have sought to minimise its impact on green belt land. The Environmental Statement prepared for Crossrail makes it clear that the impacts of Crossrail are outweighed by its benefits, and that the impacts—though rightly important to those affected—are overall small for a project the size of Crossrail. While a small strip of approximately 4.3 hectares of green belt land is needed for a dive under at Romford, to allow Crossrail trains to cross the Great Eastern Main Line, the proposed maintenance depot at Romford will be located on a brownfield site.

Fare Evasion

Sarah Teather: To ask the Secretary of State for Transport how many successful prosecutions were carried out against passengers for avoiding fares on *(a)* trains, *(b)* buses and *(c)* the tube in London in each year since 1997. [2511]

Ms Buck: Transport for London is responsible for prosecutions for fare evasion on buses in London. This information is not held centrally.

The information requested in regard to trains and the tube in London can only be provided at a disproportionate cost.

Motorway Repairs

Steve Webb: To ask the Secretary of State for Transport which body is responsible for determining the highway speed limits which apply during major long-term road works; at what level of seniority such decisions are taken; what the policy is on speed limits in place during periods when working is temporarily suspended; and if he will make a statement. [5952]

Dr. Ladyman *[holding answer 20 June 2005]:* It is for the highway authority to determine an appropriate speed limit for major long-term road works. For trunk roads, this is the Highways Agency.

Decisions are made by qualified and experienced highway engineers, based on the statutory guidance in chapter 8 of the DfT's Traffic Signs Manual and in consultation with the police.

When works are temporally suspended, the Highways Agency removes temporary traffic management and speed limits where it is safe and cost-effective to do so.

North-West Airports

Mr. Hoyle: To ask the Secretary of State for Transport how many aircraft used *(a)* Blackpool, *(b)* Manchester and *(c)* Liverpool airport in each of the last three years. [6025]

Ms Buck: The following table shows number of air transport movements at Blackpool, Manchester and Liverpool airport for each of the last three years.

Number of flights at UK airports: 2002–04

Thousand

Total	*2002*	*2003*	*2004*
Blackpool	8	9	10
Manchester	178	192	208
Liverpool	33	39	40

Nuclear Waste

Mr. Hayes: To ask the Secretary of State for Transport if he will make a statement on the transport by rail of nuclear waste. [5290]

Derek Twigg: Transport of such material is subject to strict regulation, based upon the internationally agreed recommendations of the International Atomic Energy Agency (IAEA—Regulations for the Safe Transport of Radioactive Material) to ensure protection of members of the public, workers and the environment from the potential effects of radiation. Rail transport has proved to be a practical and efficient mode of transport for the heavy loads involved. In 40 years of experience of these transports in the UK there has never been an accident resulting in death or serious injury to persons, nor significant harm to the environment from radiological cause when transported in accordance with the IAEA Regulations.

Railways

Mr. Hayes: To ask the Secretary of State for Transport how many *(a)* specialist locomotives and *(b)* other items of rolling stock are in use to facilitate the maintenance of the railways; and what change there has been in the numbers of each in each of the last 10 years. [5219]

Derek Twigg: This is an operational matter for Network Rail. Network Rail will respond directly to the hon. Member.

Peter Law: To ask the Secretary of State for Transport whether he plans to return the national rail network to public ownership. [4689]

Derek Twigg: The Government have no plans to return the national rail network to public ownership. Both public and private money is benefiting the railway. Re-nationalisation would not only mean covering the costs of buying back the railway, but also losing that private source of money.

Following the Rail Review, the "Future of Rail" White Paper set out a new streamlined structure based on the principle of public and private partnership, recognising rail's importance as a vital public service specified by the Government and delivered by the private sector.

Peter Law: To ask the Secretary of State for Transport if he will instruct the Strategic Rail Authority that increased passenger services between Cardiff and London should be a condition of the new franchise. [4690]

Derek Twigg: No. The Strategic Rail Authority (SRA) issued invitations to tender to bidders for the new Greater Western franchise on 2 June. The current half-hourly 'inter-city' service between Cardiff and London is included in the timetabled specification that forms the base case, which means that each bidder will commit to provide it. Bidders are, however, being asked to separately cost a reduction in the service frequency in the off-peak from half-hourly to hourly, to determine the value for money of operating these services within the new franchise.

Mr. Hayes: To ask the Secretary of State for Transport what his latest estimate is of the number of passengers standing on train journeys; and what targets have been set on standing in trains. [5223]

Derek Twigg: The Department for Transport does not hold information on the estimates for the number of people standing on trains. All train operating companies are required by their franchise agreements to manage crowding by ensuring that adequate capacity is provided to meet passenger needs as far as possible. All rolling stock has a nominal capacity. Under normal circumstances for journeys of 20 minutes or more, the

capacity is taken to be the number of seats provided, and no passenger should need to stand for more than 20 minutes. For journeys of less than 20 minutes an allowance is made for no more than 30 per cent. of passengers to be standing.

In addition, London and Edinburgh commuter operators are subject to specific standards for managing crowding in the morning and evening peaks. These are that the average number of passengers carried does not exceed the nominal capacity by more than 4.5 per cent. in either peak taken in isolation, or more than 3 per cent. for both peaks combined. The Strategic Rail Authority publishes data in National Rail Trends about the commuter operators' performance, and this is in the Library of the House.

Mrs. Dean: To ask the Secretary of State for Transport (1) which franchise he expects to be responsible for the Crewe to Derby rail service following the break-up of Central Trains; [5774]

(2) which franchise he expects to become responsible for services operated on the Birmingham to Nottingham route via Burton-on-Trent by Central Trains following the break-up of that company. [5775]

Derek Twigg: The Strategic Rail Authority has begun informal consultation with industry stakeholders including Passenger Transport Executives and local authorities. Specific proposals for the re-allocation of Central Trains' services to other franchises will be considered later in the year and consulted on before Invitations to Tender are issued.

Mr. Hayes: To ask the Secretary of State for Transport what his latest estimate of rail use is in terms of *(a)* passenger miles and *(b)* tonnage of freight; and what the levels were for 1997. [5224]

Derek Twigg: The information requested is in the following table.

	1996–97	*2003–04*
Passenger kilometres (billions)	32.1	40.9
Freight moved (billion net tonne kilometres)	15.1	18.9

The number of passenger kilometres and amount of freight moved is published in the Strategic Rail Authority's National Rail Trends Yearbook 2003–04 (June 2004), reproduced in the afore mentioned table.

Figures for the year 2004–05 will be detailed in the next Yearbook, due to be published 24 June 2005. A copy will be placed in the House Library.

Mr. Steen: To ask the Secretary of State for Transport what public funds have been made available in each of the last three years to maintain the track from *(a)* London to Reading, *(b)* Reading to Exeter and *(c)* Exeter to Plymouth; and what steps he is taking to ensure that Railtrack maintains the rails to the West Country to a sufficient specification to enable high-speed trains *(a)* to run from London to Plymouth daily in under three hours and *(b)* to keep to schedule. [5963]

Derek Twigg: Network Rail is a private sector company, and so it is not for a Government Department to direct how it spends the money available to it at a local level. However, through a combination of the service specifications in the franchise agreements between the Strategic Rail Authority (SRA) and the train operators, the train operating companies' track access agreements with Network Rail to deliver these, Network Rail's duties under condition 7 of its Network Licence and the network outputs specified in the Office of Rail Regulation's review of Network Rail's access charges, a commercial and regulatory framework exists to ensure that the network is maintained at an appropriate standard.

Network Rail's planned expenditure on the Reading-Penzance Route is set out in its 2005 Business Plan Route Plans' document, a copy of which is available in the Library of the House.

The Route Utilisation Strategy for the Great Western route will be published shortly by the SRA. This strategy, which extends to 2012, does not envisage any reduction in the capability of the Great Western Mainline.

Mr. Milburn: To ask the Secretary of State for Transport how many prosecutions for trespass on railways in the UK there were in each of the last five years. [4707]

Derek Twigg: The British Transport police advise that the total numbers of prosecutions for trespass on the railway in England and Wales for the past five years are as follows:

As at 1 April to 31 March:	*Trespass prosecutions*
2000–01	457
2001–02	740
2002–03	675
2003–04	802
2004–05	687

The British Transport police does not hold data on Scottish prosecutions. The British Transport police does not police the railways in Northern Ireland.

Mr. Hayes: To ask the Secretary of State for Transport how many miles of railway track have been replaced in each of the last five years; and if he will make a statement. [5230]

Derek Twigg: Network Rail advises that for each year between 2000–01 and 2004–05 the total length of track where re-railing has been carried out is as follows:

	Total track re-laid in miles
2000–01	661
2001–02	611
2002–03	628
2003–04	871
2004–05	626

Mr. Hayes: To ask the Secretary of State for Transport if he will make a statement on rolling stock levels *(a)* at the latest date for which figures are available and *(b)* in 1994. [5655]

Derek Twigg: In April 2005 there were 10,897 vehicles in use on revenue earning services operated by franchised train operating companies. At the time of rail privatisation there were 9,979.

Julia Goldsworthy: To ask the Secretary of State for Transport what assessment he has made of the economic effects of the rail sleeper service on Cornwall. [5369]

Derek Twigg *[holding answer 20 June 2005]:* None. The Strategic Rail Authority (SRA) issued Invitations to Tender to bidders for the new Greater Western franchise on 2 June. The sleeper service is included in the timetabled specification that forms the Base Case, which means that each bidder will commit to provide it. Bidders are, however, being asked to cost running it separately to determine the value for money of operating these services within the new franchise and to allow an assessment of an option in which the current sleeper service are removed. In addition, they are being asked to propose more cost-effective ways of meeting the demand which the sleeper service accommodates.

Mr. Martyn Jones: To ask the Secretary of State for Transport if he will make a statement on the future of the Night Riviera sleeping service from Paddington to Penzance. [4976]

Derek Twigg: The Strategic Rail Authority issued invitations to tender to bidders for the new Greater Western franchise on 2 June. The sleeper service is included in the base specification which means that each bidder must agree to provide it. Bidders are, however, being asked to cost running it separately to determine the value for money of operating these services within the new franchise.

Mr. Steen: To ask the Secretary of State for Transport what plans he has to remove the requirement for the night sleeper rail services to Edinburgh and Glasgow in the next round of tender bids. [4950]

Derek Twigg: Sleeper services between England and Scotland are part of the ScotRail franchise which was re-let on 17 October 2004 and will run until October 2011. Under the Railways Act 2005, the Scottish Executive will be wholly responsible for the ScotRail franchise from later this year.

Adam Price: To ask the Secretary of State for Transport whether the Government have evaluated the case for a high-speed rail link between South Wales and London. [5539]

Derek Twigg *[holding answer 20 June 2005]:* No. First Great Western currently operates high speed trains between South Wales and London with a maximum speed of 125 miles per hour. The Strategic Rail Authority has consulted on a Great Western Main Line "Route Utilisation Strategy" to determine the most efficient use of current network infrastructure. A final strategy will be published shortly.

Mr. Steen: To ask the Secretary of State for Transport if he will ensure that the level of on-board catering will be a consideration of the franchise document for the West of England franchise. [5966]

Derek Twigg: The provision and level of on-board catering will remain a commercial matter for the train operator. However, bidders are required to submit an on train catering plan with their bid which will form part of the evaluation.

Mr. Steen: To ask the Secretary of State for Transport (1) if he will ensure that account is taken of *(a)* the quality of the rolling stock, *(b)* the reliability of the engines to be used and *(c)* the speed of the journeys in evaluating the franchise bids from each operator for the Westcountry rail franchise; [4947]

(2) if he will ensure that account is taken of the number of trains that can maintain a realistic and punctual daily timetable in evaluating the franchise bids from each operator for the Westcountry rail franchise. [4948]

Derek Twigg: A key objective in letting the franchise is to improve operational performance and to sustain a level of service quality consistent with meeting customer needs. A service level commitment specifying a minimum level of service including maximum journey times has been developed with these aims in mind.

Bidders are required to produce plans to improve current performance through better fleet management and demonstrate an efficient and effective use of the extensive range of fleet maintenance services and stabling facilities available within the Greater Western area in their bids. They may propose to refurbish or acquire alternative or additional rolling stock to meet these requirements. In addition, the Greater Western franchise will benefit from the replacement of the HST fleet planned to be in service in 2014.

Mr. Steen: To ask the Secretary of State for Transport (1) what consultation he has carried out with business leaders in Devon and Cornwall in assessing whether the night sleeper between London and Penzance should be included in the franchise documents for the Westcountry franchise; what research he has conducted into the effect of the withdrawal of the Westcountry sleeper on the economy of Devon and Cornwall; and if he will make a statement; [4949]

(2) if he will include in his rail tender documents for the South West a requirement to include the night sleeper service to and from Penzance; if he will provide a financial credit for those companies offering this service in their franchise bid; and if he will make a statement. [4951]

Derek Twigg: No assessment of the economic effect has been made as it would not be appropriate at this stage. The Strategic Rail Authority (SRA) issued invitations to tender to bidders for the new Greater Western franchise on 2 June. The sleeper service is included in the timetabled specification that forms the base case, which means that each bidder will commit to provide it. Bidders are, however, being asked to cost running it separately to determine the value for money of operating these services within the new franchise and to allow an assessment of an option in which the current sleeper service are removed. They are also being asked to propose more cost-effective ways of meeting the demand which the sleeper service accommodates.

Road Congestion

Mr. Amess: To ask the Secretary of State for Transport what progress has been made on reducing road congestion. [4381]

Dr. Ladyman: Significant progress has been made putting measures in place to tackle congestion. Since 2001 we have completed 29 major strategic road schemes. A further 13 major schemes are currently under construction, including widening of the M25 between junctions 12 to 15 around Heathrow.

Uniformed Highways Agency Traffic Officers are now patrolling the motorway network in the West Midlands, having taken over some responsibilities from the police for clearing up quickly around incidents to keep traffic moving. The first of our new network of Regional Control Centres have taken over responsibility for Variable Message Signs from the police.

Britain's first High Occupancy Vehicle (carpool) motorway lane will be trialled on the M1 between junctions 7 and 10 (St. Albans to Luton) in 2008, following widening of the motorway. As part of an Active Traffic Management pilot on the M42 corridor between junctions 3a and 7 to the south-east of Birmingham, variable speed limits became operational this spring, with other aspects of the pilot to follow in 2006, including hard shoulder running and access management. Both schemes will operate at peak times to help minimise delay and congestion for road users.

Transport Direct, the Government's real-time travel information and journey planning service for public and private transport, was launched in December. Travellers can check as to the likelihood of delays and see whether choosing a different route, departure time or transport mode might suit them better.

The Traffic Management Act 2004 gave local authorities a duty and new powers to do all that is reasonably practicable to keep roads clear and traffic moving. The Government consulted earlier this year on plans to introduce tougher regulations on streetworks by utility companies, including higher penalties for overrunning, permit schemes and bans on carrying out works on recently dug up roads.

The Government have announced their intention to establish a Transport Innovation Fund to help local authorities develop local charging schemes.

Road Pricing

Dr. Pugh: To ask the Secretary of State for Transport what discussions he has had with the devolved administrations on road pricing. [5153]

Dr. Ladyman: The devolved administrations were represented on the Road Pricing Feasibility Study (published by the Department for Transport in July 2004), which recognised a number of issues which would need to be resolved were road pricing to be taken forward. In line with its manifesto commitments, the Government will examine the potential of moving away from the current system of motoring taxation towards a national system of road pricing. Officials from the Department for Transport maintain contact with officials from the devolved administrations in the course of business.

Transport Innovation Fund

Tom Brake: To ask the Secretary of State for Transport (1) when he will announce details of the operation and size of the Transport Innovation Fund; [5187]

(2) how much has been allocated in each financial year for which allocations have been made to the Transport Innovation Fund *(a)* in total and *(b)* to local authorities for transport projects; [5188]

(3) what estimate he has made of the allocations which will be made from the Transport Innovation Fund to local authorities for transport projects in years for which allocations have not yet been finalised. [5257]

Ms Buck: Money from the Transport Innovation Fund will become available from 2008–09 and is forecast to grow from £290 million in 2008–09 to over £2 billion by 2014–15. Allocations for each financial year have not yet been made.

Further information about the aims and operation of the Fund will be published shortly. The Secretary of State has confirmed, however, that ultimately up to £200 million a year will be made available from the Fund to support local authorities implementing innovative solutions to congestion problems in their local area where these include demand management based on pricing.

Transport Policy (Wales)

Adam Price: To ask the Secretary of State for Transport whether the Government adviser on transport, Sir Rod Eddington, will consider any transport projects of specific relevance to Wales in his review of long-term policy. [5540]

Ms Buck *[holding answer 20 June 2005]:* Sir Rod Eddington will advise on the long-term impacts of transport decisions on the UK's productivity, stability and growth.

The study will look at a range of potential transport decisions across the UK. Informed by a strong evidence base, advice will be provided on how these transport decisions may affect the productivity and growth of the UK economy over the next 30 years.

Public Transport (Lancashire)

Mr. Hoyle: To ask the Secretary of State for Transport how many bus services are operated in Lancashire; how many were operated in each of the last two years; and what services are planned. [6023]

Ms Buck: I am advised by Lancashire county council that there are currently a total of 848 bus services operated in Lancashire. Of these 440 are school services. Figures for previous years are not available, but the council estimate that the current figure is a slight decrease. As the majority of bus services are provided on a commercial basis by operators, who make their own decisions on services provision, there is only limited information about planned future services.

Mr. Hoyle: To ask the Secretary of State for Transport what discussions he has had with Lancashire county council about transport needs. [6024]

Ms Buck: The Department for Transport and Government office north-west maintain a regular dialogue with Lancashire county council on a range of transport issues. We are currently discussing the development of their second local transport plan, a provisional version of which is due for submission on 29 July 2005.

Viaducts

Mr. Hayes: To ask the Secretary of State for Transport if he will list rail viaducts in use which have exceeded their original planned end-of-life date. [5225]

Derek Twigg: This is an operational matter for Network Rail. Network Rail will respond directly to the hon. Member.

CABINET OFFICE

Race Relations (Amendment) Act 2000

Keith Vaz: To ask the Chancellor of the Duchy of Lancaster what arrangements are in place to ensure that bodies within the responsibility of his Department comply with the requirements of the Race Relations (Amendment) Act 2000. [3540]

Mr. Hutton: The Cabinet Office produces and publishes a race equality scheme that sets out how it plans to meet the requirements of the Race Relations (Amendment) Act 2000. This scheme also covers the Government Car and Despatch Agency. The Central Office of Information has its own scheme.

TREASURY

Alcohol Deaths

Lynne Featherstone: To ask the Chancellor of the Exchequer in respect of how many deaths in *(a)* Greater London and *(b)* Hornsey and Wood Green alcohol was the primary cause in each of the last five years. [5722]

John Healey: The information requested falls within the responsibility of the National Statistician, who has been asked to reply.

Letter from Len Cook to Ms Lynne Featherstone, dated 21 June 2005:

As National Statistician, I have been asked to reply to your recent Parliamentary Question asking in respect of how many deaths in *(a)* Greater London and *(b)* Hornsey and Wood Green alcohol was the primary cause in each of the last five years. (5722)

The latest year for which figures are available is 2004. The table below shows the numbers of deaths among residents of Greater London and Hornsey and Wood Green Parliamentary Constituency where the underlying cause of death indicated a condition directly related to alcohol use in the years 2000 to 2004.

Alcohol-related deaths[1] to usual residents of Greater London and Hornsey and Wood Green parliamentary constituency, registered 2000 to 2004

Number of deaths

	Greater London	*Hornsey and Wood Green*
2000	806	6
2001	809	8
2002	838	9
2003	834	8
2004	772	12

[1] For the year 2000 the cause of death was defined using the International Classification of Diseases, Ninth Revision (ICD-9). The codes used by ONS to define alcohol-related deaths are listed below:
291—Alcoholic psychoses
303—Alcohol dependence syndrome
305.0—Non-dependent abuse of alcohol
425.5—Alcoholic cardiomyopathy
571—Chronic liver disease and cirrhosis
E860—Accidental poisoning by alcohol
For the years 2001–04 the International Classification of Diseases, Tenth Revision (ICD-10) was used. To maintain comparability with earlier years the following codes were used:
F10—Mental and behavioural disorders due to use of alcohol
142.6—Alcoholic cardiomyopathy
K70—Alcoholic liver disease
K73—Chronic hepatitis, not elsewhere classified
K74—Fibrosis and cirrhosis of liver
X45—Accidental poisoning by and exposure to alcohol
Deaths were selected using the original underlying cause.
The selection of codes to define alcohol-related deaths is described in:
Baker A and Rooney C (2003). Recent trends in alcohol-related mortality, and the impact of ICD-10 on the monitoring of these deaths in England and Wales. "Health Statistics Quarterly" 17, pp 5–14.

Child Benefit (Family Reunion Scheme)

Mr. Hancock: To ask the Chancellor of the Exchequer under what circumstances it is possible for claimants who enter the UK under the family reunion scheme to be entitled to claim child benefit when one parent is a British national and the other is not. [6280]

Dawn Primarolo: Generally, a claimant is entitled to child benefit provided that he or she is present and ordinarily resident in the UK, and not subject to immigration control. In the case of a couple in which one of the partners is a British national and the other is not, then provided the foreign partner is not subject to immigration control, either partner is entitled to claim child benefit under child benefit legislation.

Child Trust Funds

Dr. Kumar: To ask the Chancellor of the Exchequer what his estimate is of the potential financial effects of delaying investing Child Trust Fund vouchers by *(a)* a month, *(b)* six months and *(c)* a year. [5855]

Mr. Ivan Lewis: It is in the interests of children that parents use the Child Trust Fund voucher to open a Child Trust Fund account as soon as they feel ready to do so. The sooner vouchers are invested, the sooner Child Trust Fund accounts can start to grow.

The loss resulting from a delay in investing the voucher depends on a large number of factors such as the value of the initial voucher, the type of account invested in and the rate of return on this. If parents, friends and family intend to make contributions once the accounts are opened, delaying will further compound the loss of growth.

Climate Change Levy

Paul Flynn: To ask the Chancellor of the Exchequer pursuant to his answer of 13 June 2005, *Official Report*, column 48W, on the climate change levy, what the yield in each year was from each of the other taxes introduced in the past 10 years indicating offsetting cuts in employers' national insurance contributions. [5356]

John Healey: The information requested for taxes for which there were offsetting cuts in employers national insurance contributions (NICs) is given in the following tables.

Aggregates levy (AL) revenues and value of 0.1 percentage point cut in employers' national insurance contributions (NICs)

	AL revenues (£ million) [1]	*Value of 0.1 pp cut in Employers' NICs (£ million)* [2]
2002–03	309	375
2003–04	340	395
2004–05	333 (provisional)	405
2005–06	£0.3 billion (expected)	425

[1] On accruals basis. Based on AL declarations on trader returns
[2] Source: Based on HMT Tax Ready Reckoner

Landfill tax (LFT) revenues and value of 0.2 percentage point cut in main rate of employers' national insurance contributions (NICs)

	LFT revenues (£ million) [1]	*Approximate value of 0.2 pp cut in main rate of Employers' NICs in 1997–98 (£ million)* [2]
1996–97	[3]170	—
1997–98	352	550
1998–99	323	610
1999–2000	442	[4]—
2000–01	476	[4]—
2001–02	508	[4]—
2002–03	538	[4]—
2003–04	638	[4]—
2004–05	668 (provisional)	[4]—
2005–06	£0.7 billion (expected)	[4]—

[1] On accruals basis. Based on LFT declarations on trader returns
[2] Source: Based on HMT Tax Ready Reckoner
[3] From October 1 996
[4] Not available

Landfill tax was introduced with an offsetting 0.2 percentage point cut in the main rate of employer NICs from 1997–98. It is not possible to calculate the effects of the compensation for the landfill tax on employer NICs beyond 1998–99 due to structural changes to employers' NICs in 1999, which abolished the 'entry fee', replaced the series of four rates with a single rate and aligned the point at which individuals and employers pay national insurance with the personal allowance for income tax. It is not known what a 0.2 percentage point cut in the main rate pre-reform translates to in terms of a cut in the single rate post-reform.

Correspondence

Sir Michael Spicer: To ask the Chancellor of the Exchequer when he will reply to the letter of 1 April from the hon. Member for West Worcestershire concerning inheritance tax. [6078]

Dawn Primarolo: The Treasury and HM Revenue and Customs have no record of having received the hon. Member's letter. A copy of it has, however, been requested and it will be dealt with as quickly as possible on receipt.

Council Tax

Mrs. Spelman: To ask the Chancellor of the Exchequer if he will place in the Library a copy of the guidance issued to assessors by the Valuation Office Agency for valuing residential properties in the council tax revaluation. [5576]

Dawn Primarolo: The valuation date is 1 April 2005 and considerable work of preparation is being undertaken by the Valuation Office Agency in readiness for the main valuation phase which is due to commence later this summer. Part of this preparation involves updating and developing guidance and training material for VOA staff. The council tax manual which is used currently by the VOA may be found on the website www.voa.gov.uk

Mrs. Spelman: To ask the Chancellor of the Exchequer what make of computer-assisted mass appraisal the Valuation Office Agency will use during the council tax revaluation in England. [5578]

Dawn Primarolo: The Valuation Office Agency's intended use of computer assisted mass appraisal for the council tax revaluation in England were announced by press release dated 10 September 2004. Since April 2005 calibration of this new technology has been under way in preparation for the valuation task which has to be completed by September 2006

Household Debt

Dr. Cable: To ask the Chancellor of the Exchequer what the average *(a)* unsecured debt and *(b)* annual income per person was in each year since 1997. [6018]

John Healey: The information requested falls within the responsibility of the National Statistician who has been asked to reply.

Letter from Len Cook to Dr. Vincent Cable dated 21 June 2005:

As National Statistician I have been asked to reply to your recent Parliamentary Question on unsecured debt per person and annual income per person. (6018)

The information requested is shown in the table below. The data for unsecured debt (households' total financial liabilities other than secured debt) and income (households' gross disposable income) used in the calculations are national accounts series for the combined household and non-profit institutions serving households (NPISH) sectors. The accounts for the household and NPISH sectors are currently combined; separate estimates are not available.

For the denominator in the calculations the series used is Population aged 16+.

Annual income and unsecured debt per person, 1997–2004

£

	Annual income per person	*Unsecured debt per person*
1997	12,420	3,540
1998	12,730	3,790
1999	13,310	4,090

Annual income and unsecured debt per person, 1997–2004

£

	Annual income per person	Unsecured debt per person
2000	14,200	4,460
2001	15,120	4,910
2002	15,470	5,620
2003	16,070	6,100
2004	16,680	7,080

Departmental Relocation

Mr. Gale: To ask the Chancellor of the Exchequer how many of his Department's posts *(a)* have been relocated and *(b)* are under consideration for relocation from London to the deprived areas of the south east. [6257]

Mr. Des Browne: The Chancellor's Departments are implementing the Lyons Review recommendations to relocate 5,050 posts out of London and the south east by 2010. This will not exclude consideration of relocating some posts to relatively deprived areas in the south east. So far, the Departments have not identified any posts suitable for transfer to deprived areas in the south east.

Statistics (Hornsey and Wood Green)

Lynne Featherstone: To ask the Chancellor of the Exchequer what the average earnings of full-time employees in Hornsey and Wood Green constituency were in April *(a)* 1997, *(b)* 2001, *(c)* 2002, *(d)* 2003 and *(e)* 2004. [5723]

John Healey: The information requested falls within the responsibility of the National Statistician, who has been asked to reply.

Letter from Len Cook to Ms Lynne Featherstone dated 21 June 2005:

As National Statistician, I have been asked to reply to your recent Parliamentary Question what the average earnings of full time employees in Hornsey and Wood Green Constituency were in April *(a)* 1997, *(b)* 2001, *(c)* 2002, *(d)* 2003 and *(e)* 2004. (5723)

Average earnings are estimated from the Annual Survey of Hours and Earnings and are provided for employees on adult rates of pay whose pay was unaffected by absence during the pay period, by their place of work. This is the standard definition used for Annual Survey of Hours and Earning tables. The Annual Survey of Hours and Earnings does not collect data on the self employed and people who do unpaid work.

I attach a table showing the average gross weekly earnings for full time employees in Hornsey and Wood Green Parliamentary Constituency from 2001 to 2004. This data is also available on the National Statistics website on table 9:

http://www.statistics.gov.uk/STATBASE/Product.asp?vlnk=13101

Data for Hornsey and Wood Green for 1997 is not yet available from the Annual Survey of Hours and Earnings, and data from the New Earnings Survey has been suppressed due to quality.

The Annual Survey of Hours and Earnings, carried out in April of each year, is the most comprehensive source of earnings information in the United Kingdom. It has a one per cent sample of all employees.

The Annual Survey of Hours and Earnings publication criteria ensure that all estimates are undisclosive. A number of estimates have been removed from the published tables for these reasons.

Gross weekly earnings (£), means and medians, for full-time employees in Hornsey and Wood Green parliamentary constituency, 2001–04

	Number of Jobs (thousand)	CV[1]	Median	CV[1]	Mean	CV[1]
2001	14	[2]11.1	382.9	[2]8.3	438.6	[2]5.7
2002	16	[2]11.1	398.1	[2]8.7	437.0	[2]5.4
2003	16	[2]11.1	422.2	[2]8.3	466.0	[2]4.9
2004						
exc[3]	14	[2]12.2	422.1	[2]9.9	479.2	[2]5.4
2004 inc[3]	14	[2]12.0	421.8	[2]9.7	474.4	[2]5.3

[1] Coefficient of Variation—measure of the deviation of a variable from its mean.
[2] Key to quality:
CV ⩽ 5%
CV > 5% and ⩽ 10%
CV > 10% and ⩽ 20%
x = unreliable
. = unavailable
.. = disclosive
: = not applicable
- = nil or negligible
[3] In 2004 a number of supplementary surveys were introduced to improve the coverage of ASHE. Data is presented for 2004 both including and excluding these supplementary surveys. The data excluding supplementary surveys enables a direct comparison to 2003.

Annual Survey of Hours and Earnings, ONS

Lynne Featherstone: To ask the Chancellor of the Exchequer how many pensioners live in Hornsey and Wood Green constituency. [5724]

John Healey: The information requested falls within the responsibility of the National Statistician, who has been asked to reply.

Letter from Len Cook to Ms Lynne Featherstone dated 21 June 2005:

As National Statistician and Registrar General for England and Wales I have been asked to reply to your recent Parliamentary Question asking how many pensioners live in Hornsey and Wood Green Constituency. (5724)

Mid-year population estimates on pensioners are not available for Parliamentary Constituencies. I have therefore provided figures taken from the 2001 Census.

The table below shows the number of pensioners living in Hornsey and Wood Green Constituency on Census day (29 April 2001). The figures have been extracted from Table CAS002 on the CD supplement to the Census 2001 Census Area Statistics for Parliamentary Constituencies in England and Wales, which is available on request from Census Customer Services (census.customerservices@ons.gov.uk).

Pensioners living in Hornsey and Wood Green Constituency on Census day: 29 April 2001—England

	Number
All people	107,033
People of pensionale age[1]	13,039

[1] Pensionable age is 65 and over for males and 60 and over for females.
Source:
2001 Census Report for parliamentary constituencies

Lynne Featherstone: To ask the Chancellor of the Exchequer how many families in Hornsey and Wood Green *(a)* received (i) child tax credit and (ii) working tax credit and *(b)* were estimated to be entitled to each on the latest date for which figures are available; what

the average monthly payment was in the last month for which figures are available; and if he will make a statement. [5719]

Dawn Primarolo: On *(a)*, estimates of the number of in-work families (broken down by families with and without children) in each region, local authority and constituency with tax credits for 2003–04 awards after finalisation appear in the HMRC statistical publication "Child and Working Tax Credits Annual statistics. 2003–04 Geographical analyses." More recent provisional estimates for in-work families at selected dates in each such area appear in the publication "Child and Working Tax Credit Statistics Geographical Analysis." The estimates are based on samples and are subject to significant sampling uncertainty. Both publications can be found on the HMRC website at http://www.hmrc.gov.uk/stats/personal-tax-credits/cwtc-geog-stats.htm

On *(b)*, estimates of numbers of families entitled to child and working tax credits are not available at a regional level. Estimates of average awards on a monthly basis are also not available. Estimates of average payments in each region, local authority and constituency for 2003–04 awards to families with children at 5 April 2004 after finalisation appear in "Child and Working Tax Credits Annual statistics 2003–04 Geographical analyses." The estimates are based on samples and are subject to significant sampling uncertainty. This publication can be found on the HMRC website at the above address.

Lynne Featherstone: To ask the Chancellor of the Exchequer what the levels of long-term *(a)* adult and *(b)* youth unemployment were in Hornsey and Wood Green in each of the last eight years. [5720]

John Healey: The information requested falls within the responsibility of the National Statistician, who has been asked to reply.

Letter from Len Cook to Ms Lynne Featherstone, dated 21 June 2005:

As National Statistician, I have been asked to reply to your recent Parliamentary Question about unemployment in Hornsey and Wood Green in each of the last eight years. (5720)

Table 1 attached shows the numbers of long-term unemployed (over 12 months) and unemployed persons aged 16 to 24 resident in the Hornsey and Wood Green Parliamentary Constituency for each 12-month period ending in February each year from 1998 to 2004, the latest period for which data are available. This is based on annual local area Labour Force Survey data which, as with any sample survey, is subject to sampling variability.

ONS also compiles statistics of those claiming jobseeker's allowance (ISA) for local areas. Table 2 attached shows the annual average number of ISA claimants claiming for over 12 months and the number of claimants aged 18–24 resident in the Hornsey and Wood Green constituency for each year from 1997 to 2004. The data in Table 2 are published on the ONS's Nomis website www.nomisweb.co.uk.

Table 1: Unemployed people resident in the Hornsey and Wood Green constituency

Thousand

12 months ending February	*Youth (aged 16–24)*	*Over 12 month*
1998	1	n/a
1999	[1] —	2
2000	[1] —	1
2001	2	2
2002	1	1
2003	2	2
2004	1	1

n/a = Data not available.

[1] Zero or disclosive sample size.

Note:

These estimates are based on very small sample sizes and are subject to a very high degree of sampling variability. Changes from year-to-year, especially, should be treated with caution.

Jobcentre Plus Administrative system

Lynne Featherstone: To ask the Chancellor of the Exchequer how many people are in employment in Hornsey and Wood Green constituency; and how many were in employment in 1997. [5730]

John Healey: The information requested falls within the responsibility of the National Statistician, who has been asked to reply.

Letter from Len Cook to Ms Lynne Featherstone, dated 21 June 2005:

As National Statistician I have been asked to reply to your recent Parliamentary Question about employment in Hornsey and Wood Green Constituency. (5730)

The number of people in employment, resident in the Hornsey and Wood Green Constituency for the 12 months ending 2004, the latest available period, is estimated at 53,000. The most appropriate corresponding figure, for the 12 months ending February 1998 is 49,000.

These estimates are based on annual local area Labour Force Survey data which, as with any sample survey, is subject to sampling variability.

The data are published on the Office for National Statistics Nomis(r) website: www.nomisweb.co.uk

Economic Forecasts

Mr. Amess: To ask the Chancellor of the Exchequer what representations he has received from economic forecasting organisations concerning prospects for the UK economy over the next five years. [5931]

John Healey: I refer the hon. Gentleman to the answer I gave him on 6 June 2005, *Official Report*, column 300W.

Stewart Hosie: To ask the Chancellor of the Exchequer what plans he has to adjust his growth forecasts. [5133]

John Healey: The Government's latest assessment of economic prospects was set out in Budget 2005 (HC 372). This assessment will be updated in the next Pre-Budget Report.

Retail Sector (Interest Rates)

Stewart Hosie: To ask the Chancellor of the Exchequer what research he has evaluated on the effects of the level of interest rates on *(a)* retail sales and *(b)* the level of employment in the retail sector. [5132]

Mr. Ivan Lewis: Interest rate policy is the province of the Bank of England and it is not appropriate for the Government to comment on interest rate decisions taken by the independent Monetary Policy Committee. Commentary on the relationship between interest rates and the performance of the retail sector is contained in the Bank of England's May Inflation Report, (section 2.1, "Why has consumer spending growth slowed?").

IR35

Mr. Dismore: To ask the Chancellor of the Exchequer if he will assess the cost-effectiveness of IR35. [4854]

John Healey: The Intermediaries legislation, often referred to as IR35, is anti avoidance legislation and ensures that where individuals are working in a manner that would have been considered to be that of employment, had it not been for the use of an intermediary (such as a service company), they pay broadly the same amount of tax and NICs as a direct employee.

No data is held on administration and employment costs relating solely to this legislation as it is policed as part of HMRC's general employer compliance activity. HMRC does not routinely collect data in respect of specific types of employer obligations from the PAYE system. It is therefore not possible to isolate the increase in yield to the Exchequer arising from this legislation alone.

Iraq

Dr. Cable: To ask the Chancellor of the Exchequer what the Government's most recent estimate is of the cost of the British presence in Iraq in each month since the start of the conflict, broken down by *(a)* military and *(b)* reconstruction costs. [4061]

Mr. Des Browne: The Treasury does not estimate costs for Iraq in the manner requested.

The Chancellor set aside £3 billion in Budget 2003 to cover the cost of operations in Iraq. In the PBR 2003 the Chancellor announced the remaining £2 billion of this special reserve would be carried forward to 2003–04. A further £500 million was set aside for the financial year 2003–04 and-a further £820 million for 2004–05 as a prudent allowance to cover Iraq and our continuing international commitment to the war on terrorism. In Budget 2005, a further £340 million was added to the special reserve for 2004–05 and £400 million for the special reserve in 2005–06.

The Ministry of Defence drew down £847 million in 2002–03 and £1,311 million in 2003–04 to cover the net additional costs of operations in Iraq. They drew down a further £975 million for Operations in Iraq in Spring Supplementary estimates for 2004–05.

At the Madrid Donors' Conference in October 2003, the Government announced a total UK pledge of £544 million towards the reconstruction effort in Iraq, of which DFID committed £380 million to date.

Mr. Gummer: To ask the Chancellor of the Exchequer whether he has discussed with members of the Paris Club the implications for private individuals and small businesses of rescheduling Iraqi debt. [6235]

Mr. Ivan Lewis: The Saddam Hussein regime paid its creditors little or nothing since August 1990, when United Nations Security Council resolution 660 came into force. The Paris Club of official creditors negotiated a debt deal with the Iraqi Government in November 2004. This treatment sought to restore Iraq's debt sustainability and to tailor Iraq's future debt payment schedule to its capacity to pay. Iraq has committed to negotiate settlements with non-Paris Club creditors on terms comparable to the Paris Club deal. Private individuals and small businesses will therefore benefit from Iraq's new willingness to service as much of its debt as it can reasonably afford.

Mr. Gummer: To ask the Chancellor of the Exchequer what discussions he has had with members of the Paris Club regarding the rescheduling of the Iraqi debt since 21 November 2004. [6234]

Mr. Ivan Lewis: Officials have had a number of technical discussions regarding the implementation of the Paris Club's agreement with Iraq since 21 November 2004. All creditor positions are given in confidence.

Mr. Gummer: To ask the Chancellor of the Exchequer whether the Paris Club, while discussing the rescheduling of Iraqi debt, considered requiring the immediate payment in full to private individuals and small business creditors owed £250,000 or less. [6236]

Mr. Ivan Lewis: A core principle of the Paris Club is that all non-preferred creditors should bear their proportionate share of the costs of any debt reduction or rescheduling. The Saddam Hussein regime paid its creditors little or nothing since August 1990. Creditors of Iraq who are private individuals and small businesses will therefore benefit from Iraq's new willingness to service as much of its debt as it can reasonably afford.

Deaths

Dr. Iddon: To ask the Chancellor of the Exchequer how many deaths have been recorded in the last 30 years which are attributable to magic mushroom use. [6227]

John Healey: The information requested falls within the responsibility of the National Statistician, who has been asked to reply.

Letter from Len Cook to Dr. Iddon, dated 21 June 2005:

As National Statistician, I have been asked to reply to your recent Parliamentary Question asking how many deaths have been recorded in the last 30 years which are attributable to magic mushroom use. (6227)

Available figures relate to deaths where the underlying cause was poisoning and a particular substance was mentioned on the death certificate, not the total number of deaths where the use of the substance in question was a contributory factor. The most recently available information is for deaths in 2003. Figures are not available prior to 1993 as this is the earliest year for which textual information is held on the Office for National Statistics statistical deaths database. Figures are shown in the table below for the calendar years 1993 to 2003.

Number of deaths from drug-related poisoning,[1] where psilocybin was mentioned on the death certificate,[2] England and Wales, 1993 to 2003[3]

	Number of deaths
1993	1
1994	0
1995	0
1996	0
1997	0
1998	0
1999	0
2000	0
2001	0
2002	0
2003	0

[1] Cause of death was defined using the International Classification of Diseases, Ninth Revision (ICD-9) codes 292, 304, 305.2–305.9, E850-E858, E950.0-E950.5, E962.0 and E980.0-E980.5 for 1993 to 2000, and the International Classification of Diseases, Tenth Revision (ICD-10) codes F11-F16, F18-F19, X40-X44, X60-X64, X85 and Y10-Y14 from 2001 onwards.
[2] Drugs mentioned on the death certificate of a death where the underlying cause was drug poisoning.
[3] Data are for deaths occurring in each calendar year.

Steve Webb: To ask the Chancellor of the Exchequer how many deaths there were in NHS hospitals in each year since 1997, broken down by month. [5942]

John Healey: The information requested falls within the responsibility of the National Statistician, who has been asked to reply.

Letter from Len Cook to Mr. Steve Webb, dated 21 June 2005:

As National Statistician, I have been asked to reply to your recent Parliamentary Question asking how many deaths there were in NHS hospitals in each year since 1997, broken down by month. (5942)

The latest year for which figures are available is 2003. The number of deaths which occurred in NHS general hospitals within England and Wales are given in the table below by month for the years 1997 to 2003.

Number of deaths in NHS general hospitals by month of occurrence of death, England and Wales, 1997–2003

	1997	1998	1999	2000	2001	2002	2003
January	35,138	26,353	33,500	35,103	28,244	30,452	28,624
February	24,604	23,955	24,485	24,400	24,307	24,303	24,926
March	23,758	26,110	24,904	23,891	26,536	25,863	26,595
April	22,930	24,912	22,729	23,142	23,925	24,214	25,617
May	22,854	23,441	22,408	22,605	24,023	23,585	24,830
June	21,604	21,875	21,662	21,893	22,206	23,119	22,364
July	21,660	22,246	21,480	22,252	22,482	23,103	22,903
August	21,101	21,894	21,694	21,425	22,009	22,606	23,714
September	21,464	21,786	21,202	21,175	22,357	22,599	22,637
October	23,304	21,592	23,136	23,159	22,896	24,677	24,812
November	23,395	23,729	23,141	23,589	23,696	23,984	26,645
December	25,566	30,379	32,027	25,706	26,779	27,497	28,873
Total	287,378	290,272	292,368	288,340	289,460	296,002	302,540

Note:
Figures are for deaths occurring in the years 1997 to 2003.
Source:
Office for National Statistics.

Dr. Kumar: To ask the Chancellor of the Exchequer how many deaths have been recorded connected to the MRSA bug in Middlesbrough South and East Cleveland constituency in the last five years, broken down by age group. [5843]

John Healey: The information requested falls with the responsibility of the National Statistician, who has been asked to reply.

Letter from Len Cook to Dr. Ashol Kumar, dated 21 June 2005:

As National Statistician, I have been asked to reply to your recent Parliamentary Question asking how many deaths have been recorded connected to the MRSA bug in Middlesbrough South and Cleveland constituency in the last five years; and how old the victims were. (5843)

The latest year for which figures are available is 2003. Fewer than 5 deaths occurred in the five year period 1999 to 2003 to residents of Middlesbrough South and Cleveland constituency where MRSA was a contributory factor[1] As there were fewer than 5 deaths over this period an age breakdown cannot be provided.

[1] Identified using the methodology described in Griffiths C, Lamagni TL, Crowcroft NS, Duckworth G and Rooney C (2004) Trends in MRSA in England and Wales: analysis of morbidity and mortality data for 1993–2002. Health Statistics Quarterly 21,15–22.

National Insurance Records

Mr. Jim Cunningham: To ask the Chancellor of the Exchequer how many false national insurance records have been found in Coventry South in each year since 2000. [5171]

Dawn Primarolo: I refer the hon. Member to the answer I gave the hon. Member for Birmingham, Yardley on 6 June 2005, *Official Report*, column 294W.

Planning Gain

Mrs. Spelman: To ask the Chancellor of the Exchequer if he will make a statement on the Government's plans to introduce a planning gain supplement. [5580]

John Healey: As set out in the March 2005 Economic and Fiscal Strategy Report, the Government will respond to the recommendations in the Barker Review of Housing Supply later this year.

Population (London)

Lynne Featherstone: To ask the Chancellor of the Exchequer what the population of *(a)* London and *(b)* Greater London has been in each year since 1975. [6369]

John Healey: The information requested falls within the responsibility of the National Statistician, who has been asked to reply.

Letter from Len Cook to Lynne Featherstone, dated 21 June 2005:

As National Statistician I have been asked to reply to your recent Parliamentary Question concerning the population of *(a)* London and *(b)* Greater London in each year since 1975. (6369)

The attached table provides population estimates for Inner London, Outer London and Greater London. The population of Greater London (or London Government Office Region) is the sum of the populations of Inner London and Outer London.

Mid-year population estimates: 1975 to 2003

Thousands

	Inner London	*Outer London*	*Greater London*
1975	2,815.7	4,363.3	7,179.0
1976	2,755.5	4,333.6	7,089.1
1977	2,705.0	4,307.0	7,012.0
1978	2,658.4	4,288.4	6,946.8
1979	2,617.6	4,270.0	6,887.6
1980	2,587.4	4,263.2	6,850.6
1981	2,550.1	4,254.9	6,805.0
1982	2,520.8	4,244.2	6,765.1

Office for National Statistics

Primary Schools (Portsmouth)

Mr. Hancock: To ask the Chancellor of the Exchequer how many primary school-aged children there are expected to be in Portsmouth in each of the next five academic years. [5228]

John Healey: The information requested falls within the responsibility of the National Statistician, who has been asked to reply.

Letter from Colin Mowl to Mr. Mike Hancock, dated 21 June 2005:

The National Statistician has been asked to reply to your recent Parliamentary Question asking how many primary school age children there are predicted to be in Portsmouth for the next five academic years. I am replying in his absence. (5228)

Official 2003-based Subnational Population Projections for England were published by the Office for National Statistics in November 2004. Table 1 shows the projected mid-year population of 5–11 year olds for Portsmouth taken from these projections.

Table 1: Portsmouth projected population of primary[1] school age children

	Thousand
2005	14.4
2006	14.2
2007	13.9
2008	13.8
2009	13.7
2010	13.6

[1] Primary school age defined as 5–11 year olds

Regulation

Mr. Rob Wilson: To ask the Chancellor of the Exchequer what progress has been made in implementing the Better Regulation Task Force's recommendation of targets for the reduction in the amount of bureaucracy in his Department. [5651]

John Healey: The Chancellor of the Exchequer announced in Budget 2005 the Government's acceptance in full of the Better Regulation Task Force's recommendations. The Chancellor published a Better Regulation Action Plan on 24 May 2005 which sets out details of the actions that the whole of the Government, including the Treasury, will take to implement these recommendations, and to implement the recommendations of the Hampton Review of regulatory inspection and enforcement. This stated that targets to reduce the administrative burden of regulation will be set by the 2006 pre-Budget report following a detailed exercise to measure the burden on business of administering regulations.

Revenue and Customs

Mr. Rob Wilson: To ask the Chancellor of the Exchequer what steps are being taken to improve HM Revenue and Customs' internal processes for the repayment of overpaid taxes to *(a)* individuals and *(b)* businesses. [5416]

Dawn Primarolo: HM Revenue and Customs are regularly reviewing all their internal processes, including those relating to the repayment of overpaid taxes to individuals and businesses.

Tax Avoidance

Dr. Kumar: To ask the Chancellor of the Exchequer what steps he plans to take to prevent tax avoidance by the rich; and if he will make such steps a priority area for action by his Department. [5841]

Dawn Primarolo: For the tax system to be effective, everyone needs to pay their fair share of taxes. Tax avoidance undermines the ability of the tax system to deliver its objectives, imposing significant costs on society. The Government have always made it clear their determination to ensure that the tax system is fair and is seen to be fair. The Government have taken a series of steps to prevent abuse of the tax system including structural reforms that make the system less vulnerable, closing loopholes in the law and improving the way HM Revenue and Customs delivers its compliance function. Paragraphs 5.99 to 5.101 of the Budget 2005 Red Book set out a series of further steps to improve direct tax compliance, those measures are included in the Finance (No.2) Bill 2005.

Tax Overpayments

Dr. Cable: To ask the Chancellor of the Exchequer if he will estimate the total amount of overpayments for each tax for which information is available in each year since 1997; how much has since been repaid; and if he will make a statement. [6351]

Dawn Primarolo: HM Revenue and Customs do not have an estimate of the amount of tax overpaid.

Details of the amounts repaid by HM Revenue and Customs are shown in the trust statements, which are published as part of the departmental annual accounts. The annual accounts are available for access via the Internet on the HMRC website at www.hmrc.gov.uk/ or by purchase through The Stationery Office.

The Customs and Excise figures are broken down into repayments of value added tax, alcohol duties, hydrocarbon oils, tobacco, betting and gaming, insurance premium tax, air passenger duty, landfill tax, climate change levy, aggregates levy, customs duties and agricultural duties.

The Inland Revenue figures are broken down into repayments of income tax, capital gains tax, corporation tax, inheritance tax, stamp taxes and petroleum revenue taxes

Taxation

Mr. Rob Wilson: To ask the Chancellor of the Exchequer what plans he has for the freeze on *(a)* the company car levy, *(b)* corporation tax, *(c)* insurance premium tax, *(d)* air passenger tax and *(e)* capital gains tax implemented in his last Budget. [5394]

Dawn Primarolo: Details of changes in taxation were announced by the Chancellor at the Budget. The Government keep all taxes under review and any changes are considered and announced in the normal Budget process.

Mr. Gregory Campbell: To ask the Chancellor of the Exchequer how many persons in Northern Ireland were taxed on the basis of incomes of over £1 million a year before allowances *(a)* in the last year for which figures are available and *(b)* in each of the last 10 years. [5393]

Dawn Primarolo: Estimates of the distribution of taxpayers by income would usually be derived from the Survey of Personal Incomes, but it is not possible to provide reliable figures for Northern Ireland due to sample sizes.

Mr. Rob Wilson: To ask the Chancellor of the Exchequer how much Government revenue was raised from personal taxation in the Reading, East constituency in the last financial year for which figures are available. [5418]

Dawn Primarolo: Information on regional or sub-regional income tax revenue statistics is not available pending a review of National Statistics on income tax and personal incomes. Further details of the review can

be found on the HMRC website at the following page: http://www.hmrc.gov.uk/stats/income_tax/NS_Review.htm.

Published National Statistics on Parliamentary Constituencies can be found on the HM Revenue and Customs website: http://www.hmrc.gov.uk/stats/income_distribution/table-3-15.xls.

WORK AND PENSIONS

Benefit Claimants (Part-time Earnings)

Mr. Andrew Smith: To ask the Secretary of State for Work and Pensions how many people declared part-time earnings while claiming *(a)* jobseeker's allowance and *(b)* income support in each of the last five years. [5556]

Mr. Plaskitt: The information is in the following table.

Income support (IS) under 60 and income-based jobseekers allowance (JSA(IB)) recipients with income declared from part-time/self-employed part-time earnings: Great Britain

November	All IS/ JSA(IB)	IS	JSA(IB)
2000	111,000	80,900	30,100
2001	101,600	79,700	21,900
2002	97,400	77,600	19,800
2003	91,900	73,500	18,400
2004	77,400	64,200	13,200

Notes:
1. Figures have been rounded to the nearest 100.
2. Figures include claimants with part-time earnings and self-employed part-time earnings.
3. Figures include claimants in receipt of income-based JSA who would also be entitled to the contributory JSA element.
4. Figures are cases where the claimant or the partner declares part-time/self employed part-time earnings.
5. IS figures refer to cases where the claimant and partner (if applicable) are both under 60 i.e. figures exclude minimum income guarantee cases to be consistent with the IS figures post-October 2003.

Information Directorate, 5 per cent. samples

Pensions

Mr. Ian Taylor: To ask the Secretary of State for Work and Pensions what steps the Pension Service is taking to provide accurate pension forecasts. [4702]

Mr. Timms: The Pension Service provides State Pension forecasts based on the information held by Her Majesty's Revenue and Customs on an individual's National Insurance (NI) contribution record and, where appropriate, information provided by the customer when they request a forecast. A pension forecast, of any kind, is an estimate of future pension entitlement, not a guarantee.

The calculation of all pension forecasts is based upon current pensions legislation.

Mr. Crabb: To ask the Secretary of State for Work and Pensions whether the pensions regulator has inherited all the functions and duties previously undertaken by the Occupational Pensions Regulatory Authority and the Occupational Pensions Board. [4777]

Mr. Timms: Section 7 of the Pensions Act 2004 transferred all the existing functions of the Occupational Pensions Regulatory Authority (OPRA) to the Pensions Regulator with the exception of responsibility for the Pension Tracing Service which transferred to the Department for Work and Pensions on 6 April 2005.

As well as inheriting Opra's powers the Pensions Regulator will also have a range of new or increased powers to assist it in fulfilling its statutory objectives and functions as specified in the Pensions Act 2004—protecting members' benefits by making use of enhanced information-gathering powers to implement its risk-based approach to regulation.

The Occupational Pensions Board was replaced by the Occupational Pensions Regulatory Authority from 6 April 1997.

Social Security Office (Bournemouth)

Sir John Butterfill: To ask the Secretary of State for Work and Pensions what assessment he has made of the impact on *(a)* employees and *(b)* users of the Social Security Office in Cotlands Road, Bournemouth of its proposed closure as a processing centre; and if he will make a statement. [6124]

Margaret Hodge: The administration of Jobcentre Plus is a matter for the Acting Chief Executive, Leslie Strathie. She will write to the hon. Member.

Letter from Lesley Strathie to Sir John Butterfill, dated 21 June 2005:

The Secretary of State has asked me to reply to your question concerning the impact upon employees and customers, with regard to the decision taken not to locate a Benefit Processing Centre at the Social Security Office situated in Cotlands Road, Bournemouth. This falls within the responsibilities delegated to me as Acting Chief Executive of Jobcentre Plus.

It may be helpful if I explain that matters concerning the location of Benefit Processing Centres and the subsequent redeployment of staff are part of a nationally driven agenda to centralise benefit processing in 77 locations across the country. I can confirm that the management team for the Dorset and Somerset District are adhering closely to the Department for Work and Pensions Workforce Management Guidance' which provides a clear process to follow.

The Benefit Processing Management Team is currently working to re-deploy all staff in the vicinity. It is their expectation that there will be sufficient vacancies available within the Contact Centre sited in Poole, the Benefit Processing Centre to be located in Totton and in other government departments within the area. All staff will shortly have individual meetings with their line managers in order to discuss their own personal circumstances and needs, and to discuss any issues around relocation to other sites. Support for staff in coming to terms with the changes will be provided by Carefirst (soon to be replaced by Corecare from 1 July 2005) should it be required.

There is no expectation that the decision to locate benefit processing outside Bournemouth will have any adverse effect upon customer service. The processing centres will be providing 0845 local call rate numbers in order that customers are not disadvantaged by location, along with a 'freephone' number for Social Fund Crisis loan customers. Our face-to-face contact with customers will continued unchanged via the Jobcentre Plus Local Service Outlets.

You have my assurance that the decision taken not to base one of the 77 Processing Centres in Bournemouth was made following consideration of all of the facts and mindful of the impact upon both the staff and the customers at that location.

Bournemouth was not included in the list of those selected to deliver this service for several reasons. These include the difficulties identified with regard to estate issues, staff turnover rates and the re-deployment opportunities for benefit processing staff within the locality.

I hope this is helpful.

INTERNATIONAL DEVELOPMENT

Africa

Mr. Clappison: To ask the Secretary of State for International Development pursuant to the answer of 13 June 2005, *Official Report*, columns 2–3W, on Africa, if he will rank African countries according to the measure of relative poverty in his Department's financial model. [5147]

Hilary Benn: The Department for International Development uses a financial model to help inform decisions on bilateral aid allocation to its programmes in low-income countries in each region. The model takes account of both the extent of a country's poverty and the likely effectiveness of aid in reducing poverty there. The amount of aid which a country is likely to receive from other donors is also taken into account.

Within the part of the model that takes account of the extent of a country's poverty, gross national income per capita, converted to dollars using purchasing power parity rates, is used as a proxy indicator of relative poverty. This data is drawn from the World Bank's World Development Indicators database.

The following table ranks African countries according to this measure. Data is shown for 2003, the latest year for which information is currently available.

Country	*GNI per capita 2003 ($, PPP)*
Sierra Leone	530.00
Malawi	590.00
Tanzania	620.00
Burundi	630.00
Congo, Democratic Republic	660.00

World Development Indicators 2005

Algeria

Andrew Rosindell: To ask the Secretary of State for International Development how much aid the Government have given to Algeria since 1992. [5406]

Hilary Benn: From 1992–93 to 2004–05 inclusive, the Government have given Algeria £36.2 million in bilateral aid. This includes £34.4 million of CDC investments in 2003–04 when there were two large investments of £12 million and £19 million.

In addition, the UK's imputed share of EC aid to Algeria over the period 1992 to 2002 inclusive is £69.9 million.

Tsunami

Mr. Redwood: To ask the Secretary of State for International Development (1) how much of the Government's aid for victims of the Asian tsunami *(a)* has been spent and *(b)* remains held in reserve; [5206]

(2) how projects working with victims of the Asian tsunami may apply for funding from the aid allocated by the UK Government; [5208]

(3) if he will list the projects on which UK Government aid for the Asian tsunami has been spent; [5209]

(4) on what UK Government aid for victims of the Asian tsunami has been spent; and through which agencies. [5207]

Mr. Thomas: Nearly £67 million out of the £75 million allocated to meet immediate relief needs has been programmed through United Nations agencies, the Red Cross Movement and non-governmental organisations and DFID direct action. So far £60 million of this has been disbursed. The balance will be drawn down by the recipient agencies as needed. The balance of the £75 million allocation has been earmarked for disaster risk reduction initiatives in affected countries.

DFID has also allocated up to £65 million to meet reconstruction needs. These funds will be channelled through trust funds managed by the affected governments, as the best way to ensure an effective and

co-ordinated response to needs. Organisations wishing to apply for support to reconstruction projects should approach the relevant government department directly. As all of the money allocated to meet immediate relief needs has either been programmed or is committed, it is no longer possible for organisations to apply to DFID for this assistance. I have arranged for the document entitled 'A Breakdown of DFID's Immediate Relief Assistance in Response to The Indian Ocean Earthquake and Tsunami' to be placed in the Libraries of both Houses.

Colombia

Mr. Martyn Jones: To ask the Secretary of State for International Development if he will make a statement on the humanitarian situation in the Narino region of Colombia. [4982]

Mr. Thomas: DFID is aware of the displacement of around 1,000 people in Narino State over the past three months following fighting between security forces and illegal armed groups. DFID has consulted the United Nations high commission for refugees (UNHCR) about needs and possible support. The UNHCR are continuing to monitor the situation and while they have raised the need to improve the access of displaced to humanitarian assistance they have advised that at this time they are not appealing for funds.

Forests

Norman Baker: To ask the Secretary of State for International Development what net percentage of forest cover worldwide has been lost since 1990; and what acreage this represents, broken down by country. [4456]

Mr. Thomas: The net percentage of forest cover lost worldwide between 1990 and 2000 was 2.37 per cent. This represents the change in forest cover over the ten-year period to 2000 and is the most up-to-date global assessment of forest resources.

In terms of acreage, this represents a total worldwide loss in forest cover of 232, 214,811 acres (93,974,000 hectares).

Forest cover data for individual countries may be found in the Global Forest Resources Assessment 2000 main report. This is published by the Food and Agriculture Organisation of the United Nations and is available online via the following web link: http://www.fao.org/forestry/fo/fra/main/index.isp.

Please see as follows, a table summarising the current global data available for forest resources by region.

Forest resources by region

	Forest area 2000						*Area change 1990–2000 (total forest)*	
	Land area	*Natural forest*	*Forest plantation*	*Total forest*				
Region	*Ha*	*Ha*	*Ha*	*Ha*	*Percentage*	*Ha/capita*	*Ha/year*	*Percentage*
Africa	2,978,394	641,830	8,036	649,866	21.8	0.8	-5,262	-0.8
Asia	3,084,746	431,946	115,847	547,793	17.8	0.2	-364	-0.1
Europe	2,259,957	1,007 236	32,015	1,039,251	46.0	1.4	881	0.1
North and Central America and the Caribbean	2,136,966	531, 771	17,533	549,304	25.7	1.1	-570	-0.1
Oceania	849, 096	194,775	2,848	197,623	23.3	6.6	-365	-0.2
South America	1,754, 741	875,163	10,455	885,618	50.5	2.6	-3 .711	-0.4
Total world	13,063,900	3,682,722	186,733	3,869,455	29.6	0.6	-9,391	-0.2

Ministerial Meetings (EU Trade Commissioner)

Andrew George: To ask the Secretary of State for International Development what discussions he has had with the EU Trade Commissioner on *(a)* UK policy towards the G8 talks, *(b)* the UN Millennium Development Council, *(c)* trade talks during the UK's EU presidency and *(d)* the forthcoming World Trade Organisation's talks in China this December. [3635]

Hilary Benn: I have held discussions with both the Trade and Development Commissioners about the significance of trade for development, including our hopes for the G8 summit, the Millennium Review Summit and the World Trade Organisation Ministerial in December, where we will continue to work closely with the European Commission to achieve our shared objective, namely an outcome that delivers real development gains for the world's poor. The Department for International Development also has regular discussions with officials at all levels in the Trade Directorate, as well as those responsible for Trade issues in the Development and Agriculture Directorates.

Laptop Computers

Lynne Featherstone: To ask the Secretary of State for International Development how many laptop computers have been used by *(a)* Ministers, *(b)* special advisers and *(c)* officials in his Department in each year since 1995; how many have been (i) lost and (ii) stolen in that period; what the cost was of the use of laptops in that period; and if he will make a statement. [4119]

Mr. Thomas: DFID currently has 1,409 laptop computers currently in use. These are all allocated to officials, none are used by Ministers or special advisors.

DFID does not keep records of the number of laptop computers in use in previous years. The number of laptop computers purchased in each financial year since 1995 are as follows:

Financial year	*Laptops purchased*
1995–96	57
1996–97	185
1997–98	121
1998–99	125
1999–2000	148

Financial year	Laptops purchased
2000–01	265
2001–02	251
2002–03	734
2003–04	900
2004–05	270

The numbers of laptop computers lost and stolen in each financial year since 1995 are shown in the following table. All losses and thefts of IT equipment in DFID are investigated and reported according to Government accounting rules.

	Lost	Stolen
1995–96	0	2
1996–97	0	2
1997–98	0	2
1998–99	0	0
1999–2000	0	3
2000–01	0	8
2001–02	0	3
2002–03	2	7
2003–04	0	7
2004–05	0	4

Laptop computers are used as an integral part of the DFID IT systems. It is not possible to separate the cost of use of laptop computers from other IT costs.

Nicaragua

Tim Farron: To ask the Secretary of State for International Development what representations he has received concerning reports that the Nicaraguan Government has been allocating funds received from the IMF for poverty alleviation projects to service internal debts; and if he will make a statement. [4006]

Mr. Thomas: DFID's office in Nicaragua has received representations from representatives of Nicaraguan civil society about the use of funds from the International Monetary Fund (IMF) by the Government of Nicaragua.

The IMF does not finance specific projects. Rather, it transfers funds in support of an overall government budget that is consistent with agreements reached between that government and the IMF about what is needed to achieve economic stability and reduce poverty. The IMF's funds are merged with the government's own funds (e.g. tax revenue) and used to finance the planned expenditure as a whole, rather than any specific components.

At issue are the appropriate levels of domestic debt servicing by the Nicaraguan Government (GoN) and the adequacy of expenditure on items that help reduce poverty.

The representations made relate to two elements of GoN's internal debt:

(i) Government backed deposits in several banks that collapsed after fraudulent mismanagement a few years ago under the Arnoldo Aleman administration; and

(ii) bonds issued to pay US citizen property owners for property confiscated under the land reform of the 1980s.

Payment of these debts, and the associated legislation to enable stronger regulation of the banking sector, are required if Nicaragua is to be able to create a climate where sustained poverty reduction and economic growth can take place. Furthermore, they have not prevented the Government of Nicaragua from increasing expenditure on poverty reducing programmes from 10.8 per cent. of Gross National Product in 2003 to 12.2 per cent. in 2004. The Government's budget for 2005 continues this trend. However, the National Assembly have allocated increased expenditure to a range of subsidies, many of which do not reduce poverty, which threaten macro-economic stability and the Government's ability to maintain its plans to increase poverty reducing expenditure.

NORTHERN IRELAND

Audiologists

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland what plans there are to increase the number of audiologists in the Province. [5355]

Mr. Woodward: The recruitment of staff, including audiologists, is a matter for individual health and social services trusts taking into account factors such as service needs and available resources. However, during the 2003–04 financial year, the Department provided funding for additional audiologists and it has been confirmed that 14.5 additional posts were created and these have been filled.

The position will be monitored through the Department's ongoing work force planning mechanism.

Government Circulars

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland what equality impact assessment was conducted on Circular HSS (Gen) (2) 2005. [5248]

Mr. Woodward: Circular HSS (Gen) (2) 2005 was not subjected to an equality impact assessment. The information contained in that circular replicates the public holidays in Northern Ireland as published by the Department of Trade and Industry.

Community Hospitals

Lady Hermon: To ask the Secretary of State for Northern Ireland what plans he has to expand community hospital provision in Northern Ireland; and how much funding was provided to each community hospital in Northern Ireland in each of the past three years. [5499]

Mr. Woodward: The development of community hospital provision is central to our plans for the modernisation of hospital services. The new local hospital in Downpatrick is scheduled to open in 2008; business cases for new local hospitals in a number of other locations are being prepared. In addition we are taking forward plans to modernise the primary and community care infrastructure to improve further the quality and range of service available within local communities.

Departmental funding is allocated to health and social services boards under an agreed capitation formula, which recognises the healthcare needs of the populations within each board area. It is for boards to allocate their resources to meet health and social care priorities within their own board area. Details of allocations to specific community hospitals are not, therefore, collected centrally.

Complaints Procedure (NHS/Care Homes)

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland what the complaints procedure is for those in *(a)* private care homes and *(b)* NHS facilities in the Province. [5331]

Mr. Woodward: The information is as follows:

(a) Independent homes have a regulatory requirement to provide advice to all residents (including private residents) on how to make a complaint and who to contact outside the home if they remain dissatisfied. The complaints procedure for a resident placed in an independent home by an Health and Social Services Trust is the Health and Personal Social Services (HPSS) Complaints procedure entitled: "Complaints Listening . . . Acting . . . Improving: Guidance on Handling HPSS Complaints: Hospital and Community Health and Social Services" issued 2000.

(b) The same complaints procedure is available to a resident in a statutory home.

Creagh Youth Centre

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland how much the South Eastern Education and Library Board (SEELB) was paid by Castlereagh borough council for Creagh Youth Centre; and whether the SEELB has claimed the whole sum due to it from Castlereagh borough council. [5636]

Angela E. Smith: No capital monies have yet been paid by Castlereagh borough council to the South-Eastern Education and Library Board for Cregagh Youth Centre and, therefore, their full contribution of £400,000 towards total capital costs of approximately £800,000 remains outstanding.

Digital Hearing Aids

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland what the cost of providing a digital hearing aid on the NHS in the Province is, broken down by *(a)* assessment, *(b)* fitting, *(c)* follow-up and *(d)* purchase of the aid. [5351]

Mr. Woodward: The information requested is not held centrally and could be obtained only at disproportionate cost.

Early-years Education

Sammy Wilson: To ask the Secretary of State for Northern Ireland how many free *(a)* nursery and *(b)* pre-school places were available for (i) three and (ii) four-year-olds in the Province in each of the last five years. [5304]

Angela E. Smith: The number of places in the statutory nursery and voluntary/private sectors in each of the last five academic years was as follows:

Academic year	*Nursery places*	*Voluntary/private places*
2000–01	12,148	4409
2001–02	13,292	6000
2002–03	14,280	6034
2003–04	14,280	6093
2004–05	14,150	5968

Pre-school places in the statutory sector are, as has been the case since the early 1970s, open to children from two-years-old to the lower limit of compulsory school age. In all cases, however, applications from children in their immediate pre-school year are given priority ahead of younger children. The funded provision secured in the voluntary/private sector is only open to children in their immediate pre-school year (children aged between three-years and two-months and four-years and two-months). The regulations made by the Department of Education require providers, in allocating funded pre-school places, to give priority to specified target groups. One of the specified target groups is the oldest children in the final pre-school cohort (those with July and August birthdays) who are the only children who are actually aged four when they enter their final pre-school year.

English as an Additional Language

Lady Hermon: To ask the Secretary of State for Northern Ireland if he will earmark specific funding for the delivery of English as an Additional Language service. [5523]

Angela E. Smith: Each of the five Education and Library Boards (ELBs) has already received earmarked funding from the Department on a per capita basis to help meet the needs of pupils in respect of English as an Additional Language (EAL). The Department's total earmarked budget is £420,000 for the 2005–06 financial year.

In addition, DE has increased overall EAL funding, by introducing in 2005–06 within the Local Management of Schools (LMS) Common Funding Formula a specific factor which provides support to schools for each EAL pupil. This factor provides some £1.7 million to schools across the five ELBs in recognition of the additional costs associated with EAL pupils which are encountered at school level. It is designed to enhance the level of support for EAL pupils. This forms part of the total funding made available to all schools under the LMS delegated funding arrangements and decisions on how to use this funding are a matter for individual Boards of Governors.

Invest Northern Ireland

Mr. Gregory Campbell: To ask the Secretary of State for Northern Ireland how many employees working for Invest Northern Ireland are in pay bands of *(a)* £70,000 and over, *(b)* £50,000 to £70,000, *(c)* £30,000 to £50,000 and *(d)* under £30,000 per annum. [5547]

Angela E. Smith: Invest NI staff fall into the following salary bands:

Salary bands	*Number of staff*
(a) £70,000 and over	6
(b) £60,000-£70,000	3
(c) £50,000-£60,000	15
(d) £40,000-£50,000	61
(e) £30,000-£40,000	159
(f) £20,000-£30,000	161
(g) Under £20,000	261

Salaries for part-time staff (of whom there are 54) have been shown as the full time equivalent.

Invest NI also engages a varying number of contracted staff, in its overseas offices and to deliver specific programmes in Northern Ireland. These currently number 44 and are separately funded. Invest NI has the following number of contracted staff in each of the salary bands:

	Number of contracted staff
(a) £70,000 and over	1
(b) £60,000-£70,000	0
(c) £50,000-£60,000	2
(d) £40,000-£50,000	7
(e) £30,000-£40,000	10
(f) £20,000-£30,000	11
(g) Under £20,000	13

Language, Culture and Heritage Funding

Mr. Dodds: To ask the Secretary of State for Northern Ireland what public sector funding has been allocated to promote *(a)* Ulster Scots and *(b)* Irish Gaelic (i) language, (ii) culture and (iii) heritage in each year since 2001. [5349]

Mr. Hanson: The Department of Culture, Arts and Leisure (DCAL) jointly funds the Ulster-Scots Agency and Foras na Gaeilge, the Irish Language Agency. The Ulster-Scots Agency has a statutory remit to promote Ulster-Scots language and culture. Foras na Gaeilge has a statutory remit to promote the Irish language.

The budgets allocated to the Ulster-Scots Agency and Foras na Gaeilge by DCAL since 2001 are detailed in the following table.

£ million

Budget (STG)	*Foras na Gaeilge (Irish Language Agency)*	*Tha Boord o Ulster-Scotch (Ulster-Scots Agency)*
2001	2.53	0.97
2002	2.64	1.07
2003	2.850	1.155
2004	3.224	[1]1.277
2005	3.242	1.327

[1] The Ulster-Scots Agency received additional funding of £60,000 in 2004 from DCAL.

Note:
These figures are based on the calendar year.

Estimated funding for the Irish Language Broadcasting fund and Ulster-Scots Academy for 2005 is detailed in the following table.

2005

	Estimate (£)
Irish Language Broadcast Fund	3,000,000
Ulster Scots Academy	500,000

Funding is also available from departmental mainstream programmes for projects, which may have an Irish or Ulster-Scots language or culture dimension, which cannot be separated from the primary funding objectives.

ME

Mr. McGrady: To ask the Secretary of State for Northern Ireland if he will provide funding for biomedical research into myalgic encephalomyelitis. [5740]

Mr. Woodward: Research into diseases like myalgic encephalomyelitis needs to be undertaken in specialised centres of excellence and co-ordinated at the national level. The R and D strategy for the health and personal social services, in common with other NHS R and D strategies, do not generally allocate funds for this type of research, but funding for research into myalgic encephalomyelitis has been made available from sources such as the Medical Research Council.

NHS Direct

Lady Hermon: To ask the Secretary of State for Northern Ireland what recent steps he has taken to extend NHS Direct to Northern Ireland. [5501]

Mr. Woodward: In Northern Ireland each of the four health and social services boards currently operate their own daytime telephone advice line. Out-of-hours providers for which each board is responsible deliver access to advice and services outside normal office hours. The Department is working with the four boards to consider further development of these services on a regional basis.

NHS Staff Assaults

Lady Hermon: To ask the Secretary of State for Northern Ireland *(a)* how many incidents of violence were recorded against NHS staff in Northern Ireland in the last year for which figures are available, and *(b)* how many people were prosecuted as a result. [5510]

Mr. Woodward: The information is as follows:

(a) There were 5,449 violent incidents against staff employed in the health and personal social services between 1 April 2004 and 31 March 2005.

(b) Seven people were prosecuted as a result of these incidents and four prosecution cases are pending.

Obesity

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland what percentage of *(a)* males and *(b)* females in the Province are assessed as (i) obese and (ii) overweight. [5330]

Mr. Woodward: The 1997 Northern Ireland Health and Social Wellbeing Survey provides the most recent estimate of overweight and obesity levels among adults aged 16-plus in Northern Ireland. The survey found that

48 per cent. of men and 32 per cent. of women were overweight, while a further 17 per cent. of men and 20 per cent. of women were obese. When combined, the survey found that 65 per cent. of males and 52 per cent. of females were either overweight or obese.

Olympic Bid

Lady Hermon: To ask the Secretary of State for Northern Ireland what discussions he has had with the Secretary of State for Culture, Media and Sport about the role Northern Ireland would play should the London bid to host the Olympic Games in 2012 be successful. [5515]

Mr. Hanson: There is regular liaison with the Department of Culture, Media and Sport (DCMS) in support of the London Bid and to maximise the opportunities for Northern Ireland who are also represented in the Nations and Regions Committee.

Lady Hermon: To ask the Secretary of State for Northern Ireland what assessment he has made of how Northern Ireland may benefit should the London bid to host the Olympic games in 2012 be successful. [5516]

Mr. Hanson: If London wins the bid to stage the Olympic and Paralympic games in 2012 it will have the potential to leave a lasting legacy of community facilities across the UK and inspire greater participation in sport.

The whole of the UK, including Northern Ireland, could also anticipate benefits through volunteering, hosting of pre-games preparation camps, increase in tourism, increased awareness of the benefits of participating in sport, economic and business procurement opportunities. I would also hope that competitors from Northern Ireland would participate in the games.

In Northern Ireland a Regional Co-ordinating group has been established to raise awareness of the bid and to consider how to maximise benefits arising from a successful bid.

Education (Out-of-school Provision)

Mr. Dodds: To ask the Secretary of State for Northern Ireland what proposals he has to support out-of-school provision in Northern Ireland. [5956]

Lady Hermon: To ask the Secretary of State for Northern Ireland what plans he has to allocate funding for the expansion of out-of-schools provision in Northern Ireland. [5529]

Angela E. Smith: There are no mainstream funds available to support an out-of-schools programme in Northern Ireland; such support could only be made from within the Northern Ireland block and at the expense of other services including mainstream classroom funding.

My Department is, however, pursuing a number of developments along similar lines, such as full service (extended) schools, education action zones and provision within the Belfast Board area that will be supported through the Integrated Development Fund. All these envisage schools as the learning hubs of their communities, supporting and encouraging provision throughout the extended school day. Breakfast clubs, homework clubs, sports and a range of other activities are already offered in many schools before and after school hours.

Under the PEACE II Programme extension 2004–06 out of school childcare provision and other activities can continue to be supported under Measure 1.5, Positive Action for Women.

Parades Commission

Lady Hermon: To ask the Secretary of State for Northern Ireland how much it has cost to operate the Parades Commission in each year since its formation. [5519]

Mr. Woodward: This information is readily available in the annual reports of the Parades Commission, which are available in the Library, or alternatively can be downloaded from the Parades Commission website, www.paradescommission.org, and detail the Commission's operating costs for each year since its inception.

Police Service

Lady Hermon: To ask the Secretary of State for Northern Ireland what the earliest date is by which he expects to be able to end the 50:50 recruitment procedure for entry into the Police Service of Northern Ireland. [4832]

Mr. Woodward: In line with the recommendations of the Independent Commission on Policing, it is our aim to achieve, by 2010–11, a composition within the PSNI regulars which includes 30 per cent. from a Catholic community background. I am happy to say that we are well on target to reach this goal.

The 50:50 recruitment provisions are subject to triennial review with the current order allowing for their continuation until 30 March 2007. Their renewal will be subject to a widespread consultation process and debates in both Houses.

Mr. Gregory Campbell: To ask the Secretary of State for Northern Ireland if he will take steps to ensure that people employed by the Police Service in Northern Ireland as cleaning staff have the same terms and conditions of service after the review of cleaning services is concluded. [5546]

Mr. Woodward: The terms and conditions of service of cleaning staff is a matter for the chief constable however I am assured that the outsourcing of this function will be managed within the TUPE framework.

Pupil Behaviour

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland how many children are defined as having behavioural problems in the South East Education and Library Board area; and if he will make a statement. [5327]

Angela E. Smith: There were 1,477 children on special educational needs registers with emotional and behavioural difficulties attending schools and pre-school centres in the South Eastern Education and Library Board area in 2004–05.

Information about the number of pupils with behavioural problems who fall below the threshold for inclusion on a school's special educational needs register is not held centrally. However, support for pupils into this category will be re-considered shortly. The Department is awaiting a report from Education and Training Inspectorate (ETI), on the operation and effectiveness of the Boards' Behaviour Support teams, which were established in 1998–99 to support schools in managing this group of pupils. The findings will inform a decision on the future direction of this service and whether a major review is necessary.

The ETI issued another report in 2004 on "Provision for Pupils with Severe Learning Difficulties and Persistent and Challenging Behaviours in Special Schools in NI", which highlighted problems in this area. DE has subsequently made available additional resources to the Boards to help address these issues.

Road Building

Lady Hermon: To ask the Secretary of State for Northern Ireland how many new road building projects in Northern Ireland are scheduled for the next five years; and what the anticipated cost of the construction is. [5528]

Mr. Woodward: The Chief Executive of Roads Service (Dr. Malcolm McKibbin) has been asked to write to the hon. Lady, in response to this question.

Letter from Malcolm McKibbin to Lady Hermon, dated 21 June 2005:

You recently asked the Secretary of State for Northern Ireland a Parliamentary Question regarding "how many new road building projects in Northern Ireland are scheduled for the next five years; and what the anticipated cost of the construction is."

I have been asked to reply as this issue falls within my responsibility as Chief Executive of Roads Service.

Roads Service defines major road projects as those where the scheme costs are estimated to exceed £1.0m. These schemes are referred to as Strategic Road Improvements (SRIs). Roads Service manages the delivery of SRIs through the following programmes:

Construction Programme—Schemes already under construction.

Preparation Pool—High priority schemes that Roads Service is committed to progressing through the statutory procedures of Environmental Appraisal, Direction Order (equivalent to planning approval) and Land Vesting. Preparation Pool schemes are expected to be implemented within the next 5 years or so (subject to clearing the statutory procedures, having a satisfactory economic appraisal and the availability of funds at the time).

Forward Planning Schedule—Schemes that perform well when assessed at feasibility stage and which are expected to be implemented within the next 10 years or so (subject to clearing the statutory procedures, having a satisfactory economic appraisal and the availability of funds at the time).

Therefore, schemes currently held in the Preparation Pool are the most likely to be implemented within the next 5 years (subject to clearing the statutory procedures, having a satisfactory economic appraisal and the availability of funds at the time). The table attached presents brief details of the 22 schemes currently held in the Preparation Pool, the cost of which is estimated to cost £476.7m.

I hope this information is helpful.

Major works preparation pool June 2005

Scheme name	*Description*	*Estimate (£ million)*
M1/Westlink	Widen 4.0 km M1 motorway and Westlink to 3 lanes in each direction with 2 new grade separated junctions	75.0
M2 Crosskennan slips	2No. on-slips onto M2 at Antrim Area Hospital	2.0
M2 Widening (Sandyknowes to Greencastle)	Additional lane on the Belfast bound carriageway from Sandyknowes Junction to Greencastle interchange, also 3 lanes through Greencastle interchange in northbound direction, includes replacement of 3No. overbridges	29.0
A1 Beechill to Cloghogue	12.1 km dual carriageway with GS junctions	102.0
A1 Junctions	4No. compact grade-separated junctions at Hillsborough, Dromore, Banbridge and Loughbrickland	16.0
A4 Dungannon to Ballygawley Dualling	20.5 km dual carriageway between Dungannon (end of dual carriageway) and Ballygawley roundabout, including 6 grade-separated junctions	102.0
A4/A5 Improvements	A4 Annaghilla—3.2 km single carriageway realignment; A5 Tullyvar—3.1 km single carriageway realignment	15.7
Cairnshill Park and Ride	Provision of 700–800 space park and ride site with terminus building	10.0
Skeoge Link (revised), Londonderry	1.9 km four-lane carriageway link road	[1]5.3
A6 Dualling (M22 to Castledawson Roundabout)	12.6 km dual carriageway either side of Toome Bypass	[2]34.02
A20 Frederick Street Link, Newtownards	0.3 km single carriageway link road	1.1
A2 Broadbridge Dualling	6.75 km dual carriageway between Maydown Roundabout and City of Derry Airport	[2]19.8
A32 Cherrymount Link	1.1 km single carriageway link road	3.8
A4 Henry Street/Sligo Road Enniskillen	Additional traffic lane on approach to junction	1.1
A55 Knock Road, Belfast	0.62 km four lane carriageway between Clarawood and Kings Road	4.3
A514 Crescent Link, Londonderry	1.9 km dual carriageway (completing the dualling of Crescent Link)	4.6
A29 Carland Bridge	1.3 km single carriageway realignment	4.0
A20 Newtownards Southern Distributor	2.0 km link road from Blair Mayne Road South to Comber Road to Portaferry Road	[1]1.5

Major works preparation pool June 2005

Scheme name	*Description*	*Estimate (£ million)*
A5 Strabane Bypass Stage 3	1.0 km single carriageway bypass extension	2.9
A26/M2 Ballee Road East	1 .5 km of dual carriageway with two slip roads	6.1
A3 Armagh North and West Link Road	3.8 km single carriageway link road to the Portadown Road	15.4
A2 Shore Road	2.4 km four-lane carriageway from Jordanstown to Greenisland.	21.1
Total cost of Preparation Pool schemes	476.7	

[1] Scheme estimate excludes developer contribution.
[2] Scheme estimate at 2002 prices—under revision.

School Buildings

Mr. Dodds: To ask the Secretary of State for Northern Ireland how much investment in new school building in Northern Ireland there has been in each year since 1997. [5433]

Angela E. Smith: Since 1997, 201 major capital projects with an estimated capital cost of £1,044 million, have been announced for schools throughout Northern Ireland. This investment has been provided for the building of new schools, for major extensions and refurbishments of schools and for site purchase, where necessary. The figures represent the estimated capital costs of both conventionally funded and Public Private Partnership schemes and the spending takes place over a number of years following the announcement. The total investment is as follows:

	Projects	*£ million*
1997	10	23.1
1998	11	63.2
1999	16	67.1
2000	18	72.2
2001	29	158
2002	31	167.6
2003	43	270.8
2004	43	222.2
Total	201	1,044.2

A further sum of £55.6 million has been invested since 1997 for the construction and development of new Grant Maintained Integrated schools. A breakdown of the funding that was spent in each year is as follows:

	New schools	*£ million*
1997	3	7.7
1998	2	10.5
1999	2	11.4
2000	1	8.6
2001	0	2.0
2002	2	5.0
2003	1	7.2
2004	1	3.2
Total	12	55.6

School Exclusions

Sammy Wilson: To ask the Secretary of State for Northern Ireland how many pupils were excluded from schools in the Province in each of the last 10 years; and what the reasons were. [5306]

Angela E. Smith: The information that the Department holds about the number of pupils expelled and suspended from schools is as follows:

Number

	Expulsions	*Suspensions*
1995–96	62	n/a
1996–97	79	n/a
1997–98	80	n/a
1998–99	73	n/a
1999–2000	83	n/a
2000–01	80	4,740
2001–02	76	5,099
2002–03	70	5,282
2003–04	71	5,485

The reasons for suspension have been collected from 2002–03 school year and for expulsions from 2003–04 school year. Both sets of information are available on the Department's website at www.deni.gov.uk/facts_figures/education_stats/index_other.htm. However, the detailed suspension data for 2003–04 submitted by one of the five Education and Library Boards has still to be fully analysed. When this has been done in the near future, the information on the website will be updated.

Mr. Dodds: To ask the Secretary of State for Northern Ireland what the criteria are for determining eligibility for interface funding for schools in North Belfast. [5432]

Angela E. Smith: The criteria for selecting schools to receive funding was restricted to a small number of schools in the area which had been most affected by community difficulties, including on occasions violent incidents against both pupils and the school environment.

Small Businesses

Lady Hermon: To ask the Secretary of State for Northern Ireland how many small businesses given start-up funding by his Department in each of the past five years have since ceased operation. [5512]

Angela E. Smith: During the past five years, 746 businesses were offered start-up assistance, through schemes directly provided by Invest NI, and its predecessor agency the Local Enterprise Development Unit (LEDU). Of these, 57 are recorded by Invest NI to have ceased trading. The detail by year is presented in Table 1:

Table 1: Number of business starts offered assistance directly by Invest NI, and LEDU

	Businesses offered start-up assistance	*Number ceased trading*
2000–01	171	18
2001–02	165	19

Table 1: Number of business starts offered assistance directly by Invest NI, and LEDU

	Businesses offered start-up assistance	*Number ceased trading*
2002–03	149	16
2003–04	144	4
2004–05	117	0
Total	746	57

In addition to these, there were 10,895 new businesses provided with assistance through the Start a Business Programme (SABp) jointly administered by Invest NI and Enterprise Northern Ireland. Details for each year are provided in Table 2:

Table 2: Number of businesses assisted through the SABp

	Businesses assisted through the Start a Business Programme	*Ceased trading estimate*
2000–01	1,203	193
2001–02	1,269	203
2002–03	1,983	317
2003–04	2,637	422
2004–05	3,803	n/a
Total	10,895	1,135

Evidence provided by a recent evaluation of the programme indicates that 1,135 of those assisted up to March 2004, will have ceased trading. Figures for 2004–05 are not yet available.

South Eastern Education and Library Board

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland how many job losses among *(a)* administration staff, *(b)* school crossing patrol personnel, *(c)* classroom assistants, *(d)* teachers and *(e)* other ancilliary staff will be incurred within the South Eastern Education and Library Board Area due to the cutbacks the board have initiated; and if he will make a statement. [4071]

Angela E. Smith: Verifiable information is not available at this stage.

Special Educational Needs

Sammy Wilson: To ask the Secretary of State for Northern Ireland what the primary causes of need of children in the Province with special educational needs are. [5307]

Angela E. Smith: The most prevalent causes of need in 2004–05 are as follows:

	Number of children
Moderate Learning Difficulties	20,295
Speech and Language Difficulties	8,825
Emotional and Behavioural Difficulties	6,942
Dyslexia	3,837
Physical Disability	2,244

Voluntary and Community Group Funding

Mr. Dodds: To ask the Secretary of State for Northern Ireland what measures he is taking to place the funding of voluntary and community groups and organisations on a more long-term and sustainable basis. [5348]

Mr. Hanson: A number of Government initiatives have already moved to longer-term strategic investment in communities. "Positive steps", Government's response to the report of the Task Force on Resourcing the Voluntary and Community Sector, gives a commitment that

> "Government would actively promote a longer-term (7–10 year) outcome focused approach to programmes that significantly involve the voluntary and community sector."

This move towards longer-term investment will require change both within Government and in the voluntary and community sector. To help the voluntary and community sector with this change, I have established a "Modernisation Fund" to promote change and strengthen the service delivery role of organisations. In addition, funding will be made available to support capital projects delivered through the voluntary and community sector which will help develop the physical infrastructure and asset base of the sector improving delivery of services on a more sustainable basis.

The Department for Social Development (DSD), through its "People and Place" Neighbourhood Renewal Strategy, is providing a framework for a longer-term, seven-ten year, approach to delivering strategic objectives. However, longer-term outcome focussed funding will take time to achieve and needs to be considered in the context of the budgetary planning process. DSD monitor and evaluate performance in moving towards longer-term outcomes with regular reviews at least every three years.

DSD continues to provide ongoing support to the voluntary and community sector this amounts to over £40 million across the next three years.

Hospital Waiting Times

Mr. McGrady: To ask the Secretary of State for Northern Ireland what action is being taken to reduce waiting times for *(a)* orthopaedic and *(b)* orthodontic procedures in Northern Ireland. [5739]

Mr. Woodward: While there has been some progress to reduce waiting times for orthopaedic and orthodontic procedures, I am still concerned at the length of time patients have to wait in Northern Ireland and I am currently considering actions to address this. I hope to make an announcement on this shortly.

Walk-in Health Centres

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland what plans he has to introduce walk-in health centres in Northern Ireland; and if he will make a statement. [5335]

Mr. Woodward: The functions of NHS walk-in centres, as established in Great Britain, will be provided in Northern Ireland by health and care centres, which bring together a range of primary and community-based care services into a 'one stop shop', and local hospitals, as defined in "Developing Better Services". Work is

currently in progress on the building of three of these centres in Belfast. Plans for a network of similar centres across Northern Ireland are currently being developed by HSS boards and trusts.

HEALTH

Ambulances (CCTV)

Steve Webb: To ask the Secretary of State for Health which ambulance trusts use CCTV inside *(a)* all and *(b)* some of their ambulances. [4402]

Jane Kennedy: The information requested is not collated centrally.

Anti-depressants

Mr. Hancock: To ask the Secretary of State for Health what percentage of patients under the age of 18 years have been prescribed anti-depressants in each of the last 10 years. [4524]

Jane Kennedy: Data from the Prescription Pricing Authority indicates that, in 2004, 192,000 prescription items were dispensed in the community in England for antidepressant drugs to children under 16 and young people aged 16 to 18 in full-time education. Data is not collected on the number of people for whom these prescriptions were dispensed, nor the proportion which they represent.

Mr. Hancock: To ask the Secretary of State for Health what advice she has issued on the prescribing of anti-depressants to *(a)* children and *(b)* adolescents. [4633]

Jane Kennedy: No anti-depressant is currently licensed for the treatment of depressive illness in children or adolescents under 16 years of age.

Based on the work of its expert working group on the selective serotonin reuptake inhibitors (SSRIs), the committee on safety of medicines (CSM) issued advice on the use of SSRIs in children and adolescents in June, September and December 2003. That advice was that the balance of risks and benefits for the treatment of depressive illness in under-18s is judged to be unfavourable for paroxetine (Seroxat), venlafaxine (Efexor), sertraline (Lustral), citalopram (Cipramil), escitalopram (Cipralex) and mirtazapine (Zispin). It is not possible to assess the balance of risks and benefits for fluvoxamine (Faverin), due to the absence of paediatric clinical trial data. Only fluoxetine (Prozac) has been shown in clinical trials to be effective in treating depressive illness in children and adolescents, although it is possible that, in common with the other SSRIs, it is associated with a small increased risk of self-harm and suicidal thoughts. Overall, the balance of risks and benefits for fluoxetine in the treatment of depressive illness in under-18s is judged to be favourable. This advice was reiterated in December 2004, when the report of the expert working group was published.

The National Institute for Health and Clinical Excellence is developing a guideline on the identification and management of depression in children and young people in primary, community and secondary care, which is due to be published in September 2005.

Barnet Hospital

Mr. Dismore: To ask the Secretary of State for Health if she will make a statement on performance against targets for accident and emergency waiting times at Barnet hospital in *(a)* 2004–05 and *(b)* the last month. [3265]

Jane Kennedy: The information is not available in the format requested. Performance figures for Barnet and Chase Farm Hospital National Health Service Trust for 2004–05, giving the percentage of patients who spend less than fours hours in accident and emergency, are shown in table 1.

Table 1

Quarter	*Percentage*
1	90.3
2	92.7
3	90.7
4	93.3

The overall percentage for 2004–05 is 91.7.

These are the latest figures available.

These figures include a proportion of accident and emergency services which are provided by its partner primary care trust (PCT). 73 per cent. of Barnet PCTs performance is mapped to Barnet and Chase Farm Hospital NHS Trust.

Table 2 shows the performance of the trust against various targets.

The NHS target requires that at least 98 per cent. of patients spend four hours or less from arrival to admission, transfer or discharge from the end of 2004. The trust did not meet this target.

A capital incentive scheme was launched in January 2004. Under this scheme, each trust that meets the five thresholds identified can access payments of up to £0.5 million. Four of these thresholds were in 2004–05. The performance requirements for each threshold are shown in table 2.

Table 2

Threshold (percentage)	*Quarter*	*Amount (capital) (£)*
Average		
95	Q1	100,000
96	Q2	100,000
97	Q3	100,000
98	Q4	100,000

Therefore, the trust did not meet any of the thresholds.

For the purpose of performance indicators, the Healthcare Commission set a target of 90 per cent. for the first three quarters of 2004–05. The trust met this target.

Cancer Mortality

Mr. Baron: To ask the Secretary of State for Health what progress the Government have made towards the

2004 public service agreement target to reduce cancer mortality in people under 75 years by at least 20 per cent. [5823]

Ms Rosie Winterton *[holding answer 20 June 2005]:* We are on course to meet the target by 2010. The latest information, for the three years from 2001 to 2003, shows a 12.2 per cent. reduction in mortality rates in people under 75 years against the 1995–97 baseline.

Clinical Trials Directive

Mr. Brady: To ask the Secretary of State for Health (1) what assessment her Department has made of the effect that the Clinical Trials Directive has had on the length of time taken for clinical trials to be approved; [3262]

(2) what assessment her Department has made of the effect that the Clinical Trials Directive has had on the volume of paperwork and administrative work which has to be completed and submitted by researchers before a project is approved; [3263]

(3) under what procedure researchers wishing to conduct a clinical trial can have their application for approval fast-tracked by her Department. [3264]

Jane Kennedy: The Medicines for Human Use (Clinical Trials) Regulations 2004 (SI 2004 No. 1031) that implement the European Union Clinical Trials Directive 2001/20/EC in the United Kingdom came into force on 1 May 2004.

The regulations provide a statutory basis for the regulation of the commencement and conduct of clinical trials of medicines. Most of the provisions were part of existing UK clinical trials regulation. The regulations require a positive opinion from an ethics committee and an authorisation issued by the Medicines and Healthcare products Regulatory Agency (MHRA).

To achieve this, the regulations provided for the UK Ethics Committee Authority to recognise ethics committees and oversee the ethics review system. The regulations also provide for a single UK-wide opinion for multi-centre studies and set a defined time period—60 days—and restrict previous time-consuming reiteration of correspondence passing between applicant and committee. This has streamlined previous procedures while reinforcing the protection of research subjects. Throughout the first year of these regulations UK ethics committees have operated well within the 60-day target.

The regulations shortened MHRA's statutory response times to 30 days from 35 days and the Government agreed a pharmaceutical industry competitiveness task force performance target for response to applications for phase I trials of a mean of 14 days, with a maximum of 21 days. In the first year following implementation, the MHRA has met its deadline of 14 days for phase I applications and of 30 days for all other applications. The MHRA has no additional application process.

For regulatory approval for pharmaceutical company trials, the documentation required under the new legislation is similar to that required under the previous system. Non commercial researchers have a simplified application procedure requiring an application form and protocol and minimal supporting data. This is similar to the procedure before the clinical trials regulations came into force. The new application form is the same for all types of trial and has been designed to avoid unnecessary bureaucracy. It uses check boxes rather than free text and typically takes 20 to 30 minutes to complete.

Clostridium Difficile

Tim Loughton: To ask the Secretary of State for Health how many NHS patients have been *(a)* infected with and *(b)* died from the *clostridium difficile* bacteria in each of the last five years. [4460]

Jane Kennedy: Complete information on the number of patients with *clostridium difficile* infections in the last five years are not available, but reports made under the Health Protection Agency's (HPA) voluntary reporting scheme are shown in table 1.

Table 1: Voluntary reports of clostridium difficile infections diagnosed from faecal specimens for England, Wales and Northern Ireland

	Number of reports
2000[1]	20,556[2]
2001	22,008[2]
2002	28,986[2]
2003	35,537[2]
2004	43,672[2]

[1] 2000-England and Wales only.
[2] Provisional data.
Source:
HPA.

The only routinely available mortality statistic on *clostridium difficile* are those associated with enterocolitis, the most common illness caused by *clostridium difficile* infection.

Table 2 shows total mentions of *clostridium difficile* enterocolitis and the number where it was also the underlying cause of death for 2001 onwards. Comparable figures are not available before 2001, because no specific code for *clostridium difficile* exists in the ninth revision of the international classification of diseases (ICD). The version of the ICD used to code death certificates did not include a specific code for *clostridium difficile* enterocolitis.

The Office for National Statistics (ONS) is working with the HPA on a special study to identify the total number of deaths where clostridium difficile was mentioned on the death certificate.

Number of deaths where enterocolitis due to clostridium difficile was mentioned on the death certificate and the number of these mentions where it was also the underlying cause of death[1], England and Wales, 2001–03

	Total mentions	Underlying cause
2001	1,199	674
2002	1,417	751
2003	1,748	934

[1] Selected using the code A04.7 from the ICD, tenth revision (ICD-10).

ONS.

Dentistry

Sir Paul Beresford: To ask the Secretary of State for Health what the most recent Personal Dental Service conversion rates are, broken down by primary care trust area and expressed as a percentage of the total number of dental surgery addresses. [2772]

Ms Rosie Winterton *[holding answer 9 June 2005]:* The information requested has been placed in the Library. This shows the percentage of dental practice addresses at 31 May 2005 which have an open personal dental service (PDS) contract—expressed as a percentage of the total number of dental surgery addresses with either an open general dental service (CDS) or PDS contract. At 31 May, there were 5,845 dentists in PDS pilots. This was 28.9 per cent, of the total number of dentists in the GDS and PDS pilots.

Hepatitis C

Mr. Laxton: To ask the Secretary of State for Health if her officials will discuss with the Scottish Centre for Infection and Environmental Health its data collection on hepatitis C in Scotland; and if she will make a statement. [1701]

Caroline Flint: Departmental officials are in contact from time to time with officials in the Scottish Executive, who take advice from Health Protection Scotland (HPS), (formerly known as the Scottish Centre for Infection and Environmental Health) about a range of issues around hepatitis C, including data collection on hepatitis C in Scotland.

I am aware that the Health Protection Agency, which is responsible for national surveillance of hepatitis C, is discussing with HPS ways in which reporting in England may be improved.

Graham Stringer: To ask the Secretary of State for Health what policy response she has formulated to the advice of the Chief Medical Officer given in the document Getting Ahead of the Curve published in 2002 relating to the treatment costs of hepatitis C. [3138]

Caroline Flint: The Department published its "Hepatitis C Action Plan for England" in 2004 to improve prevention, diagnosis and treatment of hepatitis C. Implementation of the action plan is being underpinned by an awareness raising campaign for health care professionals and the public.

Mr. Burns: To ask the Secretary of State for Health what discussions her officials have had with the Scottish Executive concerning differentials in the rate of diagnosis of hepatitis C in Scotland and England; and if she will make a statement [1463]

Caroline Flint *[holding answer 6 June 2005]:* Departmental officials are in contact from time to time with officials in the Scottish Executive about a range of issues around hepatitis C, but have not had any specific discussions on the differential rates of laboratory reported hepatitis C diagnoses made to Health Protection Scotland (HPS) and to the Health Protection Agency (HPA) in England. However, we are aware that the HPA, which is responsible for national surveillance of hepatitis C, is discussing with the HPS ways in which reporting in England may be improved.

Hospital Hygiene

Daniel Kawczynski: To ask the Secretary of State for Health what steps cross-infection sisters are taking to control infection. [3188]

Jane Kennedy: The role of the infection control nurses is defined in "Hospital Infection Control, Guidance on the control of infection in hospitals", prepared by the hospital infection working group of the Department and the Public Health Laboratory Service in March 1995, which is available in the Library. The infection control nurse is responsible for surveillance, prevention and control of infection and has responsibility for ensuring policies and training are in place to secure effective infection control.

Keith Vaz: To ask the Secretary of State for Health (1) what guidelines have been issued on the hygiene of interaction between patients, clinical staff and visitors in NHS hospitals; [3904]

(2) what guidelines are followed when isolating patients who contract infections in relation to contact between patients, clinical staff and visitors in NHS hospitals. [3907]

Jane Kennedy: Trusts have their own infection control manuals and these will include policies on the management of isolated patients and procedures to be followed by patients and relatives. These will be based on national guidelines and other evidence.

The key guidance documents available on the Department's website include:

"Winning Ways—Working together to reduce Healthcare Associated Infection in England"

"The epic project: developing national evidence-based guidelines for preventing healthcare associated infection: Phase 1: guidelines for preventing hospital-acquired infections"

"National Institute for Clinical Excellence, Infection Control: prevention of healthcare associated infection in primary and community care"

Information on the management of infected patients is available on the newly created national resource for infection control website at http://www.nric.org.uk.

Keith Vaz: To ask the Secretary of State for Health whether bedside Bibles have been removed in University Hospitals of Leicester NHS trust to stem transmission of infections between patients. [3906]

Jane Kennedy: Bedside Bibles are still available to patients at University Hospitals of Leicester National Health Service Trust. Although publications such as Bibles cannot be thoroughly decontaminated between patients, they are not a major source of infection.

The national programme to tackle healthcare associated infections concentrates on reducing significant risks, for example, by improving hand hygiene.

NHS Staff (Assaults)

Steve Webb: To ask the Secretary of State for Health how many assaults have been recorded on ambulance staff in each of the last five years for which figures are available. [4398]

Jane Kennedy: The information requested has not been collated centrally for the period 1999–2000.

The table shows the estimated number of reported violent incidents against ambulance staff for 2000–01, 2001–02, and 2002–03. These estimates could represent a range of incidents from assault to verbal abuse and therefore do not accurately identify the true nature, scale and extent of the problem.

	Total number of reported incidents in the year
2000–01	3,882
2001–02	4,778
2002–03	5,283

In April 2003, the national health service security management service (SMS) was created and assumed responsibility for the issue of tackling violence against NHS staff. In November 2003, a new national reporting system for physical assaults against NHS staff was introduced. The SMS has begun a programme of work to identify the true nature, scale and extent of the problem of violence against NHS staff. Accurate information concerning physical assaults against NHS staff is expected to be available from summer 2005.

Steve Webb: To ask the Secretary of State for Health if she will estimate the number of violent incidents in ambulance trusts in the NHS in England in each year since 1997, broken down by trust. [4400]

Jane Kennedy: The information requested has not been collated centrally for the period 1997–99.

The table shows the estimated number of reported violent incidents involving ambulance staff for 2000–01, 2001–02, and 2002–03 for each ambulance trust in England. These estimates could represent a range of incidents from assault to verbal abuse and therefore do not accurately identify the true nature, scale and extent of the problem.

In April 2003, the national health service security management service (SMS) was created and assumed responsibility for the issue of tackling violence against NHS staff. In November 2003, a new national reporting system for physical assaults against NHS staff was introduced. The SMS has begun a programme of work to identify the true nature, scale and extent of the problem of violence against NHS staff. Accurate information concerning physical assaults against NHS staff is expected to be available from summer 2005.

Source:
Department of Health.

Steve Webb: To ask the Secretary of State for Health what her Department's policy is on the provision of protective uniforms to ambulance personnel for protection against violent attack. [4404]

Jane Kennedy: The provision of protective uniforms is a matter for each individual national health service ambulance trust, based on a comprehensive risk assessment of the risks faced by their staff. A joint Treasury-funded project between the NHS security management service and the Home Office is currently evaluating the effectiveness of such equipment in helping to better protect ambulance staff. This is due to report later this year.

Lynne Featherstone: To ask the Secretary of State for Health how many attacks there have been on ambulance officers and paramedics in each of the last five years, broken down by health authority; how many people have been successfully prosecuted for carrying out such attacks; how many prosecutions are ongoing; and if she will make a statement. [4158]

Jane Kennedy *[holding answer 15 June 2005]:* The information requested has not been collated centrally for the period 1999–2000.

The table shows the estimated number of reported violent incidents involving ambulance staff for 2000–01, 2001–02, and 2002–03 for each ambulance trust in England. These estimates could represent a range of incidents from assault to verbal abuse and therefore do not accurately identify the true nature, scale and extent of the problem.

In April 2003, the national health service security management service (SMS) was created and assumed responsibility for the issue of tackling violence against NHS staff. In November 2003, a new national reporting system for physical assaults against NHS staff was introduced. The SMS has begun a programme of work to identify the true nature, scale and extent of the problem of violence against NHS staff. Accurate information concerning physical assaults against NHS staff is expected to be available from summer 2005.

Information relating to the number of prosecutions for those who have assaulted NHS staff was not collated centrally in any systematic manner prior to 2004–05. In 2002–03, there were 51 prosecutions against those who had assaulted NHS staff who could be identified by a Department of Health survey of NHS health bodies. Information relating to the number of successful prosecutions obtained against those who have physically assaulted NHS staff for 2004–05 will be available shortly.

Source:
Department of Health

Steve Webb: To ask the Secretary of State for Health how many prosecutions for violence against the staff of NHS trusts have been taken out in each year since 2003; and what targets have been set by her Department to increase the number of incidents where the perpetrators are prosecuted. [4399]

Jane Kennedy: Information relating to the number of prosecutions for those who have physically assaulted national health service staff was not collated systematically prior to 2004–05, when the NHS security management service (SMS) introduced a national reporting system for physical assaults.

In 2002–03, there were 51 prosecutions against those who had assaulted NHS staff who could be identified by a Department of Health survey of NHS health bodies. Information relating to the number of successful prosecutions obtained against those who have physically assaulted NHS staff for 2004–05 will be available shortly.

No targets for increasing the number of prosecutions obtained against those who assault NHS staff have been set. A developing network of local security management specialists across the NHS, supported by the SMS, will provide stronger local liaison with the police and the Crown Prosecution Service and ensure that all incidents of violence against staff are properly investigated and prosecuted, where that is appropriate and in the public interest.

A Memorandum of Understanding with the Association of Chief Police Officers will be agreed by autumn this year. This will ensure that the responsibilities, in relation to tackling violence, of health bodies, the SMS and the police are clearly defined.

Steve Webb: To ask the Secretary of State for Health what targets have been set by her Department on reducing incidents of violence against NHS staff. [4631]

Jane Kennedy: No targets are set currently for reducing the number of incidents of violence against national health service staff.

In April 2003, the NHS security management service (SMS) was created and assumed responsibility for tackling violence against NHS staff.

The SMS aims to deliver a secure environment for both those who use or work in the NHS, so that the highest standards of clinical care can be made available to patients. Its objective is to deter and prevent such incidences from occurring but, where this cannot be achieved, enable staff to manage these incidents with a minimum of risk to themselves and others.

In November 2003, a comprehensive range of measures were introduced to tackle incidences of violence against NHS staff, both proactively and reactively. The SMS has begun a programme of work to identify the true nature, scale and extent of the problem of violence against NHS staff. Once this work is completed, meaningful and achievable targets for delivering a secure environment for NHS staff will be set.

Mr. Baron: To ask the Secretary of State for Health what the total financial cost to NHS trusts of pursuing prosecutions on behalf of staff who have been victims of an alleged assault during their hours of work was in each of the last five years for which figures are available; and what assessment she has made of the effect of such costs on trusts' willingness to prosecute. [5162]

Jane Kennedy *[holding answer 20 June 2005]:* The information requested is not collated centrally.

In April 2003, the national health service security management service (SMS) was created and assumed responsibility for the issue of tackling violence against NHS staff. In November 2003, the SMS legal protection unit was created, as one of a range of measures introduced to tackle violence against NHS staff. Its objective is to work with health bodies, the police and the Crown Prosecution Service to increase the number of prosecutions against those who assault NHS staff.

They provide free and consistent advice on action to health bodies to deal with those who abuse or assault staff and where legal action is required, independent of the police and the Crown Prosecution Service, will share up to 50 per cent. of the costs of pursuing such action. This represents a significant financial saving for health bodies.

Rheumatoid Arthritis

Daniel Kawczynski: To ask the Secretary of State for Health if she will make representations to Shropshire Primary Care Trust to provide essential drugs for rheumatoid arthritis on prescription. [3211]

Ms Rosie Winterton: There is a wide range of over-the-counter and prescription drugs available to help relieve the pain and discomfort and reduce the future damage associated with the 200 different forms of arthritis.

The National Institute for Health and Clinical Excellence (NICE) appraises the suitability of new drugs for use in the national health service. Primary care trusts are obliged to make drugs recommended by NICE available to all patients who meet the clinical guidelines. It is the responsibility of individual strategic health authorities to ensure local compliance with NICE guidelines.

Scans (Waiting Times)

Mr. Dismore: To ask the Secretary of State for Health what the average waiting time is for *(a)* an MRI scan, *(b)* an ultrasound scan and *(c)* a CT scan (i) in London, (ii) at Barnet Chase Farm Hospitals and (iii) in the area covered by Barnet Primary Care Trust; and if she will make a statement. [3266]

Jane Kennedy: The information requested is not currently collected centrally.

We have put in place a national diagnostics programme to remove waits. We are establishing indicative milestones for diagnostic treatments:

by March 2006, the maximum wait for computed tomography or magnetic resonance imaging scans will be 26 weeks.

by March 2007, it will be 13 weeks for all scans and diagnostics.

by 2008, all patients will be treated within 18 weeks from general practitioner referral. This will include any diagnostics.

The Department is currently agreeing strategic health authorities' local delivery plans and will monitor progress against those plans.

CONSTITUTIONAL AFFAIRS

"Securing the Vote" Report

Mr. Heald: To ask the Minister of State, Department for Constitutional Affairs how and when her Department will respond to the recommendations made in the Electoral Commission's report, "Securing the Vote". [1763]

Ms Harman: The Government are currently considering the measures in "Securing the Vote" and we will respond when it is appropriate to do so. The Government have sought views from stakeholders on the policy paper on electoral administration, which includes a number of the measures in "Securing the Vote". We intend to legislate for most of these measures in the Electoral Administration Bill.

Coroner Service

Vera Baird: To ask the Minister of State Department for Constitutional Affairs what plans she has to reform the coroner service in England and Wales. [1906]

Ms Harman *[pursuant to the reply, 7 June 2005, Official Report, c. 1124]:* I have been asked to reply.

The information contained in my answer to my hon. and learned Friend's supplementary question was inaccurate. I apologise for this error. The coroner was reprimanded and continues to be monitored by the Lord Chancellor. However, he has not been required to undertake any extra training.

Vera Baird: To ask the Minister of State, Department for Constitutional Affairs what monitoring of the jurisdiction of the Teesside coroner her Department is carrying out following the reprimand issued in June 2004. [3563]

Ms Harman: The Lord Chancellor has been receiving monthly information reports from the coroner for Teesside since June 2004. The reports provide details of performance in relation to all coroner cases (including inquests) in the region and specifically the numbers of cases received, disposed of and outstanding on a monthly basis. The Lord Chancellor will consider whether he requires the coroner to continue with the provision of monthly reports after the end of June 2005.

Courts Service

Lynne Featherstone: To ask the Minister of State, Department for Constitutional Affairs (1) if she will make a statement on proposed weekend courts; [5990]

(2) if she will make a statement on the sitting hours of courts. [6048]

Ms Harman: There are no plans to introduce weekend courts beyond those arrangements already in place. Some magistrates courts do regularly sit on Saturdays to conduct business. The Supporting Magistrates to Provide Justice Programme as part of the Government response to crime and antisocial behaviour is considering extending sitting hours including weekend courts generally.

Mr. Kidney: To ask the Minister of State, Department for Constitutional Affairs what recent assessment she has made of the capacity of the unified Courts Service to make more effective use of its resources. [2749]

Ms Harman: Her Majesty's Courts Service (HMCS) were launched as a new agency from 1 April 2005. For the first time all magistrates, Crown and county courts will operate together creating a more effective organisation and deliver efficiencies through merging of local activities, estates integration and more efficient use of corporate resources. HMCS plan to deliver efficiency savings of £14 million/£24 million/£31million and reduce its workforce by 400/600/800 over the SR04 period. The staff reduction will not be achieved through redundancies but through other means such as not filling new vacancies over the period. These efficiencies will be delivered through local plans in each of the 42 areas.

Criminal Defence Services Bill

Mr. Djanogly: To ask the Minister of State, Department for Constitutional Affairs for what reasons the thresholds for criminal legal aid set out in the proposed Criminal Defence Services Bill are different to those established for civil legal aid. [6001]

Bridget Prentice: As a general principle, the Government believe that the potential loss of liberty confronting an individual who faces criminal prosecution by the state is sufficiently serious to justify broad distinction from civil proceedings. For this reason, it is considered important to establish separate thresholds for both the criminal and civil legal aid schemes. In addition, the threshold for criminal legal aid has been specifically set at a level that we believe will ensure compliance with Article 6 of the European convention on human rights.

Mr. Djanogly: To ask the Minister of State, Department for Constitutional Affairs whether the proposed financial thresholds for means testing in the Criminal Defence Service Bill will be index-linked. [6002]

Bridget Prentice: The Framework Document published alongside the Criminal Defence Service Bill includes an undertaking to carry out an annual review of the proposed financial eligibility thresholds. In all normal circumstances, we would expect to update these thresholds in line with one of the established indicators such as the Rossi index. These proposals will be included among the draft regulations setting out the specific mechanics of the new means testing model. The regulations are expected to be published in autumn 2005 and will be subject to a full consultation exercise, the outcome of which will help to inform the final design and operation of the new scheme.

Criminal Practice

Mr. Djanogly: To ask the Minister of State, Department for Constitutional Affairs what the average salary of a pupil conducting criminal legally aided work has been in each of the last 10 years, broken down by region. [6379]

Bridget Prentice: The specific information requested is not collated or held centrally by this Department and therefore an answer cannot be given. The issue of salaries paid to pupils is a matter for chambers and the individual barristers concerned.

Mr. Djanogly: To ask the Minister of State, Department for Constitutional Affairs how she plans to encourage young barristers into criminal practice. [6380]

Bridget Prentice: The Government have no specific plans to encourage young barristers into criminal practice or any other field.

Mr. Djanogly: To ask the Minister of State, Department for Constitutional Affairs what percentage of law students applied to become criminal barristers in *(a)* 2005 and *(b)* each of the last 10 years, broken down by region. [6381]

Bridget Prentice: This information is not held centrally either by this Department or by the Bar Council. Law students train to become barristers rather than criminal barristers. They may then choose to apply to a criminal chambers, but this is of course, a personal decision.

Mr. Djanogly: To ask the Minister of State, Department for Constitutional Affairs how much has been spent on the Criminal Defence Service in each of the last 10 years. [6382]

Bridget Prentice: Spending on the Criminal Defence Service since its implementation in April 2001 and, prior to this criminal legal aid, was as follows:

	£ million
2004–05[1]	1,192
2003–04	1,179

[1] Figures for 2004–05 are estimates and subject to year-end adjustments.

Mr. Djanogly: To ask the Minister of State, Department for Constitutional Affairs what plans she has to introduce revised payment rates to meet the costs of the additional case management responsibilities introduced in the Criminal Procedures Rules 2005. [5999]

Bridget Prentice: The Government support the new Criminal Procedure Rules which aim to gain better control of case management and length of trials, and encourage earlier and better preparation. We are consulting the legal professions to make structural changes to the graduated fee scheme in Preston and Nottingham to support the Plea and Case Management Hearing pilots. These changes would be on a cost-neutral basis.

Mr. Djanogly: To ask the Minister of State, Department for Constitutional Affairs how she intends to improve the effective recovery of costs in criminal trials at the Crown court. [6000]

Bridget Prentice: The Government are planning to strengthen the existing system of recovery of defence costs orders, as well as making greater use of the courts' existing power to restrain people from disposing of their assets. While the Criminal Defence Service Bill also confers the power to introduce formal means testing into the Crown court, we believe that this will require a different model to the existing proposals for the magistrates court. The Government will publish their design for a suitable Crown court scheme in due course and reaffirm their commitment to consult fully and widely on these proposals.

Departmental Objectives/Staffing

Mr. Allen: To ask the Minister of State, Department for Constitutional Affairs what plans she has to involve hon. Members in delivering the objectives of her Department. [2858]

Ms Harman: The objectives of my Department are set out in the document "Making a Difference Taking Forward Our Priorities", copies of which were placed in the Libraries of both Houses. In the development of these proposals we have consulted hon. Members by issuing consultation papers, holding meetings and engaging in debates. We intend to continue to do so.

Mrs. Spelman: To ask the Minister of State, Department for Constitutional Affairs what the expected change is in full-time equivalent staff resulting from merging the electoral law divisions in the Department for Constitutional Affairs and Office of the Deputy Prime Minister. [5571]

Ms Harman: There are no plans in the immediate future to change the number of full-time equivalent staff working on electoral law as a result of the recent machinery of Government changes.

Judicial Appointments

Mr. Amess: To ask the Minister of State, Department for Constitutional Affairs what her policy is on the minimum legal qualifications necessary for a judicial appointment. [5926]

Ms Harman: The eligibility requirements for judicial appointments are set down in statute. They vary according to the judicial office concerned, but in general they provide that before being considered for judicial appointment, an individual must have possessed specified rights of audience before the courts for a specified length of time. The Lord Chancellor announced on 5 March this year that he would review the statutory eligibility requirements as a part of his programme of work aimed at increasing the diversity of the judiciary. That review is currently under way, and the Lord Chancellor will announce his decision shortly. It should be noted that the statutory qualifications are the minimum required to enable an individual to apply for judicial appointment: those who do apply are assessed against a detailed competence framework for the post concerned, and appointments are made solely on merit.

Rape Trials

Vera Baird: To ask the Minister of State, Department for Constitutional Affairs (1) if she will ensure that an Appeal Court judge who hears a rape appeal undergoes training in serious sexual offences; [1588]

(2) whether Court of Appeal (criminal division) judges *(a)* undergo continuation training on sexual offences and *(b)* receive further training on sexual offences after attending the serious sexual offences course on first appointment to the High Court; [1582]

(3) if she will ensure that a Court of Appeal judge who may hear a rape appeal but has not been on the serious sexual offences course is obliged to attend such a course; [1589]

(4) whether judges who were promoted from the High Court to the Court of Appeal prior to the introduction of the serious sexual offences course for High Court judges are given similar training before being allowed to hear rape appeals. [1587]

Ms Harman: Rape appeals will invariably be heard by an Appeal Court which will include at least one and usually two judges who have been on the serious sexual offences seminar.

EDUCATION AND SKILLS

Adult Education

Mr. Amess: To ask the Secretary of State for Education and Skills what action she is taking to improve the provision of adult education. [5933]

Phil Hope: The Government's Skills Strategy, "21st Century Skills: Realising Our Potential" (July 2003) and "Skills: Getting on in business, getting on at work" (March 2005) set out our plans for increasing and improving opportunities for adults to develop their skills. Adult education services are benefiting from our well-received Success for All programme. This is a long-term initiative to develop quality, demand-led provision, in which the Department is investing £118 million this year. For example, students benefit from the excellent teaching and learning resources produced through Success for All and managers can develop their leadership and management skills through the Government-funded Centre for Excellence in Leadership.

A-levels

Mr. Hoban: To ask the Secretary of State for Education and Skills what recent discussions she has had with the Qualifications and Curriculum Authority on the *(a)* future and *(b)* rigour of A levels. [4913]

Jacqui Smith: None. Our proposals for further strengthening A levels are set out in our White Paper, 14–19 Education and Skills, published on 23 February 2005. The Secretary of State wrote to the QCA on 29 March with details of the role it should play in driving these reforms forward.

Basic Skills

Julia Goldsworthy: To ask the Secretary of State for Education and Skills how many adults are without *(a)* level 3 and *(b)* basic skills, broken down by (i) local education authority and (ii) Government office region. [6292]

Phil Hope: The following table shows both the number and proportion of working adults[1] who lack a NVQ level 3 or equivalent qualification. The results are based on the 2003–04 local labour force survey which sampled around 390,000 people from March 2003 to February 2004 throughout the United Kingdom. Figures are presented at Country and Government office region level in the first instance, and then local education authorities ordered alphabetically:

[1] Working age adults defined here as males aged 16–64 and females aged 16–59.

n/a = Sample size too small to provide a reliable figure.

In October 2003 the Department for Education and Skills (DfES) published 'The Skills for Life Survey: A national needs and impact survey of literacy, numeracy and ICT skills'. The survey assessed the literacy, numeracy and ICT skills of around 8000 adults aged 16 and above in England. The findings for the nine government office regions are shown in the following tables. The assessment levels correspond to the new literacy and numeracy core curriculum and National Standards: Level 1 is broadly equivalent to a lower grade GCSE (grade D-G) and Level 2 to a higher grade GCSE (A*-C).

Overall around 16 per cent. of adults had literacy skills below Level 1: this varied between 21 per cent. in the north-east and 12 per cent. in the south-east. Likewise, 47 per cent. of adults had numeracy skills below Level 1 and this varied between 55 per cent. in the north-east and 40 per cent. in the south-east.

Due to the survey sample size it is not possible to provide survey findings for the level of skills by local education authorities. However, the Department is currently working with Exeter university to generate a range of local level estimates (based on modelling techniques) to inform local planning and delivery in this key policy area. To date, estimates have been produced for Local Learning and Skills Councils (LLSCs), Districts and Wards. These estimates can be accessed on the Department's website at:

www.dfes.gov.uk/readwriteplus_skillsforlifesurvey/

A copy of the survey report is in the House of Commons Library and on the DfES website:

www.dfes.gov.uk

Binge Drinking

Mr. Rob Wilson: To ask the Secretary of State for Education and Skills what measures are being taken in schools to promote awareness of the health implications of binge drinking. [5401]

Jacqui Smith: All maintained schools must provide drug education, including information about alcohol. There is scope within the frameworks for Personal Social Health Education (PSHE) and Citizenship at key stages 1 and 2, PSHE at key stages 3 and 4 and the Citizenship programme of study at key stages 3 and 4 to explore the effects of binge drinking. Alcohol education in schools has an essential role to play in enabling pupils to develop their knowledge, skills, attitudes and understanding about alcohol.

In 2004–05, we supported over 2,000 teachers in the PSHE certificate for teachers which sets standards in the teaching of drug and alcohol education. Up to 3,000 teachers will be supported in 2005–06.

Together with the Home Office and Department of Health, we are supporting a national five year research programme called "Blueprint" to test the effectiveness of drug education initiatives in schools. It will make a significant contribution to developing a UK evidence base for drug, alcohol and tobacco education.

Broadband

Mr. Rob Wilson: To ask the Secretary of State for Education and Skills what funding is being made available to each local education authority to provide broadband internet access for schools. [5413]

Jacqui Smith: A list of broadband for schools funding 2005/06 made available to each local education authority is as follows:

Total	143,606,001

Mr. Rob Wilson: To ask the Secretary of State for Education and Skills how many schools in each local education authority have broadband internet access. [5654]

Jacqui Smith: The Prime Minister announced the target to connect all schools to broadband by 2006 and we are on schedule to achieve this. As at end March 2005, 76 per cent. of schools in England were connected to broadband (73 per cent. of Primary schools and 99 per cent. of Secondary schools) compared to just one in eight in December 2001.

A list of the percentage of schools that have broadband internet access as at 31 March 2005, by each local education authority, is as follows:

Annex 1

Bullying

Mr. Hoban: To ask the Secretary of State for Education and Skills pursuant to her answer of 7 June 2005, *Official Report*, column 472W, on bullying, what the *(a)* membership, *(b)* funding for 2005–06 from her Department and *(c)* terms of reference are of the (i) Youth Crime Programme Board, (ii) Crime Reduction Delivery Board, (iii) Penalty Notices for Disorder operational working group, (iv) Prolific and Other Priority Offenders Programme Board and (v) Safer Schools Partnership steering group; what work each has commissioned; and how often each have met since being established. [4898]

Jacqui Smith: The information requested is as follows:

(i) Youth Crime Programme Board (YCPB)

(a) Membership—chaired by DfES, YCPB brings together key stakeholders from across DfES: Preventing Youth Offending; Improving Behaviour and Attendance Unit; Looked After Children; Positive Programmes; Offenders Learning and Skills Unit; Families Division and PSHE and Citizenship. Home Office: Head of Youth Crime; Juvenile Offenders Unit; Treatment of Young People and Drugs Unit; Violent Crime and Crime Reduction. Youth Justice Board: Director of Policy. Government Offices for the Regions and Department of Health.

(b) Funding from DfES 2005–06—there is no specific DfES funding.

(c) Terms of reference—to:

act as the key forum across Government for making policy decisions on cross-cutting issues relating to youth crime;

develop an understanding of the DfES contribution to youth crime and how that may be maximised;

provide support and challenge for policies relating to youth crime in DfES/HO/ Youth Justice Board (YJB);

identify and contribute to the resolution of risks and issues relating to youth crime policy; and

agree issues, risks and progress to be communicated to the Change for Children Programme Board and the Home Office Crime Reduction Delivery Board.

(d) Work commissioned—The main purpose of the board is not to commission work but to ensure that relevant Government policies are joined up. However, the board have also commissioned work to look at the risks associated with the onset of offending and how DfES' existing policies impact on these. It also proposed an anti-robbery week in schools called 'Stay Safe' which subsequently took place in January 2005.

(e) How often met—first met July 2004 and has met five times since.

(ii) Crime Reduction Delivery Board

(a) Membership—chaired by the Home Office, is a cross-departmental group of officials and stakeholders established in May 2003 to drive forward and give strategic focus to multi-agency efforts to reduce all forms of crime, including anti-social behaviour. This group includes representatives from frontline delivery services as well as Department of Health, Office of the Deputy Prime Minister, the Youth Justice Board, DfES and others.

(b) Funding from DfES 2005–06—there is no specific DfES funding.

(c) Terms of reference—to:

receive and agree an all-source assessment of current crime trends/issues in relation to Home Office crime reduction PSAs and commission action where necessary;

issue a regular report on that assessment to the Home Secretary;

monitor performance in respect of crime targets and levels of public confidence in crime reduction;

take papers at each meeting on one or at most two key issues;

agree the contribution of the police, local government, other Government Departments and other agencies in reducing crime and increasing public confidence; and

ensure that crime reduction implications are taken into account in work across the criminal justice system and in other Government Departments.

(d) Work commissioned—from time to time commissions papers or work from Board members. Recent commissions have included work that led to the establishment of the Prolific and Other Priority Offenders Strategy, a report on knife crime leading to the inclusion of knife crime measures in the Violent Crime Reduction Bill currently before Parliament, and the work on alcohol fuelled crime, which has led to the recent initiatives by the licensed trade around promotions such as happy hours.

(e) How often met—monthly.

(iii) Operational Working Group for the 10–15s Penalty Notices for Disorder

(a) Membership—representatives from the seven police forces taking part in the pilot, representatives from DfES, Department of Health, Crown Prosecution Service, Children's Society, Department for Constitutional Affairs, Youth Justice Board and Police Information Technology Organisation.

(b) Funding from DfES 2005–06—there is no specific DfES funding.

(c) Terms of reference—to develop the operational processing guidance for the PNDs specifically tailored for the 10–15 age group and have an overview of the start of issuing of the tickets.

(d) Work commissioned—commissioned the Penalty Notices for Disorder tickets template, the draft operational guidance and an evaluation report (both quantitative and qualitative) from Research, Development & Statistics (RDS). The RDS report will cover the first year of the 10–15s PNDs being issued and will produce an interim report after six months and a final report at the end of the first year.

(e) How often met—first met on 6 February 2004, and has met five times since then (March, July, October, December 2004 and February 2005. The May 2005 meeting has recently been rescheduled for August.

(iv) Prolific and other Priority Offenders Programme Board

(a) Membership—chaired by Leigh Lewis, Home Office Permanent Secretary for Crime, Policing, Counter Terrorism and Delivery. Membership comprises senior representation from the key stakeholders involved in delivering the strategy. Attendees are from a sufficiently high level so as to ensure they have the full authority to take decisions on behalf of the organisation they represent.

(b) Funding from DfES 2005–06—there is no specific DfES funding.

(c) Terms of reference—to provide strategic leadership to implement the Prolific and other Priority Offenders strategy; ensuring that risks are identified and actively managed and taking proactive steps to identify and correct blockages at a senior level across all stakeholders.

(d) Work commissioned—has ensured that all areas of England and Wales have set up a Prolific and other Priority Offenders scheme and that the schemes are actively engaging with their client groups to reduce crime. The board has ensured that this has been delivered locally through mainstream resources.

(e) How often met—once each month since 22 March 2004.

(v) Safer School Partnership Steering Group

(a) Membership—attended by the projects' partners; the Home Office, Youth Justice Board and ACPO (Association of Chief Police Offices), ConfEd (Confederation of Education and Children's Services Managers), Local Government Association, police officers and head teachers.

(b) Funding from DfES 2005–06—Funding for financial year 2005–06 is still under negotiation. Equivalent amount of the last financial year—£300,000 has been earmarked.

(c) Terms of reference—The original terms of reference for the steering group in 2002 were to oversee the development and implementation of the Safer School Partnerships (police in schools) strand of the Behaviour Improvement Package. This aims to agree

partnerships involving 100 police officers based in schools by end September 2002. These are to be in police force areas among the 10 "high crime" areas in England. This has been delivered and more recent figures show that there are now over 400 SSPs across England.

(d) Work commissioned—DfES has commissioned:

(1) Work to pull together examples of good practice on introducing SSPs—subsequently published in October 2004.

(2) University of York to produce a SSP Mainstreaming Report. Draft report complete in April 2005.

(3) Funds Crime Concern to provide monitoring and support to SSPs

The Youth Justice Board has commissioned:

(1) PRB (Public Policy Research Bureau) to produce a national evaluation for year 2002/03. This was published in November 2004.

(2) University of York to produce a national evaluation for year 2003/04, to be published in July 2005.

(e) How often met—every month in the first year and then had bi-monthly meetings. Since its establishment the group has met 23 times. The four partners meet regularly to discuss issues.

Mr. Hoban: To ask the Secretary of State for Education and Skills (1) what research she has evaluated on the prevalence of bullying; [4902]

(2) how many complaints about the handling of bullying in schools have been received by *(a)* local education authorities and *(b)* her Department in each of the last five years; [4901]

(3) what data schools are required to collect on incidents of bullying. [4899]

Jacqui Smith: On the question of the prevalence of data and its evaluation I refer the hon. Member to my response on 13 June 2005, *Official Report*, column 187W.

We do not hold data on bullying complaints received by local authorities. Each complaint received in the Department is dealt with. However we do not keep a statistical record of complaints.

There is no requirement on schools to collect data on incidents of bullying. However, the effective practice digest that accompanies the anti-bullying Charter for Action recommends that schools should keep a record, and should analyse it for patterns, for example of who is bullied and where bullying takes place.

Mr. Hoban: To ask the Secretary of State for Education and Skills if she will make a statement on the progress of the Change for Children Programme; and what assessment she has made of its effectiveness in improving behaviour in schools. [4904]

Jacqui Smith: Since publishing the Every Child Matters: Change for Children document last December we have made good progress on implementing the programme. For example, all local authorities are working with their partners to put in place children's trust arrangements and focus services on delivering better outcomes for children and young people in their area. Over half expect to have children's trust arrangements in place by April 2006 and all by 2008.

Improving behaviour in schools is a priority for the Government. Children's trusts will work with local partners including schools to identify the needs in the area and put in place action to tackle those needs, which might include improving behaviour. We have made clear our expectation that all secondary schools should be working together in collaboration by September 2007 to improve behaviour and attendance. To be successful they will need to be fully linked into local Change for Children programmes, and be reflected in Children and Young People's Plans.

Mr. Hoban: To ask the Secretary of State for Education and Skills pursuant to the Answer of 7 June 2005, *Official Report*, column 472W, on bullying and anti-social behaviour, if she will list the *(a)* published research and *(b)* statistics to which she refers. [5032]

Jacqui Smith: From the Department's Statistical First Release data on exclusions from school, we know that there is an association between a school's permanent exclusion rate and its pupils' GCSE attainment: generally those schools with high permanent exclusion rates tend to have lower levels of pupil attainment.

Source:

DfES (2004) Permanent Exclusions from Maintained Schools in England, 2002/2003' DfES Statistical First Release SFR 42/2004.

From the NFER Excellence in Cities (EiC) Attendance Analysis, we know that once pupil, school and background characteristics are taken into account, there is an association between absence rates and pupil attainment. The research shows that higher than average absence levels were associated with reduced GCSE attainment (especially for boys) and KS3 English attainment.

Source:

Morris & Rutt (2004) 'Analysis of Pupil Attendance Data in Excellence in Cities (EiC) Areas: An Interim Report' DfES Research Report RR571.

In terms of bullying, although the Department has not commissioned research specifically to look at the impact of bullying on attainment, we did commission a research review on homophobic bullying, which looked at the prevalence and impact of this on young people. The research concluded that homophobic bullying had negative impacts such as absence from school, limited achievement and lower staying on rates.

Source:

Warwick, Chase, Aggleton & Sanders (2004) 'Homophobia, Sexual Orientation and Schools: a review and implications for action' DfES Research Report RR594.

Furthermore, the 2003 PISA (Programme for International Student Assessment) work co-ordinated by the OECD (the Organisation for Economic Co-operation and Development) showed that 88 per cent. of UK headteachers thought that the learning of students was hindered a little or "to some extent" by students intimidating or bullying other students.

It must be noted that the relationships between bullying, truancy, exclusion, social exclusion, and negative outcomes such as poor attainment and poor behaviour are complex and difficult to analyse.

Mr. Hoban: To ask the Secretary of State for Education and Skills pursuant to the answer of 7 June 2005, *Official Report*, column 472W, on bullying, what

cross-departmental initiatives have been put in place to tackle *(a)* bullying, *(b)* low level disruptive behaviour and *(c)* truancy; and what assessment she has made of their effectiveness. [5033]

Jacqui Smith: We are committed to supporting cross-departmental, multi-agency approaches to reducing poor behaviour in schools and truancy. They include:

over 400 Safer School Partnerships that base police officers in schools. These officers contribute significantly to improving pupil behaviour, especially where the partnership is part of a strategic approach to behaviour improvement;

regular national truancy sweeps by the police and local authorities that have so far caught nearly 40,000 truants;

over 140 Behaviour and Education Support Teams that bring together education, health and social care professionals to support schools, pupils and their families. Early evidence indicates that these teams are effective in improving behaviour and reducing exclusions and truancy;

Skill Force, a charity sponsored by the Ministry of Defence and the DfES, that provides teams including ex-service personnel to work with disaffected pupils. A recent London University Institute of Education evaluation indicated a 78 per cent. reduction in exclusions for Skill Force participants.

Bury Lawn School, Milton Keynes

Mr. Lancaster: To ask the Secretary of State for Education and Skills if she will commission an inquiry into the relations between parents and school administrators, Global Education Management Systems, at Bury Lawn school in Milton Keynes. [5284]

Jacqui Smith: Bury Lawn school is an independent school. Like other independent schools, it is registered with the Department and is subject to regular inspection. All independent schools must reach and maintain satisfactory standards of education, health, safety and welfare which are set out in regulations, in order to achieve and maintain registration. These standards do not interfere with the freedom of independent schools to manage their own affairs, including the commercial relationship between the school and parents. In the case of Bury Lawn, the dispute is not related to our statutory minimum standards, so the Secretary of State has no power to intervene.

Mr. Lancaster: To ask the Secretary of State for Education and Skills if she will make a statement on the academy project in Milton Keynes following the withdrawal of Global Education Management Systems from the project. [5285]

Jacqui Smith: Proposals for an academy in Milton Keynes are at a very early stage. No formal project has been agreed there. We had been in discussion with GEMS and with Milton Keynes council about the proposal but no agreement was reached. Academies officials are continuing their discussions with a range of sponsors about potential academy projects around the country, including the proposal in Milton Keynes.

Child Care Vouchers

Mr. Willis: To ask the Secretary of State for Education and Skills whether qualified teachers working in schools under the control of local education authorities are entitled to participate in the Government's child care voucher scheme; and if she will make a statement. [5262]

Jacqui Smith: The scheme referred to works on the basis of 'salary sacrifice'. School teachers at maintained schools in England and Wales are not eligible to participate in salary sacrifice schemes. The School Teachers' Pay and Conditions Document, the statutory framework governing teachers' pay, makes no provision for permitting a reduction in salary in any circumstances. However, any teachers may be paid recruitment and retention incentives and benefits of any value or nature, including child care vouchers, in addition to their salary.

Citizenship Curriculum

Mr. Kidney: To ask the Secretary of State for Education and Skills (1) what plans she has for reform of the citizenship curriculum; [5744]

(2) what steps her Department has taken to promote volunteering within the citizenship curriculum; [5745]

(3) what steps her Department has taken to support teachers in the delivery of the citizenship curriculum. [5748]

Jacqui Smith: The Secretary of State has asked the QCA to review curricular provision at Key Stage 3 to ensure that it provides the springboard into the reformed 14–19 phase. As part of this, QCA will review the content of citizenship and the non-statutory framework for personal, social and health education in order to ensure greater coherence between the two. The review must ensure that young people secure the key discipline concepts and content in each of the subjects.

The Department has funded Active Citizens in Schools (ACiS)—a pilot which builds on principles of millennium volunteers to encourage 11 to 15-year-olds to make a commitment to volunteering in line with the citizenship curriculum and encourage them to become millennium volunteers when they reach the age of 16. Piloted over three years from 2001, the programme tested how schools can ensure that volunteering activities in which young people engage support curricular objectives, in particular active citizenship through community involvement. We have funded the development of a best practice guide which we are currently disseminating.

Detailed guidance, produced by the Qualifications and the Curriculum Authority on the teaching of citizenship has been sent to all schools. The Department has also produced a dedicated website including a database giving teachers access to resource materials to support classroom practice. In addition, we have funded the production of a school self-evaluation tool to support schools in monitoring their progress in citizenship education. We have also put in place a package to support teacher continuing professional development (CPD) which involves

(a) a CPD handbook of good practice, and

(b) piloting in three centres around the country of CPD certification of effective teaching in citizenship.

City Academies

Mr. Gibb: To ask the Secretary of State for Education and Skills pursuant to her Answer of 6 June 2005, *Official Report*, column 331W and 13 June (ref 3259), on city academies, what proportion of lessons in city academies that have been examined by Ofsted were setted. [5015]

Jacqui Smith: This information is not collected by either the DfES or Ofsted and there are no plans to do so.

Helen Jones: To ask the Secretary of State for Education and Skills when the decision not to include city academies in the two-tier workforce regulations was taken; and what representations were received *(a)* from trade unions and *(b)* from other bodies prior to this decision. [4769]

Jacqui Smith: Academies are registered independent schools, run by Trusts which are charitable companies limited by guarantee. As such, they are not bound by the same legislative framework as maintained schools, including the Code of Practice on Workforce Matters in Public Sector Service Contracts.

In response to a consultation to apply the local government Best Value Code to schools in the maintained sector, run by my Department, a total of 21 representations were received of which six were from the Trade Unions with the majority of the remainder from national partner organisations and local education authorities. The vast majority of respondents to the consultations welcomed the new Code, and the introduction of specific regulations to afford protection to school staff.

Helen Jones: To ask the Secretary of State for Education and Skills how many pupils in each city academy are entitled to free school meals; how many pupils in schools which formed the basis of each new academy were entitled to free school meals; and what proportion of the school's intake each figure represents in each case. [4772]

Jacqui Smith: The requested information is given in the table.

Academies and their predecessor schools: number and percentage of pupils known to be eligible for free school meals[1] Position in January each year: 2002 to 2005 (provisional)[2]

Annual Schools Census

Helen Jones: To ask the Secretary of State for Education and Skills if she will make it her policy that contracts entered into by city academies should be subject to competitive tendering; and if she will make a statement. [4774]

Jacqui Smith: Academies are bound by their Funding Agreements to follow the good practices and procedures set out within the Academies Financial Handbook, which is published by my Department. This document sets out guidance on establishing and maintaining good financial systems and controls, drawing on best practice from both the public and private sectors, including procurement procedures.

The purchasing and contracting of goods and services in Academies is governed—as for other public bodies—by the core principles of probity, accountability and value for money, with governing bodies being required to demonstrate the proper and effective use of public funds. All Academies will have a tendering policy, which will take account of such issues as conflicts of interest; levels of delegation and whether contracts can be entered into by staff or need to be referred to the governing body; the number and requirements of tenders and procedures for their submission and opening; the thresholds above and below which telephone or written tenders need to be obtained; and the documenting of decisions accepting tenders or quotes other than the lowest price. Such policies will also identify where contracts are of sufficient value that they would require tendering under European (OJEU) procurement rules.

English Grammar

Mr. Gibb: To ask the Secretary of State for Education and Skills if she will make a statement on the teaching of grammar in the English curriculum of *(a)* primary and *(b)* secondary schools. [5006]

Jacqui Smith: There are well-established national expectations for what children should achieve as they move through primary school, set out in termly word, sentence and text level objectives. The vast majority of maintained primary schools in England teach these through a daily Literacy Hour as recommended by the National Literacy Strategy Framework for Teaching.

The Framework for teaching English at KS3 and 4 includes guidance on vocabulary, punctuation, sentence construction, grammar and style. It incorporates key principles and activities for the teaching and learning of writing, including sentence-level grammar, appropriate to individual year groups

English SATs

Mr. Gibb: To ask the Secretary of State for Education and Skills pursuant to the answer of 13 June 2005, *Official Report*, column 193W, regarding the Key Stage 3 English test, (1) if she will place in the Library the marking guidelines for that test; [5024]

(2) what proportion of the marks in the Key Stage 3 test in English are explicitly awarded for spelling in *(a)* the shorter writing test, *(b)* the longer writing test and *(c)* overall, as set out in the mark scheme document; [5824]

(3) if she will ask the Qualifications and Curriculum Authority to revise marking guidelines for the Shakespeare paper of the Key Stage 3 English Test to ensure spelling is taken into account in assessing performance. [6016]

Jacqui Smith: I have today placed copies of the qualifications and Curriculum Authority's mark scheme for the 2005 Key Stage 3 English test in the Library.

The proportion of marks awarded for spelling in the Key Stage 3 test in English are 20 per cent. for the shorter writing task, none for the longer writing task and 4 per cent. of the overall English marks. As the Qualifications and Curriculum Authority have said that they will keep that allocation under review, I do not plan to ask them to revise the marking guideline for the Shakespeare paper.

EU Students

Mr. Stephen O'Brien: To ask the Secretary of State for Education and Skills what assessment she has made of the potential for EU students to avoid deferred fee payments made through the PAYE system once they return to their country of origin after graduation. [4207]

Bill Rammell: We anticipate relying on European Council regulation 44/2001 for the recovery of debt from borrowers who live in other parts of the EU. Robust procedures will be in place to ensure that graduates who return to their home countries pay amounts owed when due and that the risk of default is minimised.

Food Programmes

Paul Flynn: To ask the Secretary of State for Education and Skills whether the forthcoming people first skills strategy will provide an opportunity for non-industry public interest groups to make representations on the need for food preparation and cooking programmes. [5299]

Jacqui Smith: People 1st (the sector skills council for the hospitality, leisure, travel and tourism industries) have developed a strategy for qualifications for the food preparation and cooking sector and are currently scoping units to meet the industry's needs. The development of the content of these units will be done in collaboration with a range of partners including non-industry public interest groups.

GCSEs

Andrew Rosindell: To ask the Secretary of State for Education and Skills how many students did not achieve five A* to C passes in each year since 1997. [5405]

Jacqui Smith: The information on the number of 15-year-olds not achieving five or more A*-C grades at GCSE is provided in the following table.

	Number of 15-year-old pupils not achieving 5 or more A-C*	*Number of 15-year-old pupils*	*Percentage of pupils not achieving 5 or more A*-C grades*
2004[1]	297,970	643,574	46.3
2003[2]	292,740	622,122	47.1
2002	293,815	606,554	48.4
2001	301,701	603,318	50.0
2000	294,666	580,393	50.8
1999	302,412	580,972	52.1
1998	308,779	575,210	53.7
1997	321,874	586,766	54.9

[1] 2004 figures are revised and based on GCSE and equivalents basis

[2] Figures between 1997 and 2003 only included GCSEs and GNVQs.

Sarah Teather: To ask the Secretary of State for Education and Skills how many pupils have left secondary school with a language GCSE Grade C or above in each London borough in each year since 1997. [5150]

Jacqui Smith: The information on the number of 15-year-olds in maintained schools achieving at least one modern language GCSE at Grade C or above in each London borough between 1997 and 2004 is provided in the following table.

Number and percentages of 15-year-old pupils in maintained schools achieving at least one modern language GCSE at Grade C or above

[1] 2004 figures are revised.

Higher Education Institutions

Mr. Stephen O'Brien: To ask the Secretary of State for Education and Skills how many departments of *(a)* Chinese, *(b)* Arabic, *(c)* chemistry, *(d)* physics and *(e)* mathematics there were in higher education institutions in England in each year between 1994 and 2004; and what the projected numbers are for each year from 2005 to 2010. [3103]

Bill Rammell: Information on the closure, merger or opening of particular university courses and departments is not collected by the Department. Higher Education Institutions are autonomous organisations responsible for their own academic direction and strategic use of funds, and any decisions on closures of departments are made by them, not by Government or the Higher Education Funding Council for England (HEFCE).

The then Secretary of State for Education and Skills wrote to the Higher Education Funding Council for England (HEFCE) at the beginning of December 2004 asking their advice on what types of action should be considered to strengthen and secure subjects of strategic national importance, including mathematics and science. HEFCE have set up an expert group to look at this issue and to report to the HEFCE board this month. The board will inform Ministers of the outcome.

Home-School Agreements

Mr. Gibb: To ask the Secretary of State for Education and Skills pursuant to the Answer of 13 June, Ref 4022, regarding home-school agreements, if she will request from Ofsted the number of schools that have drawn up home-school agreements. [5023]

Jacqui Smith: Ofsted does not collect this information. During inspections Ofsted looks generally at whether a school is meeting its statutory requirements. However, it does not look specifically at whether a school has a Home-School Agreement (HSA) in place. As I said in my earlier reply, we expect all maintained schools to have HSAs in place.

London Fringe Allowance

Bob Spink: To ask the Secretary of State for Education and Skills if she will extend the London fringe allowance for teachers to include Castle Point; and if she will make a statement. [5796]

Jacqui Smith: There are no plans to extend the London fringe allowance for teachers' pay. However, any teachers may be paid recruitment and retention incentives and benefits of any value or nature in addition to their salary, and this is a matter for their schools to decide in the light of local circumstances.

Bob Spink: To ask the Secretary of State for Education and Skills what research her Department has conducted on the impact of ending the teacher salary London fringe allowance at the A130 on teacher recruitment and retention to the east of the A130; and if she will make a statement. [5797]

Jacqui Smith: The Department has not conducted research on the impact on teacher recruitment and retention east of the A130. The Department does evaluate the impact of teachers' pay arrangements and the strategies used to support recruitment and retention. Recent evidence to the School Teachers' Review Body, submitted jointly with our partners from teacher unions and employers, points to the positive impact these strategies are having on teacher recruitment and retention while accepting that there continue to be pressures in places. All schools have discretion to use recruitment and retention incentives to ease any local pressures they face.

Bob Spink: To ask the Secretary of State for Education and Skills how much was spent on *(a)* inner, *(b)* outer and *(c)* fringe allowances for teaching salaries in the last year for which figures are available. [5798]

Jacqui Smith: The figures requested are in the following table.

Costs in £ million

Financial year	Inner London	Outer London	Fringe areas	Total
2003–04[1]	—	83	27	111
2002–03	116	71	24	211
2001–02	109	67	22	197
2000–01	83	51	17	150

[1] Inner London allowances were abolished in April 2003 with the introduction of the Inner London Pay Scales.

Mathematics

Mr. Gibb: To ask the Secretary of State for Education and Skills what guidelines accompany the Framework for Teaching Mathematics: Reception to Year 6 document. [5001]

Jacqui Smith: A range of documents have been produced that develop further the guidance set out in the Framework. Key guidance documents include "Mathematical Vocabulary" which lists the important vocabulary for all year groups; "Teaching Mental Calculation Strategies; Teaching Written Calculations" and sample medium-term lesson plans to demonstrate to teachers how to plan for progression in mathematics.

National Literacy Strategy

Mark Pritchard: To ask the Secretary of State for Education and Skills if she will make a statement on proposed changes to the National Literacy Strategy. [4765]

Bill Rammell: We have appointed Jim Rose to make recommendations on best practice in the teaching of early reading and synthetic phonics in primary schools and early years settings, covering content and pace of learning. He will also make recommendations on the best support for children with significant literacy difficulties to enable them to catch up with their peers, and the relationship between such targeted intervention programmes with synthetic phonics.

Mr. Rose's recommendations will draw on an examination of both academic research and classroom best practice in schools and early years settings, as well as recent reports by the Education and Skills Select Committee, Ofsted and the Clackmannanshire study. He will provide an interim report in November 2005 and make final recommendations early in 2006. Mr. Rose's findings will inform a renewal of the National Literacy Strategy framework for teaching.

New Schools

Dr. Kumar: To ask the Secretary of State for Education and Skills what assessment she has made of the requirement for building new schools in England. [5909]

Jacqui Smith: The demand for building new schools will depend on local factors such as pupil numbers, the capacity of existing schools, and the condition and suitability of existing buildings. Whether it is better value to refurbish or extend an existing school or to build new is a matter for local option appraisal and discussion. Local authorities assess these factors and we do not collect this information centrally.

Nutrition

Paul Flynn: To ask the Secretary of State for Education and Skills whether nutrition education was included in the training of school catering managers between 1975 and 1990. [5286]

Jacqui Smith: We have no record of a specific qualification for school catering managers between 1975 and 1990.

Paul Flynn: To ask the Secretary of State for Education and Skills if she will recommend that the School Food Trust consider the NVQ approach to work-based assessment of nutritional competence at levels 1 to 4. [5300]

Jacqui Smith: We are working with People 1st (the sector skills council for the hospitality, leisure, travel and tourism industries), the Food Standards Agency, the Teacher Training Agency, the Learning and Skills Council and the Qualifications and Curriculum Authority to review and build on the range of catering qualifications that are currently available, including NVQs. Our aim is to ensure that we have a ladder of qualifications that include information on nutritional standards where appropriate, meet the skills needs of all catering staff, and support progression from the level 1 VRQ.

Mr. Burstow: To ask the Secretary of State for Education and Skills what the timetable is for the review of school nutrition standards. [5606]

Jacqui Smith: The School Meals Review Panel will make their recommendations to Ministers on the new draft nutritional standards in early September. A public consultation will follow, in the usual manner. The new standards will become mandatory in schools from September 2006.

Out-of-Hours Learning

Mr. Gibb: To ask the Secretary of State for Education and Skills (1) what her estimate is of the proportion of secondary schools that are ensuring that children in years 10 and 11 are set, on average, between one and a half and two and a half hours of homework per day; [4014]

(2) what her estimate is of the proportion of secondary schools that are ensuring that children in year 9 are set, on average, between one and two hours of homework per day; [4016]

(3) what her estimate is of the proportion of secondary schools that are ensuring that children in years 7 and 8 are set, on average, between 45 and 90 minutes of homework per day; [4017]

(4) what her estimate is of the proportion of primary schools that are ensuring that children in years 3 and 4 are set, on average, about one and a half hours of homework per week; [4018]

(5) what her estimate is of the proportion of primary schools that are ensuring that children in years 5 and 6 are set, on average, about 30 minutes of homework per day; [4019]

(6) what her estimate is of the proportion of primary schools that are ensuring that children in years 1 and 2 are set, on average, about one hour of homework per week; [4020]

(7) what her estimate is of the proportion of schools that have a written policy on homework which is publicly available on request; [4021]

(8) what her assessment is of progress in improving homework policies within *(a)* primary schools and *(b)* secondary schools since the publication of the relevant guidelines in November 1998. [4028]

Jacqui Smith: The Government considers that learning at home is an essential part of the good education to which all our children are entitled. We know, and Ofsted confirm, that a well organised homework programme helps children and young people to develop the skills and attitudes they will need for successful, independent life long learning. Currently my Department does not collect information on individual school's homework policies or the amount of homework they set. We believe it is for schools themselves to make their own decisions in this area, taking account of the Homework Guidelines for Primary and Secondary Schools we provide. Home-school agreements, which we introduced in 1999, promote partnerships between schools and parents, and assist parents in supporting their children's learning at home, including their completion of homework.

Overseas Students

Mr. Clappison: To ask the Secretary of State for Education and Skills how many EU students commenced courses at English universities in each year since 1997, broken down by member state; and how much was paid by them in tuition fees in each of those years. [4849]

Bill Rammell: The two tables given in this answer give data from different sources and hence the two sets of figures are not comparable.

The available information on the number of EU domiciled entrants to full time undergraduate courses at English HE institutions is given in the following table.

EU domiciled entrants[1,2,3] to full time undergraduate courses at English HE institutions for academic years 1997/98 to 2003/04

Domicile	1997/98	1998/99	1999/2000	2000/01	2001/02	2002/03	2003/04

Higher Education Statistics Agency (HESA) student record

The amount of private contributions to tuition fees by students from the European Union in HE in English institutions from academic year 1999/2000 to 2003/04 is given in the following table.

Private contributions to tuition fees by students domiciled in the European Union studying higher education in England for academic years 1999/2000[1] to 2003/04[2]

Academic year	£ million
1999/2000	6.7
2000/01	7.6
2001/02	6.1
2002/03	5.7
2003/04	5.5

[1] Tuition fees were introduced in academic year 1998/99, however as that year was treated as a transitional year, data are not available on the same basis as subsequent years.
[2] Latest year for which data are available.

Student Loans Company

Mr. Clappison: To ask the Secretary of State for Education and Skills how many students from EU member states applied for entry to English universities in 2004–05; and how many were offered a place, broken down by EU member state. [4850]

Bill Rammell: The available information is taken from the Universities and Colleges Admissions Service (UCAS) which covers applicants and accepted applicants to full time first degree, HMD, Diploma of HE and Foundation degree courses at UCAS member institutions. Figures are given in the table.

EU domiciled applicants[1,2] and accepted applicants to full-time undergraduate courses at English institutions by domicile, 2004 entry

Number

Country of domicile	Applicants	Accepted applicants
Austria	335	195
Belgium	635	405
Denmark	430	255
Finland	585	300
France	2,980	1,595
Germany	2,605	1,395
Gibraltar	220	165
Greece	2,250	1,370
Irish Republic	7,180	1,510
Italy	865	440
Luxembourg	230	130
Netherlands	490	240
Portugal	680	325
Spain	1,090	645
Sweden	1,235	590
Total EU	21,805	9,560
Cyprus	1,875	1,295
Czech Republic	205	135
Estonia	65	45
Hungary	160	100
Latvia	75	45
Lithuania	95	55
Malta	65	35
Poland	675	445

Universities and Colleges Admissions Service (UCAS)

Partnerships for Schools

Helen Jones: To ask the Secretary of State for Education and Skills which companies are part of the Partnerships for Schools advisory body; how many of those companies are also advising local authorities on projects; and which companies are part of consortia bidding for projects. [4770]

Jacqui Smith: Partnerships for Schools (PfS) was designated as a non-departmental public body from 1 April 2004 under a joint venture agreement between DfES and Partnerships UK and is a private limited company incorporated under the Companies Act 1985. The company is limited by shares and is wholly owned by the DfES. It has been established to support the local delivery of the Building Schools for the Future (BSF) programme.

Information regarding the companies which are advising local authorities on projects and those which are part of consortia bidding for projects is not held centrally.

Performance Related Pay

Mr. Rob Wilson: To ask the Secretary of State for Education and Skills what percentage of teachers in England have not qualified for the performance related pay scheme since its establishment. [5652]

Jacqui Smith: The requested information is not available in the format requested.

In January 2004 there were 387,500 (headcount) number of regular teachers employed on the classroom and post threshold pay scales. Of these 48 per cent. were employed on the classroom pay scale. It is estimated that around three quarters of these had not reached the highest point of the scale and were therefore not eligible to apply for threshold assessment.

Postgraduates

Mr. Stephen O'Brien: To ask the Secretary of State for Education and Skills how many postgraduates gained *(a)* Master of Arts level, *(b)* Master of Science level, *(c)* Master of Business Administration level and *(d)* Master of Philosophy level qualifications from higher education institutions in England in each year between 1994 and 2004. [3237]

Bill Rammell: The Department does not hold specific information on the type of masters degree obtained. The overall number of masters qualifications is in the table:

Masters qualifications at English higher education institutions

	1994/95	*1995/96*	*1996/97*	*1997/98*	*1998/99*
Medicine and dentistry	970	700	1,170	1,125	1,310

Note:
The figures are taken from the HESA student record which has been collected annually by the Higher Education Statistics Agency since 1994/95, and cover home and overseas students obtaining masters qualifications at English higher education institutions. There is a pronounced drop in the number of students in the 'combined' category for 2003/04—this is due to a change in the way the Open University returns its data to HESA.

Higher Education Statistics Agency (HESA). Figures have been rounded to the nearest 5.

Pupil Funding

Mr. Michael Foster: To ask the Secretary of State for Education and Skills what assessment she has made of the F40 group pupil entitlement model of funding; and if she will make a statement. [4831]

Jacqui Smith: The F40 group model provides a framework for local authorities to inform their decisions on the distribution of funding between their schools, as do other pupil entitlement or needs led models. I met representatives of the F40 group on Thursday 16 June to discuss their model.

Pupil Numbers (Gloucestershire)

Mr. Drew: To ask the Secretary of State for Education and Skills how many children attended schools in Gloucestershire local education authority area in 2004–05, broken down by local authority area; and what the projected figures are for 2005–06. [5194]

Jacqui Smith: The available information is given in the table.

Maintained primary and secondary schools[1]: Actual and projected numbers of pupils (headcount) 2004/05 and 2005/06 Gloucestershire Local Education Authority area

	Number (headcount) of pupils			
	2004/05 (Provisional)[2]		2005/06 (Projected)[3]	
	Primary level[4]	Secondary level[5]	Primary level[4]	Secondary level[5]

Notes:

1. Total spending on schools by LEAs is not yet available. The figures provided show the funding allocated to each LEA by the Government for pupils aged 3–10 and 11–15.
2. Total funding includes funding via the relevant sub-blocks of the Education Formula Spending settlement / Standard Spending Assessment and revenue grants allocated at an LEA level. It includes the pensions transfer to EPS and the Learning and Skills Council, and is in cash terms.
3. Total funding also includes all revenue grants in DfES Departmental Expenditure Limits relevant to pupils aged 3–10 and 11–15, and exclude EMAs and grants not allocated at LEA level. For those LEAs in receipt of advance of grant under the transitional support arrangements for 2004–05, advance grant funding is included in the year of payment (2004–05). There will be a consequential reduction in DfES grant for these LEAs in future years (either 2006–07 and 2007–08 or 2008–09, depending on the terms on which the advance was given to the LEA).
4. The pupil numbers used to convert £ million figures to per pupil are those underlying the SSA/EFS settlement calculations plus PLASC 3-year-old maintained pupils and estimated 3 to 4-year-olds funded through state support in maintained and other educational institutions where these are not included in the SSA pupil numbers.
5. Rounding: Per pupil figures are rounded to the nearest £10. Total allocation figures are rounded to the nearest £10 million.
6. 2005–06 figures are provisional as some grants have not yet been finalised/validated.

School Admissions

Mr. Burstow: To ask the Secretary of State for Education and Skills if she will list decisions by the schools adjudicator in respect of published admission numbers where the recommendation of the local education authority has been rejected in each of the last three years, broken down by *(a)* local education authority and *(b)* reasons for the decision. [5607]

Jacqui Smith: Adjudicators are independent of the Department for Education and Skills. Details of the decisions they have made are published each year by the Office of the Schools Adjudicator in their Annual Report. Copies, for each year since the office was created in April 1999, have been placed in the House Library. All adjudicator decisions can be read in full on the school adjudicator website at www.schools adjudicator.gov.uk

School Building

Mr. Hoban: To ask the Secretary of State for Education and Skills what capital funding is available to

schools for 2006–07; and how much of that funding is accounted for by *(a)* devolved capital expenditure, *(b)* Building Schools for the Future funding and *(c)* specific capital programmes. [4863]

Jacqui Smith: The capital funding currently budgeted for schools for 2006–07 is tabled as follows:

	£ million
Devolved formula capital	1,000
Buildings Schools for the Future	2,177
Specific Capital Programmes:	
Specialist Schools	35
Voluntary aided schools	444
Sustainable transport	20
Modernisation	602
Basic need	400
School access initiative	84
Targeted capital fund	300
LSC 16 to 19 joint budget contribution	70
Other ICT	249
Academies	365
Other	9
Total	5,755

Mr. Hoban: To ask the Secretary of State for Education and Skills what guidance her Department has produced for building special schools under the Building Schools for the Future programme. [4911]

Jacqui Smith: We have issued guidance on how to include special schools in the educational vision for an area receiving Building Schools for the Future.

We are also consulting on building and design guidance for special schools, which will apply to Building Schools for the Future and other programmes. This is an update of non-statutory design guidance in the new draft Building Bulletin 77: Designing for Pupils with Special Educational Needs and Disabilities, which was issued on the website for public consultation between 1 April 2005–24 June 2005.

Mr. Hoban: To ask the Secretary of State for Education and Skills what estimate she has made of the cost of building *(a)* a special school and *(b)* a mainstream school under the Building Schools for the Future programme. [5419]

Jacqui Smith: The cost of a school will depend on the number of pupils and their needs which will vary locally in each case. As an example, under Building Schools for the future programme, an estimated cost for an average 900 place mainstream secondary school without a sixth form may be approximately £15 million gross cost and an estimated cost for an average 72 place special school for pupils with severe complex needs may be £7.5 million gross cost. These cost estimates are current and are based on DfES cost data averaged across a range of schools. They include for furniture, fittings ICT and equipment, professional fees, an average location factor and an allowance for abnormal costs e.g for site works. The costs for the mainstream secondary school are based on the agreed basic net cost rates per square metre of £1,224/m^2. The cost rate used for the special school for pupils with severe and complex needs is the proposed rate of £1,554/m^2 and is subject to the public consultation of the draft improved building standards in Building Bulletin 77. These proposed standards and their costs will apply equally to BSF and other school projects. It must be emphasised that costs will vary greatly across the country and will increase substantially in certain locations.

Mr. Rob Wilson: To ask the Secretary of State for Education and Skills what proportion of the sum allocated for school repairs in the last Budget has been spent. [5397]

Jacqui Smith: An additional £650 million was promised in the last Budget in respect of capital work on primary schools, to be allocated in the financial years 2008–09 and 2009–10. This is in support of the Government's aim that half of the primary stock will be rebuilt or refurbished over a 15 year period. Details will be announced in late 2005.

Mr. Drew: To ask the Secretary of State for Education and Skills how much public funding has been spent on repairs to school buildings in Gloucestershire in each year since 1997. [5193]

Jacqui Smith: Revenue expenditure figures on the maintenance and improvement of schools are likely to vary from year to year depending on the unique circumstances of a particular LEA. For example, revenue expenditure will increase in years where there have been adverse weather conditions (e.g. repairing storm damage) and is also likely to vary with the number and age of the school buildings within the LEA. Revenue expenditure will also be affected by the amounts of capital expenditure employed at a school. Capital spending in Gloucestershire LEA on school buildings has increased from £7.95 million in 1997–98 to £36.78 million in 2004–05.

The information concerning public funding spent on repairing schools in Gloucestershire is contained within the following table:

Maintenance and improvement of school buildings and grounds in Gloucestershire LEA since 1997

	£[1]
1997–98[2,3]	3,712,000
1998–99[2,3]	4,307,000
1999–2000[2,3]	10,756,000
2000–01[2,3]	9,490,000
2001–02[2,3]	9,307,000
2002–03[2,3]	5,259,000
2003–04[2,3]	5,446,000

[1] Figures are rounded to the nearest £1,000.

[2] Figures for 1997–98 to 2001–02 cover the repair and maintenance of buildings, fixed plant and grounds which includes all expenditure on non-capital building works, including repairs and maintenance of buildings, and non-capital expenditure on fixed plant and grounds. Figures for 2002–03 and 2003–04 are the combination of the revenue expenditure on building (including fixed plant) maintenance and improvement and grounds maintenance and improvement (CFR categories E12 + E13). Any capital expenditure on school buildings is not included in this table.

[3] Figures for 2002–03 onwards will not be directly comparable with the figures for earlier years as figures for 1997–98 to 2001–02 are for all LEA maintained nursery, primary, secondary and special schools (pre-primary expenditure accounts for £8,500, £15,000 and £138,000 of the respective totals in 1999–2000, 2000–01 and 2001–02) while nursery figures for 2002–03 and

2003–04 are not available and have therefore been excluded for these two years. Also, for some LEAs, expenditure that had previously been attributed to the school sectors was reported within the LEA part of the form in 2002–03 and 2003–04 and would therefore be excluded from the totals for those years although the precise amount of this is not quantifiable from existing sources.

Notes:

1. The blank rows denote the change of source from LEAs' education Revenue Outturn Statements submitted to ODPM to Section 52 Outturn Statements in 1999–2000, and to the review of the Section 52 categories in 2002–03 following the introduction of Consistent Financial Reporting (CFR) to schools.
2. The Department is due to collect the figures for 2004–05 in October 2005.

School Expansion

Mr. Rob Wilson: To ask the Secretary of State for Education and Skills what steps she is taking to allow successful schools to expand their present capacity. [5402]

Jacqui Smith: We strongly support the expansion of successful and popular schools where they believe they can sustain their quality. We have therefore provided that all schools may publish their own proposals to expand, and introduced a presumption that proposals by successful and popular schools should be approved so that as many parents as possible are able to gain a place for their child at the school of their choice. In addition, successful and popular secondary schools may apply direct to the Department for a contribution to the capital cost of any necessary building work. If the balance of funding is not available from other sources, the Department may fund the full cost, which may be recouped from the local authority.

We have also consulted on proposals to speed up the expansion process for secondary schools, and give them a right of appeal to the Schools Adjudicator if their proposals are rejected by the local School Organisation Committee.

School Meals

Mr. Gibb: To ask the Secretary of State for Education and Skills pursuant to the answer of 7 June 2005, *Official Report*, column 477W, on school meals, how many schools provide *(a)* vegetables and *(b)* fruit on a majority of school days. [5021]

Jacqui Smith: The Department does not hold this information centrally. However current nutritional guidelines stipulate that, for primary and secondary schools, a piece of fruit and a vegetable must be available on the menu every day.

The Department of Health is funding the school fruit and vegetable scheme, part of the 5 A DAY programme, to increase fruit and vegetable consumption. Under the scheme, all four to six-year-old children in LEA maintained infant, primary and special schools will be entitled to a free piece of fruit or vegetable each school day.

Mr. Burstow: To ask the Secretary of State for Education and Skills what assessment her Department has made of the impact of existing catering contracts on plans to improve school meals services. [5608]

Jacqui Smith: We will expect all schools to meet the new standards for school meals—whether they have LEA catering provision, in-house catering or contract directly with a private provider. That is why we are working closely with all stakeholders, including industry, to develop and implement the transformation.

Officials are examining the implications of a change to the law for existing contracts, for when the proposed tougher minimum nutritional standards become mandatory in September 2006. We envisage that the majority will not present a problem, but are working to understand the scale and nature of any potential difficulties.

School Places (Berkshire)

Mr. Rob Wilson: To ask the Secretary of State for Education and Skills how many vacant *(a)* primary and *(b)* secondary school places there are in each local education authority in Berkshire. [5458]

Jacqui Smith: The latest published figures on the number of empty primary and secondary places in each local authority in Berkshire are set out in the following table.

Local authority	*Primary*	*Secondary*
Bracknell Forest	972	895
Reading	1,751	854
Slough	1,564	309
West Berkshire	1,328	330
Windsor and Maidenhead	670	524
Wokingham	1,304	316
Total	7,589	3,228

Source:
Surplus Places Survey 2003

Mr. Rob Wilson: To ask the Secretary of State for Education and Skills how many secondary school exclusions there have been in each local education authority in Berkshire in each year since 1997. [5459]

Jacqui Smith: The requested information is given in the table. Figures for 2003/04 will be available from 23 June 2005.

Maintained secondary schools1: Number and percentage of permanently excluded pupils 1997/98 to 2002/03

		1997/98		*1998/99*		*1999/2000*	
		Number	*Percentage*[2]	*Number*	*Percentage*[2]	*Number*	*Percentage*[2]
867	Bracknell Forest	32	0.52	36	0.99	26	0.43
868	Windsor and Maidenhead	34	0.35	21	0.21	22	0.22
869	West Berkshire	28	0.26	18	0.16	14	0.12
870	Reading	44	0.74	44	0.71	24	0.38
871	Slough	32	0.44	14	0.19	9	0.12
872	Wokingham	18	0.17	31	0.30	11	0.10

		Number	Percentage[2]	Number	Percentage[2]	Number	Percentage[2]
867	Bracknell Forest	23	0.38	23	038	18	0.30

871	Slough	24	0.30	5	0.06	6	0.07
872	Wokingham	15	0.14	11	010	20	0.18

[1] Includes middle schools as deemed.
[2] The number of permanent exclusions expressed as a percentage of the number (headcount) of pupils in maintained secondary schools.
Source:
Annual Schools Census

Schools (Special Measures)

Helen Jones: To ask the Secretary of State for Education and Skills what percentage of students were entitled to free school meals in each of the schools placed in special measures in the last 10 years. [3223]

Jacqui Smith: The information requested has been placed in the Library.

Secondary Pupils (Educational Achievement)

Mr. Gibb: To ask the Secretary of State for Education and Skills what assessment she has made of the study conducted by Professor David Jesson of York university into the secondary school educational achievements of children who achieved the highest marks in Key Stage 2 tests in 1999. [5838]

Jacqui Smith: I refer the hon. Member to the reply I gave on 7 June 2005, *Official Report*, column 474W-75W to the hon. Member for Hertsmere (Mr. Clappison).

Sex Education

Lynne Featherstone: To ask the Secretary of State for Education and Skills what sex education information her Department has distributed to secondary school pupils; and if she will make a statement. [4798]

Jacqui Smith: The Department is not responsible for distributing information on sex education to secondary school pupils. Head teachers and governors decide on the content and materials used in sex and relationship education (SRE) in consultation with parents and with support from Government websites such as the PSHE Teachernet site. Individual schools' SRE policies should have regard to the Department's SRE guidance issued to all schools in July 2000.

SRE in secondary schools should inform young people about contraception and safer sex, and enable them to develop skills to avoid being pressured into unwanted or unprotected sex. It should also cover information and knowledge about HIV/AIDS.

Special Educational Needs

Mr. Cameron: To ask the Secretary of State for Education and Skills if she will seek legislative changes to remove the presumption in favour of inclusion for children with special educational needs; and if she will make a statement. [4727]

Maria Eagle: Removing Barriers to Achievement, our special educational needs strategy, already provides a clear national vision for improving support and outcomes for all children with special educational needs. It sets out the way in which policy and practice in SEN will need to develop in the coming years, and sets out an ambitious programme of sustained action and review. The aim of the strategy is to build the capacity of schools, both special and mainstream, early education settings and local education authorities, from a solid base nationally, to take forward change to meet diverse pupil needs and to increase parents' confidence in SEN provision. We believe that this is best achieved without further legislation, particularly as there have been significant changes to the statutory framework within the last four years.

Synthetic Phonics

Mr. Gibb: To ask the Secretary of State for Education and Skills pursuant to the answers of 13 June 2005, *Official Report*, column 229W, regarding the independent review of the role of synthetic phonics, when she will announce the names of the people who will work alongside Mr. Jim Rose in conducting the review. [5025]

Jacqui Smith: We are currently discussing with Jim Rose the support he will need. We will announce the names of his advisers as soon as possible.

Teacher Recruitment

Bob Spink: To ask the Secretary of State for Education and Skills how much was paid to agencies for teacher recruitment by each local education authority in the last year for which figures are available; and how much was spent by *(a)* each such authority and *(b)* schools in each such authority on teacher recruitment in that year. [5799]

Jacqui Smith: The information is not collected centrally.

Teenage Pregnancies

Andrew Rosindell: To ask the Secretary of State for Education and Skills what steps the Government are taking to tackle teenage pregnancies. [5395]

Beverley Hughes: The Government's 10-year Teenage Pregnancy Strategy continues to make progress in meeting its target of a 50 per cent. reduction in under-18s conception rates by 2010. There has been a 9.8 per cent. decline in under 18 conceptions between 2003 (latest year for which we have figures available) and 1998, the baseline year for the Teenage Pregnancy Strategy and a 9.9 per cent. reduction in under 16 conceptions between 1998 and 2003. Four out of five

local authorities show an overall decline in their rates and eight out of nine regions have reductions ranging from 8–16 per cent.

This comprehensive strategy covers four key themes which includes joined up action, national campaign, prevention and support. Delivery of the strategy continues to be a priority for the Government. It is clear that an accelerated rate of reduction is needed to meet the target by 2010. We have asked all local partnerships to intensify their efforts to strengthen the delivery of the strategy to areas with the highest under-18 conception rates. 50 per cent. of under 18 conceptions are in 20 per cent. of wards with the highest rate. The vast majority of local authority areas have at least one high rate ward. Effective, comprehensive targeting of local strategies in these 'hot spot' areas is now vital, together with dissemination of best practice for those local authorities whose reduction chance is well above the national average.

Trinity Roman Catholic Primary School

Mrs. Ellman: To ask the Secretary of State for Education and Skills when she expects building for the new Trinity Roman Catholic Primary school in Liverpool, Riverside to begin. [6145]

Jacqui Smith: I am pleased to report that we are writing to the school to confirm that we have now agreed the level of funding and the design of the new school buildings. This confirmation will mean that the work can proceed as soon as possible.

Truancy

Dr. Kumar: To ask the Secretary of State for Education and Skills what measures are being taken to reduce truancy in schools. [5907]

Jacqui Smith: We are concerned about all forms of absence from school, but truancy is of particular concern. We continue to work with parents, pupils, schools and local authorities to improve school attendance and to tackle truancy.

We have put in place a range of measures such as extra support for schools and local authorities from expert advisers and through additional resources. We promote effective practices to improve school attendance including national truancy sweeps, first day contact with the parents of absent pupils and electronic registration systems. We have also introduced the 'Fast-track Framework' a system to ensure early identification of attendance problems and a time-limited approach to solving them.

We believe it is vital that parents play their part by ensuring that their child attends school regularly and the vast majority do so. Where parents are in need of support to fulfil their responsibilities, parenting contracts can provide them with the professional support they need and help them focus on what needs to be done to improve their child's attendance. However, where parents are not unable, but simply unwilling, to fulfil their responsibilities, they face strong measures such as penalty notices, prosecutions and compulsory Parenting Orders.

By September 2007, we expect all secondary schools to be working together in collaborations, with funds devolved from their local authorities, to manage support and provision for persistent truants as well as pupils who are excluded or at risk of exclusion.

Voice Training

Mr. Davey: To ask the Secretary of State for Education and Skills what representations she has received on providing *(a)* new and *(b)* existing teachers with voice training. [5628]

Jacqui Smith: My right hon. Friend has received no such representations.

Mr. Davey: To ask the Secretary of State for Education and Skills what research her Department has *(a)* commissioned and *(b)* evaluated on the effects of voice training on the ability of teachers to control classes. [5629]

Jacqui Smith: The Department has not commissioned or evaluated research into this subject.

Youth Services Green Paper

David Taylor: To ask the Secretary of State for Education and Skills when the Green Paper on youth services will be published. [5954]

Beverley Hughes: We intend to publish the Youth Green Paper shortly.

David Taylor: To ask the Secretary of State for Education and Skills for what reasons the Green Paper on youth services and young people has not yet been published. [6031]

Beverley Hughes: We are working on new proposals for young people covering five main areas: places to go and things to do, design and delivery of services, information, advice and guidance, support for teenagers at risk and clarification of local roles, responsibilities and funding. We intend to publish the youth Green Paper shortly.

Written Answers to Questions

Wednesday 22 June 2005

WALES

NHS Waiting Lists

10. **Andrew Selous:** To ask the Secretary of State for Wales what discussions he has had with the National Assembly for Wales about NHS waiting lists in Wales. [5069]

Mr. Hain: I regularly meet the Assembly First Minister and the health service in Wales is one of the topics that we frequently discuss.

Older People

11. **Mrs. James:** To ask the Secretary of State for Wales what steps the Government plans to take to improve the quality of life of older people in Wales. [5070]

Nick Ainger: The Government is taking a number of steps to improve the quality of life of older people in Wales.

I am proud that this month the Commissioner for Older People (Wales) Bill was introduced into the other place, and received its Second Reading on 14 June.

Child Care

12. **Bob Spink:** To ask the Secretary of State for Wales what discussions he has had with the National Assembly for Wales Government on the effects of tax credits on the take-up of childcare in Wales. [5071]

Nick Ainger: I regularly meet with Ministers from the Welsh Assembly Government to discuss a range of issues, including the effects of tax credits on the take-up of childcare in Wales.

Hospitals

13. **Mr. David Jones:** To ask the Secretary of State for Wales whether he has met the National Assembly for Wales Minister for Health to discuss the provision of new hospitals in Wales. [5072]

Mr. Hain: I have regular meetings with the Assembly First Minister and we regularly discuss health matters.

Over the last year, 12 new major hospital development schemes have begun in Wales. These include the building of a number of new hospitals and the renovation and modernisation of a significant proportion of existing hospitals.

Digital Signals

Peter Law: To ask the Secretary of State for Wales what discussions he has had with the Secretary of State for Culture, Media and Sport on measures to improve digital signals in the South Wales valley communities. [4039]

Mr. Hain: Current levels of digital terrestrial coverage are not indicative of the situation post-switchover. Coverage is, at present, limited to only nine of the 200 transmitters in Wales to prevent interference being caused to viewers of analogue television services. At the time of switchover, these restrictions can be removed and the power and coverage of digital services will increase to match that currently achieved by analogue. Planning for switchover is making provision for all of the existing transmitters to broadcast digital services.

We are committed to achieving digital switchover between 2008 and 2012 ensuring universal access to high quality digital television through a mix of terrestrial, cable and satellite services. This will happen region by region, and we will make sure that the interests of elderly people and other vulnerable groups are protected.

Laptop Computers

Lynne Featherstone: To ask the Secretary of State for Wales how many laptop computers have been used by *(a)* Ministers, *(b)* special advisers and *(c)* officials in his Department in each year since 1995; how many have been (i) lost and (ii) stolen in that period; what the cost was of the use of laptops in that period; and if he will make a statement. [4114]

Mr. Hain: The Wales Office was established July 1999, and during this time there have been no losses or thefts of laptops. The Wales Office is currently issued with two laptops, one allocated to the Minister and an official. The laptops are provided to the Wales Office under the DCA PFI Contract since April 2004 at an annual cost of £4,055.

Railways

Peter Law: To ask the Secretary of State for Wales what discussions he has had with Network Rail on the inclusion of Newport as a through destination on the planned Cardiff to Ebbw Vale passenger railway. [4035]

Mr. Hain: The Ebbw Vale railway project is being delivered in two phases. Phase 1 comprises an hourly service from Ebbw Vale to Cardiff starting in 2007; phase 2 will be an hourly service from Ebbw Vale to Newport.

I understand that the Newport service cannot begin before 2009 because of the need for major re-signalling works in the Newport area by Network Rail.

Peter Law: To ask the Secretary of State for Wales what representations he has made to the Strategic Rail Authority on improving the main line passenger service from London to South Wales. [4037]

Mr. Hain: The Strategic Rail Authority has recently invited detailed bids for the Greater Western Franchise. One of the authority's objectives is to improve operational performance and sustain a level of service quality consistent with meeting customer needs. The

authority has also launched a public consultation on the specification for the franchise. Where appropriate, revised instructions can be given to bidders in the light of consultees' responses.

Smoking

Julie Morgan: To ask the Secretary of State for Wales what discussions he has had with the Secretary of State for Health on legislation relating to smoking and its impact in Wales. [5068]

Nick Ainger: My right hon. Friend has had regular discussions over the last few months with the Secretary of State for Health on this matter.

Earlier this week the Government published consultation on proposals for introducing smoke free environments in England and Wales.

South Wales Valleys

Huw Irranca-Davies: To ask the Secretary of State for Wales what assessment he has made of the regenerative potential for towns in the South Wales valleys of a scheme similar to the Market Towns Initiative. [5059]

Mr. Hain: Regenerating the South Wales valleys is a major priority for this Government. We secured Objective 1 funding for West Wales and the valleys, and this successful programme is having a huge impact on towns and communities across the valleys. In the South Wales valleys, £154.9 million of Objective 1 grant has been committed to 313 local projects, representing more than £308 million of total project investment.

As part of its sustainable communities agenda, the Assembly also runs the Communities First programme, which is a comprehensive approach to area-based regeneration. The programme applies to many of the most deprived areas in the South Wales valleys. It was launched on 31 March 2000 and has a budget of £150 million until 2006.

CADW also operate the Townscape Heritage Initiative scheme, which is a Heritage Lottery Fund run scheme aimed to promote urban regeneration but biased towards heritage conservation by improving town centres, through the restoration of historic architecture.

There are currently 14 Townscape Heritage Initiatives ongoing around Wales, with a further two proposed in South Wales valleys areas (Maesteg in Bridgend and Rhymney in Caerphilly).

In addition, the Assembly operate a range of measures to assist rural towns, for example the £1.8 million a year Rural Community Action programme which covers nine local authority areas and is benefiting rural towns in places such as Flintshire, Wrexham and the Vale of Glamorgan. Over 100 projects are also being supported under a £8.7 million programme in rural areas to support basic services, renovation of villages and supporting local tourism and craft sectors. A Rural Retail Scheme is also in operation designed to help encourage the retention of retail facilities in rural areas.

DEPUTY PRIME MINISTER

Construction (Litchfield)

Michael Fabricant: To ask the Deputy Prime Minister if he will meet the directors of Lichfield and Hatherton Canals Restoration Trust Limited to discuss the route that the restored canal will take with respect to Planning Policy Guidance 13, and its progress to date. [4176]

Yvette Cooper: This is a local issue for Staffordshire county council, Lichfield district council and the Hatherton Canals Restoration Trust. Outline Planning Permission for the development including the Lichfield Southern Bypass has already been granted by Lichfield district council and a legal agreement entered into with the developers. It is therefore inappropriate for my right hon. Friend the Deputy Prime Minister and other Ministers to enter into discussion about these matters.

Crematoria

Mrs. Spelman: To ask the Deputy Prime Minister what guidance the Government issues to local authorities relating to *(a)* crematoria and *(b)* the display of religious symbols in crematoria. [5577]

Ms Harman: I have been asked to reply

Regulations relating to the cremation of bodies are made under the Cremation Act 1902. Guidance on these regulations is issued from time to time as the need arises. No guidance has been issued on the display of religious symbols in crematoria and there are no plans to do so.

Environmental Services (London)

Sarah Teather: To ask the Deputy Prime Minister how much was spent by each London borough per 1,000 population on environmental services in the last year for which figures are available. [2467]

Jim Fitzpatrick: Table 1 lists the net current expenditure for environmental services as reported to the Office of the Deputy Prime Minister in Revenue Outturn (RO) returns for 2003–04-RO5 data (line 290).

Table 1: Net current expenditure on environmental services in 2003–04 for each London borough

	Total environmental services (£000)
Barking and Dagenham	8,295
Barnet	15,332
Bexley	17,239
Brent	17,791
Bromley	21,085
Camden	19,293
City of London	15,862
Croydon	24,146
Ealing	17,319
Enfield	16,612
Greater London Authority	611
Greenwich	17,814
Hackney	24,206
Hammersmith and Fulham	2,322
Haringey	13,077
Harrow	12,264
Havering	6,759
Hillingdon	9,564
Hounslow	10,111
Islington	16,312

Table 1: Net current expenditure on environmental services in 2003–04 for each London borough

	Total environmental services (£000)
Kensington and Chelsea	13,637
Kingston upon Thames	9,077
Lambeth	15,816
Lewisham	20,591
Merton	12,739
Newham	22,403
Redbridge	11,006
Richmond upon Thames	8,113
Southwark	23,761
Sutton	14,417
Tower Hamlets	20,961
Waltham Forest	14,299
Wandsworth	15,549
Westminster	38,999

House Demolition

Mr. Walker: To ask the Deputy Prime Minister how many houses in *(a)* Greater Manchester and *(b)* Merseyside are scheduled to be demolished in (i) 2005, (ii) 2006, (iii) 2007, (iv) 2008 and (v) 2009; and if he will make a statement. [3220]

Yvette Cooper: Demolition is a matter for individual local authorities in the light of local circumstances.

Housing

Mrs. Spelman: To ask the Deputy Prime Minister what the estimated typical *(a)* number of rooms and *(b)* floor space is for a property provided by his Department's £60,000 home scheme. [5423]

Yvette Cooper: The £60,000 target specified in the Design for Manufacture competition relates to the construction of a two bedroom home with a minimum gross internal floor area of 76.5m^2.

Mrs. Spelman: To ask the Deputy Prime Minister whether the properties provided by the £60,000 home scheme will be sold as *(a)* leasehold, *(b)* commonhold and *(c)* freehold properties. [5587]

Yvette Cooper: It is expected that a range of homes with a variety of tenures will be built under the Design for Manufacture competition, and that about 30 per cent. of all of the homes will be made available under the terms of the First Time Buyers initiative. The precise mix of housing types and tenures on each site will depend on local circumstances.

Mr. Dismore: To ask the Deputy Prime Minister when he will publish the consultation document on a revised means of determining overcrowding. [4363]

Yvette Cooper: The Office of the Deputy Prime Minister is considering the future of the statutory overcrowding standards and plans to publish a consultation paper in the near future.

Mr. Dismore: To ask the Deputy Prime Minister if he will list the 15 local councils and 100 wards with the highest proportion of overcrowded housing, indicating in each case *(a)* the proportion living in each category of property and *(b)* the proportion of all households living in overcrowded accommodation. [4364]

Yvette Cooper: The 15 local councils with the highest proportion of accommodation which fails the bedroom standard and the wards within these councils are listed in a table to be placed in the Library of the House. Against each council and each ward is the estimated proportion of households within that council/ward that are affected.

The 100 wards with the highest levels of overcrowding across the country have not been determined.

A breakdown of the proportion of overcrowded households by property type is not available.

Mr. Dismore: To ask the Deputy Prime Minister what his Department's policy is regarding whether living rooms should be used as sleeping accommodation for permanent members of a household; and if he will make a statement. [4365]

Yvette Cooper: The Office of the Deputy Prime Minister recognises that the statutory overcrowding standards in Part 10 of the Housing Act 1985 can be construed as permitting the use of living rooms as sleeping accommodation, although most local authorities apply higher standards. The Part 10 standards are widely recognised as out of line with modern expectations, and we intend to publish a consultation paper on the future of these standards in the near future.

Local Tax Take

John Hemming: To ask the Deputy Prime Minister what the target increase in local tax take from Government was in each year since the creation of the council tax; and what the actual increase in local tax take as implemented by local authorities was. [4952]

Mr. Woolas: The Government do not set a target increase in the amount which local authorities can raise from council tax, which is dependent on councils' spending decisions.

Tabled are figures for the amounts of council tax received by local authorities in each financial year for which figures are available since the introduction of the council tax on 1 April 1993.

The table also expresses these amounts as cash and percentage increases over the corresponding figures for the previous year.

	Council tax received during the year[1] *(£ million)*	*Increase over previous year*	
		£ million	*Percentage*
1993–94	6,807	—	—
1994–95	7,546	739	10.9
1995–96	8,151	605	8.0
1996–97	8,799	648	7.9
1997–98	9,570	771	8.8
1998–99	10,579	1,009	10.5
1999–2000	11,457	878	8.3
2000–01	12,242	785	6.9
2001–02	13,208	966	7.9
2002–03	14,510	1,302	9.9
2003–04	16,392	1,882	13.0

[1] Regardless of the financial year to which the amounts relate; excludes amounts paid through council tax benefit.

QRC4 returns to ODPM

New Build Homebuy

Mrs. Spelman: To ask the Deputy Prime Minister what the estimated sale price will be of a typical property provided by New Build Homebuy. [5581]

Yvette Cooper: Proposals for New Build Homebuy are set out in our consultation paper—"Homebuy—expanding the opportunity to own" (April 2005). The consultation period closes on 24 June.

The Office of the Deputy Prime Minister have made no estimates of the sale price of a New Build Homebuy properties. This will vary depending on a number of factors including the prevailing market prices in the relevant location and the proportion being purchased.

Race Relations (Amendment) Act 2000

Keith Vaz: To ask the Deputy Prime Minister how many and what percentage of staff in his Office have received training on the general and specific duties of the Race Relations (Amendment) Act 2000, broken down by *(a)* ethnicity and *(b)* grade. [3527]

Jim Fitzpatrick: To date, 107 people (5.1 per cent. of ODPM staff) have had training on the specific duties relating to the Race Relations (Amendment) Act 2000. In addition, induction training ensures that all new staff are made aware of the Office's responsibilities under the Act. Although the Office is able to produce staff breakdowns by grade and ethnicity, this data is currently unavailable in respect of specific training courses.

The Office's Race Equality Scheme, which sets out how it will meet its general and specific duties under the Act over the period 2005 to 2008, was published in draft on 31 May 2005, and is currently out to consultation.

Regional Assemblies

Mr. Rob Wilson: To ask the Deputy Prime Minister what the running costs of the South East of England Regional Assembly have been in each of the last five years. [5389]

Yvette Cooper: I refer the hon. Member to the answers given to the hon. Member for East Worthing and Shoreham (Tim Loughton) and the hon. Member for Taunton (Mr. Browne) on 17 March 2005, *Official Report*, column 368W.

Regional Fire Control Centres

Mr. Fallon: To ask the Deputy Prime Minister if he will list the sites short listed for the proposed regional fire control centres. [4935]

Jim Fitzpatrick: I refer the hon. Member to the answer I gave on 6 June 2005, *Official Report*, columns 410–11W, to the hon. Member for North Thanet (Mr. Gale).

Right to Buy

Mrs. Spelman: To ask the Deputy Prime Minister what plans the Government have to increase Right to Buy discount ceilings in line with house price inflation. [4275]

Yvette Cooper: There are no current plans to increase the discounts available under the Right to Buy scheme to tenants who wish to purchase 100 per cent. of the home they live in. However, the Office of the Deputy Prime Minister is consulting on a number of options for tenants who wish to purchase a share of their homes under Social Homebuy.

Torquay Crematorium Chapel

Mr. Steen: To ask the Deputy Prime Minister what guidance Torbay Unitary Authority sought from his Office in relation to *(a)* changing the name of Torquay Crematorium Chapel and *(b)* decreasing the size of the cross inside the ceremonial hall. [5962]

Ms Harman: I have been asked to reply.

Torbay Unitary Authority has not sought any advice from my Department in relation to changing the name of Torquay Crematorium Chapel and decreasing the size of the cross inside the ceremonial hall.

TRANSPORT

A303 (Stonehenge)

Simon Hughes: To ask the Secretary of State for Transport what the estimated total cost is of the tunnelled section of the A303 in Wiltshire near Stonehenge. [111]

Dr. Ladyman: The approved budget for the A303 Stonehenge Improvement is £223 million, which includes an estimated £100 million for the costs of the bored tunnel section. These figures are currently being reviewed by Highways Agency following further site investigations, and some further increase in costs is now anticipated. Details of the revised cost will be announced alongside our decision on the Inspector's Report following the public inquiry into the Stonehenge Improvement scheme.

Air Safety

Sarah Teather: To ask the Secretary of State for Transport how many *(a)* collisions and *(b)* near-misses of aircraft above London there were in each of the last five years. [5312]

Ms Buck: An airprox is a situation in which, in the opinion of a pilot or a controller, the distance between aircraft as well as their relative positions and speed have been such that the safety of the aircraft involved was or may have been compromised.

Over the period of 2000 to 2004 there have been 23 airprox in controlled airspace over London. These can be broken down on an annual basis as follows:

	Number
2000	4
2001	2
2002	4
2003	6
2004	7

These are statistically insignificant numbers which should not be used to derive any trends, especially considering the volumes of air traffic which have increased over the period. The UK Airprox Board assessed that there was no risk of a collision in any of the subject airprox. There have been no mid-air collisions.

Concessionary Fares

Jim Cousins: To ask the Secretary of State for Transport what the distribution formula is for the half fare concession to the over 60s; and how much has been paid by the Government to each local authority or transport authority in each of the last five years. [6316]

Ms Buck: There is currently no specific distribution formula for concessionary fares; they are one of a wide-range of services covered in the district-level Environmental Protection and Cultural Services Block of the Revenue Support Grant (RSG) system. It is therefore not possible to work out how much grant an authority has received with respect to concessionary fares.

Crossrail

Andrew Rosindell: To ask the Secretary of State for Transport what assessment he has made of whether capacity offered by Crossrail on the Shenfield branch will meet the change in demand expected as a result of plans for homebuilding in the South East. [5429]

Derek Twigg: It is estimated that Crossrail will provide a 40 per cent. increase in capacity of the local services between Shenfield and Liverpool Street with the service pattern currently proposed. That additional capacity will help to meet increases in demand for transport along the branch. In addition, by releasing platform capacity at Liverpool Street, Crossrail would improve the potential for expansion of services from the Lea Valley.

Disability Discrimination Act

Tom Brake: To ask the Secretary of State for Transport what guidance he has issued to the aviation industry on the application to it of the Disability Discrimination Act 1995; and if he will make a statement. [5288]

Ms Buck: In common with other transport infrastructure such as stations and ports, airports are covered by Part 3 of the Disability Discrimination Act 1995 (DDA) which covers access to goods, facilities and services. The Disability Rights Commission has produced a code of practice for service providers on meeting the Part 3 duties.

There is currently an exemption in Part 3 for

"any service insofar as it consists of the use of any means of transport"

which means that the element of the service involving air travel is not covered. We have, however, amended that exemption under Section 5 of the Disability Discrimination Act 2005 to make clear that it applies only to services involving the provision and use of a vehicle (including an aircraft) and to allow for it to be lifted to different extents, for different services at different times.

We have said that we would use the new power in respect of air services if the voluntary code of practice which we issued in March 2003 proves to be ineffective. That code, "Access to Air Travel for Disabled People—Code of Practice", was developed in close co-operation with the Disabled Persons Transport Advisory Committee (the Government's statutory advisers on transport and mobility for disabled people) and industry representatives. It draws on internationally agreed best practice from the European Civil Aviation Conference and the International Civil Aviation Organisation and includes specific advice on all aspects of air travel, from accessing information through to on board services and disembarkation at the final destination.

Research is currently under way to monitor the sector's compliance with the code's recommendations. The study is due to report around the end of this year and will inform our decision on whether to use the provisions in the 2005 Act to bring air services within the scope of Part 3.

Eurotunnel

Mrs. Lait: To ask the Secretary of State for Transport what discussions his Department has had with *(a)* Eurotunnel (i) staff and (ii) creditors and *(b)* other Government Departments in the last 12 months; and if he will make a statement. [R] [6013]

Derek Twigg: Officials at the Department for Transport have periodic discussions with a wide range of industry parties, other stakeholders and counterparts in other Government Departments in relation to the Department's strategic interest in cross-channel rail services. The Department also has regular contact with Eurotunnel management on issues relating to the day-to-day operation of the channel tunnel, through its representation on the Anglo-French Channel Tunnel Intergovernmental Commission.

Free Fare Scheme

Mrs. Spelman: To ask the Secretary of State for Transport who will meet the costs of the Free Fare scheme; what assessment has been made of the likely cost; whether the scheme will include free local bus travel for *(a)* people over 60 years and *(b)* people with disabilities; and when he expects further information on the operation of the scheme to be published. [6242]

Ms Buck: Free off-peak concessionary travel will be introduced in England for those 60 and over and disabled people on their local bus services from April 2006. The Government will provide an extra £350 million in 2006–07 which will be sufficient to fund the cost. Final decisions on the distribution of the extra funding—which will be done through the Revenue Support Grant process—have not been made.

Hampshire Light Rapid Transit Scheme

Mr. Hancock: To ask the Secretary of State for Transport what his timetable is for determining the submission for the Hampshire Light Rapid Transit Scheme. [6008]

Derek Twigg: We will make a decision soon.

London to Brighton Line

Norman Baker: To ask the Secretary of State for Transport if he will make a statement on the implementation of the Route Utilisation Strategy for the London to Brighton main line. [5140]

Derek Twigg *[holding answer 20 June 2005]:* A Route Utilisation Strategy for the Brighton main line will be published in due course.

M11 Link Road

Harry Cohen: To ask the Secretary of State for Transport if he will arrange for electronic signs on roads leading to those joining the M11 Link Road in *(a)* Wanstead, *(b)* Leytonstone and *(c)* Leyton telling motorists when the Link Road is seriously congested; and if he will make a statement. [5958]

Dr. Ladyman: The M11 Link Road is now classified as the A12. The section of the A12 inside London now forms part of the Transport for London Road Network (TLRN). Therefore, any works, including signing on that road, or roads in the vicinity are a matter for the Mayor and Transport for London (TfL).

Rail Transport (Motorisation)

Mr. Hayes: To ask the Secretary of State for Transport if he will make a statement on trials of alternative forms of motorisation for rail transport. [5218]

Derek Twigg: A number of private companies and individuals are working in this area but I am not aware of any such research being either carried out or funded directly by Government.

Road Safety

Mr. Ian Taylor: To ask the Secretary of State for Transport if he will take steps to give local authorities the power to erect 30 mph repeater signs on roads with high traffic accident rates. [5876]

Dr. Ladyman: The provision of repeater signs on only 30 mph roads with high traffic accident rates is likely to create uncertainty for drivers as to whether some roads are 30 mph or not. The absence of 30 mph repeaters on other 30 mph roads, may indicate to drivers that the speed limit is in fact higher, which is likely to increase accident risk.

Under current legislation the presence of street lighting indicates a road is subject to a 30 mph speed limit, unless signs indicate otherwise. This provides a consistent and easily understood approach. It has been law for over 70 years and is contained in the Highway Code, which all drivers study as part of learning to drive.

Sussex Coast Rail Lines

Norman Baker: To ask the Secretary of State for Transport at what percentage of maximum power the power supply on the Sussex Coast rail lines will allow the new rolling stock to operate. [5141]

Derek Twigg *[holding answer 20 June 2005]:* The power supply on Sussex Coast lines is sufficient for new rolling stock to run at full power where trains are formed of up to six coaches. Longer trains are restricted to less than full power but this is sufficient for them to maintain schedules.

Tyne Tunnel

Jim Cousins: To ask the Secretary of State for Transport what the reasons are for the time taken for the *(a)* assessment and *(b)* approval of the Second Tyne Tunnel; and whether changes in the proposal made by the Tyne and Wear Passenger Transport Authority have had an impact on the time scale. [6353]

Dr. Ladyman: Following a public inquiry into the proposed new Tyne crossing the Tyne and Wear PTA have, on several occasions since the close of the inquiry, requested substantial changes to the powers they require to implement the scheme. This is unusual, as normally applicants and their legal advisers have established the powers they require before the inquiry opens. It has caused significant cumulative delays to the Department's assessment of the proposals as we have had to consider carefully the consequences of all the requested changes. We also had to give other interested parties the opportunity to comment on the changes, in the interests of natural justice. On the basis of the information we now have available, we hope to announce a decision shortly.

ENVIRONMENT, FOOD AND RURAL AFFAIRS

Nuclear Waste

Norman Baker: To ask the Secretary of State for Environment, Food and Rural Affairs what volume of *(a)* low level, *(b)* intermediate level and *(c)* high level nuclear waste has become unaccounted for in each of the last five years; and what percentage has been located. [4454]

Mr. Morley: The Department is not aware of any radioactive waste that is unaccounted for. The Department for Environment, Food and Rural Affairs and United Kingdom Nirex Ltd. undertake regular reviews and updates of the stocks and predicted arisings of radioactive waste in the UK. The last published version of the UK Radioactive Waste Inventory as at 1 April 2001 reported stocks of waste as 1,960m^3 HLW, 75,400m^3 ILW and 14,700m^3 LLW and predicted future arisings of 750m^3 HLW, 163,000m^3 ILW and 1,490,000m^3 LLW. An updated version of this inventory giving the stocks and predicted future arisings at 1 April 2004 is currently being prepared and will be published later this year.

Mr. Hancock: To ask the Secretary of State for Environment, Food and Rural Affairs how many new nuclear waste storage facilities she expects to be built in each of the next 10 years; and where. [5217]

Mr. Morley: It is for the owners of radioactive waste to make suitable arrangements for the management of their waste, including the provision of any stores, subject to securing the necessary regulatory and planning approvals.

Mr. Jim Cunningham: To ask the Secretary of State for Environment, Food and Rural Affairs if she will list sites in the West Midlands where nuclear waste is stored. [5760]

Mr. Morley: The following sites are identified by the UK Radioactive Waste Inventory as storing quantities of radioactive waste:

Donnington

Stafford.

Sewer Rats (London)

Mr. Dismore: To ask the Secretary of State for Environment, Food and Rural Affairs if she will make a statement on the progress of the review of the London Sewer Rat Joint Working Protocol; and what she expects the outcome to be. [4851]

Mr. Morley: The Local Government Association (LGA) and Water UK published a joint protocol in 1999 which set out arrangements for a closer working relationship between local authorities and water companies in England and Wales on the issue of rat infestation of sewers.

The Department sought the views of all local authority chief executives in England and Wales on the effectiveness of the protocol, but the level of response was disappointing (77 responses were received) and we are unable to draw any clear conclusions from the information provided.

Snaring

David Taylor: To ask the Secretary of State for Environment, Food and Rural Affairs how many *(a)* reports have been received on, *(b)* prosecutions have been brought and *(c)* convictions have been secured for (i) the setting of an illegal snare, (ii) killing through snaring and (iii) taking a protected species through snaring in each of the last 10 years for which figures are available. [4843]

Jim Knight: There is no specific data available for prosecutions on the illegal use of snares. The only figures available relate to the number of defendants proceeded against at magistrates courts for offences under the Protection of Animals Act 1911, the Wildlife and Countryside Act 1981 S.11, Deer Acts 1991 and the Wildlife and Countryside Act 1981, England and Wales 1993 to 2003. This data can be found through the following link: http://www.homeoffice.gov.uk/rds/commandpubs1.html

TRADE AND INDUSTRY

Phthalates

Mr. Godsiff: To ask the Secretary of State for Trade and Industry if he will bring forward legislation to compel manufacturers to reveal which of their products contain phthalates and in what concentrations. [2573]

Mr. Sutcliffe: We have no current plans to bring forward such legislation.

Pirate Radio

Sarah Teather: To ask the Secretary of State for Trade and Industry how many people were prosecuted for operating pirate radio stations in each London borough in each of the last five years. [5314]

Alun Michael: The matter raised is the responsibility of the Office of Communications (Ofcom) as independent regulator. Accordingly, my officials have asked the Chief Executive of Ofcom to respond directly to the hon. Member. Copies of the Chief Executive's letter will be placed in the Libraries of the House.

Property Misdescriptions Act

Joan Walley: To ask the Secretary of State for Trade and Industry how many successful prosecutions there have been by trading standards officers under the Property Misdescriptions Act 1991 in each of the last five years; and if he will make a statement. [5790]

Mr. Sutcliffe: The numbers of successful prosecutions by trading standards officers in each of the last five years under the Property Misdescriptions Act 1991:

	Number
As at January to December:	
2004	18
2003	18
2002	17
2001	26
2000	20

Renewables

Mr. Jenkin: To ask the Secretary of State for Trade and Industry what his Department's latest estimate is of the annual rise of carbon dioxide emissions *(a)* in the United Kingdom and *(b)* globally. [4956]

Mr. Morley: I have been asked to reply.

Greenhouse gas inventory estimates published by the Department in March show that carbon dioxide emissions from the United Kingdom decreased by 3 per cent. between 2001 and 2002. Emissions then rose by 2.2 per cent. between 2002 and 2003, and by a further 1.5 per cent. between 2003 and 2004. The 2003 to 2004 estimate is provisional.

The most recent estimates published by the International Energy Agency show that world emissions of carbon dioxide increased by about 2 per cent. between 2001 and 2002. Energy statistics published in the "BP Statistical Review of World Energy 2005" suggest that world emissions have risen faster since 2002, but the detailed analysis needed to quantify percentage changes is in CO_2 is not yet available.

Travel Industry (Regulation)

Mr. Marshall: To ask the Secretary of State for Trade and Industry what discussions he has held with *(a)* the Association of British Travel Agents, *(b)* the Federation of Tour Operators and *(c)* the Association of Independent Tour Operators regarding the regulatory burden in the travel industry. [4589]

Mr. Sutcliffe: I refer my hon. Friend to the answer given to my hon. Friend the Member for Central Ayrshire (Mr. Donohoe) on 8 June 2005, *Official Report*, columns 575–76W.

EDUCATION AND SKILLS

Apprenticeships

John Mann: To ask the Secretary of State for Education and Skills what progress was made towards the public service agreement target for apprenticeship starts in 2004/05; and what assessment she has made of whether the target will be met. [6510]

Phil Hope: The Department has a PSA target for at least 28 per cent. of young people to start an Apprenticeship for the first time by age 22 by 2004. Measurement of the target will be based on starts in the 2004/05 academic year. At the end of 2003/04, the Learning and Skills Council (LSC) met its milestone of 24.5 per cent. However, since then, starts have fallen behind profile. The LSC have therefore put in place a range of measures to address this shortfall although it is too early to assess their impact. The target outturn will be reported by December 2005.

Bullying (Portsmouth)

Mr. Hancock: To ask the Secretary of State for Education and Skills what data she has collected on bullying in state schools in Portsmouth. [5295]

Jacqui Smith: Data on bullying are not collected centrally and there is no reliable basis for an estimate of prevalence. Bullying cases appear to be reported more often, now than previously but we have no hard evidence that bullying is increasing or that it is affecting more children. Indeed, as children and young people increasingly feel safe at school to report bullying, and confident that it will be tackled effectively and sensitively, it is likely reporting will rise.

However, any level of bullying is too high and we are determined to help schools tackle the problem. Our guidance pack 'Bullying: Don't Suffer in Silence', the anti-bullying charter and the anti-bullying website www.dfes.gov.uk/bullying offer detailed advice on preventing and addressing bullying. We also offer specific advice to schools on tackling homophobic bullying and are developing advice on racist bullying.

City Academies

Helen Jones: To ask the Secretary of State for Education and Skills what the total amount of capital costs contributed by sponsors was to each city academy; and what proportion of the total capital costs this represents in each case. [4768]

Jacqui Smith: The sponsorship contribution for each of the 17 open Academies is set out in the following table.

Academy	*Sponsorship contribution (£ million)*	*Sponsorship as a proportion of capital costs (%)*
Capital City Academy	3	12.8
City of London (Southwark) Academy	2.1	7.2
Djanogly City Academy Nottingham	0	0.0
Greig City Academy	2	15.4
Lambeth Academy	2	8.2
London Academy	1.5	5.2
Manchester Academy	2	10.1
Mossbourne Community Academy	2	7.1
Northampton Academy	2	7.4
Stockley Academy	2	9.5
The Academy at Peckham	2	9.1
The Business Academy Bexley	2.41	7.7
The City Academy, Bristol	2	7.2
The King's Academy	2	9.4
The Walsall City Academy	2.5	13.9
The West London Academy	2	5.4
Unity City Academy	2	9.7

Helen Jones: To ask the Secretary of State for Education and Skills what proportion of pupils in each city academy are resident *(a)* in the ward in which the school is situated, *(b)* in neighbouring wards, *(c)* elsewhere within the local authority area and *(d)* outside that local authority. [4773]

Jacqui Smith: The information requested has been provide in the following table.

Resident location of pupils attending academies—January 2005

Percentage

School name	*Resident in ward*	*Resident in neighbouring wards*[1]	*Resident within LEA*	*Resident outside LEA*	*Total pupils*
Mossbourne Community Academy	15.1	47.7	95.4	4.6	218
Lambeth Academy	28.3	59.2	93.5	6.5	184
City of London Academy (Southwark)	33.5	42.9	92.0	8.0	361
The Academy at Peckham	9.3	56.0	89.2	10.8	1,079
London Academy	17.2	52.0	87.3	12.7	1,199
The Business Academy Bexley	32.8	51.9	72.2	27.8	1,379
Capital City Academy	7.6	39.6	85.4	14.6	911
West London Academy	45.6	24.7	87.2	12.8	1,129
Greig City Academy, Haringey	5.3	14.7	75.0	25.0	712
Stockley Academy	39.7	34.8	98.3	1.7	584
Walsall Academy	29.2	29.2	80.6	19.4	630
Manchester Academy	35.4	29.9	94.5	5.5	726
The City Academy Bristol	30.1	45.3	96.1	3.9	1,096
Unity City Academy	26.6	69.5	98.5	1.5	1,123
The King's Academy	37.1	24.3	96.1	3.9	1,042

Resident location of pupils attending academies—January 2005

Percentage

School name	Resident in ward	Resident in neighbouring wards[1]	Resident within LEA	Resident outside LEA	Total pupils
Djanogly City Academy Nottingham	33.5	22.3	95.6	4.4	1,580
Northampton Academy	24.7	68.9	99.8	0.2	1,247

[1] The neighbouring ward is a ward that shares a boundary with the ward where the academy is situated

PLASC 2005 provisional data

Civil Servants

Mr. Martlew: To ask the Secretary of State for Education and Skills what procedures civil servants in her Department follow when deciding on her Department's association with businesses and commercial organisations; and if she will make a statement. [5972]

Maria Eagle: Civil servants in my Department follow the procurement principles set out in Government Accounting and the procurement guidance issued by the Office of Government Commerce which is transposed into departmental policy and guidance. In their professional and personal dealings with commercial organisations my officials adhere to the civil service code in all matters and the Cabinet Office's Guidance to Departments on Sponsorship of Government Activities when dealing with sponsorship issues.

My Department also has its own partnership principles which are used for those associations with commercial organisations where we require a closer relationship.

Education Maintenance Allowance

Jim Cousins: To ask the Secretary of State for Education and Skills pursuant to the answer to the hon. Member for Torbay (Mr. Sanders) of 6 June 2005, *Official Report*, columns 336–39W, on grants per pupil, what the figures are for 2005–06. [6354]

Jacqui Smith: The following table gives our most recent figures, for local education authorities in England in 2005–06, for the total funding per primary pupil (aged 3–10) and per secondary pupil (aged 11–15) in cash terms. These funding figures include funding through Education Formula Spending and grants allocated at an LEA level; they include the pensions transfer to EFS.

2005–06: Total funding per pupil aged 3–10 and 11–15—LEAs by Government Office Region

£

LEA number	LEA name	Pupils aged 3–10	Pupils aged 11–15

Notes:

1. Price Base: Cash terms.
2. Figures reflect relevant sub-blocks of the Education Formula Spending settlement and include the pensions transfer to EFS.
3. Total funding also includes all revenue grants in DfES Departmental Expenditure Limits relevant to pupils aged 3–10 and 11–15, and exclude education maintenance allowances and grants not allocated at LEA level. For those LEAs in receipt of advance of grant under the transitional support arrangements for 2004–05, advance grant funding was included in the year of payment (2004–05). There will be a consequential reduction in DfES grant for these LEAs in future years (either 2006–07 and 2007–08 or 2006–07 to 2008–09, depending on the terms on which the advance was given to the LEA).
4. The pupil numbers used to convert £m figures to per pupil are those underlying the EFS settlement calculations.
5. Rounding: Per pupil figures are rounded to the nearest 10.
6. Status: 2005–06 figures are provisional as some grants have not yet been finalised/audited.

Entry to Employment Programme

John Mann: To ask the Secretary of State for Education and Skills what alternative education and training provision has been found for young people who are not yet ready to start an apprenticeship following the changes to the Entry to Employment programme; and what evaluation has been made of *(a)* the appropriateness of such provision and *(b)* its likelihood of offering meaningful progression to disadvantaged young people. [6512]

Jacqui Smith: Entry to Employment (E2E) is the main programme for young people not yet ready for an apprenticeship. The Learning and Skills Council (LSC) guarantees all young people for whom E2E is appropriate, a place on the programme. This is in addition to their commitment that every 16–18 year old can have a place in post-16 education and training. Changes introduced in 2004/05 were to improve the referral and learner review processes.

Some young people are not in a position to be able to benefit from E2E. This may be, for example, because of emotional difficulties and serious substance abuse. These young people receive a range of specialised support and provision, particularly from the voluntary and community sector providers. This type of provision is not formally evaluated, however the aim is to enable them to progress onto E2E.

The Qualifications Curriculum Authority and the LSC are working to establish an inclusive curriculum offer below level 2. It will draw from units and/or qualifications at entry level and level 1 of the Framework for Achievement and will also recognise and incorporate broader aspects. This is an important

development to support, facilitate and direct learners into units and/or qualifications both below and beyond level 2, where E2E is not the best option.

The local LSC network is working closely with the Connexions Service and the providers it contracts with, to ensure that it has appropriate programmes to enhance the range of choices to engage all young people. The Government announced, in the recent budget, plans to pilot Activity Agreements and an Activity Allowance to help re-engage 16–17 year olds who have been out of education, employment or training for some time.

EU Students

Mr. Stephen O'Brien: To ask the Secretary of State for Education and Skills how many EU students are expected to receive bursary support from English universities in each year between 2006 and 2010. [3240]

Bill Rammell: Reliable information on the bursary arrangements for EU students are not available centrally. The policy on bursary arrangements for EU students is set by each institution individual institutions' access agreements may or may not include this information, as it was not required by the Office for Fair Access.

Primary School Review (Gloucestershire)

Mr. Drew: To ask the Secretary of State for Education and Skills what discussions she has had with Gloucestershire education authority on its primary school review. [6337]

Jacqui Smith: The challenge of reducing the number of surplus places is one that many local authorities currently face. However, the Government believe that planning the supply of school places is best done locally by the local authority. Local authorities have a statutory duty to ensure there are sufficient places and that high quality education is provided in a cost effective way.

Should proposals be brought forward to close schools, the School Standards and Framework Act (SSFA) 1998 includes a requirement on local authorities to consult locally and publish statutory proposals. If objections are received, local independent school organisation committees will take decisions about school closures. Ministers have no direct involvement in decisions to review provision or reorganise schools.

Consequently, neither the Secretary of State nor members of her ministerial team have entered into discussions with Gloucestershire about their review of primary schools. However, officials are in regular contact with local authority officers and are aware of the steps being taken in Gloucestershire to address the problem of surplus places in the primary sector.

Pupil Exclusions

Dr. Kumar: To ask the Secretary of State for Education and Skills how many pupils were excluded from *(a)* primary and *(b)* secondary schools in the area corresponding most closely to the constituency of Middlesbrough, South and East Cleveland in (i) 2001, (ii) 2002, (iii) 2003 and (iv) 2004. [5859]

Jacqui Smith: The available information is given in the table. Figures on permanent exclusions in 2003/04 will be available from 23 June 2005.

Maintained primary and secondary schools: permanent exclusions by school type[1]

	Maintained primary		Maintained secondary	
	Number of exclusions	Percentage[2]	Number of exclusions	Percentage[2]
2000/01	[3]	[3]	5	0.10
2001/02	[3]	[3]	8	0.16
2002/03	[3]	[3]	4	0.08

[1] Permanent exclusions are collected retrospectively. The Annual Schools Census (ASC) for 2004 collected data on pupils in schools in January 2004 together with data on permanent exclusions in the school year 2002/03. Figures are as reported by schools and are unconfirmed.
[2] Number of permanent exclusions expressed as a percentage of the school population.
[3] 3 or less, or a rate based on 3 or less.

School Meals Trust

David Taylor: To ask the Secretary of State for Education and Skills if she will make a statement on the School Meals Trust. [5955]

Jacqui Smith: I refer the hon. Friend to the response that I gave to the hon. Member for Bognor Regis and Littlehampton (Mr. Gibb) on 7 June 2005, *Official Report*, column 478W.

Special Schools

Mr. Drew: To ask the Secretary of State for Education and Skills how many children were in each category of special school in the *(a)* state and *(b)* private sector in each of the last five years, broken down by age range. [4098]

Jacqui Smith: The information requested is shown in the following table.

Maintained and non-maintained special schools, independent schools approved for pupils with SEN and other independent schools: Pupils by age[1]*—2000 to 2005 (provisional)—position in January each year*

	2000				2001

Source:
Annual Schools Census

Teacher Assaults

Mr. Jim Cunningham: To ask the Secretary of State for Education and Skills how many teachers have been the victims of offences of violence in Coventry, South in each of the last 10 years. [6060]

Jacqui Smith: The information requested is not collected centrally.

INTERNATIONAL DEVELOPMENT

Africa

Alan Simpson: To ask the Secretary of State for International Development what involvement his Department will have in the Groundwater and Poverty Reduction in Africa Conference being held at Burlington House on 29 June. [5186]

Hilary Benn: Sustainable management of groundwater is critical to achieving DFID's commitments in water and sanitation. An official who leads on water resource management issues, based in DFID's Policy Division, will be participating in the Conference.

Departmental Relocation

Mr. Gale: To ask the Secretary of State for International Development how many of his Department's posts *(a)* have been relocated and *(b)* are under consideration for relocation from London to the deprived areas of the south-east. [6259]

Mr. Thomas: The Department for International Development is implementing the Lyons Review recommendations to relocate 85 posts out of London and the south-east by 2010. This will not exclude consideration of relocating some posts to relatively deprived areas in the south-east. As yet, DFID has not identified any posts suitable for transfer to deprived areas in the south-east.

Race Relations (Amendment) Act

Keith Vaz: To ask the Secretary of State for International Development how many and what percentage of staff in his Department have received training on the general and specific duties of the Race Relations (Amendment) Act 2000, broken down by *(a)* ethnicity and *(b)* grade. [3555]

Hilary Benn: DFID's central training team covers the Race Relations (RR(Amendment) Act 2000 through its Corporate Induction Courses, Diversity Awareness training, Management Development Courses, and its Reporting Officer Training for Line Managers. All of these courses are mandatory and the vast majority of staff will have attended at least one of them in the last few years.

In 2003 and 2004, for example, 1,659 spaces were filled on these courses. With a total staff compliment of 2,884, this suggests that up to 57 per cent. of DFID staff may have received training through one of these routes in this period. However, there will be some double counting as individuals might have attended more than one of these courses. Our current systems do not permit this level of analysis.

Other training that covers the Act may be delivered across DFID and overseas. DFID departments do not necessarily report on all training and development activities centrally, so there may be under reporting on the above figures.

Where we have identified functions that are relevant to the RR(A)AOO, we have trained staff working in these areas on both the general provisions of the Act and their duties under it. For example, our Procurement Department staff receive specific training on the

RR(A)AOO, and we have included a reference to our obligations under the RR(A)AOO in our departmental guidance. We are unable to provide precise details of the numbers of staff who have received this training or a breakdown of attendance by ethnicity and grade. However, DFID is fully aware of its obligations under the RR(A)AOO and we are currently in the process of developing a Learning Management System that will enable us to monitor both applicants for, and recipients of, all training courses by ethnicity, grade and other personal characteristics. We aim to have the learning management system in place by the end of 2006 at the latest.

However, as an interim measure, we completed a manual data collection exercise of actual training delivered, which was then analysed by ethnicity, for a 10 per cent. sample of randomly selected staff in the organisation. There was no evidence of disparities in attendance rates between ethnic groups.

CULTURE, MEDIA AND SPORT

Casinos

Mr. Don Foster: To ask the Secretary of State for Culture, Media and Sport how many applications for casinos licences have been received by the Gaming Board in each month since October 2004; how many were successful; and if she will make a statement. [5758]

Mr. Caborn: The Gaming Board considers applications for Certificates of Consent for casinos. Once a Certificate of Consent is issued, operators can then apply to the Licensing Justices for a Gaming Licence. The table sets out the number of applications for Certificates of Consent in respect of new casinos that the Gaming Board has received since October 2004, and the current position on these applications. The Board also considers applications for Certificates of Consent in respect of existing casinos, where there are significant changes to the ownership or fabric of the casino. This information has not been included in the table.

	Received	*Approved*	*Withdrawn*	*Outstanding*
October 2004	2	1	0	1
November 2004	3	1	0	2
December 2004	4	[1]4	0	0
January 2005	2	[1]2	0	0
February 2005	1	1	0	0
March 2005	4	1	2	1
April 2005	1	0	0	1
May 2005	6	0	0	6
June 2005 (as at 17 June 2005)	13	0	0	13
Total	36	10	2	24

[1] One application approved by the Gaming Board is not being progressed to licensing stage by the applicants.

Club Licences

Hugh Robertson: To ask the Secretary of State for Culture, Media and Sport what estimate has been made of the number of sports and community clubs whose existing licence expires after 6 August. [5243]

Mr. Caborn *[holding answer 20 June 2005]:* All sports and community clubs currently selling or supplying alcohol require authorisation under the Licensing Act 1964. Most of these operate as registered members clubs and do not sell alcohol to the general public. Such clubs hold club registration certificates, whilst those selling to the general public hold full justices' on-licences.

We do not have figures for the numbers of sports and community clubs in particular that hold licences or certificates. However, at 30 June 2004 there were 19,913 registered clubs in England and Wales. This number also includes political, ex-services, working men's and other clubs as well as Miners' Welfare Institutes.

DCMS deposited the source publication for these figures "Statistical Bulletin Liquor Licensing (England and Wales, July 2003-June 2004)" on 27 October 2004 in the House Libraries. This document is available on the DCMS website at: http://www.culture.gov.uk/global/research/statistics_outputs/liquor_licensing_statistics.htm

All such certificates and licences would cease to have effect when the new licensing regime comes into force on 24 November. It is not known centrally how many club registration certificates may expire between 6 August and 24 November. Until 24 November, it remains open to any club to apply to the magistrates courts to renew its certificate pending the coming into force of the 2003 Act.

Disabled Civil Servants (Bursary Scheme)

Mr. Jim Cunningham: To ask the Secretary of State for Culture, Media and Sport how many civil servants in her Department participate in the Bursary Scheme for civil servants with disabilities. [4824]

Mr. Caborn *[holding answer 20 June 2005]:* The Department for Culture, Media and Sport currently has one person participating in the Bursary Scheme for civil servants with disabilities.

National Lottery

Dr. Tony Wright: To ask the Secretary of State for Culture, Media and Sport how much each local authority area received in Lottery awards in the last year for which figures are available; and what her estimate is of the total spend on National Lottery products in each area over the same period. [6047]

Mr. Caborn: I have arranged for a table, showing a breakdown of the value of Lottery awards during the financial year 2004–05 in each local authority area, to be placed in the Libraries of both houses. The table is derived from the Department's Lottery award database, searchable at www.lottery.culture.gsi.gov.uk, which uses information supplied by the Lottery distributors. Awards which a distributor has not identified as specific to a particular location are not included in the table.

The National Lottery operator, Camelot, does not collect ticket sales data on a local authority basis. I would, however, refer my hon. Friend to an updated table of sales by postcode since the Lottery began, placed in the Libraries of both houses on 6 December 2004 in response to a written question from my hon. Friend the Member for Pendle (Mr. Prentice) on 6 December 2004, *Official Report*, column 333. Data is not routinely collected on this basis by Camelot.

National Sports Foundation

Mr. Andy Reed: To ask the Secretary of State for Culture, Media and Sport if she will make a statement on the planned timetable for the establishment of the *(a)* National Sports Foundation and *(b)* National Investment Foundation. [6294]

Mr. Caborn: Discussions on both the National Sports Foundation and National Infrastructure Foundation are at an early stage and decisions will be taken in due course.

New Opportunities Fund

Mr. Andy Reed: To ask the Secretary of State for Culture, Media and Sport what proportion of funding from the New Opportunities Fund Round 3 has been spent. [6299]

Mr. Caborn: Round 3 programmes include some funding from other rounds. Of the £1,834,569,000 available for distribution, 92 per cent. of this funding has been committed and 46 per cent. has been spent.

School Sport

Hugh Robertson: To ask the Secretary of State for Culture, Media and Sport how much of the £750 million announced by the Prime Minister for school sport at the 2000 Labour Party Conference has been *(a)* committed and *(b)* spent. [5241]

Mr. Caborn *[holding answer 20 June 2005]:* £670.5 million of New Opportunities for PE and Sport (NOPES) funding has been committed to date for over 2,000 facilities, with £106 million drawn down by local education authorities.

Almost 90 per cent. of NOPES funding has now been committed. We anticipate that the remaining funding will be committed by December 2005 with the great majority of new facilities in use by spring 2006, in line with the original timetable.

Sports

Mr. Andy Reed: To ask the Secretary of State for Culture, Media and Sport what progress has been made towards meeting the target of 85 per cent. of five to 16-year-olds taking part in at least two hours' high-quality PE and school sport each week by 2008 and an optional extra two hours thereafter. [6298]

Mr. Caborn: The last annual survey of School Sport Partnerships in 2003–04, in which over 6,500 schools took part, showed that 62 per cent. of children were spending two hours in a typical week on high quality PE and school sport within and beyond the curriculum. The 2004–05 annual survey is due to be completed by the end of July and the results published in August. Plans are being developed on the provision of opportunities for school children to engage in sport for an additional 2–3 hours outside the school day.

Sports Facilities

Mr. Andy Reed: To ask the Secretary of State for Culture, Media and Sport what progress has been made towards meeting the Department's aim that by 2008 almost no one will live more than 20 minutes travel time away from a good multi-sports environment. [6295]

Mr. Caborn: In order to make progress towards the aim as expressed in DCMS's Five Year Plan, the Government have put in place a number of national programmes and by 2006 over £1 billion will have been invested in 4,000 sports facilities and club development, through either development of new facilities or major refurbishment of existing ones. In addition DCMS have supported the introduction of provisions in the Finance Act 2002 to allow community amateur sports clubs to benefit from a package of tax and rates relief. The scheme's purpose is to enable grass roots sport to grow and develop so that the widest possible range of people can participate in healthy recreation. To date the scheme has brought more than £5 million into grass roots sport, benefiting some 2,500 clubs.

DCMS is also pursuing a number of activities aimed at helping local authorities to revitalise their leisure facilities:

work is under way on developing a comprehensive facilities strategy, to map supply, demand and priorities for investment. This is expected to be concluded by 2006;

the Audit Commission is undertaking a study to examine the efficiency and effectiveness of options for delivering local authority sports facilities. The study is expected to report in autumn 2005;

we are looking at options to provide incentives to local authorities to prioritise sport through the Comprehensive Performance Assessment from 2006;

we are working with ODPM to ensure that sports facilities planning guidance is rigorous, fit for purpose and free of unnecessary barriers; and

we are seeking to identify the best ways of accessing the capital to build facilities.

Sports Survey 2005

Mr. Andy Reed: To ask the Secretary of State for Culture, Media and Sport when she expects to publish the results of the sports participation survey to be carried out by her Department, beginning in autumn 2005. [6296]

Mr. Caborn: The Department expects to publish the first quarter results of the participation survey by the end of 2005.

Swimming Pools (London)

Sarah Teather: To ask the Secretary of State for Culture, Media and Sport how many local authority maintained swimming pools there were per 1,000 population in each London borough in the last year for which figures are available. [5318]

Mr. Caborn: The number of swimming pools per 1,000 population in each London borough is shown in the table. At present, the only data held by Sport England is for the combined number of both local authority and private pools and the figures therefore include pools owned by schools, private leisure centres and health clubs, etc.

In order to present an accurate picture of swimming pool provision, I also include the ratio of total swimming pool area in metres^2 per 1,000 population, which takes into account the size of the pools in each borough.

London borough	*Total population*	*Total number of pools*	*Ratio of pools per 1,000 population*	*Total pool area in metres^2*	*Capacity ratio per 1,000*

Taxis

David T.C. Davies: To ask the Secretary of State for Culture, Media and Sport how much the Department has spent on taxis in each of the last five years. [6501]

Mr. Caborn: All official travel is undertaken in accordance with the rules contained in the Department's staff handbook.

The following table shows departmental expenditure on taxis.

£

Financial year	*Amount*
2004–05	22,157.08
2003–04	21,878.36
2002–03	17,905.60
2001–02	20,811.56
2000–01	26,414.81

Tote

Mr. Wallace: To ask the Secretary of State for Culture, Media and Sport pursuant to the answer of 8 June 2005, *Official Report*, column 583W, on the Tote, what additional information was provided to the EU Commission on *(a)* 9 September 2004 and *(b)* 1 March; and what matters were discussed in her meeting with Commissioner Kroes on 27 May. [5146]

Mr. Caborn: In September 2004 the Government responded to the European Commission's request to provide more information about the valuation of the Tote, its ownership, the future relationship between the Tote and Racing, the proposed exclusive licence, the conditions of the sale and the pool betting market.

In March 2005 the Government wrote to the Commission providing additional information about the valuation of the Tote and its ownership. We also provided details of why we believe any aid involved in the sale of the Tote is compatible with the principles of the Common Market. In addition we sought to place the sale of the Tote within a bigger picture of the liberalisation of the gambling market in Britain.

When I met with Commissioner Kroes in May 2005 we discussed the Commission's on-going concerns about the sale. The Commission announced on 1 June that they would be opening a formal investigation into the sale and will publish a formal notice to that effect in due course.

CABINET OFFICE

Honours

Mr. Pope: To ask the Chancellor of the Duchy of Lancaster how many officials currently in the Cabinet Office received honours in the recent Queen's Birthday Honours List; and at what rank of honour. [5125]

Mr. Hutton: Details of all honours awards are published in the *London Gazette*. Details of whether officials recognised in the Queen's Birthday Honours list have stayed within their respective Departments have not been maintained.

A table giving details of awards to officials within specified Departments has today been placed in the Library.

DEFENCE

Afghanistan

Mr. Wallace: To ask the Secretary of State for Defence what estimate he has made of the likely cost of the additional troop deployments to Afghanistan; and whether costs will be met from existing departmental budgets. [5145]

Mr. Ingram: Planning continues for the deployment of the Headquarters Allied Rapid Reaction Corps (HQ ARRC) Group to lead the International Security Assistance Force (ISAF) from May 2006. We are also developing plans for the deployment of forces to enable the United Kingdom to play a key role in Stage 3 of ISAF expansion in the south of Afghanistan.

Until that planning is complete, it would be premature and potentially misleading to speculate about the cost of potential deployments, which, as with all net additional costs of operations, we would expect to be funded from the reserve.

An announcement will be made to Parliament once decisions have been made.

Army Personnel Research Establishment

Tim Loughton: To ask the Secretary of State for Defence what the average number of respondents to Army Personnel Research Establishment polls is. [5991]

Mr. Touhig: The Army Personnel Research Establishment no longer exists. The Services each have their own Continuous Attitude Surveys (CAS). The response figures for the two Army CAS surveys in 2004 is as follows:

	Army CAS surveys	
Number surveyed	7,182	9,672
Average percentage respondents	40	39

Tim Loughton: To ask the Secretary of State for Defence how frequently Army Personnel Research Establishment polls are conducted. [5992]

Mr. Touhig: The Army Continuous Attitude Survey core programme consists of the serving personnel survey which is conducted biannually, and the Territorial Army and families surveys (sent to spouses of married officers and soldiers), which are conducted annually.

Tim Loughton: To ask the Secretary of State for Defence (1) if he will direct the Army Personnel Research Establishment to include a question in its next poll asking soldiers whether they had problems registering to vote in the 2005 general election; [6056]

(2) if he will make use of the Army Personnel Research Establishment polls to investigate how many soldiers were registered to vote in the 2005 general election. [6050]

Mr. Touhig: My noble Friend, the Minister for Defence Procurement (Lord Drayson) announced on 6 June 2005, *Official Report*, column WA62, in another place that we are presently looking at the possibility of carrying out a survey. All surveys need to be carefully framed and then considered as part of the normal sequence of information gathering and analysis. Any such survey would be conducted on a tri-Service basis and not confined to the Army, and would need to be justified by reference to needs, costs and likely benefits.

Compassionate Leave

Sarah Teather: To ask the Secretary of State for Defence if he will list the grounds which constitute a basis for compassionate leave of absence from active military duty. [6410]

Mr. Touhig: The purpose of compassionate leave is to allow Service personnel an authorised period of absence to enable them to attend to a personal crisis. There is no definitive list of occasions when it is appropriate to allow compassionate leave to be taken as each case requires individual, objective and sensitive assessment.

Defence Systems and Equipment Exhibition

Jeremy Corbyn: To ask the Secretary of State for Defence which Ministers from his Department will be attending the Defence Systems and Equipment International Exhibition in September. [3941]

Mr. Ingram: Defence Ministers have previously attended this biennial event, but for safety and security reasons it is not our practice to publicise Ministers' forward programmes.

Jeremy Corbyn: To ask the Secretary of State for Defence which Ministers from his Department attended the Defence Systems and Equipment International Exhibition in 2003; and which overseas delegates each met. [3942]

Mr. Ingram: My right hon. Friend the Member for Ashfield (Mr. Hoon), my noble Friend the Lord Bach of Lutterworth and I attended the Defence Systems and Equipment International Exhibition in 2003. Ministers or Ministry of Defence officials met delegations that were officially invited to the event. Official delegations attended from the following countries:

Algeria
Australia
Austria

Bahrain
Belgium
Botswana
Brazil
Brunei
Bulgaria
Canada
Chile
Colombia
PRC (China)
Czech Republic
Denmark
Egypt
Finland
France
Germany
Ghana
Greece
India
Republic of Ireland
Italy
Japan
Jordan
Kazakhstan
Kenya
Republic of Korea
Kuwait
Malaysia
Netherlands
Nigeria
Norway
Oman
Pakistan
Peru
Philippines
Portugal
Qatar
Romania
Saudi Arabia
Singapore
Slovakia
Slovenia
South Africa
Spain
Sweden
Thailand
Trinidad & Tobago
Turkey
UAE
USA
Vietnam
Venezuela.

Fleet Submarines

Mr. Amess: To ask the Secretary of State for Defence how many fleet submarines are operational. [5929]

Mr. Ingram: On 17 June 2005, nine SSN (Swiftsure and Trafalgar Class) and three SSBN (Vanguard Class) submarines were available for tasking by CINCFLEET.

Forces Training

Mr. Godsiff: To ask the Secretary of State for Defence if he will list the training schemes available to members of overseas armed forces *(a)* at his Department's establishments in the UK and *(b)* given by members of the UK armed forces overseas. [4812]

Mr. Touhig: The availability of training courses to members of overseas armed forces is administered though three single-Service Training Agencies. A summary of the types of courses which are available to members of overseas armed forces at establishments in the UK is shown in the following lists:

Types of training available to international students at UK establishments

International Defence Training (Royal Navy)

Air Engineering
Aviation
Degree Courses
Diving
English Language Training
Global Maritime Distress and Safety System General Operators Certificate
Hydrography, Meteorology and Oceanography
Junior Officer Training
Leadership Training
Logistics Officer Training
Marine Engineering
Medical
Mine Warfare
Nuclear, Biological and Chemical Defence Operations
Physical Training
Rating New Entry
Royal Marine Training
Seamanship
Sea Survival
Senior Upper Yardman Training
Submarine Training
Training Management
Weapon Engineering Training

International Defence Training (Army)

Ammunition and Explosives
Animal Training
Armour
Army Aviation
Artillery
Catering
Communication Information Systems
Close Protection
Combined Arms Training
Drill
Driving
Electrical and Mechanical Engineering
Finance and Administration
Infantry
Initial Officer Training

Intelligence
Information Technology
Language
Logistics
Medical
Military Engineering
Music
Police Training
Physical Training
Search
Staff Training
Survey
Technical Degree courses

International Defence Training (Royal Air Force)

Air Warfare
Airmen's Command and Management Training
Airmen's Specialist Training
Command and Staff Training Engineer
English Language Training
Environmental Protection
Fire Fighting
Flying Related Training
Flying Training
Health and Safety
Instructor Training
Joint Logistics and Other Specialist Training
Management and Procedural Training
Medical and Dental
Nuclear, Biological and Chemical
Officers' Miscellaneous Training
Parachute Training
Physical Education
Police and Security
Quality Assurance
Regiment Training
Supply

Further details of this training can be found at the following websites:

www.idtroyalnavy.mod.uk
www.britisharmytraining.mod.uk
www.idtraf.mod.uk

Attendance on these courses is dependent upon the level of security clearance that has been afforded to the country requesting the training and the security level of the course content.

Details of training assistance currently given by members of the UK armed forces overseas are outlined in the following lists:

Types of training assistance given by members of the UK armed forces overseas

International Defence Training (Royal Navy)

Anti-Air Warfare Training
Board and Search Training
Communications Training
Develop Navigation Training
Exclusive Economic Zone
Protection Officer Training
Practical Training at Sea for Coast Guard Vessels

International Defence Training (Army)

Ammunition Training
Armour-Gunnery Training
Border Management Training
Close Protection Training
Combined Arms Training
Communications and Information Systems Training
Infantry Training
Intelligence Training
International Explosives
Disposal Device
Logistics Training
Mine Clearance
Operational Training Advisory Group
Operations in Built Up Areas
Peace Support
Police Training
Recruit
Surveillance

International Defence Training (Royal Air Force)

Advise on non-Commissioned Officer development
Analysis of Training and Instructional Design
Forward Air Controller Training
Instructional Techniques Course
Military Training
Peace Support
Personnel Selection Advice
Quality Assurance Course
Quality Audit of UK Training
Qualified Helicopter Instructors
Search and Rescue Advice
Security Forces Training
Security Sector Reform

Fylingdales

Mr. Drew: To ask the Secretary of State for Defence by what mechanism the US authorities pay the Ministry of Defence Police Agency for policing activities at Fylingdales. [5977]

Mr. Ingram: The US authorities do not contribute towards the cost of policing at RAF Fylingdales.

Mr. Drew: To ask the Secretary of State for Defence what the policing arrangements are at Fylingdales; how many people have been arrested there in each of the last five years; and what discussions the local police have had with demonstrators. [5978]

Mr. Ingram: RAF Fylingdales is policed by a complement of Ministry of Defence Police (MDP) officers under the command of a chief inspector as the senior police officer. Groups of officers on duty are under the command of a duty inspector. A normal relief consists of a mixture of armed officers, unarmed officers and dog handlers.

Since September 2002 a total of 14 persons have been arrested at demonstrations held at Fylingdales for endangering the safety of themselves and others and for committing criminal damage to the security perimeter fence.

All demonstrations at Fylingdales are policed jointly by the MDP and North Yorkshire police and regular operational planning meetings are held in advance of all such events to ensure optimum safety and security. Prior to any planned demonstration both MDP and North Yorkshire police contact the organiser to discuss the event and the policing arrangements. On the day of any demonstration officers consult with the organiser again to emphasise where protestors can demonstrate safely and the areas they need to avoid. An information leaflet is given to all protesters on the day of the event.

Iraq

Mr. Moore: To ask the Secretary of State for Defence how many trained personnel have gone absent without leave in Iraq in each of the services since March 2003. [4254]

Mr. Ingram *[holding answer 14 June 2005]:* None.

Joint Casualty Treatment Ship

Mr. Hancock: To ask the Secretary of State for Defence what the original timetable was for producing the design of the Joint Casualty Treatment Ship; and what the current schedule is. [3878]

Mr. Ingram: A review of the programme to provide a Joint Casualty Treatment Ship (JCTS), formerly know as the Primary Casualty Receiving Ship, is taking place this year which will further inform the requirement and influence the design of the vessel. No decisions on the timescales for producing the design have been made.

Laptop Computers

Lynne Featherstone: To ask the Secretary of State for Defence how many laptop computers have been used by *(a)* Ministers, *(b)* special advisers and *(c)* officials in his Department in each year since 1995; how many have been (i) lost and (ii) stolen in that period; what the cost was of the use of laptops in that period; and if he will make a statement. [4124]

Mr. Ingram: Detailed information on the number and cost of laptop computers used by Ministers, special advisers and officials of the Ministry of Defence each year since 1995 is not held centrally, and could be provided only at disproportionate cost. The total number of laptops in use in MOD is not centrally recorded since purchase is delegated to individual business units. The approximate number currently in use (covering laptops purchased in the last four years and held by both MOD civilians and Service personnel) is estimated to be in the order of 46,000 at an overall cost of £69 million.

75 laptop computers belonging to the Ministry of Defence (including the armed forces) are recorded as having been lost and 590 as having been stolen since 1995.

The Ministry of Defence is alert to the vulnerabilities of laptops and security policy and procedures are continually being reviewed and revised to introduce measures to reduce the numbers of laptops stolen or lost, and to mitigate the impact when losses occur.

Menwith Hill

Mr. Willis: To ask the Secretary of State for Defence if he will list the payments made by the US Government for the use of the Menwith Hill base in North Yorkshire for each of the past five years; and if he will make a statement. [5263]

Mr. Ingram: The US Government do not pay Her Majesty's Government for the use of RAF Menwith Hill, as the base is made available to the United States Visiting Force under the terms of the NATO Status of Forces Agreement 1951.

Military Afloat Reach and Sustainability Project

Mr. Hancock: To ask the Secretary of State for Defence if he will list the companies to whom pre-qualification questionnaires for the Military Afloat Reach and Sustainability project have been issued; when they are due to be returned; when a shortlist of companies will be decided upon; and if he will make a statement. [2350]

Mr. Ingram: Pre-Qualification Questionnaires for the competition to select the Integrator for the Military Afloat Reach and Sustainability (MARS) programme have been issued to the following 16 companies:

Amec
Babcock Engineering Services
BAE Systems
James Fisher & Sons
General Dynamics UK
Moulder Offshore Co
KBR
Lockheed Martin
Maersk
Qinetiq
Raytheon Systems Ltd
SAIC
Serco Defence
Swan Hunter
Thales Group
VT Group

Responses were due to be returned to the Defence Procurement Agency (DPA) by 14 June 2005.

MARS is in the Concept Phase and no decisions have yet been made on the scope, timings or costs of the programme.

Military Estate

Mr. Hoyle: To ask the Secretary of State for Defence if he will list the land and buildings owned by *(a)* the Defence Aviation and Repair Agency, *(b)* his Department, *(c)* the RAF, *(d)* the Royal Navy and *(e)* the Army that are (i) for sale, (ii) for lease and (iii) under discussion for possible disposal. [5763]

Mr. Touhig: Apart from Trading Funds such as the Defence Aviation and Repair Agency (DARA), all property is owned centrally by the Ministry of Defence

rather than the individual Services, a list of which can be found on the National Asset Register website: http://www.hm-treasury.gov.uk/Documents/Public_Spending_and_Services/National_Asset_Register/pss_nar_2001 index.cfm

Details of all MOD properties and land currently listed for sale are available in the Library of the House. Since the sites identified for disposal can change, the list is kept under review and is generally updated quarterly.

Until final decisions on disposals have been formally announced and been subject to normal consultations, it would be inappropriate to list sites under discussion for possible future disposal.

No central record of land and buildings for lease is held by the MOD, due to their tendency to be localised and of limited duration.

Prisoners of War (Compensation)

Mr. Dismore: To ask the Secretary of State for Defence when he expects the parliamentary ombudsman to report on the outcome of the complaint by civilian internees of the Japanese excluded from the compensation scheme; and if he will make a statement. [6070]

Mr. Touhig: I refer the hon. Member to the answer I gave on 20 June 2005, *Official Report*, column 665W, to the hon. Member for Enfield, Southgate (Mr. Burrowes).

Shackleton Aircraft

Julia Goldsworthy: To ask the Secretary of State for Defence how many representations his Department has received from former air servicemen reporting "Shackleton" ear hearing problems. [6287]

Mr. Touhig: This information is not available and could be provided only at disproportionate cost.

Julia Goldsworthy: To ask the Secretary of State for Defence what research his Department has undertaken on the long-term hearing effects on aircrew of Shackleton aircraft. [6288]

Mr. Touhig: The Ministry of Defence has identified two research documents on the hearing effects on aircrew of the Shackleton aircraft. These are:

"Test Note 292—Noise Measurement in Shackleton Aircraft" produced in October 1950 by the Royal Aircraft Establishment

"Pitch Discrimination as Influenced by Medium Term Length in Shackleton Aircraft" produced in May 1963 by the Royal Air Force Central Medical Establishment.

It is not possible to establish whether any other research documents into this subject have been produced without incurring disproportionate cost.

Territorial Army (Lancaster)

Mr. Wallace: To ask the Secretary of State for Defence if he will ensure that, under the current review of Territorial Army centres in the United Kingdom, the centre in Lancaster is retained. [5144]

Mr. Touhig: Further to my reply on 13 June 2005, *Official Report*, column 18W, to the hon. Member, current work on rebalancing the Territorial Army is expected to come to fruition later in the year. I will ensure that the hon. Member is informed of the outcome in due course.

Troop Deployment

Mr. Drew: To ask the Secretary of State for Defence how many army reservists undertook active deployment in the last year for which statistics are available; and in which deployments. [6338]

Mr. Touhig: The following numbers of army reservists were mobilised and deployed in the 12 months preceding 1 May 2005: some 2,930 to Iraq; some 210 to the Balkans; some 70 to Afghanistan and a number fewer than five to Sierra Leone.

Mr. Amess: To ask the Secretary of State for Defence if he will make a statement on the deployment of troops in Kosovo. [5930]

Mr. Ingram: I refer the hon. Member to the answer I gave the hon. Member for Harborough (Mr. Garnier) on 6 June 2005, *Official Report*, columns 977–79.

Wassenaar Agreement

Robert Key: To ask the Secretary of State for Defence when the last occasion was on which *(a)* he, *(b)* his Ministers and *(c)* officials from his Department discussed the Wassenaar Arrangement with (i) Ministers and (ii) officials at the Department of Trade and Industry; and if he will make a statement. [4876]

Mr. Ingram: From available records covering the last five years, there have been no specific discussions between DTI and MOD Ministers on the Wassenaar Arrangement.

MOD and DTI officials regularly discuss the Wassenaar Arrangement. These discussions may include the FCO which has the overall policy lead on matters relating to such multilateral export control activities. The last Wassenaar Arrangement related discussion between MOD and DTI officials was on 15 June 2005.

NORTHERN IRELAND

Clostridium Difficile

Mr. Lidington: To ask the Secretary of State for Northern Ireland how many deaths in Northern Ireland in each year since 2000 have been attributable to clostridium difficile. [6146]

Angela E. Smith: For the period 2001 to 2004 the total number of deaths registered in Northern Ireland where "enterocolitis due to *clostridium difficile*"[1] *was mentioned on the death certificate is given in the following table. The table also includes the number of deaths where "enterocolitis due to clostridium difficile"* was the underlying cause of death. Figures for earlier years are not available as the International Classification of Diseases, Ninth Revision was used prior to 2001, and no specific code for this condition exists in the previous version of the International Classification of Diseases.

[1] International Classification of Diseases, Tenth Revision code A04.7 for years 2001–04.

Table: Number of deaths registered in Northern Ireland with "enterocolitis due to clostridium difficile" mentioned on the death certificate, and the number of these where it was also the underlying cause of death, 2001–04

	2001	2002	2003	[1]2004
"Enterocolitis due to *clostridium difficile*" mentioned on the death certificate	13	24	28	37
of which: "Enterocolitis due to *clostridium difficile*" is the underlying cause of death	7	10	13	15

[1] Data for 2004 is provisional.

Donaghadee Treatment Works

Lady Hermon: To ask the Secretary of State for Northern Ireland for what reasons he decided to invoke Crown Immunity in proceeding with his decision to site a new wastewater treatment works at Donaghadee, County Down; and for what the reason the decision was made after the prorogation of Parliament. [5960]

Angela E. Smith: The planning application in respect of the Waste Water Treatment Works at Donaghadee was a Crown Development application. It was processed in the normal manner and was assessed on its individual merits against the prevailing planning policies and planning considerations for the area.

The final approval notice issued on 4 April 2005 before the prorogation of Parliament.

Food Poisoning

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland how many cases of food poisoning there have been in the Province in each of the last five years. [5352]

Mr. Woodward: The number of cases of food poisoning reported in the Province in each of the last five years is detailed in the table.

Calendar year	*Number of cases*
2004[1]	1,666
2003	1,268
2002	1,220
2001	1,644
2000	2,285

[1] The figure for 2004 is provisional and is liable to change as further reports for this period are received.

Note:

Figures relate to the calendar year.

Health Trust Administration Costs

Mr. Gregory Campbell: To ask the Secretary of State for Northern Ireland what the administration cost of each of the health trusts in Northern Ireland was in the 2004–05 financial year. [5503]

Mr. Woodward: The 2004–05 annual accounts for each of the health trusts in Northern Ireland, which contain information on the administration costs for the financial year are not due for finalisation until 26 August 2005, and therefore this information will not be available until this date.

Jobseeker's Allowance (Fishermen)

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland how many Class II fishermen claimed jobseeker's allowance in *(a)* contributions and *(b)* income-based categories in (i) Portavogie, (ii) Kilkeel and (iii) Ardglass in each of the last three years. [5733]

Mr. Hanson: Separate statistics are not collected on claims to social security benefits by fishermen. I am therefore not able to say how many Class II fishermen have received benefits in the areas requested in the last three years.

NHS Direct

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland what plans he has to extend provision of NHS Direct to Northern Ireland; and if he will make a statement. [5324]

Mr. Woodward: In Northern Ireland each of the four Health and Social Services Boards currently operate their own daytime telephone advice line. Out-of-hours providers for which each board is responsible deliver access to advice and services outside normal office hours. The Department is working with the four boards to consider further development of these services on a regional basis.

Northern Bank Robbery

Lady Hermon: To ask the Secretary of State for Northern Ireland if he will make a statement on progress made by the police service of Northern Ireland in its investigation of the Northern Bank robbery of 20 December 2004; and for what reasons there have been no arrests. [6154]

Mr. Woodward: The investigation into the Northern Bank robbery on 20 December is ongoing and continues to be one of the largest investigations currently undertaken by the PSNI. By the very nature of the crime committed, the investigation is complex, methodical and resource intensive and to date over 3,300 separate investigative actions have been raised. PSNI remain committed to bringing the perpetrators to justice but as with any serious crime investigation, the police will only conduct searches or make arrests at a time that is in the best interests of the investigation and the administration of justice.

Occupational Therapy

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland what the *(a)* average and *(b)* longest waiting time for assessment for occupational therapy is in each hospital trust in the Province. [5343]

Mr. Woodward: Information on average and longest waiting times for occupational therapist assessment in hospital trusts is not collected as occupational therapy is primarily a community-based service. Information is, however, available on the time individuals aged 19 and over had waited for assessment by community occupational therapists to commence, according to specified time band. The number of adults in each time band is shown in the table in respect of assessments commenced in the quarter ending 31 December 2004, the latest date for which such information is available.

Information is provided for priority cases and non-priority cases separately, as different categories are used for recording.

Time waited for commencement of assessment by community occupational therapists, quarter ending 31 December 2004

Time waited for commencement of assessment by community occupational therapists, quarter ending 31 December 2004

	Number of adults
Priority cases	
Less than two weeks	3,561
Two weeks and under one month	1,136
One month and over	1,102
Total	5,799
Non-priority cases	
Less than three months	2,214
Three months to under six months	439
Six months and over	1,082
Total	3,735

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland how many patients are awaiting assessment for occupational therapy in each health trust area in the Province. [5344]

Mr. Woodward: The numbers of individuals aged 19 and over awaiting assessment for occupational therapy at 31 December 2004 for each Health and Social Services Trust, according to priority and non-priority cases, are shown in the following table.

	Priority cases	*Other (non-priority) cases*	*Total*
North and West Belfast	343	1,072	1,415
South and East Belfast	57	195	252
Ulster Community and Hospital	22	600	622
Down Lisburn	70	694	764
Causeway	357	747	1,104
Homefirst	726	1,034	1,760
Armagh and Dungannon	19	303	322
Craigavon and Banbridge	461	360	821
Newry and Mourne	143	964	1,107
Foyle	247	1,348	1,595
Sperrin Lakeland	210	522	732
Northern Ireland	2,655	7,839	10,494

Olympic Bid

Lady Hermon: To ask the Secretary of State for Northern Ireland how much has been spent by his Department in promoting London's 2012 Olympic bid in Northern Ireland. [5513]

Mr. Hanson: Expenditure of £55,113.87, excluding VAT, has been incurred in promoting London's Olympic bid in Northern Ireland.

Lady Hermon: To ask the Secretary of State for Northern Ireland what funding has been earmarked by his Department for Northern Ireland's participation in hosting the Olympic Games in 2012 should London's bid be successful. [5514]

Mr. Hanson: The Government and the Mayor of London have estimated that a public funding package of £2.375 billion would be required to host the Games should London's bid be successful. It is too early to earmark funding for Northern Ireland's participation in hosting the Games.

Postal Votes

Lady Hermon: To ask the Secretary of State for Northern Ireland how many postal votes were issued in each parliamentary constituency in Northern Ireland at the last general election; and of those issued, how many people went on to vote by post. [3503]

Mr. Hanson: This issue is an operational matter and is the responsibility of the chief electoral officer who is writing to the hon. Lady. The letter contains the following information:

Constituency	*Postal ballot papers issued*	*Postal ballot papers returned*
Belfast East	584	493
Belfast North	570	488
Belfast South	681	492
Belfast West	743	586
East Antrim	622	517
East Londonderry	1,647	1,399
Fermanagh and South Tyrone	4,559	4,060
Foyle	2,515	2,210
Lagan Valley	1,087	941
Mid Ulster	2,891	2,659
Newry and Armagh	1,873	1,664

Railway Crossing (Lurgan)

David Simpson: To ask the Secretary of State for Northern Ireland how many trains pass through Lurgan on weekdays; and for how long on average each day William Street is closed to traffic and pedestrians as a result. [5247]

Mr. Woodward: 110 trains pass through Lurgan on each weekday, 55 in each direction. This necessitates the closure of the barrier at William Street for approximately two minutes on each occasion. As a result, the William Street barrier is closed in total for approximately three hours and 40 minutes daily.

WORK AND PENSIONS

"Inspire" Magazine

Mr. Boswell: To ask the Secretary of State for Work and Pensions what the *(a)* cost and *(b)* circulation of "Inspire" magazine was in the last year for which figures are available. [4511]

Margaret Hodge: The administration of Jobcentre Plus is a matter for the Acting Chief Executive of Jobcentre Plus, Lesley Strathie. She will write to the hon. Member.

Letter from Lesley Strathie to Mr. Tim Boswell, dated 22 June 2005:

The Secretary of State has asked me to reply to your question about the costs and circulation of the Jobcentre Plus 'Inspire' magazine. This falls within the responsibilities delegated to me as Acting Chief Executive of Jobcentre Plus.

'Inspire' is designed to promote Jobcentre Plus services to customers by offering real examples of how others have been helped to get or keep employment. It encourages customers to help themselves by making use of our services, including the Jobseeker Direct telephone line and website. We plan to produce 'Inspire' four times a year.

To date, two editions of 'Inspire' have been produced. The cost per edition has averaged £70,400 for 210,000 copies (33 pence per copy). 'Inspire' is mainly distributed to our customers through Jobcentre Plus offices, but copies are also sent to external organisations such as Citizens Advice and doctors' surgeries. 'Inspire' is also available on our website www.jobcentreplus.gov.uk.

I hope this is helpful.

Acts of Parliament

Mr. Gordon Prentice: To ask the Secretary of State for Work and Pensions if he will take steps to make all Acts of Parliament published before 1988 for which his Department is responsible available online. [3740]

Mr. Timms: The Controller of Her Majesty's Stationery Office (HMSO) within the Cabinet Office is the Queen's Printer of Acts of Parliament, and responsible for the publication of Acts of Parliament. HMSO has considered the publication of Acts prior to 1988, which is the earliest date when these were available electronically, but has decided not to do so as many have been heavily amended. To publish them in their original form would be misleading for many users. The Government are, however, taking forward development of a Statute Law Database which will contain the fully revised and updated text of all legislation from 1275. It is expected that this will be made available to the general public during 2006.

Incapacity/Invalidity Benefit

Mr. Laws: To ask the Secretary of State for Work and Pensions what the most recent average time taken between an application for incapacity benefit being received and the personal capacity assessment. [1340]

Mrs. McGuire: The information requested is not collected centrally and could be obtained only at disproportionate cost.

Mr. Frank Field: To ask the Secretary of State for Work and Pensions what the cost of *(a)* invalidity benefit and *(b)* incapacity benefit (i) in cash terms, (ii) in real terms and (iii) as a proportion of the benefit budget for people of working age has been in each of the last 30 years. [1875]

Mrs. McGuire *[holding answer 8 June 2005]:* The available information is in the tables.

Total expenditure on incapacity related benefits by year in nominal and real terms

	Total invalidity benefit, sickness benefit and severe disablement allowance (nominal terms)[1]	*Total invalidity benefit, sickness benefit and severe disablement allowance (real terms, 2005–06 prices)*[1]
1974–75	665	4,544
1975–76	885	4,824
1976–77	1,093	5,252
1977–78	1,331	5,631
1978–79	1,605	6,117
1979–80	1,735	5,660
1980–81	1,912	5,279
1981–82	2,180	5,495
1982–83	2,301	5,417
1983–84	2,319	5,220
1984–85	2,657	5,684
1985–86	2,891	5,868
1986–87	3,138	6,172
1987–88	3,457	6,439
1988–99	3,868	6,735
1989–90	4,386	7,135
1990–91	5,076	7,653
1991–92	6,355	9,037
1992–93	7,214	9,934
1993–94	8,136	10,913
1994–95	8,823	11,665

	Total incapacity benefit and severe disablement allowance (nominal terms)[1,2]	*Total incapacity benefit and severe disablement allowance (real terms, 2005–06 prices)*[1,2]
1995–96	8,726	11,213
1996–97	8,567	10,651
1997–98	8,411	10,195
1998–99	8,235	9,702
1999–2000	7,796	8,990
2000–01	7,780	8,868
2001–02	7,789	8,657
2002–03	7,716	8,292
2003–04	7,575	7,918

[1] Information on income support (IS) paid to Short term sick and Long term sick and disabled client groups is not available prior to 1991–92, so IS expenditure is not shown for all years. As many incapacity benefit (IB) claimants receive income via IS, expenditure presented here is less than is usually quoted for total IB expenditure.

[2] Incapacity benefit (IB) replaced invalidity benefit and sickness benefit in 1995–96. However, IB expenditure for 1995–96 includes a small amount of sickness and invalidity benefit.

Note:

All figures are expressed in £ million and are rounded to the nearest £ million.

DWP Benefit expenditure tables 1, 2, 3a and 4a.

Expenditure on working-age incapacity related benefits by year in nominal and real terms, and as a proportion of working age expenditure

	Total invalidity benefit, sickness benefit and severe disablement allowance paid to people of working age (nominal terms)[1,2,3]	*Total invalidity benefit, sickness benefit and severe disablement allowance paid to people of working age (real terms, 2005–06 prices)*[1,2,3]	*Proportion of working age expenditure*[4] *(percentage)*
1991–92	5,341	7,595	25
1992–93	6,065	8,352	24
1993–94	6,859	9,200	24
1994–95	7,467	9,873	26

	Total incapacity benefit and severe disablement allowance paid to people of working age (nominal terms) [1,2,3]	*Total incapacity benefit and severe disablement allowance paid to people of working age (real terms, 2005–06 prices)* [1,2,3]	*Proportion of working age expenditure*[4] *(percentage)*
1995–96	7,543	9,692	25
1996–97	7,594	9,441	25
1997–98	7,607	9,220	26
1998–99	7,660	9,025	26
1999–2000	7,491	8,638	27
2000–01	7,614	8,679	28
2001–02	7,623	8,473	28
2002–03	7,553	8,117	27
2003–04	7,406	7,741	26

[1] Information on income support (IS) paid to Short term sick and Long term sick and disabled client groups is not available prior to 1991–92, so IS expenditure is not shown for all years. As many incapacity benefit (IB) claimants receive income via IS, expenditure presented here is less than is usually quoted for total IB expenditure.

[2] Incapacity benefit (IB) replaced invalidity benefit and sickness benefit in 1995–96. However, IB expenditure for 1995–96 includes a small amount of sickness and invalidity benefit.

[3] The working age expenditure is consistent with published figures for DWP Objective 2, to "promote work as the best form of welfare for people of working age, while protecting the position of those in greatest need". Information prior to 1991–92 is unavailable.

[4] The working age proportion is part of the total working age expenditure published under DWP Objective 2, which includes expenditure on housing benefit and council tax benefit.

Note:
All figures are expressed in £ million and are rounded to the nearest £ million.

DWP Benefit expenditure tables 1, 2, 3a and 4a.

Jobcentre Plus (Staff Training)

Mrs. Dean: To ask the Secretary of State for Work and Pensions what advice and training is available for employees of Jobcentre Plus on autistic spectrum disorders. [4429]

Margaret Hodge: The administration of Jobcentre Plus is a matter for the Acting Chief Executive of Jobcentre Plus, David Anderson. She will write to my hon. Friend.

Letter from Lesley Strathie to Mrs. Janet Dean, dated 22 June 2005:

The Secretary of State has asked me to reply to your question regarding the advice and training available to Jobcentre Plus employees on autistic spectrum disorders. This is something that falls within the responsibilities delegated to me as Acting Chief Executive of Jobcentre Plus.

It may be helpful to explain that we have a Disability Awareness Open Learning Handbook which details autistic spectrum disorders; the effects they have on individuals; the implications for work, and the possible types of support an individual might need in employment. This information was approved by the National Autistic Society and is recommended learning for all advisers and mandatory learning for Disability Employment Advisers (DEAs). We are currently working with the Society to enhance our learning materials further.

In addition, all Jobcentre Plus staff have access to information about autistic spectrum disorders through guidance on our Intranet.

I hope this is helpful.

Pathways to Work

Mr. Laws: To ask the Secretary of State for Work and Pensions how many people on incapacity benefit in the Pathways to Work pilot areas have refused to engage with the job-search and support staff; and if he will make a statement. [2107]

Margaret Hodge: People claiming incapacity benefits in Pathways to Work areas are not required to undertake job-search activities. However they may be sanctioned for failing to attend or take part in a work focused interview (WFI) with a Jobcentre Plus personal adviser.

Between April 2004 and March 2005 92,420 people entered Pathways to Work pilot programmes, of whom 28,949 people had an initial WFI. 17,363 people went on to have one or more repeat WFIs. In the period from December 2004 to April 2005 182 sanctions were imposed. Some individuals may have had more than one sanction imposed on them so the figure is a close approximation but not the exact number of individuals sanctioned.

Private Finance Projects

Mr. Philip Hammond: To ask the Secretary of State for Work and Pensions if he will list the private finance initiative and public-private partnership projects his Department is undertaking; and what the status of each is. [2366]

Margaret Hodge: The Department for Work and Pensions is currently engaged in 11 public-private partnerships, of which nine are private finance initiatives. The status of each of these is operational. These are a combination of those let to April 2001 by the former Department for Social Security and the Employment Service, which was an executive agency of the former Department for Education and Employment; and those let subsequently by the DWP.

The nine DWP private finance initiatives are:

1. PRIME (Private Sector Resource Initiative for the Management of the Estate). A 20-year PFI partnership deal competitively awarded by the then Department of Social Security to Trillium (now called Land Securities Trillium) on 1 April 1998. This will provide serviced offices until 2018 in return for payments over the life of the contract estimated at £2.008 billion in net present value. Following the creation of DWP in June 2001 the former Employment Service estate was transferred to Land Securities Trillium from 15 December 2003 under an expansion of the PRIME contract. The National Audit Office has carried out an independent scrutiny of this transaction and its report was published on 26 January 2005.

2. A 10-year PFI IT Partnership (ITP) between the Employment Service and EDS for the provision of IT and telephony services awarded in August 1998 and extending to July 2008. So far this has developed and delivered the "Modernising ES" IT initiative, including the set up of Jobpoints, and will continue to provide all ES IT and development of innovations.

3. A PFI partnership between the Employment Service and Northgate HR (formerly Rebus Human Resources Services) awarded in February 1999 to deliver human resources services, including payroll and personnel administration.

These services will be delivered under this contract until they are incorporated into the new, DWP-wide resource management system currently being developed.

4. A 10-year PFI deal for the Strategic Outsourcing Business Allocation (SOBA) awarded to Affinity consortium (EDS, IBM and PricewaterhouseCoopers) on 8 August 2000.

5. A 10-year PFI deal for the Child Support Reforms business allocation awarded to Affinity on 8 August 2000.

6. A five-year PFI deal to deliver Wide Area Network (WAN) services awarded to Arcway consortium (BT Syntegra) in November 2000.

7. A four-year PFI deal to support Pensions Forecasting awarded to Affinity on 6 June 2002.

8. An eight-year PFI deal to support New Tax Credit systems awarded to Affinity on 13 December 2002; and

9. A five-year PFI deal to provide advanced telephony services to contact centres awarded to Arcway in April 2003.

The Department's private finance initiatives and annual expenditure are all disclosed in the Department's Resource Accounts. This information is recorded in the operating cost statement. There is also a separate section, "Commitments under PFI Contracts", that lists all the PFI contracts and discloses the total payments to which the Department is committed in the next financial year.

The Department's Resource Account is available in the Library and can be accessed at:

http://www.dwp.gov.uk/publications/dwp/2004/res_ac/report.pdf

In addition the Department has two public-private partnership agreements—a Lead Service Provider agreement made with Affinity in September 2000 and a Network and Office Service Provider (NOSP) agreement made with Arcway in November 2000.

Unemployment (Young People)

Andrew Rosindell: To ask the Secretary of State for Work and Pensions what steps the Government are taking to encourage unemployed young people to learn new skills. [2955]

Margaret Hodge: The Government recognise the importance of ensuring that our current and future work force have access to relevant training to ensure they have the skills required by employers to get into and get on in work.

From 1997 to March 2005, 1.22 million young people aged between 18 and 24 have improved their job prospects and raised their skills levels through New Deal for Young People (NDYP), and of these 460,550 have moved into work. NDYP offers four options; a period of full-time education and training, voluntary work with training, participation on an environmental task force which combines training with community focused work experience and a subsided employment option. Skills training is available on all four options.

From April 2004 we gave New Deal personal advisers the flexibility to individually tailor provision to allow participants to move freely between options. Young people are encouraged to take part in the options by a weekly "top-up" payment of £15.38. Those who refuse to take part in the options period can face benefit sanctions.

Jobcentre Plus Districts are also working with local Learning and Skills Councils (LSCs), through annual joint delivery plans. These ensure that customers without a qualification, or with less than a level 2 qualification, are given the opportunity to access skills training funded by the LSC where that training is needed to gain sustainable, productive employment.

There are also opportunities for Jobcentre Plus clients to train in the work environment. Access to training in employment has increased through the successful Employer Training Pilots. The Government's decision to develop these principles through a national Employer Training Programme will further increase these opportunities. The Skills for Business Network also works with the LSC and Jobcentre Plus to increase access to Modern Apprenticeships by disadvantaged young people and adults.

PRIME MINISTER

Engagements

Mr. Jim Cunningham: To ask the Prime Minister what official engagements he has for July and August. [6058]

The Prime Minister: For security reasons, my future engagements are announced as and when appropriate.

Taxis

David T.C. Davies: To ask the Prime Minister how much his Office has spent on taxis in each of the last five years. [6491]

The Prime Minister: For these purposes my office forms part of the Cabinet Office. I have therefore asked my right hon. Friend the Chancellor of the Duchy of Lancaster (Mr. Hutton) to reply. A copy of the reply will be placed in the Library of the House.

FOREIGN AND COMMONWEALTH OFFICE

Afghanistan (Participation of Women)

Joan Ruddock: To ask the Secretary of State for Foreign and Commonwealth Affairs what progress has been made in Afghanistan in line with the Berlin Declaration with particular reference to provision for the participation of women in all sectors of the economy and society. [6039]

Dr. Howells: Women's rights have improved dramatically since the fall of the Taliban and progress continues to be made under the new government. Ensuring that women play a full role in Afghan society remains an important priority for the international community. In many areas ordinary women are now able to work and move about freely in a way that was impossible under the Taliban. The new constitution specifically protects women's rights and reserves a proportion of seats in parliament for women candidates. For last year's presidential elections, over 40 per cent. of those registered to vote were women. 40 per cent. of those who actually voted were women. Presidential candidates included one woman. President Karzai's cabinet includes two women, Dr. Massooda Jalal, Minister of Women's Affairs and Sediqa Balkhi, Minister of Martyrs and Disabled. Habiba Sarabi became Afghanistan's first female Governor (of Bamiyan) earlier this year.

Securing the full participation of women in all sectors of the economy and society will take time. To this end, the UK has a regular dialogue with the Afghan Independent Human Rights Commission (AIHRC) and is committed to working with the Afghan government and its international partners to improve women's ability to exercise their rights.

The Foreign and Commonwealth Office and Department for International Development have agreed a comprehensive Gender Strategy for 2004–05, a copy of which is available in the Library of the House.

Joan Ruddock: To ask the Secretary of State for Foreign and Commonwealth Affairs what steps have been taken to ensure that gender equality is mainstreamed in all sectors, programmes and policies in Afghanistan. [6040]

Dr. Howells: The Foreign and Commonwealth Office/ Department for International Development Gender Strategy for Afghanistan remains the cornerstone of our approach to gender equality in Afghanistan. The operational strategy for 2004–05 aimed to mainstream gender into "policy and programmes and targeted interventions". The priorities are:

A: Promoting Security and the Rule of Law;

B: Promoting Women's Civil and Political Rights; the FCO is currently promoting women's access to justice with a £240,000 programme to train Afghan lawyers in human rights advocacy, with a specific focus on women;

C: Protecting Women's Economic, Social and Cultural Rights.

A full copy of the Gender Strategy is available in the Library of the House.

Brussels Summit

Keith Vaz: To ask the Secretary of State for Foreign and Commonwealth Affairs which proposals the Government will place on the agenda for the Brussels summit on 16 and 17 June. [4058]

Mr. Douglas Alexander: The Government are not putting forward any specific proposals at the European Council. The Council will discuss, among other things, the Constitutional Treaty, the Community Budget for 2007–2013, enlargement, the action plan to implement the Hague Programme on freedom, security and justice, and the Union's Overseas Development Assistance commitments as we prepare for the UN Summit in September.

China (Religious Policy)

Mr. Drew: To ask the Secretary of State for Foreign and Commonwealth Affairs what assessment he has made of the impact of China's new Provisions on Religious Affairs. [6342]

Ian Pearson: Since the passing of the new regulations on religion in March 2005 there has been little apparent change in the challenges facing religious groups and organisations in China. China's new provisions on religious affairs reaffirm existing restrictions on religious practice. They keep the requirement for all religious groups to register and set out penalties for non-compliance.

We do not expect the new regulations to improve the situation for unregistered religious groups which continue to be put under pressure.

We raised our concerns about religious freedom at the latest round of the UK/China Human Rights Dialogue, held in London on 6 June.

Embassy Staff Levels

Lynne Featherstone: To ask the Secretary of State for Foreign and Commonwealth Affairs how many staff are based at each UK embassy. [6367]

Mr. Straw: The Foreign and Commonwealth Office (FCO) has a network of 233 diplomatic posts worldwide: 153 embassies and high commissions: 10 missions to international organisations such as the UN, the EU and NATO; and a further 70 consulates and deputy missions outside the capital cities in some countries. In addition there are 38 posts staffed entirely by local staff; 229 honorary consuls; and resident governors in nine of the 14 UK overseas territories.

Our embassies, missions and consulates are staffed by a mixture of FCO UK based staff, locally recruited staff and officers from other UK Government Departments.

There are approximately 6000 FCO UK based staff of whom about 2800 are based at our overseas posts at any one time. Overseas posts collectively employ about 10,000 locally engaged staff.

Figures are not held centrally on the total number of staff at each individual mission. This information could be compiled only at disproportionate cost.

Hezbollah

Mr. Drew: To ask the Secretary of State for Foreign and Commonwealth Affairs what plans the UK has to recognise Hezbollah. [5128]

Dr. Howells: The UK has no plans to recognise Hezbollah. The UK only recognises states, not non-state actors.

Hezbollah is a political, social, religious and self-styled national resistance movement. The UK proscribed part of Hezbollah, the External Security Organisation, as a terrorist organisation in February 2001 under the Terrorism Act 2000. In this context we keep the behaviour of Hezbollah, and its status, under constant review.

In December 2001 our embassy in Beirut initiated contacts with Hezbollah, with ministerial approval. Since then there has been irregular contact. The last such contact with Hezbollah was in February 2005. In discussions with Hezbollah, British officials made clear the Government's well-known opposition to terrorism and the importance of Hezbollah's ending attacks on Israel and reducing tension along the Blue Line. No further such meetings are planned.

Hong Kong

Mr. Hoyle: To ask the Secretary of State for Foreign and Commonwealth Affairs when a Minister last visited Hong Kong; and when he expects the next visit by a Minister. [6331]

Ian Pearson: My hon. Friend the former Minister of State for Higher Education (Dr. Howells) visited in February this year, the former Parliamentary Under-Secretary of State for Foreign and Commonwealth Affairs (Bill Rammell) visited in October 2004 and my right. hon. and noble Friend the Minister of State for Home Affairs (Baroness Scotland of Asthal) visited in December.

I will be visiting Hong Kong and mainland China in early July. A number of Ministers will be attending the World Trade Organisation (WTO) ministerial in Hong Kong later this year.

My hon. Friend may also be interested to know that Donald Tsang, visited the UK in October 2004 in his capacity as the then Chief Secretary and met my right hon. Friend the Foreign Secretary and my noble Friend the Lord Chancellor.

José Bustani

Lynne Jones: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on *(a)* the UK's support for the dismissal of José Bustani as director general of the Organisation for the Prevention of Chemical Weapons in 2002 and *(b)* the International Labour Organisation judgment on 26 July 2003 relating to Mr. Bustani's dismissal. [5917]

Dr. Howells: In a vote of no confidence at the March 2002 Organisation for the Prevention of Chemical Weapons Executive Council, a significant proportion of the Council showed they had lost confidence in Mr. Bustani in his role as director general. Only five of the council's 41 members voted in support of Mr. Bustani. As Mr. Bustani did not resign following this vote, a special conference of states party was held in April 2002 and a subsequent vote supported the earlier results. Mr. Bustani's appointment was accordingly terminated. It was our view that Mr. Bustani should be replaced by someone who enjoyed the full confidence of all the states party to the Chemical Weapons Convention (CWC). Our policy throughout was guided by our judgment of what was in the best interests of the OPCW and the CWC.

Mr. Bustani pursued a compensation claim against the OPCW before the International Labour Organisation Administrative Tribunal. The judgment reached by the Tribunal in July 2003 awarded Mr. Bustani damages, including payment for loss of earnings. The OPCW subsequently appealed against the award for loss of earnings and the damages were later reduced. The OPCW duly paid Mr. Bustani the reduced damages in accordance with its legal obligation to do so.

Sri Lanka (Tamil Separatists)

Gregory Barker: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on the political situation in Sri Lanka, with particular reference to the Tamil separatists. [6033]

Dr. Howells: We are encouraged that the three-year-old ceasefire between the Government of Sri Lanka and the Liberation Tigers of Tamil Eelam (LTTE) remains in place. It is essential that it continues to do so and that both sides desist from activities which could put it in danger. In this context we fully endorse the recent statement by the Tokyo Conference of Co-chairs expressing concern that respect for the ceasefire is being undermined by persistent violence producing a climate of impunity. We call upon the LTTE to end their assassinations and stop their recruitment and use of child soldiers. We also call upon the Government of Sri Lanka to take decisive action to ensure that killings are stopped and paramilitaries are disarmed immediately as required by the ceasefire agreement.

The Government are concerned that there have been no direct peace talks since April 2003. We work closely with international partners to encourage all parties to return to the negotiating table as soon as possible. The tragedy of the 26 December 2004 tsunami represented an opportunity for all communities in Sri Lanka to work together. The putting in place of a post-tsunami aid coordination mechanism for the North and East should provide a framework for more effective tsunami assistance and help build confidence between the two sides. We welcome the determination shown by the President to achieve the enactment of such a joint mechanism and encourage all sides to implement it rapidly and effectively.

UN Disengagement Observer Force

Mr. Martyn Jones: To ask the Secretary of State for Foreign and Commonwealth Affairs what assessment he has made of the United Nations Secretary-General's proposal to extend the mandate of the United Nations Disengagement Observer Force in the Middle East. [5689]

Dr. Howells: The UK supports the UN Secretary-General's proposal to extend the mandate of the United Nations Disengagement Observer Force for a further six months until 31 December 2005. If agreed by the Security Council, we look forward to the Secretary-General's report on developments at the end of that period.

UN Resolution 1559

Mr. Martyn Jones: To ask the Secretary of State for Foreign and Commonwealth Affairs what his most recent assessment is of the implementation of resolution 1559 of the United Nations Security Council. [5692]

Dr. Howells: Our assessment of the implementation of United Nations Security Council Resolution 1559 does not differ from the UN secretary-general's in his first six-monthly report on the implementation of UNSCR 1559 (UN document S/2005/272), which was issued on 26 April 2005.

With our partners in the international community, the UK will work towards full implementation of UNSCR 1559.

Visas

Damian Green: To ask the Secretary of State for Foreign and Commonwealth Affairs what recent representations he has received on the issuing of visas to overseas doctors; and if he will make a statement. [6240]

Dr. Howells: My right hon. Friend the Foreign Secretary has not received any recent representations on the issuing of visas to overseas doctors and neither has my noble Friend the Minister at the Foreign and Commonwealth Office (Lord Triesman of Tottenham) responsible for entry clearance overseas.

Dr. Iddon: To ask the Secretary of State for Foreign and Commonwealth Affairs how long a person who has been granted a two-year visitors' visa has to stay out of the country after making a first visit of six months' duration before he or she may return for a second visit. [6206]

Dr. Howells: There is no minimum period for a person issued with a two-year multiple entry visa to be out of the UK after a six-month visit, before being allowed to re-enter. Re-entering the UK would be subject to the immigration officer at the port of entry being satisfied that each of the visa requirements is met by the visitor. This includes showing that the visitor is genuinely seeking entry as a visitor for a limited period not exceeding six months and that he/she intends to leave the UK at the end of this visit as stated by him/her.

World War Two Medals

Mr. Benton: To ask the Secretary of State for Foreign and Commonwealth Affairs pursuant to his answer of 24 May 2005, *Official Report*, column 1355W, on world war two medals, whether he has made a decision on the possibility of an exception to the rules governing the acceptance and wearing of foreign awards to enable British veterans who served on Arctic Convoys during the second world war to receive the Russian Defence of the Soviet Arctic Region medal. [6301]

Mr. Straw: No final decision was taken on this matter because, in December 2004, the Russian authorities made known that they were no longer considering conferring the medal for the Defence of the Soviet Arctic Region on foreign war veterans.

CONSTITUTIONAL AFFAIRS

Court Fines

Lynne Featherstone: To ask the Minister of State, Department for Constitutional Affairs how much revenue has been paid to the Exchequer from court fines in England in each year since 1995. [5973]

Ms Harman: The table shows the total amount of fine receipts collected between 1994–95 and 2004–05.

Traditionally all receipts from court fines have been returned to the consolidated fund and re-allocated through the spending review process. However since 2002–03 DCA has piloted a scheme aimed at increasing recovery rates of fines, in order to increase the effectiveness of the punishment as a deterrent. As part of this scheme my Department (DCA) retain a proportion of the fine income to finance enforcement costs. The DCA departmental expenditure limit is adjusted to take account of this new arrangement.

Fine receipts paid to consolidated fund in the financial year

£ million

	Total fine receipts	*Amount paid to HM Treasury consolidated fund*	*Amount retained by DCA for enforcement costs*
1994–95	147.6	147.6	—
1995–96	150.4	150.4	—
1996–97	144.3	144.3	—
1997–98	152.1	152.1	—
1998–99	153.5	153.5	—
1999–2000	145.0	145.0	—
2000–01	130.9	130.9	—
2001–02	124.6	124.6	—
2002–03	120.3	76.6	43.7
2003–04	133.3	73.7	59.6
2004–05	142.4	79.0	63.4
Total	1,544.3	1,377.6	166.7

Notes:
1. The figures given are for fine receipts in England and Wales.
2. Figures are not separately collated for England.

Marked Registers

Paul Farrelly: To ask the Minister of State, Department for Constitutional Affairs how much is charged per page by local councils for the marked electoral register after local elections; how much is proposed to be charged by Pickfords for the general election marked register; and if she will make a statement. [6472]

Ms Harman: The fees and charges for the inspection and provision of copies of the marked register for local elections are at the discretion of the local authority, responsible for retaining the document.

The fees structure for purchasing copies of the marked electoral registers for the 2005 general election, have been set by the Clerk of the Crown, with agreement by HM Treasury, as required under rule 57(3) of schedule 1, the Representation of the People Act 1983.

They stand at 35p per copied page of A4; an £8 handling charge: and, postage and packaging at cost.

Paul Farrelly: To ask the Minister of State, Department for Constitutional Affairs what assessment she has made of the photocopying rate per page to be charged by Pickfords for the marked electoral register. [6473]

Ms Harman: Charges for obtaining copies of the marked registers are set by the Clerk of the Crown, with agreement from HM Treasury, as required under rule 57(3) of schedule 1, the Representation of the People Act 1983. Charges are set on the basis of cost covering, and not on a profit making basis. The charges for the 2005 general election have, in fact, not increased from those at the previous general election in 2001.

Paul Farrelly: To ask the Minister of State, Department for Constitutional Affairs for what reasons marked electoral registers are not retained by local councils following a general election. [6474]

Ms Harman: The marked registers have traditionally been stored centrally, with other election documentation that the Clerk of the Crown in Chancery is required to retain for a period of one year after a general election.

The Government have agreed with the Electoral Commission's proposal in its report, "Voting for change", that in future, all documentation produced at a general election, including marked registers, should be stored by local authorities in England and Wales. The Government will legislate to provide for this at the earliest opportunity.

National Insurance Numbers

Mr. Amess: To ask the Minister of State, Department for Constitutional Affairs what her policy is on using National Insurance numbers in voter registration. [5927]

Ms Harman: The Government currently has no plans to use National Insurance numbers in voter registration outside of Northern Ireland. This is in line with recommendations made by the Electoral Commission and the joint Office of the Deputy Prime Minster/ Constitutional Affairs Select Committee.

Parliamentary Boundary Changes

Mr. Drew: To ask the Minister of State, Department for Constitutional Affairs what plans she has to publicise parliamentary boundary changes in Gloucestershire. [6339]

Ms Harman: The final report of the Boundary Commission in relation to parliamentary boundaries in England has not yet been published. It will be laid before Parliament as soon as practicable after it has been submitted to the Secretary of State.

Postal Voting

Mr. Heald: To ask the Minister of State, Department for Constitutional Affairs if she will estimate the cost to public funds of all-postal pilots election in each year since their introduction. [3614]

Ms Harman: The all-postal pilots in June 2004 were held in combined European parliamentary and local elections across four English regions, the East Midlands, North East, North West and Yorkshire and the Humber. The Government do not yet have firm estimates for the cost of all-postal voting in those elections as some accounts are outstanding from local authorities.

The other all-postal pilots since 2000 in local elections were funded by local authorities, not by central Government. I do not have figures for those costs. The Electoral Commission requested information on costs from local authorities as part of its evaluation of the pilots.

TREASURY

Child Trust Funds

Dr. Kumar: To ask the Chancellor of the Exchequer what steps his Department plans to take to encourage parents to invest their Child Trust Fund vouchers immediately. [5854]

Mr. Ivan Lewis: I refer the hon. Member to the answer given to the hon. Member for Twickenham (Dr. Cable) on 15 June 2005, *Official Report*, column 385W.

Contraband

Keith Vaz: To ask the Chancellor of the Exchequer what measures he is taking to prevent the *(a)* smuggling into the UK and *(b)* sale of contraband (i) tobacco products and (ii) alcohol; and if he will make a statement. [6489]

John Healey: In 1997 this Government cancelled a previously planned reduction of 300 Customs staff. In 2000 we launched the Tackling Tobacco Smuggling (TTS) strategy which provided HM Revenue and Customs with an extra £209 million to fund almost 1,000 additional officers and a national fleet of x-ray scanners. In 2001, as part of TTS, we introduced Fiscal Marks for tobacco to prevent the sale of smuggled products.

This strategy has been successful in first halting the previous rapid growth in cigarette smuggling and then reducing the market share for illicit cigarettes to its current level of an estimated 15 per cent. In the past four years more than nine billion cigarettes have been seized and over 259 gangs involved in large scale smuggling broken up. Furthermore, the total number of cigarettes successfully smuggled into the UK each year has been reduced by over five billion sticks, which represents a reduction of over one third.

At Budget 2005 the Government confirmed the strategic approach it is taking to tackle spirits fraud—through the introduction of regulatory change, including duty stamps for spirits, enhancing operational activity and working closely with the UK industry—aimed at reducing spirits fraud by half by 2008.

Counterfeit Medicines

Mr. Walker: To ask the Chancellor of the Exchequer (1) what actions Her Majesty's Customs and Revenue are taking to tackle the importation of counterfeit medicines; and if he will make a statement; [5675]

(2) which Government agencies are responsible for tackling the importation of counterfeit medicines; and if he will make a statement. [5681]

Dawn Primarolo: Responsibility for tackling the importation of counterfeit medicines lies with HM Revenue and Customs using their powers to take enforcement action against goods that breach the import and export prohibitions on counterfeit, pirated or patent infringing intellectual property rights as set out in EC Council Regulation 1383/2003. HMRC has publicised these procedures in Public Notice No. 34 'Intellectual Property Rights', which can be viewed at www.hmrc.gov.uk/Forms leaflets and booklets.

HMRC targets counterfeit goods at importation using profiles set on its central systems in response to information received from those right holders who have submitted an application to have their rights protected at importation. HMRC detains any suspect consignments and provides the right holder with information that has been declared to HMRC, including details of the goods,

importer and manufacturer. HMRC will seize any goods where the right holder confirms in a witness statement that the goods are counterfeit.

Where HMRC detects a consignment of medicines that they suspect is counterfeit, and there is no application from a right holder in place, HMRC will detain the goods and invite the right holder to lodge an application. If the right holder does so within three working days and subsequently confirms in a witness statement that the goods are counterfeit, HMRC will seize the goods.

In May 2005 officials from HMRC and the Medicines and Healthcare products Regulatory Agency met representatives from the pharmaceutical industry to explain the role of HMRC and agree steps that aim to improve the flow of information to HMRC and thereby enhance the targeting of suspect consignments of counterfeit medicines.

HMRC also publicises its role through bodies such as the Anti-counterfeiting Group, at which officials offer advice concerning frontier protection of intellectual property rights to businesses whether they are registered right holders or not.

HMRC are in discussion with the Patent Office and other enforcement agencies as part of the development of the UK's National Intellectual Property Crime Strategy. This strategy is designed to improve consumer awareness of the dangers of counterfeit goods, disseminate information of specific cases against known offenders and ensure a unified approach across Departments.

Customs Officers

Mr. Hancock: To ask the Chancellor of the Exchequer what progress is being made in recruiting additional customs officers. [6479]

Dawn Primarolo: The Chancellor announced in his pre-Budget statement in December 2004 an additional £5 million for the financial year 2005–06 and an additional £15 million for the financial year 2006–07 to fund additional resources for national security at the frontier.

HMRC is currently contributing to this commitment through the redeployment of staff released through the staff efficiencies it is generating.

It is not departmental practice to discuss levels of resourcing and deployment in this activity at individual locations as such information has security considerations

Governmental Pension Payments

Mr. Mudie: To ask the Chancellor of the Exchequer which Government departments pay *(a)* annuities and *(b)* pensions from public funds to descendants of individuals who were granted exceptional perpetual annuity or pension payments due to their exceptional public service. [6209]

Mr. Des Browne: The Treasury is not aware of any such payments being made by Government Departments.

Government Spending

Mr. Tyrie: To ask the Chancellor of the Exchequer what the percentage share of total Government spending devoted to *(a)* social security, *(b)* health and *(c)* education has been in each year since 1995 calculated on a consistent basis. [6115]

Mr. Des Browne: A consistent series of public spending on social protection, health and education from 1987–88 to 2004–05, the latest year available, is shown in table 3.2 of "Public Expenditure Statistical Analyses (PESA) 2005" (CM6521). Total Expenditure on Services (TES), a measure of total public spending on which the functional analyses are based, is also shown in table 3.2.

Honours

Mr. Pope: To ask the Chancellor of the Exchequer how many officials currently in the Department received honours in the recent Queen's Birthday Honours List; and at what rank of honour. [5109]

John Healey: I refer my hon. Friend to the answer given to him today by the Chancellor of the Duchy of Lancaster.

Iraq

Lynne Featherstone: To ask the Chancellor of the Exchequer what the estimated total cost to date is of UK operations and assistance in Iraq, broken down by month; and if he will make a statement. [6049]

Mr. Des Browne: I refer the hon. Member to the answer I gave the hon. Member for Twickenham (Dr. Cable) on 21 June.

Matched Funding

Stewart Hosie: To ask the Chancellor of the Exchequer what the Treasury rules are for the provision of matched funding for projects part funded by the European Union; and what the value of matched funding was for *(a)* the UK and *(b)* each nation of the UK in each year since 2001. [6383]

Mr. Ivan Lewis *[holding answer 21 June 2005]:* The rules for the provision of match funding for projects part funded by the European Union are set out on the DTI website at: http://www.dti.gov.uk/europe/mf2.htm. The total UK match funding allocations for 2001–04 are set out as follows:

United Kingdom structural funds allocations 2001 to 2004 (in €000 at 1999 figures)

	Total match funding (National and Private)			
	2001	*2002*	*2003*	*2004*
England	2,389,340	2,404,085	2,383,537	2,181,623
Scotland	441,178	417,787	394,786	356,354
Wales	391,883	365,954	357,706	344,483
Northern Ireland	96,086	96,401	94,372	99,630
Total	3,318,487	3,284,227	3,230,401	2,982,090

National Insurance Fraud

Mr. Jim Cunningham: To ask the Chancellor of the Exchequer what the estimated levels of national insurance fraud are in the UK. [6059]

Dawn Primarolo: There is currently no reliable estimate of the level of national insurance fraud.

Tax Avoidance

Dr. Kumar: To ask the Chancellor of the Exchequer what his most recent estimate is of the amount of tax avoided by UK citizens through tax havens with connections to the UK. [5840]

Dawn Primarolo: There is no reliable estimate of the amount of UK tax avoided or evaded by the use of tax havens.

Tax avoidance and evasion damage the global economy. The UK is taking action both domestically and in co-operation with our international partners to counter avoidance schemes and protect UK tax revenues. In this regard, the UK has welcomed the commitments made by 35 jurisdictions (including UK Crown Dependencies and Overseas Territories) to the OECD principles of transparency and exchange of information for tax purposes as part of the global initiative on harmful tax practices.

Tax Credits

Ms Barlow: To ask the Chancellor of the Exchequer how many families in the constituency of Hove have received *(a)* working tax credit and *(b)* child tax credit since it was introduced; how many are receiving it; how many have received overpayments; what the average (i) amount and (ii) duration of the overpayment was; how many are repaying overpayments; how many have received lower payments than they were entitled to; and what the normal procedure is to correct that. [6488]

Dawn Primarolo: Estimates of the number of in-work families (broken down by families with and without children) in each region, local authority and constituency with tax credits for 2003–04 awards, based on final family circumstances and incomes for 2003–04, appear in the HMRC statistical publication "Child and Working Tax Credits Annual statistics. 2003–04 Geographical analyses". More recent "provisional" estimates for in-work families, as at selected dates in 2004–05, in each such area appear in the publication "Child and Working Tax Credit Geographical Statistics."

Estimates of the number of overpaid and underpaid awards, including average overpayments, at 5 April 2005 after finalisation for each such area appear in the publication "Child and Working Tax Credits Annual statistics. 2003–04 Payments Geographical analyses." The estimates are based on samples and are subject to significant sampling uncertainty. All these publications can be found on the HMRC website at http://www.hmrc.gov.uk/stats/personal-tax-credits/cwtc-geog-stats.htm.

Information on the average duration of overpayments is not available. Information on the numbers of families repaying overpayments in Hove is also unavailable. Details of how overpayments are recovered are provided in the Department's Code of Practice 26 " What happens if we have paid you too much tax credit."

HMRC's procedure for correcting underpayments is to make a lump sum payment, as was done for all 2003–04 underpayment.

Voter Registration

Dr. Tony Wright: To ask the Chancellor of the Exchequer what percentages of residents are registered to vote in each local authority area. [5980]

John Healey: The information requested falls within the responsibility of the National Statistician, who has been asked to reply.

Letter from Len Cook to Mr. Tony Wright, dated 22 June 2005:

As National Statistician I have been asked to reply to your recent Parliamentary Question concerning the percentage of residents who are registered to vote in each Local Authority area. (5980)

The percentage of residents who are registered to vote in each local authority area is not a reliable estimate of the registration rate of the eligible population: the resident population aged 18 and over is not the same as the number of people eligible to vote. However, the Office for National Statistics (ONS) does on occasion publish comparisons of the resident population of voting age (aged 18 and over) and the number of people who are registered to vote.

I am placing in the House of Commons Library a table which gives a comparison between the number of registered electors and the estimated mid-2003 population for local authorities in England and Wales. Data are given for both parliamentary electorate and local/European electorate. In order to give an estimate of the number of electors at the mid-year point, 30 June 2003, a weighted average is taken of the 1 December 2002 and 1 December 2003 electoral data.

The local/European electorate gives a better comparison than parliamentary electorate to resident population as EU citizens are included and UK citizens resident abroad are excluded from the local/European electorate. However, a number of other difficulties remain when comparing these sources. For example not everyone who is usually resident is entitled to vote (foreign citizens from outside of the EU and Commonwealth, prisoners, etc. are not eligible) and people who have more than one address may register in more than one place. In addition there is inevitably some double counting of the registered electorate as electoral registration officers vary in how quickly they remove people from the registers after they have moved away from an area or after they have died. This latter is the main reason some areas show apparent rates in excess of one hundred per cent. These factors may have a different impact from place to place.

Any comparison of these data with figures for previous years should be made carefully as electoral legislation and other changes (such as EU expansion) can change the size of the electorate.

HEALTH

Accident and Emergency (Catchment Areas)

Mike Penning: To ask the Secretary of State for Health what the average catchment area of an accident and emergency unit is in terms of *(a)* population and *(b)* travel time. [4000]

Mr. Byrne: This information is not collected.

Actrapid Insulin

Mr. Sanders: To ask the Secretary of State for Health what research she has assessed on the effect on diabetic patients of changing their insulin regimes from actrapid or basal to other types. [5674]

Ms Rosie Winterton: There has been no research to assess the effects on diabetic patients of changing their insulin regimes from the NovoNordisk product Actrapid or other basal types. All patients will be assessed individually by their clinician and prescribed an appropriate alternative. They will be trained in how to use/manage the new insulin and monitored closely over the short and long-term.

Air Pollution

Dr. Kumar: To ask the Secretary of State for Health what the findings were of the research the Department have conducted on the links between air pollution and health. [5844]

Caroline Flint: The findings of the Department's first two air pollution research programmes are published in "Joint Research Programmes on Outdoor and Indoor Air Pollution: A Review of Progress 1999", which is available on the Medical Research Council Institute for Environment and Health's website at http://www.le.ac.uk/ieh/pdf/sr4.pdf

A third research programme started in 2002 and is still ongoing. The projects selected for funding are listed on the Department's air pollution website at http://www.dh.gov.uk/assetRoot/04/07/06/08/04070608.pdf

Alliance Medical Ltd.

Mr. Kevan Jones: To ask the Secretary of State for Health what estimate she has made of the average cost of a scan conducted by Alliance Medical Ltd. on behalf of the County Durham and Darlington NHS Trust during the five-year life of the contract; what methodology was used to calculate the average cost; and if she will make a statement. [2030]

Mr. Byrne *[holding answer 6 June 2005]:* The average cost of a scan conducted by Alliance Medical Ltd. is a matter of commercial confidentiality and cannot be disclosed without prejudicing the commercial interests of the company. The contract was secured at excellent value being approximately half the national health service equivalent cost for the total patient episode.

Mr. Kevan Jones: To ask the Secretary of State for Health to which countries Alliance Medical send scan results produced under its NHS contract to be assessed. [2251]

Mr. Byrne *[holding answer 6 June 2005]:* Scans are sent to qualified radiologists in Scotland, Belgium, South Africa and Spain.

Mr. Kevan Jones: To ask the Secretary of State for Health what the average amount of time is that a patient has waited for the results of a scan undertaken by Alliance Medical. [2254]

Mr. Byrne *[holding answer 6 June 2005]:* The information is not collected centrally. However, the average reporting time for a scan is between four and seven and a half working days, that is, not weekends, bank holidays etc. The national health service timetable will determine when the results are given to the patient.

Ambulances (Equipment)

Steve Webb: To ask the Secretary of State for Health what her Department's policy is on what equipment should be provided in ambulances. [4405]

Mr. Byrne: The Department expects ambulances to be appropriately equipped to deliver care, in accordance with national clinical guidelines, to the patients they see. It is for each national health service ambulance trust to determine how this is done. Regional variations in service provision and type of vehicle, for example, weight allowance, are all factors, which trusts take into account. The British Standards Institute has a recommended list of equipment to be carried, which trusts can use and add to as appropriate.

For emergency preparedness, every front line emergency ambulance is equipped to deal with a major incident, having on board and being familiar with their local major emergency plan and action cards. All have the correct level of personal protective equipment to allow them to work in a major incident environment. In the event of a major incident, every trust has emergency equipment vehicles carrying the extra medical supplies required for a large-scale incident and a mobile control unit, plus sufficient ambulance officers to manage the incident.

Audit Systems

John Hemming: To ask the Secretary of State for Health what systems of audit are used to check information provided by general practitioners to strategic health authorities and primary care trusts in terms of dealing with targets. [3728]

Mr. Byrne: Audit of general practitioner information is a matter for primary care trusts and specifically their chief executives as accountable officers.

Autism

Lynne Featherstone: To ask the Secretary of State for Health what research projects into the causes of autism have been *(a)* supported and *(b)* funded by the Government since 1997; and if she will make a statement. [3075]

Mr. Byrne: The main agency through which the Government supports medical and clinical research is the Medical Research Council (MRC). The MRC is an independent body funded by the Department of Trade and Industry via the Office of Science and Technology.

The MRC invested some £8 million in autism research in the seven years from 1997–98 to 2003–04. This total includes an allocation of £2.5 million made by the Department in 2002.

Details of the projects funded in that period and more recently are shown in the table.

MRC: currently funded autism projects

Grant holder	*University/ institute*	*Project title*	*Award (£000)*
Dr. K. Plaisted	Cambridge	An investigation of the mechanisms underlying the deficits in contextual processing in autism	222
Dr. F. Happe	Institute of Psychiatry, London	Local-global processing and cognitive style in autism and normal development; cognitive and brain bases	246
Professor A. Bailey	Institute of Psychiatry, London	A morphometric study of the Neuropathology of Autism	138
Professor M. H. Johnson	Birkbeck College	Functional brain development in human infants: perceiving the social and physical world	1,703
Professor P. Jacobs	Southampton	The effect of additional copies of chromosome 15q11-q13 with special reference to the autistic spectrum disorders	586
Professor S. Baron-Cohen	Cambridge	The development of social intelligence in children with and without high functioning autism: cognitive and fMRI investigation	770
Professor U. Frith	University College, London	Autism and social cognition	508
Dr. K. Nation	University of Oxford	Vocal and non-vocal communication in autism	151
Dr. T. Charman	Institute of Child Health, London	Characterising the cognitive phenotype of autism spectrum disorders	381
Professor D. Murphy	Institute of Psychiatry, London	Brain anatomy in autism; a multi-centre study	700
Professor J. Golding	University of Bristol	The aetiology of traits contributing to autism and the autistic spectrum disorders	408
D. Bowler	City University, London	Integration of complex spatial and temporal elements of episodic memory in adults with Asperger's syndrome	190
J. Green	Manchester	Pre-school Autism Communication trial (PACT)	1,320
Completed projects[1]			
Professor U. Frith	University College, London	Cognitive deficits in developmental disorders	1,292
Professor P. Jacobs	Cambridge	The effects of duplications and triplications of chromosome 15qll-ql3 with special reference to autism	595
Professor A. Bailey	Institute of Psychiatry, London	Collaborative molecular genetic study of autism	967
Professor A. Bailey	Oxford	Collaborative molecular genetic study of autism (Oxford Centre)	708
Professor A. Hall	London School of Hygiene and Tropical Medicine	A case control study of autism in general practice	364

[1] The most recently completed

Over 75 per cent. of the Department's total expenditure on health research is devolved to and managed by national health service organisations. Details of individual projects, including a number concerned with the causes of autism, can be found on the national research register at www.dh.gov.uk/research.

Mrs. Dean: To ask the Secretary of State for Health (1) what advice she has given to the Department for Education and Skills regarding the training needs for those working with people with autistic spectrum disorders; [4415]

(2) what advice has been given to local authorities on the appropriateness of *(a)* learning disability teams and *(b)* mental health teams taking the lead responsibility for people with autism; [4430]

(3) if she will issue advice to local authorities regarding the desirability of having a named senior manager with responsibility for autism for both children and adults. [4421]

Mr. Byrne: "Valuing People, A New Strategy for People with Learning Disabilities" (2001) recognises that many people with severe and profound learning disabilities have autistic behaviours, even if not formally recognised. It is important that all services for people with learning disabilities have the skills to recognise and make adequate provision locally for them although the majority will not need autism specific services.

Adults with disabilities, including those with autism, are covered by the mental health national service framework in respect of their mental health problems.

Addressing the training needs of those working with people with autistic spectrum disorders is the responsibility of the appropriate regulatory bodies. They set standards for the pre-registration training of doctors, nurses and other healthcare professionals, approve the education institutions that provide the training and determine the curricula. Post-registration training needs for national health service staff are determined against local NHS priorities, through appraisal processes and training needs analyses informed by local delivery plans and the needs of the service.

There are no plans to issue advice to local authorities regarding the desirability of having a named senior manager with responsibility for autism for both children and adults. It is for local authorities and health service providers to determine how best to provide services to meet the needs of the individuals.

Mrs. Dean: To ask the Secretary of State for Health (1) what estimate she has made of the prevalence of autistic spectrum disorders among the black and minority ethnic population; and if she will make a statement; [4418]

(2) what estimate she has made of the number of adults with autistic spectrum disorders in *(a)* Staffordshire and *(b)* England; [4419]

(3) what estimate she has made of how many adults have undiagnosed autistic spectrum disorders; and what action is being taken to ensure that individuals receive a correct diagnosis and appropriate support. [4420]

Mr. Byrne: Information on the prevalence of autism spectrum disorders (ASDs) among the black and minority ethnic population is not collected centrally. The Medical Research Council's (MRC), "Review of Autism Research" (2001) states that it is unclear whether people of particular racial origins are more at risk for ASDs.

The number of adults with ASDs living in Staffordshire is not available. The MRC report estimates that there are approximately 60 per 10,000 children under eight years old with ASDs in England. The prevalence in autism in the adult population is not known, nor are there estimates of how many adults have undiagnosed ASDs.

It is the responsibility of all health and social care agencies to ensure that their staff are appropriately trained to make sure that individuals with ASDs receive a correct diagnosis and appropriate support.

Blind/Partially Sighted (Rehabilitation)

Mr. Drew: To ask the Secretary of State for Health (1) what rehabilitation help is available for blind and partially sighted people; how many trained staff there are who can provide that help in health trusts and local authorities; and what advice is she seeking to increase appropriate training and numbers; [4517]

(2) what action she plans to take to ensure that each health trust and local authority has an adequate number of trained people to deliver rehabilitation help to blind and partially sighted people in accordance with the Government's Fair Access to Care Services and if she will estimate the additional funding required in order to meet that target. [4518]

Mr. Byrne: Rehabilitation services for blind and partially sighted people are predominantly provided by local authorities and to some extent NHS trusts. It is for those organisations to commission appropriate services based on local need. This would include the number, training and composition of teams available to provide rehabilitation for blind and partially sighted people, based on local need.

Fair Access to Care Services (FACS) is a system to help local authorities to set eligibility criteria for provision of services. It is up to local authorities and health trusts to ensure they have an adequate number of trained people to deliver rehabilitation services to the blind and partially sighted people in their area.

Breast Screening

Mr. Lansley: To ask the Secretary of State for Health what assessment she has made of the cost of extending the routine NHS breast screening programme to *(a)* women aged between 70 and 75 years of age, *(b)* all women above 70 years of age, *(c)* women aged between 45 and 49 and *(d)* women aged between 40 and 49. [5593]

Ms Rosie Winterton: Expanding the national health service breast-screening programme to include women aged 65 to 70 was supported by investment of £11.5 million, with an additional £11.4 million for new equipment. No assessment has been made on the cost of expanding the service to include women aged 70 to 75; however, we would expect it to be in a similar range. No assessment has been made on the cost of expanding the programme to include all women aged 70 or over. All women over 70 can request free three yearly breast screening.

Research is ongoing into screening women aged 40–49, entitled "UKCCCR randomised controlled trial of the effect of breast cancer mortality of annual mammographic screening of women starting at age 40". This study is due to report in late 2005, at the earliest, and will address the issues of cost and cost effectiveness.

Mr. Lansley: To ask the Secretary of State for Health what assessment she has made of the rate of implementation of the National Institute for Health and Clinical Excellence's clinical guideline published on 23 June 2004 on The Classification and Care of Women at risk of Familial Breast Cancer in Primary, Secondary and Tertiary Care, with particular reference to screening for women aged between 40 and 49; and what plans she has to extend the NHS breast screening programme to all women aged between 40 and 49. [5594]

Ms Rosie Winterton: Clinical guidelines from the National Institute for Health and Clinical Excellence (NICE) are reflected in the standards published by the Department, which provide a framework for continuous improvement in the overall quality of care people receive. Clinical guidelines are covered by the developmental standards, standards which the national health service is expected to achieve over time. The Healthcare Commission has responsibility for assessing progress towards achieving these standards.

Clinicians are expected to take full account of NICE guidelines because they are based on the best available evidence and have been put together after wide consultation, drawing on the views of patients and carers as well as the experts in the field.

Research is currently ongoing into extending the NHS breast screening programme to include women aged 40–49, entitled "UKCCR randomised controlled trial of the effect of breast cancer mortality of annual mammographic screening of women starting at age 40".

The main aim of this study is to evaluate the effect of annual mammographic screening of women starting at ages 40 to 41 on mortality from breast cancer, thus giving a definitive answer to the outstanding question of whether population screening below 50 is beneficial or not. Full results are expected in late 2005 at the earliest.

Mr. Baron: To ask the Secretary of State for Health what steps the Government are taking to encourage greater choice on *(a)* when, *(b)* where and *(c)* how women can access the NHS breast screening programme. [5822]

Ms Rosie Winterton *[holding answer 20 June 2005]*: Choice is already an important part of the national health service breast screening programme. All invitations to be screened for breast cancer include leaflets on the benefits and limits of screening, allowing the woman to make an informed choice about whether to be screened or not. The invitation letter also includes details on how the screening appointment can be

changed to a more convenient date and time. On average 30 per cent. of women rearrange their appointments each year.

It is important to note that the amount of choice that the programme can offer is limited by the logistics involved in a screening programme that sees, on average, 1.4 million women each year. However, we are looking at how greater choice can be given. We are exploring, in London, the use of a central call centre, which will be closely followed and evaluated for implementation elsewhere in the country.

Clostridium Difficile

Keith Vaz: To ask the Secretary of State for Health how many patients *(a)* have died from and *(b)* been infected by *Clostridium difficile* since 2003. [3903]

Jane Kennedy: The only routinely available mortality statistics on *Clostridium difficile* are those associated with enterocolitis, the most common illness caused by *Clostridium difficile* infection. The figures for 2003 are shown in table 1.

Table 1: Number of deaths where enterocolitis due to Clostridium difficile was mentioned on the death certificate and the number of these mentions where it was also the underlying cause of death,[1] England and Wales, 2003

	Number
Total mentions	1,748
Underlying cause	934

Dementia

Helen Jones: To ask the Secretary of State for Health how many local authorities provide adult placement services for people with early onset dementia. [5104]

Mr. Byrne: I understand from the Chair of the Commission for Social Care Inspection that this information is not held centrally.

Andrew Rosindell: To ask the Secretary of State for Health what assistance the Government provides for *(a)* those with senile dementia and *(b)* their families. [5391]

Mr. Byrne: Standard seven of the national service framework for older people, launched in March 2001, describes the services that we expect local health and social services organisations to provide for those with dementia, and their carers.

The Government introduced the carers grant in 1999 for councils to provide support to carers in England through breaks and other services. The grant has increased each year and has provided an extra £450 million over the past six years. It is worth £185 million in 2005–06. In the last local Government finance settlement, we confirmed our commitment to continue the carers grant until at least the end of the 2007–08 financial year.

Guidance called "Developing Services for Carers and Families of People with Mental Illness", for the development of services for supporting carers of people with mental health problems, was launched by the then Minister for Community, Ms Jacqui Smith, in November 2002.

Dentistry

Sarah Teather: To ask the Secretary of State for Health what the average cost of dental treatment was for *(a)* adults and *(b)* children in each London health authority in each year since 1997. [5280]

Ms Rosie Winterton: The information requested is shown in the table.

Average gross fees for dental treatments provided for each of the strategic health authority areas in London in each financial year

£

Financial year ending	Average adult gross fees for courses of dental treatment	Average child gross fees for courses of dental treatment
1997		
North West London	51.32	46.42
North Central London	51.06	48.38
North East London	50.74	46.06
South East London	48.87	38.58
South West London	44.85	40.58

South West London	49.15	55.53

NHS Dentistry

Mr. Lansley: To ask the Secretary of State for Health what the total funding provided for NHS dentistry has been in each year since 1997 in *(a)* real and *(b)* nominal terms. [3355]

Ms Rosie Winterton: The principal element of dental services are primary care services provided mainly through the general dental service (GDS) supplemented, since 1998, by personal dental service (PDS) pilots. The GDS is currently managed on a national basis as a non-discretionary service. Expenditure is not pre-determined by funding allocations but is driven largely by the volume of NHS care provided to patients by dentists. Gross expenditure on GDS and PDS services, including the funding contribution from patient charges, is shown in the table.

Data for 1997–98 and 1998–99 is based on cash data, whereas data for all subsequent years is based on resource data. Accounts data for 2004–05 is not yet available.

Gross expenditure on GDS and PDS—England

£ million

	At 2003–04 prices based on March 2005 gross domestic product deflator	Actual spend
1997–98	1,564	1,348
1998–99	1,627	1,442
1999–2000	1,675	1,517
2000–01	1,748	1,602
2001–02	1,782	1,674
2002–03	1,795	1,745
2003–04	1,811	1,811

Source:

Audited summarisation forms of the strategic health authorities 2002–03 and 2003–04.
Audited summarisation schedules of primary care trusts 2000–2001 to 2003–04.

Funding for secondary care and community dental services is determined locally by primary care and service trusts.

Departmental Staff

Paul Flynn: To ask the Secretary of State for Health how many registered *(a)* nutritionists and *(b)* dieticians she employs within her Department. [5297]

Caroline Flint: The Department directly employs one nutritionist. However, the Department has regular contact with and seeks advice from dieticians and nutritionists from the British Dietetic Association, the Nutrition Society and other relevant professional organisations.

Doctors

Mr. Steen: To ask the Secretary of State for Health how many doctors have been *(a)* assessed and *(b)* entered on the specialist register by the Postgraduate Medical Education and Training Board, broken down by region; and how many doctors have received additional training to satisfy the board's requirements for a particular register. [6260]

Mr. Byrne: None. The Postgraduate Medical Education and Training Board does not take up its statutory responsibility for these functions until 30 September 2005.

Dr. Stoate: To ask the Secretary of State for Health how many doctors are employed in non-standard or trust grade posts in each NHS trust in England. [1605]

Mr. Byrne: Information on the number of doctors employed in non-standard or trust grade posts submitted by national health service trusts in the September 2004 NHS work force census has been placed in the Library.

Domiciliary Care

Mr. Crabb: To ask the Secretary of State for Health which local authorities in England disregard housing costs and council tax when calculating charges for domiciliary care. [5644]

Mr. Byrne: This information is not collected centrally.

Drug Rehabilitation

Mike Penning: To ask the Secretary of State for Health how many drug rehabilitation places are available for residents of Hemel Hempstead constituency. [5255]

Ms Rosie Winterton: Information on the number of drug rehabilitation places in Hemel Hempstead is not held centrally.

Efficiency Map

Mr. Lansley: To ask the Secretary of State for Health at what cost the Department's Efficiency Map, published on 13 May, was produced; for how long she

expects the document to remain in draft form for discussion; and what improvements in efficiency she expects to result from its publication. [3350]

Mr. Byrne: The efficiency map was published by the Department of Health at the total cost of £4,861 and is part of the communications strategy for our programme to deliver £3.8 billion worth of efficiency gains by 2007–08.

Elder Abuse

Mr. Burstow: To ask the Secretary of State for Health what data on the *(a)* nature and *(b)* volume of elder abuse has been collected to date as part of the Modernisation of Adult Social Care Research Initiative. [2911]

Mr. Byrne: As part of the modernisation of adult social care initiative, a three-year study has been commissioned from the University of Hull looking at partnerships and regulation in protection of adults. The aim of the study is to examine the operation of the range of regulatory frameworks relevant to adult protection for all service user groups including older people. It is focusing on the system designed to identify and respond to incidents of abuse and the links between adult protection and criminal justice initiatives.

A mapping exercise will be conducted to identify models of partnership working between different agencies and the extent of different regulatory frameworks. The researchers will also be undertaking interviews with a range of stakeholders including service users and their advocates. The study will be completed in 2006.

Health Expenditure

David Davis: To ask the Secretary of State for Health how much was spent per capita from central Government funds on health in *(a)* the East Riding of Yorkshire and *(b)* England in each of the last five years. [3599]

Mr. Byrne: The information is not collected centrally in the format requested.

The following table shows expenditure per weighted head of population in England, and by the strategic health authority, which includes the East Riding of Yorkshire area, for 1999–2000 to 2003–04, which is the latest year for which audited figures are available.

Expenditure per weighted head of population

£ per head

	North and East Yorkshire and Northern Lincolnshire strategic health authority area	*England*
1999–2000	752.94	763.79
2000–01	801.96	825.38
2001–02	869.38	926.13
2002–03	943.10	991.07
2003–04	1,074.31	1,116.32

Sources:

1. Audited summarisation forms of the health authorities 1999–2000 to 2001–02.
2. Audited summarisation forms of the strategic health authorities 2002–03 and 2003–04.
3. Audited summarisation schedules of primary care trusts 2000–01 to 2003–04.
4. Weighted population figures

Mr. Dismore: To ask the Secretary of State for Health what plans she has to centralise decision making on NHS capital expenditure away from strategic health authorities; and if she will make a statement. [5830]

Mr. Byrne: There are no plans to centralise decision making on national health service capital expenditure. Up to 2005–06 capital expenditure limits have been set by the Department for strategic health authorities, primary care trusts and NHS trusts primarily on a formula basis. From 2006–07, we will introduce a process where organisations put forward investment plans based on what they need and what is affordable. This should increase the extent to which capital expenditure reflects local circumstances. This policy is still being developed, and further details will be set out in the NHS financial strategy to be published in the autumn.

Andrew Rosindell: To ask the Secretary of State for Health how much the Government have spent on improving technology in hospitals since 1997. [5407]

Mr. Byrne: The information is not held centrally.

Health Statistics (Coventry, South)

Mr. Jim Cunningham: To ask the Secretary of State for Health how many people in Coventry, South suffer from *(a)* dementia and *(b)* chronic obstructive pulmonary disease. [5170]

Ms Rosie Winterton *[holding answer 21 June 2005]:* The information is not collected centrally in the requested format. However, data on the numbers of residents in the Coventry city council area with a primary diagnosis of either dementia or chronic obstructive pulmonary disease (COPD) for 2003–04 are shown in the table.

Diagnosis	*Number of patients*
COPD (J40 to J44)	505
Dementias (F00 to F03)	105

Notes:

1. The data for 2003–04 have not yet been adjusted for shortfalls in data and unknown/invalid clinical data—are ungrossed.
2. Patient counts are based on the unique patient identifier HESID. The identifier is derived based on the patient's date of birth, postcode, sex, local patient identifier and national health service number, using an agreed algorithm. Where data are incomplete, HESID might erroneously link episodes or fail to recognise episodes for the same patient. Care is therefore needed, especially where duplicate records persist in the data.
3. Diagnoses are made using the tenth revision of the international classification of diseases (ICD). J40-J44 and F00-F03 are the relevant diagnostic codes in the ICD-10 for COPD and dementias, respectively.
4. The primary diagnosis is the first of up to 14 diagnosis fields in the hospital episode statistics (HES) data set and provides the main reason why the patient was in hospital.

HES, NHS Health and Social Care Information Centre.

Hemel Hempstead Hospital

Mike Penning: To ask the Secretary of State for Health (1) if she will make a statement on plans for the transfer of staff employed at Hemel Hempstead hospital units; [3994]

(2) if she will make a statement on projected bed numbers for Hemel Hempstead Hospital; [3996]

(3) if she will make a statement on plans for property redevelopment at Hemel Hempstead Hospital; [3997]

(4) if she will make a statement on the entry-into-service date of the planned new accident and emergency unit at Watford. [3998]

Ms Rosie Winterton: The information requested is not held centrally. The reconfiguration of services in Hertfordshire are part of the wider reconfiguration of services in both Bedfordshire and Hertfordshire know as "Investing in Your Health". The strategic outline case for this major reconfiguration of services was approved in July 2004 by my right hon. Friend the then Member for Hamilton, North and Bellshill, now, Airdrie and Shotts (John Reid). The exact details regarding staff transfers, projected bed numbers, the entry into service of the planned new accident and emergency unit in Watford and any plans for property redevelopment at Hemel Hempstead Hospital will not be known in detail until the outline business case is completed, which is likely to be in January 2006.

Mike Penning: To ask the Secretary of State for Health if she will make a statement on plans to modify ambulance stationing patterns in relation to the transfer of Hemel Hempstead Hospital accident and emergency unit. [3999]

Ms Rosie Winterton: There are currently no plans to modify ambulance stationing patterns in relation to the transfer of Hemel Hempstead accident and emergency unit. Hemel Hempstead Hospital will retain its A and E unit, as set out in Bedfordshire and Hertfordshire Strategic Health Authorities' "Investing in Your Health" programme. The A and E unit will still be open, 24 hours a day, seven days a week, 365 days a year. The only change will be that it will no longer take major trauma cases.

HIV

Dr. Kumar: To ask the Secretary of State for Health if she will estimate how many people in *(a)* England, *(b)* the North East and *(c)* Middlesbrough South and East Cleveland constituency are HIV positive. [5848]

Mr. Byrne: The number of individuals with diagnosed HIV in 2003, the latest year for which data are available, were:

England: 34,689

North East Government Office region: 542

Middlesbrough council and Redcar and Cleveland borough council (equivalent together to Middlesbrough Primary Care Trust and Langbaurgh Primary Care Trust): 64[1]

Estimates of undiagnosed HIV are only available at the national level. The number of adult individuals living with HIV in the United Kingdom in 2003, including those who are undiagnosed, has been estimated as 53,000. Of these, 14,300 of these (27 per cent.) were unaware of their infection.

[1] Data on individuals with diagnosed HIV infection resident in England, Wales and Northern Ireland. Data is produced by country, Government Office region, strategic health authority, local authority and primary care trust, but not by parliamentary constituency.

Source:

Health Protection Agency

Hospital Hygiene

Keith Vaz: To ask the Secretary of State for Health whether there has been a change in hospital cleanliness rates since the clean-hands policy and the use of alcohol gel was implemented. [3905]

Jane Kennedy: While it is well established that poor hand hygiene practices contribute to the spread of some healthcare associated infections it is too early to determine the effects of the "cleanyourhands" campaign on infection rates and on cleanliness, as it was only launched in September 2004. Research to evaluate implementation of the campaign is under way.

However, at this very early stage in implementation of the "cleanyourhands" campaign, figures show that the usage of alcohol-based hand rubs has increased steadily, with some trusts showing a marked increase of between 100 and 400 per cent. Further evidence from a repeat of previous observational audits on compliance, some two years following the pilot, show compliance in excess of 60 per cent.—a sustained improvement from the average of 28 per cent. reported before the campaign.

The national health service's hard work to improve infection control is shown by the 6 per cent. reduction in meticillin resistant *Staphylococcus aureus* (MRSA) blood stream infections for April to September 2004, compared with the same period in 2003.

Medical Practice Accommodation

Daniel Kawczynski: To ask the Secretary of State for Health (1) what steps are being taken to ensure that primary care trusts are able to give financial aid to all medical practices in need of approved accommodation; [3142]

(2) if she will take steps to ensure that primary care trusts give priority in funding new accommodation to those medical practices whose lease on their property is approaching its termination; [3143]

(3) what plans she has to increase the level of funding available to primary care trusts to find new properties for medical practices. [3144]

Mr. Byrne: During the period 2003–04 to 2005–06, total funding to primary care trusts (PCTs) will have increased in cash terms by £12.7 billion or almost 31 per cent. Further substantial increases for PCTs will take the funding to £64 billion in 2006–07 and £70 billion in 2007–08. In addition, another £108 million was allocated in 2004–05 and 2005–06 specifically to fund improvements to primary care premises. Further funding of £83 million is to be made available in each year between 2005–06 and 2007–08 for premises growth. The proposed White Paper will consider the provision of

accommodation as part of its review of services outside hospitals following a process of wide public consultation.

It is the responsibility of PCTs to plan, develop and improve services to meet the needs of local people and to decide how available funding should be prioritised.

Mental Health

Tim Loughton: To ask the Secretary of State for Health (1) what the proposed job savings from the Mental Health Act Commission are under her plans for merger with the Healthcare Commission; [4620]

(2) what the *(a)* status and *(b)* structure of the Mental Health Act Commission will be in the Healthcare Commission. [5497]

Ms Rosie Winterton: The powers to integrate the functions of the Mental Health Act Commission (MHAC) with the Healthcare Commission are contained within the draft Mental Health Bill. The Government are currently considering the Joint Committee on the draft Mental Health Bill's recommendations and will publish a response shortly.

In respect of recommendations pertaining to MHAC, the Government's consideration will take into account the implications of the plans to merge 11 public service inspectorates into four. The new inspectorates will cover justice and community safety, adult social care and health, children's services, education and skills and local services.

Mr. Burstow: To ask the Secretary of State for Health when she will respond to the report of the Joint Committee on the Draft Mental Health Bill. [5615]

Ms Rosie Winterton: The Department is currently considering the recommendations of the report of the Joint Committee on the Draft Mental Health Bill and a response will be published shortly.

National Society for Epilepsy

Mrs. Gillan: To ask the Secretary of State for Health what sums the Department has allocated to the National Society for Epilepsy in each of the last 10 years; and what the reasons for the payments were in each case. [4813]

Mr. Byrne: The Secretary of State has powers under Section 64 of the Health and Public Services Act 1968 to make grants to voluntary organisations in England whose activities support the Department's policy priorities. Funding allocated to the National Society for Epilepsy through the Section 64 General Scheme of Grants over the last 10 years is shown in the table.

Section 64 grants: National Society for Epilepsy

£

Type of grant/project name	*1996–97*	*1997–98*	*1998–99*	*2004–05*	*2005–06*
Section 64 project: Epilepsy information network	—	—	—	90,000	90,000
Section 64 project: living well programme	—	—	—	37,400	—
Section 64 project: computer-aided learning for neurologists	—	10,000	10,000	—	—
Section 64 project	7,292	12,500	5,208	—	—
Section 64 project	23,000	17,000	—	—	—

Note:
Full details of the grants beginning in 1996–97 are not available.

Neonatal Care

Tim Loughton: To ask the Secretary of State for Health (1) what the nurse to patient ratio is at each neonatal unit in hospital trusts at *(a)* special care level, *(b)* high dependency care level and *(c)* intensive care level; [4468]

(2) how many neonatal units currently comply with British Association of Perinatal Medicine recommended minimum nursing requirements. [4470]

Mr. Byrne: Information on the ratio of nurses to infants within units is not collected centrally, and it is for the units themselves to decide their own nursing requirements. The ratio is not constant, but relative to the dependency levels of the infants. This varies according to demand both within and between units providing a range of special, high dependency and intensive care.

NHS Direct

Frank Dobson: To ask the Secretary of State for Health what the level of user satisfaction with NHS Direct is. [3571]

Mr. Byrne *[holding answer 13 June 2005]:* I understand from the Chairman of the NHS Direct Special Health Authority that patient satisfaction survey data for March 2005 indicated that 98 per cent. were very satisfied or satisfied with the services provided by NHS Direct.

Nurses

Lynne Jones: To ask the Secretary of State for Health what research her Department has carried out to assess the level of risk of back and joint problems in the nursing profession in comparison with that in the general population. [4717]

Mr. Byrne: The Department has not carried out an assessment of the level of risk of back and joint problems within any national health service staff group in comparison with that in the general population.

The Health and Safety Executive have stated that one third of reported injuries that result in three or more days off work are caused by manual handling accidents, and that manual handling accidents and back pain account for approximately 40 per cent. of all NHS sickness absence.

Older People

Mr. Lansley: To ask the Secretary of State for Health whether all local authorities in England are using the single assessment process for assessing older people's needs, as outlined in the National Service Framework for Older People. [2284]

Mr. Byrne: This information is not collected centrally. The responsibility for introducing a single assessment process rests with local health and social care service planners, commissioners and providers. However, available evidence suggests that most, if not all, local authorities' social services departments have a single assessment process in place.

PCTs (Resource Allocations)

Mr. Lansley: To ask the Secretary of State for Health what the forward population projections for *(a)* each strategic health authority and *(b)* each local authority in England were used to inform the resource allocations of primary care trusts for 2006–07 and 2007–08; and if she will estimate the current population of each (i) primary care trust and (ii) strategic health authority area. [3432]

Mr. Byrne: The information requested has been placed in the Library.

Phthalates

Norman Baker: To ask the Secretary of State for Health what recent assessment she has made of the potential health impacts arising from the presence of phthalates in consumer goods. [5885]

Caroline Flint: Phthalates are a family of chemical substances, with a range of properties. Extensive research into the effects of certain phthalates on human health has been carried out at a European level, under the auspices of the European Union's Existing Substances Regulation (793/93/EC). Details of this programme can be found on the European Chemicals Bureau website at: http://ecb.jrc.it/existing-chemicals/ The United Kingdom has commented on the detailed risk assessments and ensuing risk reduction strategy for the various phthalates that have been studied.

The Government take the view that phthalates must be considered on a case-by-case basis. Where the EU database is insufficient to complete a risk assessment, it is normally expected that the industry will carry out the required additional research. The detailed EU risk assessments have indicated that some phthalate compounds have been shown in animal studies to produce toxic effects on the reproductive system. Therefore, the Government have asked its expert committee, the Committee on Toxicity of Chemicals in Food, Consumer Products and the Environment, to keep the area of environmental chemicals and reproductive health under review and will consider its advice on the need for additional research in this area.

Pressure Sores

Mr. Oaten: To ask the Secretary of State for Health (1) what targets she has set for the reduction of numbers of pressure sores in hospitals; [5543]

(2) what estimate she has made of *(a)* the cost to the NHS of treating pressure sores and *(b)* the number of patients with pressure sores in each of the last three years. [5544]

Mr. Byrne *[holding answer 20 June 2005]:* Reducing the incidence of pressure sores in hospitals is tackled locally through clinical governance; a programme of continuous improvement in clinical care. The toolkit, "Essence of Care—patient focused benchmarks for clinical governance", includes a chapter specific to pressure ulcers.

This is underpinned by National Institute for Health and Clinical Excellence (NICE) guidelines that also focus on screening and assessment, informing patients and their carers, the development and implementation of an individualised plan for prevention and treatment to be agreed and delivered by a multidisciplinary team working with patients and their carers.

It is not possible to separately identify the costs—in hospitals and all other settings where the national health service cares for patients—of treating pressure sores.

The number of patients who were diagnosed, in NHS hospitals, with pressure sore in the years between 2001–02 and 2003–04 are shown in the table.

	Number
2001–02	15,292
2002–03	17,178
2003–04	18,087

These are NHS hospital in-patients episodes with the specified diagnosis code, not the number of persons diagnosed. It is not possible to identify from these data whether a pressure sore was acquired while the patient was in hospital, or whether it was acquired elsewhere and subsequently diagnosed in a hospital.

Psoriasis/Psoriatic Arthritis

Mr. Bruce George: To ask the Secretary of State for Health what estimate she has made of the proportion of the population that suffers from psoriasis. [5985]

Mr. Byrne: We have made no estimate of the proportion of the population with psoriasis. However, the Psoriasis Association estimate that around 2 per cent. of the United Kingdom population suffer from this condition.

Mr. Bruce George: To ask the Secretary of State for Health what plans she has to improve the delivery of treatment services to those suffering from psoriatic arthritis. [5982]

Mr. Byrne: It is our intention to publish best practice guidance on musculoskeletal conditions, which includes psoriatic arthritis, later this year. In addition, the Government have already published the national service framework for people with long-term conditions.

Mr. Bruce George: To ask the Secretary of State for Health what priority is given to psoriatic arthritis in allotting health service resources. [5984]

Mr. Byrne: Responsibility for allocating national health service resources rests with primary care trusts, in

partnership with strategic health authorities and other key stakeholders, as they are best placed to understand and respond to the needs of their local populations.

Royal Berkshire Hospital

Mr. Rob Wilson: To ask the Secretary of State for Health if she will make funding available for the employment of a specialist allergy consultant at the Royal Berkshire Hospital. [5386]

Caroline Flint: It is for local primary care trusts to take decisions on funding arrangements for the commissioning of services, including specialist allergy services, to meet the needs of their populations.

Sexual Health

Anne Main: To ask the Secretary of State for Health what assessment she has made of the effect that the change in funding for genito-urinary medicine by the West Hertfordshire Hospital Trust will have on sexual health provision in St. Albans. [5102]

Ms Rosie Winterton: It is the responsibility of primary care trusts to ensure services, including sexual health, are provided which meet the needs of their local populations. I understand that West Hertfordshire Hospital National Heath Service Trust is undertaking a review of sexual health services, but that no final decision has yet been made.

David Davis: To ask the Secretary of State for Health how many cases of *(a)* gonorrhoea, *(b)* syphilis, *(c)* Chlamydia and *(d)* thrush have been diagnosed in the East Riding of Yorkshire in each of the last five years. [3596]

Mr. Byrne: The information requested is shown in the following table.

Reports of selected sexually transmitted diseases by sex. East Yorkshire primary care trust (PCT): 1999–03[1]

Condition description—condition code	*Sex*	*1999*	*2000*	*2001*[2]	*2002*	*2003*
Primary and secondary infectious syphilis—A1A2	Male	<5	<5	n/a	<5	<5
	Female	<5	<5	n/a	<5	<5
Uncomplicated gonorrhoea—B1B2	Male	<5	<5	n/a	11	<5
	Female	<5	<5	n/a	7	<5
Uncomplicated Chlamydia infection—C4AC4C	Male	14	15	n/a	49	49
	Female	21	15	n/a	49	54
Anogenital candidosis—C7A	Male	<5	5	n/a	<5	<5
	Female	19	32	n/a	37	29

[1] Source KC60 returns.
[2] Data for 2001 incomplete.
Notes:
1. < = less than or equal to.
2. The data refers to the number of diagnoses made at genitor-urinary medicine services within the PCT.

Sickness Absence

Mr. Lansley: To ask the Secretary of State for Health what the rate of sickness absence in the NHS for *(a)* medical staff, *(b)* non-medical clinical staff and *(c)* all other staff was in each year since 1997. [5561]

Mr. Byrne: The Department does not collect information on sickness absence rates in the national health service broken down by staff groups as requested. Information on rates of sickness absence for all staff groups is shown in the table.

Sickness absence rates in the NHS in England

	Percentage rate
2000	4.7
2001	4.8
2002	4.6
2003	4.7
2004	4.6

Smoking

Mr. Lansley: To ask the Secretary of State for Health what her estimate is of the total number of deaths from smoking-related illnesses in people who are not smokers for the most recent period for which figures are available; and what proportion of these deaths she estimates were of people who worked in heavily smoke-filled environments. [5592]

Caroline Flint: I refer the hon. Member to the reply I gave on 15 June 2005, *Official Report*, columns 517–18W.

Mrs. Spelman: To ask the Secretary of State for Health what the estimated expenditure by *(a)* regional tobacco policy managers and *(b)* their regional offices is in 2005–06. [5610]

Caroline Flint: In 2005–06, £2 million has been allocated to the regional public health groups' budgets to support work on tobacco control. This information is shown in the following table.

Region	*Amount (£000)*
North East	170
Yorkshire and Humber	214
North West	260
West Midlands	219
East Midlands	192
Eastern	212
South East	258
South West	206
London	270
Total	2,000

Regional tobacco policy managers are integrated into the Government office for the regions to which they are appointed. Information on individual expenditure is not held centrally.

Specialists

Mr. Laws: To ask the Secretary of State for Health how many accredited specialists in physical medicine and rehabilitation there have been in each of the last 20 years; how many such specialists there were per 100,000 of the population in each of those years; and what evidence she has evaluated on proportions per 100,000 of population in *(a)* other EU countries and *(b)* other G7 countries. [1619]

Mr. Byrne: The table shows information on the headcount of hospital and community health services (HCHS) medical staff in rehabilitation medicine per 100,000 population in each year since 1990, the first year for which figures are available. The latest population data available are for 2003.

Between 1996 and 2004, the number of HCHS medical staff working in rehabilitation medicine has increased from 130 to 226 and the number of consultants has doubled to 118 in this period.

International comparisons are not collected for rehabilitation medicine.

Hospital, Public Health Medicine and Community Health Services (HCHS): Medical staff within the rehabilitation medicine specialty, showing number per 100,000 population—England at 30 September each year

Number (headcount) and number per 100,000 population

	HCHS medical staff	HCHS medical staff per 100,000 population	of which: Consultant	Consultants per 100,000 population	Associate specialist/staff grade	Associate specialist/staff grade per 100,000

NHS Health and Social Care Information Centre medical and dental workforce census.

Stroke Care

Mr. Lidington: To ask the Secretary of State for Health which hospitals care for people who have suffered a stroke, but have yet to open a specialist stroke unit; and what the planned date is of the opening of each such unit which is to be provided at those hospitals. [4222]

Mr. Byrne: The latest information collected by the Department suggests that four national health service trusts do not currently have specialised stroke services in place. All other trusts now do.

Of the four outstanding, three say they will be compliant by the end of July. The Department continues to have discussions with the strategic health authorities for all four trusts to ensure that they are compliant as soon as possible.

Student Midwives

Harry Cohen: To ask the Secretary of State for Health what plans she has to issue policy guidance following the ruling in the case of Fletcher *v.* NHS Pension Agency and the Secretary of State for Health to the NHS Pensions Agency on the subject of payment of bursaries to student midwives during maternity leave. [4653]

Mr. Byrne: We are currently considering the outcome of the employment appeal tribunal. We are committed to operating national health service bursaries in ways that are fair and support students across the range of domestic circumstances, in which they might find themselves.

Telecommunications Masts

Tim Loughton: To ask the Secretary of State for Health what recent research her Department has examined on the effect of mobile phone masts on brain waves; and if she will make a statement. [5494]

Caroline Flint: There has been very little work regarding the effects of the radiofrequency signals from mobile phone base stations on the electrical activity of the brain as these exposures are very small; usually many thousands of times below human exposure guideline values. Research in this area has therefore focused on the effects of exposure from the fields associated with mobile phone handsets. Exposure measurements around base stations are available on the websites of the Health Protection Agency at www.hpa.org.uk/radiation and Ofcom at www.ofcom.org.uk

The research on health effects from radiofrequency electromagnetic fields was comprehensively reviewed by the independent advisory group on non-ionising radiation in 2003. The review concluded that:

"Exposure levels from living near to mobile phone base stations are extremely low and the overall evidence indicates that they are unlikely to pose a risk to health."

Nevertheless, in view of the recommended precautionary approach to the use of these technologies, the mobile telecommunications and health research programme in the United Kingdom, funded jointly by the Government and the mobile phone industry, is supporting a study examining if signals from handsets may affect brain wave activity in volunteers under rigorous experimental conditions. The results of the study are expected to be published in due course.

Trauma Centre Status

Mr. Hands: To ask the Secretary of State for Health what services hospitals must be able to provide in order to obtain trauma centre status. [811]

Mr. Byrne: There is no nationally set definition of a 'trauma centre' in England. It is for local providers of health care services, in conjunction with their commissioners and clinicians, to determine the most appropriate range and size of those supporting services needed to support seriously injured or wounded patients.

Travel Inoculations

Mr. Rob Wilson: To ask the Secretary of State for Health what plans she has to review charges for necessary travel inoculations. [5385]

Mr. Byrne: Government policy for travel vaccination charges was reviewed during negotiations for the new General Medical Service contract, introduced in April 2004. There are no further plans to review the present arrangements.

West Hertfordshire Hospitals Trust

Mike Penning: To ask the Secretary of State for Health (1) if she will make a statement on the impact of the Working Time Directive on West Hertfordshire Hospitals Trust; [3993]

(2) what assessment she has made of the likely impact of the Article III-278 (7) of the EU Constitution on EU regulations on Working Time in Hospitals, with particular reference to West Hertfordshire Hospitals Trust. [3992]

Ms Rosie Winterton: Implementation of the Working Time Directive is a local national health service matter. The vast majority of trusts achieved compliance across all specialties by 1 August 2004, although a small number of trusts experienced teething problems in a limited number of specialties.

If the proposed constitution were adopted and came into force, regulations made under the current treaty would remain valid and the United Kingdom would need to implement them, unless the regulations were amended in the meantime.

HOME OFFICE

Correspondence

Sir Gerald Kaufman: To ask the Secretary of State for the Home Department when he expects to answer the letter to him dated 15 March from the right hon. Member for Manchester Gorton with regard to Mr. Chris Siddiqi. [6172]

Mr. Charles Clarke: I wrote to my right hon. Friend on 27 April 2005.

Written Answers to Questions

Thursday 23 June 2005

ENVIRONMENT, FOOD AND RURAL AFFAIRS

Aquatic Environment

Norman Baker: To ask the Secretary of State for Environment, Food and Rural Affairs what work has been carried out *(a)* by and *(b)* on behalf of her Department to establish the background levels of fluoxetine in the aquatic environment. [4448]

Mr. Bradshaw: During 2002–03 the Environment Agency carried out a desk based ranking exercise on the 500 pharmaceuticals most commonly used in England and Wales in order to prioritise those of environmental significance. This exercise included fluoxetine, more commonly known under the trade name Prozac. A short, targeted monitoring programme was then set up for 12 pharmaceuticals. Fluoxetine was not included because no analytical method suitable for use on environmental samples existed and development of one would be difficult.

The top ranked antidepressant was lofepramine and this was included in the monitoring survey. Lofepramine was not detected in any of the five sewage works effluents or receiving watercourses monitored. However, it does not necessarily follow that the same would be true for fluoxetine.

The Environment Agency have developed a Position Statement on Pharmaceuticals—which can be found on the agency's website, www.environment-agency.gov.uk (search-pharmaceuticals). This elaborates further on the work done and includes a recommendation to the pharmaceutical industry to do more on the development of analytical methods for environmental monitoring. I am pleased that the Environment Agency is in discussion with the industry on the development of a work programme to cover the recommendations to industry listed in the Position Statement.

Fisheries

Andrew Rosindell: To ask the Secretary of State for Environment, Food and Rural Affairs what steps the Government are taking to preserve fish stocks in UK waters. [5396]

Mr. Bradshaw: There are a range of policies in European Union and UK legislation to protect fish stocks. The Government's response to the "net benefits" report which made a wide-ranging series of recommendations to secure sustainable fisheries in the waters around the UK will be published on 28 June 2005.

Sarah Teather: To ask the Secretary of State for Environment, Food and Rural Affairs how many people have been prosecuted for fishing without a licence in London in each year since 1997. [5149]

Mr. Bradshaw: The Environment Agency administers and collects the rod licence fee for England and Wales. Due to the constraints of their databases and the historic data recorded we cannot answer the specific questions, and have provided figures for the Thames region.

The Fisheries Offence Processing System (FOPS) database has only been live since the year 2000. Data prior to this date, for prosecutions was sourced from regional legal Departments.

Source:
The Environment Agency

Andrew Rosindell: To ask the Secretary of State for Environment, Food and Rural Affairs what steps the Government are taking to tackle the poaching of fish. [5336]

Mr. Bradshaw: In 2003–04, the Environment Agency carried out a review of enforcement with respect to the more serious fisheries offences (those excluding the more straightforward acts associated with angling without a licence). It also spent £3.2 million on enforcement against serious fisheries offences.

In 2004 the Environment Agency issued 350 warrants to officers to enforce fisheries laws as per the Salmon and Freshwater Fisheries Act 1975, which provides that an officer warranted by the Environment Agency as a water bailiff holds the powers and duties of a police constable.

The Environment Agency has established good relationships with police forces, having signed a memorandum of understanding with the Association of Chief Police Officers. This covers such matters as the sharing of intelligence, access to databases and mutual working arrangements. Contacts are also well established with the relevant Sea Fisheries Committee and, as locally appropriate, with the Sea Fisheries Inspectorate, HM Customs and Excise and/or the Department of Defence. Arrangements include cross-warranting of officers, sharing of equipment, exchange of intelligence and collaborative operations.

Flood Zone Maps

Lynne Featherstone: To ask the Secretary of State for Environment, Food and Rural Affairs what *(a)* discussions she has had with and *(b)* representations she has had from local authorities on the new Environment Agency maps of zones susceptible to flooding; and if she will make a statement. [6363]

Mr. Morley: Improved flood risk maps were published by the Environment Agency in October 2004 as part of a five-year programme of development and refinement.

Flood risk mapping is an important part of the our public awareness strategy, to ensure that flood risk is better understood by all concerned including people living and working in the floodplains and those responsible for development control and emergency planning.

We recently sought the views of a wide range of stakeholders on issues relating to flood and coastal erosion risk management as part of our "Making Space for Water" consultation. Local authorities responded on a wide range of issues including flood risk mapping. In general recent improvements to the flood risk maps were welcomed and suggestions were made on how they could be improved further. These views will be considered as part of the ongoing "Making Space for Water" programme. The responses are summarised on the Defra website at http://www.defra.gov.uk/corporate/consult/waterspace/index.htm.

Galapagos Islands

Norman Baker: To ask the Secretary of State for Environment, Food and Rural Affairs what steps her Department is taking to help maintain biodiversity on the Galapagos Islands. [5881]

Jim Knight: The UK is currently involved in a number of projects aimed at preserving the biodiversity of the Galapagos Islands. Since 1993 the British Government have approved a total of £1,087,561 in funding for 24 separate environmental projects. These include four current projects under my Department's Darwin Initiative, which funds biodiversity projects in developing countries using UK expertise in partnership with local organisations.

British embassy representatives in Ecuador also take part in regular Galapagos round table meetings to discuss issues relating to the environmental management of the islands. These are attended by major Galapagos donors and local government officials. The embassy also maintains close contact with the new British Director of the Charles Darwin Foundation.

Pest Damage

Mr. Dismore: To ask the Secretary of State for Environment, Food and Rural Affairs if she will issue best practice guidelines to local authorities on their duty under S2(1)*(a)* of the Prevention of Damage by Pests Act 1949 with reference to *(a)* the (i) nature and (ii) frequency of inspections required by the Act and *(b)* the training and qualifications of inspectors; and if she will make a statement. [4853]

Jim Knight: It is for local authorities to decide on the most appropriate pest control programme in their own area, while having regard to their duties under the Prevention of Damage by Pests Act 1949. Therefore Defra has no plans to issue best practice guidelines to local authorities on their duty under S2(1)*(a)* of the Prevention of Damage by Pests Act 1949.

Radioactive Waste Management

Norman Baker: To ask the Secretary of State for Environment, Food and Rural Affairs if she will make a statement on the responsibilities of *(a)* the Nuclear Decommissioning Authority, *(b)* Nirex and *(c)* nuclear power generators for identifying long-term options for dealing with (i) high level and (ii) intermediate level radioactive material. [5888]

Mr. Morley *[holding answer 20 June 2005]:* The independent Committee on Radioactive Waste Management (CoRWM) has been set up under the "Managing Radioactive Waste Safely" programme to oversee a review of options for managing the UK's higher activity radioactive waste, and to recommend the option, or combination of options, that can provide a long-term solution, providing protection for people and the environment. CoRWM is due to deliver its recommendations by July 2006. UK Government and the devolved administrations will then decide policy and its means of delivery in light of CoRWM's recommendations. The Nuclear Decommissioning Authority, Nirex and the nuclear power generators are all free, along with others, to input their views and supporting material to the CoRWM option assessment process.

The role of the NDA is set out in the Energy Act 2004. It's purpose is to oversee and manage the decommissioning and clean-up of the UK's civil public sector nuclear legacy. Nirex's mission is

> "in support of Government policy, develop and advise on safe, environmentally sound and publicly acceptable options for the long-term management of radioactive materials in the UK".

The owners of radioactive waste are obliged to make suitable arrangements for the management of their waste, according to Government policy and regulatory requirements.

River Thames (Pollution)

Sarah Teather: To ask the Secretary of State for Environment, Food and Rural Affairs (1) how many meetings officials from her Department have attended with the Environment Agency, Thames Water and the Greater London Authority since June 2004 to discuss the levels of raw sewage in the River Thames; [5266]

(3) what assessment she has made of the level of pollution in the River Thames; and if she will make a statement; [5275]

(2) how much raw sewage was discharged into the River Thames in each month since June 2004; [5274]

(4) whether the condition of water in the Thames breaches the European Union Urban Waste Water Directive; [5302]

(5) what assessment she has made of the need for an interceptor tunnel in the River Thames; and if she will make a statement. [5319]

Mr. Morley: The objective of the Urban Waste Water Treatment Directive is to protect the environment from the adverse effects of waste water discharges. The directive does not however set specific standards for the condition of inland and coastal waters into which waste water is discharged. Rather, it includes requirements to put in place sewage collecting systems, and sets standards for the treatment of sewage at sewage treatment works. Treatment standards and deadlines are set according to the size of the population served and the sensitivity of waters receiving the discharges.

The sewage collection system serving London is a combined system which collects both domestic and industrial waste water, and rainwater run-off. The directive acknowledges that it is not possible in practice to construct combined collecting systems and treatment plants to deal with all waste water during situations such as unusually heavy rainfall. Consequently the directive requires the limitation of pollution of receiving waters due to storm water overflows according to best technical knowledge not entailing excessive cost. The system along the tidal Thames has combined sewer overflows which operate to prevent flooding and sewage treatment works from becoming overloaded during wet weather.

The estimated volumes of sewage pumped to the river during some wet weather conditions in the following table are taken from pumping station records from the five largest pumping stations that discharge to the Thames Tideway. These are the only "overflow" points that have records of discharge volumes and are considered to be responsible for approximately 60 per cent. of the overflow discharges to the tideway in wet weather. The remaining 40 per cent. come from other pumping stations and gravity sewers. These percentages will vary considerably depending on the spatial and temporal distribution of rainfall across London as well as other factors such as tidal state.

Month	*Estimated volume (m^3)*
June 2004	3,047,000
July 2004	1,260,000
August 2004	4,945,000
September 2004	446,000
October 2004	4,290,000
November 2004	304,000
December 2004	4,507,000
January 2005	825,000
February 2005	502,000
March 2005	2,052,000
April 2005	1,305,000
May 2005	nil
June 2005	324,000
June 2004 to present—16 June 2005	
Total	23,807,000

The pollution of the tidal Thames by storm water overflows and compliance with the standards of legislation for continuous discharges is of considerable concern to this Administration.

Since 2000 Thames Water, the Environment Agency, Defra, the Greater London Authority and the Office of Water Services (Ofwat) have been involved in a strategic

study of the environmental impact of intermittent storm sewage (sewage and rainwater run-off) discharges to the Thames Tideway. The remit of the study was to identify objectives for improvement, and to propose potential solutions, having regard to costs and benefits.

Since June 2004 five meetings of the Thames Tideway Strategic Study Steering Group have been held with my officials in attendance. The Greater London Authority representative did not attend one of the five meetings.

The strategic study has developed three principal objectives:

to protect the ecology of the tideway;

to reduce the aesthetic pollution due to sewage-derived litter; and

to protect the health of recreational water users.

With regard to the assessment of the River Thames against these objectives the information can be found in the Thames Tideway Strategic Study Steering Group Report at www.thamestidewaystrategicstudy.co.uk. Defra has not made a separate assessment of the level of pollution of the Thames.

We consider that the proposal arising from the interim report of the group for a large 35 km interceptor tunnel needs further investigation—it would take about 15 years to implement and cost in the order of £1.7 billion.

My officials and the Thames Tideway Strategic Study Steering Group are carrying out further consideration of the issues and possible appropriate smaller-scale measures which may be able to deliver needed improvements sooner than could be delivered by the proposed tunnel. The report of the further findings and options presented, which is expected soon, will be carefully considered by Ministers and a decision will be taken on an appropriate course of action to be taken to meet our obligations to protect the environment in a cost effective way. No options including the interceptor tunnel are being ruled out at this stage.

Sugar

Keith Vaz: To ask the Secretary of State for Environment, Food and Rural Affairs what the outcome of the 2004 meeting between the European Council and the African, Caribbean and Pacific countries on the EU sugar regime was; and if she will make a statement. [5622]

Jim Knight: In preparation for reform of the EU sugar regime, the European Commission and the Council of Ministers have had a range of contacts with the EU's existing preferential suppliers, notably in the African, Caribbean and Pacific (ACP) group of countries.

As part of that dialogue, a joint meeting was held immediately following the Agriculture and Fisheries Council on 25 January 2005. The purpose of the meeting was to explain the Commission's approach to reform and to discuss the proposed action plan on accompanying measures for Sugar Protocol countries likely to be affected. Commissioner Fischer Boel reiterated the case for early and substantive reform and said that she hoped for agreement before the WTO ministerial meeting in Hong Kong in December. Commissioner Michel stressed that the EU would help the ACP to adapt on the basis of the actual needs of the countries concerned. Commissioner Mandelson underlined that preferential access to the EU market for ACP producers would be an important part of the Economic Partnership Agreements currently being negotiated with the ACP states.

Tallow

Mr. Paice: To ask the Secretary of State for Environment, Food and Rural Affairs what the receipts to her Department were from the sale of tallow from animals slaughtered under compulsory schemes in each of the last three years; and what the projected income or deficit figures for the sale of tallow are for the next three years. [5663]

Mr. Bradshaw *[holding answer 20 June 2005]:* Sales of tallow from animals slaughtered under the over-30-month scheme have resulted in the following receipts:

	£000
2002–03	1,888
2003–04	1,251
2004–05	4,957

Because of impending changes to the over-30-month scheme estimates for future tallow income are limited to the current financial year (2005–06) where sales of £2.35 million are forecast.

Water Charges

Linda Gilroy: To ask the Secretary of State for Environment, Food and Rural Affairs pursuant to the answer of 7 June 2005, *Official Report*, column 443W, on water meter charges, if she will break down those in receipt of the social tariff in each of the last three years by water company. [6729]

Mr. Morley: The following table sets out the numbers of customers in receipt of the vulnerable groups tariff (social tariff) for each company, over the last three years for which figures are available, as collected by Ofwat. Figures for 2004–05 are not yet available and will be published in October.

Number of successful applications for the vulnerable groups tariff

	2001–02	*2002–03*	*2003–04*
Anglian and Hartlepool	954	966	899
Dwr Cymru	8	78	245
United Utilities	706	946	1,031
Northumbrian and Essex and Suffolk	283	316	378
Severn Trent	373	449	682

TREASURY

Child Tax Credit

Mr. Laxton: To ask the Chancellor of the Exchequer how many complaints *(a)* his Department and *(b)* the Inland Revenue received about the administration of child tax credit in 2003–04. [6188]

Dawn Primarolo: I refer the hon. Member to the answer I gave on 15 June 2005, *Official Report*, column 393W, to the hon. Member for Walsall, North (Mr. Winnick).

Mr. Laxton: To ask the Chancellor of the Exchequer what steps are being taken by HM Revenue and Customs to improve the administration of child tax credit. [6189]

Dawn Primarolo: I refer the hon. Member to the oral statement I made to the House on 22 June 2005.

Gross Domestic Product

Jim Cousins: To ask the Chancellor of the Exchequer what the gross domestic product per head was in *(a)* London, *(b)* Edinburgh, *(c)* Cardiff, *(d)* Glasgow, *(e)* Belfast, *(f)* Liverpool, *(g)* Bristol, *(h)* Leeds, *(i)* Birmingham, *(j)* Manchester, *(k)* Sheffield, *(l)* Newcastle, *(m)* Nottingham and *(n)* the UK in (i) the most recent year for which figures are available, (ii) 2001 and (iii) 1997. [6355]

John Healey: The information requested falls within the responsibility of the National Statistician, who has been asked to reply.

Letter from Len Cook to Mr. Jim Cousins, dated 23 June 2005:

As National Statistician, I have been asked to reply to your recent Parliamentary Question about GDP per capita in regions of the United Kingdom in the last period for which figures are available, for 2001 and for 1997. (6355)

The estimates in Table A are based on the regional gross value added1 (GVA) estimates published in December 2004. These are available on the National Statistics website at: http://www.statistics.gov.uk/StatBavSe/Productasp?vlnk = 7359

The latest published information is for 2003 at the higher level of geography and 2002 at the lower levels. London is the only city with data available for GVA per capita in 2003, as specified below.

Table A: GVA[1] per capita for regions of the United Kingdom

£

Area	1997	2001	2002	2003
London	17,850	21,793	23,068	23,579
Edinburgh	18,301	22,283	24,016	—
Cardiff and Vale of Glamorgan[2]	12,638	16,527	17,484	—
Glasgow	15,398	19,454	20,575	—
Inner Belfast[3]	15,932	20,779	22,123	—
Outer Belfast[3]	7,637	9,704	10,367	—
Liverpool	10,508	12,846	13,776	—
Bristol	16,630	20,326	21,513	—
Leeds	13,817	17,129	18,305	—
Birmingham	12,608	15,737	16,466	—
Manchester	11,265	13,772	14,458	—
Sheffield	10,705	13,192	13,835	—
Tyneside[4]	10,590	13,245	14,002	—
Nottingham	16,919	19,547	20,113	—
UK less Extra-Regio[5]	12,085	14,545	15,273	15,980

[1] Information presented here is gross value added (GVA) which is gross domestic product (GDP) less taxes (plus subsidies) on products.
[2] Cardiff is part of the NUTS3 region Cardiff and the Vale of Glamorgan, which is currently the lowest level of geography ONS publish.
[3] Outer Belfast and Inner Belfast are published as separate NUTS3 regions.
[4] Newcastle is part of Tyneside (NUTS3) which is currently the lowest level of Geography ONS publish.
[5] Extra-Regio is that part of the UK's economic territory, which cannot be allocated to any specific region.

Household Incomes

Jim Cousins: To ask the Chancellor of the Exchequer what the gross disposable household income was in *(a)* current and *(b)* real price terms, using 2005 as the base year, for (i) each region, (ii) each country of the UK and (iii) the United Kingdom, for each year from 1996 to 2003; and if he will set out figures for each region and country indexed against the United Kingdom average. [6321]

John Healey: The information requested falls within the responsibility of the National Statistician, who has been asked to reply.

Letter from Len Cook to Mr. Jim Cousins, dated 23 June 2005:

As National Statistician, I have been asked to reply to your recent Parliamentary Question about gross disposable household income. (6321)

The Office for National Statistics (ONS) currently compiles regional gross domestic household income (GDHI) at current basic prices only. These are shown in Table A in pounds million and in Table B as indices.

The latest estimates were published in April 2005 with new figures for 2000 to 2003 and revisions for 1995 to 1999. They are available on the ONS website: http://statistics.gov.uk/StatBase/Product.asp?vlnk = 7359

ONS produce national real price estimates for household income. The latest available estimates using 2001 as the reference year are available for the years requested, 1996 to 2003, and are shown in Table C. These figures were published in "United Kingdom Economic Accounts, Quarter 4, 2004", which can be found on the National Statistics website at: http://statistics.gov.uk/downloads/theme_economy/UKEA04Q4.pdf

Table A: Headline[1] gross disposable household income (GDHI)[2,3] at current prices

2002	711,344	101.4
2003	729,630	104

Income Tax Returns

Dr. Cable: To ask the Chancellor of the Exchequer what percentage of individuals filed their self-assessment returns on time in each of the last five years for which information is available; and if he will make a statement. [7087]

Dawn Primarolo: The figures of returns issued before 31 October each year and received on time are as follows:

Return year	Percentage filed by 31 January
2003–04	90.6
2002–03	90.6
2001–02	90.5
2000–01	90.6
1999–2000	90.0

Money Laundering

Gregory Barker: To ask the Chancellor of the Exchequer what representations he has received regarding concerns about money laundering through landlords' use of the insurance premium tax system. [6643]

Mr. Ivan Lewis: The Treasury have received no representations regarding concerns about money laundering through landlords' use of the insurance premium tax system.

Tax Underpayments

Dr. Cable: To ask the Chancellor of the Exchequer what estimate he has made of the underpayment of

(a) direct tax and *(b)* national insurance contributions in each of the last 10 years for which information is available; and if he will make a statement. [7103]

Dawn Primarolo: There is no reliable estimate of the direct tax and national insurance contributions underpaid in any of the last 10 years. However, as was acknowledged by the NAO Fraud Study published last year, HMRC is as well advanced as overseas fiscal authorities in its thinking and work on fraud measurement.

VAT

Mr. Allen: To ask the Chancellor of the Exchequer if he will extend the 100 per cent. VAT refund on repairs to listed religious buildings and to listed buildings of non-religious and secular significance. [6665]

Mr. Ivan Lewis: The Government are negotiating with our EU partners to achieve a reduced rate of VAT for repairs to listed places of worship. The Listed Places of Worship Grant scheme is due to continue until March 2008, unless a reduced rate is achieved earlier. The Government recognises the importance of these buildings within their communities and that the need to use specialist craftsmen and costly materials means that their upkeep can be a heavy burden, particularly on small congregations. The same considerations do not apply to all listed buildings. Approved alterations to certain charity, or residential, listed buildings are VAT zero-rated.

Lady Hermon: To ask the Chancellor of the Exchequer what plans he has further to expand the VAT exemption scheme in Northern Ireland to cover all church buildings. [7158]

Dawn Primarolo: I refer the hon. Member to the answer my hon. Friend the Financial Secretary to the Treasury gave on 4 April 2005, *Official Report*, column 1168W, to the former right hon. Member for Upper Bann (Mr. Trimble).

CABINET OFFICE

Central Office of Information

Mr. Davidson: To ask the Chancellor of the Duchy of Lancaster what tenders have been issued by the Central Office of Information on behalf of the *(a)* Foreign and Commonwealth Office and *(b)* Department for Constitutional Affairs concerning communications activity relating to EU matters. [2102]

Mr. Hutton: The Central Office of Information (COI) has issued tenders on behalf of the Foreign and Commonwealth Office in relation to the United Kingdom (UK) presidency of the European Union (EU), as follows:

recruiting a public relations agency to inform consumer and regional media on the presidency priorities;

recruiting an integrated marketing agency to inform UK audiences on the presidency priorities;

printing information materials for distribution during the presidency;

producing official presidency stationery and products;

research to test information materials and identify key areas of interest.

COI has separately issued tenders in relation to:

development of e-communications activity;

mailing of EU Guide to libraries, citizens advice bureau etc;

research to test information materials such as the EU Guide;

development of partnership marketing activity;

activity to raise awareness of the facts about the EU and to inform the public on where to access EU information.

COI has not issued any tenders on behalf of the Department for Constitutional Affairs on EU matters.

Departmental Relocation

Mr. Gale: To ask the Chancellor of the Duchy of Lancaster how many of his Department's posts *(a)* have been relocated and *(b)* are under consideration for relocation from London to the deprived areas of the south-east. [6251]

Mr. Hutton: The Cabinet Office is implementing the Lyons Review recommendations to relocate 250 posts out of London and the south-east by 2010. This will not exclude consideration of relocating some posts to relatively deprived areas in the south-east.

TRANSPORT

Borough Market

Anne Main: To ask the Secretary of State for Transport what plans his Department has for the Borough Market site if the deficiencies identified by the public inquiry inspector, in respect of the proposed Thameslink route, cannot be remedied. [5098]

Derek Twigg: Network Rail as the promoters of the Thameslink route modernisation scheme have revised their proposals to address the deficiencies identified at the earlier public inquiry. Their latest proposals, including those in respect of the Borough Market area, will be considered at the re-opened inquiry which starts in September. Once the inquiry inspector has reported, the various applications relating to this scheme will require joint decisions by this Department and ODPM. The Department cannot anticipate the outcome.

Concessionary Bus Travel

Jim Cousins: To ask the Secretary of State for Transport what distribution formula is proposed for the free bus travel scheme for over 60s from April 2006; and what indicative allocations have been set for each local authority for 2006–07. [6385]

Ms Buck: Final decisions on the distribution of the extra funding—which will be done through the Revenue Support Grant process—have not been made.

Container Ports

Vera Baird: To ask the Secretary of State for Transport (1) what assessment he has made of likely container port demand in the UK; [6783]

(2) what assessment he has made of the change in volume of container traffic which is likely to arise from the current applications for port expansion in the south of England. [6877]

Dr. Ladyman: The forthcoming review of ports policy, due to be launched once preliminary work has been completed, will address the key questions around existing and future port capacity and demand.

To that end, my Department has commissioned consultants to produce national port traffic forecasts by region. These forecasts will include demand for container traffic through to 2030 in southern England as well as nationally, and will be published as part of the review.

Council Road Budgets

Mr. Duncan: To ask the Secretary of State for Transport which local authorities underspent on their road maintenance budgets in the last financial year; and by how much in each case. [7114]

Mr. Darling: Information on local authorities' spending on road maintenance in 2004–05 will not be available until early next year.

EU Driver Licensing Committee

Mrs. May: To ask the Secretary of State for Transport pursuant to the answer of 23 May 2005, *Official Report*, column 9W, on the EU Driver Licensing Committee, when he expects a decision to be taken in relation to revisions to the medical standards set out in Annex III to European Directive 91/439/EEC. [6731]

Ms Buck: The timetable for the work of the EU Committee on the Driving Licence is a matter for the European Commission. Before any decision is taken on medical standards, we intend to consult the Secretary of State's Honorary Medical Advisory Panels on any proposals which may be made for change to these standards.

Global Oil Prices

Tom Brake: To ask the Secretary of State for Transport whether the assumptions used by the Future of Transport White Paper published on 21 March take account of potential future changes in global oil *(a)* prices and *(b)* resources. [1235]

Ms Buck *[holding answer 26 May 2005]:* The modelling and analysis supporting the White Paper was based on DTI's May 2004 long-term modelling assumptions for crude oil of $23 a barrel (2003 prices) in 2010 rising to almost $28 a barrel by 2020. This was consistent with assumptions used by the International Energy Agency.

A good deal of uncertainty surrounds all transport projections. At present, developments in the oil market are injecting a major element of uncertainty. Sustained higher oil prices would imply lower traffic growth. If crude oil prices were to end up around US$5 a barrel higher in real terms in 2010 than assumed, we expect traffic projections would fall by around 1 per cent.

Heathrow

Mr. Hands: To ask the Secretary of State for Transport what discussions he has had with the British Airports Authority regarding the proposed third runway for Heathrow; and if he will make a statement. [5892]

Ms Buck: The Secretary of State meets with BAA on a periodic basis to discuss a range of issues affecting the company's airports, including Heathrow. There is a substantial programme of work under way in the Department, working with BAA and others, to assess the prospects for further development at Heathrow, including adding a third runway, while meeting the stringent environmental conditions laid down in the Air Transport White Paper (Cm6046). Further details about this, which is known as the Project for the Sustainable Development of Heathrow, are available on the Department's website (www.dft.gov.uk/aviation/projectheathrow).

Mr. Hands: To ask the Secretary of State for Transport what assessment he has made of the effect of the proposed *(a)* third runway and *(b)* sixth terminal at Heathrow Airport on (i) road, (ii) train and (iii) tube routes to the airport from central London. [5894]

Ms Buck: The impact of an expanded Heathrow on the surrounding surface access network was examined in the run up to Air Transport White Paper. The White Paper concluded that any further development of Heathrow would require improvements to public transport (especially rail infrastructure) and that some form of road user charging should also be considered. The surface access measures necessary to support an expanded Heathrow are being examined further as part of the project for the Sustainable Development of Heathrow.

Kent Roads Budget

Derek Wyatt: To ask the Secretary of State for Transport how much central funding Kent county council has received for its roads budget in each year since 1997. [6728]

Ms Buck: The Department for Transport has approved approximately £268 million of funding support for Kent county council between April 1997 and March 2005 in local transport capital settlements. Approximately £74 million has been for capital highways maintenance, £46 million for local improvements to the road network and roads based public transport and £148 million for major schemes (each costing more than £5 million). The major schemes were mainly road improvements, but also included is support for investment in the Fastrack public transport network in Kent Thames-side.

In addition to funding provided through the local transport capital settlement, the Government also provided funding to Kent county council covering most of the costs of the Ramsgate harbour approach road.

In addition central funding support for services, including routine highways services, is provided through revenue support grant. This is not allocated by the Government between individual council services.

The funding support provided directly to Kent county council through the local transport capital settlement for each year is shown in the table. It has been for Kent county council to determine.

Kent county council local transport capital settlement

£000

	Capital highways maintenance	Integrated transport block	Major schemes	Total
1997–98	4,495	2,275	72,834	79,604
1998–99	2,774	2,460	29,000	34,234
1999–2000	4,412	4,400	20,456	29,268
2000–01	6,466	4,411	5,100	15,977
2001–02	11,513	7,600	7,600	26,713
2002–03	12,149	8,129	3,720	23,998
2003–04	15,108	8,920	700	24,728
2004–05	16,705	7,896	8,650	33,251

Parking

David Davis: To ask the Secretary of State for Transport what research his Department has undertaken into ways of addressing parking shortages in town centres, with particular reference to controlled parking zones. [6546]

Ms Buck: The Department is about to publish the results of research about the extent to which restrictions in controlled parking zones are understood. This does not specifically deal with parking shortages in town centres, which is a responsibility for local authorities under the Road Traffic Regulation Act 1984.

Railways

Mr. Duncan: To ask the Secretary of State for Transport how many complaints his Department received concerning each train operating company in the last year for which figures are available. [7107]

Mr. Darling: The Department does not index correspondence by train operating company, and this information is therefore not available.

The number of complaints received by the Rail Passengers Council about different train operators is published in its annual report. The results of the national passenger survey on passenger satisfaction are published on 24 June in the Strategic Rail Authority's National Rail Trends Yearbook 2004–05, a copy of which is placed in the House of Commons Library.

Mr. Drew: To ask the Secretary of State for Transport how many road bridges there are over railway lines in the Stroud constituency; and how many of these have additional measures of protection. [7241]

Ms Buck: This information is not held centrally. Gloucestershire county council is the highway authority for the Stroud constituency, and is responsible for almost all road bridges over railway lines there.

Road Lane Closures

Harry Cohen: To ask the Secretary of State for Transport what authority *(a)* private contractors, *(b)* the emergency services and *(c)* others have to cone off road lanes; and if he will make a statement. [5910]

Ms Buck: Private contractors carrying out works on the road for highway authorities should follow the advice in chapter 8 of the Traffic Signs Manual; if working for utility companies they should follow the guidance in Safety at Street Works and Road Works—a Code of Practice. These publications show how works should be set out, including how cones should be used to close off sections of a road, to ensure the safety of the work force and road users. If any works require a temporary traffic regulation order, for example to close a road, then the relevant highway authority must make the order.

Local authority or utility employees carrying out works on the road will be subject to the same requirements as contractors working for the bodies concerned.

The Road Traffic Regulation Act 1984 gives the police powers to place signs, which includes traffic cones, when dealing with events, incidents and emergencies. The Traffic Management Act 2004 gives Highway Agency Traffic Officers powers to direct traffic and to place signs on the agency's roads in order to manage traffic.

The Traffic Signs (Temporary Obstructions) Regulations 1997 specify the devices that may be used for directing traffic round broken-down vehicles and other temporary obstructions, and conditions for placing them. The devices include traffic cones, flat traffic delineators or traffic pyramids.

MINISTER FOR WOMEN

Prisoners

23. **Mr. Breed:** To ask the Minister for Women and Equality what recent discussions she has had with the Secretary of State for the Home Department on the female prison population. [6538]

Meg Munn: I very much welcome the recent announcement by my right hon. Friend the Home Secretary of £9.15 million funding over four years for "a radical new approaches to help reduce women's offending". The new initiatives, set up in two areas, will include women's Community Supervision and Support Centres. These will provide women with one-stop access to the support and services needed to address issues that can affect why women offend, such as drug abuse, mental health, housing, child care and domestic violence. I and my right hon. Friend the Cabinet Minister for Women are in close contact with the relevant Ministers.

Pregnant Employees

24. **Dr. Cable:** To ask the Minister for Women and Equality what steps she is taking to ensure the equal treatment of pregnant women within the workplace. [6539]

Meg Munn: Employers who discriminate against pregnant women are breaking the law. We have taken the opportunity afforded by the amended Equal Treatment Directive to clarify the law and are amending the Sex Discrimination Act so that it explicitly outlaws pregnancy discrimination in the workplace.

Return to Work

25. **Miss McIntosh:** To ask the Minister for Women and Equality what steps the Government are taking to help women returning to work after *(a)* giving birth and *(b)* bringing up a family. [6540]

Meg Munn: We recently consulted on options to encourage communication between employers and employees and ease women's return to work after time away to give birth and care for children. Other work includes an RDA pilot providing women returners with career advice and training, and the Women and Work Commission, who will report to my right hon. Friend the Prime Minister in the autumn on ways of giving women a fairer deal in the workplace.

Trafficking

26. **Richard Younger-Ross:** To ask the Minister for Women and Equality what discussions she has had with the Secretary of State for Foreign and Commonwealth Affairs concerning the Council of Europe convention on trafficking in relation to the trafficking of women. [6541]

Meg Munn: I fully support the work my hon. Friend the Member for Wythenshawe and Sale, East (Paul Goggins), the Under-Secretary of State for the Home Department, is doing in relation to the Council of Europe Convention on Trafficking. My hon. Friend chairs the Ministerial Group on Human Trafficking and I will be attending the next meeting of the Ministerial Group, the first such meeting since my appointment.

Pay Discrimination

John Bercow: To ask the Minister for Women and Equality what recent discussions she has had with contractors to Government Departments about pay discrimination on gender grounds. [6542]

Meg Munn: The Office of Government Commerce is currently producing guidance to cover "Social Issues in Purchasing". This includes how and where gender and other social considerations may be incorporated in public sector procurement. It is acknowledged that the current framework allows scope to take account of gender considerations, as long as they occur within the existing legal and policy framework.

INTERNATIONAL DEVELOPMENT

Darfur

Mr. Hancock: To ask the Secretary of State for International Development how much has been spent on humanitarian aid for the Darfur region of Sudan in each of the last three years; and what his plans are for each of the next three years. [6334]

Hilary Benn: Since the start of the crisis in Darfur in April 2003, the Department for International Development (DFID) has committed £90 million of humanitarian aid to the Darfur crisis, including assistance to Sudanese refugees in eastern Chad. In the financial year 2003–04 DFID spent £7 million on humanitarian aid, of which £3 million went to the refugees in eastern Chad. In the financial year 2004–05 DFID spent £48.5 million on humanitarian aid for Darfur; of this £7 million went to eastern Chad. In the current financial year, 2005–06, DFID has set aside £75 million for humanitarian work across Sudan. Of this, DFID has so far spent £10 million on humanitarian aid to the Darfur region; of which £0.3 million has gone to eastern Chad.

A further £23.5 million is committed for humanitarian projects in Darfur this year, including £2 million for eastern Chad. A further £7.5 million is available for humanitarian assistance across Sudan including Darfur, but it has not yet been allocated to specific projects or locations. Given the evolving situation, DFID is not yet in a position to confirm how much humanitarian aid will go to the Darfur region in the next three years.

Education (Millennium Development Goal)

Mr. Martyn Jones: To ask the Secretary of State for International Development what recent assessment he has made of progress towards the Millennium Development Goal to provide universal primary education in Africa. [5693]

Hilary Benn: The most recent assessment of progress towards all the Millennium Development Goals (MDG)s is a United Nations report published in June 2005. A 2004 UN chart colour codes whether regions are on track to meet key MDG targets or not.

As reported in the United Nations Millennium Development Goal Report (2005), sub-Saharan Africa has made progress, but still has a third of its children out of school; 62 per cent. of children in this region were enrolled in primary school in 2001 (the most recently available figures). Unsurprisingly, given this, the UN's 2004 chart shows that this region is not on track to meet the universal primary education Millennium Development Goal (MDG) by 2015 without dramatically scaled up efforts. Northern Africa is however, on track to meet this target, with 92 per cent. of pupils enrolled in primary education in 2001.

The picture is not uniform. Appropriate policies and sufficient expenditure have enabled countries such as Tanzania, Rwanda and Uganda to make good progress. These countries are judged on track to meet the universal primary education Millennium Development Goal (MDG) by 2015.

DFID puts a high priority on expanding primary school enrolment and promoting girls education and plans to contribute £1.4 billion to education in Africa between 2005 and 2008.

G8 Summit (African Debt)

Mr. Andy Reed: To ask the Secretary of State for International Development what assessment he has made of the financial impact of the G8 Finance Ministers meeting in June on African countries in the highly indebted poor countries initiative; and if he will make a statement. [6300]

Hilary Benn: At their meeting on 10/11 June, the G8 Finance Ministers re-affirmed their commitment to the full implementation and financing of the heavily indebted poor countries (HIPC) initiative. They also agreed a new proposal to cancel 100 per cent. of

qualifying HIPCs' debts to the International Monetary Fund (IMF), the International Development Association (IDA) of the World Bank and the African Development Fund of the African Development Bank (AfDB).

The proposal, to be presented to the Boards of the World Bank, IMF and AfDB, would cancel up to $55 billion worth of debt for 38 countries. Eighteen countries, 14 of which are in Africa, would immediately be eligible for this relief, as they have completed the HIPC process. They would benefit from up to $40 billion worth of debt cancellation. The G8 proposal will therefore free up substantial additional resources for spending on health, education and infrastructure and to help countries meet the Millennium Development Goals. The mechanism by which qualifying HIPC countries would receive this new multilateral debt relief would be by adjusting these countries' gross assistance flows by the amounts forgiven. Details of the proposal are still being worked out, so it is not yet possible to give precise figures of the net benefits to individual countries.

An additional nine African HIPCs are expected to complete the HIPC process over the next year or two. They would then also qualify for assistance under the new proposal. A further nine African countries have been identified as eligible for HIPC. However, conflict and governance concerns are hampering their progress through the HIPC process. As and when they complete the HIPC initiative, they would also qualify for assistance under this new deal.

The G8 Finance Ministers have agreed that G8 countries will provide their share of the finances needed to cover the cost of this debt relief. Therefore in addition to the proposed debt stock cancellation, the additional resources donors provide as compensation to the World Bank and AfDB would be channelled through IDA and the African Development Fund to benefit all recipient countries.

CONSTITUTIONAL AFFAIRS

Family Resolutions Scheme

Tim Loughton: To ask the Minister of State, Department for Constitutional Affairs how much the Government have spent to date on the Family Resolutions Pilot Scheme; how many couples have completed full courses on the Scheme; and if he will make a statement on the future of the Scheme. [4467]

Maria Eagle: I have been asked to reply.

Total expenditure on the Family Resolutions Pilot Project as of 31 May 2005 is £190,628. 47 couples have been referred to the Pilot. Of these, 23 couples have completed the full programme. We expect to take decisions on the future of the Family Resolutions Project in April 2006, after evaluation is complete.

Marked Electoral Registers

Paul Farrelly: To ask the Minister of State, Department for Constitutional Affairs (1) if she will ensure that her Department and its contractor Pickfords Records Management make no greater charge per page for the general election marked register than do local councils for marked registers after local elections; [6645]

(2) if she will ensure that marked registers remain in the custody of local authorities following future general elections. [6646]

Ms Harman: I refer the hon. Member to the answer I gave to him on 22 June 2005.

Paul Farrelly: To ask the Minister of State, Department for Constitutional Affairs what *(a)* administrative and *(b)* legislative steps would need to be taken to ensure that marked registers remain in the custody of local authorities following a general election. [6647]

Ms Harman: Transferring the duty to store marked registers from the Clerk of the Crown in Chancery to local authorities, would require amending Schedule 1 of the Representation of the People Act 1983. This could be achieved only through primary legislation.

If the duty to store election documents produced, at a general election, were to be transferred to local authorities, it would then be for those authorities to take any appropriate administrative steps to ensure effective storage of all documents, and access to those documents open to inspection, including the marked registers.

DEPUTY PRIME MINISTER

Abandoned Vehicles

Sarah Teather: To ask the Deputy Prime Minister what assessment his Department has made of Operation Scrap-it; and if he will make a statement. [5273]

Yvette Cooper: Operation Scrap-it, led by the Association of London Government, and funded as part of the Together programme has shown what can be achieved by focussed action on tackling nuisance vehicles. 98 per cent. of abandoned vehicles across London are now being removed within 72 hours and free take back of end of life vehicles is provided across the capital.

The Government's national strategy for tackling nuisance vehicles, published last November, aims to learn on this success and that of other schemes, such as the car clearance initiatives funded by the Arson Control Forum, to cut the number of abandoned vehicles by 25 per cent. by 2008.

Braeburn Park, Crayford

Mr. Evennett: To ask the Deputy Prime Minister what representations he has received from the residents of Braeburn Park, Crayford in respect of the planning applications from FM Conway Dartford; and if he will make a statement. [6640]

Mr. Woolas: My right hon. Friend the Deputy Prime Minister received a petition from the residents of Braeburn Park and a number of individual letters objecting to the development. These will be fully considered before a decision is made on whether to call in the application.

Mr. Evennett: To ask the Deputy Prime Minister when he expects to make a decision on the FM Conway Dartford planning applications. [6641]

Mr. Woolas: These applications have been formally referred to my right hon. Friend the Deputy Prime Minister, the First Secretary of State as departures from the development plan. We are still considering whether they should be called in for the Secretary of State's decision and we expect to take a view on this very soon. I cannot make any further comment on the applications at this time.

Disability Discrimination Act

Mr. Hands: To ask the Deputy Prime Minister what guidance he has issued on the application of the Disability Discrimination Act 1995 to public areas of *(a)* local authority and *(b)* housing association (i) blocks, (ii) walkways, (iii) play areas and (iv) open spaces. [6774]

Mr. Woolas: It is the responsibility of local authorities and housing associations to ensure that they comply with the Disability Discrimination Act. Providing guidance on disability issues is one of the functions of the Disability Rights Commission (DRC). The DRC's part 3 code of practice deals with the duties placed by part 3 of the Disability Discrimination Act 1995 on those providing goods, facilities or services to the public and those selling, letting or managing premises.

Fire Control Centre (South-east England)

Mr. Fallon: To ask the Deputy Prime Minister what estimate he has made of the net cost change that will ensue from the proposed Regional Fire Control Centre for South East England. [4932]

Jim Fitzpatrick: Figures for the south-east only are not currently available, as the business case for the FiReControl project currently exists at a national level. The new national network of control centres is expected to achieve, on average, a possible saving of 30 per cent. over existing arrangements from financial year 2009–10 onwards.

Housing Development (Flood Risk)

Mr. Todd: To ask the Deputy Prime Minister if he will review the guidance given to local authorities on development in areas at risk from flooding or on a flood plain; and if he will make a statement. [6434]

Yvette Cooper: My right hon. Friend, the former Minister for Housing and Planning, announced that we will be revising planning policy on development and flood risk (PPG25) in his statement of 24 March 2005, *Official Report*, column 83WS.

Local Government

Mr. Drew: To ask the Deputy Prime Minister if he will list the bodies in Gloucestershire with whom he has discussed plans for local government reorganisation. [6777]

Mr. Woolas: None. At present the Office of the Deputy Prime Minister has no plans for local government reorganisation.

Mobile Phone Masts

Anne Milton: To ask the Deputy Prime Minister what plans the Government have to allow health concerns to be taken into account during the planning process for mobile phone masts. [3371]

Yvette Cooper: The Government are carefully considering the judgment on 13 November 2003 by the Court of Appeal in the case of "First Secretary of State *v.* T Mobile and others" and the report entitled "Mobile Phones and Health 2004" published by the National Radiological Protection Board on 11 January which both make reference to the extent to which local planning authorities can take health concerns into account in decisions about the siting of mobile phone base stations. The NRPB supports the Government view that whilst planning is necessarily a local issue the assessment of evidence related to possible health concerns associated with exposures to RF fields from base stations is best dealt with nationally.

Recreational Spaces (London)

Sarah Teather: To ask the Deputy Prime Minister what quantity of public recreational open space there was in each London borough in each year since 1997. [5283]

Jim Fitzpatrick: The information requested is not held centrally and could only be provided at disproportionate cost.

Regional Assemblies

Mrs. Spelman: To ask the Deputy Prime Minister whether he intends to hold a referendum on establishing an elected regional assembly in *(a)* the North West and *(b)* Yorkshire and Humber. [4293]

Yvette Cooper: No. I refer the hon. Member to my right hon. Friend the Deputy Prime Minister's statement to the House given on 8 November 2004, *Official Report*, columns 587–89. The hon. Member was present during my right hon. Friend the Deputy Prime Minister's statement and led the response on behalf of the opposition.

CULTURE, MEDIA AND SPORT

Departmental Relocation

Mr. Gale: To ask the Secretary of State for Culture, Media and Sport how many of her Department's posts *(a)* have been relocated and *(b)* are under consideration for relocation from London to the deprived areas of the South East. [6254]

Mr. Caborn: My Department and sponsored organisations are implementing the Lyons Review recommendations to relocate 600 posts out of London and the South East by 2010. This will not exclude consideration of relocating some of the posts to relatively deprived areas of the South East. So far, my Department has not identified any posts suitable for transfer to deprived areas of the South East.

Digital Satellite Broadcasting

Tom Levitt: To ask the Secretary of State for Culture, Media and Sport if she will ensure that those areas of the

country which are unable to receive digital terrestrial television for technical reasons have access to a free digital satellite service equivalent to Freeview at a comparable set-up cost. [6034]

James Purnell: All the BBCs television services are broadcast without encryption and can be accessed by viewers using digital satellite receivers and dishes available from retailers. In addition, a free-to view satellite service offering all public service broadcasting channels was launched by BSkyB in 2004.

The Government believe there are considerable benefits for consumers in broadcasters continuing to promote the development of free to view satellite provision. This will help to drive digital take up in areas poorly served by digital terrestrial in the run up to digital switchover.

Electronic Programming Guides

Mr. Don Foster: To ask the Secretary of State for Culture, Media and Sport when her Department expects the publication of Ofcom's Review of Electronic Programming Guides; and if she will make a statement. [5759]

James Purnell: The matter is the responsibility of the Office of Communications (Ofcom) as independent regulator. Accordingly, my officials have asked the Chief Executive of Ofcom to respond directly to the hon. Member. Copies of the Chief Executive's letter will be placed in the Libraries of both Houses.

Listed Buildings

Mr. Don Foster: To ask the Secretary of State for Culture, Media and Sport when her Department expects to publish its consultation on revised criteria for listing buildings; and if she will make a statement. [6484]

Mr. Lammy: As part of the wider reform of the heritage protection system, we expect to publish the consultation on the revised criteria for listing buildings in summer 2005.

National Sports Foundation

Hugh Robertson: To ask the Secretary of State for Culture, Media and Sport what the outcome was of the recent meeting between the four sport consortiums and her Department to discuss the National Sports Foundation. [5242]

Mr. Caborn *[holding answer 20 June 2005]:* Discussions with the National Governing Bodies for Sport about the National Sports Foundation are at an early stage and no decisions have been made. Further details will be announced in due course.

Hugh Robertson: To ask the Secretary of State for Culture, Media and Sport pursuant to her Answers of 24 May 2005, *Official Report*, column 53W, on the National Sports Foundation, when the Government expects to announce the *(a)* location, *(b)* budget, *(c)* staffing requirements, *(d)* structure and *(e)* grant criteria for the National Sports Foundation. [5370]

Mr. Caborn *[holding answer 20 June 2005]:* Discussions about the National Sports Foundation are at an early stage and no decisions have been made. Further details will be announced in due course.

Sports

Mr. Andy Reed: To ask the Secretary of State for Culture, Media and Sport what initiatives are *(a)* in place and *(b)* planned to meet the Department's public service agreement target to increase participation within priority groups, including women, by three per cent. by 2008. [6297]

Mr. Caborn: DCMS is working with Sport England on a range of key interventions to increase participation within priority groups, including women and we are in the process of agreeing a delivery plan with Sport England for the PSA target.

(a) Key initiatives in place include:

In the five years to 2008, Government investment in the PE, School Sport and Club Links strategy will top £1.5 billion, which also includes Lottery Fund assistance.

Investment of £60 million in the coaching programme that seeks to build on the National Strategy.

By 2006, Government and the National Lottery will have committed over £1 billion to develop new or refurbished sports facilities. We aim to develop a comprehensive facilities strategy mapping out supply, demand and priorities for investment.

(b) Planned initiatives include:

The creation of a National Sports Foundation, bringing together Government and the national governing bodies for sport, will be an investment fund for grassroots sport, with a £27 million initial investment as announced by the Chancellor in March.

The creation of "Sport Direct", a new information service which will establish a single portal for sport so that people can find out what is on offer in their local area.

In addition, Sport Action Zones (SAZs) were established in January 2000 as part of the Sport England Lottery Strategy to tackle sporting deprivation impacting on our target groups, in some of the most socially and environmentally deprived areas in the country.

The DCMS Participation Survey, starting in July 2005, will provide statistically robust data to monitor performance of our PSA targets.

Ulster Scots (Television Programmes)

Mr. Gregory Campbell: To ask the Secretary of State for Culture, Media and Sport what provision there is in the BBC Charter for Ulster Scots programmes in Northern Ireland. [5509]

James Purnell: There is no specific requirement under the BBC's Charter for the provision of Ulster Scots programmes in Northern Ireland. However, the BBC does provide a range of content in Ulster Scots and the Government's March Green Paper on the BBC made clear that its role should include provision in indigenous minority languages across a range of platforms.

DEFENCE

Aircraft Carriers

Mr. Hancock: To ask the Secretary of State for Defence which aircraft he expects to fly from the new aircraft carrier in 2012. [3821]

Mr. Ingram: The future aircraft carrier has been designed with the flexibility to operate a variety of aircraft, both fixed-wing and rotary. The planned composition of the first carrier's air group continues to be defined, but we anticipate that the Joint Combat Aircraft, which we expect to start taking delivery of in 2011, will be conducting flight trials from the new carrier when it enters service, as part of our progressive approach to providing the future carrier strike capability.

Departmental Equipment

Mr. Hoyle: To ask the Secretary of State for Defence if he will list the value of his Department's equipment *(a)* lost and *(b)* stolen in each of the last five years, broken down by service. [5057]

Mr. Touhig: The value of losses to the Ministry of Defence in each of the last five years are listed in the MOD's Annual Report and Accounts, copies of which are available in the Library of the House.

The figures representing the MOD's equipment stolen in each of the last five years are not available in the requested format. However, the totals for each period are as follows:

Financial year	*Value (£)*
2004–05	677,000.00
2003–04	1,220,000.00
2002–03	326,000.00
2001–02	85,000.00
2000–01	221,000.00

Gibraltar

Mr. Hoyle: To ask the Secretary of State for Defence which Royal Navy ships have visited *(a)* Gibraltar and *(b)* Spain since 1 April. [6387]

Mr. Ingram: The following tables show which Royal Navy and (for completeness) Royal Fleet Auxiliary ships have visited Gibraltar and Spain since 1 April 2005 to date (22 June 2005).

Gibraltar

Port	*Ship*	*Arrival date*	*Departure date*
Gibraltar	RFA Fort Rosalie	4 March 2005	27 May 2005
Gibraltar	HMS Nottingham	31 March 2005	2 April 2005
Gibraltar	TIMS Invincible	6 April 2005	6 April 2005
Gibraltar	HMS Grafton	7 April 2005	8 April 2005
Gibraltar	HMS Enterprise	19 April 2005	20 April 2005
Gibraltar	RFA Orangeleaf	19 April 2005	28 April 2005
Gibraltar	HMS Manchester	21 April 2005	25 April 2005
Gibraltar	HMS Manchester	29 April 2005	2 May 2005
Gibraltar	HMS Scott	4 May 2005	9 May 2005
Gibraltar	RFA Sir Galahad	21 May 2005	29 May 2005
Gibraltar	RFA Black Rover	21 June 2005	Continuing

Spain

Port	*Ship*	*Arrival date*	*Departure date*
Barcelona	RFA Fort George	30 March 2005	4 April 2005
Palma	HMS Montrose	1 April 2005	5 April 2005
Barcelona	HMS Cardiff	17 April 2005	22 April 2005
Valencia	HMS Marlborough	19 April 2005	23 April 2005
Vigo	HMS Albion	22 April 2005	25 April 2005
El Ferrol	HMS Albion	26 April 2005	28 April 2005
Barcelona	HMS Chatham	5 May 2005	10 May 2005
Rota	RFA Fort Austin	9 May 2005	16 May 2005
Rota	RFA Fort Austin	18 May 2005	18 May 2005
Rota	HMS Cardiff	28 May 2005	31 May 2005
Vigo	HMS Ocean	28 May 2005	1 June 2005
Rota	HMS Cardiff	9 June 2005	11 June 2005
Rota	HMS Somerset	10 June 2005	14 June 2005
Rota	HMS Cardiff	11 June 2005	12 June 2005
Malaga	HMS Echo	22 June 2005	22 June 2005

International Criminal Court

Mr. Hoyle: To ask the Secretary of State for Defence if he will make a statement on the application of the International Criminal Court Act 2001 to UK service personnel; and what his Department's policy is regarding bringing prosecutions under *(a)* this Act and *(b)* other military and civil law. [5160]

Mr. Ingram: It is an offence under the International Criminal Court Act 2001 to commit genocide, a crime against humanity, or a war crime. This applies to any person subject to UK Service jurisdiction, by any UK national, and by any UK resident. UK criminal courts and courts martial have jurisdiction over service personnel for offences under the Act.

Decisions on the prosecution of persons subject to UK service jurisdiction for any criminal offence are matters for the relevant independent prosecuting authorities.

Iraq

Mr. Robathan: To ask the Secretary of State for Defence how many agency medical staff have been employed in Iraq since 1 June 2004; and at what cost. [4664]

Mr. Ingram *[holding answer 14 June 2005]:* 11 agency medical staff have been employed by the MOD in Iraq since 1 June 2004 through two separate contracts. The total value of these two contracts to the Ministry of Defence since 1 June 2004 is £600,573. This figure includes agency staff that have been employed in other theatres of operation; to further breakdown this figure would breach commercial confidentiality.

Joint Combat Aircraft

Mr. Hancock: To ask the Secretary of State for Defence what the in-service date is for the Joint Combat Aircraft. [3885]

Mr. Ingram: In-service dates for projects are not set until the main investment decision which is made when we have a clear understanding of the risks, contracting arrangements and robust estimates of cost and time. In the case of the Joint Combat Aircraft this will be the manufacture Main Gate decision point. Our internal planning assumptions are based on an ISD of 2014.

Minehunter Submarines

Dr. Julian Lewis: To ask the Secretary of State for Defence what his policy is on the recovery of remote-controlled minehunter submarines in respect of *(a)* retrieval by the Royal Navy and *(b)* salvage payments to civilians who recover such units. [5557]

Mr. Ingram: The policy relating to the recovery of Royal Navy remote controlled mine hunting submersibles is the same as that for any other item of Royal Navy property lost at sea.

A cost/benefit assessment is carried out, covering issues such as public safety, environmental impact, technical probability of successful recovery, security, operational requirements and the cost of replacing the item. Depending on the outcome of this assessment, a salvage operation may be undertaken.

Salvage payments to civilians, other than those employed by the Ministry of Defence, who recover such items are generally dealt with in accordance with the guidelines set out in the London Salvage Convention 1989.

Dr. Julian Lewis: To ask the Secretary of State for Defence how many remote-controlled minehunter submarines have been lost by the Royal Navy in each year since 1997; and what the cost has been. [5558]

Mr. Ingram: This information is not held centrally. However, records indicate that since 1997, remote-control mine disposal systems have been used on over 9,500 occasions by the Royal Navy. During this time, five systems have been reported as lost in the course of operations: one in 1998, one in 2003, one in 2004 and a further two in 2005. Two were permanently lost with replacement costs totalling some £778,000. Salvage payments for recovered units over the period amount to just over £50,000.

Ministerial Meetings

Mr. Hoyle: To ask the Secretary of State for Defence how many hon. Members have requested meetings with him since his appointment; and if he will list those he has met. [6615]

John Reid: Together with my ministerial colleagues, I have met many right hon. and hon. Members in the course of my duties as Secretary of State for Defence.

Naval Contingency Plans

Mr. Hancock: To ask the Secretary of State for Defence what his contingency provisions are for each class of naval ship, in the event that any are unexpectedly put out of commission and need replacing; and if he will make a statement. [6012]

Mr. Ingram: No provision is made specifically for ship loss. In such an event, the requirement for a replacement ship would be considered alongside competing priorities for resources.

Newquay Airport

Mr. Rogerson: To ask the Secretary of State for Defence if he will arrange a meeting with the hon. Member for North Cornwall and ministerial colleagues from the Department for Transport to discuss the future of Newquay Airport. [6217]

Mr. Ingram *[holding answer 21 June 2005]:* I will write to the hon. Gentleman.

North Atlantic Council

Mr. Ancram: To ask the Secretary of State for Defence what discussions he has had with his EU counterparts following the meeting of the North Atlantic Council on 24 May; and if he will make a statement. [5906]

John Reid: I met many of my EU counterparts at the NATO ministerial meeting on 9–10 June, which discussed Darfur among other matters. In addition I have had general discussions with a number of my EU colleagues in recent weeks, including about Darfur.

Personnel and Training Command

Mr. Gerald Howarth: To ask the Secretary of State for Defence what arrangements will be made for other service units located at RAF Innsworth following the relocation of Personnel and Training Command to RAF High Wycombe. [6218]

Mr. Ingram: The RAF Innsworth site is home to an element of the Armed Forces Personnel Administrative Agency (AFPAA). AFPAA is conducting a separate investment appraisal into the options for their relocation from Innsworth. The result of this will not be known until at least the end of this year.

Mr. Gerald Howarth: To ask the Secretary of State for Defence what assessment has been made of the ability of RAF High Wycombe to accommodate Personnel and Training Command staff; and what estimate has been made of the cost of changes needed to accommodate those personnel. [6244]

Mr. Ingram: A comprehensive study and investment appraisal has been carried out to assess the efficiencies and effectiveness of collocation which included the provision of office accommodation. The cost of changes required to working accommodation has been estimated at £2.6 million.

Race Relations (Amendment) Act

Keith Vaz: To ask the Secretary of State for Defence how many and what percentage of staff in his Department have received training on the general and specific duties of the Race Relations (Amendment) Act 2000, broken down by *(a)* ethnicity and *(b)* grade. [3543]

Mr. Touhig: It is mandatory for all staff (both civilian and service) to attend Equality and Diversity training when they join the department and at regular intervals while in the department. The content of this training reflects the terms of the Race Relations (Amendment) Act 2000. Details are shown in the department's Race Equality Scheme annual publications at: http://www.mod.uk/issues/racial_equality/index.html

5,430 civilian staff attended the equality and diversity, equality and diversity for new managers and refresher training courses during the year 2004–05. The following tables show the breakdown by grade and ethnicity.

Table 1: Number of civilians attending equality and diversity training in 2004–05 by ethnicity

	Number of individuals	*Percentage of total*
Ethnic minorities	150	7.7
White	4,070	6.1
Not known	1,210	5.0
Total	5,430	6.6

Notes:
1. Numbers are rounded individually and rounded totals may not be the sum of rounded values.
2. The percentage is of the average strength in that category during the year 2004–05.
3. Civilians from Trading Funds have been excluded from this table.

Table 2: Number of civilians attending equality and diversity training in 2004–05 by equivalent grade

	Number of individuals	*Percentage of total*
SCS or equivalent	20	6.2
Band B or equivalent	130	4.8
Band C or equivalent	1,270	7.3
Band D or equivalent	1,390	9.5
Band E or equivalent	2,010	6.6
Other non industrials	20	4.1
Skill zones or equivalent	600	3.8
Total	5,430	6.6

Notes:
1. Numbers are rounded individually and rounded totals may not be the sum of rounded values.
2. The percentage of total is of the average strength in that category during the year 2004–05.
3. Civilians from Trading Funds have been excluded from this table. Figures for Service personnel are not held centrally and cannot be collated without incurring disproportionate cost.

RAF Innsworth

Mr. Gerald Howarth: To ask the Secretary of State for Defence what his plans are for the site at RAF Innsworth. [6245]

Mr. Ingram: As part of the estate rationalisation work, Defence Estates will carefully examine any opportunities for alternative defence or public use of the Innsworth site. Unless an alternative defence use can be found, it is envisaged that the Innsworth site will close by the end of 2008 and be offered by Defence Estates for disposal.

Mr. Gerald Howarth: To ask the Secretary of State for Defence what service units *(a)* are and *(b)* are planned to be co-located at RAF Innsworth. [6250]

Mr. Ingram: Together with RAF Innsworth, HQ Personnel and Training Command and an element of the Armed Forces Personnel Administrative Agency are located on the RAF Innsworth site. There are no plans for any other units to be collocated at RAF Innsworth.

Royal Fleet Auxiliary

Mr. Keetch: To ask the Secretary of State for Defence what the budget is for the Royal Fleet Auxiliary for 2005–06, broken down by *(a)* cost of running vessels at sea, *(b)* land based administration, *(c)* maintenance of ships and *(d)* other expenses; and if he will make a statement. [6168]

Mr. Ingram: CINC FLEET does not manage costs on the basis of platform types but on functions. The RFA does not therefore have a distinct, identifiable budget. However, the following indicative figures were used for planning purposes for the costs to FLEET and the DLO for 2005–06.

	£ million
(a) Cost of Running Vessels at Sea	
FLEET	
Direct Costs	134
Indirect Costs (Depreciation and cost of capital)	108
(b) Land Based Administration	
FLEET	9
DLO	4
(c) Maintenance of Ships	
DLO	60
(d) Other Expenses	
FLEET	
RFA Cadet Nautical School Training	1

Taxis

David T.C. Davies: To ask the Secretary of State for Defence how much the Department has spent on taxis in each of the last five years. [6498]

Mr. Touhig: This information is not held centrally and could be provided only at disproportionate cost.

Territorial Army

Mr. Ancram: To ask the Secretary of State for Defence when he will announce the changes to the Territorial Army under the future army structure. [6304]

Mr. Ingram: The future Territorial Army (TA) structure will ensure a more relevant, efficient and usable operational capability. There will be some adjustments to its capabilities to meet new requirements and ensure that it best supports the Regular Army on operations. These changes will provide TA manpower for new specialist areas, such as Intelligence, Engineers, Military Provost staff and Attack Helicopter support teams. The final structure is in the process of being worked through, in close consultation with the reserves community, and will be confirmed by the end of the year.

Uglow Farm, Edgworth

Janet Anderson: To ask the Secretary of State for Defence whether his review of the proposed development at Uglow Farm, Edgworth, is complete. [5946]

Mr. Touhig: Yes. Following a joint review of the case by the Ministry of Defence and BAE Systems Warton, the objection to the proposed wind turbines at Uglow Farm has been lifted.

Blackburn and Darwen borough council and the developer have been informed.

FOREIGN AND COMMONWEALTH OFFICE

Colonel Hamid Pourmand

Mr. David Jones: To ask the Secretary of State for Foreign and Commonwealth Affairs what representations the Government are making to the Government of Iran on the trial on charges of apostasy of Colonel Hamid Pourmand. [6015]

Dr. Howells: We have pressed the Iranian authorities many times over Mr. Pourmand's detention, and called for his immediate release. European Union representatives raised his case most recently on 20 April, at our request. I understand that Mr. Pourmand continues to serve a three-year prison sentence for allegedly failing to inform his employers of his faith. Mr. Pourmand was acquitted of additional charges of apostasy on 28 May. According to press reports, the judge noted that he had received a large number of calls for these charges against Mr. Pourmand to be dropped. I will continue to follow his situation closely.

Departmental Relocation

Mr. Gale: To ask the Secretary of State for Foreign and Commonwealth Affairs how many of his Department's posts *(a)* have been relocated and *(b)* are under consideration for relocation from London to the deprived areas of the south-east. [6256]

Mr. Straw: My Department is implementing the Lyons Review recommendations to relocate 450 jobs out of London, to Hanslope Park, Buckinghamshire, by 2010. This will not exclude consideration of relocating other posts to relatively deprived areas in the south-east and other parts of the UK. So far, my department has not identified any post suitable for transfer to deprived areas in the south-east.

Diplomatic Cars

Mr. Hoyle: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will list the makes of car used by *(a)* governors, *(b)* ambassadors and *(c)* consuls; and what his policy is on using UK-built cars. [6330]

Mr. Straw: Procurement of vehicles for the Foreign and Commonwealth Office (FCO) is based on achieving value for money, normally by competition and in a manner which conforms with appropriate UK regulations and EU directives. Within that approach, we prefer British missions abroad to buy British cars, where they are readily available and represent value for money.

The FCO has negotiated framework contracts with Jaguar, Land Rover and MG Rover. Currently 88 per cent. of our flag vehicles are built in the UK. A detailed listing of vehicles against the categories is shown in the following table.

	Embassies/ High commissions	*Consuls general*	*Governors*	*Total*
Land Rover	60	12	2	74
Toyota	6	2	1	9
Rover	10	6	1	17
Jaguar	48	23	—	71
BMW	3	4	—	7
Volvo	2	1	—	3
Mercedes	2	—	—	2
Rolls Royce	2	—	—	2
Chrysler	—	1	—	1
Cadillac	—	1	—	1

Jerusalem (Homes' Demolition)

Richard Burden: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make representations to the Government of Israel on the proposed demolition of homes in the el-Bustan area of Silwan Village in East Jerusalem; and if he will make a statement. [6174]

Dr. Howells: We were disturbed to hear of plans by Israel to demolish 88 homes in Silwan in East Jerusalem. We raised our concerns with the Israeli authorities. We are encouraged to hear that there is now no intention to issue orders to demolish these homes.

Taliban

Mr. Martyn Jones: To ask the Secretary of State for Foreign and Commonwealth Affairs what estimate he has made of the numeric strength of the Taliban in *(a)* Afghanistan and *(b)* Pakistan. [6789]

Dr. Howells: It is not easy to distinguish former Taliban and their sympathisers from other groups hostile to the current political process in Afghanistan. We believe that at any given time the number of former Taliban actively involved in insurgency in Afghanistan and Pakistan is in the very low thousands. But the remoteness and geography of the Pakistani border region with Afghanistan, the difficulty of maintaining border controls, and the movement of people across the border, makes it difficult to give an accurate assessment.

HOME OFFICE

Assault

Mr. Baron: To ask the Secretary of State for the Home Department what research he has *(a)* commissioned and *(b)* evaluated on the effect of the existence of aggravating factors in an assault on the willingness of the prosecuting agency to prosecute. [5163]

Paul Goggins *[holding answer 20 June 2005]:* The Government have not conducted any research into the effects of aggravating factors in assaults on the willingness of prosecuting agencies to prosecute.

Asylum Accommodation Centres

Tony Baldry: To ask the Secretary of State for the Home Department what the cost was of *(a)* investigating the suitability of and *(b)* the planning process, including the cost of any public inquiries or

litigation when relevant, in respect of each site that Government consider for accommodation centres for asylum seekers. [5813]

Mr. McNulty: The information is not available in the form requested. It could be provided only at disproportionate cost.

Automatic Number Plate Recognition

Tom Brake: To ask the Secretary of State for the Home Department how many automatic number plate recognition readers are *(a)* in place and *(b)* planned, broken down by police authority. [3958]

Paul Goggins: The total number of current, and planned, automatic number plate recognition (ANPR) readers is not collated by the Home Office and is a matter for individual police forces and their partners.

Drugs Offences (London)

Sarah Teather: To ask the Secretary of State for the Home Department how many people were charged with possession of *(a)* class A, *(b)* class B and *(c)* class C drugs in each London borough in each of the last five years. [5272]

Paul Goggins: The information on charging for these offences is not centrally available.

EU Presidency

Kate Hoey: To ask the Secretary of State for the Home Department what communication activities are planned in relation to the policy areas covered by his Department during the UK presidency of the EU; and what budget has been allocated for these activities. [1645]

Andy Burnham: External communications activity for the UK presidency of the EU is being coordinated centrally by the Foreign and Commonwealth Office. Within the Home Office external communications activity has been provided for by existing budgets for EU work and no additional budget agreed. External communications work for the presidency will include media handling around JHA councils, the JHA informal, smaller Home Office presidency seminars and events on themes such as resettlement, new detection technology, e-borders and the safe use of the internet, and joint seminars with other agencies. The Home Office and the Department for Constitutional Affairs will join together to make a short video outlining justice and home affairs presidency priorities.

Immigration and Nationality Directorate

Sarah Teather: To ask the Secretary of State for the Home Department how many referrals of *(a)* immigration, *(b)* asylum and *(c)* naturalisation cases to the immigration and nationality directorate by hon. Members there have been in each year since 2001, broken down by constituency. [2522]

Mr. McNulty: During the period 1 January 2001 to 31 December 2004 the immigration and nationality directorate (IND) received 109,331 letters from Members of Parliament about case-related asylum, immigration and nationality matters. These included both letters sent for ministerial reply and those to which replies were sent by officials. The breakdown by constituency is given in a table which has been placed in the Library.

Managed Migration Directorate

Mr. Lidington: To ask the Secretary of State for the Home Department pursuant to the letter of 28 April to the hon. Member for Aylesbury from NCC5 of the managed migration directorate, whether case S1081532 has now been allocated to a caseworker; and when he expects the applicant to be notified of the decision. [4257]

Mr. McNulty: This case is under consideration in the immigration and nationality directorate (IND). The circumstances of the case are not straightforward and it is likely to be some weeks before a decision can be made.

Micro Bikes

Alison Seabeck: To ask the Secretary of State for the Home Department (1) how many incidences of "micro" or "pocket" bikes being ridden illegally on-road there have been in each year since 2002; and how many of those incidences related to underage riders; [3886]

(2) how many successful prosecutions for the illegal riding of "pocket" or "micro" bikes there have been in each year since 2002, broken down by region. [3887]

Paul Goggins: It is not possible to identify those offences relating to the use of "pocket" or "micro" bikes from the data collected on the Home Office court proceedings database or by recorded crime.

Olufemi Ojemuyiwa

Mr. Laurence Robertson: To ask the Secretary of State for the Home Department if he will make a statement on the progress of the application by Olufemi Ojemuyiwa, reference A1194808, for indefinite leave to stay in the United Kingdom. [6147]

Mr. McNulty *[holding answer 21 June 2005]:* It is our usual practice only to disclose information about an individual's immigration case to his or her constituency MP.

Shooting

Mr. Swire: To ask the Secretary of State for the Home Department how many fatalities were caused as a result of the shooting of foxes and ground game at night in each of the past five years. [6053]

Paul Goggins: The information requested is not collected centrally.

Voluntary/Community Activity

Mr. Paul Goodman: To ask the Secretary of State for the Home Department what progress has been made towards the public service agreement target of increasing voluntary and community activity, including increased community participation, by 5 per cent. by 2006. [3224]

Paul Goggins: Voluntary and community sector organisations have a crucial role to play in the reinvigoration of civic life and it is important that people are given more opportunities and support to become

actively involved in their communities. Performance against the Home Department's targets is published in the annual report and the autumn performance report available at the House Library and on the Home Office website (www.homeoffice.gov.uk). The Home Office annual report for 2004–05 with the latest performance information was published on 20 June 2005.

NORTHERN IRELAND

Addiction

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland what funding has been provided for addiction *(a)* treatment and *(b)* rehabilitation in the Province in each of the last 10 years. [5333]

Mr. Woodward: The information requested on funding for drug and alcohol treatment and rehabilitation is not available centrally.

In relation to rehabilitation, this is an integral part of all drug and alcohol treatment whether community or inpatient based. The cost of this generic rehabilitation cannot be disaggregated from the total costs of such programmes. The majority of drug rehabilitation can and does take place in the community as part of an overall community care and rehabilitation programme and provision exists within each board area to refer individuals to residential rehabilitation centres outside Northern Ireland if deemed to be clinically appropriate.

I will write to the hon. Lady with the information as soon as it is received from health and social services boards.

Education and Library Board Services

Lady Hermon: To ask the Secretary of State for Northern Ireland if he will provide additional funding to the South Eastern Education and Library Board to enable it to reverse its recent announcement of cuts to school crossing patrol services within its catchment area. [3488]

Angela E. Smith: Further to my answer about the change in funding for Education and Library Board services for 2005–06 of 20 June 2005, *Official Report*, column 848W, I can also advise that boards have significant flexibility in deciding how to use resources allocated to them and, therefore, the decision to reduce the number of crossing patrols in the South Eastern Board is an operational matter for the Board.

I am assured by the Board that school crossing patrols have only been removed in a small number of areas, and that, in all cases, the Board is satisfied that removal of the service does not jeopardise the safety of children.

Freedom of Information Act

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland how many *(a)* Department of Health, Social Services and Public Safety and *(b)* NHS personnel in the Province have been employed on processing requests under the Freedom of Information Act 2000 since 1 January 2005. [5329]

Mr. Woodward: In *(a)* the Department of Health, Social Services and Public Safety 32 staff, and in *(b)* Health and Personnel Social Services bodies 214 staff, have been involved in processing requests under the Freedom of Information Act 2000 since 1 January 2005. Information is not available on the precise amount of time spent on processing freedom of information requests but it represents only a small proportion of the total working time of the staff involved.

Internet

Lady Hermon: To ask the Secretary of State for Northern Ireland what percentage of *(a)* primary and *(b)* secondary schools in each Education and Library Board area in Northern Ireland have access to the internet. [5517]

Angela E. Smith: The percentage of schools with internet access is as follows:

Percentage

Education and Library Board	*Primary*	*Secondary*
Belfast	96.9	100
Western	99.5	100
North-Eastern	99.5	100
South-Eastern	99.4	100
Southern	100	100

NHS Staff (Attacks)

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland what progress has been made in meeting targets for reducing attacks on NHS staff in Northern Ireland; and if he will make a statement. [6678]

Mr. Woodward: There are no specific targets set for reducing attacks on Health and Personal Social Services (HPSS) staff. HPSS employers have been instructed to take measures to minimise the risk of violent attacks against staff. Figures reported for the six months from October 2004 to March 2005 indicate a reduction in the number of reported incidents; 149 fewer than in the previous six months. This indicates that the steps taken by HPSS employers are having a positive effect.

Nurse Recruitment

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland what progress is being made in re-recruiting former nurses to the NHS in Northern Ireland. [5511]

Mr. Woodward: The recruitment of staff, including nurses, is a matter for individual Health and Social Services Trusts taking into account factors such as service needs and available resources. The Department however support former nurses, who have not practised for five years or more, to return to work by funding "Return to Practice" programmes.

Parades

Lady Hermon: To ask the Secretary of State for Northern Ireland when he expects to be in a position to report on whether parades which *(a)* took place and *(b)* will take place on the basis of technically incorrect uncompleted 11/1 forms are legal. [5961]

Mr. Woodward: The decision on whether any particular 11/1 form does not meet the requirements of Section 6 of the Public Processions (Northern Ireland) Act 1998, and that therefore those involved in organising and participating in that parade have committed an offence and should be prosecuted, is one for the Public Prosecutions Service, following consideration of the findings of a police investigation into any potential offences.

The Parades Commission has said that it is determined to do its part to minimise contention and therefore to use as much flexibility as the legislation allows to ensure that the parading season passes off peaceably. To that end the Commission will whenever possible make determinations on those few contentious parades where it is involved.

Porphyria

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland how many individuals in the Province suffer from each of the forms of porphyria. [5353]

Mr. Woodward: Information on the number of individuals in the Province suffering from each form of porphyria is not available centrally.

Information is available on the number of sufferers admitted to hospital. According to the hospital inpatients system, 12 sufferers were admitted to hospital in 2003–04. Seven were diagnosed with "Torphyria cutanea tarda" and four were diagnosed with "other porphyria". One person was diagnosed with both of these conditions.

Pupil Suspensions

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland how many pupils were suspended from *(a)* primary and *(b)* secondary schools for (i) bullying, (ii) violence towards teaching staff and (iii) carrying offensive weapons in each of the last three years, broken down by Board area. [6572]

Angela E. Smith: The reasons for suspension were first collected in 2002–03 school year and relate to the number of individual suspensions not the number of pupils suspended. The reason for a suspension is categorised by a school into one of 10 possibilities and these do not include carrying an offensive weapon.

The information on relevant individual suspensions for 2002–03 school year is as follows:

	Bullying of a pupil		*Physical attack on staff*		*Verbal abuse of staff*	
Board area	*Primary*	*Post primary*	*Primary*	*Post primary*	*Primary*	*Post primary*
BELB	4	47	18	52	23	353
WELB	1	43	16	71	13	350
NEELB	12	52	30	60	25	418
SEELB	1	55	10	43	10	350
SELB	1	60	4	29	8	426

The detailed suspension data for 2003–04 submitted by the Southern Education and Library Board (SELB) has still to be fully analysed. When this has been done in the near future, I will write to the hon. Member and provide the SELB statistics. The four-board information for 2003–04 school year is as follows:

	Bullying of a pupil		*Physical attack on staff*		*Verbal abuse of staff*	
Board area	*Primary*	*Post primary*	*Primary*	*Post primary*	*Primary*	*Post primary*
BELB	9	55	21	36	28	427
WELB	6	58	20	40	27	453
NEELB	14	68	13	35	15	499
SEELB	0	44	4	54	8	323
SELB	Not available	Not available	Not available	Not available	Not available	Not available

Regional Cancer Centre

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland if he will make a statement on progress on the regional cancer centre becoming fully operational. [5332]

Mr. Woodward: The cancer centre construction programme is on schedule for completion by 31 December 2005. The official handover of the building and installed equipment to the Belfast City Hospital Trust is planned for the beginning of January 2006. It is proposed that the transfer of all patients, staff and services will take place in March 2006.

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland if he will make a statement on progress in securing staff to work in the Province's new regional cancer centre. [5341]

Mr. Woodward: The Department has made available additional revenue resources through the health boards over the last few years to enable the Belfast City Hospital Trust to build up the staff complement in preparation for the opening of the cancer centre. The trust has not experienced any difficulties filling these posts.

TRADE AND INDUSTRY

Loan Sharks

9. **David Taylor:** To ask the Secretary of State for Trade and Industry (1) what action he is taking to protect vulnerable people from loan sharks; [6523]

11. **Mr. Bailey:** To ask the Secretary of State for Trade and Industry (2) what steps he is taking to protect vulnerable people from loan sharks. [6526]

Mr. Sutcliffe: We are funding pilot projects in Birmingham and Glasgow to tackle loan sharks. This will enable Trading Standards to investigate and prosecute illegal lenders in these areas. It will also help gain a clearer understanding of the scope, extent and impact of illegal money lending. The project is already showing results with prosecutions in progress in both areas.

Gas Supplies

10. **Mr. Laurence Robertson:** To ask the Secretary of State for Trade and Industry what assessment he has made of the UK's future gas needs. [6525]

Malcolm Wicks: My right hon. Friend the Secretary of State will make a report on security of supply to Parliament in July. This will include an assessment of the UK's future gas needs, updating the information given in the most recent report of the Joint Energy Security of Supply Group, published in November of last year.

Coal Mining

12. **Paddy Tipping:** To ask the Secretary of State for Trade and Industry what financial support he made available for the deep coal mine industry in 2004–05; and how much such support he has made available in the 2005–06 financial year. [6527]

Malcolm Wicks: Some £21.4 million of Coal Investment Aid was paid to UK deep mines in 2004–05.

A further £35.7 million remains available, of which we expect to pay claims of about £24 million in 2005–06.

Nuclear Power

13. **Sir Paul Beresford:** To ask the Secretary of State for Trade and Industry if he will make a statement on the future of nuclear power in the UK. [6528]

Malcolm Wicks: I refer the hon. Member to the reply given by my right Hon. Friend the Secretary of State so moments ago to the hon. Members for Hexham and Tomes.

Windfarms

14. **Linda Gilroy:** To ask the Secretary of State for Trade and Industry what steps he is taking to support new and emerging renewable technologies other than onshore windfarms. [6529]

Malcolm Wicks: The Government are providing just over £500 million of support between 2002–08 to help develop emerging renewable and low carbon technologies. This will take the form of spending on R and D and funding for capital grants. Onshore wind is not eligible for capital grants, except in the case of small community schemes supported under Clear Skies.

Funding includes grants of £117 million for offshore wind, over £60 million for energy crops and biomass, £31 million for PV, £12.5 million for community schemes and as announced last year, £50 million for the setting up of a Marine Renewables Deployment Fund.

On 14 June, I announced a £40 million—four year funding package to support demonstrations of carbon abatement technologies (£25 million) and hydrogen and fuel cell technologies (£15 million).

Total public expenditure on research and development for renewable energy sources for 2003–04 was estimated at over £29 million.

15. **Miss McIntosh:** To ask the Secretary of State for Trade and Industry what recent representations he has received on the *(a)* benefits and *(b)* disadvantages of wind farms as a renewable energy source; and if he will make a statement. [6530]

Malcolm Wicks: The Department receives a great many representations regarding wind farms setting out both the advantages and disadvantages of specific wind farm projects.

Equal Opportunities Commission

16. **Philip Davies:** To ask the Secretary of State for Trade and Industry how many claims of *(a)* racial discrimination, *(b)* sexual discrimination, *(c)* disability discrimination and *(d)* multiple discrimination have been made by staff of the Equal Opportunities Commission against the commission in each of the last 10 years. [6531]

Meg Munn: The EOC have had three claims for sex discrimination brought against them by staff in the past 10 years. These have been in 1998, 2000 and 2001. No other claims have been made.

Renewable Energy

17. **Lynne Jones:** To ask the Secretary of State for Trade and Industry what assessment he has made of the potential for job creation from the steps the Government is taking to promote renewable energy. [6532]

Malcolm Wicks: The DTI's Renewables 2010 Target Team conducted a detailed survey of job opportunities in the renewable energy sector in 2003. The Renewables Supply Chain Gap Analysis estimated that up to 8,000 people are currently employed in this industry, with the potential for this to rise to around 35,000 over the longer term.

Hotelware Exports

18. **Joan Walley:** To ask the Secretary of State for Trade and Industry what discussions he has had with the World Trade Organisation on reducing tariffs on exports of hotelware to the USA. [6533]

Ian Pearson: US tariffs on imports of hotelware will be addressed in the negotiations on market access for non-agricultural products currently taking place at the World Trade Organisation as part of Doha

Development Agenda. In these talks the EU maintains regular contact with other WTO members including the US.

Manufacturing Support

19. **Dr. Blackman-Woods:** To ask the Secretary of State for Trade and Industry what support the Government is making available for manufacturing industry in *(a)* the City of Durham and *(b)* England. [6534]

Alun Michael: Since the Manufacturing Strategy was implemented in 2002 the Government has made available a wide range of support to improve the performance of manufacturing industry.

(a) Businesses in the City of Durham are eligible to apply for a range of Department of Trade and Industry assistance schemes including Selective Finance for Investment and Grant for Research and Development. The Regional Development Agency, One NorthEast is funding several initiatives, including new business parks, which will provide modern facilities for new and manufacturing businesses. In addition The North East Productivity Alliance (NEPA) has successfully assisted a number of individuals and companies to enhance engineering expertise leading to significant productivity improvements.

(b) In England we have set up a Manufacturing Advisory Service in every region and supported the establishment of 14 Industry Forum organisations. We have doubled support for science and innovation so that businesses may draw on the strong UK science base for commercial advantage and have simplified business support into four themes reflecting the areas in which companies are most likely to need help: innovation, best practice, raising finance and regional investment.

Average Pay

Mr. Sanders: To ask the Secretary of State for Trade and Industry what estimate he has made of average full-time workers' pay in the South West Region in the latest year for which figures are available, broken down by *(a)* local authority area and *(b)* parliamentary constituency. [2838]

John Healey: The information requested falls within the responsibility of the National Statistician, who has been asked to reply.

Letter from Len Cook to Mr. Adrian Sanders, dated 21 June 2005:

As National Statistician I have been asked to reply to your recent Parliamentary Question concerning average full time workers' pay in the South West region in the last year for which figures are available: broken down by *(a)* Local Authority area and *(b)* Parliamentary Constituency. I am replying in his absence. (2838)

Average earnings are estimated from the Annual Survey of Hours and Earnings and are provided for employees on adult rates of pay whose pay was unaffected by absence during the pay period, by their place of work. This is the standard definition used for Annual Survey of Hours and Earning tables. The Annual Survey of Hours and Earnings does not collect data on the self employed and people who do unpaid work.

I am placing in the House of Commons Library, tables showing the average gross weekly earnings for full time employees in the South West region broken down by Local Authority and Parliamentary Constituency. This data is also available on the National Statistics website on tables 7 and 9 respectively: http://www.statistics.gov.uk/statbase/Product.asp?vlnk=13290&More=n

The ASHE, carried out in April of each year, is the most comprehensive source of earnings information in the United Kingdom. It has a one per cent sample of all employees.

The Annual Survey of Hours and Earnings publication criteria ensure that all estimates are undisclosive. A number of estimates have been removed from the published tables for these reasons.

Table 1: Mean and median weekly pay, including overtime, for full-time employees in the South West Government Office Region, 2004

		Weekly pay including overtime				
	Jobs (thousand)	CV (percentage)[1]	Median	CV (percentage)[1]	Mean	CV (percentage)[1]
South West	1,332	[2]1.2	393.0	[2]1.0	462.7	[2]0.8

Table 2: Mean and median weekly pay, including overtime, for full-time employees in South West Parliamentary Constituencies, 2004

		Weekly pay including overtime				
	Jobs (thousand)	CV (percentage)[1]	Median	CV (percentage)[1]	Mean	CV (percentage)[1]
Bath	40	[2]7.2	416.5	[2]6.8	476.8	[2]4.3
Bournemouth East	14	[2]12.1	293.8	[2]10.0	377.5	[2]7.2
Bournemouth West	26	[2]8.8	334.3	[2]7.5	416.3	[2]5.7
Bridgwater	21	[2]9.7	358.5	[2]8.9	446.0	[2]6.9
Bristol East	58	[2]6.0	429.5	[2]5.7	508.8	[2]3.2
Bristol North West	49	[2]6.3	500.1	[2]4.8	561.2	[2]3.4
Bristol South	20	[2]10.3	383.7	[2]10.0	425.7	[2]4.8

[1] Coefficient of Variation—measure of the deviation of a variable from its mean.
[2] Key to quality:
CV < = 5 per cent.
CV > 5 per cent. and < = 10 per cent.
CV > 10 per cent. and < = 20 per cent.
[3] = not applicable
[4] = unreliable
. = unavailable
.. = disclosive
- = nil or negligible
Notes:
(a) The Annual Survey of Hours and Earnings, (ASHE), carried out in April of each year, is the most comprehensive source of earnings information in the United Kingdom. It is a 1 per cent. sample of all employees.
(b) The ASHE replaces the New Earnings Survey (NES) from October 2004. The main difference between the ASHE and NES being that estimates are weighted to population totals from the Labour Force Survey.
(c) Average gross weekly earnings for Adult Full-Time Employees whose pay for the survey period was not affected by absence.
Source:
Annual Survey of Hours and Earnings, ONS

The tables provide means and medians for full-time employees in the South West, South West local authorities and South West parliamentary constituencies.

Coal Health Claims

John Mann: To ask the Secretary of State for Trade and Industry what representations he has made to the Coal Authority about its website directing coal health claimants to the Union of Democratic Mineworkers. [2519]

Malcolm Wicks *[holding answer 8 June 2005]:* The Department were unaware that the Coal Authority website directed former miners to the UDM. We have now asked the Authority to change the site, directing claimants to contact their legal representative, if they already have a claim submitted, and, if they have not already submitted a claim, to contact a local solicitor, their former union or their local citizens' advice bureau for specific advice on their eligibility to claim.

John Mann: To ask the Secretary of State for Trade and Industry how much has been paid in total to solicitors for unsuccessful claims under the chronic obstructive pulmonary disease and vibration white finger miners' compensation scheme. [6106]

Malcolm Wicks: Solicitors costs have only been paid in relation to claims in which compensation has been paid to the claimant.

John Mann: To ask the Secretary of State for Trade and Industry what action his Department have taken as a consequence of receiving information about Indiclaim Ltd. and Walker and Co. Claims Management. [6109]

Malcolm Wicks: The Department is aware of concerns relating to the two companies. However, we cannot comment on ongoing [illegible]

Corporate Social [illegible]bility

Mr. Arbuthnot: To ask the Secretary of State for Trade and Industry how much his Department has spent on corporate social responsibility initiatives since January 2003; and if he will make a statement. [6233]

Malcolm Wicks: DTI spend on Corporate Social Responsibility for relevant financial years is as follows:

	£
2003–04	330,000
2004–05	369,000
2005–06	[1]91,000

[1] To date.

Mr. Arbuthnot: To ask the Secretary of State for Trade and Industry what definition of corporate social responsibility his Department uses; and if he will make a statement. [6241]

Malcolm Wicks: The Government's website on Corporate Social Responsibility—www.csr.gov.uk—sets out the definition which we use for CSR which is about how business takes account of its economic, social and environmental impacts in the way it operates.

Departmental Name

Mr. Prisk: To ask the Secretary of State for Trade and Industry which external organisations were involved in the proposal to change the name of his Department. [1086]

Alan Johnson: None.

Departmental Payment Performance

Dr. Cable: To ask the Secretary of State for Trade and Industry what the overall payment performance was of each Government Department in the last three years for which figures are available; and if he will make a statement. [6017]

Alan Johnson: The overall payment performance of Government Departments has increased over the last three years for which figures are available, from 95.86 per cent. in 2000–01 to 96.68 per cent. in 2003–04, as the following table illustrates. Figures for 2004–05 have not yet been published.

The Government takes this issue very seriously, and is committed to improving the payment culture in the UK, in order to create fair and stable business transactions. The Government's own payment performance is an important element in this policy.

Departmental Relocation

Mr. Gale: To ask the Secretary of State for Trade and Industry how many of his Department's posts *(a)* have been relocated and *(b)* are under consideration for relocation from London to the deprived areas of the South East. [6267]

Alan Johnson: None of the Department's posts have been relocated from London to deprived areas of the South East in the recent past and there are no such posts under consideration for such relocation at the present time.

Domestic Energy Costs

Mr. Love: To ask the Secretary of State for Trade and Industry what assessment he has made of the relative external costs per kWh consumed by domestic use of *(a)* coal, *(b)* oil, *(c)* gas, *(d)* electricity and *(e)* liquified petroleum gas. [6112]

Malcolm Wicks: Figures on the cost per kWh of the above fuels are either available from the DTI or from Salkent's Comparative Heating Costs publication. The prices, sources and time period they correspond to are given in the following table.

	Price (p/kWh)	*Time period data refers to*	*Source*
a. Coal	15.6	May 2005	DTI estimates based on Salkent data
b. Heating oil	22.2	May 2005	DTI estimates based on Salkent data

	Price (p/kWh)	Time period data refers to	Source
c. Gas	1.7	January 2005	DTI
d. Electricity	7.4	January 2005	DTI
e. LPG	33.3	May 2005	DTI estimates based on Salkent data

[1] DTI data for April 2005 will be published in the June edition of Quarterly Energy Prices, due out on 30 June 2005.
[2] The base Salkent data is contained in their Comparative Heating Costs publication, May 2005 edition and corresponds to May 2005. The Comparative Heating Costs have been published since 1976 and are widely used as a guide to the running cost of space and water heating using alternative fuels at current prices.

ECGD

Mr. Arbuthnot: To ask the Secretary of State for Trade and Industry pursuant to the Answer of 13 June 2005, *Official Report*, column 79W, on Export Credits Guarantee Department, when he expects to reach a settlement with the plaintiffs. [6183]

Ian Pearson *[holding answer 21 June 2005]*: Given that the parties are at the early stages of the detailed costs assessment process, ECGD is not currently in a position to forecast with certainty when settlement is likely to be reached.

Mr. Arbuthnot: To ask the Secretary of State for Trade and Industry pursuant to the Answer of 13 June 2005, *Official Report*, column 78W, on Export Credits Guarantee Department, when he expects the ECGD Pilot Trading Fund to be undertaken. [6184]

Ian Pearson *[holding answer 21 June 2005]*: ECGD will undertake a process of continual review of the operation of the pilot trading fund. This will feed into my right hon. Friend the Secretary of State's consideration and a final decision is expected in the second year of the pilot period, towards the end of 2006 or early 2007.

European Space Policy

Mr. Redwood: To ask the Secretary of State for Trade and Industry what measures have been agreed in June 2005 to develop a European Space Policy. [5212]

Malcolm Wicks: The European Space Policy (ESP) is being developed jointly by the EU and the European Space Agency (ESA) as the framework for managing space activities. The legal basis is Article 8 of the EC—ESA Framework Agreement. On 7 June the second of three EU/ESA Ministerial Space Councils approved an Orientations Paper on priorities. The UK Government has instilled a user/applications focus in it. Funding decisions will follow from the normal EU and ESA budgetary processes.

Gas Turbines

Mr. Jenkin: To ask the Secretary of State for Trade and Industry what capacity of combined cycle gas turbines has been contracted for the period 2004–05 to 2010–11; and what percentage he estimates will be commissioned by 2012. [4963]

Malcolm Wicks: Details of contracted generation, under various scenarios, can be found in National Grid's 2005 Seven Year Statement, and in particular Tables 5.1, 5.2 and 5.3, depending on the scenario utilised: http://www.nationalgrid.com/uk/library/documents/sys05/default.asp?action=mnch5_2.htm&Node=SYS&Snode=5_2&Exp=Y#Plant_Margins_On_Different_Generation_Backgrounds

Loan Sharks

Mr. Love: To ask the Secretary of State for Trade and Industry what steps he is taking to protect vulnerable people from loan sharks. [6524]

Mr. Sutcliffe: We are funding pilot projects in Birmingham and Glasgow to tackle loan sharks. This will enable Trading Standards to investigate and prosecute illegal lenders in these areas. It will also help gain a clearer understanding of the scope, extent and impact of illegal money lending. The project is already showing results with prosecutions in progress in both areas.

Miners' Compensation

John Mann: To ask the Secretary of State for Trade and Industry how many cases have been submitted under the Union of Democratic Mineworkers and Vendside agreement for chronic obstructive pulmonary disease and vibration white finger in each year since 1999. [6122]

Malcolm Wicks *[holding answer 21 June 2005]*: The number of cases received under the Union of Democratic Mineworkers/Vendside agreement are as follows:

	Chronic obstructive pulmonary disease[1]	Vibration white finger
1999	2,841	4,595
2000	6,418	10,422
2001	4,740	5,137
2002	4,123	5,747
2003	5,648	451
2004	3,916	24
2005	0	1
Total claims	27,686	26,377

[1] Claim receipts are those claims that are fully registered, i.e. excludes pool of claims accepted with minimum data, awaiting further information to permit cross referencing and duplicate checks prior to full registration.

John Mann: To ask the Secretary of State for Trade and Industry when his Department expects to agree compensation for miners who were engaged in salvage work at Firbeck colliery for less than six weeks in 1968. [6727]

Malcolm Wicks: Salvage work is not an occupation on the list contained in the Chronic Obstructive Pulmonary Disease Claims Handling Agreement (CHA) as agreed between the Department and the claimants' representatives.

As a non-CHA occupation the dust exposure and relevant job factor for salvage workers have been assessed by the jointly appointed Dust Reference Panel. Salvage workers who were employed prior to the closure of collieries were incorporated into the dust model calculator in December 2003. For salvage workers who worked in collieries post closure, the model was amended earlier this year and is currently being tested.

Ministerial Visits

Jeremy Corbyn: To ask the Secretary of State for Trade and Industry which Ministers from his Department will be attending the Defence Systems and Equipment International Exhibition in September. [3943]

Malcolm Wicks: No DTI Ministers have as yet been invited to attend the 2005 Defence Systems and Equipment International Exhibition.

EDUCATION AND SKILLS

Classroom Behaviour

Mr. Jim Cunningham: To ask the Secretary of State for Education and Skills what assistance her Department is giving to schools in Coventry South constituency to promote good behaviour in the classroom. [6132]

Jacqui Smith: Our secondary strategy gives all secondary schools in Coventry access to high-quality behaviour management training materials and support from a DfES-funded behaviour management consultant. Our primary strategy is giving all primary schools access to high-quality training and curriculum materials to improve children's social, emotional and behavioural skills.

In addition:

Our Excellence in Cities programme provides Coventry with extra funding (£3.2 million this year), about half of which can be used to fund Learning Mentors and Learning Support Units to support pupils with challenging behaviour and their schools. Seven of the current EiC schools are in Coventry South. All the secondary schools in the constituency will benefit from EiC funding from this September.

Our Behaviour Improvement Programme provides Coventry with further additional funding (£1.5 million this year) to support selected schools facing the greatest behaviour challenges. Three of these schools are in the Coventry South constituency.

Connexions Service

David Taylor: To ask the Secretary of State for Education and Skills what representations she has received on the winding up of the Connexions Service; and what her responses to those representations have been. [5943]

Maria Eagle: Following speculation in the press about the future of the Connexions Service, my Department have received a number of letters in support of Connexions from young people, Connexions personal advisers, Connexions chief executives and board members, MPs and many other professionals. Some of these letters have resulted in discussions with a Minister or senior officials.

My Department's response have been to acknowledge the success of Connexions, while recognising that a report by the National Audit Office published in March 2004 found that it was not clear what the roles of schools and Connexions were in providing careers advice and guidance to young people. We have also recognised that there are multiple and overlapping initiatives for young people at risk which can be confusing for young people and their parents.

Our proposals for improving support to young people, particularly those who are at risk, will be set out in a Youth Green Paper which will be published in due course. We have encouraged all those who have made representations to take the opportunity to respond to the Green Paper once it is published.

Consultants

Paul Holmes: To ask the Secretary of State for Education and Skills how much the Department spent on consultants in *(a)* the last 12 months, *(b)* 2003–04 and *(c)* 2004–05. [6347]

Maria Eagle: The Department for Education and Skills spent the following sums from administration costs for the periods in question *(a)* £3.8 million in the last 12 months; *(b)* £4.7 million in 2003–04 and *(c)* £3.9 million in 2004–05. The total cost of consultants charged to programmes from November to March 2004–05 was £4.4 million. The cost charged to programmes before November 2004 is not recorded centrally and could be provided only at disproportionate cost.

Departmental Relocation

Mr. Gale: To ask the Secretary of State for Education and Skills how many of her Department's posts *(a)* have been relocated and *(b)* are under consideration for relocation from London to the deprived areas of the south east. [6266]

Maria Eagle: My Department, our non-departmental public bodies and Ofsted are, together, implementing the Lyons Review recommendations to relocate around 800 posts out of London and the South East by 2010. So far, my Department had not identified any posts suitable for transfer to deprived areas in the South East.

Faith Schools

Keith Vaz: To ask the Secretary of State for Education and Skills how many faith schools have been established in England since 1997; and how many she expects to be established in the next five years. [4052]

Jacqui Smith: There have been 145 voluntary aided schools (schools within which the majority of governors are appointed by the faith body) opened in England since 1997 (of these one closed in 1998 and two closed in 2001), with a further 31 proposals received for the next five years. Faith schools can be proposed by promoters at any time and, as such, the Department is currently only aware of schools proposed up to 2007.

There have also been some 48 voluntary controlled schools (schools within which the majority of governors are appointed by the local education authority and have a strong link to the faith body) opened since 1997, with a further 21 proposals received for the period to 2007.

Further and Higher Education

Mr. Stephen O'Brien: To ask the Secretary of State for Education and Skills if she will assess the likely effect of the spending priorities set out in the Skills Strategy on the practice of further education providers waiving adult education fees on a discretionary basis. [6742]

Bill Rammell: The Skills Strategy clearly set out the need to rebalance the contributions of employers, individuals and the public purse towards the costs of learning. We have been clear about our priorities of a place in school, college or an apprenticeship for all young people, and a focus on adults without a solid foundation of employability skills. Within an overall increased budget, these will be the focus for public funding. We will continue to provide fee concessions arrangements for learners on means tested benefits to access FE but we expect colleges to increase their total fee income, including collecting the income they currently chose to waive at their own discretion. These are not just technical funding changes. They are the first step in a necessary change of culture and expectations, where the value of learning and the benefits it brings to learners and to employers is properly recognised as a worthwhile and necessary investment.

Mr. Stephen O'Brien: To ask the Secretary of State for Education and Skills how many *(a)* part-time and *(b)* full-time students with dependants there were in higher education institutions in England in each year between 1994 and 2004. [6743]

Bill Rammell: Data are not available on the number of students with dependants.

However, data are available on the number of full-time students receiving a dependants' grant and are shown in the table.

Students domiciled in England and Wales at UK institutions[1] in receipt of at least one dependants' grant in academic years 1999/2000[2] to2003/04[3]

Academic year	*Number[4]*
1999/2000	15,500
2000/01	20,400
2001/02	23,900
2002/03	24,300
2003/04	27,900

[1] Data are not available for English institutions only.
[2] Earliest year for which data are available.
[3] Latest academic year for which data are available.
[4] Rounded to the nearest 100.
Source:
F503G Survey of Local Education Authorities and SLC

The 2004/05 Student Income and Expenditure Survey (SIES) should provide us with the proportion of students, both full-time and part-time, who have dependants. Unfortunately, the coverage of the most recent SIES, 2002/03, was limited to full-time students without children and cannot provide us with this information. Part-time students are not eligible to receive dependants' grants, therefore no data are available.

Jarvis plc

Steve Webb: To ask the Secretary of State for Education and Skills if she will list the private finance initiative contracts that exist between *(a)* schools and *(b)* other education institutions and Jarvis plc. [5938]

Jacqui Smith: The following lists include the PFI contracts which were signed between Jarvis and individual schools, and those between Jarvis and local authorities for groups of schools. There were no PFI projects signed with Jarvis in the further education and children's services sectors. The Department does not hold information on the PFI contracts of higher education institutions.

Contract signed with school

Cardinal Heenan VA School, Leeds
Barnhill Community School, Hillingdon
JFS School, Brent

Contract signed with local authority

Brighton and Hove, grouped schools
Croydon, Ashburton School
Dorset, Colfox School
East Riding of Yorkshire, grouped schools
Essex, Debden Park School
Haringey, grouped schools
Kirklees, grouped schools
Liverpool, grouped schools
Richmond upon Thames, grouped schools
Salford, grouped schools
Sunderland, Sandhill Learning Centre
Torbay, grouped schools
Wirral, grouped schools

Looked-after Children

Mrs. May: To ask the Secretary of State for Education and Skills how many and what proportion of looked-after children aged under two years experienced three or more changes of accommodation in the most recent year for which figures are available. [6446]

Maria Eagle: At 31 March 2004 5,200 children were looked-after aged under two years. Of these, 640 (12 per cent.) had experienced three or more placements in the year ending 31 March 2004. These figures exclude children looked-after under an agreed series of short term placements.

Multiplication

Mr. Gibb: To ask the Secretary of State for Education and Skills pursuant to the answer of 15 June 2005, to question ref. 4432, on multiplication facts, whether there is a requirement in the Framework for Teaching Mathematics: Reception to Year 6 documents for children to learn their multiplication tables by heart. [6200]

Jacqui Smith: The Framework for Teaching Mathematics sets the objective that all children learn by heart all multiplication tables up to 10 x 10.

Nutrition

Paul Flynn: To ask the Secretary of State for Education and Skills how many registered *(a)* nutritionists and *(b)* dieticians she employs within her Department. [5294]

Maria Eagle: We do not hold information centrally on numbers of staff who are registered nutritionists or dieticians. None are employed specifically to work on policies relating to food, for example school meals. The Department draws upon expertise in the Food Standards Agency and the Department of Health where

advice on nutrition and diet is needed, and commissions work from external experts (for example those currently members of the School Meals Review Panel).

Overseas Students

Mr. Jim Cunningham: To ask the Secretary of State for Education and Skills if she will make a statement on the number of overseas students from EU member states attending university in Coventry South constituency. [6133]

Bill Rammell: The constituency of Coventry, South contains the University of Coventry and Warwick university. The latest available information is given in the table:

EU domiciled enrolments at HE institutions in Coventry, South constituency 2003-04

	Institution	
Domicile	*Coventry university*	*University of Warwick*
Austria	5	50
Belgium	[1]—	80
Denmark	15	40
Finland	10	25
France	325	185
Germany	60	275
Gibraltar	5	5
Greece	295	245
Irish Republic	55	75
Italy	20	120
Luxembourg	5	30
Netherlands	5	70
Portugal	15	45
Spain	70	70
Sweden	10	180
Cyprus	30	135
Czech Republic	[1]—	15
Hungary	0	15
Malta	[1]—	15
Poland	10	40
Estonia	0	[1]—
Latvia	0	5
Lithuania	0	5
Slovenia	0	[1]—
Slovakia	[1]—	5

[1] Signifies a number greater than zero but less than three.

Note:
Figures have been rounded to the nearest 5.

Source:
Higher Education Statistics Agency (HESA).

Private Schools

Mr. Jim Cunningham: To ask the Secretary of State for Education and Skills how many private schools there are in Coventry, South constituency. [6134]

Jacqui Smith: Provisional data as at January 2005 indicate that there are six independent schools in Coventry, South parliamentary constituency.

School Meals

David Taylor: To ask the Secretary of State for Education and Skills what assistance she expects the public sector will provide to the work of the School Meals Trust. [6564]

Jacqui Smith: Both public and private sectors have welcomed our proposals to set up the School Food Trust (SFT). It will give independent support and advice to schools and parents to improve the standard of school meals, working with the food industry, caterers, nutritionists, food interest groups and the public sector. We have already announced financial support of £5 million per year for the SFT for the next three years. My Department will assist the SFT in establishing itself, will agree an annual business plan in relation to the grant it receives from DFES, and work closely with it to ensure that our respective work programmes are complementary.

Schoolchildren (Gloucestershire)

Mr. Drew: To ask the Secretary of State for Education and Skills how many children in each school in Gloucestershire live in another local authority. [6816]

Jacqui Smith: The information requested at school level has been made available in the House of Commons Library. Summary information showing the home LEAs of pupils attending schools in Gloucestershire is provided in the following table.

Pupils attending schools in Gloucestershire residing outside of authority

	Number of pupils	*Percentage of pupils*
Pupils attending schools in Gloucestershire	86,043	100.0
Residing authority		
Gloucestershire	82,807	96.2
City of Bristol	6	[1]—
Herefordshire	218	0.3
Monmouthshire	396	0.5
Newport	18	[1]—
North Somerset	5	[1]—
Oxfordshire	148	0.2
South Gloucestershire	726	0.8
Swindon	219	0.3
Unknown/not given	363	0.4
Warwickshire	334	0.4
Wiltshire	351	0.4
Worcestershire	443	0.5
Other LEAs	9	[1]—
Total residing outside of authority	3,236	3.8

[1] Denotes percentage of less than 0.05 per cent.

PLASC 2005 provisional data

Schools Provision (Lancashire)

Mr. Hoyle: To ask the Secretary of State for Education and Skills how much funding is being made available for the expansion of schools provision in Lancashire. [6606]

Jacqui Smith: In 2005-06 recurrent funding through the schools formula spending share has increased in Lancashire by 7.0 per cent. per pupil and its total SFSS has risen to £555.1 million. The funding that individual schools receive is a matter for the local authority through its locally agreed funding formula.

As far as schools capital funding is concerned, £31.2 million has been allocated to Lancashire local

authority and schools for the year 2005–06. Indicative allocations of £35.6 million and £37.2 million have been made for the years 2006–07 and 2007–08 respectively. These allocations will be utilised in accordance with the local authority and schools' asset management plans, taking account of changes in school population within the local authority area.

Special Needs/Schools

Sarah Teather: To ask the Secretary of State for Education and Skills how many special needs *(a)* assistants and *(b)* teachers there were in London in each year since 1997, broken down by local education authority. [6406]

Maria Eagle: Information on the number teachers employed solely as special needs teachers is not collected centrally.

Information on special needs teaching assistants in service is collected in January of each year. The following table provides the full-time equivalent number of special needs assistants in each London local education authority in each January since 1997.

Maintained nursery, primary and secondary schools, special schools[1] and pupil referral units: full-time equivalent number of special needs support staff

	Position as at January each year								
Each London local education authority	*1997*	*1998*	*1999*	*2000*	*2001*	*2002*	*2003*	*2004*	*[2]2005*

Source:
Annual School Census

Mr. Amess: To ask the Secretary of State for Education and Skills what form the Government's audit of special schools will take; and if she will make a statement. [5934]

Maria Eagle: The audit is being undertaken by the Special Needs Consultancy on behalf of the Department. The aims of the Audit are to:

Establish how local authorities meet the needs of the children in their authority with low incidence SEN.

Explore gaps in services, support and provision, and how these gaps can be/are being addressed.

Use the above to support and inform policy and practice development for regional and local planning and provision so that more pupils have their needs met locally.

Help develop thinking around regional centres of expertise.

Identify local, regional and national centres of good practice and expertise, especially those with the potential for enhancing their role to provide advice and/or support to schools.

The audit is being conducted using findings from a piloting stage. Questionnaires have been issued to all local authorities. Responses are being received and followed up. Regional focus groups have been established and are now working to gather information and offer advice on specialist services, support and provision provided by local authorities and health as well as the non-maintained, private and voluntary sectors.

Student Debt

David Howarth: To ask the Secretary of State for Education and Skills what *(a)* the total amount of debt incurred by UK students studying at English universities, *(b)* the mean amount of such debt and *(c)* the median amount of such debt was for each year since 1996; and what estimate she has made of these figures for each year until 2010. [5005]

Bill Rammell: The table shows the student loan amount outstanding for publicly-owned debt in the UK, at the end of each financial year specified.

Financial year	*Amount outstanding (£ million)*
1995–96	1,859.0
1996–97	2,691.0
1997–98	3,574.3
1998–99	3,591.9
1999–2000	3,992.5
2000–01	6,043.2
2001–02	8,394.0
2002–03	10,827.5
2003–04	13,364.2

Source:
Student Loans Company

Data are not available centrally for UK students at English universities.

The latest Student Income and Expenditure Survey 2002/03, which covered young, single, childless full-time undergraduate students in higher education institutions in England and Wales found that final year students' average anticipated total debt on graduation was £8,666 in 2002/03. This included student loans, overdrafts, credit cards, commercial loans and informal loans. The 2004/05 SIES, published at the end of 2005, will give up to date figures.

The table shows average student loan debt for UK borrowers, at the point they entered repayment status, by financial year. Note this only covers student loans obtained from the Student Loans Company.

Financial year entered repayment status	*Average debt (£)*[1]
1999–2000	3,530
2000–01	3,840
2001–02	4,230
2002–03	5,720
2003–04	7,110
2004–05[2]	7,910
2005–06[2]	8,430

[1] Values rounded to nearest 10. Includes interest accrued up to the point of entering repayment status. Excludes any early voluntary repayments that may have been made by the borrower before entering repayment status.
[2] Income-contingent loans only
Source:
Student Loans Company

Figures are not available before 1999–2000. Borrowers enter repayment status in the April following graduation or otherwise leaving their course. Data are not available centrally in the form requested.

The introduction of loans for variable fees of up to £3,000 will increase the amount the average student is able to borrow but not all will take up their full loan entitlement. Those receiving the new maintenance grants and university bursaries can use them if they wish to reduce their overall debt.

Changes to maintenance loans levels could reduce rather than increase student indebtedness for many poorer students. Although maintenance loans will rise in 2006/07 to reflect the median of essential living costs expenditure recorded in the SIES 2002/03, a bigger change will be the substitution of a significant part of the new £2,700 maintenance grant for maintenance loans for lower income students, reducing the need to borrow.

We will be monitoring changes in borrowing patterns as the new student support arrangements come in. Whatever a student's circumstances, no student from 2006/07 has to pay fees upfront and the arrangements for repayment of maintenance and fee loans are fair and equitable. The graduate's repayments are at zero real rate of interest, related directly to earnings and only required when earnings are greater than £15,000 per year.

DfES does not hold information on borrowers in repayment status at an individual student level; therefore we are unable to calculate a median amount of debt.

Truancy

Mr. Rob Wilson: To ask the Secretary of State for Education and Skills what the truancy level has been in each secondary school in the *(a)* Reading borough council and *(b)* Wokingham district council local education authority area in each year since 1990. [5410]

Jacqui Smith: The information requested is only available from 1994 (truancy rates were not published previously); this information has been placed in the Library. These figures relate to unauthorised absence, this includes all unexplained or unjustified absences, such as lateness, holidays during term time not authorised by the school, absence where reason is not yet established and truancy.

Undergraduates

Mr. Stephen O'Brien: To ask the Secretary of State for Education and Skills how many and what percentage of undergraduate students in higher education institutions in England were *(a)* full-time and *(b)* part-time in each year between 1995 and 2005; and what the projected figures are for 2006 to 2010. [3063]

Bill Rammell: The latest available figures and projections for higher education students (studying at higher education institutions or further education colleges in England) are given in the tables.

UK domiciled undergraduate students in England[1]

Academic year	*Full-time*	*Part-time*	*Total*	*Percentage full-time*
1995/96[2]	753,220	422,895	1,176,115	64
1996/97[2]	760,910	446,120	1,207,035	63
1997/98[2]	775,470	440,460	1,215,935	64
1998/99[2]	780,780	453,130	1,233,910	63
1999/00[2]	777,160	456,955	1,234,115	63
2000/01[2]	780,125	473,445	1,253,570	62
2000/01[3]	774,895	447,305	1,222,195	63
2001/02[3]	798,415	482,555	1,280,965	62
2002/03[3]	824,670	492,425	1,317,095	63
2003/04[3]	842,535	498,405	1,340,940	63

[1] Covers students studying at higher education institutions and further education Colleges.

[2] Figures are on a snapshot basis as at the 1 December of the academic year, and are rounded to the nearest five.

[3] Figures are on a DfES whole year count basis which are not consistent with snapshot figures given for earlier years. The whole year count counts students at the end of the academic year and provides a more accurate representation of student numbers. Whole year count figures are not available for years before 2000/01. Figures are rounded to the nearest five.

Note:

Constituent parts may not sum due to founding.

Source:

Higher Education Statistics Agency (HESA) and Learning and Skills Council (LSC) Individual Learner Records (ILR).

Projected UK domiciled undergraduate students in England[1]

Academic year	*Full-time*	*Part-time*	*Total*	*Percentage full-time*
2004/05[2]	857,000	494,000	1,351,000	63
2005/06[2]	876,000	500,000	1,375,000	64
2006/07[2]	892,000	504,000	1,396,000	64
2007/08[2]	907,000	510,000	1,417,000	64

[1] Covers students studying at higher education institutions and further education colleges.

[2] Projected figures given here are on a whole year count basis. Coverage is different than for the actual student numbers given in the preceding table. In particular, students of unknown or Island domiciles or on courses of greater than six years in length are not included in the projections.

Note:

Constituent parts may not sum due to rounding.

The planned number of student places is set during spending reviews in the light of the Government's target of increasing participation in higher education towards 50 per cent. of those aged-17 to 30 by the end of the decade, and the projections shown here are based on these plans. Projections may change as new data becomes available. Projections for 2007/08 are subject to revision (and projections for years beyond 2007/08 are not available) as they are dependent on Spending Review 2006 outcomes.

Teacher Victims of Violence

Mr. Burns: To ask the Secretary of State for Education and Skills how many teachers have been victims of offences of violence in the West Chelmsford parliamentary constituency in each of the last 10 years. [6599]

Jacqui Smith: The information requested is not collected centrally.

Young Carers

Tim Loughton: To ask the Secretary of State for Education and Skills what steps the Government have taken to encourage school nurses to address the needs of young carers. [5495]

Maria Eagle: The Government are currently taking action to increase the numbers of school nurses and to develop and promote a modern role that has the support of children, young people and their families, the profession, education and the NHS.

School nurses have a specific role in supporting children and young people with ongoing or specialist needs and this would include children who are young carers. School nurses have good networks and working relationships with other health and social care professionals. They will also have a good working knowledge of other statutory agencies and local voluntary provision. In addition to seeing children and young people in school and community settings, school nurses are also able to undertake home visits.

Written Answers to Questions

Monday 27 June 2005

HOUSE OF COMMONS COMMISSION

Visitor Reception Building and Westminster Hall

Derek Conway: To ask the hon. Member for North Devon, representing the House of Commons Commission if he will make a statement on progress with planning for the Visitor Reception Building and its likely impact on Westminster Hall. [7499]

Nick Harvey: In May last year the House agreed to the proposal made in the joint Report from the Accommodation and Works and Administration Committees for a new Visitor Reception Building to be sited at the north west corner of Westminster Hall. The House of Lords endorsed this proposal in July last year.

Over the past 12 months work on design has progressed. Tenders will be invited in August 2005. Construction is due to begin on site in December 2005. It is planned to complete the work by the time of return of the House in October 2006.

A model of the new Visitor Reception Building will be exhibited in the Upper Waiting Hall from 27 June to 1 July, in the atrium of Portcullis House from 4 to 8 July, and in the Royal Gallery in the House of Lords from 11 to 15 July.

The construction of the new facility will in any event involve some disruption to Westminster Hall as well as the facilities on the west side of the Hall. To avoid such disruption being spread over a number of years, the opportunity is being taken to undertake at the same time a number of maintenance and repair projects in Westminster Hall itself, including replacement of the guttering and repairs to the south stairs and floor. As a result, Westminster Hall, the Grand Committee Room, the Jubilee Cafe, the Jubilee Room, the meeting rooms off Westminster Hall, and the IPU and CPA offices and reception rooms will be inaccessible from the end of December 2005 until October 2006.

Mr. Speaker has decided that sittings of the House in Westminster Hall will be held in Committee Room 10, with effect from January 2006 until the return of the House in October 2006.

As a temporary measure to replace the W meeting rooms off Westminster Hall, Committee Room 21 on the Upper Committee Corridor will be divided into two separate meeting rooms. The Serjeant at Arms will shortly be circulating further details of arrangements for other meeting rooms.

As a temporary measure to alleviate the effect of the closure of the Jubilee Room, functions held in the Macmillan Room in Portcullis House will be allowed to use outside caterers, as will meetings in additional spaces to be made available by the House of Lords.

The offices of the UK branch of the CPA will be moved to temporary offices in 2 The Abbey Garden. The Chess Room will be made available as a reception room.

SOLICITOR-GENERAL

Fraud

Gregory Barker: To ask the Solicitor-General what criminal investigations the Serious Fraud Office is undertaking into cases of fraud by staff working for HM Customs and Excise; and if he will make a statement. [6629]

The Solicitor-General: SFO policy is to neither confirm or deny whether a specific matter has been referred to it, or is under investigation, until such a time as is considered appropriate or necessary.

On this occasion it is in the public interest to confirm that I am told there are no current SFO investigations into allegations of fraud by officials of HM Customs and Excise (now HM Revenue and Customs).

Any such allegation referred to the SFO would be accepted for investigation if it met the SFO's acceptance criteria and there was evidence to support the allegations. Otherwise it may be investigated by an alternative investigating authority.

Gregory Barker: To ask the Solicitor-General if he will make a statement on the role of the Serious Fraud Office in investigating cases of fraud by staff at HM Customs and Excise. [6630]

The Solicitor-General: The Director of the Serious Fraud Office may investigate any suspected offence involving serious or complex fraud.

The overriding criterion is that the fraud is such that the direction of the investigation should be in the hands of those responsible for any subsequent prosecution.

If a case involving allegations of fraud by officials of HM Customs and Excise (now HM Revenue and Customs) was referred to the SFO that met this criterion, then it would be accepted for investigation by the SFO.

Honours

Mr. Pope: To ask the Solicitor-General how many officials currently in the offices of the Law Officers received honours in the recent Queen's Birthday Honours List; and at what rank of honour. [5114]

The Solicitor-General: I refer my hon. Friend to the answer given by my right Hon. Friend the Chancellor of the Duchy of Lancaster on Wednesday 22 June 2005, *Official Report*, column 1059W.

Iraq

Lynne Jones: To ask the Solicitor-General pursuant to the answer of 20 June 2005, *Official Report*, column 805W, on advice to Cabinet, on what basis it was disclosed that the Attorney-General made an oral presentation to the Cabinet of his advice on the legality of the war in Iraq. [7594]

The Solicitor-General: The information was disclosed by the Butler Review of Intelligence on Weapons of Mass Destruction in its Report published on 14 July 2004.

Lenient Sentences (Appeals)

Mr. Clifton-Brown: To ask the Solicitor-General under what circumstances the Crown Prosecution Service has the power to appeal against an unduly lenient sentence; and whether this includes convictions for actual bodily harm. [6221]

The Solicitor-General: Part IV of the Criminal Justice Act 1988, as amended, provides that the Attorney-General may apply to the Court of Appeal (Criminal Division) to refer for review by the court sentences that he regards to be unduly lenient. The Solicitor-General has the same power to refer sentences. The CPS and other prosecuting agencies cannot appeal directly under the power but must refer a sentence to the Law Officers for consideration. It is then for the Law Officer alone to decide whether to refer the sentence.

These provisions only apply to certain offences where the sentence is passed in the Crown court but does not include assault occasioning actual bodily harm.

The CPS can refer to the Law Officers any sentence for an offence which is covered by the power where it considers it appropriate to do so. It may also refer cases to the Law Officers where there has been a direct request to do so by a victim, family member or member of the public.

The Court of Appeal, having considered an application for a review of such a sentence, may quash the sentence passed in the Crown court and impose a different sentence which can be more severe.

Muggers (Prosecutions)

John Hemming: To ask the Solicitor-General pursuant to the answer of 7 June 2005, *Official Report*, column 456W, on theft, what powers the police have to ensure that a mugger is prosecuted. [4183]

The Solicitor-General: The decision whether to initiate a prosecution of a case in the courts may be taken either by the police or by the Crown Prosecution Service (CPS). How the procedure to initiate proceedings operates depends on the nature of the offence and, currently, where an offence was committed. When the roll-out of statutory charging is completed (planned for April 2006), a standard procedure will apply throughout England and Wales.

In an area where statutory charging applies, the Director of Public Prosecutions' (DPP) Guidance (under the Police and Criminal Evidence Act 1984, as amended) allows police officers themselves to charge a range of offences but not robbery.

The CPS would usually deal with robbery offences. The public interest would almost always demand a prosecution in such cases. In strictly limited circumstances, a case that is cautioned may subsequently be prosecuted, though the parameters have been very tightly defined by the courts.

ENVIRONMENT, FOOD AND RURAL AFFAIRS

Acts of Parliament (Internet Access)

Mr. Gordon Prentice: To ask the Secretary of State for Environment, Food and Rural Affairs if she will take steps to make all Acts of Parliament published before 1988 for which her Department is responsible available on-line. [3717]

Jim Knight: The Controller of Her Majesty's Stationery Office (HMSO) within the Cabinet Office is the Queen's Printer of Acts of Parliament, and responsible for the publication of Acts of Parliament. HMSO has considered the publication of Acts prior to 1988, which is the earliest date when these were available electronically, but has decided not to do so as many have been heavily amended and to publish them in their original form would be misleading for many users. The Government is, however, taking forward development of a Statute Law Database which will contain the fully revised and updated text of all legislation from 1275. It is expected that this will be made available to the general public during 2006.

Aircraft (Carbon Dioxide)

Mr. Oaten: To ask the Secretary of State for Environment, Food and Rural Affairs what measures she plans to put in place to reduce carbon dioxide output from aircraft entering or leaving the United Kingdom. [7416]

Mr. Morley: This Government are concerned about the contribution that UK aviation makes to global warming, which by 2030 could amount to about a quarter of the UK's total contribution to climate change. We are working hard domestically and in the EU to reduce the impact of aviation on climate change. Defra Ministers and officials worked closely with colleagues at the Department for Transport to ensure that this vital issue was addressed in the Government's Air Transport White Paper which was published in December 2003. As a result, the Government's long term aviation policy has repeated our commitment to taking a lead on climate change and recognises the need for aviation to take its share of responsibility for tackling the impact of air transport on global warming.

The preferred Government option for tackling the contribution that aviation makes to global warming is through a well designed emissions trading scheme. For an international industry, an international trading regime is the best solution, and we are working with the International Civil Aviation Authority (ICAO) to achieve this. Within the EU we will be pressing for the inclusion of aviation into the EU emissions trading scheme, and have made this a top priority for the UK presidency of the EU, with a view to aviation joining the scheme in 2008, or as soon as possible thereafter. Officials from DfT and Defra have already approached other member states on the matter and are working closely with the European Commission.

This provides a solid foundation for action in tackling aviation's global impacts. However, we recognise that this may not provide a total solution. In view of this, we will continue to explore and discuss options for the use of other economic instruments for tackling aviation's greenhouse gas emissions, building on the work in the March 2003 report "Aviation and the Environment: Using Economic Instruments".

John Hemming: To ask the Secretary of State for Environment, Food and Rural Affairs how much carbon was emitted in *(a)* 1990 and *(b)* 2004 from international aviation which (i) landed and (ii) took off from the UK. [4882]

Mr. Morley: Emissions from international aviation which took off from the UK in 1990 and 2003 (the most recent year for which the information is available) were 4.3 and 8.1 million tonnes of carbon per year, respectively. These emissions are estimated using the amount of fuel provided to aircraft in the UK. The estimates are consistent with guidelines developed by the Intergovernmental Panel on Climate Change and agreed internationally for the preparation of greenhouse gas inventories. Emissions from international aviation that landed at UK airports are not separately estimated.

John Hemming: To ask the Secretary of State for Environment, Food and Rural Affairs how much carbon was emitted in the UK in *(a)* 1990 and *(b)* 2004 (i) excluding and (ii) including international aviation. [4883]

Mr. Morley: The following table shows UK carbon dioxide emissions with and without international aviation in 1990 and 2003, which is the most recent year for which full information is available. The data are expressed as million tonnes of carbon per year and were released by the Department in March this year.

Million tonnes carbon per year

	UK emissions excluding international aviation	*Emissions including international aviation*
1990	165.4	169.7
2003	156.1	164.2

Emissions from international aviation and international shipping are recorded as memorandum items in the UK greenhouse gas inventory but are not included in national totals. This is consistent with guidelines developed by the Intergovernmental Panel on Climate Change and agreed internationally for the preparation of greenhouse gas inventories.

Badgers

Norman Baker: To ask the Secretary of State for Environment, Food and Rural Affairs what recent assessment she has made of the relationship between badger populations and the incidence of TB in cattle. [1507]

Mr. Bradshaw: There are no recent data on the relationship between badger population density and the incidence of TB in cattle.

Investigation of the prevalence of TB in wild badgers is being carried out through the Randomised Badger Culling Trial (RBCT) and the Road Traffic Accident survey of badgers found dead in seven English counties. The RBCT will provide some information on badger numbers within the trial areas, which could be related to cattle herd breakdown rates. However, badger density estimates may not be very reliable even in trial areas (they would be based on trapping returns and field survey information).

British Waterways Board

Mr. Gummer: To ask the Secretary of State for Environment, Food and Rural Affairs if she will instruct the British Waterways Board to realise the value of its non-operational land in order to apply it to investment in the operational waterways or to fund other cost-cutting exercises elsewhere in Government. [4594]

Jim Knight: No. I refer the right hon. Member to the answer given to him on 6 June 2005, *Official Report*, column 250W.

Civil Servants

Dr. Cable: To ask the Secretary of State for Environment, Food and Rural Affairs what value for money procurement savings were identified and what reduction in civil service posts occurred in her Department in 2004–05. [4544]

Jim Knight: This information is as follows:

(a) Value for Money Savings

DEFRA's value for money procurement gains for 2004–05 are being calculated and will be published in the 2005 Treasury Autumn Performance report.

(b) Reductions in Civil Service Posts in 2004–05

In Budget 2005 the Chancellor announced a headcount reduction of 12,500 posts by the end of 2004–05, towards the Government's target of a gross reduction of 84,000 civil service and administrative posts by 2008.

DEFRA's target is to reduce its head count by 2,400 (measured as full-time equivalent posts) by the end of 2007–08. The programmes that make up DEFRA's efficiency portfolio contributed 340 posts to this target in financial year 2004–05. The majority of these post reductions were delivered through restructuring and the introduction of new working practices in the Rural Payments Agency (235 posts) and the human resources function (91 posts).

DEFRA's staff in post figures show a reduction of 445 posts between 1 April 2004 and 1 April 2005. This includes the transfer of 320 members of staff to IBM as part of the outsourcing of IT services in October 2004. However, these transfers cannot be counted as efficiencies, as the individuals continue to work on DEFRA's account. The reason that the balance does not match the reductions delivered through the efficiency programme is that DEFRA has taken on staff to meet new work areas arising from the Spending Review 2004 settlement, such as the world summit on climate change and the EU presidency.

Common Agricultural Policy

Mr. Brady: To ask the Secretary of State for Environment, Food and Rural Affairs pursuant to the Prime Minister's oral statement on 20 June 2005, *Official Report*, columns 523–40, on the European Council, what estimate she has made of the likely increase in the UK net contribution to the EU budget if the Government's proposals for reform of the Common Agricultural Project are accepted. [6779]

Jim Knight *[holding answer 23 June 2005]:* The impact of Common Agricultural Policy (CAP) reform on the UK net contribution to the EU budget will very much depend on the outcome of the overall negotiations currently being held on the next Financial Perspective—not just that element which relates to the CAP.

Mr. Allen: To ask the Prime Minister if he will publish a concise guide, in every recognised language of the EU, to British proposals for the reform of the CAP, indicating the benefits in each EU member state to *(a)* consumers, *(b)* taxpayers, *(c)* small farms, *(d)* the environment *(e)* animal welfare and *(f)* the benefits of reform to developing countries. [4797]

Jim Knight: I have been asked to reply.

There are no plans to publish a guide of this kind. However, the Government will continue to argue the case for further reform of the CAP, and will use every available opportunity for promote the benefits of reform.

Departmental Staff

Paul Flynn: To ask the Secretary of State for Environment, Food and Rural Affairs how many registered *(a)* nutritionists and *(b)* dieticians she employs within her Department. [5298]

Jim Knight: There are no registered nutritionists or dieticians employed within DEFRA or its executive agencies.

Endangered Species Regulations

John Mann: To ask the Secretary of State for Environment, Food and Rural Affairs (1) what responses she received on the draft statutory instrument on Control in Trade of Endangered Species (Enforcement) Regulations 2005; and if she will make a statement; [6744]

(2) whether she intends to increase the maximum sentence for all offences under the Control in Trade of Endangered Species (Enforcement) Regulations 2005 to five years as provided for in section 307 of the Criminal Justice Act 2003; and if she will make a statement; [6745]

(3) when she intends to introduce secondary legislation under section 307 of the Criminal Justice Act 2003 increasing the maximum sentence for the illegal trade in endangered species. [6746]

Jim Knight: We have received 53 responses to the consultation on the draft Statutory Instrument. We are considering these responses and plan to publish an amended Statutory Instrument later in the year.

I have today laid before Parliament the Control of Trade in Endangered Species (Enforcement) (Amendment) Regulations 2005 which increase the maximum penalty for certain offences to five years imprisonment. The regulations will come into force on 21 July.

Equine Passports

Keith Vaz: To ask the Secretary of State for Environment, Food and Rural Affairs whether all equines are required to have a passport. [6193]

Jim Knight: The Horse Passports (England) Regulations 2004 require owners in England of horses, ponies and other equines to obtain a passport for each such animal they own within specified time limits. Similar requirements apply in the rest of the UK.

There are limited exceptions for ponies on Dartmoor and in the New Forest which will only need a passport when they move from these areas. The New Forest Verderers and the Dartmoor Commoners Council are each obliged to maintain a list, which individually identifies all such horses and ponies.

Owners of horses brought into England do not need to apply for a passport if the horse or other equine remains in England for less than 30 days. Again, similar provision applies in Wales, Scotland and Northern Ireland regards horses and other equines brought into those territories.

These measures apply to animals of equine or asinine species, or crossbreeds of those species, but do not apply to zebras.

Flood Defences

David Davis: To ask the Secretary of State for Environment, Food and Rural Affairs what technologies were used in drawing up the Environment Agency flood maps; and what steps her Department is taking to improve the accuracy of the maps. [6548]

Mr. Morley: Flood risk mapping is an important part of our and the Environment Agency's public awareness strategy, to ensure that flood risk is better understood by all concerned including people living and working in the floodplains and those responsible for development control and emergency planning.

The Environment Agency's Flood Map is the result of years of investment in river and coastal floodplain surveys, hydrological and hydraulic modelling and mapping of land at risk from flooding. The best available technologies, science and leading engineering consultancies have been used for each element of the mapping that was appropriate to the geographical scale under consideration. By combining the mapping into one product the Environment Agency has produced the most comprehensive and accurate publicly available Flood Map for England and Wales.

The Environment Agency, through their flood mapping strategy, is continuing to invest in extending and improving their understanding of flood risk with a planned expenditure on flood mapping of £8.5 million in 2005–06. Three-monthly updates are produced, which incorporate the latest data into the Flood Map. The Flood Map is available on the internet and it is also

provided directly to planning authorities and the emergency services to help with planning and preparing for future flooding.

Laptop Computers

Lynne Featherstone: To ask the Secretary of State for Environment, Food and Rural Affairs how many laptop computers have been used by *(a)* Ministers, *(b)* special advisers and *(c)* officials in her Department in each year since 1995; how many have been (i) lost and (ii) stolen in that period; what the cost was of the use of laptops in that period; and if she will make a statement. [4127]

Jim Knight: The Department has only been in existence since June 2001. Information covering earlier periods is therefore not available.

The number of laptop computers available for use is:

	2001–02	*Financial year 2004–05*
Ministers	6	16
Special advisers	n/a	2
Officials	1,835	2,127

n/a = Not available

It should be noted that the laptops shown as available for use by Ministers are held by their private offices and are available for use by Ministers, special advisers and staff.

Data for the intervening years could only be obtained at disproportionate cost.

The number of laptops (i) lost and (ii) stolen is:

Financial year	*Lost*	*Stolen*
2000–01	0	7
2001–02	5	6
2002–03	0	2
2003–04	0	0
2004–05	0	3

To calculate the cost of using laptops there are many elements to consider, such as, purchase cost, peripheral devices, maintenance, depreciation, service provision and electricity used. Each of these costs would be different for each different model of laptop used in the Department. The time required collating this information and to calculate this figure, even if it were available, would result in a disproportionate cost.

Luxembourg Plan

Mr. Drew: To ask the Secretary of State for Environment, Food and Rural Affairs what assessment she has made of the likely effects on rural development of the implementation of the Luxembourg Plan. [3870]

Jim Knight: There have been two initiatives on rural development under the Luxembourg Presidency.

The hon. Gentleman will be aware that the European Council's discussions on 16–17 June did not reach agreement on the future financing of the EU. The financial amounts available for rural development will depend on the outcome of the negotiations on future financing of the EU, and on factors such as the ability of member states to transfer resources from traditional direct subsidies to farmers (so-called "Pillar 1") to rural development measures. This is a practice which the UK has followed since 2001; and the UK is pressing to ensure that domestic agri-environment programmes can continue to be funded in this way.

The Luxembourg Presidency did, however, secure political agreement to the draft Rural Development Regulation at Agricultural Council on 20 June (subject to any necessary amendment in the light of future financing decisions). The regulation sets out the framework for EU co-financed rural development expenditure from 2007 to 2013. My Department's assessment was set out in Explanatory Memorandum 11495/04.

Mole-catchers

David Maclean: To ask the Secretary of State for Environment, Food and Rural Affairs what assessment her Department made of the working practices of mole-catchers before she agreed to the banning of strychnine hydrochloride as a biocidal agent. [6271]

Mr. Morley: Defra recognised the problems that the withdrawal of strychnine could cause for the control of moles. The Central Science Laboratory was commissioned to undertake a review of the range of mole control methods which exist across the EU. The aim of this review was to produce guidance on the most humane and effective methods of mole control which are currently available.

The report "A review of methods used within the European Union to control the European Mole, Talpa Europaea" was published by Defra in February 2004. It concluded that the unavailability of strychnine in the future suggests that landowners and occupiers will have to assess more carefully whether moles should be controlled or left alone in order to avoid initiating measures that are unnecessary or unlikely to reduce damage levels in the long term. If control is necessary, alternative methods are available such as trapping and fumigation.

David Maclean: To ask the Secretary of State for Environment, Food and Rural Affairs what alternative methods for the destruction of moles her Department advises mole-catchers to use once strychnine hydrochloride is withdrawn. [6272]

Mr. Morley: Once strychnine hydrochloride is withdrawn, if control of moles is considered necessary alternatives are available such as trapping or fumigation.

National Bee Unit

Lynne Featherstone: To ask the Secretary of State for Environment, Food and Rural Affairs how much funding was allocated to the National Bee Unit health programme in each of the last five years; and if she will make a statement. [4805]

Jim Knight: DEFRA supports the beekeeping sector in England by funding a range of measures to protect bee health. These measures are implemented by the

National Bee Unit. The Department's expenditure with the Unit in each of the last five years is sent out in the following table.

DEFRA expenditure with the National Bee Unit

	£
2001–02	1,300,000
2002–03	1,300,000
2003–04	1,235,000
2004–05	1,235,000
2005–06	1,235,000

Rights of Way (Designations)

Mr. Mullin: To ask the Secretary of State for Environment, Food and Rural Affairs how many applications have been received for areas to be designated under the Countryside and Rights of Way Act 2000; how many have been approved; and how many footpaths have been *(a)* closed and *(b)* diverted on grounds of crime prevention as a result. [6695]

Jim Knight: The Countryside and Rights of Way Act 2000 introduced provisions to enable alleyways to be gated to prevent crime, in areas designated for this purpose by the Secretary of State.

We have received 28 applications for designation since the legislation came into force in February 2002. 25 have subsequently been approved. These cover 84 areas in England. Of the remaining three applications, two were withdrawn and one is still pending.

Since the 84 areas were designated, 53 orders have been made under new section 118b of the Highways Act 1980 to close rights of way to prevent crime. 35 of these have resulted in highways being successfully closed. The remaining orders are awaiting confirmation by the local highway authority or Secretary of State. We are not aware of any diversion orders.

Sewage

Mr. Hancock: To ask the Secretary of State for Environment, Food and Rural Affairs what plans there are to reduce the amount of sewage being deposited in the Thames. [6335]

Mr. Morley: The Final Determination of Thames Water's price limits in 2005–10, published by the Office of Water Services (Ofwat) on 2 December 2004, include provision for significant treatment capacity increases at Mogden, Beckton and Crossness sewage works, and to improve the treated discharge at Riverside sewage works. The capacity increases are expected to reduce the frequency and impact of storm water discharges from these works.

Since 2001 officials from the Department have been involved in a strategic study of the environmental impact of intermittent storm sewage discharges to the Thames Tideway. The Steering Group includes members from Thames Water, the Environment Agency, the Greater London Authority, and, with observer status, Ofwat.

My officials and the Study Group are currently carrying out further consideration of issues concerning the proposed long-term interceptor tunnel, and possible appropriate smaller-scale measures which could provide earlier improvements to the overflow discharges during wet weather. A further report is expected soon, and it will be carefully considered by Ministers and Ofwat, and a decision made on an appropriate course of action to meet our obligations to protect the environment in a cost-effective way.

Silage

David Maclean: To ask the Secretary of State for Environment, Food and Rural Affairs what assessment she has made of the *(a)* economic and *(b)* animal health impacts of the pollution of silage by earth. [6276]

Mr. Morley: No assessments of the economic or animal health impacts of the pollution of silage by earth have been made by the Department for Environment, Food and Rural Affairs.

Single Farm Payment

Mr. Greg Knight: To ask the Secretary of State for Environment, Food and Rural Affairs if she will list the representations she has received on the effects of single farm payments on motor sports events being held on agricultural land; what response she has made; and if she will make a statement. [5249]

Jim Knight *[holding answer 21 June 2005]:* Land used in support of claims for payment under the 2005 Single Payment Scheme (SPS) must be at the claimants' disposal for the 10-month period nominated on their claim forms. Under recently updated guidance issued by the Department, motor sports may take place on up to 28 days during the nominated 10-month period, in addition to all of the remaining two months of the year. The updated guidance takes on board representations made by motor sports interests and, overall, we would expect the impact of the SPS on the availability of farmland used for such sports to be limited.

Since the updated guidance was issued, the Department has received additional representations from the All Party Parliamentary Group for Motorcycles, the Motorsport Industry Association and a number of individuals, which are currently being considered.

Waste Management

Bill Wiggin: To ask the Secretary of State for Environment, Food and Rural Affairs how many kilogrammes per capita of *(a)* municipal, *(b)* commercial and industrial and *(c)* waste electrical and electronic equipment were (i) recycled, (ii) sent to incineration and (iii) landfilled in each member state of the European Union in (A) 2000, (B) 2001, (C) 2002, (D) 2003 and (E) 2004. [3466]

Mr. Bradshaw: The information is as follows:

(a) The following tables show the amount of municipal waste recycled, incinerated and landfilled per capita, in each EU country, for each year from 2000 to 2003 based on data supplied to and published by Eurostat.

(i) Municipal waste recycled and composted/kg per capita per year

	2000	2001	2002	2003

n/a = Data are not available, or have been omitted due to significant quality issues.

Notes:

Data for incineration and landfill are collected and published by Eurostat for the EU structural indicators. The recycling figures are an estimate produced by subtracting the amount landfilled and incinerated from the total amount of municipal waste generated.

(b) The following table shows information made available by Eurostat on non-hazardous industrial waste data only. International data on commercial and industrial waste are limited and definitions may not be consistent between countries. Figures are provided intermittently by member states, the following table therefore gives the most recent data produced.

Non-hazardous industrial waste arisings/kg per capita per year

	Recycled and composted	*Incinerated*	*Landfilled*	*Year on which data are based*
Bulgaria	n/a	n/a	n/a	
Croatia	144	87	n/a	2000
Czech Republic	30	26	92	2001
Denmark	351	72	114	2000

(c) Figures for waste electronic and electrical equipment are not available at European Union level.

INTERNATIONAL DEVELOPMENT

Chile (Earthquake Assistance)

Mark Simmonds: To ask the Secretary of State for International Development what discussions have taken place with the government of Chile about redevelopment assistance following the earthquake in the northern Andean region. [6937]

Mr. Thomas: Based on reports of the Chilean Disaster Management Office to the United Nations, the earthquake that affected Chile on 13 June caused nine deaths and 100 injured. The Government of Chile has not requested international assistance. DFID has not had discussions with the Government of Chile following the earthquake.

Civil Society Challenge Fund

Mark Simmonds: To ask the Secretary of State for International Development what assessment he has made of the effectiveness of the Civil Society Challenge Fund. [7367]

Mr. Thomas: All Civil Society Challenge Fund (CSCF) project partners must submit an annual narrative and financial report detailing progress against agreed outcomes. Every year 30 per cent. of these are selected for comprehensive appraisal by external consultants, the rest are assessed internally.

Every CSCF partner must produce a Project Completion Report detailing successes, failures and lessons learned. All of these are fully appraised by external consultants. In addition, DFID encourages all CSCF project partners to carry out a full evaluation towards the end of project. These evaluations are also fully appraised by our external consultants.

DFID also undertakes a number of field visits each year to a cross section of CSCF projects to verify the progress being made.

Colombia

Mark Simmonds: To ask the Secretary of State for International Development what recent discussions his Department has had with the US administration regarding political instability in Colombia. [7368]

Mr. Thomas: DFID has not had direct discussions with the US Administration on political instability in Colombia.

The British and US Governments have regular discussions on issues of shared interest. The discussions include Colombia where we have a common interest in helping Colombia tackle the inter-connected problems of illegal drugs, armed conflict and human rights abuses. Britain and Colombia are also part of the G24, the group drawn from participants at the London Meeting of International Support to Colombia in July 2003 that meets regularly in Bogota to carry forward the relationship with and support to the Government of Colombia.

Female Education

Mr. Jim Cunningham: To ask the Secretary of State for International Development what recent assessment he has made of progress towards access to reproductive education for women in third world countries. [6986]

Hilary Benn: The most recent assessment of progress is that contained in the United Nations Population Fund (UNFPA) Report: State of the World Population 2004: "The Cairo Consensus at Ten: Population Reproductive Health and the Global Effort to End Poverty". The report shows areas of progress in meeting the 1994 Cairo goal of ensuring universal voluntary access to a full range of reproductive health, education, information, care and services by 2015.

Many countries have established or are developing reproductive health programmes and are recognising also the links between female education and reproductive health. But millions of people—particularly poor women—still lack access to quality services, including accurate information, education and modern family planning methods. This is why DFID continues to give priority to supporting reproductive health and rights for women.

Global Environment Facility

Mr. Byers: To ask the Secretary of State for International Development how much the UK is due to pay into the Global Environment Facility in 2005; how much has been contributed to date; and if he will make a statement. [7417]

Mr. Thomas: The Global Environment Facility (GEF) provides grants and concessional funds to help developing countries fund projects and programmes that protect the global environment. Established in 1991, the GEF is the designated financial mechanism for the international conventions on biodiversity, climate change, persistent organic pollutants and desertification. The GEF also supports projects that protect international waters and the ozone layer. Since 1991, the GEF has provided $4.5 billion in grants and generated $14.5 billion in co-financing from other partners for projects in developing countries and countries with economies in transition.

Donor nations commit funds to replenish the facility every four years. To date, DFID has contributed £89.5 million under the GEF 1 (1994–98) and £85.25 million under GEF 2 (1998–2002). Under GEF 3 (2002–06), DFID has committed to a core contribution of £103 million and provided an additional £15 million as a signal of our commitment to addressing global

environmental problems, making the UK the fourth largest donor to the facility. Therefore, in 2005–06, the UK will contribute £29.5million.

Negotiations for the fourth replenishment of the GEF (2006–10) began in June and will conclude in December 2005.

Honours

Mr. Pope: To ask the Secretary of State for International Development how many officials currently in the Department received honours in the recent Queen's Birthday Honours List; and at what rank of honour. [5116]

Mr. Thomas: I refer my hon. Friend to the response given by my right hon. Friend the Chancellor of the Duchy of Lancaster on 22 June 2005, *Official Report*, column 1059W.

Mozambique

Mr. Arbuthnot: To ask the Secretary of State for International Development what assistance he plans to give to Mozambique to establish *(a)* river and *(b)* coastal transport to improve its transport infrastructure; and if he will make a statement. [6730]

Hilary Benn: The majority of DFID's financial assistance in Mozambique is provided directly to the Government of Mozambique to meet agreed poverty reduction priorities, of which infrastructure is one. DFID has no plans to provide specific support to improve either river or coastal transport in Mozambique.

Sri Lanka

Gregory Barker: To ask the Secretary of State for International Development if he will make a statement on the role of his Department in the provision of relief aid in Sri Lanka. [5945]

Mr. Thomas: The Government have donated over £7 million directly to aid relief and recovery in Sri Lanka in the immediate aftermath of the Tsunami. DFID funded seven flights for the Disasters Emergency Committee, seconded four staff to help with relief work and made direct grants to United Nations Agencies and international non-governmental organisations to provide shelter, water sanitation equipment, food and other essential help to Tsunami victims. The secondments involved providing an air operations co-ordinator, two shelter advisers and an adviser to the United Nations Humanitarian Information Centre. DFID also provided a member of staff as part of the United Nations Disaster Assessment and Co-ordination team. Sri Lanka has also benefited from some of the £26.5 million disbursed as regional support to the UN, and the £50 million that the Treasury estimates will be given in tax relief on public contributions to the Disasters Emergency Committee Appeal.

During the relief and recovery phase, DFID has supported the humanitarian work of Help Age, World Vision, Save the Children Fund, the International Committee of the Red Cross, the Sri Lankan Red Cross, the United Nations Children's Fund, the World Health Organisation, the United Nations Office for the Co-ordination of Humanitarian Affairs, the World Food Programme and the United Nations Security Co-ordinator in the areas under LTTE control in the North and East of the island. The United Nations has commented that the relief effort in Tamil areas has been impressive. Our humanitarian advisers in-country are monitoring the international response and are confident that aid is getting to those in need.

In addition to providing relief assistance, DFID has agreed to meet the cost of 10 per cent. of the interest on Sri Lanka's debt repayments to the International Financial Institutions over the next 10 years. This support is expected to be worth some £41 million and will be used for post-tsunami and poverty-reduction work. Further financial support for longer-term reconstruction is under consideration. DFID stands ready to assist in the establishment of a Post Tsunami Operational Management Structure and a Post Tsunami Recovery and Reconstruction Plan.

The initial relief operation did go well, largely in all areas. However more needs to be done to allow the numerous donors to start reconstruction and to more actively involve affected communities in the planning of that process. The sheer amount of work required to obtain land has delayed the implementation of reconstruction. On my recent visit to the east and south of Sri Lanka I met with many families affected by the tsunami disaster and numerous national and international non-governmental organisations, United Nations and government officials working to support them.

Sudan

Mr. Drew: To ask the Secretary of State for International Development what assessment he has made of the number of people returning to the South of Sudan; and what assistance is being provided for resettlement. [6818]

Hilary Benn: According to the United Nations (UN), 360,000 Internally Displaced People (IDPs) returned to Southern Sudan during 2004. This year the UN estimates that between 500,000 and 1.2 million people will return during 2005, including both IDPs and refugees from neighbouring countries. The UN is currently drawing up a returns plan that will detail the support returnees receive both during their journey and when then arrive home. We expect this will be released within the next few weeks. DFID has provided £45 million to the UN 2005 Workplan for Sudan, over half of which has been allocated by the UN Humanitarian Coordinator to support humanitarian operations and returns in the South.

Mr. Drew: To ask the Secretary of State for International Development what assessment he has made of the humanitarian conditions of Ethiopian refugees who have settled in Pibor in Sudan; and if he will make a statement. [6819]

Hilary Benn: According to the United Nations High Commission for Refugees (UNHCR), the humanitarian conditions of the Ethiopian refugees in Pibor are very poor, but are no worse than the many other residents living in the area. The refugees originate from Gambella in Ethiopia and have settled with the agreement of

UNHCR and the State of Jonglei Government. There are approximately 500 refugees temporarily accommodated in an old school.

The UNHCR and the non-governmental organisation, the Swedish Free Mission (SFM) are assisting the refugees. SFM is providing shelter, water and sanitation. Food is mostly delivered via air drops by the World Food Programme. The Jonglei State Government have also provided the refugees with land to cultivate; the SFM will provide them with tools and seeds. The Department for International Development is providing £1.7 million to the NGO Medecins Sans Frontieres in the region for health assistance to the general population, including the refugees.

Mr. Drew: To ask the Secretary of State for International Development what discussions he has had with the UN High Commission on Refugees on children born and abandoned after rape in the Habila area of Sudan. [6820]

Hilary Benn: While I have not discussed this particular issue with United Nations High Commission for Refugees (UNHCR), I know that their staff in West Darfur are monitoring the situation closely and supporting victims of rape and their children. I have made clear to the authorities in Sudan that I deplore the occurrence of rape throughout the crisis in Darfur. It is clear that rape is under-reported due to fear of retribution and social stigma. During my recent visit to Sudan, I raised this in my meetings with UN representatives, and with the Sudanese Minister of Humanitarian Affairs and other Sudanese officials.

Mr. Drew: To ask the Secretary of State for International Development what assessment he has made of the level of repatriation of people from Chad to Sudan. [6821]

Hilary Benn: According to the United Nations High Commissioner for Refugees (UNHCR), most Sudanese refugees in Chad (numbered at an estimated 200,000) do not intend to return home this year, largely due to their lack of confidence in security in Darfur. However, according to UNHCR, over the last three months, around 20,000 people have spontaneously returned from Chad to Sudan. These people are returning from border areas rather than refugee camps; most of them appear to be returning to Darfur for the planting season rather than to settle permanently at this stage. It is essential that repatriation only occurs on a voluntary basis.

Mr. Drew: To ask the Secretary of State for International Development what representations he has made to the Government of Sudan on conflict between internally displaced persons and the police in Soba Aradi, Khartoum. [6844]

Hilary Benn: On 18 May around 15 people died when violence erupted in the Soba Aradi camp for internally displaced persons (IDPs) south of Khartoum, when attempts were made to move the IDPs to a new camp. On 19 May, I issued a statement expressing the UK's grave concern and called on all sides to prevent any further loss of life. I urged the Government to respect the human rights of the IDPs, protect its citizens and bring those responsible to justice. I followed this up during my visit to Sudan between 12–14 June, and pressed the First Vice-President on the importance of improving relations between IDPs and local police.

The British ambassador in Khartoum also raised the incident with the Government, and pressed them to investigate the incident in consultation with the Joint National Transition Team under the Comprehensive Peace Agreement, and to take the necessary steps to prevent it happening in the future.

We have repeatedly made clear to the Government that all returns and relocations must be entirely voluntary and take place in line with the established international monitoring mechanisms that are in place.

Taxis

David T.C. Davies: To ask the Secretary of State for International Development how much the Department has spent on taxis in each of the last five years. [6495]

Mr. Thomas: Figures for travel costs within administration costs budgets for years which information is readily available are shown as follows:

2004-05—£248,300

The figure provided includes costs for contracted taxi and privately arranged hire. It is not possible to disaggregate separate costs for taxis for earlier years without incurring a disproportionate cost. The information for earlier years is not readily available and in some cases will no longer be held.

All official travel is undertaken in accordance with the rules contained in DFID's staff handbook, which reflects the requirements of the Civil Service Management Code.

DEFENCE

Afghanistan (Deployment)

Mr. Wallace: To ask the Secretary of State for Defence what the projected levels of deployment to Afghanistan for his Department's personnel is by the *(a)* end of 2005, *(b)* middle of 2006 and *(c)* end of 2006. [6435]

Mr. Ingram: At the end of 2005 projected levels of deployment to Afghanistan will be very similar to current levels at around 1,000 personnel.

By the middle of 2006 the HQ Allied Rapid Reaction Corps (ARRC) Group will have deployed to lead the International Security Assistance Force (ISAF) for nine months from May 2006. We are also developing plans for the potential deployment offerees to the south of Afghanistan to enable the UK to play a key role in Stage 3 of ISAF expansion.

An announcement will be made to Parliament once decisions have been made.

Air Tanker Fleet

Mr. Hoyle: To ask the Secretary of State for Defence what the delivery dates are for the new air tanker fleet; from which air centre it will fly; and at which centre it will be serviced and repaired. [5762]

Mr. Ingram: I refer my hon. Friend to my answer of 13 June 2005, *Official Report*, column 17W, to the hon. Member for Cotswold (Mr. Clifton-Brown).

Armoured Vehicle Training

Mr. Robathan: To ask the Secretary of State for Defence what the total public expenditure to date is on the private finance initiative with the Landmark Training Consortium to provide armoured vehicle training; whether this includes cancellation costs; and if he will make a statement. [6068]

Mr. Ingram: The Defence Procurement Agency PFI assessment costs for the Armoured Vehicle Training Service (AVTS) was £5 million. This includes costs such as legal, technical and financial advice but not the Ministry of Defence internal costs. This is not held centrally and could be provided only at disproportionate cost. No cancellation costs have been incurred. I announced to the House by means of a written ministerial statement the way forward for AVTS on 15 June 2005, *Official Report*, column 13WS.

Mr. Gerald Howarth: To ask the Secretary of State for Defence what assessment he has made of the implications of the decision not to proceed with the Armoured Vehicle Training Services project under the private finance initiative for the eventual solutions for other training contracts. [6246]

Mr. Ingram: Since each PFI case is considered on its merits, no formal assessment has been made and in my written Statement to the House on 15 June 2005, *Official Report*, column 13WS, I confirmed that although not continuing with the Armoured Vehicle Training Services PFI, the Ministry of Defence, supported by the Private Finance Unit, will continue to use PFI where it can be shown to deliver better value for money.

Mr. Gerald Howarth: To ask the Secretary of State for Defence what role a public-private partnership will play in the delivery of the Armoured Vehicle Training Services requirement. [6248]

Mr. Ingram: A revised procurement strategy is being worked up by the Defence Procurement Agency to deliver the requirement. No decisions have yet been made on public-private partnership forming part of the overall future solution.

Mr. Gerald Howarth: To ask the Secretary of State for Defence what the costs were of the assessment of the suitability of a private finance initiative solution for the Armoured Vehicle Training Services requirement. [6249]

Mr. Ingram: The Defence Procurement Agency PFI assessment cost of the Armoured Vehicle Training Service was £5 million. This includes costs such as legal, technical and financial advice but not the Ministry of Defence internal costs. This is not held centrally and could be provided only at disproportionate cost.

Armoured Vehicles

Ann Winterton: To ask the Secretary of State for Defence (1) whether *(a)* BAE Systems Land Systems and *(b)* its contractors will be purchasing any of the (i) body (excluding armour) and (ii) drive components for the manufacture of the Panther Command and Liaison vehicle from (A) Iveco and (B) other non-UK contractors; [5364]

(2) what difference there is between the *(a)* body (excluding armour), *(b)* engine, *(c)* gearboxes, *(d)* drive mechanism and *(e)* wheels of the (i) Panther Command and Liaison vehicle and (ii) Italian Light Multirole Tactical vehicle. [5363]

Mr. Ingram: The United Kingdom's Panther Command and Liaison Vehicle when compared to an Italian Light Multirole Tactical Vehicle in the same role would have no significant difference in the body, engine, gearbox, drive mechanism or wheels. BAE Systems Land Systems will purchase a complete base vehicle from Iveco. This will include the drive components and the vehicle body but will exclude the roof. The contractor for the supply of the vehicle roof will be determined by BAE Systems Land Systems before Panther enters full manufacture.

DEFCON 534

Mr. Hancock: To ask the Secretary of State for Defence (1) what arrangements are in place to monitor his Department's contractors payments performance against their contractual requirements under DEFCON 534; [4249]

(2) whether DEFCON 534 is included in all of his Department's contracts. [4515]

Mr. Ingram: Unless it is known for certain from the outset that there will be no sub-contractor involvement it is policy to include this DEFCON in all contracts.

The Ministry of Defence has no centrally co-ordinated arrangement in place to monitor defence contractors' payments performance to their sub-contractors under the terms of DEFCON 534 as, due to the high number of contracts let by the Department, it would not be cost effective to do so. That said, where it is specifically relevant to the performance of an MOD contract, Integrated Project Teams can include a performance indicator to measure payment of sub-contractors in the Supplier and Customer Performance Measurement tool, a non-contractual tool implemented to measure performance on contracts with a value of £5 million or over.

In addition, in the autumn of 2001, MOD agreed with industry a set of Codes of Best Practice (MOD/Industry Commercial Policy Group Guideline no. 5) which include principles requiring Prime Contractors

"to pay promptly for work done in accordance with contracts made".

Departmental Research

Mr. Hancock: To ask the Secretary of State for Defence how many and what percentage of opportunities for research and consulting disseminated by his Department resulted in *(a)* research reports and *(b)* deliverable projects in (i) 2001–02, (ii) 2002–03 and (iii) 2003–04. [3414]

Mr. Ingram: Details of the Department's spend on External Assistance of which consultancy is a part have been reported to Ministers since 1995–96 and

summaries, broken down by MOD Top Level Budget and category, have been placed in the Libraries of both Houses.

Research opportunities disseminated out of the MOD's own capabilities are an increasing feature of our programme. Historically, the majority of research was undertaken in-house. However, the substantial changes of structure from creating QinetiQ, as a private public partnership, and Dstl, as a Trading Fund, have allowed us to offer an increasing amount of opportunities to industry and academia.

The Department does not hold centrally information requested on how many and what percentage of such research and consulting resulted in *(a)* research reports and *(b)* deliverable projects. However, the Department's business processes ordinarily require reports to be generated from extramural consultancy and research. MOD's research generally provides knowledge for broad capability requirements rather than being focused on specific projects.

Food Procurement

Mr. Paice: To ask the Secretary of State for Defence how much was spent by his Department on public procurement of food in the most recent year for which figures are available; and what proportion of that expenditure was covered under Crown immunity on food safety matters. [5787]

Mr. Ingram: The amount spent on the procurement of food for the armed forces during financial year 2004–05 was approximately £134 million, excluding the cost of Operational Ration Packs.

The Food Safety Act (1990) applies in England, Scotland and Wales, and to a limited extent in Northern Ireland and has applied to MOD premises since the removal of Crown immunity on 1 April 1992. Therefore, none of the food supplied to the armed forces, in terms of cost or volume, is covered under Crown Immunity.

FRES

Mr. Robathan: To ask the Secretary of State for Defence when he expects to announce confirmed contracts for the Future Rapid Effects System. [6067]

Mr. Ingram: To date, two Technology Demonstrator Programmes (TOP) have been awarded—for Capacity and Stowage (with Dstl) and Hard Kill Defensive Aid Suite (with Akers Kutbruk). Contracts are currently being negotiated in respect of Chassis Concepts, Electronic Architecture and Electric Armour. In addition, tender assessment of Integrated Survivability is under way; an Invitation to Tender has been issued for a Gap Crossing TDP; and a TDP to assess Regenerative Chemical, Biological, Radiological and Nuclear (CBRN) is likely to proceed shortly.

Contracts will be awarded when mutually acceptable terms and conditions have been agreed, and formal announcements will be made in due course.

Mr. Robathan: To ask the Secretary of State for Defence what his latest estimate is of the total cost of the Future Rapid Effects System; when he expects it to be in-service; and if he will make a statement. [6069]

Mr. Ingram: The Future Rapid Effect System (FRES) is in its initial Assessment Phase. Studies being carried out during this phase will enable us to define programme costs and an appropriate in-service date (ISD) for endorsement at the main investment decision.

The ISD will not be formally endorsed until then, but our current planning assumption is that the early variants of FRES will be introduced to service early in the next decade, with a phased approach to achieving full operational capability thereafter.

Exact costs have yet to be established, however the expected procurement cost of FRES is potentially in the order of £14 billion, subject to the confirmation of current planning assumptions.

Future Aircraft Carrier Project

Mr. Gerald Howarth: To ask the Secretary of State for Defence what plans he has to make public the findings of the 100-day review into the Future Aircraft Carrier (CVF) project. [6243]

Mr. Ingram: The 100 day plan is the most recent programme review undertaken as part of Assessment Phase activities on the Future Aircraft Carrier project. The Alliance Participants—MOD, BAE Systems, Thales UK and Kellogg Brown and Root Ltd. UK—have worked together to complete the review on time and Ministers are currently considering the report's findings. Given the commercial sensitivity of much of the information, it was never our intention to publish the report in its entirety. Its outcome will, however, feature prominently in future decision making and the arrangements for the Demonstration and Manufacture Phase.

Gibraltar

Mr. Hoyle: To ask the Secretary of State for Defence how many ships the Royal Navy can dock at Gibraltar at any one time. [7202]

Mr. Ingram: British Forces Gibraltar has seven operational berths, two of which are classified as Z berths capable of supporting nuclear powered warships (NPW). The number of vessels that could be supported at any one time would depend on size, draught, and their compatibility to berth ships alongside each other, the level of support required and the presence of any NPW.

Mr. Hoyle: To ask the Secretary of State for Defence what his Department's percentage land holding in Gibraltar is, broken down by service use. [7204]

Mr. Ingram: The current size of the Ministry of Defence estate in Gibraltar is 149.9 hectares and this represents 22.9 per cent. of the total land area. This calculation includes those sites already transferred to the Gibraltar Government under the Lands Agreement signed between the Secretary of State for Defence and the Chief Minister in April 2004. When the implementation of this Agreement is complete (expected to be during 2010), the size of the estate will have reduced to 118.9 hectares or 18.18 per cent. of Gibraltar's total land area.

It is impossible to break these figures down into individual service use, because of the tri-service nature of operations in Gibraltar.

Mr. Hoyle: To ask the Secretary of State for Defence how many naval ships from other countries have docked at Gibraltar in the last three years. [7209]

Mr. Ingram: 38 warships from other countries docked in Gibraltar during the last three years. 10 other warships conducted bay transfers of stores and/or personnel with Gibraltar during this time; however, they did not dock alongside.

Sir Nicholas Winterton: To ask the Secretary of State for Defence what assessment he has made of the effect of the planned implementation of his Department's contractorisation plan for Gibraltar on *(a)* number of jobs available in his Department and *(b)* number of remaining personnel employed directly by his Department; what steps his Department plans to take to ensure that its contractor will be able to pay its creditors' taxes and redundancy payments; and what steps his Department plans to take to ensure that local jobs are retained; and if he will make a statement. [3450]

Mr. Ingram: There are currently around 296 locally employed civilian posts in scope to transfer under the Infrastructure Service Provider (ISP) Contract. It is not possible to say how many posts the successful contractor will retain until the bids have been evaluated and a contractor selected.

The total number of locally employed civilian (LEC) staff in Gibraltar is approximately 1,000. The ISP will represent a 30 per cent. reduction of the locally employed staff in Gibraltar.

As a part of the selection process, the MOD will ensure that only companies capable of delivering their legal and contractual obligations will be invited to tender.

The Ministry of Defence is bound by and follows the laws of Gibraltar pertaining to recruitment. For those staff transferred to the successful ISP contractor, the provisions of the acquired rights directive (similar to TUPE provisions) activated under Gibraltar Law will apply.

Helicopters

Mr. Hancock: To ask the Secretary of State for Defence how many helicopters in each class are *(a)* available for use, *(b)* under repair and *(c)* redundant or unrepairable. [6009]

Mr. Ingram: The following table provides details of the in-service helicopters that are available for use, under repair, redundant or unrepairable as at 1 June 2005:

Helicopter type	*Available for use*	*Under repair*	*Unrepairable/ Redundant*
Chinook Mk 2/2a	40	13	None
Lynx Mk 7	60	22	16
Lynx Mk 9	15	7	2
Lynx Mk 3	23	8	8
Lynx Mk 8	24	10	2
Merlin Mk 1	29	13	2
Merlin Mk 3	15	7	None
Puma Mk 1	31	7	8
Gazelle Mk 1	107	None	12
Sea King Mk 3	13	6	None
Sea King Mk 3a	4	2	None
Sea King Mk 4	29	8	None
Sea King Mk 5	13	3	1
Sea King Mk 6	3	2	40
Sea King Mk 6c	5	None	None
Sea King Mk 7	9	2	None
Apache AH Mk1	56	11	None
Agusta A109	4	None	None

In addition to the aircraft listed in the table, the department contracts for a Commercially Owned Military Registered (COMR) fleet of helicopters. These helicopters are on the Military Register and flown by military aircrew, but are owned and maintained by commercial operators, these are shown in the following table. Servicing of the COMR helicopters is the responsibility of the leasing agency.

Helicopter type	*Available for use*	*Under repair*	*Unrepairable/ Redundant*
Bell 412	15	None	None
Bell 212	7	None	None
Dauphin	2	None	None
Single Squirrel	37	None	None
Twin Squirrel	3	None	None

Iran (Naval Equipment)

Mr. Hancock: To ask the Secretary of State for Defence what steps are being taken to recover the naval equipment held by the Iranian authorities; and if he will make a statement. [2974]

Mr. Ingram: Diplomatic discussions are ongoing.

Iraq

Adam Price: To ask the Secretary of State for Defence (1) whether the British Deputy Senior Judge Advocate in Iraq referred to in a letter from the former Minister of State to the hon. Member for Carmarthen, East and Dinefwr submitted regular reports to his British superiors; [235]

(2) what the remit was of the British Deputy in the office of the Senior Judge Advocate in Iraq in relation to *(a)* detainees and *(b)* operational matters; [238]

(3) for what reasons and in what capacity Colonel Chris Terrington saw a version of the CJTF-7 Interrogation and Counter-Resistance policy document in December 2003; [237]

(4) which *(a)* sections and *(b)* drafts of the interrogation and counter-resistance policy document were seen by the British Deputy Senior Judge Advocate in Iraq; and what comments he made; [239]

(5) whether the UK officer acting as Deputy Senior Judge Advocate in Iraq advised *(a)* the US authorities and *(b)* his supervisors in the chain of command that some of the interrogation techniques in the CJIF-7 Interrogation and Counter-Resistance Policy Document

(i) were inhumane under UK case law and (ii) constituted a potential breach of the Geneva Conventions in the view of the Government; [271]

(6) whether the British deputy in the office of the Senior Judge Advocate in Iraq asked Major George O'Kane to investigate allegations of abuse at Abu Ghraib; [273]

(7) whether the British deputy in the office of the Senior Judge Advocate in Iraq saw the International Committee of the Red Cross working paper based on a visit to Abu Ghraib in October 2003. [274]

Mr. Ingram: I undertook to write to you in answer to your Parliamentary Questions of 23 May 2005, *Official Report*, columns 24–25W, on the role of UK staff embedded within the office of the Staff Judge Advocate in the Combined Joint Task Force 7. I wrote to you on 16 June correcting an inaccuracy in a previous letter and attaching responses to these outstanding Parliamentary Questions. I am writing to you again now to set out in the body of a letter the answers I gave you so that they can be published in the *Official Report*.

The British Officer embedded within the office of the Staff Judge Advocate had a very limited role in relation to detainees. In addition to providing comments on a US interrogation policy document in August 2003, he produced a summary of an ICRC Report in November 2003, which was circulated to senior personnel within CJTF-7. With regard to operational law, he provided advice on targeting and operational planning at Corps level. This involved the application of the Laws of Armed Conflict and US Rules of Engagement.

The British Officer recalls submitting reports, both orally and in writing, to his British superiors. We have not been able to locate copies of those reports.

The British Officer did not ask Major O'Kane to investigate allegations of abuse at Abu Ghraib.

We have established that the British Officer did not see a version of the CJTF-7 "Interrogation and Counter-Resistance" policy. The British Officer played no part in drafting that policy. This is contrary to my letter of 31 January 2005. I apologise for the error. In fact, the British Officer saw a separate US interrogation policy document dated 27 August 2003.

That Document was entitled "ABU GHURAYB: Saddam Fedayeen Interrogation Facility (SFIF) Detainee Interrogation Policy". We understand that it was drafted to apply to one section within Abu Ghraib, and the Fay report confirms that it was quickly superseded by the September version of the Interrogation and Counter-Resistance" policy, which we have not seen.

It sets out a range of interrogation techniques which were considered to be lawful under the prevailing US interpretation of the Geneva Conventions. The document was written by and for US personnel to whom the US interpretation applied. The document was passed to us in confidence, and we cannot release details of its contents.

I am placing a copy of this answer in the Library of the House.

Harry Cohen: To ask the Secretary of State for Defence what action has been taken on unexploded ordnance in the region of Iraq where the UK has responsibility; how much has been *(a)* allocated and *(b)* spent to date by the UK for this purpose; how much ordnance has been destroyed; what estimate has been made of unexploded ordnance still to be dealt with in the area; and if he will make a statement. [2919]

Mr. Ingram: The UK takes seriously its obligations to deal with unexploded ordnance in Iraq. Since the end of major combat operations, a UK Joint Force Explosive Ordnance Disposal Group (currently about 90 strong) has been deployed alongside other coalition forces, NGOs and contractors clearing sites containing unexploded ordnance. During the war fighting phase over 200,000 items of munitions were destroyed by coalition teams. Since then a further 860,000 items have been recovered or destroyed by UK teams. The UK has uncovered 67 formal ammunition depots in the region of Iraq where the UK has responsibility. The UK has currently cleared 64 of these depots; the final three are in the process of being cleared.

The Department for International Development has provided further funding to this area through UN-related organisations and a UK-registered charity, Mines Advisory Group. £30 million has been provided to the United Nations Development Group International Trust Fund to support Explosive Ordnance Disposal capacity building and clearance. In addition, £4 million has been directed to the United Nations Mines Action Service to provide the UN's humanitarian agencies with a responsive and co-ordinated mine action capability to facilitate the delivery of humanitarian assistance. Further funding of around £2 million has been directed through the Mines Advisory Group to facilitate a number of projects.

Patrick Mercer: To ask the Secretary of State for Defence what plans there are for withdrawing UK troops from Iraq. [7606]

Mr. Ingram: The United Kingdom is committed to remaining in Iraq for as long as the Iraqi Government judge that the coalition is required to provide security and assist the Iraqi Security Forces (ISF). The prevailing security situation, progress on the political process and development of the ISF will be factors in determining the timeline for eventual UK force level reductions.

Iraq/Afghanistan

Mr. Meacher: To ask the Secretary of State for Defence how many *(a)* US soldiers and *(b)* UK soldiers have been killed in (i) Iraq and (ii) Afghanistan in each month since the end of the wars in those countries. [5044]

Mr. Ingram *[holding answer 16 June 2005]:* Since the end of decisive operations in Iraq was announced in May 2003, a total of 53 UK soldiers have died.

Since the Bonn agreement was signed in December 2001, four UK soldiers have died in Afghanistan.

The following table shows the monthly breakdown.

	2001	2002	2003	2004	2005
January	—	—	—	3(1)	10
February	—	—	—	1	0
March	—	—	—	0	1
April	—	(1)	—	0	0
May	—	—	2	0	2
June	—	—	6	1	—
July	—	—	1	1	—
August	—	(2)	6	4	—
September	—	—	1	3	—
October	—	—	1	2	—
November	—	—	1	4	—
December	—	—	2	1	—

Note:
Figures in brackets relate to deaths in Afghanistan; all other figures refer to deaths in Iraq.

The number of US soldiers that have died on operations is a matter for the US Government.

Joint Strike Fighter

Mr. Jack: To ask the Secretary of State for Defence how much the UK has contributed to the development costs of the Joint Strike Fighter; and what further pre-delivery payments will be required. [6830]

Mr. Ingram: The United Kingdom's financial commitment to the current Systems Design and Development phase is limited to $2 billion. No further pre-delivery payments have been agreed.

Joint US Operations

Mr. Gerald Howarth: To ask the Secretary of State for Defence (1) how many munitions were fired by RAF aircraft in support of US forces during their involvement in Operation Spear; [6890]

(2) what the rules of engagement were for UK forces deployed in support of the recent US Operation Spear in north-western Iraq; [6888]

(3) how many sorties were flown by UK aircraft in support of the recent US Operation Spear in north-western Iraq; [6887]

(4) how many RAF tornadoes were used in support of the recent US Operation Spear in Iraq; and which mark of tornado was deployed; [6886]

(5) if he will list the UK forces used in support of the recent US Operation Spear in north-western Iraq. [6885]

Mr. Ingram: No specific sorties were planned in support of Operation Spear although three RAF Tornado GR4s on routine patrols were tasked to respond to calls for assistance from US forces during the operation. UK aircraft did not expend any weapons in support of Operation Spear. We do not comment on rules of engagement for reasons of operational security.

Lynx Mk 3/8 Helicopter

Mr. Hancock: To ask the Secretary of State for Defence pursuant to his Answer of 15 June 2005, *Official Report*, column 442W, on the Royal Navy, what the expected out-of-service date is for the Lynx Mk 3/8 helicopter. [6482]

Mr. Ingram: The expected out-of-service date for the Lynx Mk 3 is 2012 and for the Lynx Mk 8 is 2014.

Ministerial Meetings

Mr. Hoyle: To ask the Secretary of State for Defence what the average time is that an hon. Member has waited for a meeting with him to be arranged since his appointment. [7618]

John Reid: Together with my ministerial colleagues, I endeavour to meet with hon. Members at the earliest possible opportunity after I receive a request, consistent with my other diary commitments.

NAO Report

Mr. Hancock: To ask the Secretary of State for Defence what his timescale is for responding to the National Audit Office report on military preparedness; what form his response will take; and if he will make a statement. [6011]

John Reid: The Ministry of Defence welcomes the National Audit Office report on Assessing and Reporting Military Readiness which concludes that the MOD has a good system for reporting the readiness levels of the armed forces, an increasingly good understanding of the risks to readiness and good plans in place to mitigate these risks.

We are already taking forward work in the areas covered by the NAO's recommendations for further technical improvements in our internal risk management arrangements and in the public reporting of readiness under our public service agreement. Information on the readiness of our armed forces is routinely available on the MOD website at www.mod.uk and this shows that at the end of March no forces were reporting critical weakness which would make it impossible to deploy them on new operations if required. The National Audit Office reports to Parliament. The Department will respond to any recommendations that the Public Accounts Committee might make, if they choose to do so, in due course.

Omagh Resident Battalion

Lady Hermon: To ask the Secretary of State for Defence what criteria were used when deciding whether to replace the 1st Battalion King's Own Scottish Borders at Omagh when they conclude their term as the Omagh Resident Battalion in August 2006. [7155]

Mr. Ingram: The decision not to replace the 1st Battalion The King's Own Scottish Borderers at Omagh when they conclude their term as the Omagh Resident Battalion in August 2006 was based on the assessment by the General Officer Commanding (Northern Ireland) and Chief Constable Police Service

of Northern Ireland (PSNI) of the improving security situation. It reflects the increasing success of the PSNI in dealing with the threat from terrorism without routine military support.

The Army remains committed to providing the support that the PSNI requires to counter the threat from terrorism and to prevent potential public disorder, and will continue to keep force levels in Northern Ireland under regular review.

Portsmouth Nuclear Accident Plan

Mr. Hancock: To ask the Secretary of State for Defence if he will make available in the Library a copy of the Portsmouth nuclear accident plan. [6794]

Mr. Ingram: In the highly unlikely event of a nuclear incident, in accordance with the independent national regulations, the Radiation Emergency Preparedness and Public Information Regulations (REPPIR) 2001, the city of Portsmouth is covered by a detailed emergency plan (PORTSAFE) for which the local authority (Portsmouth city council) is responsible. This is available locally in public libraries and can also be obtained by contacting the Portsmouth city council emergency planning officer.

Prisoners of War (Compensation)

Mr. Dismore: To ask the Secretary of State for Defence if he will make a statement on the memorandum of 13 July 2001 from Mr. Alan Mayers of the Department's Far East Prisoners of War Group to Mr. John Hardy, Army Historical Branch, which states that race was included as a deciding factor in the eligibility criteria for the compensation scheme. [6071]

Mr. Touhig: This document was a statement by one official in 2001. It did not and does not represent the view of the Government. The question of whether the application of one of the eligibility criteria of the Ex Gratia Payment Scheme for Far East Prisoners of War and Civilian Internees may have constituted race discrimination is the subject of judicial review proceedings.

Mr. Dismore: To ask the Secretary of State for Defence if he will make a statement on the minutes of the meeting held on 22 November 2004 in the Cabinet Office concerning the Far East Prisoners of War Compensation Scheme which agreed that the eligibility criteria should define UK nationals as civilian internees who were British at the time of their incarceration. [6072]

Mr. Touhig: There was no meeting of the inter-departmental working group in the Cabinet Office on 22 November 2004 to discuss the Ex Gratia Payment Scheme for former Far East Prisoners of War and Civilian Internees and it is assumed that this question relates to the meeting held on 22 November 2000. The question under consideration at that meeting was whether eligibility relied on an applicant having been British at the time of internment or at the time of making a claim under the Ex Gratia Payment Scheme. The decision taken was that the relevant date was the time of captivity and that any subsequent change of nationality did not affect eligibility.

Royal Fleet Auxiliary

Mr. Keetch: To ask the Secretary of State for Defence what the *(a)* class and role, *(b)* date of entry into service, *(c)* expected date of removal from service and *(d)* average annual cost of maintenance over the period of service is of each ship of the Royal Fleet Auxiliary; and if he will make a statement. [6169]

Mr. Ingram: The information requested is shown as follows:

Ship	*In service date*	*Expected out of service date*[1]	*Class*	*Role*
Argus	1988	2020	—	Aviation Training Ship and Primary Casualty Reception Ship
Diligence	1984	2014	—	Forward Repair Ship
Grey Rover	1970	2006	Rover	Small Fleet Tanker
Gold Rover	1974	2009		
Black Rover	1974	2010		
Oakleaf	1986	2010	Leaf	Support Tanker
Brambleleaf	1980	2009		
Orangeleaf	1984	2009		
Bayleaf	1982	2010		
Fort Rosalie	1978	2013	Fort	Fleet Replenishment Ships
Fort Austin	1979	2014		
Fort George	1994	2019		
Fort Victoria	1994	2019		
Sir Bedivere	1967	2011	Sir	Landing Ship Logistic
Sir Tristram	1967	2006		
Sir Galahad	1987	2006		
Wave Knight	2003	2028	Wave	Fleet Tanker
Wave Ruler	2003	2028		

[1] These dates are kept under regular review in the light of the Royal Navy's requirements.

Detailed records of the cost of maintaining each ship over its entire service are not held. However, the average cost of maintenance is estimated at £3.5 million per annum for each vessel. This includes maintenance on operational vessels, defect rectification, post design work, stock consumption and small packages of

upkeep. In addition an element has been included to reflect the cost of scheduled refits, which are generally undertaken on a five yearly basis for each vessel.

Sandhurst (Security Breach)

Mr. Keith Simpson: To ask the Secretary of State for Defence when he expects to receive the report from the Commandant, concerning the breach of security by a Sun reporter at the Royal Military Academy Sandhurst. [6601]

John Reid *[holding answer 23 June 2005]:* The Commandant has already taken a number of measures to enhance security at Royal Military Academy Sandhurst in particular to ensure that all visitors are escorted at all times. Separately the Adjutant General has directed a detailed review of security procedures and processes. This is expected to conclude within a matter of weeks. I am being kept informed of the progress of this review.

Service Personnel

Mr. Ancram: To ask the Secretary of State for Defence how many British service personnel are *(a)* deployed and *(b)* stationed in (i) Germany, (ii) Northern Ireland, (iii) Bosnia-Herzegovina, (iv) Croatia, (v) Kosovo, (vi) Albania, (vii) the Former Yugoslav Republic of Macedonia, (viii) Sierra Leone, (ix) the Gulf Region, (x) Turkey, (xi) Gibraltar, (xii) Belize, (xiii) Kenya, (xiv) Canada, (xv) the Falkland Islands, (xvi) Cyprus, (xvii) Brunei and (xviii) Afghanistan. [2663]

Mr. Ingram: The approximate number of British service personnel deployed or stationed in the locations specified are shown as follows:

All figures rounded

	Deployed	*Stationed*
Germany	0	22,200
Northern Ireland	0	10,400
Bosnia-Herzegovina	750	0
Croatia	0	0
Kosovo	170	0
Albania	0	0
FYR of Macedonia	10	0
Sierra Leone	10	0
The Gulf Region	9,200	0
Turkey	0	0
Gibraltar	0	560
Belize	0	50
Kenya (training team only)	0	10
Canada (training team only)	0	220
The Falkland Islands	1,150	0
Cyprus	300	2,900
Brunei	0	430
Afghanistan	980	0

The figures in the table do not include personnel serving in loan/diplomatic posts or training detachments.

Training Contracts (PFI)

Mr. Gerald Howarth: To ask the Secretary of State for Defence if he will list the training contracts being considered for private finance initiative solutions. [6247]

Mr. Ingram: A number of requirements are being considered under the private finance initiative which include an element of training provision. These are:

Royal School of Military Engineering—a contract to provide training facilities and construction engineering training for the Royal Engineers.

Defence Training Review—contracts to meet rationalisation objectives while providing in-service specialised military training needs.

Military Flying Training Service—a contract to provide a comprehensive flying training system, some of which may be provided via a PFI route.

A400M Synthetic Training Service—a contract for the provision of training for transport aircraft aircrew.

Battlefield Reconnaissance Helicopter Service Combatant Maritime Rotorcraft Synthetic Training Service—a contract for the provision of training for helicopter aircrew.

Training Exercises (Uzbekistan)

Harry Cohen: To ask the Secretary of State for Defence how many training exercises UK military forces have undertaken with Uzbekistan military forces in each of the last five years; and if he will make a statement. [6741]

Mr. Ingram: In the last five years the United Kingdom forces have undertaken one exercise with the armed forces of Uzbekistan. Exercise TIMUR EXPRESS, a peacekeeping exercise, took place in Uzbekistan from 11 September 2004 to 25 September 2004. It was a company-level exercise, and the 146-person UK element was provided by the Territorial Army. The other states involved were Kazakhstan, Georgia and Ukraine.

Troop Deployment (Basra)

Harry Cohen: To ask the Secretary of State for Defence what discussions his Department has held concerning the deployment of UK troops outside the Basra area; and if he will make a statement. [5012]

Mr. Ingram: The posture of United Kingdom forces in Iraq is kept under constant review. UK forces are already deployed "outside the Basra area", predominately in other parts of Multi-National Division (South East) but also in Baghdad as part of the Multi-National Force—Iraq Headquarters and the NATO Training Mission-Iraq. There are no current plans to change existing UK force dispositions in Iraq.

Uzbekistan

Mr. Moore: To ask the Secretary of State for Defence how many service personnel from the armed forces of Uzbekistan have been trained in the United Kingdom in each year since 1997; and where this training took place. [6995]

Mr. Ingram: Since 1997, personnel from the armed forces of Uzbekistan have been trained in the United Kingdom as follows:

Individual Officer Training at RAF Cranwell

Two cadets in 2004–05

Individual Officer Training at Royal Military Academy Sandhurst

Two cadets in 2004–05

Arms Control Training at RAF Henlow

Three personnel in January 2000

Crisis Management Training at Defence Academy Shrivenham

One Army Major in April 2000

Peace Support Operations Doctrine Seminar at Land Warfare Centre, Warminster

Three personnel in May 2000

Seminar on UK Methodology for Military Aid, at Defence Academy Shrivenham

One Lieutenant Colonel in July 2000

War-Fighting Doctrine Seminar, Land Warfare Centre, Warminster

One Lieutenant Colonel in May 1999

International Collective Training Seminar, Land Warfare Centre, Warminster

One Army Major in February 2003, three in June 2004

Service Personnel Management Course, at Headquarters Army Training and Recruitment Agency, Upavon

One Army Major in July 2004

Course on Managing Defence in a Democracy, Defence Academy Shrivenham

One Lieutenant Colonel in July 2003

MSc in Global Security, at Defence Academy Shrivenham

One Lieutenant Colonel, August 2003 to August 2004

Territorial Army Summer Camps

Two Uzbek cadets in September 2003, six in July 2004

NCO Training Seminar at Infantry Training Centre, Brecon

Two personnel in February 2004

All the listed training is predicated on the ability of the participants to speak English. Consequently, the following numbers of Uzbek officers have received language training:

British Military English Course, at the University of Ripon and York St. John's

21 personnel trained between April 1999 and June 2005

English Military Vocabulary course, at Defence School of Languages, Beaconsfield

One Army Major in May 2003

EDUCATION AND SKILLS

Apprenticeships

Mr. Boswell: To ask the Secretary of State for Education and Skills how many apprenticeships were *(a)* started, *(b)* on programme and *(c)* completed in (i) 2002–03, (ii) 2003–04 and (iii) 2004–05. [6652]

Phil Hope: The information requested is routinely published by the Learning and Skills Council (LSC) in Statistical First Releases (SFRs). The numbers of starts and the number on programme (in-learning) on apprenticeships in 2002/03, 2003/04 and the first three months of 2004/05 are shown in tables 4 and 5 of the LSC SFR "Further Education, Work Based Learning for Young People and Adult and Community Learning—Learner Numbers in England on 1 October 2004", available on the DfES website: http://www.dfes.gov.uk/rsgateway/DB/SFR/s000567/index.shtml

Apprenticeship framework completion rates and the total number of leavers in 2002/03 and 2003/04 will be shown in table 7 of the forthcoming LSC SFR "Further Education and Work Based Learning for Young People—Learner Outcomes in England: 2003/04", due to be published at 9.30 am on 28 June, and will be available on the DfES website: http://www.dfes.gov.uk/rsgateway/DB/SFR/s000583/index.shtml

Provisional figures for the first six months of 2004/05 are available on the LSC's apprenticeships website: http://www.apprenticeships.org.uk/partners/frameworks/apprenticeshipsdata

Mr. Stephen O'Brien: To ask the Secretary of State for Education and Skills what funding has been allocated towards achieving the target of 320,000 apprentices by 2008; and whether she expects the target to be achieved. [7392]

Phil Hope: The Department does not have a target for the number of apprenticeships in 2008. However, we are committed to the continued expansion of apprenticeships, and if growth continues along its current lines, we would expect around 300,000 apprenticeships to be in training by that time.

Mr. Stephen O'Brien: To ask the Secretary of State for Education and Skills how many apprenticeships there were in each year between 1994 and 1996. [7551]

Bill Rammell: Apprenticeships, formerly Modern Apprenticeships, were launched as an initiative in September 1994. By the end of July 1995, there were 2,100 people on apprenticeship programmes. They were fully operational from September 1995 and at the end of July 1996, there were 35,100 people on them. These figures are taken from the DfES Statistical First Release "Government Supported, Work Based Learning for Young People in England: 2001/02", available on the DfES website: http://www.dfes.gov.uk/rsgateway/DB/SFR/s000358/index.shtml.

Autistic Spectrum Disorders

Mrs. Dean: To ask the Secretary of State for Education and Skills how many training courses for those working with people with autistic spectrum disorders are funded through learning and skills councils in *(a)* Staffordshire, *(b)* the West Midlands and *(c)* England. [4416]

Maria Eagle: This is a matter for the Learning and Skills Council (LSC). Mark Haysom, the Council's Chief Executive, will write to the hon. Lady with the information requested and a copy of his reply will be placed in the Library.

Business Support (Hertfordshire)

Mr. Walker: To ask the Secretary of State for Education and Skills what measures she is taking to encourage vocational skills training in Hertfordshire; and if she will make a statement. [756]

Phil Hope: Specific measures to encourage vocational skills training in Hertfordshire are a matter for the Learning and Skills Council. Mark Haysom, the Council's Chief Executive, will write to the hon. Member with this information and a copy of his reply will be placed in the Library.

The Government's Skills Strategy, "21st Century Skills: Realising Our Potential" (July 2003) and "Skills: Getting on in business, getting on at work" (March 2005) set out our plans for increasing opportunities for adults to develop their skills. The 14–19 White Paper, "14–19 Education and Skills", published in February, set out proposals to improve vocational education and qualifications for young people through a national entitlement to specialised diplomas in 14 broad sector areas. Employers, through Sector Skills Councils, will lead in their design and higher education institutions will also have an important role to play.

Letter from Mark Haysom to Mr. Charles Walker, dated 8 June 2005:

Thank you for your recent Parliamentary Question to the Secretary of State for Education and Skills where you ask what measures she will take to encourage vocational skills training in Hertfordshire. The Secretary of State has asked me to reply on her behalf as Chief Executive of the Learning and Skills Council.

In its Strategic Area Review, the LSC for Hertfordshire recognises that the depth and breadth of vocational learning in Hertfordshire is limited. It is working with partners to develop vocational provision for 14–16 year olds. For example, the Increased Flexibility Programme offers young people the opportunity to undertake vocational qualifications, usually undertaking some work at the local College. Nearly 1,500 Hertfordshire young people are currently on the programme. The LSC is also supporting collaboration between schools and colleges for 16–19 year olds, with Colleges leading on developing the vocational elements. Excellent examples of this work can be seen in Welwyn Garden City and Stevenage, with encouraging developments in Hemel Hempstead, Broxbourne and St. Albans. In Bishops Stortford, Hertford Regional College is working with Birchwood High School to develop vocational provision on the school site, with funding support from the LSC.

In many parts of Hertfordshire the Further Education infrastructure is in an unsatisfactory condition. The LSC has supported the development of facilities for Learners with Learning Difficulties and Disabilities at Ware, and for construction at Broxbourne (which is due to open this September). Major campus redevelopments are being planned at 3 of Hertfordshire's 4 Colleges—Oaklands, West Herts and Hertford Regional. Plans for establishing a "Skills Centre" in Hemel Hempstead are also being developed with West Herts College, working closely with the Dacorum schools.

Working with employers, The LSC has established Sector Employer Groups in key sectors for the Hertfordshire economy. These are providing employers with a voice for expressing their needs, and a means of communicating with learning providers so that relevant provision is developed and delivered. We are also working with the University of Hertfordshire and the four Hertfordshire Further Education Colleges to increase the number and range of Foundation Degrees offered in the County through the Colleges and the University of Hertfordshire. We expect to have Foundation Degrees in nine subjects available by September 2005.

I trust this helps with your query.

Community Development Centres

Tim Farron: To ask the Secretary of State for Education and Skills what plans her Department has for the funding for Community Development Centres in *(a)* Westmorland and Lonsdale constituency and *(b)* England. [4033]

Phil Hope *[holding answer 13 June 2005]:* Cumbria county council's Adult Education Service currently contracts with Community Development Centres, a local term used in Cumbria, to describe sites located in primary schools which deliver adult learning courses covering a range of subjects with a significant focus on IT. How such education is organised is a matter for the county council. Its Adult Education Service is in regular dialogue with LSC Cumbria about how its provision can contribute to local, regional and national priorities. These include supporting adults to improve their literacy and numeracy skills and to engage with learning locally, so that in due course they can progress towards gaining a Level 2 qualification. Community Development Centres, as present in Cumbria, are not generally found across England.

Consultants

Paul Holmes: To ask the Secretary of State for Education and Skills how the Department intends to take forward the recommendations of its auditors' report into the use of consultants in the Department. [6348]

Bill Rammell: DfES management have agreed an action plan with internal audit to address the issues raised by the joint National Audit Office and DfES internal audit report on Engagement and Use of Consultants in DfES. The agreed actions, which are being implemented, will be monitored by DfES internal audit in the course of their normal follow-up procedures.

Paul Holmes: To ask the Secretary of State for Education and Skills if she will make a statement on the recommendations of the auditors' report on the use of consultants in the Department. [6349]

Bill Rammell: The joint National Audit Office and DfES internal audit review of Engagement and Use of Consultants identified shortcomings in compliance with departmental guidance. An action plan to address issues identified in the audit has been agreed with DfES management This will be monitored by DfES internal audit as part of their normal follow up procedures.

Additionally, the National Audit Office and internal audit have prepared a good practice guide on the engagement and use of consultants which has been distributed to all divisions in the Department. A copy of this guide will be placed in the House of Commons Library.

Dyslexia

Mr. Hoyle: To ask the Secretary of State for Education and Skills how many school children in Lancashire had dyslexia in the last period for which figures are available. [6603]

Maria Eagle: The requested information is not collected centrally.

Pupils with specific learning difficulties have a particular difficulty in learning to read, write, spell or manipulate numbers and this includes pupils with dyslexia, dyscalculia and dyspraxia. We do not collect

data on dyslexia alone, but provisional figures as at January 2005 indicate that there were 2,000 pupils in maintained primary, secondary and special schools with specific learning difficulties in Lancashire local education authority area.

Education Maintenance Allowance

John Battle: To ask the Secretary of State for Education and Skills how many teenagers in Leeds West have received the education maintenance allowance; what the average award has been; and how much has been received in total. [3395]

Maria Eagle: This is a matter for the Learning and Skills Council. Mark Haysom, the Council's Chief Executive, will write to the hon. Friend with the information requested and a copy of his reply will be placed in the Library.

Letter from Mark Haysom to Mr. John Battle, dated 16 June 2005:

I am writing in response to your Parliamentary Question that asked "the number of young people who have received Education Maintenance Allowance (EMA) in the Leeds West Area, what the average award has been and how much has been received in total."

Information on the number of young people who have applied, enrolled and received EMA is available at Local Authority level, but not at constituency level. By the end of May 2005, 5,606 young people in the Leeds Local Authority area had received one or more EMA payments.

EMA is awarded in three defined payment bands of £30, £20 and £10, depending on household income. In Leeds Local Authority the take-up of EMA by payment band is split as follows: 78% on £30 per week, 10% on £20 per week and 12% on £10 per week (based on an analysis of young people attending a school or college in the Leeds Local Authority area). This breakdown is very similar to the national average.

We do not break down cost data to show specifically how much is spent in each Local Authority area. The total cost of EMA payments during the academic year 2004/2005 in England at 31 May 2005 was approximately £206,000,000.

I hope this information is helpful and addresses your question. If you would like further details please contact Chris Bradley at the LSC National Office on 0114 207 4512 or Christopher.bradley@lsc.gov.uk

Paternity Leave

Keith Vaz: To ask the Secretary of State for Education and Skills (1) what plans the Government have to change provisions for paternity leave; [7133]

(2) what plans the Government have to introduce shared parental leave in the second six months after a child's birth. [7135]

Mr. Sutcliffe: I have been asked to reply.

The Government want to give families more choice about how to balance their work and caring responsibilities. The "Work and Families: Choice and Flexibility" consultation sought views on how to enable fathers to share a proportion of the mother's maternity leave and pay. We are currently considering the responses to the consultation and will respond in due course.

Keith Vaz: To ask the Secretary of State for Education and Skills what research the Government have commissioned on the percentage of fathers who would stay home to look after children if it was financially viable to do so. [7134]

Mr. Sutcliffe: I have been asked to reply.

The DTI part funded the Equal Opportunities Commission's report "Fathers and the First Year" which was published on 16 June 2005. The report indicates that almost 80 per cent. of working fathers surveyed said they would be happy to stay at home and look after their child, but did not provide any information as to whether financial considerations affected that response.

Prison Education

Mr. Stephen O'Brien: To ask the Secretary of State for Education and Skills pursuant to the answer of 15 June 2005, *Official Report*, column 490W, on prison education, what the targets are for numbers of offenders acquiring Basic Skills Level qualifications beyond *(a)* entry level, *(b)* level 1 and *(c)* level 2; and how many offenders acquired these qualifications in each year since 2002. [7380]

Phil Hope: The framework for basic skills qualifications is set out in "Skills for Life", the national strategy for improving adult literacy and numeracy skills. That document contains no basic skills level qualifications beyond level 2 and therefore, as part of our aim to bring offender learning and skills in line with mainstream learning and skills provision, there are no targets for basic skills achievements by offenders in qualifications beyond entry level and levels 1 and 2.

Sector Skills Councils

Mr. Boswell: To ask the Secretary of State for Education and Skills what the date of licence of each Sector Skills Council is, listed in chronological order; what employment sector each covers; how many employers each covers; and what the most recent annual budget was of each. [6653]

Phil Hope: The following table provides information on Sector Skills Councils (SSCs) which are independent organisations. The number of employers is a broad estimate and excludes sole traders. The amount of public funding each SSC receives through the Sector Skills Development Agency (SSDA) is detailed as follows on an accruals basis, for the year ending 31 March 2005. However, the information about the budgets of each SSC is commercially confidential as most generate significant amounts of external funding.

SSC	Month licensed	Sector/industry covered	Employers Covered	SSDA funding 2004-05 (£000)
e-Skills UK	April 2003	IT, telecoms and contact centres	133,655	5,594
SEMTA	April 2003	Science, engineering and manufacturing technologies	66,428	2,937
ConstructionSkills	September 2003	Construction	213,184	3,166
SkillsActive	October 2003	Active leisure and learning	24,843	1,876
Automotive Skills	December 2003	Retail, maintenance and repair motor industry	76,284	2,225

SSC	Month licensed	Sector/industry covered	Employers Covered	SSDA funding 2004-05 (£000)
Energy and Utility Skills	December 2003	Electricity, gas, water, and waste management	15,786	1,782
SummitSkills	December 2003	Building services engineering	50,213	1,981
Skillfast-UK	January 2004	Apparel, footwear and textiles	28,065	2,208
Skillset	January 2004	Broadcast, film, video and media	25,208	3,071
Cogent Plus	February 2004	Chemical, nuclear, oil and gas extraction, petroleum and polymer	20,114	2,080
Skills for Logistics	February 2004	Freight logistics	63,490	1,519
Financial Services Skills Council	April 2004	Financial services	45,289	2,079
Lantra	April 2004	Environmental and land based	13,943	2,569
People 1st	April 2004	Hospitality, leisure, travel and tourism	184,105	2,422
Skills for Health	April 2004	Health sector	45,047	1,809
Skills for Justice	April 2004	Custodial care, community justice and Police	4,745	2,245
Improve Ltd	June 2004	Food and drink	9,565	2,538
Asset Skills	September 2004	Property, housing, cleaning and facilities management	121,853	1,789
Skillsmart	September 2004	Retail	279,533	2,640
GoSkills	November 2004	Passenger transport	18,125	1,827
Lifelong Learning UK	January 2005	Learning delivery	24,575	1,533
Skills for Care and Development	February 2005	Social care, children and young people	57,477	569
Creative and Cultural Skills	June 2005	Museums, music, crafts, galleries and arts	37,940	879

Special Educational Needs/Tribunals

Mr. Hoyle: To ask the Secretary of State for Education and Skills if she will make a statement on the future of *(a)* Mayfield and *(b)* Astley special schools in Chorley. [6613]

Maria Eagle: Under arrangements introduced in the School Standards and Framework Act 1998, the consideration of proposals for establishing, altering, or discontinuing maintained special schools are a matter for local decision making.

Mr. Hoyle: To ask the Secretary of State for Education and Skills how many special schools there are in Lancashire education authority; and if she will make a statement on the long-term provision of special needs education in Lancashire. [6614]

Maria Eagle: "Removing Barriers to Achievement", our SEN strategy, provides a clear long-term vision for improving support and outcomes for children with SEN. It sets out action to ensure that children with SEN receive the help they need as quickly as possible, from schools and other services. The SEN strategy was informed by a review of special schools. Special schools have a vital role teaching children with the most severe and complex needs, and sharing expertise with mainstream schools.

In January 2005 there were 32 maintained special schools in Lancashire local education authority. The schools are listed as follows.

School number	
119860	Burnley Calder View Special School
119861	Bleasdale House Community Special School
119863	Burnley Westway School
119864	Sherburn School
119865	Moorfield School
119866	Moorbrook School
119869	Massey Hall School
119870	Elms School
119872	Burnley Primrose Hill School
119873	Wennington Hall School
119876	Morecambe Road School
119877	Chorley Astley Park School
119878	Great Arley School
119879	Rawtenstall Cribden House Community Special School
119880	Lostock Hall Moor Hey School
119881	Colne Gibfield School
119882	North Cliffe School
119883	Oswaldtwistle Broadfield School
119886	Black Moss School
119887	Kirkham Pear Tree School
119889	Mayfield School
119890	Nelson Townhouse School
119891	Tor View School
119892	The Loyne School
119893	The Coppice School
119894	Oswaldtwistle White Ash School
119895	Brookfield School
119897	Thornton-Cleveleys Red Marsh School
119898	Beacon School
131093	Kingsbury School
131479	Hillside School, Longridge
133688	Royal Cross Primary School

Mr. Drew: To ask the Secretary of State for Education and Skills pursuant to her answer of 16 June 2005, *Official Report*, column 593W, on special needs tribunals, in how many cases appellants *(a)* were successful, *(b)* were unsuccessful, *(c)* withdrew their cases and *(d)* settled cases outside tribunal, broken down by local education authority. [6965]

Maria Eagle: We do not collect information in this format; cases settled outside the tribunal result in a parental withdrawal or LEA concession, so data is provided under those two heads.

The following table shows appeal outcomes by LEA for the reporting year 2003-04. It shows the number of appeals withdrawn by the parent, conceded by the LEA and decided by the tribunal. Of those decided it shows the number upheld and the number dismissed, where upheld refers to any decision where the tribunal found in favour of the parents on any part of their appeal.

Appeal outcomes by LEA for period 1 September 2003 to 31 August 2004

Sure Start

Mr. Gibb: To ask the Secretary of State for Education and Skills what relationship extended schools will have with Sure Start children's centres. [6591]

Beverley Hughes: We want to see strong links between extended schools and children's centres. Children's centres provide holistic services, including access to integrated early learning and care, health and family support for children under five and their families. They are being established across the country in every community by 2010. We also expect all schools to be offering extended services by that date.

It is up to local authorities to determine where children's centres should be located in order to best serve their communities' needs. However, where possible we expect children's centres to be developed from existing services which will include nursery, primary and secondary schools. Children's centres may wish to consider co-locating with schools, especially primary schools and offering joint services, to provide a more streamlined service to parents and families, providing services for all those with children aged 0–11 in one place. This would particularly benefit those parents with pre-school children and children of primary school age.

Young Runaways

Mr. Burstow: To ask the Secretary of State for Education and Skills how she plans to evaluate the pilot scheme for flexible community-based accommodation for young runaways. [7250]

Maria Eagle: The community based flexible refuges were funded on the basis that they would be responsible for evaluating the effectiveness of their services within their communities. At the end of the pilot period, the DfES will consider how best to collate the lessons from these individual evaluations, in order to inform future policy and delivery of services for young runaways.

CABINET OFFICE

Child Care Vouchers

Mr. Boswell: To ask the Chancellor of the Duchy of Lancaster if he will list the Government Departments which *(a)* have adopted, *(b)* are in the process of adopting and *(c)* have rejected the scheme for foregoing employee salary in favour of child care vouchers. [6607]

Mr. Hutton: The information requested is not held centrally. Individual Government departments are responsible for their own arrangements for child care support for their staff.

Government Car Despatch Agency

Patrick Mercer: To ask the Chancellor of the Duchy of Lancaster what the *(a)* upper and *(b)* lower age limits are for drivers employed by the Government Car Despatch Agency. [5728]

Mr. Hutton: The responsibility for the provision of ministerial cars and drivers has been delegated under the terms of the Framework Document to the Government Car Despatch Agency. I have asked its Chief Executive Mr. Roy Burke to write to the hon. Member. Copies of his letter will be placed in the Library.

Patrick Mercer: To ask the Chancellor of the Duchy of Lancaster whether Mrs. Barbara Smith is a permanent employee of the Government Despatch Agency; to which Department she is assigned; for how long she has worked for the agency; when her contract started; for how long she has been a driver for Mr. David Blunkett; whether she is his official driver; and how many Government vehicles she is permitted to drive. [5729]

Mr. Hutton: The responsibility for the provision of ministerial cars and drivers has been delegated under the terms of the Framework Document to the Government Car Despatch Agency. I have asked its Chief Executive Mr. Roy Burke to write to the hon. Member. Copies of his letter will be placed in the Library.

Lord Birt

Norman Baker: To ask the Chancellor of the Duchy of Lancaster what caused the ceiling in Lord Birt's office to collapse; and how much it is estimated the repair will cost. [7303]

Mr. Hutton: The cost of repairing the ceiling collapse, which was caused by a leak, and associated cleaning was £2,773.

Showground (Garstang)

Mr. Wallace: To ask the Chancellor of the Duchy of Lancaster what plans the Duchy has for a showground near Garstang in Lancashire. [6580]

Mr. Hutton: The Duchy of Lancaster office has been investigating the possibility of the former Myerscough Quarry becoming a strategic "rural Gateway" for Lancashire, acting as an interface between rural and urban interests and to diversify the local rural economy. Integral to this is the provision of a regional showground and events facility.

This is still in the early stages of consultation with local stakeholders.

TRADE AND INDUSTRY

British Nuclear Fuels

Norman Baker: To ask the Secretary of State for Trade and Industry if he will make it his policy to seek to realise capital receipts from the disposal of BNFL assets in *(a)* Westinghouse and *(b)* Urenco. [5889]

Barry Gardiner *[holding answer 20 June 2005]:* The Government's and BNFL's position on Westinghouse (and other BNFL businesses) has not changed since the 2003 BNFL Joint Strategy Review. The businesses are being managed to deliver value and in a way that limits and controls risk to the UK taxpayer. As agreed in 2003, the Westinghouse business has been operating with greater financial independence from its parent, so that possibilities for private sector participation can be opened up.

Under the strategy of delivering shareholder value the BNFL board continues to discuss strategic options with its long-term adviser, N M Rothschild.

Paul Flynn: To ask the Secretary of State for Trade and Industry what discussions he has had with British Nuclear Fuels about the court action being taken against Kernkraftwerk Brokdorf GmbH. [1685]

Malcolm Wicks: None.

Clean Coal Technology

Sandra Osborne: To ask the Secretary of State for Trade and Industry what steps he is taking to support the development of clean coal technology in the UK. [6102]

Malcolm Wicks: The UK's Carbon Abatement Technologies strategy was launched on the 14 June. This sets out the work programme needed to support the development of sustainable fossil fuel technologies mainly using coal and natural gas. It recognises that fossil fuels will continue to be a major source of energy for decades to come and that technologies need to be developed and deployed which will radically reduce CO_2 emissions from the use of these fuels. Improved combustion efficiency and Carbon Capture and Storage (CCS) are seen as the key technologies for achieving this aim.

The Government have announced funding of some £25 million towards demonstration of carbon abatement technologies as part of a £40 million package of support for clean energy technologies. Also, in his Budget statement this year the Chancellor undertook to assess support for the development of CCS in the Climate Change Programme Review (CCPR), including the potential for economic incentives.

In addition to this we will continue to fund research and development in this area under the DTI's Technology Programme. Under the Cleaner Coal Technology R and D Programme from 1999 up to 2008, the Government will have committed some £13.5 million in supporting UK industry to develop cleaner coal technologies. In addition to this we are also committing some £3.5 million for UK industry and academia to collaborate with the USA to develop these technologies.

Computer Crime

Mr. Burstow: To ask the Secretary of State for Trade and Industry how many cases of computer *(a)* hacking, *(b)* fraud and *(c)* theft his Department recorded in each year since 2001–02; and for each year on how many occasions computer systems have been illegally accessed by computer hackers (i) within and (ii) outside his Department. [6949]

Alun Michael: Records of IT security incidents reported within the Department for the period in question show:

Theft

The number of reported thefts of computers is as follows:

	Number of thefts
2002–03	34
2003–04	35
2004–05	24
2005–06 (to date)	10

There have been no recorded incidents of computer fraud or of the Department's computer systems being illegally accessed by computer hackers within or outside the Department in the period in question.

Copyright (Sound Recording)

Mr. Whittingdale: To ask the Secretary of State for Trade and Industry if he will make a statement on the Government's policy regarding the extension of copyright term for sound recording. [3736]

Alan Johnson: Any extension of the term of protection for sound recordings would require a change to the EC directive which harmonises copyright terms across the EU and there are currently no proposals for such an amendment to this directive. Those who have rights

in sound recordings have, nevertheless, made representations to us for an increased term of protection and, in considering whether or not to support this, we will be assessing the impact on all stakeholders.

Credit Card Debt

Mr. Fabian Hamilton: To ask the Secretary of State for Trade and Industry what steps he plans to take to tackle the growth in consumer credit card debt. [6961]

Mr. Sutcliffe: The UK credit market remains one of the most competitive in the world. Although figures show that borrowing is increasing in real terms, DTI commissioned research indicates that the vast majority of consumers manage their credit successfully, using it as an enabler, and do not become over-indebted.

The Government is not, however, complacent and a number of departments are working together to ensure that those needing help have access to it. Further details can be found in the "Tackling Over-indebtedness: Action Plan 2004" published July 2004 which is in the Libraries of the House and in the forthcoming 2005 update to be published shortly.

Environmental Guidance (Companies)

Julie Morgan: To ask the Secretary of State for Trade and Industry what guidance he has given to UK companies on their responsibilities *(a)* to report on and *(b)* to mitigate their impact on (i) communities and (ii) the environment. [6608]

Malcolm Wicks: DTI has introduced an Operating and Financial Review which, with effect from financial years beginning on or after 1 April 2005, will require directors of quoted companies to report on the development and performance of their business during the year, and on the key factors likely to affect development and performance in future. In preparing their OFR, directors will need to consider factors such as environment and community issues, insofar as these are relevant for an understanding of the business. The Accounting Standards Board has issued a reporting standard and implementation guidance to help companies prepare their OFR.

We also encourage companies to address the social and environmental impacts of their activities over and above compliance with minimum legal standards. The Government website on CSR—www.csr.gov.uk—outlines our approach to promoting responsible business practice.

EU-ACP Economic Partnership Agreements

Andrew George: To ask the Secretary of State for Trade and Industry what discussions *(a)* he and *(b)* his officials have had with the European Commission regarding EU-ACP economic partnership agreements since March. [6751]

Ian Pearson: My right hon. Friend the Secretary of State and I discussed economic partnership agreement negotiations with Peter Mandelson, the EU Trade Commissioner. My officials have discussed the negotiations bilaterally with the Commission and in council working groups.

Andrew George: To ask the Secretary of State for Trade and Industry what discussions he has had with the European Commission regarding reform of Article 24 of the General Agreement on Tariffs and Trade in relation to trade agreements, with particular reference to the EU-ACP Economic Partnership Agreements. [6756]

Ian Pearson: Officials have discussed suggestions for reforming Article 24 of the GATT with the European Commission. Following consultation with member states, the EU recently tabled a draft submission in the WTO on reform of the article, including proposals for special and differential treatment for developing countries such as the ACP.

Andrew George: To ask the Secretary of State for Trade and Industry what discussions *(a)* he and *(b)* his officials have had with the European Commission on the letter from Mr. Peter Carl, of the European Commission, to Heads of Delegations of African, Caribbean and Pacific countries of 11 April 2005, on the UK Government's position on EU-ACP Economic Partnership Agreements. [6757]

Ian Pearson: Ministers and officials are in regular contact with the European Commission on a broad range of issues associated with the Economic Partnership Agreements being negotiated with the ACP countries, including the issues raised in the UK position paper.

European Gas and Electricity Markets

Mr. Hancock: To ask the Secretary of State for Trade and Industry what the timetable is for the EU sectoral enquiry into European gas and electricity markets. [7558]

Malcolm Wicks: The European Commission launched the sectoral inquiry on 13 June 2005 and announced that it will publish an interim report by end 2005 and the main results in 2006.

Mr. Hancock: To ask the Secretary of State for Trade and Industry whether he expects the UK to be included in the EU sectoral inquiry into gas and electricity markets. [7573]

Malcolm Wicks: The European Commission has announced that the sectoral inquiry will cover the whole of the EU. We therefore expect the UK to be included.

Eurotunnel

Mrs. Lait: To ask the Secretary of State for Trade and Industry what discussions his Department has had with *(a)* Eurotunnel (i) staff and (ii) creditors and *(b)* other Government Departments on Eurotunnel in the last 12 months; and if he will make a statement. [6014]

Alun Michael: None. My right hon. Friend the Secretary of State for Transport leads on policy pertaining to Eurotunnel.

Flexible Working

Stephen Hesford: To ask the Secretary of State for Trade and Industry what steps he is taking to promote working with flexibility for those with caring and family responsibilities. [5981]

Mr. Sutcliffe: In February this year the DTI launched a consultation to take forward the work and family commitments that were announced in last December's pre-Budget report and the 10-year child care strategy. In the consultation we asked for views on the case for extending the right to request flexible working to carers of sick and disabled adults and to parents of older children. The consultation closed on 25 May 2005 and we are analysing the responses. These will be published, alongside the Government response, on our website at www.dti.gov.uk/workandfamilies.

Honours

Mr. Pope: To ask the Secretary of State for Trade and Industry how many officials currently in the Department received honours in the recent Queen's Birthday Honours List; and at what rank of honour. [5112]

Alan Johnson: I refer my hon. Friend to the answer given by my right hon. Friend the Chancellor of the Duchy of Lancaster on 22 June 2005, *Official Report*, column 1059W.

Interest Charges

Mr. Fabian Hamilton: To ask the Secretary of State for Trade and Industry if he will introduce measures to limit interest rates charged to the poorest borrowers. [6960]

Mr. Sutcliffe: Following research commissioned by the DTI, a decision has been taken not to introduce an interest rate ceiling in the UK.

However, we have committed to keeping this issue under review.

Maguire *v.* Harland and Wolff

John Battle: To ask the Secretary of State for Trade and Industry what assessment he has made of the recent appeal court ruling in the case of Maguire *v.* Harland and Wolff that no compensation is owed to a former shipyard worker whose wife died of cancer contracted by secondary exposure to asbestos dust; and if he will make a statement. [1716]

Bridget Prentice: I have been asked to reply.

In reaching its decision in this case, the Court of Appeal applied the principles of the current law of negligence to the particular circumstances of the case. The Government have no plans to change the law in this area.

Minimum Wage

Dr. Kumar: To ask the Secretary of State for Trade and Industry what plans he has to introduce tougher penalties to deter companies from paying their employees below the minimum wage. [6632]

Mr. Sutcliffe: In their 2005 report the Low Pay Commission confirmed that the vast majority of employers support and comply with the minimum wage. However, we recognise that a small minority of employers are not paying their workers the minimum wage. We are presently considering a number of options for improving enforcement and we intend to make a statement on this shortly.

National Grid Charges (Highlands and Islands)

Danny Alexander: To ask the Secretary of State for Trade and Industry if he will use his powers to cap charges for access to the national grid for generators in the Highlands and Islands. [7278]

Malcolm Wicks: On 8 March 2005, my predecessor the hon. Member for North Warwickshire (Mr. O'Brien) announced that we would exercise the power conferred in Section 185 of the Energy Act 2004 to adjust electricity transmission charges for renewable generators on the Scottish Islands of Orkney, the Shetlands and the Western Isles. He also announced that we would consult on whether charges should be adjusted on the mainland of northern Scotland. We will launch a public consultation on this issue later in the summer.

Newspaper and Magazine Supply

Mrs. Moon: To ask the Secretary of State for Trade and Industry what assessment his Department has made of the Office of Fair Trading's provisional view on exclusive wholesale territories for supplies of newspapers and magazines; and what steps the Department is taking to ensure that supplies to small retailers are protected. [6917]

Mr. Sutcliffe: Following a request from certain newspaper and magazine publishers, the Office of Fair Trading (OFT) has considered whether arrangements for distribution of newspapers and magazines are likely to be compatible with competition law after 1st May 2005. In the course of considering this matter, I know OFT received representations from all parts of the newspaper and magazine supply chain, including particular concerns about the distribution of magazines.

OFT announced a provisional opinion on 23rd February and, on 19th May, published details in a draft advisory opinion. OFT has invited written comments on its draft advisory opinion to be received by 17th June. I understand a number of submissions have been made and from letters I have received on the subject I expect these to have included concerns about what the OFT opinion might mean for the future of distribution arrangements for both magazines and newspapers and how this might affect different parts of the newspaper and magazine supply chain. OFT will want to consider these new submissions carefully before reaching final conclusions.

OFT is the independent competition regulator and the relevant competent authority to consider the substantive issues involved. Ministers are not in a position to second-guess OFT's substantive conclusions or interpretation of the law. There are no recommendations for Ministers to implement. It is for the companies concerned to make decisions about what distribution arrangements they put in place for their products while ensuring those arrangements comply with the law.

Lembit Öpik: To ask the Secretary of State for Trade and Industry (1) whether he plans to implement the Office of Fair Trading's recommendation to end wholesaler territories for newspaper and magazine distribution; and if he will make a statement; . [7084]

(2) what assessment he has made of the number of smaller news and magazine retailers that would close if the current system of exclusive wholesaler territories is ended; and if he will make a statement. [7085]

Mr. Sutcliffe: Following a request from certain newspaper and magazine publishers, the Office of Fair Trading (OFT) has considered whether arrangements for distribution of newspapers and magazines are likely to be compatible with competition law after 1 May 2005. In the course of considering this matter, I know OFT received representations from all parts of the newspaper and magazine supply chain, including particular concerns about the distribution of magazines.

OFT announced a provisional opinion on 23 February and, on 19 May, published details in a draft advisory opinion. OFT has invited written comments on its draft advisory opinion to be received by 17 June. I understand a number of submissions have been made and from letters I have received on the subject I expect these to have included concerns about what the OFT opinion might mean for the future of distribution arrangements for both magazines and newspapers and how this might affect different parts of the newspaper and magazine supply chain. OFT will want to consider these new submissions carefully before reaching final conclusions.

OFT is the independent competition regulator and the relevant competent authority to consider the substantive issues involved. Ministers are not in a position to second-guess OFT's substantive conclusions or interpretation of the law. There are no recommendations for Ministers to implement. It is for the companies concerned to make decisions about what distribution arrangements they put in place for their products while ensuring those arrangements comply with the law.

Nuclear Leak (Thorp)

Mr. Willetts: To ask the Secretary of State for Trade and Industry when he expects the Health and Safety Executive's Nuclear Installations Inspectorate to produce its report on the leak at the THORP Plant; and whether he intends to publish the findings. [6668]

Malcolm Wicks: I am informed by the Health and Safety Executive that completion of its Nuclear Installations Inspectorate's investigation into the leak at THORP is likely to take some weeks and that its findings will be published in due course.

Office Space (Easington)

John Cummings: To ask the Secretary of State for Trade and Industry what square footage of office space is vacant at *(a)* the Spectrum Enterprise Zone site at Dawdon and *(b)* the Whitehouse Business Park at Shotton; what steps are being taken to market these sites; and what progress has been made so far. [6708]

Alun Michael: I understand that currently Whitehouse Business Park has 381,000 sq. ft. of vacant space, and that Spectrum (Dawdon Enterprise Zone) has 246,700 sq. ft. The space let so far at Whitehouse is 234,000 sq. ft., and at Dawdon 60,000 sq. ft.

Both sites are owned by the Regional Development Agency, ONE NorthEast, which is working closely with County Durham Development Company and East Durham Business Service to maintain the profile of the East Durham Enterprise Zones. There are three developers with interest in securing occupiers for the two sites. All three developers have retained regional property agents to market the site regionally, nationally and internationally.

Post Offices

Mr. David Hamilton: To ask the Secretary of State for Trade and Industry what recent discussions he has had with Royal Mail on the protection and continuation of rural post offices in Midlothian. [6627]

Barry Gardiner: Ministers and officials regularly meet Post Office Ltd to discuss a wide range of issues relating to the network.

The Government have placed on Post Office Ltd a formal obligation to maintain the rural post office network and to prevent avoidable closures of rural post offices. The direction remains in force at least until April 2006. Post Office Ltd is currently piloting modern and innovative ways of delivering postal services in rural areas and the feedback from those pilots will allow Government to make better informed decisions on the longer-term future of the rural network.

The Government initially made available £450million (£150 million a year) for the three years 2003–04 to 2005–06 to help the Post Office to maintain the parts or the rural post office network that could not be sustained on a commercial basis. Subject to state aid clearance the Government have made available a further £300 million to extend its financial support for the rural network until April 2008.

Mark Williams: To ask the Secretary of State for Trade and Industry how many post offices were in operation in *(a)* Wales and *(b)* Ceredigion in each of the last 10 years. [7264]

Barry Gardiner: This is an operational matter for Post Office Ltd. and the chief executive has been asked to reply direct to the hon. Member.

Race Relations (Amendment) Act

Keith Vaz: To ask the Secretary of State for Trade and Industry what arrangements are in place to ensure that bodies within the responsibility of his Department comply with the requirements of the Race Relations (Amendment) Act 2000. [3546]

Mr. Sutcliffe: The Department is about to undertake an independent review of its Race Relations scheme to improve compliance and raise awareness within DTI, and this will extend to those bodies and organisations that fall within its remit.

Raw Tobacco Market

Mr. Hayes: To ask the Secretary of State for Trade and Industry if he will make a statement on the Court of Auditors audit on the raw tobacco market, C41 OJ 17 Feb 05. [497]

Jim Knight: I have been asked to reply.

The UK has long fought for the withdrawal of subsidy for the growing of tobacco and the lack of controls highlighted by the report of the Court of Auditors serves to reinforce this view. We are concerned at the failures by member states to apply the required controls and unsatisfactory monitoring by the Commission. While the reform of the tobacco regime agreed at the Luxembourg Council in April 2004 will result in full decoupling of the tobacco subsidy by 2010 we expect every effort to be made to ensure that the controls required by existing legislation are followed and, if necessary, corrective action taken. We will continue to take every opportunity to press the Commission for updates on the progress it is making to ensure member states are applying the required controls and on how it is addressing the issue of financial corrections.

Renewable Energy

Dr. Kumar: To ask the Secretary of State for Trade and Industry what measures are being taken to encourage the use of renewable energy in Middlesbrough, South and East Cleveland constituency. [5911]

Malcolm Wicks: The Government's primary support mechanism for renewable energy in the UK is the Renewables Obligation (RO). The RO requires electricity suppliers to obtain an annually increasing percentage of their electricity from renewable source. This is supported by over £500 million in spending on developing emerging renewables and low carbon technologies up to 2008.

Renew Tees Valley is responsible for planning and delivery of renewable energy projects in the Tees Valley including Middlesbrough South and East Cleveland and is tasked with creating jobs and encouraging inward investment using the medium of renewables and recycling.

Renew Tees Valley is part of the wider NE regional activity working in partnership with Government Office for the North East, ONE, and the North East Assembly under the auspices of the North East Energy Partnership (NEEP), which takes the lead role in the North East for promoting renewables and for encouraging energy efficiency activities.

PRIME MINISTER

Bermuda

Mr. Amess: To ask the Prime Minister what plans he has to visit Bermuda. [7144]

The Prime Minister: I have no current plans to do so.

Honours

Chris Grayling: To ask the Prime Minister if he will make a statement on the Government's response in Reform of the Honours System (Cm 6479) to Recommendation 10 of the Report by the House of Commons Public Administration Select Committee (HC 212–1). [5565]

The Prime Minister: The Government's response to Recommendation 10 of the Report was put into effect in time for the recent Birthday Honours List.

Keith Vaz: To ask the Prime Minister how many of the Chairs of Specialist Committees he approved on 14 June as members of the Independent Honours Committee are *(a)* black and *(b)* Asian. [6448]

The Prime Minister: None. The process of selecting members of the Committees from those who applied is now under way. In making these appointments, the Cabinet Secretary will be taking into account the objective of creating a diverse membership.

Chris Grayling: To ask the Prime Minister what his policy is on scrutiny of propriety of awards of political honours in cases where a recipient has made a donation to a political party. [6066]

The Prime Minister: The fact of having made a political donation should not in itself exclude the award of an honour where the candidate's service or achievements justify one. The House of Lords Appointments Commission is given information, where relevant, about political donations made by candidates whom it considers. As for candidates assessed by the normal process, those for the most senior awards who have made recent political donations are drawn to the attention of the main honours assessment committee.

Chris Grayling: To ask the Prime Minister what assessment he has made of the minuted opinion of the Main Committee on honours that the Science and Technology Committee was unlikely to recommend Professor Colin Blakemore for an honour for his scientific work in view of his work on vivisection. [6065]

The Prime Minister: It has been the practice of successive Governments not to comment on allegedly leaked documents.

House of Lords

Chris Grayling: To ask the Prime Minister (1) whether it will be the responsibility of the House of Lords Appointments Commission to vet all nominations for honours, including those nominated by *(a)* the Prime Minister and *(b)* political parties, to ensure the highest standards of propriety; [5624]

(2) who, following the abolition of the Political Honours Scrutiny Committee, in the case of candidates put forward personally by the Prime Minister for honours, will review independently the tax status, business connections and other personal interests of those candidates, their families and friends in order to ensure the highest standard of propriety; and from what date their vetting work will begin. [5626]

The Prime Minister: The House of Lords Appointments Commission have agreed to my request that the Prime Minister of the day should refer to them any candidates for honours for political and public services put forward by leaders of political parties, and the names of Members of Parliament who are candidates for honours for services to Parliament. They have agreed to perform a similar service in respect of any candidates whose names are proposed by the Prime

Minister of the day for an Honours List at a late stage, and who have not therefore been subject to the normal assessment and selection process.

Chris Grayling: To ask the Prime Minister what powers the House of Lords Appointments Commission has to vet appointments by the Prime Minister other than peerages. [6063]

The Prime Minister: None, other than those nominations for honours as described in the answer I gave to the hon. Gentleman today (5624 and 5626).

Chris Grayling: To ask the Prime Minister if he will make it his policy that the role of the House of Lords Appointments Commission is extended to consider whether the appointments of Ministers in the House of Lords by him conform to the highest standards of propriety. [6064]

The Prime Minister: No.

Nuisance Automated Phone Calls

John Hemming: To ask the Prime Minister pursuant to the Answer of 15 June 2005, *Official Report*, column 259, what steps the Government are taking to prevent nuisance automated phone calls. [7224]

The Prime Minister: I refer the hon. Member to the letter I sent him today. Copies of the letter have been placed in the Libraries of the House.

Prime Minister (Appointment)

Mr. Allen: To ask the Prime Minister pursuant to the answer of 16 June ref 3343, what time scale he would expect to be followed for the appointment of the Prime Minister. [7388]

The Prime Minister: I have nothing further to add to the answer I gave my hon. Friend on 16 June 2005, *Official Report*, column 577W.

HOME OFFICE

Micro-bikes

19. **Alison Seabeck:** To ask the Secretary of State for the Home Department what powers are available to *(a)* the police and *(b)* local authorities to deal with the illegal riding of micro-bikes. [6871]

Mr. Andy Burnham: The police have a power under the Police Reform Act to seize any mechanically propelled vehicle which is being driven both in a careless and inconsiderate manner on-road, or off-road without lawful authority, and causing or likely to cause alarm, distress or annoyance to members of the public. If a micro-bike is ridden on the pavement, the police can deal with this as an offence under the Highways Act 1835. Where the rider is a child the police may choose instead to warn him and advise his parents as necessary.

Local authorities can make byelaws prohibiting the use of micro-bikes in particular areas and also have the power to seize vehicles causing a noise nuisance.

Antisocial Behaviour

20. **Andrew Selous:** To ask the Secretary of State for the Home Department if he will make a statement on the length of time it takes to resolve cases of serious antisocial behaviour. [6872]

Fiona MacTaggart: The Government are committed to ensuring local agencies have the powers they need to reduce the impact of antisocial behaviour. Breach of an antisocial behaviour order (ASBO) is a criminal offence and criminal penalties apply.

The Anti-Social Behaviour Act 2003 and the TOGETHER campaign provide practitioners with tools and know-how to ensure that antisocial behaviour is dealt with swiftly and effectively.

David Davis: To ask the Secretary of State for the Home Department how many antisocial behaviour orders have been breached in each year since their introduction, broken down by *(a)* the reason for the breach and *(b)* the punishment given for the breach. [1393]

Mr. Charles Clarke: During the period 1 June 2000 to 31 December 2003 a total of 1,892 antisocial behaviour orders (ASBOs) were issued within England and Wales. Of those issued 793 individuals breached their ASBO over this period.

The table counts all breach occasions during this period. The total given for this is 2,053 and represents breaches by those 793 individuals, indicating that those individuals breached more than once.

Number[1] of occasions an ASBO was breached by year[2] and type of sentence

	Type of sentence					
Year of breach	*Discharge*	*Fine*	*Community sentence*	*Custody[3]*	*Other*	*Total*
2000[2]	0	7	2	8	2	19
2001	7	39	56	100	32	234
2002	26	52	144	230	60	512
2003	60	135	356	626	111	1,288
Total	93	233	558	964	205	2,053

[1] Includes multiple breaches of the same ASBO and covers those ASBOs reported to the Home Office.

[2] From 1 June 2000. Data for 2004 are not yet available.

[3] This excludes 10 cases where a fully suspended sentence was given and 29 cases where a sentence of one day in police cells was given. These cases are included in the "Other" column.

Shatterproof Glasses/Bottles

21. **Mr. Jeremy Browne:** To ask the Secretary of State for the Home Department what discussions he has had with the drinks industry regarding the adoption of shatterproof glasses and bottles in bars, pubs and clubs. [6873]

Mr. Charles Clarke: We remain concerned about the use of glasses and bottles as weapons in and around licensed premises.

The Violent Crime Reduction Bill provides a new fast track alcohol licence review process which will allow Licensing Authorities to require pubs and clubs, where necessary, to use toughened drinks glasses and bottles. We will continue to discuss this measure with the drinks industry and other stakeholders.

Kirkham Prison

22. **Mr. Jack:** To ask the Secretary of State for the Home Department if he will make a statement on the Prison Service's response to the Chief Inspector of Prisons' report on Kirkham Prison. [6874]

Fiona Mactaggart: The Prison Service will produce an action plan which sets out what action will be taken on each one of the Chief Inspector's recommendations. I expect the action plan to be ready in August, as set out in the protocol agreed with the Chief Inspector.

Police

24. **Mr. Dismore:** To ask the Secretary of State for the Home Department if he will make a statement on police numbers in Barnet. [6876]

Hazel Blears: Decisions on the allocation of resources to the London Borough Operational Command Units (OCU) is a matter for the Commissioner of Police of the Metropolis. I understand from the Commissioner that the Barnet OCU had 554 police officers on 31 March 2005. This is 69, or 14 per cent. more than in March 2001. Barnet additionally had 44 community support officers at the end of March this year.

Mrs. James: To ask the Secretary of State for the Home Department if he will take steps to establish fast track access to medical services for police personnel to reduce sickness absence in police forces. [6875]

Hazel Blears: The Strategy for a Healthy Police Service, made £19 million available to forces in England and Wales for occupational health service from 2002 to 2006. It is for forces to determine how best to develop their occupational health services to support operational policing. In doing this forces can take account of the evaluation of projects funded by the Strategy. Some forces have used this funding to operate fast track access schemes.

Mr. Oaten: To ask the Secretary of State for the Home Department (1) what plans he has to require police forces to adopt as standard the police staff council handbook; [523]

(2) how many police forces have fully adopted the pay and conditions set out in the police staff council handbook; [524]

(3) what representations he has received from the Association of Chief Police Officers regarding mandatory adoption of the police staff council handbook. [525]

Mr. Charles Clarke: In the White Paper: Building Communities, Beating Crime, we commit to developing terms and conditions for police staff that meet the operational requirements of the service and support the delivery of improved performance. We wish to develop terms and conditions of service for police staff which reflect their increasingly important place in policing and the operational nature of many of their roles. We will discuss these proposals in the PSC. However, we want to allow police forces and authorities flexibility where that is necessary to meet local requirements. We do not propose therefore to make the contents of the PSC handbook mandatory.

Adoption of the terms and conditions of the Police Staff Council (PSC) of England and Wales Terms and Conditions of Service Handbook is by voluntary agreement by individual forces. Forces can take account of the handbook in deciding on the terms and conditions for their staff in the light of force requirements and circumstances. Neither the Home Office nor the Employers Organisation collect information about which of the provisions of the Handbook individual forces have chosen to incorporate in local terms and conditions of service.

Neither myself or other Ministers have received any representation from the Association of Chief Police Officers in regards to the mandatory adoption of the Police Staff Council handbook.

Anti-terrorism (Detainees)

Dr. Starkey: To ask the Secretary of State for the Home Department how many people have been detained under anti-terrorism legislation in each year since 1975; how many were *(a)* UK and *(b)* non-UK citizens; how many of those detained were subsequently charged with (i) terrorist and (ii) other criminal offences; and how many were deported. [152]

Mr. Charles Clarke: Under current terrorism legislation apart from very specific powers only available at ports or to facilitate stop and search, there are no powers of detention without arrest.

Statistics on arrests under Prevention of Terrorism Legislation from 1979 to 2001 are available on the Research and Statistics section of the Home Office website.

Statistics on arrests, since 11 September 2001, under the Terrorism Act 2000 are also available. These can be found in the terrorism section of the Home Office website.

CCTV

David Davis: To ask the Secretary of State for the Home Department how much public funding has been spent on CCTV security cameras in *(a)* Haltemprice and Howden and *(b)* the East Riding of Yorkshire in each of the last five years. [3594]

Mr. Charles Clarke: Since 1999, the Home Office has allocated £381,558 to the East Riding of Yorkshire (which includes the constituency of Haltemprice and Howden) to ensure CCTV coverage across the area as part of the closed circuit television initiative, which was an element of the crime reduction programme. The breakdown of this funding is as follows:

	£
1999–2000	44,686
2001–02	155,325
2002–03	181,547

Since the completion of the crime reduction programme, crime reduction funding has been allocated directly to the local Crime and Disorder Reduction Partnership through the Building Safer Communities fund and to Basic Command Unit (BCD) commanders through the BCD fund. These funding streams finance a variety of interventions, including CCTV, to tackle local crime priorities.

Allocation of this funding locally is a matter for the East Riding of Yorkshire council and Humberside constabulary. The information is not held centrally.

Correspondence

Sir Gerald Kaufman: To ask the Secretary of State for the Home Department (1) when he will reply to the letters from the right hon. Member for Manchester, Gorton, with regard to *(a)* Martin Rathfelder, dated 31 March, *(b)* Mr. N. Hussain, dated 23 March and *(c)* Timothy Feist, dated 22 March; [188]

(2) when he will answer the letter dated 23 March from the right hon. Member for Manchester, Gorton with regard to Mr. N. Hussain. [2631]

Mr. Charles Clarke: The information is as follows:

(*a*) I replied to my right hon. Friend on 24 May 2005.

(*b*) I replied to my right hon. Friend on 1 April 2005.

(*c*) I replied to my right hon. Friend on 12 April 2005.

Sir Gerald Kaufman: To ask the Secretary of State for the Home Department when he will reply to the letters from the right hon. Member for Manchester, Gorton with regard to *(a)* Mr. A. Bokes, dated 8 March, *(b)* Scholastic Dube, dated 23 March, *(c)* Mr. M. M. Berrish, dated 23 March and *(d)* Mr. R. M. Farooqi, dated 3 March. [193]

Mr. Charles Clarke: The information is as follows:

(a) I replied to my right hon. Friend on 18 May 2005.

(b) I replied to my right hon. Friend on 18 May 2005.

(c) I replied to my right hon. Friend on 24 May 2005.

(d) I replied to my right hon. Friend on 18 May 2005.

Sir Gerald Kaufman: To ask the Secretary of State for the Home Department when he will answer the letter to him dated 22 March from the right hon. Member for Manchester, Gorton with regard to Timothy Feist. [2122]

Mr. Charles Clarke: I replied to my right hon. Friend on 12 April 2005.

Sir Gerald Kaufman: To ask the Secretary of State for the Home Department when he will answer the letter to him dated 4 April from the right hon. Member for Manchester, Gorton with regard to Mr. Hassan Nadir Rashid. [2128]

Mr. Charles Clarke: I wrote to my right hon. Friend on 24 May 2005.

Sir Gerald Kaufman: To ask the Secretary of State for the Home Department when he will answer the letter to him dated 7 February from the right hon. Member for Manchester, Gorton with regard to Mr. Jamal Mohammed Bin Omar Al Ridal. [2129]

Mr. Charles Clarke: I wrote to my right hon. Friend on 1 March 2005.

Sir Gerald Kaufman: To ask the Secretary of State for the Home Department when he expects to answer the letter to him dated 11 May from the right hon. Member for Manchester, Gorton with regard to Mr. Mukhdoom Ali. [6173]

Mr. Charles Clarke: I wrote to my right hon. Friend on 24 June.

Sir Gerald Kaufman: To ask the Secretary of State for the Home Department when he will answer the letter dated 23 March from the right hon. Member for Manchester, Gorton, with regard to Mr. N. Hussain. [7932]

Mr. Charles Clarke: I wrote to my right hon. Friend on 1 April.

Sir Gerald Kaufman: To ask the Secretary of State for the Home Department when he intends to answer the letter dated 9 May, from the right hon. Member for Manchester, Gorton with regard to Mr. Zahoor Ahmed. [4493]

Mr. Charles Clarke: I wrote to my right hon. Friend on 23 June 2005.

Defendants (Greater London)

Mr. Malins: To ask the Secretary of State for the Home Department whether *(a)* the immigration status and *(b)* the nationality of convicted defendants in magistrates courts in the Greater London area is recorded. [2834]

Ms Harman: I have been asked to reply.

Information on *(a)* the immigration status and *(b)* the nationality of convicted defendants in magistrates courts in the Greater London area is not currently recorded.

Identity Cards

Alan Simpson: To ask the Secretary of State for the Home Department what assessment has been made of the merits of including radio frequency identification chips in *(a)* passports and *(b)* identity cards. [4142]

Mr. McNulty: The International Civil Aviation Organisation (ICAO) initiated feasibility studies evaluating the acceptability and implementation options for biometrics and the storage of electronic data on passports including the use of radio frequency identification chips (RFID). These are available on the ICAO website.

The United Kingdom Passport Service (UKPS) has played a significant role in the development of the options and subsequent standards. The UKPS has adopted these standards within the technical design of the biometric passport.

No final decisions have been taken yet on the chip technology for ID cards.

Immigration Service Work

Mr. Beith: To ask the Secretary of State for the Home Department when he expects to complete discussions with HM Revenue and Customs on the future arrangements for immigration service work in Berwick-upon-Tweed previously carried out on an agency basis by HM Customs and Excise officer based in the town; and what interim arrangements have been made to cover this work. [3804]

Mr. McNulty *[holding answer 20 June 2005]:* The Immigration Service have recently been informed that HM Revenue and Customs propose to close the Customs House at Berwick-upon-Tweed. The immigration office at North Shields will continue to provide immigration coverage.

Kamel Bourgass

Mr. Meacher: To ask the Secretary of State for the Home Department on which day staff from Porton Down alerted *(a)* the police and *(b)* Ministers about the error that had been made in statements issued that ricin had been found in the flat occupied by Kamel Bourgass; and what action was taken by (i) the police and (ii) Ministers when it was found that an error had been made. [1304]

Mr. Charles Clarke *[holding answer 6 June 2005]:* An initial test conducted by Dstl Porton Down on 6 January 2003 on an exhibit taken by police from the flat occupied by Kamal Bourgass gave an apparent positive result for ricin. However, confirmatory tests which were conducted throughout the period from 7 January 2003 to 28 January 2003 failed to detect the presence of ricin.

Ricin was identified and confirmed on 7 January, 2003 in a second exhibit, consisting of 22 castor beans seized from the flat. Nicotine poison was also identified and confirmed. Other materials, specifically mentioned in the poison recipes recovered from the flat were also found including acetone and isopropyl alcohol.

The Prosecuting Counsel (Mr. Sweeney QC), Crown Prosecution Service, was verbally informed of the ricin test result at a case conference on 20 March, 2003 by Dstl. The Metropolitan Police Anti-Terrorist Branch was also represented at the meeting where the information was provided. The result was also provided in a written statement which was made available to the Crown Prosecution Service and the metropolitan police at that time.

Further tests on the first exhibit on 27/28 April, 2003 also did not detect ricin.

We do not have a record of the date this information was passed from the police to the Home Office and subsequently to Ministers.

Harry Cohen: To ask the Secretary of State for the Home Department on what date *(a)* the police first reported the discovery of traces of ricin in the London flat used by Kamel Bourgass and his associates and *(b)* Porton Down chemical and biological weapons research centre first indicated that there was no ricin in the flat; and if he will make a statement. [1852]

Mr. Charles Clarke: An initial test conducted by Dstl Porton Down on 6 January 2003 on an exhibit taken by police from the flat occupied by Kamal Bourgass gave an apparent positive result for ricin. However, confirmatory tests which were conducted throughout the period from 7 January 2003 to 28 January 2003 failed to detect the presence of ricin.

Ricin was identified and confirmed by Dstl on 7 January, 2003 in a second exhibit, consisting of 22 castor beans seized from the flat. Nicotine poison was also identified and confirmed. Other materials, specifically mentioned in the poison recipes recovered from the flat were also found including acetone and isopropyl alcohol.

The Prosecuting Counsel (Mr. Sweeney QC), Crown Prosecution Service, was verbally informed of the ricin test result at a case conference on 20 March, 2003 by Dstl. The Metropolitan Police Anti-Terrorist Branch was also represented at the meeting where the information was provided. The result was also provided in a written statement which was made available to the Crown Prosecution Service and the Metropolitan Police at that time.

Further tests on the first exhibit on 27–28 April, 2003 also did not detect rich.

Press Officers

David Davis: To ask the Secretary of State for the Home Department how many press officers his Department has employed in each year since 1997, broken down by pay grade. [1394]

Mr. Charles Clarke: Press officers within the Home Office are employed at the information officer (IO) and senior information officer (SIO) grades.

A breakdown of staff by pay grade prior to 1999–2000 is unavailable as this information is not held on record. The information provided in the table covers full financial years from 1999–2000 to 2004–05.

The Home Office Press Office and the Prison Service Press Office merged in May 2001.

In 2003–04 the Press Office Newsdesk answered 60,039 calls; Press Office issued 583 press notices and held 29 briefings for the media.

	Total	*IO*	*SIO*
1997–98	13	n/a	n/a
1998–99	13	n/a	n/a
1999–2000	16	12	4
2000–01	31	24	7
2001–02	35	27	8
2002–03	39	29	10
2003–04	39	27	12
2004–05	43	34	9

Project IRIS

Mr. Oaten: To ask the Secretary of State for the Home Department if he will make a statement on progress in implementing Project IRIS. [4682]

Mr. McNulty: The Iris Recognition Immigration System (IRIS) operational pilot has been implemented at Heathrow Airport Terminals 2 and 4 and commenced passenger enrolments from 20 June 2005. After the pilot has been fully evaluated the system will roll-out to eight other airport terminals during 2005.

SitCen

Mr. Hayes: To ask the Secretary of State for the Home Department if he will make a statement on the role in the EU of SitCen. [503]

Mr. Charles Clarke: The EU Joint Situation Centre (SitCen) monitors and assesses events and situations worldwide on a 24-hour basis with a focus on potential crisis regions, terrorism and WMD-proliferation. The SitCen also provides support to the EU High Representative, Special Representatives and other senior officials, as well as for EU crisis management operations.

The SitCen is divided into three units: the Civilian intelligence Cell (CIC), comprising civilian intelligence analysts working on political and counter-terrorism assessment; the General Operations Unit (GOU), providing 24-hour operational support, research and non-intelligence analysis; and the Communications Unit, handling communications security issues and running the council's communications centre (ComCen).

This creation of a CT analytical capacity within the CIC, which became active on 1 February 2005, has been the major aspect of SitCen's development since the attacks of 11 March in Madrid. As set out in The Hague multi-annual work programme, the intention is that SitCen furnishes the council with strategic intelligence-based assessments on counter-terrorism matters. An initial six month work programme has been set up to reflect the priorities of Heads of State as set out in the ED Action Plan on terrorism. This cross-pillar work programme incorporates justice and home affairs priorities, as well as those issues highlighted by external policy working groups. As such, it includes for example, assessments on threats to modes of transport; threats to critical national infrastructure targets in EU member states; and an assessment of trends in terrorist financing.

SitCen's priorities had hitherto largely focused on Common Foreign and Security Policy issues and did not serve to provide the necessary JHA input. With the CT Cell's work programme now reflecting broader EU CT priorities it is intended to add support to current policy areas. This is the principal area where the SitCen CT Cell can contribute to JHA work: strategic intelligence-based assessments on counter-terrorism matters in support of current policy discussions.

Terrorism

Sarah Teather: To ask the Secretary of State for the Home Department how many people were *(a)* arrested and *(b)* successfully prosecuted for terrorist activities in London in each year since 1997; and to which organisations those successfully prosecuted belonged; and what their country of origin was. [2528]

Mr. Charles Clarke: Statistics on the operation of Prevention of Terrorism Legislation from 1997 to 2001 are available on the Research and Statistics section of the Home Office website.

Statistics on arrests and prosecutions, since 11 September 2001, under the Terrorism Act 2000 are also available. These can be found in the terrorism section of the Home Office website.

These statistics reflect the operation of specific terrorism legislation. It is important to remember that it is, and will continue to be the case, that terrorist suspects are dealt with by the most appropriate legal means. This could be the legislation for murder, grievous bodily harm or the use of firearms or explosives which are all outside the scope of the Terrorism Act.

Sarah Teather: To ask the Secretary of State for the Home Department on what dates in the last 12 months he has held meetings with the Mayor of London to discuss contingency measures in the event of a terrorist attack on London. [2435]

Mr. Charles Clarke: The development of contingency plans for London are managed through London Resilience based in the Government office for London. The London Resilience Forum, which meets quarterly, oversees this work and is chaired by my hon. Friend the Minister with responsibility for London Resilience, with the Mayor of London as the deputy chair. The Minister for London Resilience in turn sits on the Cabinet Committee overseeing resilience work nationally. This is chaired by the Home Secretary.

Outside this structure Home Office officials work closely with the London Resilience forum and a range of other Departments and agencies to develop the contingency plans for London.

Visas

Mr. Ian Taylor: To ask the Secretary of State for the Home Department if he will take steps to ensure that visa inquiries from High Commission and Embassy entry clearance officers to the Evidence and Enquiries Unit of the Home Office are processed within 14 days. [4704]

Mr. McNulty: The service level agreement between UKvisas and the Immigration and Nationality Directorate (Evidence and Enquiry Unit) sets a process time of 25 days from receipt of inquiries from posts abroad, to the despatch of responses. That performance target time is currently being met in 96 per cent. of cases.

WORK AND PENSIONS

Benefits (Childless Couples)

John Hemming: To ask the Secretary of State for Work and Pensions what benefits may be paid to couples without children. [3787]

Mr. Plaskitt: The Department do not provide any benefits expressly aimed at couples without children. A couple without children, who meet the qualifying conditions, would be entitled to the full range of social security benefits, either as a couple or as individuals.

British United Shoe Machinery

Mr. Garnier: To ask the Secretary of State for Work and Pensions if he will instigate an inquiry into the collapse of the British United Shoe Machinery Limited's pension scheme. [5151]

Mr. Timms: No.

The Pensions Ombudsman is an independent statutory commissioner and can investigate complaints of injustice resulting from maladministration and disputes of fact or law by the trustees or managers of a scheme, or by an employer on a pensions matter.

The body responsible for the regulation of work-based pension schemes is the Pensions Regulator which replaced the Occupational Pensions Regulatory Authority (Opra) from 6 April 2005. The law requires that those involved in running occupational and personal pension schemes, including stakeholder schemes, should consider reporting to the regulator breaches of any legislation or rule of law concerning the administration of the scheme.

Council Tax Benefit

Mr. Byers: To ask the Secretary of State for Work and Pensions what estimate he has made of the amount of council tax benefit that was unclaimed by pensioners in the latest year for which figures are available. [7420]

Mr. Plaskitt: The latest available information is in "Income Related Benefits Estimates of Take Up in 2002/2003", a copy of which is in the Library.

Council Tax Payments

Janet Anderson: To ask the Secretary of State for Work and Pensions when he expects pensioner households will receive the £200 payment towards council tax bills. [5947]

Mr. Plaskitt: It is intended that pensioner households will receive the £200 payment with their winter fuel payment at the end of the year.

Disability Living Allowance

Mr. MacNeil: To ask the Secretary of State for Work and Pensions how many claims for disability living allowance were *(a)* made and *(b)* rejected in each year since 2001, broken down by nation and region. [7014]

Mrs. McGuire: The requested information is not available by nation and region. The information that is available is in the table.

Disability living allowance claims received and refused in Great Britain from 2001–05

	Number of claims:	
	Received	*Refused*
2001	411,990	196,885
2002	427,965	194,605
2003	438,710	215,135
2004	439,095	234,180
2005[1]	176,460	91,365

[1] Figures are for calendar years (January to December) except 2005 which covers January 2005 to May 2005.

Notes:

1. Data are taken from the Management Information System (MIS) computer system.
2. Figures have been rounded to the nearest five.

Source:

IAD Information Centre, 100 per cent. data

Financial Assistance Scheme

John Denham: To ask the Secretary of State for Work and Pensions (1) what estimate he has made of the cost of including members of the APW (Eastleigh) pension scheme in the Financial Assistance Scheme; [1698]

(2) what estimate he has made of the cost of including in the Financial Assistance Scheme all schemes which were wound up between May 2004 and April 2005 whose parent companies are still solvent; [1699]

(3) what estimate he has made of the number of members of pension schemes which were wound up between May 2004 and April 2005 and whose parent companies are still solvent; [1700]

(4) what estimate he has made of the number of members of pension schemes which were wound up between May 2004 and April 2005. [1841]

Mr. Timms: None—information is not available on which to base such estimates reliably.

The data collection exercise undertaken to facilitate the development of the Financial Assistance Scheme (FAS), which ended in December 2004, identified 26 schemes (with some 7,000 members) which started to wind up between 14 May 2004 and 1 December 2004. Of those schemes, six (with some 1,400 members) appear to be sponsored by employers that had not undergone an insolvency event at that time. However, given the information provided before and during the exercise on the likely scope of the FAS, it is probable that some schemes connected to solvent employers did not provide returns.

Home Responsibilities Protection

Vera Baird: To ask the Secretary of State for Work and Pensions what plans he has for the reform of home responsibilities protection. [5646]

Mr. Timms: Home Responsibilities Protection which was introduced in 1978 ensures that carers, particularly women caring for children, can build up entitlement to a full basic state pension. The Government launched its national debate on 24 February with the publication of "Principles for Reform: The national pensions debate". This set out our guiding principles on which further work would be taken forward. Producing fair outcomes for women and carers is one of these principles.

Housing Benefit

Mr. Laws: To ask the Secretary of State for Work and Pensions if he will estimate the cost of housing benefit paid to *(a)* pensioners, *(b)* disabled people, *(c)* lone parents, *(d)* unemployed people and *(e)* others, in each of the last eight years, in (i) cash and (ii) real terms. [3574]

Mr. Plaskitt: The information is in the tables.

Annual housing benefit expenditure by client group—nominal and real terms

£ million, nominal

	1997–98 outturn	*1998–99 outturn*	*1999–2000 outturn*	*2000–01 outturn*
Housing benefit and discretionary housing payments	11,176	11,065	11,066	11,166
of which:				
People aged 60 and over	3,781	3,843	3,931	4,110
Long-term sick and disabled	1,782	1,966	2,132	2,286
Lone parents	2,614	2,654	2,731	2,648
Short-term sick	406	335	330	342
Others excluding unemployed people	875	851	688	652
Unemployed	1,719	1,417	1,255	1,129

£ million, nominal

	2001–02 outturn	*2002–03 outturn*	*2003–04 outturn*	*2004–05 estimated outturn*
Housing benefit and discretionary housing payments	11,590	12,638	12,365	13,052
of which:				
People aged 60 and over	4,380	4,730	4,457	4,868
Long-term sick and disabled	2,493	2,945	2,949	3,152
Lone parents	2,666	2,855	2,932	3,048
Short-term sick	338	365	350	329
Others excluding unemployed people	674	668	690	723
Unemployed	1,039	1,075	979	932

£ million, 2005–06 prices

	1997–98 outturn	*1998–99 outturn*	*1999–2000 outturn*	*2000–01 outturn*
Housing benefit and discretionary housing payments	13,547	13,037	12,760	12,727
of which:				
People aged 60 and over	4,583	4,528	4,532	4,685
Long-term sick and disabled	2,160	2,316	2,458	2,605
Lone parents	3,168	3,127	3,149	3,018
Short-term sick	492	395	380	390
Others excluding unemployed people	1,061	1,003	793	743
Unemployed	2,083	1,669	1,447	1,286

£ million, 2005–06 prices

	2001–02 outturn	*2002–03 outturn*	*2003–04 outturn*	*2004–05 estimated outturn*
Housing benefit and discretionary housing payments	12,883	13,582	12,916	13,379
of which:				
People aged 60 and over	4,868	5,084	4,659	4,990
Long-term sick and disabled	2,771	3,165	3,082	3,231
Lone parents	2,963	3,068	3,064	3,124
Short-term sick	375	392	366	338
Others excluding unemployed people	750	718	722	741
Unemployed	1,155	1,155	1,023	955

Notes:

1. Totals may not sum due to rounding.
2. Figures are on a Resource Accounting and Budgeting basis.
3. Some figures for past years may have changed since previous publications owing to the incorporation of more up-to-date information.
4. Expenditure for 2004–05 reflects the latest benefit-by-benefit estimate of outturn, and not the amounts voted by Parliament.
5. Total amounts paid to beneficiaries, irrespective of the source of funding. Includes benefit spending reimbursed by DWP, spending on rent rebates financed within local authorities' Housing Revenue Accounts, and benefit spending financed from local authorities' general funds.
6. From 2004–05 the figures shown take into account the transfer of responsibility of The Rent Service to DWP.
7. Real terms have been calculated using gross domestic product deflators updated after the Budget Report of 16 March 2005.

Source:

DWP Income-related benefit expenditure tables, table 7.

Mr. Laws: To ask the Secretary of State for Work and Pensions what proportion of tenants receiving housing benefit in *(a)* the deregulated private sector, *(b)* the regulated private sector and *(c)* registered social landlord accommodation are (i) pensioners, (ii) disabled, (iii) lone parents, (iv) unemployed and (v) others. [3577]

Mr. Plaskitt: The information is in the table.

Proportion of housing benefit recipients in each client group with deregulated, regulated and registered social landlord (RSL) tenancies, Great Britain—May 2003

Percentage

		Aged under 60			
	Aged 60 or over	*Disabled*	*Lone parents*	*Unemployed*	*Others*
Deregulated	18.8	26.0	27.1	12.6	15.4
Regulated	81.6	9.9	2.7	2.2	3.6
RSL	42.1	23.1	21.6	5.2	8.1

Notes:
1. Figures are based on a 1 per cent. sample and subject to a degree of sampling variation.
2. The data refers to benefit units, which may be a single person or a couple.
3. Percentages are rounded to one decimal place and may not sum due to rounding.
4. Housing benefit figures exclude any Extended Payment cases.
5. "Aged 60 or over" are cases where the claimant and/or partner are aged 60 or over.
6. "Disabled" are cases where the claimant and partner are aged under 60 and in receipt of a disability premium.
7. "Lone parents" are single claimants aged under 60, with a dependent, and not in receipt of a disability premium.
8. "Unemployed" are cases where the claimant and partner are aged under 60, and one is in receipt of income based or contribution based jobseeker's allowance, not on a Government training scheme and not in receipt of a disability premium.
9. "Others" are cases not falling into any of the categories shown.

Source:
Housing Benefit and Council Tax Benefit Management Information System, Annual 1 per cent. sample, taken in May 2003.

Mr. Paul Goodman: To ask the Secretary of State for Work and Pensions how many complaints in respect of housing benefit were reported to the Local Government Ombudsman in each year since 1997, broken down by region. [5453]

Mr. Woolas: I have been asked to reply.

Information on the number of complaints in respect of housing benefit received each year by each of the three Local Government Ombudsmen is given as follows:

Number of cases received each year	*Ombudsman in London (currently, broadly covering north London, Essex, Kent, Suffolk, Surrey, East Sussex, West Sussex, Berkshire, Buckinghamshire and Hertfordshire)*[1]	*Ombudsman in Coventry (currently, broadly covering south London, most southern and central England, and the south west)*[1]	*Ombudsman in York (currently, broadly covering the north of England, Cheshire, Derbyshire, Lincolnshire and Nottinghamshire)*[1]
1997–98	725	206	216
1998–99	913	171	281
1999–2000	1,669	258	426
2000–01	2,704	356	968
2001–02	1,097	1,050	849
2002–03	799	557	697
2003–04	701	517	649
2004–05	678	442	348

[1] From time-to-time, responsibility for cases in particular local authority areas are redistributed between Ombudsmen, so as to even out the Ombudsmen's workloads.

Mr. Paul Goodman: To ask the Secretary of State for Work and Pensions how many local authorities have transferred administration of housing benefit to another provider due to persistent failure to meet required standards in each of the last five years. [5455]

Mr. Plaskitt: The information is not available.

Local authorities can choose whether they administer housing benefit themselves or use other service providers for part or all of the process.

The Secretary of State also has the power to require a local authority to use a different provider where it has failed to meet the requirements of statutory directions to improve its performance. It has not been considered necessary to use this power.

Mr. Paul Goodman: To ask the Secretary of State for Work and Pensions which software systems are used in the housing benefit pathfinders to administer housing benefit. [5470]

Mr. Plaskitt: The software systems being used by the nine LHA Pathfinder authorities are provided by the following IT suppliers: Anite; Civica; Academy; and SX3.

Mr. Paul Goodman: To ask the Secretary of State for Work and Pensions how often housing benefit claimants are required to renew their claims *(a)* in the pathfinder areas and *(b)* in other areas, broken down by region. [5474]

Mr. Plaskitt: Since October 2003 in the case of pensioners, and since April 2004 in the case of other people, housing benefit claims no longer have to be renewed.

Mr. Laws: To ask the Secretary of State for Work and Pensions (1) if he will make a statement on the conclusions of the research on the single room rent restriction; [5633]

(2) if he will place in the Library a copy of the research into the single room rent restriction. [5634]

Mr. Plaskitt: This research, which was published on 9 June 2005 as part of the Department for Work and Pensions Research series (Report number 243), confirms that the proportion of young people facing a shortfall, between benefit and rent, is on a downward trend and those who occupy accommodation covered

by the single room rent definition face similar levels of shortfall, on average, to other claimants subject to the Local Reference Rent.

This research also identifies problems young people can face when trying to rent in the private rented sector and we will consider carefully whether there are further improvements we can make to the housing benefit scheme which will help alleviate these.

The report is available in the Library.

Incapacity Benefit

Mr. Laws: To ask the Secretary of State for Work and Pensions what proportion of incapacity benefit recipients live in each authority area listed in descending order; and if he will make a statement. [971]

Mrs. McGuire: The information has been placed in the Library.

Medical Examination Centres

Paul Holmes: To ask the Secretary of State for Work and Pensions if he will list the medical examination centres in the UK which are *(a)* to be closed and *(b)* to remain open. [5235]

Mrs. McGuire *[holding answer 20 June 2005]:* As part of detailed discussion following the award of a new medical services contract the Department and Atos Origin are discussing a range of proposals including an estates strategy that would both improve service standards and secure investment in other areas. Further information will be made available once these discussions have been concluded.

National Insurance Contracted-out Rebate

Mr. Frank Field: To ask the Secretary of State for Work and Pensions how many people have received the national insurance contracted-out rebate; and what the *(a)* total value of the rebate and *(b)* the average value per person of the rebate has been in each of the last five years. [7038]

Mr. Plaskitt: The information is in the table:

Great Britain

	Number of people who received the contracted-out rebate (million)	*Total value (£ billion)*	*Average value (£)*
2004–05	10.5	10.3	980
2003–04	10.7	10.1	940
2002–03	11.1	10.4	940
2001–02	11.1	9.0	810
2000–01	11.1	8.7	780

Notes:

(a) Numbers of people contracted out are rounded to 100,000, "Total Value" amounts are rounded to £100 million and "Average Value" amounts are rounded to £10.

(b) Estimates are for Great Britain only, not UK, and are consistent with Budget 2005 projections.

(c) Estimates of the number of people contracted out are based on the average numbers contracted out in any week earning above the Lower Earnings Limit and not on the total numbers contracted out during the year.

(d) The "Total Value" of the rebate includes rebates to all Contracted-out Salary Relate Schemes, Contracted-out Money Purchase Schemes and Appropriate Personal Pension Schemes and Stakeholder Schemes. It also includes the cost of the employer's share of the rebate.

(e) Figures up to and including 2001–02 are based on published data on the numbers of people contracted out. Figures for 2002–03 to 2004–05 are based on estimates of the number of people contracted out.

Government Actuary's Department

Pension Commission

Daniel Kawczynski: To ask the Secretary of State for Work and Pensions when the consultation on the findings of the Pension Commission will be completed. [4725]

Mr. Timms: The Pension Commission's consultation on issues raised in its first report "Pensions; Challenges and Choices" ended 31 January 2005. The Commission is expected to publish its Final Report before the end of 2005.

We want to build a national consensus on a long-term solution to adequate income in retirement. We intend to ensure that the widest possible dialogue takes place prior to and beyond the publication of the Pensions Commission report as part of our National Pensions Debate.

Pensions

Jeremy Corbyn: To ask the Secretary of State for Work and Pensions what assessment he has made of the take-up of pension credit by pensioners whose first language is not English. [5751]

Mr. Timms: Reliable information on the ethnicity of those entitled to income related benefits is not currently available. The Department will continue to use the findings of research in order to identify the barriers to take-up among people from ethnic minorities, including those whose first language is not English, and ways to overcome them. The Department will also continue to seek to improve the quality of the data which it holds on the ethnicity of its customers and the way in which this information is collected. Information on pension credit, as with other benefits or entitlements, is available in a number of languages and applications can be taken by telephone in languages other than English.

Jeremy Corbyn: To ask the Secretary of State for Work and Pensions how many people in Islington *(a)* received state pension, *(b)* applied for pension credit and *(c)* received pension credit in each of the last three years; and what the average pension credit payment was in each year. [5752]

Mr. Timms: Information on the number of people in receipt of State Pension and Pension Credit in the local authority area of Islington, and average awards, is set out in the following two tables. Information on the number of people who have applied for or are eligible for Pension Credit is not available in respect of individual local authority areas or constituencies.

Table 1: State pension claimants, Islington local authority area, September 2002 to September 2004

	Claimants	Average award (£)
2002	19,400	79.03
2003	18,500	81.03
2004	19,300	82.96

Notes:

1. Numbers of claimants are rounded to the nearest 100.
2. Numbers of claimants are based on a 5 per cent. sample and are therefore subject to a degree of sampling variation.
3. Local authorities are assigned by matching postcodes against the relevant ONS postcode directory.

Source:

Information Directorate, Department for Work and Pensions, 5 per cent. sample

Table 2: Pension credit recipients, Islington local authority area, December 2003 to March 2005

	Households	Individuals	Average award (£)
December 2003	7,830	9,100	64.92
December 2004	8,985	10,460	62.50
March 2005	9,145	10,640	62.17

Notes:

1. Number of households and individuals are rounded to the nearest 5.
2. Figures relate to the end of the month.
3. Individuals comprise claimants and partners and may contain a small number of partners aged under 60.
4. Pension credit replaced minimum income guarantee from 6 October 2003.
5. Parliamentary constituencies are assigned by matching postcodes against the relevant ONS directory.
6. The figures for March 2005 are the latest available.

Source:

Information Directorate, Department for Work and Pensions, 100 per cent. sample

Mr. Jim Cunningham: To ask the Secretary of State for Work and Pensions what measures his Department is taking to ensure the equality of women's pensions compared to men's pensions. [6987]

Mr. Timms: The proportion of women retiring with a full basic state pension will rise substantially over the next 20 years. Measures such as Home Responsibilities Protection, improved participation in the labour market and tax credits have all contributed to this. In addition, with the introduction of state second pension, the proportion of women who are now accruing significant second state pension rights is similar to that of men. This represents a major improvement on the old system of SERPS.

Of course we want to do more. That is why one of our principles for reform is that the pensions system should produce fair outcomes for women and carers. We have embarked on a National Pensions Debate to build consensus as to the best way to achieve this. As part of this debate we will be publishing an analysis of women's pension position.

Mr. Jim Cunningham: To ask the Secretary of State for Work and Pensions how many people in Coventry, South *(a)* received state pension, *(b)* applied for pension credit and *(c)* received pension credit in each of the last three years; and what the average pension credit payment was in each year. [6988]

Mr. Timms: Information on the number of people in receipt of state pension and pension credit in Coventry, South, and average awards, is set out in the following two tables. Information on the number of people who have applied for or are eligible for pension credit is not available in respect of individual constituencies.

Table 1: State pension recipients, Coventry, South, September 2002 to September 2004

Date	Recipients	Average award (£)
September 2002	15,200	80.30
September 2003	16,400	83.82
September 2004	16,700	86.10

Notes:

1. Numbers of recipients are rounded to the nearest hundred.
2. Numbers of recipients are based on a 5 per cent. sample and are therefore subject to a degree of sampling variation.
3. Parliamentary constituencies are assigned by matching postcodes against the relevant ONS postcode directory.

Source:

Information Directorate, Department for Work and Pensions, 5 per cent. sample

Table 2: Pension credit recipients, Coventry, South, December 2003 to March 2005

Date	Households	Individuals	Average award (£)
December 2003	3,895	4,580	46.57
December 2004	4,690	5,575	44.55
March 2005	4,805	5,715	44.10

Notes:

1. Numbers of households and individuals are rounded to the nearest 5.
2. Figures relate to the end of the month.
3. Individuals comprise claimants and partners and may contain a small number of partners aged under 60.
4. Pension credit replaced minimum income guarantee from 6 October 2003.
5. Parliamentary constituencies are assigned by matching postcodes against the relevant ONS directory.
6. The figures for March 2005 are the latest available.

Information Directorate, Department for Work and Pensions, 100 per cent. sample

Pensions Regulator

Mr. Crabb: To ask the Secretary of State for Work and Pensions under what circumstances the Pensions Regulator may refuse to respond to correspondence from a member of the public. [4778]

Mr. Timms: There will be occasions when it is necessary to refuse to continue correspondence with an individual complainant or enquirer. This could be, for example, where the correspondence is seeking information which the Regulator considers to be exempt from disclosure under the Pensions Act 2004, the Data Protection or Freedom of Information Acts, the

Environmental Information Regulations, or where in exceptional cases and after numerous responses the Regulator considers the nature of the correspondence vexatious.

State Pension

Vera Baird: To ask the Secretary of State for Work and Pensions what level of basic state pension a woman is entitled to if she has national insurance contributions or credits for up to 24 per cent. of the 39 years required for her to accumulate a full basic state pension. [5647]

Mr. Timms: She would not be entitled to any basic state pension based on her own contributions but could become entitled if she pays voluntary contributions for at least another year. A married woman can get a basic state pension of around 60 per cent. of their husband's entitlement when both have reached state pension age and make a claim, regardless of her contributions.

We are seeking consensus on how best we could achieve a fair outcome in terms of state pension entitlement for women and carers which is one of the six key principles that will guide our work in meeting the pensions challenge.

Vera Baird: To ask the Secretary of State for Work and Pensions (1) what the position is with regard to national insurance contributions towards a basic state pension of a person who earns less than the lower earnings limit in part-time work throughout her career while caring for children; [5649]

(2) what the position is with regard to national insurance contributions or credits towards a basic state pension of a person who cares for another for less than 35 hours a week and does a job earning less than the lower earnings limit. [5650]

Mr. Timms: We recognise that caring responsibility on its own would not entitle a person to a basic state pension. We have embarked on the national debate to achieve consensus on future pension policy. Producing fair outcomes for women and carers is one of the principles guiding reform.

Underfunded Pension Schemes

Mr. Cameron: To ask the Secretary of State for Work and Pensions why an age limit of within three years of normal retirement age on 14 May 2004 was set for those eligible to claim payment from the Financial Assistance Scheme for under funded pension schemes; what provisions have been made for those who fall outside the age limit; what is being done to help small firms who have lost their pension funds; and if he will make a statement. [4720]

Mr. Timms: Our priority is getting help to those facing the most urgent difficulties being closest to, or already at, retirement age and therefore less able to make provision to replace their lost pensions. As the funding available is limited we need to ensure that any assistance we provide will make a considerable impact. That is why the draft regulations on the Financial Assistance Scheme(FAS), which we issued for consultation on 4 April, provide help to those within three years of their scheme pension age, or above their scheme pension age, on 14 May 2004. Members of pension schemes set up by small firms will be eligible for such help provided the schemes and members also meet the other qualifying criteria. Following the end of the consultation period, draft regulations setting up FAS will be laid in Parliament shortly. We have made a commitment to review FAS, including its funding, in the next Spending Review.

Winter Heating Allowance

Jim Cousins: To ask the Secretary of State for Work and Pensions if he will estimate the cost of *(a)* the winter heating allowance and *(b)* means-tested benefits for pensioners over (i) 65, (ii) 67, (iii) 70 and (iv) 75 years, in (A) 2005–06, (B) 2010–11, (C) 2020–21, (D) 2030–31, (E) 2040–41 and (F) 2050–51 assuming the uprating of such allowances and benefits is continued on the same basis as that announced for the current year and the basic state pension is uprated on the same basis as announced for 2005–06. [6325]

Mr. Timms: The expenditure figures are given in the following table.

	2005–06	*2010–11*	*2020–21*	*2030–31*	*2040–41*	*2050–51*
Age 65 and over						
Winter Fuel Payments	1,600	950	900	800	700	550
Pension Credit	5,400	7,950	12,500	19,650	28,850	39,000
Housing Benefits	6,100	6,800	8,850	11,500	14,350	16,700
Age 67 and over						
Winter Fuel Payments	1,450	850	800	750	650	500
Pension Credit	4,950	7,300	11,600	18,250	27,250	36,800
Housing Benefits	5,550	6,150	8,100	10,500	13,400	15,450
Age 70 and over						
Winter Fuel Payments	1,250	700	700	600	550	450
Pension Credit	4,300	6,500	10,300	16,350	24,700	33,800
Housing Benefits	4,800	5,350	7,000	9,100	11,750	13,800

	2005–06	2010–11	2020–21	2030–31	2040–41	2050–51
Age 75 and over						
Winter Fuel Payments	900	500	450	450	400	350
Pension Credit	3,350	5,050	7,900	13,150	20,050	28,550
Housing Benefits	3,500	4,250	5,100	6,850	8,900	11,000

Notes:
1. All expenditure is in current (2005–06) prices and represents UK expenditure. Expenditure expressed in £ million, rounded to the nearest £50 million.
2. The expenditure given for winter fuel payment does not include one-off age-related payments.
3. In 2005–06 the winter fuel payment per household where householder(s) are up to age 79 is £200. For those 80 years and over this is £300. These allowances are reduced to £150 for all households after 2005–06.
4. After 2005–06 the winter fuel payment is a fixed annual payment of £150 in cash terms. As a result—despite increases in the 65+ population between 2005–06 and 2050–51—there is a downwards trend in expenditure when quoted in current prices.
5. Housing benefits include both housing benefit and council tax.
6. All uprating assumptions used are consistent with Budget 2005 published forecasts.

Source:
DWP forecasting models, consistent with Budget 2005.

TRANSPORT

Air Services (Meals)

John Smith: To ask the Secretary of State for Transport what representations he has received from the British Nutritional Foundation on the salt content of in-flight meals. [6808]

Ms Buck: The Department has received no representation from the British Nutritional Foundation on the salt content of in-flight meals.

John Smith: To ask the Secretary of State for Transport what representations he has made to the Aviation Health Unit on the salt content of in-flight meals. [6809]

Ms Buck: The Department has made no representation to the Aviation Health Unit on the salt content of in-flight meals.

Air Travellers (Financial Protection)

Mr. Swayne: To ask the Secretary of State for Transport what options for financial protection of travellers have been the subject of discussion between his Department and the Civil Aviation Authority; and if he will make a statement on the proposed timetable for consultation on the preferred option. [7266]

Ms Buck: The options for the financial protection of air travellers discussed with the Civil Aviation Authority include extension of the scope of financial protection to cover all UK-originating international flights, reducing the scope of protection to the minimum permitted under European legislation and maintaining the status quo. The Government have already received many representations, and the principal stakeholders were involved in the analytical work over the past few months.

Bus Services

John Hemming: To ask the Secretary of State for Transport if he will make provision for sector tendering for bus services outside London. [4180]

Ms Buck: If by "sector tendering" the hon. Member means the tendering of bus services by a local transport authority over a substantial area, giving the successful tenderer exclusive right to operate in that area, it is possible to do this through a quality contracts scheme under the Transport Act 2000. Such a scheme must be approved by the Secretary of State (or in Wales, the National Assembly for Wales), who must be satisfied that it is the only practicable way of implementing the authority's bus policies and will do so in a way that is economic, efficient and effective.

The Future of Transport White Paper (Cm 6234, July 2004) encouraged the development of combined packages of bus enhancement measures, probably through quality contracts, and measures to reduce traffic congestion.

The Department has issued guidance to English local authorities on applications for approval of quality contracts schemes.

Congestion

Tom Brake: To ask the Secretary of State for Transport (1) what method his Department uses for calculating congestion; [7530]

(2) what definition of congestion his Department uses. [7531]

Dr. Ladyman: The measure that has been used in the past is derived from comparing actual traffic speeds with those that would be achievable in the absence of congestion. Full details of the methodology are available on the Department's website at www.dft.gov.uk/stellent/groups/dft_transstats/documents/page/dft_transstats_021863.pdf.

However, the Department has always acknowledged the limitations of measuring congestion in this way and is currently developing new, more detailed data sources and new measures of traffic congestion.

Crossrail

Andrew Rosindell: To ask the Secretary of State for Transport what assessment he has made of whether the Eurostar Depot at North Pole could accommodate the Crossrail fleet. [7496]

Derek Twigg: On 26 May 2005, Cross London Rail Link's released a report on Depot Location Options. The reports details the selection and assessment of all the sites considered which includes the North Pole depot.

Andrew Rosindell: To ask the Secretary of State for Transport if he will take steps to ensure that the Westlands Playing Field and adjacent land is returned to its original use when it is no longer required for the Crossrail worksite. [7497]

Derek Twigg: Measures to mitigate the impacts of Crossrail on the Westlands Playing Field are currently under discussion with the London borough of Havering. The intention is however to return the site to its original use.

Andrew Rosindell: To ask the Secretary of State for Transport whether he expects the Crossrail maintenance depot in Romford to operate 24 hours a day. [7498]

Derek Twigg: The Romford Depot is expected to operate on a 24 hours a day basis.

Departmental Finance and Payroll Contract

John McDonnell: To ask the Secretary of State for Transport whether he expects that the planned Enterprise Option centralising the Department's finance and payroll functions will use the Partners Achieving Change Together contract; and whether it is compliant with EU public sector procurement rules. [6555]

Ms Buck: The Department intends to use the PACT contract to obtain professional advice on the implementation of its shared services project, which will cover finance, payroll and HR activities. The terms of the PACT contract are such that its use on this project is compliant with EU public sector procurement rules.

Departmental Relocation

Mr. Gale: To ask the Secretary of State for Transport how many of his Department's posts *(a)* have been relocated and *(b)* are under consideration for relocation from London to the deprived areas of the South East. [6265]

Ms Buck: The Department and its Agencies are implementing the Lyons Review recommendations to relocate 66 posts out of London and the South East by 2010.

So far, the department has relocated 12 posts from London to Hastings, a relatively deprived area in the South East. A further 13 posts will also relocate there. Timing is dependent on other efficiency programme decisions.

Driving Tests

Mr. Duncan: To ask the Secretary of State for Transport what the average waiting time for tests was at each Driver and Vehicle Licensing Agency driving test centre in the last year for which figures are available, ranked in order. [7104]

Mr. Darling: The Driving Standards Agency (DSA) is responsible for delivering the driving test. The Agency publishes each week on its website data on the availability of practical tests for learner drivers at each of the permanent test centres which indicates average waiting times.

House Building (Traffic)

Mrs. Maria Miller: To ask the Secretary of State for Transport how plans to reduce the level of motorway noise will be adjusted to take account of changes in traffic flow resulting from increased levels of house building in the South East. [6982]

Dr. Ladyman: The Government will in 2007 publish maps of noise from motorways. These maps will be updated at least every five years to take into account any changes in conditions and plans to reduce noise levels will be reviewed accordingly.

Mrs. Maria Miller: To ask the Secretary of State for Transport what assessment he has made of the likely effects of the Government's house building targets for the South East on *(a)* traffic flows and *(b)* consequent noise levels on the M3 between junctions 5 and 7. [6983]

Dr. Ladyman: Changes to traffic flows on the M3 between junctions 5 and 7 will depend upon the future location of housing which, in the first instance, will be determined by the South East Plan, currently being drafted by the South East England Regional Assembly. The Highways Agency is contributing to deliberations on the draft Plan.

We will be reviewing plans to reduce the level of motorway noise as the result of the noise maps that will be published in 2007 in accordance with EU Directive 2002/49/EC.

M3

Mrs. Maria Miller: To ask the Secretary of State for Transport when noise levels between Junction 5 and 7 on the M3 were last monitored; and whether there have been changes in the noise levels over time. [6980]

Dr. Ladyman: To calculate road traffic noise levels, the Department uses a model set out in the technical memorandum "Calculation of Road Traffic Noise" rather than roadside noise monitoring, which is subject to variables such as the weather and changing traffic conditions.

Roadside noise levels have not therefore been monitored on the M3 between Junctions 5 and 7. However, assessments have been made using the traffic noise model. Calculations indicate that the level of traffic noise between M3 Junctions 5 and 7 is likely to have increased by around 4.5dB over the last 20 years.

Mrs. Maria Miller: To ask the Secretary of State for Transport what plans are in place to reduce the levels of motorway noise for residents living around junctions 5, 6 and 7 of the M3; and when those measures will be completed. [6981]

Dr. Ladyman: Following an assessment of noise severity, noise barriers have already been installed between M3 junctions 6 and 7 adjacent to the areas of Hatch Warren and Black Dam.

A further series of noise mitigation measures is also planned for this section of the M3 Motorway. The proposal is to install noise barriers adjacent to the permanent caravan site at Hatch, between M3 junctions 5 and 6. There are also plans to resurface a section of the

M3 between junctions 5 and 7 to maintain the operational safety of the carriageway and a lower noise surface will be used.

Two further sites at Up Nately and Mapledurwell are being investigated for the possible provision of noise barriers.

Subject to funding, work at the Hatch caravan site work is programmes for 2007 and the resurfacing work in 2008. Following further investigation and availability of funds, work at Up Nately and Mapledurwell will be considered for programming beyond 2009–10.

M40/A40

Mr. Paul Goodman: To ask the Secretary of State for Transport when he will publish the M40/A40 route management strategy. [7040]

Dr. Ladyman: The Highways Agency plans to publish this strategy by mid-July.

Mersey Tram

Mr. Duncan: To ask the Secretary of State for Transport when he expects the Merseytram scheme to proceed. [7118]

Mr. Darling: I refer the hon. Member to my statement of 13 June. The promoters of Merseytram are exploring the scope for progressing Line 1 within the committed funding.

Mini-Motorbikes

Mr. Burstow: To ask the Secretary of State for Transport what plans he has to assess the extent of illegal use of mini-motorbikes on *(a)* public roads and *(b)* public spaces. [7243]

Dr. Ladyman: The Department currently has no plans to assess the extent of illegal use of mini-motorbikes on public roads and spaces, but we do appreciate that misuse of these vehicles can cause significant alarm, harassment or distress to local communities. I understand that the Home Office has received representations from the police about illegal and irresponsible use of miniature vehicles and is examining what more might be done to tackle this problem.

Motorways/Trunk Roads

Mr. Hayes: To ask the Secretary of State for Transport what the total length is of UK *(a)* motorways and *(b)* trunk roads; and how many miles of each were built in each year since 1997. [460]

Dr. Ladyman: Roads in Scotland and Wales are the responsibility of the Scottish Executive and the National Assembly for Wales respectively. The Secretary of State for Northern Ireland is responsible for motorway building in Northern Ireland. There is no designation of trunk roads in Northern Ireland.

The English road network currently comprises 1,833 miles of motorway and 3,096 miles of all-purpose trunk roads.

The major schemes (costing more than £5 million) completed on the trunk road network from 1997 to date, and their approximate length, are shown in the tables. Some of the roads listed have since been detrunked, or have become the responsibility of the Greater London authority.

The road schemes represent improvements rather than necessarily additions to the length of the trunk road network. For example, some represent road widening schemes and some bypasses of routes which are detrunked on completion of the bypass.

All purpose trunk road	*Scheme description*	*Date of completion*	*Length (miles)*

Ports

Vera Baird: To ask the Secretary of State for Transport (1) if he will issue guidelines for the ports industry on preparing proposals to increase port capacity; [6896]

(2) if he will establish a sequential test for ports planning which takes into account *(a)* environmental sustainability, *(b)* regeneration and *(c)* the impact on the local economy of port development; [6897]

(3) what plans he has to integrate port development into a sustainable transport strategy for the UK; [6898]

(4) what his latest estimate is of how much additional port capacity will be required in the UK over the next *(a)* five, *(b)* 10 and *(c)* 15 years; [6899]

(5) what assessment he has made of comparative *(a)* environmental impact and *(b)* impact on productivity of port expansion proposals. [6900]

Dr. Ladyman: The forthcoming review of ports policy will address questions around port capacity and future port development. As part of the preparatory work for the review, the Department has commissioned consultants to produce national port traffic forecasts for Great Britain through to 2030. These forecasts will be disaggregated by region and traffic type, and will be published as part of the review.

The Department issued guidance on new port developments in April 2003. "A Project Appraisal Framework for Ports" aims to assist promoters of, those affected by, and others who may wish to make representations about, port developments. In arriving at decisions on these developments, the factors that have been considered will be made clear at the time those decisions are made.

The review will also look at wider issues, including environmental factors, local regeneration, productivity, and the role of ports in our overall transport strategy.

Honours

Mr. Pope: To ask the Secretary of State for Transport how many officials currently in the Department received honours in the recent Queen's Birthday Honours List; and at what rank of honour. [6117]

Ms Buck: I refer my hon. Friend to the answer given by the Chancellor of the Duchy of Lancaster on 22 June 2005, *Official Report*, column 1060W.

Rail Passengers

Mr. Hoyle: To ask the Secretary of State for Transport how many traffic movements there are on average each day between South Preston and North Warrington on the M6. [6637]

Dr. Ladyman: The average number of vehicles using the M6 between junction 30, in the vicinity of South Preston, and junction 21, in the vicinity of North Warrington, on each weekday in 2004, is provided in the table.

Average 24 hour traffic volumes—2004

Location	*Direction*	*Monday*	*Tuesday*	*Wednesday*	*Thursday*	*Friday*	*Saturday*	*Sunday*

Railways

Mr. Duncan: To ask the Secretary of State for Transport how many community rail line designations have been made so far. [7115]

Mr. Darling: Three lines have been designated as community rail lines. These are the routes from Watford Junction to St. Albans Abbey (the Abbey line); Middlesbrough to Whitby (the Esk Valley line); and St. Ives to St. Erth (the St. Ives Bay line).

Mr. Duncan: To ask the Secretary of State for Transport what discussions he has had with the railway industry about the construction of increased capacity at pinch points on the network. [7117]

Mr. Darling: The Strategic Rail Authority has begun a series of route utilisation strategies (RUS) to determine the most efficient use of existing network infrastructure which will help to inform the need for future network development. Network Rail will take this work on as the SRA is wound-down under the provisions of the Railways Act 2005.

Mr. Duncan: To ask the Secretary of State for Transport which light rail schemes his Department expects to be completed and in operation by 2010. [7119]

Mr. Darling: My Department is considering a number of new light rail scheme proposals, including extensions to existing systems. Completion and operation dates for schemes will depend on the outcomes of our consideration of these proposals.

Road Charging Research

Mr. Clappison: To ask the Secretary of State for Transport when he commissioned his research on road charging; what the cost was of the research; whether he announced the commissioning of the research at the time it was commissioned; when he made his decisions about the use that would be made of the research; and if he will make a statement. [4974]

Dr. Ladyman: My right hon. Friend the Secretary of State for Transport announced in a statement to the House on 9 July 2003 a feasibility study into the potential for road pricing in the UK. The Feasibility Study of Road Pricing in the UK was published by the Department for Transport in July 2004.

The total cost of road pricing research contracts issued between the announcement and publication of the feasibility study was £1,072,838 including VAT.

In line with its manifesto commitment, the Government are examining the potential of moving away from the current system of motoring taxation towards a national system of road pricing. Further research will be undertaken in due course.

Road Pricing

John Battle: To ask the Secretary of State for Transport if he will allow a reduced rate for people with disabilities as part of his proposed road pricing system. [6282]

Dr. Ladyman: In line with their manifesto commitments, the Government are examining the potential of moving away from the current system of motoring taxation towards a national system of road pricing. The issue of exemptions and discounts for people with restricted mobility would need careful consideration in any scheme design.

John Battle: To ask the Secretary of State for Transport if he will set up his proposed road pricing system to charge more to more heavily polluting vehicles and less to vehicles with a lower environmental impact. [6283]

Dr. Ladyman: In line with their manifesto commitments, the Government are examining the potential of moving away from the current system of motoring taxation towards a national system of road pricing. For any road pricing scheme developed, we would ensure that incentives for cleaner vehicles are safeguarded in order to contribute to meeting our environmental targets.

Lynne Jones: To ask the Secretary of State for Transport how the proposed pilot schemes for road pricing will operate; when he expects the first pilot scheme to become operational; and if he will make a statement. [5920]

Dr. Ladyman: As our manifesto promised, the Government are examining the potential of moving away from the current system of motoring taxation towards a national system of road pricing. Although there would need to be one or more pilots for a future national road pricing scheme, no decisions have been made about the timing, nature or location of any such pilots. The "Future of Transport" White Paper (July 2004) announced our intention to establish a Transport Innovation Fund to give incentives to develop and deploy innovative local transport packages, support innovative mechanisms which raise alternative funding mechanisms and support the funding of regional, inter-regional and local schemes that are beneficial to national productivity. Further details on the aims and operation of the Fund will be published shortly.

However, the Secretary of State has confirmed that ultimately up to £200 million a year will be made available from the Fund to support local authorities implementing innovative solutions to congestion problems in their local areas where these include demand management based on pricing.

Road Safety

Ben Chapman: To ask the Secretary of State for Transport pursuant to the answer to the hon. Member for Newport, West (Paul Flynn) of 13 June 2005, *Official Report*, column 26W, on road safety, if he will discuss with the Highways Agency conducting further research on distraction to drivers caused by roadside advertising on motorways. [5768]

Dr. Ladyman: It is difficult to derive a direct causal relationship between the presence of roadside advertisements and other potential distractions to road accidents because accidents do not happen very often, and when they do, are the result of a number of factors. Therefore, while the Highways Agency will continue to assess the impact and likely safety consequences of individual roadside advertisements, I do not believe that further research is likely to be any more effective in establishing such a link.

Safety Cameras

Mr. Drew: To ask the Secretary of State for Transport how many accidents involving *(a)* injuries and *(b)* loss of life (i) have taken place in each year since the installation of speed cameras and (ii) took place in the year before the installation of speed cameras at the site of each fixed speed camera in the Stroud constituency. [5190]

Dr. Ladyman: The information requested is not held centrally, but the Gloucestershire Safety Camera Partnership has provided the information shown in the attached table on the numbers of personal injury collisions ("PICs"), and the number involving fatalities, before and after the setting up of the camera sites.

The Gloucestershire Safety Camera Partnership can be contacted via their website at www.glossafetycameras.org.uk.

Fixed speed cameras in Stroud constituency—number of personal injury collisions (PICs), including collisions involving fatalities, before and after setting-up of sites

	Camera site

[1] Including 1 fatal collision
[2] Including 1 fatal
[3] 0 fatal

Mr. Pope: To ask the Secretary of State for Transport how much was spent on *(a)* installation of new speed cameras and *(b)* maintenance and removal of existing speed cameras in (i) Cumbria, (ii) Merseyside, (iii) Cheshire, (iv) Greater Manchester and (v) Lancashire in the last year for which figures are available; and how much was raised in revenue by speed cameras in each area in that year. [6186]

Dr. Ladyman: The Department holds funding information for the overall operation of safety camera partnerships, and not the costs relating to the installation, maintenance or removal of camera sites. Detailed information is available from partnerships.

The Department has published on its website the audit certificates for all partnerships. The latest published information is for 2003–04 and this shows that receipts from Fixed Penalty Notices in four of these five areas are as follows:

	£
Cumbria	1,618,740
Cheshire	1,803,840
Greater Manchester	2,887,080
Lancashire	5,073,600

Merseyside joined the safety camera programme on 1 April 2005, so no historic information is available for that partnership.

Mr. Duncan: To ask the Secretary of State for Transport which 20 speed camera sites have generated the largest income from fines. [7108]

Mr. Darling: The Department's information on fines following offences detected by safety cameras relates to the totals for safety camera partnerships, and not to individual camera sites. Information on the total fine receipts and number of fines for each partnership for the latest audited year 2003–04 is available on the Department's website of responses to Freedom of Information requests.

Mr. Duncan: To ask the Secretary of State for Transport how many fixed speed cameras have been installed in the last six months. [7109]

Mr. Darling: In the six months to 31 May 2005, 54 fixed speed camera sites—approved as part of operational cases submitted by partnerships in 2004–05 or earlier—have been installed by partnerships in England and Wales.

Mr. Duncan: To ask the Secretary of State for Transport what percentage of speed cameras are non-operational at a given time. [7111]

Mr. Darling: Forces' enforcement strategies and the detailed deployment of speed camera equipment between camera sites are police operational matters, and the Department does not hold information on this.

Mr. Duncan: To ask the Secretary of State for Transport how many speed cameras are installed on roads. [7112]

Mr. Darling: The latest information, as held by the Department, was provided in the answer of 9 June 2005, *Official Report*, columns 617–19W. Further details of all sites within the safety camera programme are available on the Department's website at www.dft.gov.uk.

Shellhaven London Gateway

Bob Spink: To ask the Secretary of State for Transport if he will list those individuals and bodies that have submitted additional evidence and comments on the proposed Shellhaven London Gateway port public inquiry following his extension of the inquiry in 2005. [5800]

Dr. Ladyman: The Secretary of State extended in January 2005 the period given for the receipt of representations on the new highways evidence submitted by the Applicant. There was no extension of the public inquiry itself.

The Secretary of State received representations and comments during the consultation period, in the extension period and after the end of the extension period from individuals and organisations as listed. In some cases the parties' comments were reiterations of their previous evidence rather than submission of any additional evidence.

Bob Spink MP

The Highways Agency

Thurrock Council

Essex County Council

The Strategic Rail Authority

The Port of Tilbury Ltd.

Shellhaven Project Environmental Action Committee

Essex Police

Council for the Protection of Rural Essex

Thurrock Primary Care Trust

Ramblers' Association (Essex)

Representations were also received from two individual local residents.

Bob Spink: To ask the Secretary of State for Transport when he expects to announce the result of the Shellhaven London Gateway port public inquiry. [5801]

Dr. Ladyman: A decision on the Shellhaven London Gateway port public inquiry will be announced as soon as possible when Ministers have completed their consideration of all relevant issues.

Transport Police

Mr. Duncan: To ask the Secretary of State for Transport how many operational police officers were employed by the British Transport Police in each year since 1997. [7106]

Mr. Darling: The British Transport Police (BTP) have provided the following information on officers employed by the BTP since 1997.

	Number of BTP officers
1997	2,132
1998	2,095
1999	2,113
2000	2,091
2001	2,109
2002	2,123
2003	2,206
2004	2,280
2005	2,494

Tyne Tunnel

Mr. Byers: To ask the Secretary of State for Transport when he expects to announce his response to the public inquiry into the second Tyne tunnel crossing. [7419]

Dr. Ladyman: We expect to be able to announce a decision shortly on the application for a Transport and Works Act Order, in parallel with ODPM taking decisions on related listed building consent applications.

Vehicle Registration

Mr. Burstow: To ask the Secretary of State for Transport what assessment he has made of the Driver and Vehicle Licensing Agency's preparedness to process all outstanding conversions from V5 to V5C Vehicle Registration before the deadline for the change. [6721]

Dr. Ladyman: The Driver and Vehicle Licensing Agency's internal planning processes, has estimated that, of those Registration Documents that remained to be converted to V5C Registration Certificates no more than half would be surrendered for conversion before the deadline for the change despite its publicity efforts. The Agency has ensured that there are sufficient staff available to process at least this number of conversions.

Mr. Burstow: To ask the Secretary of State for Transport how much the Driver and Vehicle Licensing Agency's advertising campaign to raise awareness of the change from V5 to V5C Vehicle Registration has cost; and what elements the cost comprises. [6722]

Dr. Ladyman: The total cost of the Driver and Vehicle Licensing Agency's advertising campaign to raise awareness of the change from V5 Vehicle Registration Document to V5C Vehicle Registration Certificates was £2.7 million. This comprised:

	£
Adverts in the national and motoring press	1,226,000
On-line advertising	111,000
Leaflets and posters	55,000
Public relations	56,000
A two week television advertising campaign	1,252,000

Mr. Burstow: To ask the Secretary of State for Transport how many applications for a change from V5 to V5C vehicle registration the Driver and Vehicle Licensing Agency has received in each of the last six months; and what the average processing time has been in each month. [6723]

Dr. Ladyman: For the sixth-month period from December 2004 to May 2005 DVLA processed in excess of 1.2 million V5 vehicle registration documents which resulted in the issue of V5C vehicle registration certificates in respect of vehicles where a V5C had not been issued previously. The volume of V5s processed for each month is December 2004—281,441. January 2005—300,415. February 2005—224,094. March 2005—193,750. April 2005—168,839. May 2005–130,100.

In 2004–05 DVLA's target was to deliver 95 per cent. of V5s within 12 working days of receipt. For 2005–06 the target is to deliver 95 per cent. within 14 working days. This reflects the decision to move to second class post. The actual performance achieved for the last six months is December 2004—96.5 per cent. January 2005—98.63 per cent. February 2005—99.14 per cent. March 2005—98.30 per cent. April 2005—98.92 per cent. May 2005—98.13 per cent.

Mr. Burstow: To ask the Secretary of State for Transport what estimate has been made by the Driver and Vehicle Licensing Agency of the number of V5 Vehicle Registration documents remaining to be converted to the V5C Vehicles Registration document as at 1 June. [6724]

Dr. Ladyman: The Driver and Vehicle Licensing Agency has estimated that, as of 1 June 2005, the number of V5 Vehicle Registration Documents remaining to be converted to the V5C Registration Certificate was 800,000.

CULTURE, MEDIA AND SPORT

Computer Crime

Mr. Burstow: To ask the Secretary of State for Culture, Media and Sport how many cases of computer *(a)* hacking, *(b)* fraud and *(c)* theft her Department recorded in each year since 2001–02; and for each year on how many occasions computer systems have been illegally accessed by computer hackers (i) within and (ii) outside her Department. [6951]

Mr. Caborn: My Department *(a)* has had no cases of computer hacking. *(b)* has had no cases of computer fraud. *(c)* has had the following equipment stolen:

2001: 1 Palm Pilot
2002: 1 Mini laptop
1 Laptop
2003: 1 Laptop
1 Desktop PC
2 CPUs
2004: 1 Blackberry
2005: 1 Blackberry

My Department (i) has had no cases of computer systems illegally accessed from within DCMS. (ii) has had one case of computer systems illegally accessed from outside the Department in 2003.

Digital Television (Northern Ireland)

Mr. Gregory Campbell: To ask the Secretary of State for Culture, Media and Sport which areas of Northern Ireland are unable to receive Freeview. [5508]

James Purnell: At present, only the Divis, Limavady and Brougher Mountain transmitters broadcast digital signals in Northern Ireland, to around 58 per cent. of the population.

Due to the already crowded nature of the UHF spectrum, it is not possible to extend coverage significantly beyond this level without switching off the analogue transmissions, which we expect to be completed between 2008 and 2012.

Football Foundation

Jon Trickett: To ask the Secretary of State for Culture, Media and Sport how much funding was allocated to the Football Foundation by her Department in each year since 1997, broken down by *(a)* Government region and *(b)* parliamentary constituency; and if she will make a statement. [6941]

Mr. Caborn: The Football Foundation was formed in 2000.

Between 2000–04, the Football Foundation, including the Football Stadia Improvement Fund, received £62 million in funding from Government. Last year, the Government agreed a new funding package of £45 million for the period between 2004–07.

Details of DCMS funding to the Football Foundation broken down by *(a)* Government regions and *(b)* parliamentary constituencies is not available as it is funded into a joint pot comprising match funds from The FA, FA Premier League and Government.

Licensed Premises

Steve Webb: To ask the Secretary of State for Culture, Media and Sport if she will estimate *(a)* the number of licensed premises and *(b)* the number of licensed premises serving food in each local authority in England. [7492]

James Purnell: Statistical information on licensed premises is not held by local authority area. It has been collated by Court area, reflecting the previous licensing regime. In collecting this data, the Courts have made no distinction between pubs which serve food, and those which do not. However, based on that information and my Departments own estimates, the national position is as follows:

(a) in England, there are 105,595 establishments licensed to sell alcohol on the premises; and

(b) between 90 per cent. and 95 per cent. of these establishments serve prepared food.

Sports Clubs (London)

Sarah Teather: To ask the Secretary of State for Culture, Media and Sport what estimate she has made of the number of *(a)* football, *(b)* rugby, *(c)* tennis, *(d)* athletics, *(e)* hockey and *(f)* swimming clubs in London in each of the last five years. [5303]

Mr. Caborn: My Department does not hold this information.

Village Hall Committees

Mr. Peter Ainsworth: To ask the Secretary of State for Culture, Media and Sport pursuant to the Answer of

21 June 2005, *Official Report*, column 895W, on village hall committees, what reports she has received from police and licensing authorities on whether village hall committees have been, or are, carrying on a business without an appropriate licence. [7580]

James Purnell *[pursuant to the reply, 21 June 2005, Official Report, c. 895W]:* I can confirm that my Department has received no reports from the police or licensing authorities on whether village hall committees have been, or are, carrying on a business without an appropriate licence.

SCOTLAND

Consultants

Mrs. Dean: To ask the Secretary of State for Scotland what plans he has to issue guidance on effective commissioning for those in the public and voluntary sectors who are commissioning work from external consultants. [7026]

David Cairns: I refer my hon. Friend to the answer given today by my hon. Friend the Financial Secretary to the Treasury.

Honours

Mr. Pope: To ask the Secretary of State for Scotland how many officials currently in the Department received honours in the recent Queen's Birthday Honours List; and at what rank of honour. [5130]

David Cairns: I refer my hon. Friend to the answer given by my right hon. Friend the Chancellor of the Duchy of Lancaster, on 22 June 2005, *Official Report*, column 1059W.

Taxis

David T.C. Davies: To ask the Secretary of State for Scotland how much the Department has spent on taxis in each of the last five years. [6496]

David Cairns: The Scotland Office spent the following on taxis:

	£
2000–01	7,853
2001–02	8,518
2002–03	10,130
2003–04	8,960
2004–05	8,266

FOREIGN AND COMMONWEALTH OFFICE

Afghanistan

Mr. McGovern: To ask the Secretary of State for Foreign and Commonwealth Affairs what recent assessment he has made of the security situation in Afghanistan; and if he will make a statement. [6922]

Dr. Howells: The security situation in Afghanistan remains stable but fragile. Elements opposed to the democratic process continue to carry out periodic attacks against the International Security Assistance Force (ISAF) and coalition forces, international and Afghan NGO personnel, and the Afghan people. Such attacks are likely to increase in the run-up to parliamentary and provincial elections in September. As with the presidential election in October 2004, ISAF and coalition forces will support the Government of Afghanistan's efforts to provide a secure environment for the elections.

Correspondence

Mr. Whittingdale: To ask the Secretary of State for Foreign and Commonwealth Affairs when he expects to reply to the letters of 16 March and 31 January from the hon. Member for Maldon and East Chelmsford to the Parliamentary Under Secretary of State regarding Ms Marisa Namprom. [6651]

Dr. Howells *[holding answer 23 June 2005]:* UK visas, the Department responsible for entry clearance matters arising overseas, sent a letter on this matter to the hon. Member on 22 June 2005.

Corruption

Malcolm Bruce: To ask the Secretary of State for Foreign and Commonwealth Affairs pursuant to the answer of 14 June 2005, *Official Report*, column 329W, on overseas corruption, from which missions each allegation came; on what date each was received; and to which law enforcement agency each was forwarded. [6425]

Ian Pearson: Under the current arrangements for handling allegations under part 12 of the Anti-Terrorism, Crime and Security Act 2001, all such allegations were passed to the National Criminal Intelligence Service. However, these arrangements are about to be revised to give the Serious Fraud Office the central role on future allegations. The Government refrain from commenting on the specific origin of these allegations to avoid prejudicing continuing law enforcement investigations.

Malcolm Bruce: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will list seminars and presentations organised by the Government for the UK business community since December 2003 to raise awareness of the UK's obligations under *(a)* the Organisation for Economic Co-operation and Development's Anti-Bribery Convention and *(b)* Part 12 of the Anti-terrorism, Crime and Security Act 2001. [6468]

Ian Pearson: The events in question can take many forms, ranging from presentations at large formal events to smaller briefing sessions or discussions. Since December 2003, the Government (Foreign and Commonwealth Office) have spoken at events for the UK business community covering foreign bribery in the following countries: Kenya, Nigeria, South Africa, Argentina, Brazil, Peru, Kuwait, Iran and China. The next such event is planned for Moscow at the end of July.

Mark Simmonds: To ask the Secretary of State for Foreign and Commonwealth Affairs what reports he has received regarding recent *(a)* investigations and *(b)* prosecutions of UK companies in connection with corruption overseas. [7234]

Ian Pearson: I understand that 24 matters referred to UK law enforcement under part 12 of the Anti-terrorism, Crime and Security Act 2001 since February 2002 are under investigation. In those cases under investigation, no charges have yet been brought under these provisions and it would not be appropriate to comment on operations which are currently in progress.

Hong Kong

Mr. Hoyle: To ask the Secretary of State for Foreign and Commonwealth Affairs what discussions he has had with the Chinese Government on the appointment of the new Chief Executive for Hong Kong, Sir Donald Tsang. [6623]

Ian Pearson: We have not had any discussions with the Chinese Government about Donald Tsang's appointment as Hong Kong's new Chief Executive.

Donald Tsang was the only candidate to gain sufficient Election Committee nominations to stand for Chief Executive. In accordance with the basic law, the State Council of the Chinese Central Government formally appointed Donald Tsang as Hong Kong's new Chief Executive on 21 June 2005.

Donald Tsang has a distinguished record of serving the people of Hong Kong and we are confident that he will continue to do so as Chief Executive. We have excellent relations with the Hong Kong Special Administrative Region Government and we are confident that our ties will continue to flourish under the new Chief Executive. As signatories of the joint declaration, we take seriously our commitment to ensure a stable, democratic and prosperous future for the Hong Kong Special Administrative Region.

Mr. Hoyle: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on progress towards democracy in Hong Kong. [6624]

Ian Pearson: The Government supports democracy throughout the world as the best means of creating stable, accountable and transparent government, of protecting rights and freedoms, and of upholding the rule of law.

The ultimate aim of the basic law of the Hong Kong Special Administrative Region (SAR) is a Chief Executive and Legislative Council elected by universal suffrage. We favour early progress to this end. We hope that the Hong Kong SAR Government will take full account of the wishes of the people of Hong Kong.

We noted that the legislative council elections in September 2004 were generally well run. For the first time half of the 60 members of the Legislative Council were elected directly by the people with a record number of the electorate, more than 55 per cent. turning out to vote.

The Hong Kong SAR Government taskforce on constitutional reform was expected to issue its fifth and final report in the spring of this year. The final report will contain definitive proposals on the methods by which the Chief Executive and Legislative Council are to be elected in 2007 and 2008. However, following the resignation of the Chief Executive in March, the publication of the report has been delayed until the appointment of the new Chief Executive.

We will continue to watch this issue closely and look forward to seeing the task force's proposals.

Iran

Peter Luff: To ask the Secretary of State for Foreign and Commonwealth Affairs when he next plans to meet a representative of the Iranian Government to discuss the treatment of the Baha'i community in Iran. [6581]

Dr. Howells: My right hon. Friend the Foreign Secretary currently has no plans to meet the Iranian Foreign Minister or any other member of the Iranian Government.

We continue to have serious concerns about the situation of the Baha'i community in Iran. Reports suggest that a number of Baha'is have recently been arrested. We have pressed the Iranian authorities on many occasions to allow the Baha'is to practise their faith without interference, and will continue to do so, both bilaterally and through the EU.

Ian Stewart: To ask the Secretary of State for Foreign and Commonwealth Affairs what recent assessment the UK embassy in Iran has made of Iranian Government policy towards Bahá'is; what assessment he has made of whether the policies set out in the 1991 memorandum entitled The Bahá'í Question, drafted by the Revolutionary Cultural Council of Iran remain official Government policy in Iran; and if he will make a statement. [6905]

Dr. Howells: We are not aware that the Iranian authorities have acknowledged the authenticity of the 1991 memorandum, nor commented in detail on current policy towards the Bahá'ís. The Bahá'ís are the largest non-Muslim religious group in Iran, yet unlike Christians, Jews and Zoroastrians, are not recognised in Iran's constitution. Members of the Bahá'í community have suffered intimidation and harassment, had property confiscated and been denied access to education and employment, apparently on account of their faith. A number of Bahá'í sites have been demolished, organisers of Bahá'í community activities have reportedly been harassed and the Bahá'í faith has been denigrated in the state-owned media. Many of these acts appear to have been carried out by, or with the support or acquiescence of, the Iranian authorities.

We have raised our concerns about the situation of the Bahá'ís in Iran with the Iranian authorities on many occasions, and will continue to do so, bilaterally and with our European Union partners.

Israel

Richard Burden: To ask the Secretary of State for Foreign and Commonwealth Affairs what investigations he is undertaking into the detention and deportation from Israel on 7/8 May of a delegation of

women from Birmingham at Tel Aviv airport; and what representations he is making to the Government of Israel on the matter. [4225]

Dr. Howells: Staff from the British embassy in Tel Aviv and the British consulate general in Jerusalem contacted the Israeli authorities several times regarding Israel's decision to detain the delegation of women from Birmingham on the night of 7/8 May. The British embassy in Tel Aviv is also raising this incident with the Israeli Ministry of Foreign Affairs.

The Israeli Government have the right to decide on matters of leave to enter Israel. The various procedures of security staff at entry points to Israel are a matter for the Israeli Government and are outside our direct control. Our own procedures are similarly protected. But we have raised on many occasions the manner in which the Israeli immigration and security authorities treat British travellers at points of entry.

Luke Noble

Mr. Hepburn: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make representations to the Governor of the British Virgin Islands about the sentence issued by the court in the case of Luke Noble. [6999]

Mr. Douglas Alexander: The British Virgin Islands' judiciary acts independently of the Territory's Government, of which the Governor is the constitutional head, and of the United Kingdom Government. There is no provision allowing for the prosecution to appeal sentence at present, although I understand this situation is under review.

Nigeria

Mr. Lancaster: To ask the Secretary of State for Foreign and Commonwealth Affairs what action the Government are taking to ensure the security of British citizens working in Nigeria in relation to terrorist threats. [7535]

Ian Pearson: The British High Commission in Nigeria maintains close contact with the Nigerian authorities on security issues, including terrorism. It also maintains a network of over 100 British community liaison officers throughout Nigeria, and stays in close contact with those who employ large numbers of British citizens. Like other British diplomatic posts, the High Commission has emergency plans to guide response to incidents involving British citizens. Information on potential security threats, including terrorism, is included in the Foreign and Commonwealth Office's (FCO) travel advice for Nigeria, available on the FCO's website: www.fco.gov.uk

North Korea

Mr. Hands: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on the future of the Six Party Talks on the Democratic People's Republic of Korea's nuclear programme. [6767]

Ian Pearson: The Six Party Talks between the Democratic People's Republic of Korea (DPRK), China, the US, Russia, South Korea and Japan began in 2003 but participants have not met since June 2004. We fully support this process as the best means to resolve international concern over the DPRK nuclear issue. We have regularly urged the Government of North Korea to return to the Six Party Talks, and to engage constructively with a view to agreement on the verifiable dismantlement of all its nuclear weapons programmes. There have been recent reports suggesting that North Korean leaders may be ready to resume talks soon. We hope that is the case and that they will do so in a constructive spirit without preconditions.

Prisoner Abuse (US Forces)

Sarah Teather: To ask the Secretary of State for Foreign and Commonwealth Affairs what representations the Government have made to the United States Administration on reports of prisoner abuse by US forces; and if he will make a statement. [6411]

Ian Pearson: We condemn utterly all acts of abuse.

We maintain a regular dialogue with the US Government on a great many foreign policy issues, including at the highest levels, about allegations of abuse by US forces.

The US authorities have conducted a number of inquiries into these allegations, and where there has been evidence of abuse, individuals have been punished.

Sir David Manning

Mr. Maples: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will list Sir David Manning's engagements for 6 June. [4891]

Ian Pearson: Sir David Manning's engagements for 6 June included meetings with His Excellency Mr. Franciskus van Daele, ambassador of Belgium, and Mr. Mark Everson, commissioner of the Internal Revenue Service; hosting the British school graduation ceremony and introducing the British headmistress; and introducing and attending a lecture delivered by Mrs. Blair. In addition, he had a number of internal meetings.

Taliban

Mr. Martyn Jones: To ask the Secretary of State for Foreign and Commonwealth Affairs what progress has been made in the search for *(a)* al-Qaeda leader Osama bin Laden and *(b)* Taliban leader Mullah Mohammad Omar; and if he will make a statement. [6790]

Dr. Howells *[holding answer 23 June 2005]:* For reasons which the hon. Member will understand, we do not comment on operational matters. As demonstrated by the recent arrest in Pakistan of Abu Faraj Al Libi, significant progress is being made against the senior leadership of al-Qaeda and senior Taliban allies.

United States

Chris Grayling: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will list the visitors who have been provided with accommodation and hospitality by his Department at official residences in Washington DC since 1 May. [5623]

Ian Pearson: We are unable to provide this information. To do so would incur disproportionate costs, and some of the information might have to be withheld on security or privacy grounds.

Vietnam

Mr. Jim Cunningham: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on the social and political situation in Vietnam. [6989]

Ian Pearson: Vietnam is a one-party state in which the Communist Party of Vietnam (CPV) decides all major policy issues. The country's current leadership was confirmed by the last major 9th Communist Party V Party Congress in 2001. Vietnam is expected to continue its successful doi moi (renovation) economic reform programme at the next CPV Party Congress in 2006. No significant changes to Vietnam's political system are expected. Vietnam's next major challenge is to join the World Trade Organisation, possibly late this year, which should further consolidate and spur its economic reforms.

We remain concerned about the human rights situation in Vietnam and have an increasingly open dialogue with the Vietnam Government on such issues. We are also working with Vietnam and its neighbours on their efforts to tackle terrorism, illegal immigration and organised crime in the region.

Other major challenges facing Vietnam include regional economic disparity, stubbornly high poverty in remote ethnic-minority regions and the influx of unregistered internal migrants to major cities. The Department for International Development's (DFID) support to Vietnam is one of the fastest growing UK aid programmes in the world, assisting Vietnam's social and economic development including the transition to a market-based economy.

Zimbabwe

Mr. Hollobone: To ask the Secretary of State for Foreign and Commonwealth Affairs what steps he is proposing to encourage the international community to take action to address the political situation in Zimbabwe. [6405]

Ian Pearson: We condemn the Zimbabwe authorities' forcible destruction of housing and small businesses, which has rendered hundreds of thousands of people homeless and without livelihoods.

We are working actively to end the violence and help the victims. Britain has protested strongly to the Zimbabwean authorities; is providing humanitarian assistance to those in greatest need; and is encouraging all members of the international community to follow suit.

With our stroag support, the EU has condemned Mugabe's actions and has agreed to ban from Europe and freeze the assets of another 25 of his henchmen. We are in regular contact with the US, Canada, Australia and others, who have joined us in speaking out. We are encouraging other African Governments to engage. And we are in close touch with the UN Secretary-General, who is despatching his own special envoy to Zimbabwe, Anna Tibaijuka, to report on the situation there.

We will continue to work with the international community for a return to democratic governance and the rule of law in Zimbabwe.

TREASURY

2011 Census

Mr. Paul Goodman: To ask the Chancellor of the Exchequer what his policy is in relation to recognising Kashmiris as an ethnic group in the 2011 census. [7039]

John Healey: The information requested falls within the responsibility of the National Statistician who has been asked to reply.

Letter from Len Cook to Mr. Paul Goodman, dated 27 June 2005:

As National Statistician, I have been asked to reply to your recent parliamentary question asking what the policy is in relation to recognising Kashmiris as an ethnic group in the 2011 census. (7039)

The ethnicity question will be reviewed as part of the general preparations made by the Office for National Statistics (ONS) for the 2011 census when the questions and classifications for all topics will be reviewed before the selection of the final question set. ONS are planning a substantial programme of question testing and consultation with users of census data for the next few years and it is not possible to confirm what questions are to be included in the 2011 census until this is complete.

ONS began a programme of consultation on topics to be included in its 2011 census with a paper issued on the ONS website on 16 May 2005, The 2011 census: initial view on content for England and Wales, which invites responses by 5 August 2005. During the planning for the consultation process we recognised this issue as one of serious importance. The criteria for including questions in the 2011 census are set out in the consultation paper, which can be found at:

http://www.statistics.gov.uk/about/consultations/2011census.asp

The consultation paper is the starting point for discussion with users about their data requirements for the 2011 census and is being supplemented by roadshows around the country during June and July. Following analysis of the written responses and comments made at the roadshows, a report will be published summarising the responses and setting out ONS' latest position.

Birth and Death Records (Digitisation)

Dr. Pugh: To ask the Chancellor of the Exchequer how much of the digitisation of the UK's birth and death records will be carried out abroad. [6609]

John Healey: The information requested falls within the responsibility of the Registrar General, who has been asked to reply.

Letter from Len Cook to Dr. John Pugh, dated 27 June 2005:

As Registrar General for England and Wales, I have been asked to reply to your recent Parliamentary Question asking how much of the digitisation of the UK's birth and death records will be carried out abroad. (6609)

There are three processes involved in the proposed digitisation of the UK's birth and death records.

The first process is to create digital images of the record from the existing microfilm or paper records. All image digitisation, whether microfilm or paper based will be done in the UK. No original registration records or paper quarterly copies will leave the UK.

The second process is to data capture key elements of the information on the image to create searchable index fields for each record. This second process will take place in India.

The third process involves the review of any individual records which are difficult to decipher and have failed the data capture process. At this stage all the records will be subjected to overall quality assurance, validation and acceptance testing. All of these processes will be carried out in a Centre of Excellence established at the General Register Office in Southport, Merseyside.

Computer Crime

Mr. Burstow: To ask the Chancellor of the Exchequer how many cases of computer *(a)* hacking, *(b)* fraud and *(c)* theft his Department recorded in each year since 2001–02; and for each year, on how many occasions computer systems have been illegally accessed by computer hackers (i) within and (ii) outside his Department. [7180]

John Healey: The Department has recorded the following incidents.

Incident	*2001–02*	*2002–03*	*2003–04*	*2004–05*	*2005–06 (to date)*
(a) Hacking	1	1	0	1	0
(b) Fraud	0	0	0	0	0
(c) Theft	2	24	10	4	1
(i) Illegal access from within	0	0	0	0	0
(ii) Illegal access from outside	1	1	0	1	0

Consultants

Mrs. Dean: To ask the Chancellor of the Exchequer what plans he has to issue guidance on effective commissioning for those in the public and voluntary sectors who are commissioning work from external consultants. [7033]

John Healey: The Office of Government Commerce offers best practice advice to the public sector through its web-based product, the Successful Delivery Toolkit (www.ogc.gok.uk/sdtoolkit/). This guidance is aimed at public sector organisations and complies with Government policy and regulations for procurement but is not specifically tailored to the voluntary sector. The guidance encompasses:

purchasing consultancy services, covering the tendering process;

use of professional advisors, including consultants;

where it may be appropriate to use consultants, for example, in construction or specification writing;

examples of specific guides that are relevant to the procurement and supply of consultancy services:

i. delivering world-class consultancy services to the public sector-A statement of best practice;

ii. the Government Procurement Code of Good Practice for Customer and Suppliers.

Contracts (Value Audits)

Mr. Sheerman: To ask the Chancellor of the Exchequer what monitoring his Department undertakes on the value for public money of contracts that are entered into by its agencies. [6432]

John Healey: The professional Procurement Team of HM Revenue and Customs responsible for Treasury procurement, advise, oversee and in many cases procure the goods and services required by the Debt Management Office.

OGCbuying.solutions negotiate framework agreements and managed services agreements with private sector suppliers for specific goods and services.

These agreements deliver procurement savings by, among other things, aggregating demand and standardising customer requirements to take advantages of economies of scale; establishing long-term and partnership relationships with suppliers that remove supply side risk of the unknown and the associated cost on of that risk and by providing the public sector with ease of access to a broad range of requirements, on a one-stop-shop basis.

Customs and Excise Fraud (Staff)

Gregory Barker: To ask the Chancellor of the Exchequer what representations he has received regarding concerns about fraud by staff working for HM Customs and Excise in the past 20 years. [6628]

Dawn Primarolo: Since October 2000, representations and allegations of fraud or impropriety against officers of HM Customs and Excise have been referred to the Internal Investigation Division (IID). The IID has responsibility for dealing with criminal and disciplinary investigations in partnership with other law enforcement staff and the police. Prior to October 2000 such matters were referred to either internal investigators, external investigators or senior Departmental managers.

Departmental Estate

Dr. Cable: To ask the Chancellor of the Exchequer if he will list *(a)* the office space in central London owned or rented on behalf of his Department, *(b)* the amount of space in each of the locations per full-time equivalent member of staff and *(c)* the occupancy rates of each; and if he will make a statement. [7131]

John Healey: HM Treasury occupies 1 Horse Guards road which has a net usable area of 22,215 square metres. This represents approximately 18 square metres per full-time equivalent member of staff. The building is permanently occupied during normal working hours.

Electrocution Fatalities

Mr. Gibb: To ask the Chancellor of the Exchequer how many people were killed by accidental electrocution in each year since 1994. [6574]

John Healey: The information requested falls within the responsibility of the National Statistician who has been asked to reply.

Letter from Len Cook to Mr. Nick Gibb, dated 27 June 2005:

As National Statistician, I have been asked to reply to your recent Parliamentary Question concerning how many people were killed by accidental electrocution in each year since 1994. (6574)

The most recently available information is for deaths in 2003. Figures for deaths due to accidents caused by exposure to electric current are shown in the table below for each year from 1994 to 2003.

Number of deaths from accidental exposure to electric current[1] in England and Wales, 1994 to 2003[2]

	Number of deaths
1994	37
1995	42
1996	36
1997	39
1998	37
1999	50
2000	41
2001	34
2002	24
2003	25

[1] Cause of death was defined using the International Classification of Diseases, Ninth Revision (ICD-9) code E925 for the years 1994 to 2000, and the International Classification of Diseases, Tenth Revision (ICD-10) codes W85-W87 from 2001 onwards.

[2] Figures are for deaths occurring in each calendar year.

HM Revenue and Customs

Lady Hermon: To ask the Chancellor of the Exchequer for what reason the fraud hotline to the Her Majesty's Revenue and Customs does not extend to Northern Ireland; and if he will make a statement. [7146]

Dawn Primarolo: The fraud hotline (0800 788 887) can be accessed throughout the United Kingdom, including Northern Ireland. I understand that calls are in fact received from Northern Ireland.

Mr. Gale: To ask the Chancellor of the Exchequer if he will request the resignation of the chairman of HM Revenue and Customs following the publication of the Adjudicator's Annual report. [7286]

Dawn Primarolo: No. As I said in my written statement of 26 May I have agreed with the chairman of HMRC six measures to improve the administration of tax credits. HMRC are now working to deliver these measures.

Hot Weather Fatalities

Steve Webb: To ask the Chancellor of the Exchequer how many excess deaths were ascribed to hot weather in each year since 1980, broken down by age. [6565]

John Healey: The information requested falls within the responsibility of the National Statistician who has been asked to reply.

Letter from Len Cook to Mr. Steve Webb, dated 27 June 2005:

As National Statistician, I have been asked to reply to your recent Parliamentary Question asking how many excess deaths were ascribed to hot weather in each year since 1980, broken down by age. (6565)

Death rates in England and Wales vary seasonally, being lower in summer than in the winter months. However, analyses of urban populations indicates that all-cause mortality rises during heatwaves. In most summers, temperatures do not get high enough to raise mortality from the usual seasonal low. The main exceptions in recent years were 1995 and 2003. The Office for National Statistics (ONS) has carried out special analysis into excess deaths during the 1995 and 2003 heatwaves. The analysis of the 1995 heatwave, published in the "Journal of Epidemiology and Community Health" in February 1998, found that there were an estimated 619 extra deaths in England and Wales between 30 July and 3 August compared to the expected number of deaths based on the 31-day moving average for that period. The analysis found that excess deaths were apparent in all age-groups. The analysis of the 2003 heatwave, published in "Health Statistics Quarterly 25" in February 2005, found that there were 2,091 excess deaths in England between 4 and 13 August compared to the average for the same period in the previous five years. The analysis found that the elderly (aged 75 and over) were most affected by the heatwave.

Indirect Tax Losses

Dr. Cable: To ask the Chancellor of the Exchequer what estimate he has made of the illicit market share for *(a)* cigarettes, *(b)* spirits and *(c)* oils in each of the last five years for which information is available; and if he will make a statement. [7102]

John Healey: Estimates of the illicit market share for the latest four years for which data are available for spirits, cigarettes and oils are given, respectively, in tables 3.3, 3.9 and 3.14 of the "Measuring and Tackling Indirect Tax Losses" document published by HM Customs and Excise alongside the pre-Budget report in December 2004. This is available from the House of Commons Library.

Earlier years estimates for cigarettes and oils can be found in chapter 4 of the "Measuring and Tackling Indirect Tax Losses" document published in December 2003. There are no comparable estimates for spirits prior to 1999–2000 due to improvements in data and methodology.

Methadone Deaths

Mr. Fabian Hamilton: To ask the Chancellor of the Exchequer how many deaths in the UK were wholly or partly attributed to methadone in the last 12 months for which figures are available. [6964]

John Healey: The information requested falls within the responsibility of the National Statistician who has been asked to reply.

Letter from Len Cook to Mr. Fabian Hamilton, dated 27 June 2005:

As National Statistician, I have been asked to reply to your recent Parliamentary Question asking how many deaths in the UK were wholly or partly attributed to methadone in the last 12 months for which figures are available. (6964).

Available figures relate to the number of deaths from drug-related poisoning where methadone was mentioned on the death certificate. The most recently available information for all the countries of the United Kingdom is for deaths in 2003. It is not possible to identify from death certificates which substance was the primary cause when more than one was involved. Figures related to the number of deaths where methadone was mentioned on the death certificate, either alone or with other substances, are shown in the table below.

Number of deaths from drug-related poisoning[1] where methadone was mentioned on the death certificate, United Kingdom, 2003[2]

	Number of deaths
Methadone:	
Mentioned alone[3]	83
Total mentions	264

[1] Cause of death was defined using the International Classification of Diseases, Tenth Revision (ICD-10) codes F11-F16, F18-F19, X40-X44, X60-X64, X85 and Y10-Y14.
[2] Data are for deaths occurring in the calendar year for England and Wales, and for deaths registered in the calendar year for Scotland and Northern Ireland.
[3] Methadone is the only drug mentioned on the death certificate.

Public Conveniences

Mr. Burstow: To ask the Chancellor of the Exchequer how many public conveniences were recorded on the commercial and industry property database of the Valuation Office Agency in each London borough in each year since 2000. [7247]

Dawn Primarolo: The number of public conveniences shown in the rating list, for each London borough, for each year since 2000, is shown in the table.

Billing authority name	*April 2000*	*March 2001*	*March 2002*	*March 2003*	*March 2004*	*March 2005*	*April 2005*

Public Procurement Directive

Malcolm Bruce: To ask the Chancellor of the Exchequer pursuant to the answer of 9 June 2005, *Official Report*, columns 683–84W, on the public procurement Directive, what the Government's definition is of a competent authority; and which authorities have been identified as suitable for collating information on convictions in relation to this directive. [6427]

John Healey: The EU public procurement Directive (2004/18/EC) does not provide a definition of competent authority in relation to Article 45. It is left for member states to designate the authorities competent to carry out the role of providing information on the personal situation of the candidates or tenderers concerned. The Office of Government Commerce is in discussion with the Criminal Records Bureau (CRB) on this aspect of Article 45.

Malcolm Bruce: To ask the Chancellor of the Exchequer pursuant to the answer of 9 June 2005, *Official Report*, columns 683–84W, on the Public Procurement Directive, if he will list those who responded to the consultation; and if he will place in the Library a copy of the responses which referred to Article 45 of EU Procurement Directive 2004/18/EC. [6428]

John Healey: The Office of Government Commerce (OGC) received 255 responses from a wide range of organisations following the 2004 consultation exercise on the new Public Procurement Directive (2004/18/EC). These included Government Departments, local authorities, law firms, suppliers, trade unions and other interested parties. A summary of these responses is available on the OGC website: http://www.ogc.gov.uk/index.asp?docid=1002407, and the list of respondents, excluding those who requested confidentiality, is included in alphabetical order as follows:

Allen and Overy
Association of British Healthcare Industries
(Employee of) Bristol City Council
British Telecom
Cap Gemini
Commission for Racial Equality
Criminal Justice Information Technology
Construction Employers Federation
Construction Federation
Customs and Excise
Defence Procurement Agency
(Employee of) Denton Wilde Sapte
Department for Constitutional Affairs
Department for International Development
Department for Trade and Industry
Department for Transport
Department for Works and Pensions
Disability Rights Commission
Equal Opportunities Commission
Ex Remploy Director
Furniture Industry Strategy Group
GMP
HM Treasury
Home Office
IDeA
Inland Revenue
Isle of Wight Sheltered Workshop
ISTC—the Community Union
Loughborough University
Millstream Associates Ltd
Nabarro Nathanson
National Association of Supported Employment
National Audit Office
National Housing Federation
NHS PASA
Northern Ireland
ODPM
OGC
OGC Buying Solutions
Peacocks Medical Group
Remploy
Royal Institute of Chartered Surveyors
Royal National Institute for the Blind
Small Business Service
Solicitors in Local Government
Treasury Solicitors
TUC
Ulster Supported Employment Ltd
Unison
Warwickshire City Council
Wates
Welsh Purchasing Consortium

As part of this consultation, OGC asked recipients to consider several key areas. These included Article 45, which concerns the mandatory exclusion of suppliers convicted of certain offences from public contracts. Copies of the consultation responses that specifically mentioned Article 45 have been placed in the Library. Copies of all other responses will be placed in the Library shortly.

In some cases there was more than one response from organisations. In particular, there were many responses from Remploy and its employees.

Malcolm Bruce: To ask the Chancellor of the Exchequer if he will place in the Library a copy of the record of discussions and correspondence between the Office of Government Commerce and the Criminal Records Bureau about implementation of Article 45 of the EU Procurement Directive 2004/18/EC. [6450]

John Healey: The Office of Government Commerce (OGC) is considering with the Criminal Records Bureau (CRB) how best to implement Article 45, a I said in my written answer to the hon. Gentleman on 9 June 2005, *Official Report*, columns 682–83WA. It would not be appropriate to make available the record of discussions and correspondence between OGC and CRB. Doing so would inhibit the formulation and development of Government policy, a process which is currently on-going.

Malcolm Bruce: To ask the Chancellor of the Exchequer whether the Office of Government Commerce has had further discussions with the private and public sectors about Article 45 of the new EU public procurement Directive 2004/18/EC since the consultation exercise was undertaken in 2004. [6469]

John Healey: Since the 2004 consultation exercise, the implementation of the new EU public procurement Directive has been, and will continue to be, discussed in numerous seminars, conferences and meetings involving the Office of Government Commerce (OGC). These occasions are normally requested and arranged by other interested parties, including other Government departments, the devolved Administrations, local authorities and the wider public sector, the legal community, suppliers and NGOs, and are separate from OGC's formal consultation process. Article 45 often features in such discussions, along with all other main provisions of the new Directive. On 20 June 2005 OGC began a further 12-week consultation on the draft Regulations implementing the Directive, including Article 45. OGC is in discussion with the Criminal Records Bureau on the practical implementation of this Article.

Regional Gross Domestic Product

David Maclean: To ask the Chancellor of the Exchequer (1) if he will make a statement on Office for National Statistics regional gross domestic product statistics; and what the differences are between the methods used by the Office for National Statistics to calculate regional gross domestic product statistics and the methods used in other European Union countries; [6116]

(2) what assessment he has made of the effect of the differences between the methods used by the Office for National Statistics to calculate regional gross domestic product statistics and the methods used in other European Union countries on the allocation of European regional aid funds to disadvantaged areas of the United Kingdom. [6126]

John Healey: The information requested falls within the responsibility of the National Statistician, who has been asked to reply.

Letter from Len Cook to Mr. David Maclean, dated 27 June 2005:

As National Statistician, I have been asked to reply to your recent Parliamentary Questions about Office for National Statistics (ONS) regional gross domestic product statistics and the differences between the methods used by ONS to produce these and the methods used in other European Union countries. (6116 & 6126)

ONS published gross value added (GVA) NUTS 1 to 2003, and NUTS 2 and 3 to 2002, in December 2004. A guide to ONS methods for calculating regional GDP is available on the ONS website at: http://www.statistics.gov.uk/articles/economic_trends/UK_Regional_GDP_methodological_guide.pdf.

Additional resources and a move into National Accounts Group have contributed to significant improvement to the quality assurance processes of regional economic statistics since the withdrawal of estimates in December 2002. Emphasis is on ensuring the quality of data inputs and there is a no risk strategy in place to generate confidence in regional economic statistics outputs.

ONS have not carried out a comparison between methodologies used to calculate regional gross domestic product statistics in European Countries. As a result, an assessment on the allocation of European regional aid funds to disadvantaged areas in the United Kingdom has not been produced.

David Maclean: To ask the Chancellor of the Exchequer what steps he is taking to ensure that the treatment of *(a)* extra-regio gross domestic product and *(b)* financial and investment services in Eurostat statistics for regional gross domestic product do not disadvantage UK regions with regard to the allocation of European regional aid funds. [6125]

John Healey: The information requested falls within the responsibility of the National Statistician who has been asked to reply.

Letter from Len Cook to Mr. David Maclean, dated 27 June 2005:

As National Statistician I have been asked to reply to your recent Parliamentary Question on what steps are being taken to ensure that the treatment of *(a)* extra-regio gross domestic product and *(b)* financial and investment services in Eurostat statistics do not disadvantage UK regions with regard to the allocation of European regional aid funds. (6125)

My responsibility is to ensure that proper statistical processes are followed, and that the statistics are the best that can be devised. To this end I have written to the Director General of Eurostat (Mr Hanreich) twice this year to express my concern at the approach adopted in the calculation of Regional GDP per capita. I have questioned the treatment of both Extra-Regio and FISIM (Financial Intermediation Services Indirectly Measured).

I last wrote to Mr Hanreich on 3 June and have yet to receive a reply.

Scottish Currency

Mr. McGovern: To ask the Chancellor of the Exchequer what guidance he provides to businesses in England on the legality of Scottish currency. [7257]

Mr. Ivan Lewis: The Treasury provides no guidance to businesses in England about the legality of Scottish banknotes.

Strychnine Hydrochloride

David Maclean: To ask the Chancellor of the Exchequer whether it will be possible to import strychnine hydrochloride into the UK for use in the destruction of moles after 1 September 2006. [6275]

Jim Knight: I have to been asked to reply.

For strychnine hydrochloride to be used in the UK to control moles it first requires a specific authorisation for that purpose under either the Plant Protection Products Directive (91/414/EEC) or the Biocidal Products Directive (98/8/EC). The requirement for a specific authorisation for use applies irrespective of the origin of the strychnine hydrochloride.

Sustainability

Norman Baker: To ask the Chancellor of the Exchequer for what reasons his Department is seeking to change the accepted definition of sustainability to stress the economic arm above the environmental dimension. [7302]

John Healey: The Treasury is not seeking to change the accepted definition of sustainable development.

The June European Council reiterated its attachment to sustainable development as a key principle governing all the Union's policies and activities. Within this context, and as agreed at spring European Council, it is vital that the Lisbon strategy be relaunched without delay and with priorities refocused on growth and employment.

Tax Credits

Mr. Winnick: To ask the Chancellor of the Exchequer pursuant to the oral statement by the Paymaster General of 22 June 2005, *Official Report*, columns 801–14, on tax credit overpayments; (1) if he will take steps to improve the operation of the tax credit offices; [7413]

(2) if he will *(a)* undertake an investigation into the workings of the tax credits offices and *(b)* appoint an official with overall responsibility for tax credits; and if he will make a statement. [7414]

Dawn Primarolo: I refer the hon. Member to the written statement I made to the House on 26 May 2005, *Official Report*, columns 22–23WS and the oral statement I made to the House on 22 June 2005, *Official Report*, columns 801–14.

Mrs. Maria Miller: To ask the Chancellor of the Exchequer how many people have been in receipt of an incorrect level of tax credit in Basingstoke; how many of these could not reasonably have been expected to know that a mistake had been made; and if he will make a statement. [7325]

Dawn Primarolo: The number of tax credit awards for families living in Basingstoke that have been affected by official error are not available.

Underage Pregnancy and Abortion

Mr. Hancock: To ask Mr Chancellor of the Exchequer how many girls in Portsmouth aged under 17 years *(a)* gave birth and *(b)* had abortions, in each of the last five years, broken down by age group. [6332]

John Healey: The information requested falls within the responsibility of the National Statistician, who has been asked to reply.

Letter from Len Cook to Mr. Mike Hancock, dated 27 June 2005:

As National Statistician I have been asked to reply to your recent Parliamentary asking how many girls in Portsmouth aged under 17 years *(a)* gave birth and *(b)* had abortions in each of the last five years. (6332)

The maternity data given in the Table 1, attached below, for each of the years between 1999 and 2004 are for girls who gave birth aged under 17, and who were resident in Portsmouth Unitary Authority at the time of the event. Abortions figures are only available for the larger Health Authority area for 1999–2001 prevailing at the time and only for under 18 for Portsmouth UA in 2002. These figures, along with their equivalents for maternities are shown in Table 2.

Due to the possibility of individuals being identified, a further breakdown by age cannot be provided.

Table 1: Maternities for under 17 year olds, Portsmouth unitary authority 1999–2004

	Number of maternities
1999	22
2000	11
2001	15
2002	25
2003	13
2004	19

DEPUTY PRIME MINISTER

Affordable Housing

Dr. Desmond Turner: To ask the Deputy Prime Minister how many affordable housing units built or procured through *(a)* the Housing Corporation Approved Development Programme and *(b)* the Challenge Fund were (i) mixed funded social rented housing, (ii) temporary social rented housing, (iii) Homebuy general market purchase, (iv) Homebuy general new build, (v) mixed funded low cost home ownership for sale, (vi) miscellaneous works to RSL stock, (vii) reimprovements to rented RSL stock, (viii) works only rehabilitation of rented RSL stock, (ix) works only rehabilitation of RSL stock for sale, (x) intermediate rent for key workers, (xi) Homebuy market purchase for key workers, (xii) Homebuy new build for key workers, (xiii) mixed funded sale for key workers and (xiv) starter home initiative in the South East Region in each year since 1997–98; and how much was spent on each category in each year. [5384]

Yvette Cooper: The following tables show the number of homes built or acquired and funding provided through the Housing Corporation's Approved Development Programme (ADP), Challenge Fund and the Starter Home Initiative in the South East region for the categories (i) to (xiv) for each year since 1997–98.

Funding and completions are not directly comparable, as funding will relate to projects running, not necessarily units completed, in any one year.

Numbers of homes built or acquired in the South East region

		1997–98	1998–99	1999–2000	2000–01	2001–02	2002–03	2003–04	2004–05
ADP									
(i)	Mixed funded rent	3,540	3,231	2,304	2,145	2,450	2,488	2,236	1,942
(ii)	Temporary social housing	259	268	162	106	130	46	46	44
(iii)	Homebuy Market Purchase	—	—	133	187	314	356	396	222
(iv)	Homebuy New Build	—	—	—	—	—	—	—	9
(v)	Mixed funded sale	359	578	202	430	305	467	647	807
(vi)	Miscellaneous works	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a
(vii)	Re-improvements rent	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a
(viii)	Works Only rehabilitation	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a
(ix)	Re-improvements sale	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a
(x)	Intermediate rent for key workers	n/a	n/a	n/a	n/a	n/a	n/a	n/a	871
(xi)	Homebuy Market Purchase for key workers	n/a	n/a	n/a	n/a	n/a	n/a	n/a	1,319
(xii)	Homebuy New Build for key workers	n/a	n/a	n/a	n/a	n/a	n/a	n/a	17
(xiii)	Mixed funded sale for key workers	n/a	n/a	n/a	n/a	n/a	n/a	n/a	355
Challenge Fund									
(i)	Mixed funded rent	n/a	n/a	n/a	n/a	n/a	n/a	323	710
(iii)	Homebuy Market Purchase	n/a	n/a	n/a	n/a	n/a	n/a	29	111
(v)	Mixed funded sale	n/a	n/a	n/a	n/a	n/a	n/a	273	520
	Intermediate Rent	n/a	n/a	n/a	n/a	n/a	n/a	62	137
(xiv)	Starter Home Initiative	n/a	n/a	n/a	n/a	68	893	2,368	188

Miscellaneous works, re-improvements to rented RSL stock, works only rehabilitation of rented RSL stock and works only rehabilitation of RSL stock for sale are not recorded as completed dwellings as they may have previously received funding and would therefore be double counted.

The information in the table does not include all programmes that the ADP is used for and therefore does not represent the total funding for the South East region. Other categories with funding during the period covered by the table are Right to Acquire, Voluntary Purchase Grant, Do-It-Yourself Shared Ownership, and Temporary Intermediate and Market Rent Housing.

Expenditure in the South East region through ADP, Challenge Fund and Starter Home Initiative for the listed categories

£ million

		1997–98	1998–99	1999–2000	2000–01	2001–02	2002–03	2003–04	2004–05

Source:
Housing Corporation

Mr. Steen: To ask the Deputy Prime Minister (1) how much the Government plan to allocate for the provision of affordable housing in Devon in each of the next three years; [7677]

(2) how much of the Housing Corporation's affordable housing programme he expects to be allocated to provide affordable housing in the *(a)* South Hams, *(b)* Torbay and *(c)* Teignbridge districts in the next three years. [7681]

Yvette Cooper: The allocations made for provision of affordable housing in Devon in 2004–05 and 2005–06 total £46.0 million; £3.1 million, £6.8 million and £3.0 million of this is for housing in South Hams, Torbay and Teignbridge, respectively.

Decisions on the overall level of funding for affordable housing in the South West region in 2006–07 and 2007–08 will be taken over the summer in the light of advice from the South West Regional Housing Body. The allocation of these funds across the region, which will be announced early next year, will reflect advice from the board and the quality and the value for money of bids to the Housing Corporation.

Barker Report

Lynne Jones: To ask the Deputy Prime Minister when he will publish the results of the consultation on the Barker Report. [5921]

Yvette Cooper: To date the Office of the Deputy Prime Minister has consulted on one aspect of the Barker report—her recommendation that Regional Housing Boards and Regional Planning Bodies be merged, and that those merged bodies be supported by strong, independent advice.

We have already announced the establishment of an independent advice unit and that merger will go ahead. We are however still considering a number of points of detail in relation to both issues and will be making further announcements soon.

Council Tax

Jim Cousins: To ask the Deputy Prime Minister what changes are proposed for the student exemption from council tax; and under what circumstances key worker accommodation *(a)* leased by universities and *(b)* rented by students and others will be exempt from council tax. [6314]

Mr. Woolas: No changes are proposed to the student exemption from council tax. Dwellings which are occupied entirely by students are exempt from council tax. Students sharing with non-students are disregarded for the purposes of calculating the household's bill. Halls of residence, as defined in the Council Tax (Exempt Dwellings) Order (SI 1992/558), are exempt from council tax provided the accommodation is provided predominantly for students.

Departmental Relocation

Mr. Gale: To ask the Deputy Prime Minister how many of his Office's posts *(a)* have been relocated and *(b)* are under consideration for relocation from London to the deprived areas of the South East. [6252]

Jim Fitzpatrick: The Office of the Deputy Prime Minister, Non-Departmental Public Bodies and Agencies are implementing the Lyons Review recommendations to relocate posts out of London headquarters by 2010. The target of relocating 240 posts was agreed in SR04.

103 posts have already been relocated to the areas set out as follows:

Location	*Number of Posts Moved*
GO North East	4
GO North West	18
GO Yorkshire and Humberside	8
GO West Midlands	5
GO East Midlands	18
GO East	18
GO South East	4
GO South West	7
GO London	8
Hastings	2
Hemel Hempstead	4
Glossop	7
Total number of posts moved	103

With this progress so far, we are confident that we can meet the target of 240 by 2010. This will not exclude consideration of relocating some posts to relatively deprived areas in the South East.

Disabled Facilities Grants

John Mann: To ask the Deputy Prime Minister (1) what plans the Government have to reform the Disabled Facilities Grant for *(a)* disabled children and *(b)* disabled adults; [4840]

(2) when he plans to publish the conclusions of the review of the Disabled Facilities Grant; what research has been commissioned as part of the review; and whether the research will be made public. [4841]

Yvette Cooper: The Disabled Facilities Grant (DFG) is currently the subject of a wide ranging interdepartmental review. As part of this, a team from Bristol University are looking at the operation of the DFG system including the means test. Any proposals for change, as well as research and evidence will be published in due course.

Fire Emergency Calls

Lynne Featherstone: To ask the Deputy Prime Minister how many *(a)* genuine and *(b)* malicious false alarm fire emergency calls have been received in (i) inner and (ii) Greater London in each year since 1999. [6362]

Jim Fitzpatrick: Information provided by the London Fire and Emergency Planning Authority (LFEPA) showing the number of false fire alarms attended by the London Fire Brigade since 1999 is set out in the following table. Genuine false alarms are those generated by automatic equipment and by people believing that there was a fire (good intent).

Types of fire false alarm attended by London Fire Brigade

	1999–2000			2000–01		
Borough	*Automatic fire alarm*	*Good intent*	*Malicious*	*Automatic fire alarm*	*Good intent*	*Malicious*

Fire Service

Sarah Teather: To ask the Deputy Prime Minister what proportion of Fire and Rescue Service staff have received training on using incident response units at the Fire Service College. [2440]

Jim Fitzpatrick: During 2004 approximately 320 fire and rescue service personnel were trained at the Fire Service College on Incident Response Units (IRUs). This enabled cascade training to be undertaken in individual fire and rescue authorities so that now, approximately every firefighter (50,000) has received basic training on mass decontamination and the IRUs.

In 2005, the Fire Service College is providing 180 fire and rescue service personnel with mass decontamination instructor training covering use of the IRUs. To date, 120 personnel have attended the course.

Home Information Packs

Mr. Love: To ask the Deputy Prime Minister (1) if he will publish the regulatory impact assessment on his proposed HIP energy reports; [6303]

(2) whether the regulatory impact assessment on the proposed home information pack energy reports followed guidelines on *(a)* air quality and *(b)* emissions of air pollutants; and if he will make a statement. [5252]

Yvette Cooper: The energy report in the home information pack will implement, for marketed sales, a requirement of the EU directive 2002/91/EC (Energy Performance of Buildings) which was negotiated by Government in 2001–02. An initial RIA on the directive was carried out and the assessment concluded that as well as improving awareness of energy efficiency the directive would help reduce carbon emissions. A separate RIA on the energy report has not been carried out. A full RIA for the directive will be produced before regulations for its implementation are laid in Parliament.

Honours

Mr. Pope: To ask the Deputy Prime Minister how many officials currently in the Department received honours in the recent Queen's Birthday Honours List; and at what rank of honour. [5121]

Jim Fitzpatrick: I refer my hon. friend to the answer given by the Chancellor of the Duchy of Lancaster on 22 June 2005, *Official Report*, column 1059W.

House Prices

Mrs. Spelman: To ask the Deputy Prime Minister what estimate the *(a)* Government and *(b)* Valuation Office Agency has made of the yearly change to average (i) house prices and (ii) capital values of residential property from material improvements to residential properties in each of the last five years. [5574]

Yvette Cooper: The Office of the Deputy Prime Minister's monthly house price index shows that house prices for the United Kingdom as a whole rose by 6.9 per cent. in the year to April 2005. This information is published on our website on a monthly basis. The latest monthly index was published 13 June at: http://www.odpm.gov.uk/pns/displaypn.cgi?pn_id=2005_0109.

The ODPM does not make estimates of the yearly change to average capital values of residential property from material improvements.

The Valuation Office Agency publishes a Property Market Report. Their latest report is available on their website at: http://www. voa.gov. uk/publications/property_market_report/pmr-jan-2005/index.htm.

The Valuation Office Agency has not made an estimate of the yearly change to average capital values of residential property from material improvements.

House Sales Chains

Mr. Hancock: To ask the Deputy Prime Minister if he will bring forward a framework for legal redress to purchasers in house sales chains who suffer losses due to individuals who withdraw their pledge to sell at a late stage. [5891]

Bridget Prentice: I have been asked to reply.

Although an agreement to sell a house in England and Wales is usually made "subject to contract" and is unenforceable until contracts are exchanged, the parties may, at the outset, enter into an enforceable contract for the payment of compensation if one of them pulls out.

In its review of the home buying and selling process in 1998, the Government concluded that it would not be appropriate to make such compensation agreements compulsory, given the wide variety of circumstances that could cause a sale to fail and the difficulty of apportioning blame.

The Government have, instead, enacted legislation that is expected, when fully implemented, to help reduce the incidence of failed transactions and to make the process more transparent.

The provision, by sellers, of home information packs should ensure that offers are made on an informed basis and buyers are not taken unawares by problems with the property at a late stage in the transaction. This should reduce the length of the period between agreeing terms and exchange of contracts, when most of the problems occur. The Government intend to introduce compulsory Home Information Packs from 2007.

The introduction of electronic conveyancing, also from 2007, will include a "chain matrix" revealing the stage reached by each transaction to all the other participants in the chain. This information should enable those involved in the chain to make realistic assessments of the situation and to resolve delays more quickly.

Housing

Bob Spink: To ask the Deputy Prime Minister what estimate he has made of the house-building required on Canvey Island to meet his longer term building targets. [6891]

Yvette Cooper: There is no such estimate for Canvey Island, which is within Castle Point district. The draft East of England Regional Spatial Strategy (RSS), which was produced by the East of England regional assembly rather than the Government, proposes 4,000 extra homes in this district as a whole between 2001 and 2021. The soundness of the assembly's proposals will be tested at an "Examination in Public" starting this autumn. The final version of the strategy, including housing figures, will take account of the recommendations of the independent panel which will hold the examination.

Jeremy Wright: To ask the Deputy Prime Minister what proportion of brownfield development in Kenilworth is development of land previously used for dwellings or their gardens. [6927]

Yvette Cooper: The information available is for the area of Warwick district council. From land use change statistics, over the period 1997 to 2003 an average of two hectares a year have been developed on land previously used for dwellings or gardens, representing 10 per cent. of all development on previously-developed land.

Tony Baldry: To ask the Deputy Prime Minister how many first-time buyers in Oxfordshire he expects to benefit from the First Time Buyers Initiative. [5802]

Yvette Cooper: It is too early to say how many first time buyers in Oxfordshire will be helped through the First Time Buyers Initiative. Our target for the initiative is to provide 15,000 affordable homes across England over the next five years to 2010. This target can be found in our Five Year Strategy, "Sustainable Communities: Homes for All", published by us in January 2005 (a copy of which is available in the Library of the House). English Partnerships is now developing a delivery plan for the First Time Buyers Initiative.

Our consultation document "HomeBuy: Expanding the opportunity to own" launched in April 2005 set out various proposals for simplifying, making fairer and expanding our low cost home ownership programme. The consultation process closes on 24 June, and the

results will be fed into English Partnerships' delivery plan. English Partnerships will be working closely with stakeholders such as the Regional Housing Boards, local planning authorities and others to assess local demands and accommodate them where possible taking account of regional strategies and development plans. Regional Housing Boards will advise on groups to be given priority, reflecting the needs of the region.

Tony Baldry: To ask the Deputy Prime Minister how many key workers in Oxfordshire he expects to benefit from *(a)* Social Home Buy, *(b)* New Build Home Buy and *(c)* Open Market Home Buy. [5803]

Yvette Cooper: It is not currently possible to estimate how many key workers in Oxfordshire will benefit from the Government's proposals for low cost home ownership. The Office of the Deputy Prime Minister is currently consulting on proposals and will then need to take decisions based both on the representations we receive and in the light of Regional Housing Board recommendations as to how and where of the South East Region allocation of £805.161 million funding for housing for the two year 2006–08 should be invested.

Tony Baldry: To ask the Deputy Prime Minister how much public sector land the Government has released for housing in Oxfordshire in the last five years; and how much further such land he plans to release. [5804]

Yvette Cooper: It is the responsibility of local planning authorities to identify and release land for housing as part of the planning process.

The Government have implemented a number of initiatives to assist with land supply in support of the Sustainable Communities Plan.

A register of surplus public sector land held by central Government bodies has been established. English Partnerships is currently reviewing the sites on the register to identify those which could have the potential for housing development. As at March 2005 there were 713 sites on the register. Sites are continually being added as they are identified as surplus by landowners and removed once expressions of interests are received after a site has been marketed. A list of the sites on the register, as at March 2005, can be found on the English Partnerships website at: http://www.englishpartnerships.co.uk/images/16EE954C904340DDAB44702EF5D2ADE6.pdf.

English Partnerships will publish a quarterly update of sites on the register.

English Partnerships has also recently taken ownership of the first 67 sites from a portfolio of 96 surplus NHS sites. The sites are currently being assessed for their development potential and will then be taken forward in consultation with the relevant local planning authorities. English Partnerships and the Defence Estates have also signed a joint working agreement on surplus land. This sets out how the agencies will work together with the objective of maximising the potential of surplus defence sites to help deliver the "Sustainable Communities Plan".

The Office of the Deputy Prime Minister and English Partnerships also maintain the National Land Use Database of Previously-Developed Land (NLUD-PDL). This covers vacant and derelict land and also land in use with potential for development. It covers land in both public and private ownership. Information on the sites is available from the NLUD website www.nlud.org.uk.

In addition English Partnerships is developing the National Brownfield Strategy which will provide a coherent vision for the future development of brownfield land to underpin national, regional and local development aspirations. The strategy will help our targets for building new homes on brownfield land.

Tony Baldry: To ask the Deputy Prime Minister how many key workers in Oxfordshire have benefited from the Starter Home Initiative, broken down by district council area. [5805]

Yvette Cooper: 327 key workers in Oxfordshire were helped to purchase homes under the Starter Home Initiative. The following table breaks down the figure by district council and by key worker group.

	Number of key workers assisted			
Local authority	*Nurses/ health workers*	*Teachers*	*Police*	*Others*
Cherwell	6	11	14	6
Oxford	102	43	27	9
South Oxfordshire	15	46	14	4
Vale of White Horse	1	10	5	0
West Oxfordshire	4	7	3	0
Total	128	117	63	19

Note:
Other key workers helped under the Starter Home Initiative included social workers, fire fighters, occupational therapists, prison and probation service staff.

Tony Baldry: To ask the Deputy Prime Minister (1) how much of the Housing Corporation's affordable housing programme he expects to be committed to help provide affordable housing in the Cherwell district over the next three years; [5806]

(2) how much the Government intends to commit to the provision of affordable housing in Oxfordshire in each of the next three years. [5810]

Yvette Cooper: The allocations made for provision of affordable housing in Oxfordshire in 2004–05 and 2005–06 total £49.1 million; £6.3 million of this is for housing in Cherwell.

Decisions on the overall level of funding for affordable housing in the South East region in 2006–07 and 2007–08 will be taken over the summer in the light of advice from the South East Regional Housing Board. The allocation of these funds across the region, which will be announced early next year, will reflect advice from the Board and the quality and the value for money of bids to the Housing Corporation.

Tony Baldry: To ask the Deputy Prime Minister (1) how much the Housing Corporation committed towards the provision of affordable housing for each district area in Oxfordshire in each of the last five years; [5807]

(2) how much Social Housing Grant has been committed in Oxfordshire in each of the last five years; and what proportion of that money was in support of section 106 schemes in each year. [5808]

Yvette Cooper: Expenditure on affordable housing in Oxfordshire provided through the Housing Corporation broken down by district, in the last five years, is detailed in the following table. The programmes included in the table are the Approved Development Programme (ADP), the Local Authority Social Housing Grant (LASHG) and Transitional LASHG, the Safer Communities Supported Housing Fund (SCSHF), and the Starter Home Initiative (SHI).

The amount supporting s106 is only available for 2004–05. The total proportion for Oxfordshire is 19.6 per cent.

Housing Corporation

Tony Baldry: To ask the Deputy Prime Minister what advice he has received from the Regional Housing Board on the amount of affordable housing needed in Oxfordshire *(a)* in 2005 and *(b)* over the next 10 years. [5809]

Yvette Cooper: The South East Regional Housing Board has not given any advice to my right hon. Friend the Deputy Prime Minister on the amount of affordable housing needed in Oxfordshire.

Tony Baldry: To ask the Deputy Prime Minister how many people in Oxfordshire he expects to benefit from the Key Worker Living Scheme. [5811]

Yvette Cooper: Allocations are not made by individual counties. The Berkshire, Oxfordshire and Buckinghamshire area has been allocated over £37 million in 2004–05 and 2005–06 to invest in the provision of key worker living homebuy equity loans to help an estimated 900 households into home ownership by March 2006. In addition funding has been allocated

to develop over 1,600 new homes to rent or buy through shared ownership in Berkshire, Oxfordshire and Buckinghamshire area by March 2007.

Tony Baldry: To ask the Deputy Prime Minister who the zone agent is for Oxfordshire in the Key Worker Living Scheme. [5812]

Yvette Cooper: Keystart Housing Association is the zone agent for the Buckinghamshire, Oxfordshire and Berkshire area supported by Sovereign Housing Association in Oxfordshire.

Mr. Denham: To ask the Deputy Prime Minister what assessment he has made of the impact of the key worker housing scheme in Hampshire. [5172]

Yvette Cooper: The Starter Home Initiative helped 870 key workers to buy their first home in Hampshire. Key Worker Living has so far helped a further 433 key workers from Hampshire. The Office of the Deputy Prime Minister has commissioned evaluations of both the Starter Home Initiative and the Key Worker Living programme to assess their impact. The final report on the Starter Home Initiative and the initial findings of the Key Worker Living evaluation will be published in due course.

Mr. Denham: To ask the Deputy Prime Minister if he will make it his policy to allow public service employers greater local discretion in determining who should benefit from the key worker housing scheme. [5173]

Yvette Cooper: Under the Key Worker Living programme, the responsible Government Department for the education, health, prison and probation sectors decide the eligibility criteria based on recruitment and retention evidence gathered at a local level. For the Police and Fire Services, it is the contributing force, not the Home Office or the Office of the Deputy Prime Minister (ODPM), which determines eligibility.

As part of the consultation on low cost home ownership "HomeBuy: Expanding the Opportunity to Own" we are proposing to allow Regional Housing Boards to define eligibility for our new First Time Buyer programme, which could include key workers not currently included in the definition of Key Worker Living to reflect local priorities. ODPM will shortly be reviewing those recommendations and will make a statement on future eligibility in due course.

Local Authorities

Mr. Hands: To ask the Deputy Prime Minister what Government policy is on local authorities providing an opportunity for councillors to ask questions of executive members at public meetings of the full council. [6775]

Mr. Woolas: The Local Government Act 2000 provides significant flexibility for local authorities to draw up their constitutions, in which they may include provision for councillors to ask questions of executive members at public meetings of the full council. It is for each local authority to decide whether, and how, they provide for this.

Local Government Finance

Mrs. Spelman: To ask the Deputy Prime Minister what the average change in total Government grant per capita for *(a)* district councils, *(b)* county councils, *(c)* metropolitan councils, *(d)* unitary councils, *(e)* London boroughs, *(f)* fire authorities and *(g)* police authorities was in England in each year since 1997. [1118]

Mr. Woolas *[pursuant to his reply, 6 June 2005, c. 405]:* I regret that incorrect information was provided. The correct information is set out in the table.

Percentage

	1998–99 to 1999–2000	*1999–2000 to 2000–01*	*2000–02 to 2001–02*	*2001–02 to 2002–03*	*2002–03 to 2003–04*	*2003–04 to 2004–05*
London (excluding GLA)	6.0	6.7	4.4	4.7	12.3	2.4
Metropolitan authorities	7.3	7.7	7.2	5.6	16.1	2.3
Unitary authorities	6.5	8.1	6.3	6.3	16.5	−0.3
Shire counties	6.2	8.7	7.1	4.8	13.0	2.8
Shire districts	1.8	3.1	4.5	5.1	10.7	−8.5
Fire authorities	3.6	2.3	3.0	2.4	4.5	20.8
Police authorities	2.3	4.5	6.0	2.4	7.3	2.3

The data used to calculate the changes are taken from data as reported by local authorities; they are outturn figures for 1998–99 to 2003–04 and budget estimates for 2004–05.

Changes between years may not be valid due to changing local authority responsibilities. For example, the decrease for fire authorities between 2003–04 and 2004–05 is due partly to the lower levels of grant per capita received by combined fire authorities compared with other fire authorities. Before 2004–05 grants were not paid directly to combined fire authorities and so these were not included in the figures for earlier years.

Local Government Pensions

Mr. McGovern: To ask the Deputy Prime Minister how many responses he received to the consultation on the revoking of the Local Government Pension Scheme (Amendment) (No. 2) Regulations 2004. [6931]

Mr. Woolas: In total 488 responses were received.

Mr. McGovern: To ask the Deputy Prime Minister when he expects to revoke the Local Government Pension Scheme (Amendment) (No. 2) Regulations 2004; and if he will make a statement. [6976]

Mr. Woolas: I refer my hon. Friend to the answer given to the hon. Member for Meriden (Mrs. Spelman) on 16 June 2005, *Official Report*, column 547W.

Mr. McGovern: To ask the Deputy Prime Minister what progress he has made in establishing a tripartite committee to discuss local government pensions; and if he will make a statement. [7258]

Mr. Woolas: I refer my hon. Friend to the answer given to my hon. Friend the Member for Stroud (Mr. Drew) on 14 June 2005, *Official Report*, columns 272–73W.

A further meeting of the committee is to be held shortly.

M25 Inquiry

Mr. Ian Taylor: To ask the Deputy Prime Minister when he will announce the outcome of the Motorway Service Areas Inquiry for the M25. [5987]

Yvette Cooper: Ministers are currently considering six proposals for motorway service areas at Great Hazes, Great Wood and Junction 8/9 on the M4, New Barn Farm on the M25, and Mount Hill Farm and Burtley Wood on the M40.

Many of these proposals have been subject to previous inquiries and decisions, and the case is therefore particularly complex. We will endeavour to issue a decision shortly.

Millennium Dome

Mr. Sheerman: To ask the Deputy Prime Minister how much of the parking area adjacent to the Millennium Dome remains in the ownership of the Government. [6433]

Jim Fitzpatrick: The car park adjacent to the Dome is owned by London Underground and is currently largely used by commuters. The former coach park is now the site of the Beckham Academy. Only the former "kiss and drop" car park (for setting down passengers), once used by the New Millennium Experience Company is owned by English Partnerships and this will form part of the Dome's initial car parking.

Property-based Loans

Tom Levitt: To ask the Deputy Prime Minister what contribution to the cost of participation in local government schemes and services came from equity release or other property-based loans to service users, in *(a)* absolute and *(b)* percentage terms, in the latest period for which figures are available; and what assessment he has made of how this proportion will change over the next 10 years. [6582]

Mr. Woolas: Under the Regulatory Reform (Housing Assistance) (England and Wales) Order 2002 local authorities have wide discretionary powers to provide assistance to homeowners and tenants to repair, improve and adapt their homes—including for example, equity release loans.

Since then there has been a slow switch from local authorities offering renovation grants to loans including equity release packages. The latest figures available show that authorities made available £1.2 million in loans for this purpose in 2003–04 (0.5 per cent. of total assistance given) and planned to increase this to £8.8 million in 2004–05 (2.7 per cent.). This compares with a total level of housing renewal assistance (grants and loans for home improvement) made available by local authorities of £256 million in 2003–04, increasing to a planned level of £325 million for 2004/05. Separate figures on the proportion of loans offered as equity release are not currently available.

Local authority's use of their new powers has been monitored through a research project sponsored jointly between the Office of the Deputy Prime Minister and the Joseph Rowntree Foundation and undertaken by the Centre of Urban and Regional Studies at the University of Birmingham. The final report of this study is expected to be published shortly. The preliminary conclusions of it are that the switch from grants to loans is proceeding at a relatively slow pace but that the majority of local authorities are now actively considering such a change.

Rented Housing

Jeremy Corbyn: To ask the Deputy Prime Minister what guidance he has issued to local authorities on the provision of rented housing to single people. [5750]

Yvette Cooper: I refer my hon. Friend to the answer given on 7 June 2005, *Official Report*, column 492W.

Jeremy Corbyn: To ask the Deputy Prime Minister what research he has commissioned on the effects of council house sales on the private rented sector; and if he will make a statement. [5755]

Yvette Cooper: Research commissioned by the Office of the Deputy Prime Minister (ODPM) into the exploitation of the Right to Buy scheme by companies revealed that around 2,000 properties sold under the Right to Buy in Inner London from 2000 onwards were by 2003 privately rented. A summary of the findings and the research report itself were published early in 2003, and are available from the ODPM website at: http://www.odpm.gov.uk/stellent/groups/odpm_housing/documents/page/odpm_house _609025.hcsp.

Section 187 of the Housing Act 2004 tackles exploitation by companies by providing that an agreement made by a tenant within a specified time to sell on to a company a property purchased under the Right to Buy scheme will require the tenant to repay some or all of the discount s/he received. This provision came into effect on 18 January 2005.

Roadside Advertising

Ben Chapman: To ask the Deputy Prime Minister what estimate he has made of the number of unauthorised roadside advertisements placed next to motorways. [5769]

Yvette Cooper: The Office of the Deputy Prime Minister has not made an estimate of the number of unauthorised roadside advertisements placed next to motorways.

Lynne Featherstone: To ask the Deputy Prime Minister if he will make a statement on Government policy on commercial advertising alongside *(a)* motorways and *(b)* major roads. [6359]

Yvette Cooper: Outdoor advertisements are controlled by local planning authorities under the Town and Country Planning (Control of Advertisements) Regulations 1992.

Most advertisements on land directly facing motorways and major roads require the express consent from the relevant local planning authority as well as prior permission from the landowner before they may be displayed lawfully. When considering whether an advertisement should be allowed to be displayed, the local planning authority must consider amenity and public safety aspects on a site-specific basis.

Local planning authorities have enforcement powers to deal with advertisements displayed unlawfully.

Safer Stronger Communities Fund

Mr. Dismore: To ask the Deputy Prime Minister how much money has been allocated to each London local authority from the Safer Stronger Communities fund. [4371]

Mr. Woolas: The Safer Stronger Communities Fund (SSCF) merges several existing ODPM and Home Office funding streams. Funding will be a minimum of £210 million in 2005–06, £220 million in 2006–07 and £230 million in 2007–08. The allocations to each London borough for 2005–6 are shown in the table.

£

Borough	*Total*	*Living spaces allocation 2003–04 (three year allocation)*
Barking and Dagenham	654,517.00	63,000.00
Barnet	496,711.00	123,905.00
Bexley	366,236.00	—
Brent	1,067,592.00	86,368.00
Bromley	452,760.00	—

Kingston upon Thames	258,113.00	20,000.00
Lambeth	1,386,905.00	215,473.00
Lewisham	1,100,655.12	74,330.00
Merton	334,262.00	—
Newham	1,842,313.00	—
Redbridge	444,113.00	16,000.00
Richmond upon Thames	322,436.00	35,000.00
Southwark	1,727,931.00	82,846.00
Sutton	315,427.00	—
Tower Hamlets	1,243,324.00	88,005.00
Waltham Forest	1,363,230.00	24,700.00
Wandsworth	1,054,832.00	48,770.00
Total	33,835,712.52	1,616,719.00

John Hemming: To ask the Deputy Prime Minister what the allocation from the Safer Stronger Communities Fund to each local authority in England is for financial year 2005–06, in terms of *(a)* total amount and *(b)* amount per capita, broken down by each element of the Fund. [4857]

Mr. Woolas: The information requested is not held centrally and could be provided only at disproportionate cost.

Smoke Alarms

Mr. Drew: To ask the Deputy Prime Minister how many and what percentage of *(a)* battery-operated and *(b)* hard-wired smoke alarms were found to be defective in dwelling fires in each of the last 10 years for which figures are available. [6345]

Jim Fitzpatrick: The information requested for each year since 1994 is contained in the following table.

Smoke alarm failures in dwelling fires by type of alarm, England, 1994–2003

	1994	*1995*	*1996*	*1997*	*1998*
Battery-powered					
Alarm present	6,234	6,064	7,238	7,754	8,108
Alarm failed	1,688	1,805	2,613	2,870	3,447
Failure rate (percentage)	27	30	36	37	43
Mains-powered					
Alarm present	4,831	5,457	7,115	7,994	9,330
Alarm failed	400	493	664	731	953
Failure rate (percentage)	8	9	9	9	10

	1999	*2000*	*2001*	*2002*	*2003*
Battery-powered					
Alarm present	9,156	9,596	10,189	9,395	10,057
Alarm failed	3,867	4,199	4,467	3,936	3,945
Failure rate (percentage)	42	44	44	42	39
Mains-powered					
Alarm present	10,832	11,597	11,370	10,929	11,896
Alarm failed	1,276	1,310	1,464	1,314	1,425
Failure rate (percentage)	12	11	13	12	12

Notes:
1. Data exclude estimates for incidents not recorded during periods of national industrial action in 2002 and 2003.
2. Mains-powered alarms include those powered by mains only or by battery and mains.

Fire and Rescue Service FDR1 returns to ODPM.

NORTHERN IRELAND

Adult Education

Sammy Wilson: To ask the Secretary of State for Northern Ireland what assessment he has made of the likely impact of the level of education budget on adult education provision. [5305]

Angela E. Smith: Under its current budget allocations, the Department for Employment and Learning continues to support a wide range of education and training provision that is accessible to adults and young people alike. This includes mainstream courses, as well as a proposed strategy for e-learning, a consultation document on which will be published in the autumn. In addition to a comprehensive programme of further education, adult

learners are eligible for skills training and work preparation programmes, including the pilot Training for Work initiative.

Ball-bearing Guns

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland how many prosecutions there were in the Province for the illegal use of ball-bearing guns in the last three years; and if he will make a statement. [5326]

Mr. Woodward: The information is not available in the form requested.

Information supplied by the PSNI shows the number of offences cleared from 2001 to 2005 where air guns, which include ball-bearing guns, were involved in the incident.

Offences cleared where an air gun was involved in the incident[1]

Clearance type	*2001–02*	*2002–03*	*2003–04*	*2004–05*
Charge/summons	4	5	15	13
Adult caution/informed warning	0	5	3	2
Juvenile restorative caution/ informed warning	4	4	3	12
Otherwise disposed of	14	8	14	34
Total offences cleared	22	22	35	61

[1] These figures relate to offences where an air gun was involved in the incident—how the air gun was actually used is not recorded.

Bovine TB

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland how many and what percentage of cattle in Northern Ireland are estimated to have bovine tuberculosis, broken down by constituency; and if he will make a statement. [6677]

Angela E. Smith: In 2004–05 financial year 13,154 cattle had a positive reaction to a bovine tuberculosis test compared to 15,593 in the previous year. This represents 0.78 per cent. of the cattle in Northern Ireland. Disease incidence is not available by constituency.

There is clear evidence of a decline in the incidence of TB which is expected to continue this year. This reflects the impact of all the measures which have been introduced to deal with TB and I greatly appreciate the support of the farming industry in the implementation of these measures.

Carers' Week

Lady Hermon: To ask the Secretary of State for Northern Ireland what steps his Department took to mark Carers' Week 2005. [7050]

Mr. Woodward: In addition to many other events that were held across Northern Ireland in support of Carers' Week 2005, the Department of Health, Social Services and Public Safety organised a Carers Convention for its own staff. The aim of the Convention was to highlight the contribution made by carers and the information and support available to them in undertaking their important role. The event was staged with the direct participation of some of the key voluntary and community organisations behind Carers' Week 2005.

Classroom Assistants

Lady Hermon: To ask the Secretary of State for Northern Ireland how many classroom assistants are working in schools in each Education and Library Board area in Northern Ireland; and what the equivalent figures were for each of the past five years. [5554]

Angela E. Smith: The available information in respect of the number of classroom/nursery assistants employed in each Education and Library Board area across the school sectors is detailed as follows:

Full/part time classroom and nursery assistants in controlled and maintained schools

	BELB		*NEELB*		*SEELB*		*SELB*		*WELB*	
	Full-time	*Part-time*	*Full-time*	*Part-time*	*Full-time*	*Part-time*	*Full-time*	*Part-time*	*Full-time*	*Part-time*
2000–01	276	154	211	669	233	864	69	1,023	302	588
2001–02	294	125	206	713	270	979	82	1,104	322	605
2002–03	306	175	142	684	287	1,085	71	1,243	337	702
2003–04	329	489	147	820	294	1,193	[1]70	1,566	324	697
2004–05	373	471	162	944	278	1,335	110	1,810	358	740

[1] Board estimate as full records for 2003–04 are not available.

Full/part-time classroom and nursery assistants in voluntary grammar schools

	BELB		*NEELB*		*SEELB*		*SELB*		*WELB*	
	Full-time	*Part-time*	*Full-time*	*Part-time*	*Full-time*	*Part-time*	*Full-time*	*Part-time*	*Full-time*	*Part-time*
2002–03	16	11	11	9	23	8	15	8	13	2
2003–04	18	13	12	11	25	8	17	10	18	2
2004–05	20	17	15	20	27	14	13	24	16	8

Full/part time classroom and nursery assistants in grant maintained integrated schools

	BELB		*NEELB*		*SEELB*		*SELB*		*WELB*	
	Full-time	*Part-time*	*Full-time*	*Part-time*	*Full-time*	*Part-time*	*Full-time*	*Part-time*	*Full-time*	*Part-time*
2002–03	13	16	15	22	25	26	33	20	28	21
2003–04	20	24	16	29	28	35	36	26	31	22
2004–05	31	16	23	32	38	52	32	34	40	34

The information prior to 2002–03 in respect of voluntary grammar schools and grant maintained schools is not readily available.

Co-ownership Homes

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland how many houses have been built under the co-ownership scheme in the Province in the last three years; what the uptake of co-ownership homes was in each year; and if he will make a statement. [6676]

Mr. Hanson: Northern Ireland Co-ownership Housing Association, which administers the co-ownership scheme in Northern Ireland, does not build houses.

The table below shows the uptake of the co-ownership scheme in the last 3 years.

	First time buyers assisted to buy homes
2002–03	801
2003–04	463
2004–05	502

Credit Card Fraud

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland what estimate he has made of the cost of credit card fraud involving identity fraud in each of the last five years; and if he will make a statement. [6573]

Mr. Woodward: The PSNI have provided the following figures. These are an estimate of criminal benefit obtained as a result of deception offences involving credit cards reported to the police. I am advised that this equates closely to credit card fraud involving identity fraud.

I am assured that the PSNI Cheque and Credit Card Unit is working closely with all relevant agencies and is involved in a number of different initiatives in an effort to combat credit card fraud. All reported instances of fraud are fully investigated and offenders made amenable to the courts.

	Number of investigations	*Criminal benefit (£)*
2002	626	1,279,286
2003	597	330,774
2004	551	281,512
2005 (to date)	362	413,489
Total		2,305,061

Notes:

1. Records are not available prior to 2002.
2. These figures are based on incidents reported to the police. The true figure could be significantly higher as much of this type of crime is not reported directly to the police, but rather financial institutions such as banks.

Dementia (Personal Care)

Lady Hermon: To ask the Secretary of State for Northern Ireland if he will introduce free personal and nursing care for those with dementia in Northern Ireland. [7125]

Mr. Woodward: I refer the hon. Lady to my answer of 20 June 2005, *Official Report*, column 859W.

Disability Discrimination Act

Lady Hermon: To ask the Secretary of State for Northern Ireland what recent assessment he has made of the compliance of public services in Northern Ireland with the Disability Discrimination Act 1995. [5518]

Angela E. Smith: While no assessment has been made of the compliance of public services in Northern Ireland with the Disability Discrimination Act 1995 (DDA), and nor is there any legislative requirement to do so, Government are fully committed to complying with all the requirements of the DDA. To this end, in relation to the access duties of the DDA, Accessibility Audits have been carried out on 168 of the 205 buildings within the Northern Ireland Civic Service Estate. Four buildings are still to be audited and the remaining 33 buildings do not require to be audited or to have adjustments made at this time because there is no public interface, no disabled member of staff or for operational reasons. All sites are kept under review and changes made if necessary.

Public service providers must ensure they are meeting their duties under the Act and the Equality Commission for Northern Ireland can provide detailed advice and information on meeting these requirements. In its publication "Code of Practice, Rights of Access—Goods, Facilities, Services and Premises" the Commission recommends, as good practice, that service providers themselves consider certain steps to ensure compliance with the DDA. These include regularly reviewing whether their services are accessible to disabled people and consulting disabled customers, disabled staff and disability organisations about the accessibility of their services.

Education Action Zones

Mr. Dodds: To ask the Secretary of State for Northern Ireland (1) when education action zones will be set up in Northern Ireland; and in which areas; [5434]

(2) what funding will be available in education action zones in Northern Ireland; and from which sources. [5435]

Angela E. Smith: Each education and library board has been invited to work up education action zone proposals. The Department anticipates that each board will have at least one zone operating in its area and that zones will begin to come on stream early in the 2005–06 school year.

Some £6 million is expected to be made available by the Department over the next three financial years for the implementation of the edueation action zone initiative across Northern Ireland. Education and Library Boards have also been encouraged to seek and secure inter-agency support both in kind and in funding.

EWAY Rapid Transport Scheme

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland if he will make a statement on progress on plans to introduce the EWAY Rapid Transport Scheme into Strangford and East Belfast. [6674]

Mr. Woodward: The pilot rapid transit scheme known as "EWAY" is included in the Belfast Metropolitan Transport Plan 2015, which was published in November 2004. This is a large, complex and expensive scheme and as with all such schemes, it is dependent on funding being available and is subject to a range of evaluation and statutory processes. Due to other higher priorities at present, it has not been possible to provide funding for EWAY in the Budget period to end 2008. The affordability of the scheme will however be kept under review in future budget rounds.

Exceptional Closure Days (Schools)

Lady Hermon: To ask the Secretary of State for Northern Ireland what criteria are used by Education and Library Boards in Northern Ireland when deciding whether to grant additional exceptional closure days for schools. [5553]

Angela E. Smith: The Department of Education determines the criteria for exceptional closure days in schools. The approval of such closures is only agreed in exceptional circumstances, where the closing of a school is outside the control of the school authority e.g. the death of a pupil at the school, flooding or burst pipes, electricity failure, terrorist incident etc.

Executive Programme Funds

Mr. Dodds: To ask the Secretary of State for Northern Ireland how much has been allocated under each of the Executive Programme Funds in each year since their creation; and on what projects and programmes. [5431]

Angela E. Smith: The amounts allocated from each of the Executive Programme Funds since their creation is shown in the following table. Details of the underlying projects funded through these allocations have been placed in the Library.

Executive Programme Fund allocations

Fund	*2001–02*	*2002–03*	*2003–04*	*2004–05*	*2005–06*	*Total*
Children's	2.9	6.3	17.2	6.0	5.9	38.3
Innovation/Modernisation	0.0	11.7	53.8	75.8	94.2	235.5
Infrastructure	9.1	29.0	41.2	0.0	0.0	79.3
New Directions	7.2	25.0	36.4	0.0	0.0	68.6
Service Modernisation	6.6	8.4	7.4	0.0	0.0	22.4
Social Inclusion/Community Regeneration	7.4	21.1	38.9	1.7	0.0	69.3
Total allocations	33.2	101.5	194.9	83.6	100.1	513.3

Free School Meals

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland how many school children in each Education and Library Board area receive free school meals. [5339]

Angela E. Smith: At October 2004, the number of pupils entitled to free school meals, and the uptake in each Education and Library Board was as follows:

	Entitlement	*Uptake*
BELB	16,257	12,960
NEELB	10,471	8,213
SEELB	9,331	6,771
SELB	14,264	11,732
WELB	15,873	13,894
Total	66,196	53,570

Note:
The details exclude pupils in special schools which are not available.

Education and Library Boards have been required this year to set targets for increasing the numbers of pupils who take up their entitlement to free school meals.

Free Travel

Lady Hermon: To ask the Secretary of State for Northern Ireland what plans he has to introduce free rail and bus travel for those with a disability in Northern Ireland; and what discussions he has had with Translink about this matter. [7389]

Mr. Woodward: Blind people and war pensioners already receive free travel and other groups of people with disabilities are entitled to half fare travel. The Department has no plans to extend the provision of free fares or has the issue been discussed with Translink.

Mr. Dodds: To ask the Secretary of State for Northern Ireland what plans he has to introduce free fares on public transport for everyone aged 60 years and over. [7629]

Mr. Woodward: The Department has no plans to extend the terms of the Northern Ireland Concessionary Fares Scheme to include free travel on public transport for those aged 60 to 64. Those aged 65 and over already receive free travel.

Hospital Services Access

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland whether British passport holders who are not registered with a general practitioner are able to access services at hospitals in the Province. [5342]

Mr. Woodward: A person's ability to access hospital services in Northern Ireland is not dependent upon their being registered with a general practitioner or being a British passport holder. Those persons deemed "ordinarily resident" and visitors from European Economic Area or from a number of countries with reciprocal health care agreements can receive those services free at the point of delivery. Possession of a British passport does not automatically confer "ordinarily resident" status, for example, in cases where a former UK resident has been working outside of the country for more than five years.

Internet

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland what percentage of households in the Province he estimates have had access to the internet in each of the last 10 years. [5354]

Angela E. Smith: As part of its ongoing digital inclusion activities, the Office of the First Minister and Deputy First Minister has commissioned surveys from the Northern Ireland Statistics and Research Agency on an annual basis since 2002 in order to determine access and usage of information computer technology (ICT), including internet, by members of the public.

While the survey does not specify the number of actual households with internet access, the figures do indicate the percentage of the population aged 16 or over in Northern Ireland with access to an internet-enabled personal computer. These figures, which are available from 2002 only, have shown an increase in access year-on-year, and are as follows:

	Percentage of population aged 16 + with access to internet PC
2002	47
2003	55
2004	58
2005	60

In addition, there are currently an estimated 150,000 broadband accounts in Northern Ireland. Broadband availability is presently at 98.5 per cent., up from 60 per cent. in March 2004.

As a result of the Broadband Services Contract awarded to BT by the Department of Enterprise Trade and Investment there will be 100 per cent. broadband availability for all households and businesses in Northern Ireland by the end of December 2005.

The Northern Ireland eGovernment Unit continues to encourage public access to and uptake of ICT through participation in a Digital Inclusion Steering Group and through a range of developmental projects such as the home computer initiative, Citizen eMail and a digital mapping facility, which will provide a resource identifying public internet access points across Northern Ireland. In addition, and in collaboration with, Ofcom, the BBC, EGSA and representative companies from the private sector the Northern Ireland eGovernment Unit is working on a project to put an internet literacy CD into every household throughout Northern Ireland.

Wider public sector programmes aimed at increasing access include the Electronic Libraries project that now offers free internet access throughout every public library in Northern Ireland and the C2K Classroom 2000 initiative providing internet-enabled PCs to every school in Northern Ireland.

These projects are in line with efforts currently being undertaken in England and in the devolved Administrations in Scotland and Wales.

Literacy Levels

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland what estimate he has made of literacy levels among 11-year-olds in each of the Education and Library Board areas in each of the last three years; and if he will make a statement. [6669]

Angela E. Smith: There is an improving trend across all board areas as measured by the end of Key Stage 2 assessment outcomes although there are still some schools where performance is below the level expected and where support and special interventions have been put in place.

Percentage pupils achieving expected level at KS2 (L4 and above)

	2001-02[1]	*2002-03*	*2003-04*[2]
BELB	65.1	66.0	n/a
WELB	72.8	75.6	n/a
NEELB	77.1	77.3	n/a
SEELB	75.8	78.1	n/a
SELB	76.8	78.7	n/a
NI average	73.9	75.6	n/a

[1] Due to industrial action, NI KS2 results for 2001-02 are incomplete.

[2] Due to industrial action, NI KS2 results are not available for 2003-04

Local Election (Northern Ireland) (Amendment) Order

Andrew Mackinlay: To ask the Secretary of State for Northern Ireland for what reason the draft Local Election (Northern Ireland) (Amendment) Order 2005, tabled on 9 June was withdrawn on 16 June; what the *(a)* substantive and *(b)* other differences between the order withdrawn and the new one tabled on 16 June were; and if he will make a statement. [6930]

Mr. Hanson: The effect of the new order tabled on 16 June was to add an "or" before civil partner in Article 4(1)*(a)* . Due to a typographical error the "or" had failed to be included in the original order tabled on 9 June.

Article 4(1)*(a)* of the order as laid on 9 June read:

(a) in paragraph 1(2)*(c)* after "spouse," insert "civil partner",'

Article 4(1)*(a)* of the order laid on 16 June reads:

(a) in paragraph 1(2)*(c)* after "spouse" insert "or civil partner",'.

Motor Tax and Insurance

Lady Hermon: To ask the Secretary of State for Northern Ireland how many people have been prosecuted for driving without *(a)* tax and *(b)* insurance in Northern Ireland in each of the past three years. [5500]

Mr. Woodward: The figures requested are provided as follows:

(a) Tax

Those detected for vehicle excise duty offences are usually offered an out-of-court settlement. Only if they

ignore the penalty or refuse to pay are they prosecuted in court. The figures for those prosecuted or who paid out-of-court settlements in the last three years are:

	Number of prosecutions or out-of-court settlements
2002–03	13,932
2003–04	10,876
2004–05	8,796

Note:
Of the 33,604 cases actioned over the last three years 84 per cent. resulted in out-of-court settlements and 16 per cent. were prosecuted through the courts.

(b) Insurance

The table provides details of prosecutions for driving without insurance.

	Prosecutions for driving without a licence
2000	2,744
2001	3,638
2002	4,508
2003	3,992

Note:
Statistics have been provided for 2000–03, with the latter being the most up-to-date available. Due to a backlog of court proceedings data, a new and finalised 2003 dataset has recently been produced and therefore figures for 2003 used previously may differ from those in this response.

Parades

Lady Hermon: To ask the Secretary of State for Northern Ireland what the total expense incurred in policing the *(a)* 2005 and *(b)* 2004 Tour of the North Orange march in Belfast was. [7148]

Mr. Woodward: The route followed by the Tour of the North Parade changes on alternate years, resulting in different deployments. Approximate costs, based on police deployed and catering provided are as follows:

	£
2004	64,390
2005	74,533

Lady Hermon: To ask the Secretary of State for Northern Ireland whether the Police Service of Northern Ireland Chief Constable is in possession of a legal opinion relating to the status of 11/1 application forms submitted by Orange Lodges to the Parades Commission with more than one signature in the required box. [7192]

Mr. Woodward: The Chief Constable is in receipt of a legal opinion concerning the issue of notification of parades using form 11/1 (application to parade). This advice is subject to legal privilege.

Pensioners

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland how many pensioners in Strangford constituency are in receipt of disability living allowance, broken down by *(a)* care and *(b)* mobility components. [6681]

Mr. Hanson: The information requested is shown in the following table for February 2005.

Component	*Number of pensioners*
Care only	230
Mobility only	388
Care and mobility	1,709
Strangford total	2,327

Additional information on combined Care and Mobility awards is provided to avoid double counting.

PFI/PPP

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland what public finance initiative and public-private partnership projects arrangements involving Jarvis plc are in place in *(a)* the NHS and *(b)* the Department of Education in the Province; and if he will make a statement. [6679]

Angela E. Smith: No public finance initiative or public-private partnership projects involving Jarvis are in place in the Health and Personal Social Services or the Department of Education in Northern Ireland.

Police

Mr. Gregory Campbell: To ask the Secretary of State for Northern Ireland what the estimated annual running costs are of the recently acquired helicopter for use by the police in Northern Ireland. [7538]

Mr. Woodward: The Police Service of Northern Ireland will shortly bring a helicopter into full operational service following a period of trials. This will be used to assist officers in reducing crime and improving community safety.

Total running costs for the first year are estimated to be £686,565.

Lady Hermon: To ask the Secretary of State for Northern Ireland how many typist manager's posts there are in each Police Service Northern Ireland District Command area; and how many posts are expected to be required in future. [7139]

Mr. Woodward: The Police Service of Northern Ireland recently conducted a review of typing services within the organisation. The review was necessary to reflect the reality in recent years of the reduction in police officer numbers overall and the significant investment in information technology.

As a result of that review all typing manager posts were disestablished, and no typing manager posts currently exist in any District Command Unit.

The issue of redundancy does not arise as the PSNI is taking a number of steps to re-deploy the surplus typists, including those who previously fulfilled the role of typing manager.

Mr. Gregory Campbell: To ask the Secretary of State for Northern Ireland if he will take steps to ensure that the police station in Castle Rock is retained. [7537]

Mr. Woodward: The issue of station closures is addressed by the Police Service of Northern Ireland's Estate Strategy Review. The Chief Constable and Policing Board continue to work closely on this matter.

Before the Police Service of Northern Ireland make a submission to the Policing Board to close a particular station, they undertake a consultation process with the relevant District Policing Partnership.

This will be the case with Castlerock PSNI station as with any other which the Police Service propose to close.

Public Land Disposal

Lady Hermon: To ask the Secretary of State for Northern Ireland what plans he has to dispose of public land *(a)* on the Stormont estate in Belfast and *(b)* elsewhere in Northern Ireland. [5520]

Angela E. Smith: It is not possible to provide details of all plans to dispose of public lands in Northern Ireland. However in the case of the Northern Ireland Civil Service office estate (i.e. properties held by the Department of Finance and Personnel) the Government are currently considering proposals to transfer ownership of a number of Government office buildings to the private sector as part of a major programme of transformation and rationalisation. The proposals include some properties at the south eastern corner of the Stormont estate. This particular aspect will be subject to public consultation in the autumn.

Parliament Buildings, Stormont Castle, Stormont House and the surrounding parkland are specifically excluded from the plans.

Safety Cameras

Mr. Dodds: To ask the Secretary of State for Northern Ireland how many speed cameras there are in the North Belfast area; and how much money has been raised in fines from each of them since their installation. [7630]

Mr. Woodward: There is one fixed road safety camera in North Belfast DCU, which is located on the Antrim Road. The camera has made a total of 2,352 detections for speeding since it was installed on 1 July 2003, generating a total of £141,120 in fine revenue.

Schools (Integrated Status)

Lady Hermon: To ask the Secretary of State for Northern Ireland how many schools in Northern Ireland *(a)* applied for and *(b)* were granted integrated status in each of the past five years; and if he will make a statement. [3474]

Angela E. Smith: The position with regard to proposals for new integrated schools in the past five years is as follows:

Year	
2005	1 application for transformation of existing school—Approved
2004	No applications
2003	5 applications for new schools—4 approved and 1 turned down (which had also applied in 2002)
	2 applications for transformation of existing schools—Both approved
2002	2 applications for new schools—1 approved and 1 turned down
	2 applications for transformation of existing schools—Both approved
2001	1 application for a new school—Approved

Translink Metro

Lady Hermon: To ask the Secretary of State for Northern Ireland what plans he has to extend the Translink Metro system to other parts of Northern Ireland. [7162]

Mr. Woodward: The Metro system is confined to the Greater Belfast area. However, Translink has recently announced the start of strategic reviews of its Ulsterbus district and schools networks, consistent with the objectives of the Regional Transportation Strategy. The intentions of the reviews are to provide attractive and more frequent core services to encourage passenger growth and to maximise the use of available resources to improve public transport accessibility in the cities, towns and rural areas outside Belfast. The review programme is expected to take up to three years to design and implement.

Young Offenders

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland what estimate he has made of the number of young offenders in Northern Ireland who had *(a)* alcohol and *(b)* drug abuse problems in the last year for which figures are available; and if he will make a statement. [6675]

Mr. Woodward: In the 12 months to May 2005, 359 young offenders committed to Hydebank Wood Young Offenders Centre and Prison declared a dependency on alcohol and 468 inmates a dependency/misuse of drugs. 58 inmates did not declare a dependency on either alcohol or drugs.

CONSTITUTIONAL AFFAIRS

Confiscation Orders

Chris Ruane: To ask the Minister of State, Department for Constitutional Affairs how many confiscation orders have been refused by the Crown courts in each police authority area since they were introduced; and what the total value was. [6166]

Ms Harman: During the year ending 31 March 2005, 2503 confiscation orders were made in the Crown court. The number of occasions on which the Crown court considered making an order but was unable to make one is not known.

County Court Judgments

Dr. Whitehead: To ask the Minister of State, Department for Constitutional Affairs what assessment she has made of the implications of the admissibility of post office box addresses in applications for county court judgments. [7281]

Ms Harman: No formal assessment has been made of the implications of using post office box addresses, but it would be unlikely to provide the degree of certainty of service necessary for legal process. A party must therefore give either his solicitor's business address or his own residence or place of business as his address for service.

Court Ushers

Mr. Kidney: To ask the Minister of State, Department for Constitutional Affairs if she will undertake a consultation on a code of practice for coroners courts on services for court ushers, with particular reference to bereaved relatives. [6851]

Ms Harman: We plan to issue a White Paper and a draft coroner and death certification Bill during the first parliamentary session. Meanwhile as the charter takes effect, the Department is supporting a range of local initiatives aimed at improving the quality of support, and opportunity for participation, provided to bereaved people who currently have contact with the coroner system.

Criminal Cases

Mr. Djanogly: To ask the Minister of State, Department for Constitutional Affairs what plans she has to reduce the cost of large criminal cases. [7254]

Bridget Prentice: We intend to set out our vision for the future of legal aid, outlining the Department's long-term strategy for reform, including work to control high cost criminal cases, and summarising the key findings of the Fundamental Legal Aid Review, in due course. In addition the Legal Services Commission has made a number of detailed reforms to the way it purchases services in high cost cases, including the introduction of individual case contracts to control expenditure.

Departmental Relocation

Mr. Gale: To ask the Minister of State, Department for Constitutional Affairs how many of her Department's posts *(a)* have been relocated and *(b)* are under consideration for relocation from London to the deprived areas of the South East. [6258]

Bridget Prentice: My Department is implementing the Lyons Review recommendations to relocate 200 posts out of London and the South East by 2010. This will not exclude consideration of relocating some posts to relatively deprived areas in the South East. So far my Department has not identified any posts suitable for transfer to deprived areas in the South East.

Entry Clearance Appeals

Keith Vaz: To ask the Minister of State, Department for Constitutional Affairs how many appeals against the refusal of entry clearance to the UK have *(a)* been submitted, *(b)* been acknowledged to the applicant and *(c)* received an appeal date since 4th April. [6442]

Bridget Prentice: Following the recent commencement of the Asylum and Immigration Tribunal (AIT) on 4 April 2005, and the required changes to its electronic records database, the information requested is not currently available, and could not be produced without incurring disproportionate costs. The AIT aims to process all appeal receipts arising from a refusal of entry clearance decision within five business days. Notification of the appeal's receipt will be forwarded to the appeal parties as soon as is practicable thereafter.

Keith Vaz: To ask the Minister of State, Department for Constitutional Affairs how many appeals against the refusal of entry clearance to *(a)* the Immigration Appellate Authority and *(b)* the Immigration Appeals Tribunal, (i) were submitted, (ii) were acknowledged to the applicant and (iii) received an appeal date in each year since 1995. [6443]

Bridget Prentice: Following the recent commencement of the Asylum and Immigration Tribunal (AIT) on 4 April 2005, and the changes required to its electronic records database, the information requested is not currently available and could not be produced without incurring disproportionate costs. Prior to the AIT, the Immigration Appellate Authority (IAA), and the Immigration Appeals Tribunal (IAT) did not differentiate between different categories of immigration appeal. The available data for the IAA and the IAT, for the calendar years 1997 to 2004, show the number of immigration appeals received, and decided, as follows:

	IAA appeal receipts	*IAA appeal decisions*	*IAT appeal receipts*	*IAT appeal decisions*
1997	11,540	13,800	1,773	1,079
1998	7,290	12,795	557	752
1999	8,343	9,139	733	829
2000	6,149	7,672	401	931
2001	10,378	9,114	427	545
2002	12,024	12,762	598	799
2003	14,637	12,411	871	808
2004	31,404	30,539	1,317	754

Keith Vaz: To ask the Minister of State, Department for Constitutional Affairs how many cases of appeals against the refusal of entry clearance to the UK made in 1995 remain to be concluded. [6444]

Bridget Prentice: Following the recent commencement of the Asylum and Immigration Tribunal (AIT) on 4 April 2005, and the required changes to its electronic records database, the information requested is not currently available, and could not be produced without incurring disproportionate costs.

Keith Vaz: To ask the Minister of State, Department for Constitutional Affairs what the Department's current estimate is of the average length of time an

applicant appealing against the refusal of entry clearance to the UK waits for *(a)* a date for an appeal hearing and *(b)* an appeal hearing. [6445]

Bridget Prentice: The Asylum and Immigration Tribunal (AIT) aims initially to process all out-of-country immigration appeal receipts within five business days. Where such an appeal arises from a refusal of entry clearance, served prior to 4 April 2005, the appeal is listed for a hearing date approximately six weeks from the AIT taking receipt of the appeal.

Where the appeal arises from a refusal of entry clearance, served on the appellant on or after 4 April 2005, the AIT notifies receipt of the appeal to the parties within five business days. The AIT will list these appeals for a hearing date once it has taken receipt of the respondent's bundle of appeal documents. The appeal is then listed for a hearing date four to six weeks from receipt of the bundle.

Due to recent changes to the AIT electronic database, as part of its implementation, the average time to a hearing is not currently available and could not be provided without incurring disproportionate costs.

Honours

Mr. Pope: To ask the Minister of State, Department for Constitutional Affairs how many officials currently in the Department received honours in the recent Queen's birthday honours list; and at what rank of honour. [5122]

Ms Harman: I refer my hon. Friend to the answer given by the Chancellor of the Duchy of Lancaster on 22 June 2005, *Official Report*, column 1059W.

Legal Aid/Salaries

Mr. Djanogly: To ask the Minister of State, Department for Constitutional Affairs what percentage of solicitors' firms ceased performance of their criminal legal aid contracts before the expiry of the contract's term. [7253]

Bridget Prentice: There are 2,648 current contracts for criminal defence services.

490 of these contracts are for work in London having being issued on 31 July 2004, and are due to expire on 31 December 2005.

2,159 contracts were issued for work outside London on 31 July 2004, and are due to expire on 31 March 2007.

Of the 2,648 active national contracts, 3.9 per cent. (104 contracts) were terminated before the expiry of the contracts' term.

Mr. Djanogly: To ask the Minister of State, Department for Constitutional Affairs what checks have been undertaken to ensure that the criminal legal aid budget is sufficient to meet human rights requirements. [7255]

Bridget Prentice: We constantly review our forecasts for both civil and criminal legal aid and take any action necessary to fully fund all those cases which require legal aid from within the Department's Delegated Expenditure Limit (DEL). No individual who satisfied the interests of justice test could be denied legal aid.

Mr. Djanogly: To ask the Minister of State, Department for Constitutional Affairs what plans she has to increase the criminal legal aid budget. [7256]

Bridget Prentice: The resource expenditure for the Criminal Defence Service (CDS) for 2004–05 was £1.151 billion (subject to end of year audit). The projected expenditure for 2005–06 is £1.211 billion.

Mr. Djanogly: To ask the Minister of State, Department for Constitutional Affairs how many law firms competed for each civil legal aid contract, on average, in each of the last 10 years, broken down by region. [7424]

Bridget Prentice: There are no competitive tendering for civil legal aid contracts. In the most recent bid round in 2003, approximately 90 per cent. of existing contracted solicitors re-bid for their contract, with the other 10 per cent. being let to solicitors firms moving into new categories of law or who were new to legal aid and not-for-profit agencies.

Mr. Djanogly: To ask the Minister of State, Department for Constitutional Affairs if she will make a statement on the progress of competitive tendering for civil legal aid contracts. [7425]

Bridget Prentice: We do not have any plans to introduce competitive tendering for civil legal aid contracts.

Mr. Djanogly: To ask the Minister of State, Department for Constitutional Affairs what estimate she has made of the average salary of *(a)* a barrister in first tenancy, *(b)* a one-year qualified barrister, *(c)* a trainee solicitor, *(d)* a newly-qualified solicitor and *(e)* a one-year qualified solicitor conducting criminal legal aid work in each of the last 10 years, broken down by region. [6593]

Bridget Prentice: The Bar Council does not hold information centrally about the earnings of barristers in their first tenancy or those who have been qualified for one year. This information is difficult to collect since barristers are not salaried, they are self-employed and their earnings will depend on where they work and the work they carry out. Many junior barristers will have a varied caseload that can include civil and criminal work. The Bar is considering the possibility of collecting such data.

The Law Society has provided some information about the average earnings of solicitors generally. Figures for average salaries earned from criminal work are not collated separately. In 2004, the average salary of a solicitor in the first year of their training contract was £20,013 and the average salary for newly qualified solicitors was £32,139. The figure of £32,139 is however based on a survey with small sample sizes. Solicitors' earnings are generally dependent on the grade they operate at, the size and location of the firm.

There is a minimum starting salary for trainee solicitors recommended by the Council of the Law Society. The 2004 minimum figure is set at £15,900 for Central London and £14,200 for Outer London and the rest of England and Wales.

Short Money

Mr. Drew: To ask the Minister of State, Department for Constitutional Affairs what accountability mechanisms there are to scrutinise the spending of "Short" money. [6340]

Mr. Hoon: I have been asked to reply.

Short money is governed by the Resolution of the House of Commons of 26 May 1999.

Each opposition party which receives Short money is required to submit a certificate from an independent professional auditor within nine months of the year end confirming that all the expenses for which the party received financial assistance under the terms of the Resolution were incurred exclusively in connection with the party's parliamentary business.

If the certificate is not received within the time specified no further financial assistance is paid until such a certificate is so furnished.

Guidance for completion of the certificate is provided by the House administration and the form of the certificate has been agreed with the National Audit Office.

HEALTH

Abortion

Bob Spink: To ask the Secretary of State for Health if she will propose the setting up of a joint committee of both Houses to consider the scientific, medical and social changes in relation to abortion as recommended by the Science and Technology Committee in its March Report on Human Reproductive Technologies and the Law. [5795]

Jane Kennedy: I refer the hon. Member to the reply I gave on 6 June 2005, *Official Report*, column 413W.

Alliance Medical Ltd.

Mr. Kevan Jones: To ask the Secretary of State for Health if she will list the contracts awarded to Alliance Medical to provide services for the NHS. [2233]

Mr. Byrne: The Department entered into a single contract with Alliance Medical Limited (AML) to provide magnetic resonance imaging screening to the national health service through state of the art mobile units. Details of any other contracts with AML agreed by local NHS commissioners are not collected centrally.

Ambulances

Mr. Hollobone: To ask the Secretary of State for Health what guidance her Department has issued to health service trusts on the operational life of ambulances. [6075]

Mr. Byrne *[holding answer 20 June 2005]:* The Department has not issued guidance on the operational life of ambulances, as it is a matter for each trust.

Anaemia

Dr. Gibson: To ask the Secretary of State for Health (1) how many people have suffered from cancer-treatment induced anaemia in England over the last three years; [6714]

(2) how many cancer patients in England are receiving erythropoietin; [6715]

(3) how many cancer centres prescribe erythropoietin; [6717]

(4) if she will meet leading clinicians to discuss the use of erythropoietin in the NHS; and if she will make a statement. [6719]

Ms Rosie Winterton: The Department does not collect information on the number of cancer patients with cancer treatment induced anaemia; the number of cancer patients who receive erythropoietin or the number of cancer centres prescribing erythropoietin.

Erythropoietin (alpha and beta) and darbopoetin for the treatment of cancer treatment induced anaemia have been referred to National Institute for Health and Clinical Excellence for appraisal. Guidance is expected to be published at the end of this year. It would be better to wait until that guidance is available before considering setting up a meeting.

Anti-arthritis drugs

Daniel Kawczynski: To ask the Secretary of State for Health if she will take steps to ensure that health care services in Shropshire receive the funding required to ensure equality of access to anti-arthritis drugs on a geographical basis. [6043]

Ms Rosie Winterton: Funding is allocated to primary care trusts (PCTs) on the basis of the relative needs of their populations. A weighted capitation formula is used to determine each PCT's target share of available resources to enable them to commission similar levels of health services for populations in similar need. The components of the formula are used to weight each PCT's "crude" population according to their relative need (age, and additional need) for healthcare and the unavoidable geographical differences in the cost of providing healthcare (market forces factor).

It is for PCTs to determine how to use the funding allocated to them to commission services to meet the healthcare needs of their local populations.

Anti-depressants

Norman Baker: To ask the Secretary of State for Health how many prescriptions there have been for anti-depressants in England in each year since 1991, broken down by type, including fluoxetine. [4434]

Ms Rosie Winterton: Information on the number of prescription items of anti-depressants that have been dispensed in the community in England in each year since 1991 has been placed in the Library.

Audiology Services

Malcolm Bruce: To ask the Secretary of State for Health (1) how many people in England are waiting *(a)* to be assessed for and *(b)* fitted with an NHS hearing aid for the first time; [6461]

(2) how many people in England are using NHS analogue hearing aids; and what information she has collated on the numbers who would benefit from switching to digital hearing aids. [6470]

Mr. Byrne: This information is not held centrally.

Back and Joint Problems (Nurses)

Lynne Jones: To ask the Secretary of State for Health if she will make it her policy to collect centrally information relating to the number and percentage of nurses in each primary care trust area in each year who *(a)* report personal back and joint injuries and *(b)* retire as a result of back or joint problems. [6028]

Mr. Byrne: The Government are committed to reducing the burden of information requirements on the national health service. Information is collected centrally to support key policies and monitor national targets as set out in the NHS Plan and subsequent documents. It is for local NHS trusts to monitor the ill health of their staff.

Bedside Bibles

Keith Vaz: To ask the Secretary of State for Health what reports she has received of complaints to hospitals about Bibles in wards. [4002]

Jane Kennedy: The Department does not collect any central information regarding reports about complaints to hospitals about Bibles in wards.

Cancer Services/Treatment

Mr. Bailey: To ask the Secretary of State for Health what steps are being taken to improve the pre-diagnostic infrastructure for breast cancer. [5669]

Ms Rosie Winterton *[holding answer 21 June 2005]:* People who live in deprived areas are less likely to attend for screening for breast cancer. Including cultural and religious reasons, women from minority ethnic groups are less likely to accept invitations for screening than the general population as a whole. Language and access to information can be a significant barrier and can affect the coverage levels.

A number of steps have been taken to improve this situation:

The national informed choice leaflet, "Breast Screening: The Facts", which is sent out with every invitation for screening, has now been translated into 18 languages.

In December 2003, national health service cancer screening programmes published "Inequalities of Access to Cancer Screening: A Literature Review". The recommendations in the review have been sent to all local screening programmes.

A number of local actions have been put in place to combat inequalities in inner-city areas. For example, in Haringey, sessions on screening have been held in community centres, with advocates from the relevant communities attending to translate and encourage women to attend their screening appointment. Many primary care trusts are conducting similar initiatives across the country.

In 2004, to raise awareness about the availability of breast cancer screening, the NHS cancer screening programmes issued a regional communications pack to all local breast screening programmes to increase coverage rates. The packs include advice on raising the awareness of screening, including posters.

Mr. Bailey: To ask the Secretary of State for Health what steps she is taking to improve participation in breast screening programmes. [5670]

Ms Rosie Winterton *[holding answer 21 December 2005]:* To raise awareness about the availability of breast cancer screening, in 2004 the National Health Service cancer screening programmes issued a regional communications pack to all local breast screening programmes to increase coverage rates. The packs include advice on raising the awareness of screening, including posters.

Mr. Baron: To ask the Secretary of State for Health what progress the Government have made in reducing the difference in breast cancer survival rates between women in the most affluent areas and those in the most deprived areas. [7430]

Ms Rosie Winterton: We are committed to reducing inequality of outcomes in all cancers. We have a commitment to reduce death rates from cancer in under-75s by at least 20 per cent. by 2010, with a reduction in the inequalities gap of at least 6 per cent. between the fifth of areas with the worst health and deprivation indicators, the spearhead primary care trusts (PCTs), and the population as a whole.

Statistics for women diagnosed between 1996 to 1999 showed that five year survival rates for women with breast cancer in the most affluent areas were 5.8 per cent. higher than those in the most deprived areas.

It is not clear precisely why survival rates vary. However, women in more deprived areas are more likely to have advanced breast cancer at the point of diagnosis. Work is under development to encourage people, especially in less affluent areas, to seek help from their general practitioner earlier. We will be piloting programmes in some spearhead PCTs, looking at knowledge and attitudes towards cancer, as well as working with the voluntary sector to learn from previous awareness-raising campaigns.

Graham Stringer: To ask the Secretary of State for Health on what date the Greater Manchester Strategic Health Authority received ministerial authority to start the Specialist Cancer Services Review. [6686]

Mr. Byrne *[holding answer 23 June 2005]:* In line with the Department's Shifting the Balance of Power initiative, the Greater Manchester Strategic Health Authority is not required to seek ministerial approval prior to undertaking a service review.

Gregory Barker: To ask the Secretary of State for Health if she will make a statement on the role of the Sussex cancer network in relation to cancer treatment waiting times. [5970]

Caroline Flint *[holding answer 22 June 2005]:* Surrey and Sussex Strategic Health Authority, the local headquarters of the national health service, advises that primary care trusts (PCTs) in Sussex continue to work with relevant acute trusts to reduce waiting times for East Sussex residents. The Sussex cancer network works closely with the PCTs and acute trusts within Surrey and Sussex to ensure the delivery of high quality cancer services and reduced waiting times. The Sussex cancer

network also works with Maidstone and Tunbridge Wells NHS Trust, which provides cancer treatment to some East Sussex residents.

I understand that the strategic direction for the Sussex cancer network is laid out within its strategic plan. The strategic plan was agreed by all stakeholders of the network, including patients and carers. The strategic plan and further information on the work of the network is available on its website at www.sussexcancer.net.

Cane Hill (Coulsdon)

Richard Ottaway: To ask the Secretary of State for Health what plans she has for the Cane Hill site, Coulsdon. [5764]

Jane Kennedy: The Cane Hill hospital site is included in a portfolio of properties to transfer to English Partnerships (EP) as part of a wider agreement with the Office of the Deputy Prime Minister to support the Government's sustainable communities programme. EP and the national health service will be working together on plans for the overall redevelopment of the site, which will reflect future health service requirements.

Charing Cross Hospital (Private Treatments)

Mr. Khabra: To ask the Secretary of State for Health what assessment she has made of the effects on services for NHS patients of the provision made for the treatment of private patients at Charing Cross hospital. [6136]

Jane Kennedy: Hammersmith Hospitals National Health Service Trust, of which Charing Cross hospital is a part, has been providing treatment to private patients for over 20 years. Income generated from private treatment means more revenue for the trust to improve its facilities and services.

Clinical Negligence

Mr. Lansley: To ask the Secretary of State for Health what the total cost to the NHS has been from successful claims for clinical negligence in each year since 1975 in *(a)* nominal and *(b)* real terms. [253]

Jane Kennedy: The NHS Litigation Authority (NHSLA) handles clinical negligence claims made against national health service bodies in England. No accurate national data were collected on clinical negligence claims prior to the establishment of the NHSLA on 20 November 1995. Centrally collected data from the NHSLA are shown in the table.

Reliable data on real costs are not available. It may take a number of years from notification of a claim to settlement of that claim and payments will have been made in relation to that claim throughout the full period. For example, defence costs will be paid quarterly as the claim progresses and the claimant bill will be paid at conclusion.

Total payments for successful closed clinical negligence claims by year of notification to the NHSLA scheme member as at 31 March 2005[1]

Year of notification	*Total payments (£)*
1996–97	238,614,168
1997–98	416,888,183
1998–99	330,573,238
1999–2000	326,812,451
2000–01	193,803,432
2001–02	117,742,245
2002–03	36,609,841
2003–04	10,539,364

[1] The year a claim is notified to the NHSLA has no relevance to the year payments are made with regard to that claim. It may take a number of years from notification of a claim to settlement of that claim and payments will have been made in relation to that claim over the full period.

Mr. Lansley: To ask the Secretary of State for Health how many claims for clinical negligence there have been against the NHS in each year since 1991 *(a)* in total and *(b)* per thousand finished consultant episodes; and what percentage of these claims were successful in each year since 1991. [255]

Jane Kennedy: The NHS Litigation Authority (NHSLA) handles clinical negligence claims made against national health service bodies in England. No accurate national data was collected on clinical negligence claims prior to the establishment of the NHSLA on 20 November 1995. Data on clinical negligence claims reported to the NHSLA based upon the date reported to the NHSLA scheme member, as at 31 March 2005, are shown in the table.

Year of notification	*Number of claims*[1]	*Percentage of claims currently successful (percentage)*[2]
1996–97	4,136	47.63
1997–98	6,932	52.37
1998–99	6,916	42.29
1999–2000	7,036	40.22
2000–01	6,915	35.84
2001–02	7,215	30.91
2002–03	6,257	23.03
2003–04	4,844	16.02

[1] It is not possible to provide the number of claims per thousand finished consultant episodes. The date a claim is made has no relevance to the date the incident giving rise to a claim occurred; this may be many years before. To link the number of claims reported in a particular year to the number of finished consultant episodes in that year would be open to misinterpretation.

[2] It may take many years from the date of notification to settle a claim. The percentage of claims successful relating to a particular year will therefore increase over time as more claims are settled.

David Howarth: To ask the Secretary of State for Health how much compensation NHS bodies paid in respect of clinical negligence claims in each year since 1996. [1354]

Jane Kennedy *[holding answer 6 June 2005]:* The NHS Litigation Authority (NHSLA) handles negligence claims made against national health service bodies in England. Data collected by the NHSLA is shown in the table.

Member and NHSLA payments[1]

£

Scheme	*Damages paid* 1996–97	1997–98	1998–99	1999–2000	2000–01	2001–02	2002–03	2003–04
Clinical negligence scheme for trusts (CNST)[2]	33,983	560,503	4,007,609	9,862,486	19,433,590	244,825,189	107,204,725	205,443,691
Existing liability scheme (ELS)[3]	400,000	28,445,121	46,530,738	277,809,505	559,201,647	447,350,269	225,478,739	90,106,254
Former regional health authority (FRHA)[4]	639,647	14,914,310	9,588,467	6,214,126	5,927,289	3,587,722	2,495,605	1,261,673
Total	1,073,630	43,919,934	60,126,814	293,886,117	584,562,526	695,763,180	335,179,068	296,811,618

[1] Until 1 April 2000, excess levels were in place for ELS and until 1 April 2002, excess levels were in place for CNST. NHS trusts could settle claims up to the excess amount without reference to or funding from the NHSLA. The figures include sub-excess claims where these were notified to the NHSLA.
[2] CNST claims are those in respect of liabilities occurring on or after 1 April 1995.
[3] ELS claims are those open at 1 April 1996, where the incident pre-dates 1 April 1995.
[4] FRHA claims are pre-April 1996 and are cases against the former RHAs, fully funded by the NHSLA.

David Howarth: To ask the Secretary of State for Health how much NHS trusts paid in respect of legal fees in clinical negligence cases in each year since 1996. [1355]

Jane Kennedy *[holding answer 6 June 2005]*: The NHS Litigation Authority (NHSLA) handles negligence claims made against national health service bodies in England. Data collected by the NHSLA are shown in the tables.

Member and NHSLA payments[1]

£

Scheme	*Defence costs paid*[2] 1996–97	1997–98	1998–99	1999–2000	2000–01	2001–02	2002–03	2003–04

FRHA[5]	0	2,593,158	2,748,432	1,507,462	768,837	1,246,830	578,499	293,793
Total	40,421	12,313,188	25,208,189	69,042,306	70,707,450	98,441,765	61,740,559	70,904,911

[1] Until 1 April, 2000 excess levels were in place for ELS and until 1 April 2002, excess levels were in place for CNST. NHS trusts could settle claims up to the excess amount without reference or funding from the NHSLA. The figures include sub-excess claims where these were notified to the NHSLA.
[2] Defence costs are accrued quarterly as claims progress whereas claimant bills are paid at conclusion. Therefore, the levels incurred for defence and claimant costs each year are not directly comparable.
[3] CNST claims are those in respect of liabilities occurring on or after 1 April 1995.
[4] ELS claims are those open at 1 April 1996, where the incident pre-dates 1 April 1995.
[5] FRHA claims are pre-April 1996 and are cases against the former RHAs, fully funded by the NHSLA.

Care Homes

Mr. Burstow: To ask the Secretary of State for Health when she will publish the Department's review of national minimum standards for care homes. [6662]

Mr. Byrne: The Department plans to complete the review of the national minimum standards in 2006. The results will be published after that.

Clinical Trials Directive

Mr. Brady: To ask the Secretary of State for Health what assessment she has made of the effect of the European Clinical Trials Directive on the viability of future UK research projects. [3261]

Jane Kennedy: The Government aim to build on the United Kingdom's reputation as an excellent place for clinical research. With partners, it established the UK clinical research collaboration (UKCRC) to co-ordinate major new investment in clinical research infrastructure. The UKCRC includes Government and other public funders of research, as well as industry and the Medicines and Healthcare products Regulatory Agency (MHRA).

It is too soon to assess the effect of the European Clinical Trials Directive. The Medicines for Human Use (Clinical Trials) Regulations 2004 (SI 2004 No. 1031) came into force on 1 May 2004. They implemented Directive 2001/20/EC in the UK. That Directive required the Commission to publish detailed guidelines on good clinical practice The Commission published a

Good Clinical Practice Directive (2005/28/EC) in April 2005. Member states are required to implement it by January 2006. The Commission has yet to publish related guidelines for non-commercial trials.

The Government are committed to make an assessment as soon as reliable evidence is available. The MHRA acts as the licensing authority for all clinical trials within the scope of the Directive. It has asked the UKCRC to review the evidence to date, consider how to reduce any adverse regulatory impact and agree plans for long-term monitoring. Cancer Research UK and the national clinical research network have undertaken initial assessments of opinion about the effect of the Directive on cancer clinical trials across the UK. Other assessments are being carried out at the European level with the Federation of European Cancer Societies. The UKCRC core team has agreed to bring together findings from these and other studies.

The Government welcome the important contributions that Cancer Research UK and other stakeholders are making in monitoring the implementation of the Clinical Trials Directive, and will consider their findings carefully.

Clostridium Difficile

Mr. Lidington: To ask the Secretary of State for Health whether *(a)* the Health Protection Agency and *(b)* her Department have been informed of cases of *Clostridium difficile* 027 at hospitals in England other than Stoke Mandeville. [5550]

Jane Kennedy *[holding answer 20 June 2005]:* Cases of *Clostridium difficile* 027 have occurred in Preston, Birmingham, Winchester, Bristol, Romford, Southampton, Truro, Carshalton, High Wycombe, South Tyneside, Newcastle, South Tees, Sunderland, Stoke Mandeville and Exeter. As of 16 June 2005, 75 isolates of *Clostridium difficile* 027 had been received by the Anaerobe Reference Laboratory in Cardiff, being reported to the Health Protection Agency and the Department.

Mr. Lidington: To ask the Secretary of State for Health (1) whether her Department plans to issue guidance to NHS hospital trusts on the typing of samples from cases of *Clostridium difficile* in order to measure the incidence of *Clostridium difficile* 027; [5734]

(2) if she will make a statement on the laboratory capacity available to the NHS to type samples from cases of *Clostridium difficile*; [5735]

(3) how many laboratories are available to the NHS to type samples from cases of *Clostridium difficile*. [5736]

Jane Kennedy *[holding answer 20 June 2005]:* The Health Protection Agency (HPA) have issued guidance to the national health service on the collection of *Clostridium difficile* samples, as part of the mandatory surveillance of *Clostridium difficile* infection. Typing of *Clostridium difficile* 027 is conducted by the Anaerobe Reference Laboratory in Cardiff, which has one the largest collection of *Clostridium difficile* isolates in the world and has also developed this typing scheme. Other NHS laboratories do not have the specialist expertise required.

Mr. Martyn Jones: To ask the Secretary of State for Health (1) if she will make a statement on the outbreak of *Clostridium difficile* at Stoke Mandeville hospital, Buckinghamshire; [4977]

(2) what research her Department has commissioned regarding the outbreak of *Clostridium difficile* at Stoke Mandeville hospital, Buckinghamshire. [4978]

Jane Kennedy: It was announced last week that there would be an independent inquiry into the outbreak of *Clostridium difficile* at Stoke Mandeville hospital. Officials are speaking to the Healthcare Commission about the possible terms of reference and scope for an investigation. Research needs may arise from this inquiry but the first priority remains to ensure that the outbreak at Stoke Mandeville hospital is under control and this process will include epidemiological and laboratory analyses.

Colindale Hospital (Staff Housing)

Mr. Dismore: To ask the Secretary of State for Health if she will make an assessment of the requirement for *(a)* key worker housing for NHS staff and *(b)* affordable housing before deciding on (i) the basis for marketing and (ii) the actual sale of the Colindale hospital site once it is surplus to NHS requirements; and if she will make a statement. [5833]

Jane Kennedy: This is a local matter. The land at Colindale hospital is held by Barnet, Enfield and Haringey Mental Health National Health Service Trust.

Of the 724 dwellings, 37 per cent. are proposed to be affordable or key worker accommodation representing 49 per cent. of the total number of habitable rooms. The Greater London authority has been consulted and has expressed support due to the affordable and key worker accommodation comprising predominantly family accommodation. The trust is satisfied that this is sufficient to meet their accommodation needs.

Cumberland Infirmary

David Maclean: To ask the Secretary of State for Health (1) what action she proposes to take to tackle hygiene failings at the Cumberland Infirmary identified in the recent Patient and Public Forum report; [6277]

(2) which of the conclusions of the Patient and Public Forum investigation into the Cumberland Infirmary she *(a)* accepts and *(b)* does not accept; [6278]

(3) what action she plans to take following the recent Patient and Public Forum investigation into the Cumberland Infirmary. [6279]

Mr. Byrne: This is a matter for the North Cumbria Acute Hospitals National Health Service Trust to whom the recent patient and public involvement forum "Bug Watch" report was submitted. Trusts have a duty to respond to the reports of patient and public involvement forums setting out what action they will take to respond to the recommendations that have been made.

Dementia

Helen Jones: To ask the Secretary of State for Health how many residential care places are available in each strategic health authority for people with early onset dementia. [5106]

Mr. Byrne: Data are not available in the form requested. However, information on the number of residential care places for adults with mental health problems aged 18 and over at 31 March 2001 is shown in the table by strategic health authority.

I understand from the Chair of the Commission for Social Care Inspection (CSCI) that figures for later years were collected by the National Care Standards Commission, and now CSCI, but comparable details are not available.

Number of residential care places for people with mental health problems by age and strategic health authority at 31 March 2001

Strategic health authority	*People with mental health problems aged 18 to 64*	*People with mental health problems aged 65 and over*	*Total*
England	16,770	23,320	40,100
Northumberland, Tyne and Wear	400	1,080	1,480
County Durham and Tees Valley	340	860	1,200
Cumbria and Lancashire	520	1,120	1,640
Greater Manchester	900	400	1,300
Cheshire and Merseyside	780	880	1,660
North and East Yorkshire and North Lincolnshire	700	4,950	5,650
West Yorkshire	510	970	1,480
South Yorkshire	430	1,210	1,640
Shropshire and Staffordshire	180	400	570
Birmingham and the Black Country	720	320	1,040
West Midlands South	220	320	540
Thames Valley	260	200	460
Hampshire and Isle of Wight	890	510	1,400
Kent and Medway	840	1,180	2,020

RA Form A

Dentistry

Keith Vaz: To ask the Secretary of State for Health (1) what assessment she has made of the correlation between dental health in five-year-olds and their social-economic grouping, broken down by county in each year since 1997; [4718]

(2) what role fluoridation of water plays in improving dental health; and whether the Government plans to review the level of fluoridation in tap water. [4719]

Ms Rosie Winterton: National dental health surveys are carried out every 10 years; the latest survey is for the year 2003. Results and comparisons with the results of the 1993 survey are available on the Office for National Statistics (ONS) website at www.statistics.gov.uk/children/dentalhealth/. Results are not available for areas as small as counties because of the small sample size, but regional results for five-year-old children are given in tables 1.5 and 1.6 for the proportion of children with obvious decay experience and for the mean number of teeth with obvious decay experience.

A separate report on this survey has been prepared on social factors and oral health in children, which analyses the United Kingdom figures. This is also available on the ONS website. The report includes analyses of tooth decay by an assessment of deprivation of the school together with analyses by socio-economic status of the household.

The findings of these surveys confirm that there is a strong correlation between dental disease and social and economic deprivation, which we are addressing in connection with implementation of the Government's commitment to reduce health inequalities. The fluoridation of water offers the best prospect for reducing inequalities in oral health. Changes made in the Water Act 2003 to the legislative framework governing fluoridation have made it a realistic option for strategic health authorities to consider for improving the oral health of their populations.

Anne Main: To ask the Secretary of State for Health what percentage of dental practices in Hertfordshire Partnership NHS Trust were able to offer an emergency dental appointment within 24 hours in the latest period for which figures are available. [1637]

Ms Rosie Winterton: Hertfordshire Partnership National Health Service Trust is a mental health trust and therefore does not offer any dental services. The Department collects data about dental practices based on primary care trust areas and does not identify individual dental practices.

Sir Paul Beresford: To ask the Secretary of State for Health what criteria her Department has advised primary care trusts to apply for the approval of growth funding to Personal Dental Service applicants. [3282]

Ms Rosie Winterton *[holding answer 13 June 2005]:* The Department has provided primary care trusts (PCTs) with guidance on the criteria they need to apply in considering proposals for pilot personal dental services (PDS). Guidance has been set out in a step-by-step guide to PDS and augmented with training sessions provided by the Department's national PDS team.

The key elements or criteria of this guidance are:

Each proposal for PDS should be considered in the context of the PCTs assessment of the oral health needs of their population and the level and range of dental services necessary to serve those needs satisfactorily. The assessment of needs and the actions necessary to serve them would usually be set out in the form of a local action plan, agreed with the relevant strategic health authority.

The prime aim of each proposal should be to at least preserve the current level of commitment to the NHS and wherever possible secure additional national health service provision in line with the requirements, which have been identified locally.

The actual level of growth funding appropriate to each PDS application needs to match the NHS provision being proposed and to be affordable within the budget allocated to the PCT for this purpose.

Sir Paul Beresford: To ask the Secretary of State for Health when she plans to conduct a new dental clinical academic staff vacancies survey; how much of the funding for dental schools has been allocated for the creation of more clinical academic posts; and what joint action her Department and the Department for Education and Skills are planning concerning recruitment and retention of dental academic staff. [3284]

Ms Rosie Winterton *[holding answer 13 June 2005]:* On 6 June the Council of the Heads of Medical Schools and the Council of Heads and Deans of Dental Schools published a joint survey, which shows that there remain vacancies in clinical academic posts. We are embarking upon the biggest programme of investment in dental education since the inception of the national health service. Additional recurring funding rising to £29 million by 2010–11 has been allocated to provide for 170 additional undergraduate training places from October 2005. The expansion will be supported by new capital investment of £20 million in each of the four years 2005–06 to 2008–09. It will be for the dental schools to decide how to use these funds, but there is no doubt that this additional investment in the dental schools will improve the working environment and career prospects of dental academics.

The joint Department of Health/Department of Education and Skills Strategic Learning and Research Advisory (StLaR) Group for Health and Social Care has overseen production of a human resources plan project for the educator and researcher workforce across all professions in health and social care. A project board has been established which includes representatives of the Higher Education Funding Council for England, the university and service sector. The board's remit includes the identification and implementation of measures to improve all aspects of academic careers for medically and dentally-qualified researchers and educationalists.

Sir Paul Beresford: To ask the Secretary of State for Health how many Polish dentists who have been recruited by *(a)* primary care trusts and *(b)* Methods Consulting, have subsequently returned home. [3285]

Ms Rosie Winterton *[holding answer 13 June 2005]:* Based on returns received from strategic health authorities at the end of April, primary care trusts have locally recruited nine dentists from Poland. The Department do not hold figures of the numbers of those dentists who have subsequently returned to Poland.

114 dentists, recruited by Methods Consulting on behalf of the Department, have started work in England. Of these, one has subsequently returned to Poland.

Sarah Teather: To ask the Secretary of State for Health what estimate she has made of the average income of NHS dentists in London in each year since 1997. [5358]

Ms Rosie Winterton: The average general dental service (GDS) gross fee per dentist in the London area since 1996–97 are shown in the tables.

Numbers of dentists with open GDS contracts

1999–2000	4,015	216,653,251	53,961
2000–01	4,006	229,052,591	57,177
2001–02	4,027	235,624,063	58,511
2002–03	3,942	242,537,032	61,526
2003–04	4,055	254,448,442	62,749
2004–05	4,033	252,320,728	62,564

Notes:

1. The figures are based on the numbers of dentists with open GDS contract.

2. GDS gross fees cover a dentist's individual earnings as well as their practice expenses.

3. The dentists include principals, assistants and trainees.

4. A dentist will be counted more than once if he/she works in more than one PCT.

5. Prison contracts have not been included in this analysis.

6. In view of the boundary changes from health authorities to PCTs in 2002 the areas have been defined using practice postcodes.

7. The figures provide a snapshot of the number of individual dentists with an open contract at 31 March.

8. A dentist with a GDS contract may provide as little or as much NHS treatment as he or she chooses.

9. The Dental Practice Board has no information concerning the amount of time dedicated to NHS work by individual dentists.

10. Care should be taken when analysing this data due to dentists changing contracts from GDS to PDS, particularly the later years.

11. The earnings figures are based on whatever the definition of London was at the time, in particular the earlier figures are based on Health Authority boundaries.

12. Dentist numbers are on a headcount basis—no estimate of whole-time equivalent is available.

Dental Practice Board.

Office for National Statistics.

Lynne Featherstone: To ask the Secretary of State for Health how many full-time equivalent NHS dentists have been employed in Hornsey and Wood Green constituency in each of the last five years; and if she will make a statement. [4799]

Ms Rosie Winterton: Information on full-time equivalent national health service dentists is not available as dentists are able to vary the amount of hours they work and their NHS commitment. Many dentists do some private work.

The number of dentists doing NHS work in the Hornsey and Wood Green constituency in each of the last five years is shown in the table.

As at 31 December each year	*Number*
2000	81
2001	83
2002	88
2003	93
2004	89

This data come from the Dental Practice Board and relate to the number of dentists working in the general dental service and personal dental service and relate to dentists whose practice address postcode is within the constituency boundary.

Mr. Hancock: To ask the Secretary of State for Health how many dentists have *(a)* left and *(b)* joined the NHS in the Portsmouth area in each of the last five years. [6004]

Ms Rosie Winterton: The information requested is shown in the table.

General dental service (GDS) and personal dental service (PDS)—number of dentists leaving and joining the national health service in Portsmouth City Teaching Primary Care Trust (PCT) as at December in the specified years

	Complete leavers	*Complete new entrants*
2000	13	11
2001	7	9
2002	4	9
2003	7	7
2004	5	6

Notes:

1. Complete leaver means that the dentist had an open contract in December of the previous year but no GDS or PDS contract in the PCT in December of the specified year.

2. Complete new entrant means that the dentist had an open contract in December of the specified year but no GDS or PDS contract in the PCT in December of the previous year.

3. The figures are based on GDS and PDS contracts.

4. The dentists include principals, assistants and trainees.

Source:

Dental Practice Board.

Mr. Willis: To ask the Secretary of State for Health how many NHS dentists were employed in each primary care trust in North Yorkshire in *(a)* 2002–03, *(b)* 2003–04 and *(c)* 2004–05. [6204]

Ms Rosie Winterton: The information requested is shown in the following table.

General dental services (GDS) and personal dental services (PDS)—number of dentists in North Yorkshire primary care trusts (PCTs) as at 31 March each year

Primary care trust	*2003*	*2004*	*2005*
Craven, Harrogate and Rural District	101	104	106
Hambleton and Richmondshire	50	55	57
Scarborough, Whitby and Ryedale	67	69	87
Selby and York	127	134	143

Notes:

1. The figures given by PCT include all dentists practising in that area. Some dentists may have an open GDS or PDS contract in more than one PCT and therefore they have been counted more than once.

2. Prison contracts have been excluded.

3. The areas have been defined using practice postcodes within the specified areas.

Dental Practice Board

Departmental Relocation

Mr. Gale: To ask the Secretary of State for Health how many of her Department's posts *(a)* have been relocated and *(b)* are under consideration for relocation from London to the deprived areas of the South East. [6269]

Jane Kennedy: No posts from the Department have been relocated to the South East and there are no current plans to do so.

Digital Hearing Aids

Lynne Featherstone: To ask the Secretary of State for Health how many digital hearing aids *(a)* were fitted in 2004 and *(b)* have been fitted in 2005 in (i) NHS hospitals and (ii) private dispensers who are part of the public-private partnership scheme. [6365]

Mr. Byrne: The numbers of digital hearing aids fitted are shown in the table.

Where fitted	*2004*	*2005*
National health service hospitals	270,000	[1]60,000
Private public partnership scheme	14,000	[2]21,000

[1] First quarter only.
[2] To end May.
Source:
Modernising hearing aids services programme.

Drug Rehabilitation

Sarah Teather: To ask the Secretary of State for Health how many people were placed in drug rehabilitation programmes in each London borough since June 2004. [5271]

Jane Kennedy: These data are not yet available. Figures for the period April 2004 to March 2005 will be published in the autumn. Data for the period April 2003 to March 2004 can be found on the National Treatment Agency's website at www.nta.nhs.uk/programme/national/docs/Numbers_in_treatment_by_DAT_2003.04.pdf.

Duchenne Muscular Dystrophy

Lynne Featherstone: To ask the Secretary of State for Health what research she has commissioned on the *(a)* physical causes and *(b)* treatment of Duchenne muscular dystrophy; how much public funding has been spent on such research in each of the last five years; and if she will make a statement. [4794]

Jane Kennedy: I refer the hon. Member to the reply the Under-Secretary with responsibility for care services, my hon. Friend the Member for Birmingham, Hodge Hill (Mr. Byrne) gave on 16 June 2005, *Official Report*, column 637W to the hon. Member for South Cambridgeshire (Mr. Lansley).

Mr. Walker: To ask the Secretary of State for Health if she will take steps to increase the funding for research to find treatments for Duchenne muscular dystrophy; and if she will make a statement. [6062]

Jane Kennedy *[holding answer 21 June 2005]:* The main agency through which the Government support medical research is the Medical Research Council (MRC). It is a long-standing and important principle, held to by successive Administrations, that the Government do not prescribe how individual research councils should distribute their resources between competing priorities. In 2003–04, the MRC spent some £2.4 million on research relevant to Duchenne muscular dystrophy (DMD). In March 2004, the former Secretary of State my right hon. Friend the Member for Hamilton, North and Bellshill (John Reid), announced an award of £1.6 million over three years to fund gene therapy research for DMD. This is pioneering research and it is not possible to know in advance of completion of the preliminary work already funded by the Department whether this approach is likely to be successful. We look forward to receiving progress reports from the DMD research consortium in due course.

Edgware Hospital

Mr. Dismore: To ask the Secretary of State for Health what assessment she made of the requirement for *(a)* key worker housing and *(b)* affordable housing before the agreement was reached to sell surplus land at Edgware hospital. [5834]

Jane Kennedy: The responsibility for disposal of land at Edgware hospital lies with Barnet Primary Care Trust and they have taken into account the necessary factors including the availability of key worker or affordable housing and local planning requirements when doing so.

Mr. Dismore: To ask the Secretary of State for Health if she will make a statement on the availability of digital hearing aids at Edgware hospital. [5832]

Jane Kennedy: Since April 2005, all national health service audiology services in England should be routinely fitting digital hearing aids.

End-of-Life Care

Mr. Burstow: To ask the Secretary of State for Health pursuant to her answer of 6 June 2005, *Official Report*, column 421W, on end-of-life care, what estimate she has made of the amount each primary care trust will receive in each of the next three years; and how many more people she estimates will have access to palliative care. [5601]

Ms Rosie Winterton: The money has been allocated to strategic health authorities, which are working with primary care trusts to determine how they will meet the end of life care needs of the local population. They will jointly determine how the funding is used.

Eye Tests (London)

Sarah Teather: To ask the Secretary of State for Health how many eye tests were conducted in each London health authority in each year since 1997; and how many of them were free to the user. [5281]

Jane Kennedy: The number of all eye tests that were conducted in each London health authority is not collected centrally. However, the total number of sight tests paid for by the national health service in the London strategic health authorities since 1997 is collected centrally and is shown in the table.

Strategic health authority	*1997–98*	*1998–99*	*1999–2000*	*2000–01*	*2001–02*	*2002–03*	*2003–04*
North West London	235,793	223,970	280,634	280,936	286,719	279,395	282,842
North Central London	188,480	180,171	214,174	224,336	215,142	201,480	208,946
North East London	254,802	257,947	299,614	293,362	294,412	283,500	282,725
South East London	189,295	187,477	237,871	248,497	249,720	242,308	240,961

Strategic health authority	1997–98	1998–99	1999–2000	2000–01	2001–02	2002–03	2003–04
South West London	155,014	153,930	206,217	206,706	197,540	198,239	202,808
Total	1,023,384	1,003,495	1,238,510	1,253,837	1,243,533	1,204,923	1,218,282

Note:
1. Sight tests cannot be equated to the numbers of patients. Although most people do not come back for a sight test within the year, some patients suffering from medical conditions are advised to have re-examinations sooner.
2. With effect from 1 April 1999, the Government restored eligibility to everyone aged 60 or over regardless of income.
3. Everyone was eligible for free NHS sight tests until 1989, when eligibility was restricted to children, people on low income and benefits and people suffering from or predisposed to eye disease.

Faith Communities

Mr. Paul Goodman: To ask the Secretary of State for Health what recent consultations have been carried out by her Department with representatives of faith communities; and if she will make a statement. [3229]

Jane Kennedy: The Department consulted with faith communities when producing the national service frameworks for coronary heart disease, diabetes and mental health. The Department and the national health service continue to engage faith communities in public health campaigns such as smoking cessation and organ donation. The Department also maintains close contact with a multi-faith group, which was independently formed by and comprises of representatives of a wide range of faith communities, as part of our commitment to a multi-faith approach to NHS chaplaincy.

Recent departmental consultations with faith communities include the following:

The development of the departmental guidance, "NHS Chaplaincy: Meeting the Religious and Spiritual Needs of Patients and Staff", published in November 2003 and the Department's subsequent review of the central funding arrangements in the summer of 2004. The review was conducted with the participation of the multi-faith group, Hospital Chaplaincies Council, College of Health Care Chaplains, Free Churches Council, South Yorkshire Workforce Development Confederation, Jewish Visitation Committee, Muslim Council of Britain and representatives from the other main world faiths. This report was followed by a further consultation period to allow the faith groups to comment on the recommendations made in the report. The Department and its representatives met regularly with the above groups during this time, culminating with the Department's response, which was published on 23 March 2005.

In November 2003, the Department organised a stakeholder event including representatives of faith communities as part of the national consultation on "Fair for All Personal to You: Choice, Responsiveness and Equity in the NHS". Stakeholders had the opportunity to contribute ideas to choice, responsiveness and equity in the provision of health and social services that are more patient-centred and fair to all.

In the field of mental health, the National Institute for Mental Health in England is collaborating with the Mental Health Foundation on a project exploring the links between spirituality and mental health. The aim of the project is to collate current thinking on the importance of spirituality in mental health, to evaluate the role of faith communities, and to develop and promote good practice.

"Delivering Race Equality in Mental Health Care", the Government's action plan for tackling inequalities in services for black and minority ethnic communities, was published in January 2005 and was based on wide consultation including representatives of faith groups. It states clearly that everyone who experiences mental ill health is entitled to a safe and clinically effective environment that respects their beliefs, culture, faith, spiritual needs, background and values. Local health agencies are expected to form partnerships with diverse faith communities, providing a forum for discussion about mental health servic[illegible]

Fertility Treatment

Mrs. Maria Miller: To ask the Secretary of State for Health how many couples have been funded for *(a)* one, *(b)* two and *(c)* more than two cycles of in vitro fertilisation (IVF) treatment by (i) North Hampshire Primary Care Trust and (ii) primary care trusts in the Hampshire and Isle of Wight Strategic Health Authority area in each year since 2000–01; how many couples she expects will receive funding for (A) one and (B) more than one cycle of IVF treatment in 2005–06 from (1) North Hampshire Primary Care Trust and (2) primary care trusts in the Hampshire and Isle of Wight Strategic Health Authority area; if she will make additional resources available to primary care trusts to support the provision of IVF treatment; and if she will make a statement. [6073]

Caroline Flint *[holding answer 21 June 2005]:* Information about the number of patients receiving national health service infertility treatment is not collected centrally. The primary responsibility for the provision of these services rests with the NHS at local level. The consideration that primary care trusts give to this is part of the range of factors that they take into account, in liaison with local health bodies and patient groups, in deciding their policy on the provision of treatment services for their locality. This policy will, quite rightly, reflect local health needs and priorities.

NHS Financial Deficits (Eastbourne)

Mr. Waterson: To ask the Secretary of State for Health what the financial deficits were *(a)* at the end of the last financial year and *(b)* for the most recent period for which figures are available of (i) the East Sussex hospitals trust, (ii) the Eastbourne Downs primary care trust and (iii) the county healthcare trust. [4965]

Caroline Flint: The latest year for which audited data on the financial position of national health service organisations are available is 2003–04. The financial position for East Sussex hospitals NHS trust, Eastbourne Downs primary care trust (PCT) and East Sussex county healthcare NHS trust is shown in the following tabl[illegible]

£

Trust	Outturn 2003–04 surplus/(deficit)
East Sussex [illegible] NHS trust	(1,787,000)
Eastbourne [illegible] PCT	(3,533,000)
East Sussex county healthcare NHS trust	(1,025,000)

All figures are from the audited summarisation schedules for 2003–04 for the particular bodies.

Food Standards Agency

Paul Flynn: To ask the Secretary of State for Health what percentage of the employees of the Food Standards Agency are *(a)* registered nutritionists and *(b)* registered dieticians. [5291]

Caroline Flint: The Food Standards Agency (FSA) only holds data centrally on the nutrition qualifications of those working in nutrition posts. The FSA employs eight registered public health nutritionists working as nutritionists within its nutrition division. They are registered with the Nutrition Society and represent 16 per cent. of employees in the division. In addition, the FSA's nutrition division includes a further 12 employees with qualifications in nutrition, making a total of 20 nutritionists or 39 per cent. of the division staff. A further registered nutritionist and three others with qualifications in nutrition are employed in the FSA's offices in Scotland, Wales and Northern Ireland. Taken all together, these 24 nutritionists represent three per cent. of FSA employees. The FSA does not employ any registered dieticians as dieticians.

The Scientific Advisory Committee on Nutrition (SACN), an advisory committee of independent experts, also provides advice to the FSA and other Government Agencies and Departments on nutrition matters.

Paul Flynn: To ask the Secretary of State for Health if she will publish the Food Standards Agency Nutrition Strategy. [5296]

Caroline Flint: The Food Standards Agency's role, intentions and targets on eating for health are set out in its strategic plan for 2005–10, "Putting consumers first". This was published last December and a copy is available in the Library.

Food Supplements

Dr. Iddon: To ask the Secretary of State for Health pursuant to the answer of 7 June 2005, *Official Report*, column 527W, on food labelling/supplements, (1) whether she plans to meet representatives of the health food sector prior to the ruling of the European Court of Justice in relation to the Food Supplements Directive; [4906]

(2) when she next expects to meet Commissioner Kyprianou; what plans she has to discuss with the Commissioner the objectives of the United Kingdom for the future regulation of food supplements; and if she will make a statement; [4907]

(3) whether the preservation of consumer choice remains one of her objectives for the future regulation of food supplements. [4908]

Caroline Flint: The Food Standards Agency (FSA) has developed a range of options as part of its strategy in anticipation of the outcome of the ruling from the European Court of Justice (ECJ).

The objectives of the United Kingdom for future regulation of food supplements are dependent on the ruling from the ECJ. When we have the ruling, the Government will consider what further discussions with the European Commissioner are required. Preservation of consumer choice remains one of several objectives in the regulation of food supplements. Other objectives include consumer safety and the promotion of free trade.

General Practice

Miss McIntosh: To ask the Secretary of State for Health if she will make a statement on her policy on the future of general practice. [4232]

Mr. Byrne: The Department have already provided a flexible framework for primary care trusts to plan, commission and develop primary care services that offer improved access and capacity for patients and greater responsiveness to the needs of their communities. Improved contractual arrangements for general practice have been agreed with the medical profession and these will be kept under review. The Department remains committed to ensuring that general practitioners can play a full part in commissioning or providing appropriate health services for their patients.

We are proposing to launch a White Paper which will cover the provision of care outside of a secondary care setting including care in general practice. This will be informed by a major consultation with the public, patients, the professions and staff on the future development of hospital services to meet the needs of patients.

General Practitioner Cover

Mr. Willis: To ask the Secretary of State for Health what minimum standards of cover are laid down by her Department for out-of-hours general practitioner services in England; and how these standards are monitored. [6228]

Mr. Byrne: The Department's aim is to ensure that all patients can be assured of high quality, responsive and consistent out-of-hours services wherever they live. That is why we have put in place the quality requirements, which set minimum standards for the delivery of out-of-hours care. Primary care trusts and strategic health authorities must performance-manage the provider to ensure that these requirements are met.

GM Foods

Mr. Drew: To ask the Secretary of State for Health what representations she has made to the EU Commission on its recent proposals on GM foods. [5189]

Caroline Flint: There have not been any recent European Commission proposals on genetically modified (GM) foods. Regulations controlling GM foods were agreed in 2003 and came into force in April 2004. No representations have been made to the European Commission.

Health Bodies

Mr. Burns: To ask the Secretary of State for Health what discussions she has had to facilitate the merger of the Commission for Social Care Inspection with the Healthcare Commission; what progress is being made; and if she will make a statement. [5898]

Jane Kennedy *[holding answer 22 June 2005]:* I have met the chairs of both the Commission for Social Care Inspection and the Healthcare Commission to discuss the merger and we are now considering how best to take the merger forward in the context of the wider review of regulation in social care and health announced in March.

Mr. Burns: To ask the Secretary of State for Health if she will publish her Department's cost assessment of the merger of the Commission for Social Care Inspection with the Healthcare Commission; and if she will make a statement. [5899]

Jane Kennedy *[holding answer 22 June 2005]:* The merger of the Healthcare Commission and the Commission for Social Care Inspection is expected to generate efficiencies and economies of scale, which contribute to the delivery of savings to be attained across all of the Department's arm's length bodies.

A detailed assessment of costs and savings arising out of the merger will be developed as implementation planning progresses.

Mr. Burns: To ask the Secretary of State for Health whether primary legislation will be required to merge the Commission for Social Care Inspection with the Healthcare Commission; and if she will make a statement. [5900]

Jane Kennedy *[holding answer 22 June 2005]:* Primary legislation will be needed to merge the Commission for Social Care Inspection and the Healthcare Commission.

The Chancellor of the Exchequer has stated that this merger will take place by 2008.

Health Development Agency

Mr. Hands: To ask the Secretary of State for Health how many people were employed by the Health Development Agency in each of the last five years; and in what capacity. [5684]

Jane Kennedy: This information is not held by the Department. The Health Development Agency was an independent body and was abolished on 31 March 2005. On 1 April 2005 its functions were transferred to the National Institute for Health and Clinical Excellence who should be contacted directly for this information.

Health Services (Gloucestershire)

Mr. Drew: To ask the Secretary of State for Health what plans she has to re-organise primary care trusts in Gloucestershire. [6336]

Caroline Flint *[holding answer 23 June 2005]:* There are currently no plans to re-organise primary care trusts (PCTs) in Gloucestershire. PCTs are central to improving the health of their populations by commissioning high quality care. As we implement the next stage of the national health service reforms, including practice based commissioning and streamlining NHS management, PCTs will need to change and develop. These changes need to reflect local circumstances and form part of a structured programme for the NHS as a whole.

Hearing Aids (Hornsey and Wood Green)

Lynne Featherstone: To ask the Secretary of State for Health (1) how many people are on the waiting list for a digital hearing aid in Hornsey and Wood Green; and if she will make a statement; [6364]

(2) how long the waiting time is for patients in Hornsey and Wood Green who need a hearing aid; and if she will make a statement; [6366]

(3) what the cost, including the instrument, overhead charges and staff cost is for the NHS to fit a digital hearing aid for a patient with hearing loss in Hornsey and Wood Green; and if she will make a statement. [6368]

Mr. Byrne: The information requested is not collected centrally.

Hepatitis C

Graham Stringer: To ask the Secretary of State for Health what studies she has undertaken of regional variations in the delivery of treatment for hepatitis C. [3135]

Caroline Flint: The Department has not undertaken any such studies.

Mrs. Dean: To ask the Secretary of State for Health if she will *(a)* mount a hepatitis C awareness campaign and *(b)* develop adequately resourced managed clinical networks to tackle hepatitis C. [4428]

Caroline Flint: The Department launched a hepatitis C awareness campaign for health care professionals in June 2004 and, following that, a public awareness campaign in December 2004; both are on-going.

The "Hepatitis C Strategy for England" proposed the development of managed clinical networks for the assessment and treatment of patients with chronic hepatitis C infection to enable co-ordinated pathways of care. In line with "Shifting the Balance of Power", decisions about networks and their funding are for local determination.

Mr. Laurence Robertson: To ask the Secretary of State for Health if she will undertake research on the incidence of hepatitis C among prisoners *(a)* on reception and *(b)* on discharge. [6143]

Ms Rosie Winterton: We have no current plans to do so.

Herceptin

Mr. Liddell-Grainger: To ask the Secretary of State for Health (1) what representations she has received from Roche relating to the licensing of herceptin for non-terminal breast cancer patients; [4825]

(2) if she will intervene in the licensing process to ensure that herceptin is rapidly approved for NHS treatment in all breast cancer cases. [4837]

Ms Rosie Winterton: Roche has written to the Department to make Ministers aware of recent trial results for herceptin as an adjuvant treatment for early breast cancer. They have informed us that they are working closely with the regulatory authorities about licensing.

The licensing procedure is a confidential matter between the regulatory bodies, European Medicine Agency and United Kingdom Medicines and Healthcare products Regulatory Agency, and the pharmaceutical company concerned. It involves the detailed evaluation of the application and supporting evidence by experts, known as ""rapporteurs". It would not be appropriate for the Department to intervene in this process.

When applying for a licence a company can ask the regulatory bodies for an expedited assessment if there is an urgent need in patients which is unmet by any other treatments. Information regarding the progress of individual applications for license is commercially sensitive and, as such, is not available to the Department.

Mr. Liddell-Grainger: To ask the Secretary of State for Health what estimate she has made of the number of breast cancer patients who would benefit from herceptin but for whom it cannot be prescribed until the product is licensed for non-terminal patients. [4838]

Ms Rosie Winterton: The Department has not yet made any firm estimates of the number of breast cancer patients who would benefit from herceptin but for whom it cannot be prescribed until the product is licensed for non-terminal patients.

The Department has asked Professor Mike Richards, the national cancer director, to consider the issues surrounding the introduction of herceptin for the treatment of early breast cancer across the national health service, including the number of patients who would benefit.

The Department of Health is also urgently considering referring herceptin for the treatment of early breast cancer to National Institute for Health and Clinical Excellence for appraisal.

Mr. Baron: To ask the Secretary of State for Health what steps the Government are taking to support the fast-tracking of National Institute for Health and Clinical Excellence appraisal for the use of Herceptin to treat early-stage breast cancer HER2-positive women. [5821]

Jane Kennedy *[holding answer 20 June 2005]:* Herceptin is not yet licensed for early-stage breast cancer in England and cannot be considered by the National Institute for Health and Clinical Excellence until it receives its license.

Hospital Acquired Infections

Mr. Lansley: To ask the Secretary of State for Health what plans she has to publish data collected under the MRSA bacteraemia mandatory surveillance scheme broken down by *(a)* hospital department and *(b)* specialism when the enhanced surveillance scheme becomes operational. [5590]

Jane Kennedy: An enhanced surveillance system for methicillin resistant staphylococcus aureus (MRSA) bacteraemias is being piloted and this includes recording the department or specialism within the trust where the patient was being treated when the infection was identified. If successful, this system will be rolled out to all acute trusts and these data will form part of our routine publication.

Mr. Lidington: To ask the Secretary of State for Health if she will make a statement on the rules that govern the reporting, collating and publishing of information from hospital trusts about cases of *Clostridium difficile*. [5040]

Jane Kennedy *[holding answer 16 June 2005]:* The Department introduced mandatory surveillance for *Clostridium difficile* associated diarrhoea in 2004. The first results from this will be published in the summer. The Health Protection Agency also has a voluntary reporting system and the data from this is already routinely published on their website.

Mr. Lansley: To ask the Secretary of State for Health when the results of the user survey of the MRSA bacteraemia mandatory surveillance scheme will be published. [5604]

Jane Kennedy: The results of the user survey of the methicillin-resistant Staphylococcus aureus MRSA bacteraemia mandatory surveillance scheme are expected to be published in a peer reviewed journal in the summer.

Mr. Burns: To ask the Secretary of State for Health how many *(a)* cases of MRSA there were and *(b)* deaths were caused by MRSA in care homes in each of the last three years for which figures are available. [5896]

Jane Kennedy *[holding answer 22 June 2005]:* The number of cases of methicillin-resistant Staphylococcus aureus (MRSA) in care homes is not collected centrally.

The number of death certificates mentioning MRSA by place of death is published by the Office for National Statistics (ONS)[1]. The latest year for which figures are available is 2003. Care homes are not separately identified at death registration. The table shows the numbers of deaths which occurred in nursing and residential homes in England and Wales where MRSA was mentioned on the death certificate for the calendar years 2001 to 2003.

[1] Identified using the methodology described in Griffiths C., Lamagni T.L., Crowcroft N.S., Duckworth G. and Rooney C. (2004) Trends in MRSA in England and Wales: analysis of morbidity and mortality data for 1993–2002. Health Statistics Quarterly 21, 15–22.

Number of deaths mentioning MRSA in nursing[1] and residential[2] homes, England and Wales, 2001–2003[3]

	Nursing homes	*Residential homes*	*Nursing and residential homes*
2001	41	12	53
2002	42	11	53
2003	51	19	70

Notes:

[1] Includes national health service and non-NHS nursing homes.

[2] Includes private residential homes and local authority residential homes.

[3] Data are for deaths occurring in each calendar year.

Mr. Lansley: To ask the Secretary of State for Health when she will publish the results of the mandatory surveillance scheme for MRSA bacteraemia for the period between October 2004 and March 2005. [5603]

Jane Kennedy: The results of the full fourth year from the mandatory surveillance scheme, for methicillin-resistant Staphylococcus aureus bacteraemias, were published by individual named trusts on the Department's website on the 23 June 2005 at: www.dh.gov.uk/assetRoot/04/11/40/15/04114015.pdf.

National and regional information will be published on the Health Protection Agency's website.

Hospital Isolation Facilities

Mr. Burstow: To ask the Secretary of State for Health what plans she has to audit the adequacy of isolation facilities within NHS hospitals. [5612]

Jane Kennedy: The Department has no plans to audit isolation facilities within national health service hospitals. It is for the strategic health authorities to ensure appropriate provision based on their local needs.

Hospital Workers (Drug Dependency)

Keith Vaz: To ask the Secretary of State for Health (1) what support is available to hospital workers who become addicted to drugs; [6212]

(2) whether the Government plan to increase the support available to hospital workers who become addicted to drugs. [6213]

Mr. Byrne: The Department issued guidance, "Taking alcohol and other drugs out of the NHS workplace", in February 2001. Earlier this year, the guidance was re-issued as part of the "Management of Health, Safety and Welfare Issues for NHS Staff", by NHS Employers, which provides support to employers.

The guidance recommends that staff who are identified as having a problem, either through self-referral or management action, and who are willing to undertake treatment, should be rehabilitated. The cost of retaining them as useful employees and utilising their knowledge far outweighs the costs of losing them from the national health service.

NHS employers should have policies and support in place to address any problems of drugs and alcohol use among staff. The findings of the recent NHS staff survey report 80 per cent. of staff having access to counselling services.

Hospitals (Shropshire)

Mr. Paterson: To ask the Secretary of State for Health what the *(a)* budget and *(b)* budget deficit of the RJ and AH Orthopaedic hospital, Gobowen has been in each of the last five years. [2244]

Ms Rosie Winterton: The table shows the total income and the retained surplus/(deficit) for the Robert Jones and Agnes Hunt Orthopaedic hospital national health service trust.

£ thousand

	Total income	*Retained surplus/ (Deficit)*
1999–2000	30,447	Breakeven
2000–01	32,077	Breakeven
2001–02	35,554	9
2002–03	38,271	(792)
2003–04	41,968	(2,314)

Sources:
Audited summarisation schedules of the above trust 1999–2000 to 2003–04.

Shropshire and Staffordshire strategic health authority reports that the trust is planning to reduce the deficit during the current financial year based on a range of measures predominantly linked to delivering increased additional activity.

Inspection fees (Charities)

Tim Loughton: To ask the Secretary of State for Health (1) if she will reduce inspection fees levied by the Healthcare Commission on small charities offering medical treatments; [5913]

(2) for what reasons inspection fees charged for the Sussex MS Treatment Centre in Southwick, West Sussex, by the Healthcare Commission are due to rise by the amount planned in the period to 2008; [5914]

(3) what the reasons are for the proposed increase of inspection fees charged by the Healthcare Commission to inspect small charitable medical treatment centres over the next three years. [5916]

Jane Kennedy *[holding answer 20 June 2005]:* Government policy is to move to a position of full cost recovery, where the fee income received by inspectorates, such as the Healthcare Commission, matches the costs incurred in carrying out regulatory work. Our intention is that the Healthcare Commission should achieve a position of full cost recovery by 2008 at the latest. The regulatory fee increase for 2005–06, announced in February 2005, was a step in that direction. No decisions have been taken about the level of fees in future years, though the costs of registration and inspection are still higher than the sum collected by the Healthcare Commission in fees.

When the fee levels for 2005–06 were announced in February, my noble Friend Lord Warner, the then Under Secretary wrote to private and voluntary health care providers telling them of the new fees; he also confirmed that the Department would be working with the Healthcare Commission to develop a timetable for the Commission to take on responsibility for fee setting and that we anticipated that the Commission would assume responsibility from April 2006. I understand that in preparation for taking on that responsibility, the Commission has established a programme to look at costs and the different types of providers it regulates so that when it is given the power to set fees, it will have comprehensive information on which to base its approach. The Commission would also consult publicly on any new fee structure.

Intensive Care Provision

Mike Penning: To ask the Secretary of State for Health what research has been conducted on comparative survival rates in hospitals with and without intensive care on site. [3995]

Jane Kennedy: The Department is not aware of any research specific to the comparative survival rates in hospitals with and without intensive care on site.

IT Contracts

Mr. Godsiff: To ask the Secretary of State for Health what the *(a)* projected cost at the time of tender and *(b)* actual cost at the time of completion was for each IT contract commissioned by her Department in the last five years. [2578]

Jane Kennedy: The information technology contracts commissioned by the Department, with projected costs at the time of tender and the actual cost at time of completion, are shown in the table.

£

Project	*Projected cost*	*Actual cost*
'VISTA'—Oracle financials system	6,130,000	5,633,498
'PAST'—processing of abortion statistics	109,100	137,300
Benchmarking programme	1,168,000	971,000
BT hosting	345,000	306,000
Departmental website hosting	145,000	156,000

The increased actual costs for the PAST project are as a result of additional requirements identified following award of contract. Similarly, the increase in costs for the Departmental website hosting is a reflection of a refining of service and service levels.

Laptop Computers

Lynne Featherstone: To ask the Secretary of State for Health how many laptop computers have been used by *(a)* Ministers, *(b)* special advisers and *(c)* officials in her Department in each year since 1995; how many have been (i) lost and (ii) stolen in that period; what the cost was of the use of laptops in that period; and if she will make a statement. [4126]

Jane Kennedy: No central records are kept of laptops provided specifically to previous Ministers and special advisers. However, current Ministers and special advisers have been assigned a laptop each, where they have a requirement for one. In the last financial year, there were six Ministers, three of whom had a requirement and in this financial year, six Ministers, of whom four have laptops. Three special advisers had laptops last year. Two of the three special advisers this year have been allocated a laptop, with potential for a third adviser also to have one. This reflects the situation since 1995 where laptops have been assigned as required.

At present, there are 2,310 laptops within the Department, which are either stand-alone models or configured to access the Department's computer network remotely. This number encompasses the laptops issued to Ministers, special advisers and officials of the Department. The officials include contractors working on behalf of the Department. Records do not show any differentiation between officials and contractors so cannot be identified separately.

The number of laptops is taken from an asset register, which is updated constantly and provides a snapshot figure. Figures from previous years are therefore not available.

The cost of usage in this context is taken to mean the cost of support and maintenance of the laptops by the information technology service provider (ISP). The structure of the ISP charging model means that it is not possible to demonstrate the costs of usage of individual laptops. Their overall charge includes elements covering several services: help desk, incident and problem resolution (including hardware maintenance), second and third line support, and service management charges. It is not simply a case of aggregating the charge and dividing by the number of laptops to produce a yearly cost.

The numbers of laptops lost or stolen and the cost and usage of laptops within the last 10 years are shown in the table.

Financial year	*Laptops lost/ stolen*	*Total cost of laptops (£)*	*Average cost per laptop (£)*
1995–96	11	17,235.00	1,566.80
1996–97	15	24,165.55	1,610.97
1997–98	23	43,098.68	1,873.85
1998–99	19	40,068.70	2,108.87
1999–2000	18	36,260.35	2,014.46
2000–01	23	46,917.62	2,039.89
2001–02	35	62,275.69	1,779.30
2002–03	26	40,997.26	1,576.81
2003–04	34	51,459.53	1,513.51
2004–05	23	32,783.94	1,425.38
Total	227	395,262.32	

Long-Term Residential Care

Mr. Abbess: To ask the Secretary of State for Health if she will make a statement on the change in the number of available long-term care residential places since 1997. [5928]

Mr. Byrne: According to the latest United Kingdom market survey, published in September 2004 by the independent healthcare analysts Laing and Buisson (LB), the level of spare capacity in the care home sector has remained the same over the last three years, at around 10,000 places, despite a fall in the number of care home places. In March 2004, the national average occupancy rate was 92.1 per cent. in private sector care homes, 90.2 per cent. for care homes with nursing; 92.4 per cent. for other care homes.

The LB report shows a net loss of 10,800 care home places. However, the report shows demand has also fallen by about 10,000.

Our policy is that people should be supported to remain living in their own homes, wherever possible.

Malaria

Sarah Teather: To ask the Secretary of State for Health how many people have been diagnosed with malaria in each London health authority in each of the last three years. [5456]

Jane Kennedy: The information requested is shown in the table.

*Patient counts—malaria defined as ICD-10 codes between *B50-B54 recorded in primary or any of the secondary diagnosis fields, NHS hospitals in England, 2001–02 to 2003–04*

SHA of residence	*2001–02*	*2002–03*	*2003–04*
North West London SHA	179	217	201
North Central London SHA	196	158	184
North East London SHA	308	261	284
South East London SHA	284	309	285
South West London SHA	123	105	114
Total London SHAs	1,090	1,050	1,068

Notes:

Malaria:

Malaria is defined by a primary or secondary diagnosis of:

B50 Plasmodium falciparum malaria

B51 Plasmodium vivax malaria

B52 Plasmodium malariae malaria

B53 Other parasitologically confirmed malaria

B54 Unspecified malaria

Patient counts:

Patient counts are based on the unique patient identifier HESID. This identifier is derived based on patient's date of birth, postcode, sex, local patient identifier and NHS number, using an agreed algorithm. Where data are incomplete, HESID might erroneously link episodes or fail to recognise episodes for the same patient. Care is therefore needed, especially where duplicate records persist in the data. The patient count cannot be summed across a table where patients may have episodes in more than one cell.

Diagnosis (Primary Diagnosis):

The primary diagnosis is the first of up to 14 (7 prior to 2002–03) diagnosis fields in the Hospital Episode Statistics (HES) data set and provides the main reason why the patient was in hospital.

Secondary Diagnoses:

As well as the primary diagnosis, there are up to 13 (6 prior to 2002–03) secondary diagnosis fields in Hospital Episode Statistics (HES) that show other diagnoses relevant to the episode of care.

Ungrossed Data:

Figures have not been adjusted for shortfalls in data (ie the data are ungrossed).

Source:

Hospital Episode Statistics (HES), Department of Health

Maternity Services

Mr. Gerrard: To ask the Secretary of State for Health what guidance she has issued on the provision of maternity services, including HIV treatment to prevent mother to child transmission, to women who do not have leave to remain in the UK. [6111]

Mr. Byrne: Guidance on how to handle the provision of maternity services to women without leave to remain in the United Kingdom is contained in the document, "Implementing the Overseas Visitors Hospital Charging Regulations: Guidance for NHS Trust Hospitals in England", issued to all trusts in April 2004.

In response to a recommendation from the Health Select Committee in its recent report, "New Developments in Sexual Health and HIV/AIDS Policy", the existing guidance was re-issued to trust overseas visitors managers on 16 May 2005. This confirmed that, because of the seriousness of potential risks to mother and baby, maternity services should be treated as immediately necessary treatment and provided without delay. This could include HIV treatment if considered clinically appropriate. However, if the patient is an overseas visitor who is not eligible to receive national health service hospital treatment free of charge, then they should be charged for any treatment provided.

Mr. Dismore: To ask the Secretary of State for Health if she will make a statement on the performance of maternity services at Northwick Park hospital. [6180]

Jane Kennedy: The North West London Hospitals National Health Service Trust is actively addressing issues at the maternity unit at Northwick Park hospital. Last year the trust, Brent Primary Care Trust (PCT) and Harrow PCT invited the Healthcare Commission to help the Trust with improvements. In April 2005, the Department, on the recommendation of the Healthcare Commission, introduced special measures at the unit to provide additional resource and external clinical support to accelerate the improvement programme.

The trust welcomed these measures and has been progressing with its action plan, which is based on the draft Healthcare Commission report and the requirements of the special measures. While there is further work to be done, including completing the refurbishment of the unit in December 2005, the trust and North West London Strategic Health Authority are confident that good progress is being made.

Medical Staff

Andrew Rosindell: To ask the Secretary of State for Health what steps the Government are taking to ensure *(a)* doctors and *(b)* dentists are not intoxicated while at work; and what procedure is followed if a doctor or dentist is found to be intoxicated while on duty. [5399]

Mr. Byrne: Every national health service employer has a code of conduct or staff rules, which sets out acceptable standards of conduct and behaviour expected of all its employees. Breaches of these rules are considered to be misconduct. Misconduct can cover a wide range of behaviour and be classified in a number of ways.

The Department issued guidance, "Taking alcohol and other drugs out of the NHS workplace" in February 2001. Earlier this year the guidance was re-issued as part of the "Management of Health, Safety and Welfare Issues for NHS Staff" by NHS Employers, who provide support to employers.

The guidance recommends that staff who are identified as having a problem, either through self-referral or management action, and who are willing to undertake treatment, should be rehabilitated. The cost of retaining them as useful employees and utilising their knowledge far outweighs the costs of losing them from the NHS.

NHS employers should have policies and support in place to address any problems of drugs and alcohol use among staff. The findings of the recent NHS staff survey report showed 80 per cent. of staff having access to counselling services.

Mr. Lansley: To ask the Secretary of State for Health what plans she has for support for doctors and other clinical staff who may be abusing drugs or alcohol. [5599]

Mr. Byrne: I refer the hon. Member to the reply I gave to my hon. Friend, the Member for Leicester, East (Keith Vaz), today.

Mental Capacity Act 2005

Mr. Burstow: To ask the Secretary of State for Health what role the *(a)* Healthcare Commission and *(b)* Commission for Social Care Inspection will play in monitoring compliance with the codes of practice of the Mental Capacity Act 2005. [4809]

Mr. Byrne: The Healthcare Commission works to improve standards in both national health service and independent sector organisations and regulates the independent healthcare sector through registration and inspection. The Commission for Social Care Inspection works to improve standards in social care provision and regulates services relating to both adults and to children, through registration and inspection.

It will be important for health and social care statutory agencies to take account of the provisions of the Mental Capacity Act in their work once the Act is implemented, in order to ensure they are performing effectively and, in certain circumstances, lawfully.

The Commissions will take this into account in their assessment of standards and performance by the statutory services they inspect.

Officials involved in implementing the Mental Capacity Act have held early discussions with both Commissions about the implications of the Act for their operations, and will continue to do so as implementation proceeds.

Mental Health Wards (Safety)

Tim Loughton: To ask the Secretary of State for Health (1) what guidance her Department provides to mental health wards to improve *(a)* staff, *(b)* patient and *(c)* visitor safety; [5993]

(2) what plans she has to improve the safety of *(a)* patients and *(b)* staff within mental health wards. [5998]

Ms Rosie Winterton: The National Institute for Mental Health in England (NIMHE) published guidance on "Developing Positive Practice to Support the Safe and Therapeutic Management of Aggression and Violence in Mental Health In-patient Settings" in February 2004.

The Department also commissioned the National Institute for Health and Clinical Excellence to develop guidelines on "The short-term management of disturbed or violent behaviour in in-patient psychiatric settings and emergency departments", which was published in February 2005.

In 2004, a national advisory and consultancy service was jointly established by NIMHE and the National Patient Safety Agency to support frontline services and a cross-government group is developing proposals for national accreditation and regulation of trainers and training programmes on the recognition, prevention and management of violence.

The NHS Security Management Service, along with NIMHE, has developed a training syllabus on non-physical intervention techniques for staff working in the mental health and learning disability environment, which, following trials in the summer, is envisaged to be implemented throughout the NHS. This syllabus includes de-escalation techniques and cultural awareness sessions with the aim of giving staff the skills required to be able to recognise, prevent, de-escalate and manage potentially violent situations.

The Department has issued additional directions and guidance regarding the safety and security at Ashworth, Broadmoor and Rampton Hospitals, which can be found on the Department's website.

Tim Loughton: To ask the Secretary of State for Health how many staff members were attacked with weapons in mental health wards in *(a)* 2002, *(b)* 2003 and *(c)* 2004. [5994]

Jane Kennedy: Information on the numbers of staff that have been attacked with weapons in mental health wards in 2002, 2003 or 2004 has not been collected centrally.

In April 2003, the NHS Security Management Service (NHS SMS) was created and assumed responsibility for tackling violence against national health service staff.

In November 2003, a comprehensive range of measures were introduced to tackle incidences of violence against NHS staff, both proactively and reactively. The NHS SMS has begun a programme of work to identify the true nature, scale and extent of the problem of violence against NHS staff. Accurate information concerning physical assaults against NHS staff is expected to be available from summer 2005.

Tim Loughton: To ask the Secretary of State for Health what her Department's policy is on whether every mental health ward in England should have access to a psychiatric intensive care unit. [5996]

Ms Rosie Winterton: As stated in the national service framework for mental health (1999), each local health and social care community needs to establish a balance of supported places, hospital beds, and home treatment, which should encompass intensive care beds for people needing a short period of intensive intervention and observation.

Tim Loughton: To ask the Secretary of State for Health what changes the Department plans to make to the *(a)* recruitment of agency staff in mental health wards and *(b)* provision of entertainment and activities in mental health wards, following the publication of the Healthcare Commission's National Audit on Violence in mental health and learning disability services. [6030]

Ms Rosie Winterton: The Department will continue to implement the national mental health workforce strategy (2004) in order to increase the numbers of staff working in mental health settings and develop their skills further. We will also continue to encourage service providers to widen the skills mix by supplementing the existing professional roles with new ones such as support, time and recovery workers. The Department will continue to support initiatives to improve the quality of patient care and performance by investing in national health service staff and setting common standards of quality and governance; and achieve better value for money and control over temporary staffing costs through the use of NHS professionals and agency framework agreements. The ongoing review of mental

health nursing is also considering the use of agency nursing staff and a report is expected to be published next year.

The national service framework for mental health (1999) and the mental health policy implementation guide on adult acute inpatient care (2002) require a flexible range of appropriate therapeutic and recreational resources and activities to be available in mental health inpatient settings. The latter requires the creation and maintenance of a therapeutic activity milieu to include evening and weekend activities and opportunities both on and off the ward which may include educational, social, daily living, artistic, recreational and leisure activities. The national minimum standards for general adult services in psychiatric intensive care units and low secure environments (2002) requires all patients to have access to fresh air and secure external space and space for regular exercise with appropriate supervision.

MRI Scans (Lancashire)

Mr. Hoyle: To ask the Secretary of State for Health what the waiting time is for MRI scans in Lancashire. [6307]

Mr. Byrne: This information is not collected centrally.

MRSA

Lynne Featherstone: To ask the Secretary of State for Health how much Government funding has been allocated to research into MRSA in each of the last five years; and if she will make a statement. [2889]

Jane Kennedy: The main agency through which the Government support medical and clinical research is the Medical Research Council (MRC). The MRC is an independent body, funded by the Department of Trade and Industry via the Office of Science and Technology.

The MRC does not currently fund meticillin resistant "Staphylococcus" aureus (MRSA) research and has not done so over the last five years. The MRC is, however, supporting a considerable programme of underpinning research that may lead to a greater understanding of MRSA and contribute to practical solutions in the future.

The Department's national research programme spend on projects related to MRSA from 2001–02 to 2005–06 is shown in the table.

	Amount (£ thousand)
2001–02	23
2002–03	10
2003–04	267
2004–05	439
2005–06[1]	[2]504

[1] The allocation for 2005–06 includes part of the cost of a three-year project designed to evaluate the clinical value of rapid diagnostic testing for MRSA that is due to start in July. The project is being funded from the £3 million provided for a research programme on healthcare associated infections that was announced at the time of the publication of the Department's report "Winning Ways—working together to reduce healthcare associated infection in England".
[2] Forecast expenditure.

Over 75 per cent. of the Department's total expenditure on health research is devolved to and managed by NHS organisations. Details of individual projects, including a number concerned with MRSA, can be found on the national research register at www.dh.gov.uk/research.

MS Treatment

Tim Loughton: To ask the Secretary of State for Health what funding her Department provides to charitable MS treatment facilities in *(a)* Sussex and *(b)* England. [5905]

Mr. Byrne *[holding answer 20 June 2005]:* We provide funding for national multiple sclerosis charities. Individual multiple sclerosis treatment facilities receive funding from the fees they charge on NHS patient referrals.

National Blood Service

Mr. Rob Wilson: To ask the Secretary of State for Health what steps are being made to increase the availability of *(a)* B negative, *(b)* AB positive and *(c)* AB negative blood groups in the National Blood Service blood banks. [5388]

Caroline Flint: The National Blood Service (NBS) is continually working to maintain blood stocks, through a range of marketing and communication techniques. For example, on 14 June 2005, the NBS hosted World Blood Donor Day at eight events across the country, which celebrated the lives that have been saved by the generous donation of blood from donors. World Blood Donor Day was an opportunity to thank blood donors and raise awareness of the constant need for blood and blood donors.

NBS blood stocks are currently good. The table shows NBS's red cell stocks as at 17 June 2005.

Red cell stocks	*Number of validated units*	*Equivalent number of days supply*
Total red blood cell stocks	47,101	7.39
B negative red blood cell stocks	528	4.15
AB positive red blood cell stocks	1,332	10.11
AB negative red blood cell stocks	165	3.93

In addition to NBS stocks, each hospital blood bank will keep an appropriate stock of blood.

National Institute for Health and Clinical Excellence

Mr. Hands: To ask the Secretary of State for Health (1) how many people were employed by the National Institute for Health and Clinical Excellence in each of the last five years; and in what capacity; [5685]

(2) how many people are employed by the National Institute for Health and Clinical Excellence; and in what capacity. [5688]

Jane Kennedy: This information is not held by the Department.

Mr. Hands: To ask the Secretary of State for Health what guidance her Department issues to NHS trusts relating to the provision of treatment *(a)* prior to and *(b)* during a National Institute for Clinical Excellence appraisal. [4835]

Jane Kennedy: In 1999, the Department issued Health Service Circular 1999/176, which asks national health service bodies to continue with local arrangements for the managed introduction of new technologies where guidance from the National Institute for Health and Clinical Excellence has not yet been issued. These arrangements should include an assessment of the available evidence.

NHS Direct

Mr. Burstow: To ask the Secretary of State for Health how many calls to NHS Direct about access to an NHS dentist there were in each month since January 2004 in England, broken down by *(a)* emergency, *(b)* urgent, *(c)* routine and *(d)* other calls. [5175]

Ms Rosie Winterton: Calls to NHS Direct about access to a national health service dentist in each month since January 2004 by emergency, urgent, routine and other are shown in the table.

NHS Direct dental calls by type for January 2004 to April 2005

	Total	Emergency	Urgent	Routine[1]	Other (not known)
January 2004	19,702	1,462	3,613	12,726	1,901
February 2004	18,258	1,575	3,653	11,312	1,718
March 2004	19,330	1,392	3,503	12,506	1,929
April 2004	16,383	1,395	2,680	10,559	1,749
May 2004	16,202	1,762	3,949	8,701	1,790
October 2004	23,850	2,649	4,431	14,426	2,344
November 2004	23,117	2,158	4,059	14,035	2,865
December 2004	19,550	2,603	4,602	10,206	2,139
January 2005	20,440	2,020	3,215	12,734	2,471
February 2005	17,224	1,619	2,342	11,584	1,679
March 2005	17,547	1,725	2,739	11,318	1,765
April 2005	19,753	1,845	2,890	12,844	2,174

[1] Routine includes calls requesting routine information only about where to find a dentist and calls requesting routine dental health advice and information about where to find a dentist.

Note:
Data for June to September 2004 is not available.

NHS Staff Assaults

Mr. Clappison: To ask the Secretary of State for Health how many *(a)* nurses and *(b)* other NHS employees have been the victims of offences of violence at work in each of the last 10 years. [4943]

Jane Kennedy: Information on assaults against national health service staff by occupational grouping has not been collated centrally.

In April 2003, the NHS security management service was created and assumed responsibility for the issue of tackling violence against NHS staff. In November 2003, a new national reporting system for physical assaults against NHS staff was introduced. Information concerning physical assaults against NHS staff is expected to be available from summer 2005.

Mr. Burns: To ask the Secretary of State for Health how many *(a)* doctors, *(b)* nurses, *(c)* consultants and *(d)* auxiliary staff have been victims of violence in the Mid-Essex Hospital Trust area in each of the last 10 years. [6600]

Jane Kennedy *[holding answer 23 June 2005]:* The incidence of violence against staff at Mid-Essex Hospital is not available in the format requested or for the past 10 years.

However, the table shows figures from the violence, accidents and harassment survey (VAH) for 2000–01, 2001–02 and 2002–03. These are figures for Mid-Essex Hospital National Health Service Trust as a whole and cannot be broken down by staff groups. The VAH survey is no longer collected so these figures are the latest available.

Number of reported violent incidents against NHS staff in the Mid-Essex Hospital Trust for each specified period

Mid-Essex Hospital Trust (RQ8)	Number
2000–01	94
2001–02	72
2002–03	171

Notes:
Figures are for financial years 1 April to 31 March
Source:
Survey of Violence, Accidents and Harassments in the NHS

Steve Webb: To ask the Secretary of State for Health what progress has been made on meeting targets set for reducing incidents of violence against NHS staff. [5783]

Jane Kennedy: In November 2003, a comprehensive range of measures were introduced to tackle incidences of violence against national health service staff, both proactively and reactively. The NHS Security Management Service has begun a programme of work to identify the true nature, scale and extent of the problem of violence against NHS staff. Once this work is completed meaningful and achievable targets for delivering a secure environment for NHS staff will be set.

Nutrition

Paul Flynn: To ask the Secretary of State for Health what advice and guidance her Department has issued on core education and training in respect of nutrition and malnutrition for *(a)* health and social care professionals and *(b)* health and social care workers involved in putting the new Unified Assessment procedures into practice at bands two and three of Agenda for Change or equivalent. [5231]

Mr. Byrne: For health and social care professionals it is the responsibility of the appropriate regulatory bodies to set standards for the pre-registration training of doctors, nurses, social workers and other healthcare professionals and approve the education institutions that provide the training and determine the curricula.

Post-registration training needs for national health service staff are determined against local NHS priorities, through appraisal processes and training needs analyses informed by local delivery plans and the needs of the service. The post-qualification framework for social workers has been reviewed by the General

Social Care Council and new arrangements for post qualification awards will come into force in September 2007.

For health and social care workers national occupational standards set out the skills, knowledge and values required and are used as benchmarks for national vocational qualifications. Joint health and social care national occupational standards contain specific standards on meeting nutritional needs.

It is the responsibility of social care service providers and NHS trusts to ensure that their employees are suitably qualified and competent.

Paul Flynn: To ask the Secretary of State for Health what standards on meeting nutritional needs are included within Health and Social Care National Occupational Standards; and whether these standards are evidence-based. [5301]

Ms Rosie Winterton: There are currently no evidence-based standards on meeting nutritional needs included within health and social care national occupational standards. However, the Department is developing a series of evidence and consensus-based guidelines relevant to occupational health practice as part of the redevelopment of NHS Plus as outlined in chapter seven, "Work and Health" of the White Paper, Choosing Health—Making healthy choices easier. The aim of this is both to increase the quality of NHS Plus services and to develop occupational health services in the national health service. These guidelines are collated on the evidence-based guideline section of the NHS plus website at: www.nhsplus.nhs.uk.

In addition, the new National Institute for Health and Clinical Excellence (NICE), in a joint collaboration between the Centre for Clinical Practice and the Centre for Public Health Excellence, formerly the Health Development Agency, is developing a clinical guideline for the prevention, identification, assessment and management of overweight and obesity in adults and children. This is expected to be issued in February 2007.

Orthopaedic Prosthesis

Anne Main: To ask the Secretary of State for Health what assessment she has made of the likely effect the standardisation of orthopaedic prosthesis will have on *(a)* the quality of life of affected patients in the West Hertfordshire Hospital and *(b)* patient choice; and if she will make a statement. [5101]

Ms Rosie Winterton: There are no plans for the standardisation of orthopaedic prosthesis. However, the National Joint Registry (NJS) was established in April 2003 to collect information on total hip and knee replacement operations from hospitals in England and Wales. Both the national health service and independent health care sector are included. The NJR will enable surgeons, in discussion with patients, to agree which is the most appropriate prosthetic for individual patients needs.

NJR participation is not mandatory although trusts are exhorted to comply. The level of compliance is improving and currently stands at 98.7 per cent. in both the NHS and independent hospitals. The NJR steering group became an advisory non-departmental public body (ANDPB) in January 2005. The NJR steering group is reviewing the data collected to ensure the NJR can become a powerful clinical audit tool.

We are committed to giving patients more choice and control over their health care and services wherever possible. However, it is important to ensure that patients are only offered clinically appropriate choices. The NJR will enable surgeons to use the most appropriate orthopaedic prosthetic for specific patients needs, thus improving the quality of life for the patient post operatively.

Outpatient Waiting Times (Lancashire)

Mr. Hoyle: To ask the Secretary of State for Health what the average wait is for an out-patient appointment in Lancashire. [6310]

Mr. Byrne: Information for primary care trusts in Lancashire is shown in the table.

Primary care trust	*Median wait (weeks)*
Blackburn with Darwen	7.00
Morecambe Bay	6.99
Chorley and South Ribble	7.13
West Lancashire	7.69
Hyndburn and Ribble Valley	7.11
Burnley Pendle and Rossendale	7.66
Preston	6.93
Fylde	6.86
Wyre	6.76
Blackpool	7.55

Note:
Out-patient commissioner data

QM08R

Palliative Care

Miss Widdecombe: To ask the Secretary of State for Health (1) how many palliative care beds are included in the total allocation of high dependency beds in the NHS; [6838]

(2) what the average daily cost per palliative care bed was in the last period for which figures are available; [6839]

(3) how many palliative care beds for terminally ill patients there are in the NHS in England; [6840]

(4) what the total cost for patients in palliative care beds in England was in the most recent year for which figures are available; and what percentage that represents of the overall national budget for NHS hospital beds for that year. [6845]

Ms Rosie Winterton *[holding answers 23 June 2005]:* We do not routinely collect the data requested. Information in the Hospice Directory 2005, published by Hospice Information, states that there are 488 beds in national health service palliative care adult inpatient units.

There were 1,426 high dependency beds in the NHS on 13 January 2005—the latest census date. We do not collect data on how many of these are palliative care beds.

Patient Records

Mr. Paul Goodman: To ask the Secretary of State for Health whether Nationwide Clearing Service records pertaining to individual patients are available to hon. Members. [6842]

Mr. Byrne *[holding answer 23 June 2005]:* The Nationwide Clearing Service (NWCS) provides a means of exchanging and processing data from national health service trusts and primary care trusts to the Department to support national performance management and strategic service planning.

Access to its database is strictly controlled and is available only to approved NHS organisations for individually specified purposes, in compliance with the requirements of the Data Protection Act 1998.

Physiotherapists

Greg Clark: To ask the Secretary of State for Health how many new *(a)* junior and *(b)* senior physiotherapy posts have been created in the last five years in the NHS. [6544]

Mr. Byrne: Information collected by the Department does not break down physiotherapists by grade. Information for the last five years on qualified physiotherapists employed in the national health service is shown in the following table.

NHS hospital and community health services (HCHS): qualified physiotherapists employed in the NHS as at 30 September each year

	full-time equivalents	*headcount*
1997	11,348	14,243
1998	11,709	14,699
1999	12,047	15,070
2000	12,515	15,608
2001	12,992	16,212
2002	13,586	16,885
2003	14,455	17,922
2004	15,564	19,139

Source:
Department of Health Non-Medical Workforce Census

Steve Webb: To ask the Secretary of State for Health (1) how many senior physiotherapists are in post in the NHS in England; and what the establishment figure is; [6560]

(2) what plans she has to increase the number of junior physiotherapy posts in the NHS in England; and if she will make a statement; [6561]

(3) what assessment she has made of the ability of physiotherapy graduates to obtain employment in the NHS in England; and if she will make a statement. [6571]

Mr. Byrne: Information collected by the Department does not break down physiotherapists by grade. As at September 2004, there were 19,139 physiotherapists employed in the national health service, which represents an increase of 4,896 or 34 per cent. since 1997.

The Department is working closely with the Chartered Society of Physiotherapy, the NHS work force review team and NHS organisations to help junior physiotherapists to find first posts of employment. As a result, of this collaborative work, there is an action plan in place to ensure local managers have access to a range of strategies across recruitment, commissioning and skill mix. It is the responsibility of local NHS employers and strategic health authorities to ensure there are sufficient numbers of physiotherapists to meet service needs.

Primary Care Trust Populations (Lancashire)

Mr. Hoyle: To ask the Secretary of State for Health what the population is of each primary care trust area in Lancashire. [6305]

Mr. Byrne: The information requested is shown in the table.

Cumbria and Lancashire Strategic Health Authority—Lancashire primary care trusts	*Population*
Blackburn with Darwen	149,406
Blackpool	140,654
Burnley, Pendle and Rossedale	243,879
Chorley and South Ribble	247,906
Fylde	67,356
Hyndburn and Ribble Valley	111,522
Morecambe Bay	307,070
Preston	135,222
West Lancashire	107,146
Wyre	119,530
Total	1,588,691

The data were collected in April 2004 for general practitioner-relevant populations as at April 2003. The data have been constrained to the Office for National Statistics 2003 mid-year population estimates, based on the 2001 census, but do not include armed forces and some prisoners.

Prisons

Mr. Laxton: To ask the Secretary of State for Health if she will place in the Library a copy of the speech given by Dr. Mary Piper on 28 June 2004 at the Institute of Physics on the health needs of prisoners; and what the source was for the research referred to in the speech on rates of Hepatitis C in prison cohorts. [5197]

Ms Rosie Winterton: No transcript exists of Dr. Piper's speech but copies of the slides that accompanied it will be placed in the Library. The research to which Dr. Piper referred was reported in "The Incidence of Hepatitis C Virus Infection and Associated Risk Factors among Scottish Prison Inmates: A Cohort Study" J.K. Champion, A. Taylor, S. Hutchinson, S. Cameron, J. McMenamin, A. Mitchell and D. Goldberg. American Journal of Epidemiology 2004 159: 514–519.

Mr. Kidney: To ask the Secretary of State for Health what progress has been made in transferring responsibility for the provision of health care services in prisons to primary care trusts. [3708]

Ms Rosie Winterton: On 1 April 2003, funding responsibility for primary health care services in publicly run prisons in England was transferred from the Home Office to the Department. From 1 April 2004, 18 national health service primary care trusts (PCTs) assumed commissioning responsibility for the primary health care services in 34 publicly run prison

establishments in England. From 1 April 2005, PCTs assumed that responsibility for all but three of the remaining publicly run prison establishments in Leicester, Wellingborough and Wormwood Scrubs.

It has been decided not to change the arrangements for commissioning primary health services in the contracted prisons for the present. Contractors continue to have responsibility for the provision of primary care services in their establishments under terms specified in their contracts with the Home Office. However, a full strategic review is being conducted of the health care elements of the contracts to run privately managed prisons to ensure that they bind contractors robustly into the principle of equivalence with the NHS. Work is also under way with the Healthcare Commission to seek to develop a system of inspection of health services in privately managed prisons that is equivalent to that in the NHS.

Psoriatic Arthritis

Mr. Bruce George: To ask the Secretary of State for Health what proportion of the funding announced on 11 May to increase patient centred research will be directed to psoriatic arthritis. [5983]

Mr. Byrne: Decisions on the allocation of the United Kingdom clinical research collaboration funding for experimental medicine will be based on the merits of the individual applications received from researchers.

Report on Social Value Judgments

John Hemming: To ask the Secretary of State for Health if she will make a statement on recommendations 6, 7 and 14 of the National Institute for Health and Clinical Excellence Report on Social Value Judgments: Guidelines for the Institute and its Advisory Bodies. [4179]

Jane Kennedy: The publication in question is a consultation document issued by the National Institute for Health and Clinical Excellence. The consultation closes on 30 June.

Respiratory Complaints

Sarah Teather: To ask the Secretary of State for Health how many people in each London health authority have been admitted to hospital with respiratory problems resulting from pollution in each of the last five years. [6403]

Jane Kennedy: Figures for diagnosis of pollution-related conditions are not routinely recorded.

Sexual Health Services

Harry Cohen: To ask the Secretary of State for Health if she will make a statement on the progress of the review of sexual health services; what grants have been agreed to help relevant patients in *(a)* Redbridge and *(b)* Waltham Forest; and if she will make a statement. [5959]

Jane Kennedy: The two-year national review of genito-urinary medicine (GUM) services began in autumn 2004 and is proceeding according to a roll-out plan, which will ensure that all GUM clinics will be visited. The review is being undertaken on behalf of the Department by the Medical Foundation for AIDS and Sexual Health, who are working closely with sexual health leads in strategic health authorities. Visits to services have commenced in nine strategic health authority areas to date, including services commissioned by Redbridge and Waltham Forest Primary Care Trusts (PCTs).

£300 million new investment over three years has been committed nationally through the public health White Paper to improve sexual health, including £130 million capital and revenue to modernise services. This investment will be part of mainstream allocations and PCTs are responsible for deciding how this money will be used locally. In addition, the Department has provided funding to PCTs to develop services in areas where there is little or no sexual health provision. This includes Waltham Forest, where additional investment has been provided to establish six new clinics covering both specialist and community settings.

Smoking

Jeff Ennis: To ask the Secretary of State for Health if she will consult on proposals to raise the age of sale for tobacco from 16 years to 18 years as part of the consultation process on the smoke free elements of the Health Improvement and Protection Bill. [6642]

Caroline Flint *[holding answer 23 June 2005]:* Raising the age of sale for tobacco from 16 years to 18 years is opposed by the health lobby and anti-smoking groups like ASH. There is also a lack of good evidence that increasing the age at which tobacco is legally sold has any impact on smoking rates among young people.

For that reason, we have concentrated our effort on ensuring that the existing age limits are effectively enforced. The Choosing Health White Paper set out proposals as follows:

> "we propose that legislation be brought forward to create new powers to ban retailers from selling tobacco products, on a temporary basis, if they repeatedly flout the law. This complements the work already under way to improve proof of age schemes. We intend to support this measure by looking at higher fines and updated guidance for magistrates, along with education for retailers on better compliance with underage sales law. Before introducing these measures, we will consult with local authorities, the retail industry and other key stakeholders".

South Worcestershire Primary Care Trust

Mr. Michael Foster: To ask the Secretary of State for Health what change in funding from the 2005–06 baseline has been determined for South Worcestershire Primary Care Trust for 2006 to 2008. [3965]

Ms Rosie Winterton: South Worcestershire Primary Care Trust will receive allocations of £313.5 million in 2006–07 and £344.3 million in 2007–08. These represent a cash increase of £57.1 million or 19.9 per cent. over the two years.

Stakeholder Consultations (Continuing Care)

Mr. Lansley: To ask the Secretary of State for Health pursuant to the answer of 9 June 2005, *Official Report*, column 627W, on continuing care (1) what meetings *(a)* Ministers and *(b)* officials have had with

stakeholders in order to produce a national framework for assessment for continuing care; what topics were discussed at each meeting; on what dates these meetings took place; which stakeholders were present; and what further such meetings she plans to hold with stakeholders; [5788]

(2) what representations she has received from organisations on the development of a national framework for the assessment for continuing care. [5789]

Mr. Byrne: Work to produce the national framework for continuing care is on-going, as is stakeholder communication, engagement and involvement.

My hon. Friend the Member for Thanet South (Dr. Ladyman), the former Under-Secretary, met with the ombudsman specifically to discuss continuing care, and the subject will have come up in numerous visits and meetings. I have met with local authority representatives and also with the Social Care Institute for Excellence, the General Social Care Council and Turning Point, amongst others, when the subject of continuing care was raised.

Officials have studied the evidence given to the recent Health Select Committee inquiry on continuing care. Regular meetings take place with staff from the ombudsman's office to ensure their full participation and involvement in the development of the national framework.

Officials held three national meetings on continuing care, on 17 December, 19 January and 4 March, to start to scope the issues that the national framework is to address and gather suggestions for ways forward. These meetings were attended by representatives from the ombudsman's office and representatives from strategic health authorities, primary care trusts and local authorities, including representatives from the Local Government Association and the Association of Directors of Social Services.

Meetings and/or discussions have also occurred with numerous organisations, members of the public, researchers and academics, including the Royal College of Nursing, Help the Aged, Age Concern, the Alzheimer's Society and the Long Term Medical Conditions Alliance. A stakeholder event is planned in July to share progress and to gain contributions in particular from organisations with patient/service user and carer networks and professional organisations.

An electronic discussion forum has been established for regular communication and through which staff from across the health and social care community and wider stakeholder groups can contribute to specific parts of the framework.

Stoke Mandeville Hospital

David T.C. Davies: To ask the Secretary of State for Health how many beds in Stoke Mandeville Hospital are available for patients with severe neck trauma; and whether beds are reserved for local patients. [6592]

Caroline Flint *[holding answer 23 June 2005]:* The information is not available in the format requested. Stoke Mandeville Hospital situated in Aylesbury, is part of the Buckinghamshire Hospitals National Health Service Trust in the Thames Valley Strategic Health Authority area. Data are only available on the total number of beds at the hospital trust and not by this speciality.

The Stoke Mandeville Hospital is a national centre for spinal injuries and burns, therefore it accepts patients from anywhere in the United Kingdom as well as overseas patients who are diagnosed as suffering with severe neck trauma. Beds are not reserved for local patients.

Tooth Decay

David Davis: To ask the Secretary of State for Health how many *(a)* children and *(b)* adults in East Yorkshire suffer from (i) tooth decay and (ii) gum disease; and if she will make a statement. [3597]

Ms Rosie Winterton: The information requested is not collected centrally. The National Child Dental Health Survey 2003 reported that from a sample of five-year-olds within East Yorkshire Primary Care Trust, 31.3 per cent. had active decay when examined. There is no localised data on gum disease in children.

Traditional Herbal Medicinal Products Directive

Dr. Iddon: To ask the Secretary of State for Health when she expects the Medicines and Healthcare products Regulatory Agency to publish the updated version of the regulatory impact assessment of the Traditional Herbal Medicinal Products Directive. [4909]

Jane Kennedy: The Medicines and Healthcare products Regulatory Agency published an updated partial regulatory impact assessment on 16 June. The assessment forms part of the public consultation (MLX 325) on the implementation of the Directive on Traditional Herbal Medicinal Products (Directive 2004/24/EC).

Trans Fats

Dr. Kumar: To ask the Secretary of State for Health (1) what research she has *(a)* commissioned and *(b)* evaluated on trans fats; [5850]

(2) what measures are being taken to advise the public on consumption of trans fats. [5851]

Caroline Flint: The Government are concerned about the possible health effects, in particular on coronary health, from consuming certain fats. As part of delivering commitments in the Choosing Health White Paper of last November, the Government are developing a strategy with stakeholders for tackling intakes of certain fats. There are currently no plans to commission research on the health effects of consuming trans fats as it is known that at high levels, like saturated fats, they raise the type of cholesterol in the blood that increases the risk of coronary heart disease.

The Food Standards Agency has provided information and advice, on its Eatwell website, to consumers about the role of fat in the diet and the possible health effects from consuming high levels of trans fats.

Treatment Overseas (E111 Form)

Mr. Don Foster: To ask the Secretary of State for Health what estimate her Department has made of *(a)* the number of E111 forms held by British citizens before August 2004 and *(b)* the proportion of these covering more than one person; and if she will make a statement. [2356]

Ms Rosie Winterton: Prior to August 2004, issues of form E111 amounted to approximately 3.5 million per annum. However, since long-standing practice had been to issue E111s without a specified end date, it is not possible to say how many valid E111s were held by the public. No information was collected on the proportion of forms issued on a per family basis and thus covering more than one person.

Mr. Don Foster: To ask the Secretary of State for Health what estimate her Department has made of the number of British citizens who travelled without a valid E111 form in the last year for which figures are available; and if she will make a statement. [2358]

Ms Rosie Winterton: Experience has shown that only a small number of United Kingdom residents travelling to other European Union countries who need treatment do not have valid E111s with them. UK residents not in possession of E111 when treatment is required abroad may apply to the Department of Work and Pensions for one to be sent to them abroad. 12,400 such E111s were issued in 2004–05.

Union Flag

Andrew Rosindell: To ask the Secretary of State for Health for what reasons her Department did not fly the Union flag from its headquarters for the Queen's Official Birthday. [5408]

Jane Kennedy: I can confirm that the Union flag was flown on Saturday 11 June, as notified by the Department of Culture, Media and Sport.

Consultant Vacancies (Accident and Emergency)

Mr. Hoyle: To ask the Secretary of State for Health which hospitals in Lancashire have vacancies for accident and emergency consultants. [6308]

Mr. Byrne: The most recent centrally held information on vacancy rates indicated that in March 2004 there were two vacancies at Morecambe Bay Hospitals National Health Service Trust, which had lasted for three months or more. The trust concerned has been actively trying to fill these posts.

Source:

Health and Social Care Information Centre NHS Vacancy Survey.

Waiting Lists/Times

Mr. David Jones: To ask the Secretary of State for Health what the target waiting times are for orthopaedic surgery at Robert Jones and Agnes Hunt Orthopaedic hospital, Gobowen, Shropshire for patients resident in *(a)* England and *(b)* Wales. [5436]

Mr. Byrne: Patients registered with a general practitioner in England and patients resident in England who are unregistered or who are registered with a GP in Wales should be treated within the standard maximum waiting time for England. The current maximum standard for all in-patient and day case treatment is nine months. The target maximum waiting time by the end of December 2005 is six months.

Waiting times for patients resident in Wales, unless they are registered with a GP in England, are a matter for the National Assembly for Wales.

Gregory Barker: To ask the Secretary of State for Health (1) if she will make a statement on cancer treatment waiting times at the Maidstone Oncology Centre in Kent; [5967]

(2) what plans she has to decrease the number of days patients at Maidstone Oncology Centre wait for cancer treatment; [5968]

(3) if she will take steps to reduce cancer treatment waiting times for hospitals in East Sussex and Kent; [5969]

(4) how many weeks on average patients at Maidstone Oncology Centre have waited for post-operative cancer treatment since 1997. [5971]

Caroline Flint *[holding answer 22 June 2005]:* Maidstone and Tunbridge Wells National Health Service Trust, of which the Maidstone Oncology Centre is a part, provides cancer treatment not only to the residents of Maidstone and Tunbridge Wells but also to residents in East Sussex. It met the national cancer waiting standards, as at the end of quarter four for 2004–05, as shown in the table.

Standard	*Percentage of standard achieved*
Two weeks wait from general practitioner referral to outpatient appointment	99.9
One month wait from diagnosis to treatment for breast cancer	100
Two month wait from GP referral to treatment of breast cancer	97.1

By the end of 2005, two further waiting times targets will be in place for cancers; a 31-day maximum wait from the date of the decision to treat to the start of treatment and a 62-day maximum wait from urgent GP referral for suspected cancer to the start of treatment.

Walk-in Treatment (Lancashire)

Mr. Hoyle: To ask the Secretary of State for Health how many walk-in treatment centres are planned in Lancashire; and in which districts. [6306]

Mr. Byrne: There are two existing national health service walk-in centres in Lancashire at Blackpool and Skelmersdale. Development of further NHS walk-in centres is a matter for local health communities. The Department has a capital budget for 2005–06 to support such investment and will be discussing with strategic health authorities shortly how best to deploy this money.

Written Answers to Questions

Tuesday 28 June 2005

CABINET OFFICE

Directgov

27. **Mr. Andy Reed:** To ask the Chancellor of the Duchy of Lancaster if he will make a statement on the launch of the Directgov internet portal for Government services. [7323]

Mr. Jim Murphy: Launched in April 2004, Directgov is our flagship digital service, delivered by a partnership of 18 Government departments. Attracting over 1.3 million visits a month, it draws together services from across the public sector, making it easier for people to access information and transact with Government.

Civil Service Bill

28. **Dr. Tony Wright:** To ask the Chancellor of the Duchy of Lancaster when he expects to introduce legislation on the Civil Service. [7324]

Mr. Hutton: The Government are considering the responses to the consultation. It will make a statement when it has completed its considerations.

National School of Government

Stewart Hosie: To ask the Chancellor of the Duchy of Lancaster how many people have attended the finance for non-financial managers course run by the National School of Government, broken down by *(a)* year and *(b)* department. [7193]

Mr. Hutton: The National School of Government runs two finance for non-financial managers courses. One for people in the Senior Civil Service and one for people up to Grade 7. The information requested in respect of these two courses has been placed in the Library.

CULTURE, MEDIA AND SPORT

Casinos

Mr. Don Foster: To ask the Secretary of State for Culture, Media and Sport how many applications have been made to the Gaming Board for casino licences for each quarter since January 2004; what the outcome was of each application; whether applications were subject to separate planning permission applications resulting from a change in use class; and if she will make a statement. [6968]

Mr. Caborn: The Gaming Board considers applications for Certificates of Consent for casinos. Once a Certificate of Consent is issued, operators can then apply to the Licensing Justices for a Gaming Licence.

The table sets out the number of applications for Certificates of Consent that the Gaming Board has received since January 2004, and the current position on these applications. This includes applications for new casinos, and applications where there are significant changes to the ownership or fabric of existing casinos.

Planning permission is not a pre-requisite for an application for a Certificate of Consent, or for a Certificate of Consent to be granted. The following table indicates, according to the Gaming Board's records, whether a planning application was also required in respect of the casino premises.

	Applications received	*Applications determined*	*Planning application required*	*Planning application not required*
January-March 2004	4	4	4	0
April-June 2004	4	[1]3	4	0
July-September 2004	7	5	2	5
October-December 2004	12	9	7	5
January-March 2005	8	[2]4	2	6
April-June 2005[3]	21	0	17	4
Total	56	26	36	20

[1] One application withdrawn.
[2] Two applications withdrawn.
[3] At 17 June 2005.

Mr. Don Foster: To ask the Secretary of State for Culture, Media and Sport what discussions her Department has held with the Office of the Deputy Prime Minister regarding the use class of casinos since 1 November 2004; at what level discussions occurred; when discussions took place; and if she will make a statement. [6971]

Mr. Caborn: The Department has had regular contact with the Office of the Deputy Prime Minister regarding the use class of casinos at both ministerial and official level since 1 November 2004, and will continue to do so.

EU Commission

Mr. Wallace: To ask the Secretary of State for Culture, Media and Sport pursuant to the answer of 22 June 2005, *Official Report*, column 1058W, to question 5146, if she will place in the Library *(a)* the submission made to the EU Commission on 9 September 2004 and *(b)* the letter sent to the EU Commission in March. [7534]

Mr. Caborn: In view of current advice from European Commission officials we do not intend to release this documentation into the public domain until the completion of the Commission's Investigation under article 88(2) of the treaty.

Following the closure of the investigation, or if we receive express permission from the Commission before that date, I will make these documents, subject to commercial confidentiality, available to the Library of the House.

Free Television Licences (Northern Ireland)

Mr. Gregory Campbell: To ask the Secretary of State for Culture, Media and Sport how many households in each constituency in Northern Ireland are in receipt of the free television licence for over-75s. [7226]

James Purnell: TV Licensing, who administer free television licences for people aged-75 or over as agents for the BBC, are not able to provide geographical breakdowns of the number of free licences issued. However, the Northern Ireland Department for Social Development has estimated that the number of benefit units claiming the retirement pension, where at least one person in that unit is aged 75-years or over, in each parliamentary constituency in Northern Ireland, is:

Parliamentary constituency	*Retirement pension benefit units with at least one person aged-75 or over.*
Belfast East	5819
Belfast North	5294
Belfast South	5018
Belfast West	3586
East Antrim	4053
East Londonderry	3952
Fermanagh And South Tyrone	4068
Foyle	3442
Lagan Valley	4790
Mid Ulster	3531
Newry And Armagh	4356
North Antrim	5269
North Down	5517
South Antrim	3986
South Down	4765
Strangford	4707
Upper Bann	4479
West Tyrone	3499
Missing Postcode	1200
Total	81331

Notes:
1. The data source is an un-validated scan of the pension service computer system at 4 June 2005. Not all households in Northern Ireland containing a person aged-75 or over will appear on the scan, since not all pensioners are entitled to the retirement pension.
2. In producing this analysis, individual records were attributed to parliamentary constituencies (PC's) on the basis of their postcode. Not all records can be correctly allocated to a PC using this method, and some cannot be allocated at all.

Gaelic Language

Mr. MacNeil: To ask the Secretary of State for Culture, Media and Sport what steps she has taken to implement the undertakings of the European Charter for Regional or Minority Languages in relation to the Gaelic language and if she will ensure that the recommendations of the last Committee of Experts report are adopted. [7015]

James Purnell *[holding answer 27 June 2005]:* The steps taken by the UK Government to implement the European Charter for Regional and Minority Languages are set out in periodic reports. The first such report was published on 1 July 2002 and is available on the Council of Europe website at http://www.coe.int and the second is due to be sent to the Council of Europe on 1 July 2005 and should be available shortly thereafter: copies will be placed in the Libraries of the House. These reports cover my Departmental responsibilities.

The recommendations of the Committee of Ministers, based on the findings of the Committee of Experts which evaluated the UK's compliance with the charter, were that the authorities of the United Kingdom facilitate the establishment of a television channel or an equivalent television service in Scottish Gaelic and overcome the shortcomings in Scottish Gaelic radio broadcasting.

Since the charter came into force on 1 July 2001, the Government have brought forward provisions, enacted in the Communications Act 2003, changing the status of the Gaelic broadcasting funding body, now called the Gaelic Media Service (CMS), to allow it for the first time to hold a broadcasting licence. My right hon. Friend, the Secretary of State, has also committed herself to seeking a better deal for Gaelic broadcasting and my Department have been working with all the interested parties to put together a sustainable strategy for Gaelic television. We have also confirmed, in the Green Paper on BBC Charter Review of March 2005, that the BBC will have a key role to play in any future channel. Furthermore, although funding responsibility were devolved to the Scottish Executive as part of the devolution settlement in 1999, my right hon. Friend has offered a one-off contribution of £250,000 from DCMS budgets as part of arrangements for establishing a Gaelic channel.

As for the recommendation related to increasing the coverage of Radio nan Gaidhael, the BBC has greatly increased FM coverage and added satellite and freeview provision; Radio nan Gaidhael is also available globally on the internet.

We believe that these actions continue to demonstrate the UK's commitment to meeting its obligations under the European Charter.

Heritage Economic Regeneration Scheme

Mr. Love: To ask the Secretary of State for Culture, Media and Sport what discussions she has held on a successor scheme to the Heritage Economic Regeneration scheme; and if she will make a statement. [6848]

Mr. Lammy: We have asked English Heritage to work with the Heritage Lottery Fund and other regeneration agencies to explore the scope to rationalise the funding they provide for heritage-led regeneration projects. The aim is to make grants more easily accessible and to ensure best value for money. English Heritage support will continue until any revised arrangement is put in place.

Mr. Love: To ask the Secretary of State for Culture, Media and Sport what assessment has been made of the impact of the Heritage Economic Regeneration scheme with particular reference to *(a)* retention and enhancement of older commercial buildings and *(b)* other commercial improvements; and if she will make a statement. [6850]

Mr. Lammy: English Heritage published its impact assessments of the Heritage Economic Regeneration scheme in Heritage Dividend. The most recent report found that, on average every £10,000 of heritage investment levered in £45,000 match funding from the private and public sector, and led to 55 square metres of improved commercial floor space, one improved

building, one new job and two safeguarded jobs. The reports do not break down funding by type or age of buildings involved.

International Sport (Access Gender Discrimination)

Andrew Mackinlay: To ask the Secretary of State for Culture, Media and Sport whether the Government's policy regarding support for United Kingdom teams participating in international sports competitions is predicated on the condition that there is no gender discrimination regarding spectators' and supporters' access; and if she will make a statement. [5046]

Mr. Caborn *[holding answer 16 June 2005]:* No. The Government's policy regarding support for UK teams participating in international sports competitions is not predicated on the condition that there is no gender discrimination regarding spectators' and supporters' access.

However, the Government remain committed to promoting sport for all and equality of access and would encourage the sporting world to adopt similar principles.

Licensed Premises

Mr. Redwood: To ask the Secretary of State for Culture, Media and Sport what proportion of licensed premises she estimates will seek a variation in their current licence provisions under the new agreements under the Licensing Act 2003. [7666]

James Purnell: My Department estimates that 65 per cent. of licensed premises will apply for variations in their current licence provisions. This proportion was published in my Department's Regulatory Impact Assessment on 21 January 2005.

Mr. Redwood: To ask the Secretary of State for Culture, Media and Sport what representations she has received on delaying the requirement for a new alcohol licence for licensed premises under the Licensing Act 2003. [7669]

James Purnell: My right hon. Friend the Secretary of State has received a number of representations on this subject, from Members of the House, local authorities and others. However, extending the period for converting existing licences to premises licences or club premises certificates would delay the benefits that will derive from the full implementation of the Act. The second appointed day, when the new licences come into effect, will be November 24.

Television Licence

Sarah Teather: To ask the Secretary of State for Culture, Media and Sport what the amount collected in fines for not having a TV licence was in London in each year since 1997. [5261]

James Purnell: Information on fines collected for television licence evasion is not available. The total fines imposed for offences under the Wireless Telegraphy Acts of 1949 to 1967, most though not all of which involve television licence evasion, in the Greater London area in each year since 1997 were:

	Fines imposed for offences under the Wireless Telegraphy Acts (£)
1997	1,333,937
1998	1,434,675
1999	885,493
2000	1,711,340
2001	680,141
2002	1,153,119
2003	804,912

Sarah Teather: To ask the Secretary of State for Culture, Media and Sport how many people were prosecuted for not having a television licence in London in each of the last five years. [5311]

James Purnell: The data collected by the Home Office relates to all offences under the Wireless Telegraphy Acts of 1949 to 1967, most though not all of which involve television licence evasion. The number of people proceeded against in the Greater London area in each of the last five years for which information is available was:

	Proceeded against [1]
1999	10,820
2000	19,669
2001	7,817
2002	13,210
2003	9,461

[1] These data are on the principal offence basis

DEFENCE

Absence Without Leave

Mr. Hoyle: To ask the Secretary of State for Defence pursuant to the answer of 14 June 2005, *Official Report*, columns 331–32W to the hon. Member for Berwickshire, Roxburgh and Selkirk (Mr. Moore), on absence without leave, what assessment he has made of the reasons for the increase in the numbers of service personnel going absent without leave since 2000. [6616]

Mr. Touhig: The numbers of those going absent without leave are small when compared with the overall size of the armed forces. There are however no centralized records held to explain the increase in absences.

Aircraft Carriers

Dr. Julian Lewis: To ask the Secretary of State for Defence whether it remains the Government's policy that two new aircraft carriers will enter service in 2012 and 2015 respectively; and what *(a)* minimum and *(b)* maximum complement of fixed-wing aircraft each will carry. [5559]

Mr. Ingram *[holding answer 23 June 2005]:* As set out in the strategic defence review, and confirmed in subsequent policy reviews, it remains our policy to procure two larger, more capable, aircraft carriers to replace the current Invincible-class carriers.

This project (CVF) is in its assessment phase and as such the design parameters for the ships, including the number of aircraft carried, continue to evolve to meet our capability requirements. In-service dates and design parameters will be confirmed when we take the main investment decision.

The target in-service dates remain 2012 and 2015.

Armoured Vehicle Training Services Requirement

Mr. Gerald Howarth: To ask the Secretary of State for Defence when he expects the Armoured Vehicle Training Services requirement to be in operation with the armed forces. [6710]

Mr. Ingram: No firm dates have been set, however a revised procurement strategy being worked up by the Defence Procurement Agency, as announced on 15 June, will inform our plans to deliver the capability and take advantage of emerging technology and best practice as it develops in the commercial training areas.

Sudan

Mr. Ancram: To ask the Secretary of State for Defence what discussions he has had with his *(a)* EU and *(b)* NATO counterparts on assisting the implementation of a no-fly zone over the Darfur region. [6903]

Mr. Ingram: Neither EU nor NATO Defence Ministers have had such discussions. The African Union has not requested assistance in this area.

Dentistry

Mike Penning: To ask the Secretary of State for Defence if he will make a statement on the role of military dental practitioners in each of the services; what their role is in performing preventative check-ups; how often service personnel are required to attend dental check-ups; how many service personnel use private dental practitioners; and whether the costs of private dental check-ups can be reclaimed from military budget lines. [5321]

Mr. Touhig: The role of military dental practitioners is to deliver effective military dentistry that contributes to force generation and enhances operational capability. The aim is to maximise the number of personnel fit for task and to minimise the risk of an episode of dental morbidity.

On operations dental teams are deployed to treat episodes of morbidity and to enable personnel to return to duty as soon as possible. Deployed dental teams are an effective force multiplier.

Service personnel are required to attend for dental check-ups at intervals of between six and 18 months dependent on the individual's dental history and dental risk assessment.

The number of regular Service personnel attending private dental practitioners is not recorded but anecdotally is a very small percentage. The cost of private check-ups and treatment may not be reclaimed from military budget lines.

Mike Penning: To ask the Secretary of State for Defence how many *(a)* dental practitioners and *(b)* dental support staff are employed by each of the services; what their establishment is; and if he will make a statement. [5322]

Mr. Touhig: The number of dental practitioners and dental support staff employed by each of the services and their establishment are as follows (please note that the trained requirement for the Army (and total 'all services') is sourced from the Defence Dental Service establishment for that service):

Trained strength[1] and requirement as at 1 April 2005

Requirement

	Dental practitioners[2,3,4,5,6]	*Dental support staff*[7]
Royal Navy	70	120
Army	120	240
Royal Air Force	80	210
All services	270	570

Strength

	Dental practitioners[8]	*Dental support staff*
Royal Navy	60	120
Army	150	230
Royal Air Force	70	200
All services	280	550

[1] Figures are for trained UK regular forces and therefore exclude untrained personnel, Gurkhas, full time reserve service personnel, the home service battalions of the Royal Irish Regiment and mobilised reservists.

[2] Requirements for the RN are smoothed.

[3] The Army trained requirement for dentists is sourced from the Defence Dental Service.

[4] Implementation of the Medium Term Workstrand (MTW) 5 has led to a redefined global manpower requirement (GMR) which is effective from 1 April 2005.

[5] Total trained requirement for all services is sourced from the Defence Dental Service.

[6] Dental practitioners may include dentists who are not practising due to being posted on staff appointments and/or fulfilling non-clinical duties.

[7] Dental support staff includes dental technicians, dental surgery assistants and dental support specialists.

[8] Army dental practitioner figures are for officers serving within RADC only and therefore exclude late entry officers and only include ranks of captain and above. Army dental support staff may fill roles in either RAMC, RADC or QARANC.

An establishment review is presently in progress which will reduce the number of dental practitioners and increase dental support staff.

Forces Personnel (Resignations)

Mr. Ancram: To ask the Secretary of State for Defence what estimate he has made of the number of armed forces personnel who have resigned since 2003 to join private security companies. [6904]

Mr. Touhig: This information is not held centrally. Exit surveys are conducted within the Naval Service and RAF but information on where personnel plan to work after they leave the services is not collected. The Army do not currently run an exit survey, however, the possibility of doing so is now under review.

Gibraltar

Mr. Hoyle: To ask the Secretary of State for Defence if he will make a statement on the future of defence *(a)* hospital and *(b)* medical services in Gibraltar. [6371]

Mr. Touhig: The full spectrum of medical support is, and will continue to be provided to British Forces in Gibraltar. The construction of a new primary and secondary Integrated Health Facility, which will replace the current Royal Naval Hospital and Joint Medical and Dental Unit, is estimated for completion in 2007. We remain committed to providing our entitled personnel with medical services at least equivalent to NHS standards, wherever practicable and possible.

Gulf-war Related Illness

Joan Walley: To ask the Secretary of State for Defence how many claims in respect of Gulf War related illness have been *(a)* rejected and *(b)* accepted by the Veterans Agency, Blackpool; and how many claims have been allowed the right of appeal. [7396]

Mr. Touhig: Our records show that as at 31 May 2005,1,484 claims have been accepted and 120 claims rejected in respect of Gulf War related illness. All decisions issued by the Veterans Agency carry a right of appeal.

Honours

Mr. Pope: To ask the Secretary of State for Defence how many officials currently in the Department received honours in the recent Queen's Birthday Honours List; and at what rank of honour. [5124]

Mr. Touhig: I refer my hon. Friend to the answer given to him on 22 June 2005, *Official Report*, 1059W, by my right hon. Friend the Chancellor of the Duchy of Lancaster.

Incendiary Weapons (Iraq)

Harry Cohen: To ask the Secretary of State for Defence pursuant to his letter to the hon. Member for Leyton, deposited in the Library, correcting his January parliamentary answer about the use of incendiary weapons in Iraq, how he discovered that his answer was incorrect; when he first discovered that it was incorrect; whether the use of the weapons were in the area of Falluja; whether any civilian settlements were in the area; where the weapons were used; and if he will make a statement. [6232]

Mr. Ingram: On 20 April, my attention was drawn to reports that the US State Department had confirmed the use of MK 77 firebombs in Iraq in 2005, contrary to the answer given to my hon. Friend, the member for Leyton and Wanstead, 11 January 2005, *Official Report*, column 374W. Ministry of Defence officials sought clarification from the Pentagon and I wrote to my hon. Friend as soon as possible after this had been received in June.

Where, and against which targets the weapons were used is a matter for the US authorities.

Joint Strike Fighter

Mr. Jack: To ask the Secretary of State for Defence if he will make a statement on the work his Department has carried out since the publication of the Rand Europe report on the Joint Strike Fighter to evaluate the steps which have to be taken to secure a final assembly, check out and maintenance and repair unit for this aircraft at BAE Wharton. [6834]

Mr. Ingram: We have a requirement for a Maintenance, Repair and Upgrade capability to provide sovereign support for the Joint Strike Fighter (JSF) throughout its planned service life. Following on from the Rand study, further investigations are underway between BAES, DTI and MOD, to explore the possible synergy between this and a Final Assembly and Check Out facility based in the UK.

Military Readiness

Mr. Robathan: To ask the Secretary of State for Defence if he will make a statement on the finding of the National Audit Office report Assessing and Reporting Military Readiness, paragraph 2.39, concerning shortages of essential personnel; what estimate he has made of the extent of these shortages; how many units and of which types, are *(a)* facing such shortages and *(b)* under strength; and of how many medical staff his Department is short. [7548]

Mr. Ingram *[holding answer 27 June 2005]:* The current shortages of personnel, by Service, within the areas of undermanning noted in paragraph 2.39 of the National Audit Office report Assessing and reporting Military Readiness, are given as follows. These numbers have been rounded to the nearest 10.

	Number
Royal Navy and Royal Marines	
Medical personnel (including nurses, surgeons and anaesthetists)	80
Signals and communications personnel	140
Vehicle maintenance technicians	30
Aircrew	140
Engineers:	
Marine	390
Weapons	170
Logisticians	80
Chefs	50
Army	
Medical Personnel (including nurses, surgeons and anaesthetists)	630
Intelligence personnel	440
Vehicle maintenance technicians	380
Engineers	1,330
Logisticians	920
Chefs	310
Royal Air Force	
Medical personnel (including nurses, surgeons and anaesthetists)	80
Vehicle maintenance technicians	30
Aircrew	140
Weapon systems operators	120
Engineers	90
Logisticians	20

Attributing shortages to individual units could be achieved only at disproportionate cost. The deficits are managed as equitably as possible by the respective manning agencies to minimise the operational impact.

Mr. Gerald Howarth: To ask the Secretary of State for Defence how many times in each year since 1997 the military readiness traffic light reporting system has shown a *(a)* yellow and *(b)* red state of readiness for each service. [7893]

Mr. Ingram: The military readiness reporting system has been evolving since it was first included in the Ministry of Defence's Public Service Agreement following the 1998 Comprehensive Spending Review. Performance against PSA readiness targets has been reported to Parliament since 1999–2000 in the Ministry of Defence's Annual Performance Report, which from 2002–2003 has been included in the Annual Report and Accounts. The number of critical weaknesses which would make it impossible to deploy a unit has also been reported publicly in our quarterly PSA reports available on the MOD website since December 2003.

Ministry of Defence Police (Royal Mint Investigation)

Malcolm Bruce: To ask the Secretary of State for Defence what the outcome was of the investigation commenced in July 2002 at the Royal Mint Llantrisant; and on which Government agency's behalf his Department's police handled the case. [6543]

Mr. Touhig: The police investigations at the Royal Mint have now been completed. One person has been charged with a number of offences and is due to appear at Southwark Crown court on 12 September 2005. A second person is the subject of a request for extradition and a file has been forwarded to the Director of Prosecutions, Gambia. The Gambian authorities have issued a judicial order for the arrest of the individual.

The Chief Executive of the Royal Mint Llantrisant launched an internal investigation and reported findings to HM Treasury, who brought in the Serious Fraud Office (SFO). However, when the SFO became aware that the Ministry of Defence Police (MDP) provide a policing service to the Royal Mint, it was agreed by both organisations that the MDP would be the most appropriate police force to assist with the inquiry, due regard having been taken of the geographical spread of the required inquiries within the UK and abroad.

MRSA

Lynne Featherstone: To ask the Secretary of State for Defence what *(a)* advice is given on, and *(b)* precautions are taken against the spread of MRSA in military ambulances; and if he will make a statement. [6700]

Mr. Touhig: The majority of secondary care for armed forces personnel is provided at Ministry of Defence Hospital Units within host NHS hospitals. Ambulances used for transfer fall under the local health authority and will adhere to the procedures and precautions laid down by the local health authority.

Some military ambulances are retained by armed forces medical centres. Guidelines to prevent the spread of infection are provided at a single Service level. These include staff protection and ambulance disinfection. The guidelines are in line with the current procedures recommended by the local health authorities.

Ambulances are also used by the armed forces for transfer of a small number of patients in Cyprus and Gibraltar. These ambulances follow the same infection control procedures as the UK based medical centres with staff referring to the local infection control manuals supplied by the single Service Infection Control Teams in the UK. A local infection control nurse is on hand to provide immediate support and advice where necessary.

MRSA has not been identified as a major problem for troops returning from military operations abroad. Nevertheless, when operating in field conditions, staff are instructed on the importance of preventing the spread of any infection and are given specific guidelines to follow to prevent the spread of infection relevant to the particular theatre. Ambulances on operations are cleaned as per single Service guidelines on the decontamination of equipment. All ambulances should be thoroughly cleaned between uses.

Lynne Featherstone: To ask the Secretary of State for Defence how many cases of MRSA have been recorded in his Department's hospitals since 1997; and if he will make a statement. [6701]

Mr. Touhig: The majority of secondary care for armed forces personnel is now provided at Ministry of Defence Hospital Units (MDHUs) which are based within NHS trust hospitals around the UK. MRSA numbers are now monitored by the infection control teams of each NHS trust under the direction of a consultant microbiologist, not the MOD. The MOD therefore does not hold these records.

Royal Hospital Haslar (RHH) is currently an exception to this. Since April 2001 it has been run in partnership with Portsmouth Hospital Trust. The number of cases of MRSA at RHH are only available from the year 2000. Due to reasons of medical confidentiality, numbers are not broken down below five.

Royal Hospital Haslar

	Cases
2000	Less than 5
2001	22
2002	66
2003	34
2004	26
2005	20 (to date)

The MOD currently has two military hospitals at its permanent overseas bases in Cyprus and Gibraltar. Records for these bases are only held for the last five years and less than five cases of MRSA have been recorded in Cyprus, and none in Gibraltar. Those cases recorded have been transferred in from other hospitals and no new cases of MRSA have been identified in either hospital in this period.

Portsmouth Nuclear Accident Plan

Mr. Hancock: To ask the Secretary of State for Defence what enhancements to the Portsmouth nuclear accident plan are necessary to cover vessels powered by nuclear reactors manoeuvring around the City of Portsmouth at the same time during Trafalgar 200 at the Review of the Fleet on 28 June; and if he will make a statement. [6796]

Mr. Ingram: Safety of visits to the Dockyard Port of Portsmouth (DPP) by Nuclear Powered Warships (NPW's) is assured by adherence to the Nuclear Site Safety Justification (NSSJ), which covers safe systems of work for the arrival, transit and anchoring of a single NPW within the waters of the DPP. It also describes the safety management arrangements and contingency plans that are in place to minimise risk, and has been approved by the Ministry of Defence's Naval Nuclear Regulatory Panel (NNRP). In addition to the NSSJ and in accordance with the requirements under the independent national regulations, Radiation Emergency Preparedness and Public Information Regulations (REPPIR) 2001, a Report of Assessment (ROA) of Hazard Identification and Risk Evaluation (HIRE) has been conducted that identifies the requirement for an emergency plan. The City of Portsmouth is covered by a detailed plan (PORTSAFE), which has been exercised and tested under REPPIR.

In recognising the additional risk associated with the attendance at the International Fleet Review of more that one NPW, a Special Safety Statement (SSS) has been produced that enhances the measures contained in the NSSJ. It deals with factors such as increased maritime traffic, transient changes in population, event activities and the battle re-enactments. It has been approved by the MOD's NNRP and has been accepted by the Portsmouth Nuclear Site Safety Committee, and the Nuclear Works and Services Authorisation Group (NWSAG), which comprises both MOD and independent expert advisers. Enhancements to PORTSAFE are not required due to the distance that the visiting NPWs will be anchored from residential areas. This has been agreed by the regulatory and local authorities.

Race Relations (Amendment) Act

Keith Vaz: To ask the Secretary of State for Defence what arrangements are in place to ensure that bodies within the responsibility of his Department comply with the requirements of the Race Relations (Amendment) Act 2000. [3544]

Mr. Touhig: The Ministry of Defence complies with its obligations under the Race Relations (Amendment) Act 2000 by the publication of a Race Equality Scheme (RES) and the production of annual progress reports against the scheme. The RES and the annual progress reports are published and in the public domain. The Department's RES covers its civilian work force (including Trading Funds), the armed forces and the Ministry of Defence police.

RAF Innsworth

Peter Luff: To ask the Secretary of State for Defence if he will make a statement on the implications for the tri-service medal office of the proposed changes at RAF Innsworth; and if he will make it his policy to relocate the office to available property belonging to his department in Droitwich Spa. [6993]

Mr. Touhig: The RAF Innsworth site is home to a number of elements of the Armed Forces Personnel Administration Agency (AFPAA) including the Ministry of Defence Medal Office. AFPAA will be conducting an investment appraisal into the relocation of all AFPAA activities located at Innsworth. The result of this will not be known until at least the end of this year. The MOD is proceeding with closure works for the Droitwich Spa estate.

Royal Navy Ships (Berth Availability)

Mr. Hancock: To ask the Secretary of State for Defence what the forecast availability is of the Z berth in Malabar, Bermuda, for Royal Navy ships. [6590]

Mr. Ingram: The Z berth in Bermuda is currently available as a facility for visiting RN submarines. There are no changes forecast to that arrangement.

Surface Fleet

Mr. Hancock: To ask the Secretary of State for Defence what the configuration of the planned surface fleet is for *(a)* 2011, *(b)* 2012, *(c)* 2013 and *(d)* 2014; and if he will make a statement. [6477]

Mr. Ingram: Our plans for the surface fleet are set out on page 18 of "Delivering Security in a Changing World (Future Capabilities) (Cm 6269)", presented to the House by the Secretary of State for Defence in July 2004.

Territorial Army

Mr. Hoyle: To ask the Secretary of State for Defence if he will make a statement on the long-term future of Territorial Army centres in Lancashire. [6370]

Mr. Touhig: I refer my hon. Friend to the answer I gave on 13 June 2005, *Official Report*, column 18W, to the hon. Member for Lancaster and Wyre (Mr. Wallace). I will ensure that the hon. Friend is informed of the outcome of current work on rebalancing the Territorial Army in due course.

Trafalgar Celebrations

Mr. Hoyle: To ask the Secretary of State for Defence what events his Department is organising in Gibraltar to celebrate the 200th anniversary of the Battle of Trafalgar; and how many ships will visit as part of Trafalgar 200. [7201]

Mr. Ingram: A programme of events is planned to take place in Gibraltar during the weekend of 28–30 October 2005 to commemorate the close historic links between Gibraltar and Nelson's victory. In addition to a traditional service of remembrance at the Trafalgar cemetery, these will include a Nelson exhibition, Beating Retreat and reception, and a Royal Navy Ceremonial Guard Mount at His Excellency the

Governor's residence. The Royal Navy will also be invited to exercise their Freedom of the City privileges. A Royal Navy destroyer has also programmed to visit Gibraltar to partake in the commemorations.

In the UK, the Royal Navy is organising a special programme of events for this year, which is being coordinated with other events as part of the SeaBritain and Trafalgar Festival initiatives to commemorate the 200th anniversary of the Battle of Trafalgar.

Unmanned Aerial Vehicles

Mr. Hancock: To ask the Secretary of State for Defence what plans he has for *(a)* launching and *(b)* controlling the proposed Watchkeeper unmanned aerial vehicle system from Royal Navy ships. [6793]

Mr. Ingram: I refer the hon. Member to the answer I gave him on the use of UAVs at sea on 14 June 2005, *Official Report*, column 334W.

Uzbekistan

Mr. Moore: To ask the Secretary of State for Defence how many UK service personnel have been on training exercises in Uzbekistan in each year since 1997; and what the nature was of those training exercises. [6996]

Mr. Ingram: United Kingdom forces have undertaken one exercise in Uzbekistan since 1997, a company-level peacekeeping exercise which took place from 11–25 September 2004. The 146-person UK element was drawn from the Territorial Army.

Mr. Moore: To ask the Secretary of State for Defence how many UK service personnel have been stationed in Uzbekistan for the purposes of training Uzbek military personnel in each year since 1997; and what the cost was of providing this training. [6997]

Mr. Ingram: There are no United Kingdom personnel permanently stationed in Uzbekistan specifically for the purposes of training Uzbek military personnel. However, the UK has sent British Military Advisory and Training Teams (BMATTs) to Uzbekistan in recent years, to provide training to the Uzbek armed forces, as follows:

Dates	*Locations*	*Subject*	*BMATT personnel*	*Students trained*	*Costs (£000)*
7–18 March 2005	Samarkand	Field Training	3	20	14
21 February to 9 March 2005	Samarkand	Marksmanship Coaching Course	2	20	14
1–25 September 2004	Chirchik, Tashkent	Management of Training	2	20	22
13 June to 11 July 2004	Samarkand	Instructor Training Course	2	18	23
20 October to 13 November 2003	Samarkand	Instructor Training Course	5	18	54
21 October to 23 November 2002	Samarkand	Instructor Training Course	4	19	48
Total					175

Wormwood Scrubs Act

Mr. Hands: To ask the Secretary of State for Defence what arrangements there are under the Wormwood Scrubs Act 1879, as amended, for his Department to be consulted should a local authority propose carrying out works that might impede access to open space. [6773]

Mr. Touhig: Use of Wormwood Scrubs is governed by the Wormwood Scrubs Act 1879 and a Memorandum of Agreement dated 1 October 1980.

Under the Act, all development proposals, which affect Wormwood Scrubs must be referred to the Ministry of Defence for agreement. As trustees of the Scrubs, the London borough of Hammersmith and Fulham are aware of this agreement and have complied with it in the past, most recently in 2001. The Ministry of Defence uses the Scrubs for training.

ENVIRONMENT, FOOD AND RURAL AFFAIRS

Bovine TB

Mr. Steen: To ask the Secretary of State for Environment, Food and Rural Affairs how many badgers have been culled in *(a)* Devon, *(b)* Cornwall, *(c)* Somerset and *(d)* Dorset in each of the last three years; what estimate she has made of the cost of culling badgers in Devon to eradicate bovine TB; and if she will make a statement. [6263]

Mr. Bradshaw *[holding answer 27 June 2005]:* Five of the Randomised Badger Culling Trial (RBCT) areas are in Devon, Cornwall, Somerset or Dorset. However, as two of these trial areas straddle two counties it is not possible to provide the breakdown by county.

The following numbers of badgers have been culled as part of the RBCT in each of the relevant five areas:

Number

	[1]*2003*	[1]*2004*	[1]*2005*
Devon/Cornwall	133	282	111
Cornwall	241	233	187
Cornwall (2)	393	393	220
Somerset/Devon	247	214	73
Devon	441	187	109

[1] Each culling year runs from 1 May to 31 January.

The cost of the RBCT to the end of 2003–04 was approximately £32 million. It has since been costing about £7 million per annum. It is not possible to estimate the cost of the RBCT in Devon alone.

Dog Control Areas

Norman Baker: To ask the Secretary of State for Environment, Food and Rural Affairs what the commencement date will be in respect of powers for local authorities to introduce dog control areas; when she expects to publish regulations in respect of this matter; and if she will make a statement. [5878]

Mr. Bradshaw: We hope to commence the provisions in the Clean Neighbourhoods and Environment Act on Dog Control Orders in April 2006, and intend to consult on draft guidance and regulations this autumn.

Foot and Mouth

Mr. Drew: To ask the Secretary of State for Environment, Food and Rural Affairs what assessment she has made of the impact of the airborne spread of foot and mouth disease during the 2001 outbreak. [6823]

Mr. Bradshaw: The possibility of airborne transmission of the foot-and-mouth-disease virus was assessed during the 2001 epidemic and studies have been conducted subsequently. These indicate that a maximum of 27 farms may have been infected by airborne spread.

Mole-catchers

David Maclean: To ask the Secretary of State for Environment, Food and Rural Affairs what incidents of *(a)* damage to and *(b)* destruction of wildlife caused by the use of strychnine hydrochloride for the killing and destruction of moles by mole-catchers have occurred in the last 10 years. [6274]

Mr. Morley: The Government's Wildlife Incident Investigation Scheme (WIIS) investigates cases of suspected poisoning of wildlife by pesticides. There have been no reported cases of wildlife being poisoned by the approved use of strychnine for mole control over the last 10 years. There have been two cases of poisonings reported which may have been due to the misuse or abuse of strychnine hydrochloride when used for mole-control.

Packaging

Dr. Kumar: To ask the Secretary of State for Environment, Food and Rural Affairs what her most recent estimate is of the amount of household waste which is made up of unnecessary packaging. [5856]

Mr. Bradshaw: The Packaging (Essential Requirement) Regulations 2003 (as amended) stipulate that all packaging should be manufactured so that the packaging volume and weight are limited to the minimum adequate amount to maintain the necessary level of safety, hygiene and acceptance for the packed product and for the consumer. To date, three companies have been successfully prosecuted by Trading Standards for placing over-packaged goods on the market.

Companies with obligations under the Producer Responsibility Obligations (Packaging Waste) Regulations 1997 (as amended) also have a financial incentive to reduce the amount of packaging they manufacture or use.

Recycling

Joan Ruddock: To ask the Secretary of State for Environment, Food and Rural Affairs what progress has been made on recycling since the Household Waste Recycling Bill was enacted. [6467]

Mr. Bradshaw: The Household Waste Recycling Act came into force on 1 April 2003. The information requested is presented in the following table:

	Percentage	*Tonnage (million)*
Household waste sent for recycling or composting in England		
2002–03	14.5	3.7
2003–04	17.7	4.5
Percentage of households served by a kerbside collection scheme in England		
2002–03	67	—
2003–04	80	—
Amount (tonnes) of household waste collected for recycling or composting through kerbside schemes		
2002–03	—	1.2
2003–04	—	1.9

Source:
Defra Municipal Waste Management Survey for England.

Tethered Equines

Keith Vaz: To ask the Secretary of State for Environment, Food and Rural Affairs (1) what the animal welfare guidelines are for permanently tethered equines; [6191]

(2) whether she has received any communication concerning the suffering and maltreatment of tethered horses, ponies and donkeys. [6192]

Mr. Bradshaw: While the Government would prefer that the tethering of horses did not occur at all, we recognise that in certain circumstances it can be an appropriate short-term management practice. The Department assisted in producing the Equine Industry Welfare Guidelines Compendium in 2002, which addresses this issue.

The new Animal Welfare Bill will place on those who own or are responsible for animals, a duty to ensure their welfare. In particular, this duty of care will be supported by a code of practice for tethering horses. Although the Government is not proposing to ban the tethering of horses altogether, the code of practice will provide a set of minimum required welfare standards, including information on the correct type of equipment to be used to provide protection for tethered horses.

The Department receives occasional correspondence about the treatment of tethered horses, ponies and donkeys from members of the public and interested groups.

Timber

Dr. Whitehead: To ask the Secretary of State for Environment, Food and Rural Affairs what proportion of construction waste was timber in each of the last five years; what proportion of such timber was segregated for recycling into raw pulp or chipboard in each year; and what proportion of the remaining timber was landfilled in each year. [7284]

Mr. Bradshaw: The Government does not hold data on the proportion of construction waste that was timber over the past five years.

Veterinary Medicines (EU Directive)

Peter Luff: To ask the Secretary of State for Environment, Food and Rural Affairs (1) what discussions she has had with *(a)* small animal vets and *(b)* their representatives on the implementation of the EU Directive on batch recording and traceability of veterinary medicines; [6576]

(2) when she will publish her response to the consultation by the Veterinary Medicines Directorate on batch recording and traceability; [6577]

(3) what assessment she has made of the effect on small animal vets of the record-keeping requirements in the proposals of the Veterinary Medicines Directorate for implementation of the EU Directive on batch recording and traceability; [6578]

(4) what discussions she has had with her counterparts in other EU member states on implementation of the directive on batch recording and traceability of veterinary medicines. [6579]

Mr. Bradshaw: The Veterinary Medicines Directorate (VMD) is developing new Regulations setting out controls on all aspects of veterinary medicines. Their purpose is to implement an amending EU Directive, take forward relevant recommendations made in the Marsh and Competition Commission reports on the dispensing of veterinary prescription only medicines (POMs) in the UK, and replace the existing voluminous and outdated UK legislation on veterinary medicines with a single set of Regulations.

The new Regulations include provisions for retailers of veterinary POMs to record information relating to products received and supplied, including the manufacturer's batch number. These requirements are already applied to veterinary medicines for use in food-producing animals but the amending Directive extends their application to products for companion animals. We have received correspondence on this issue from a number of individuals including veterinary surgeons.

During the initial stages of developing the proposals, officials at the VMD consulted informally with a wide range of interested groups, including veterinary organisations. Following further development, a formal consultation package was published on the VMD website on 4 January 2005 and a letter sent to some 350 interested organisations and individuals. Consultees were allowed four months, until 5 May, to comment. Over 300 responses have been received and the comments, including those relating to the record-keeping provisions and their perceived impact on small animal veterinarians, are currently being considered and will be taken into account in finalising the draft Regulations. The VMD has kept interested parties informed of developments on key issues by publishing a series of reaction notes and has held public meetings on 21 and 22 June to discuss the outcome of the formal consultation. A further meeting with the British Small Animal Veterinary Association has been arranged for 29 June. VMD officials have also been in touch with officials in other member states to ascertain their approach to the implementation of these provisions.

Waste Recycling

Dr. Pugh: To ask the Secretary of State for Environment, Food and Rural Affairs what percentage of electrical and electronic waste in the UK was recycled in the last year for which figures are available. [7206]

Mr. Bradshaw: I understand that, currently, approximately 60 per cent. of domestic WEEE, by weight, is recycled, mostly comprising large household appliances. The Industry Council for Electronic Equipment Recycling (ICER) does not yet have figures for recycling levels of business WEEE.

HOUSE OF COMMONS COMMISSION

XML Feeds

Michael Fabricant: To ask the hon. Member for North Devon, representing the House of Commons Commission when XML feeds of the Parliamentary website for information, including the Official Report and Early Day Motions, will be made available; and if he will make a statement. [7533]

Nick Harvey: There are at present no plans to make XML feeds of the Parliamentary website available. XML feeds of Early Day Motions are used internally for the generation of printed papers and populating parliamentary and Government information management systems. XML feeds of Hansard are under development for similar purposes.

The Parliamentary Publications source database, which includes Hansard and Early Day Motions, is currently populated with content in HTML, and is available under licence from HMSO, who administer Parliamentary Copyright. Future planning for the development of the website will take into account the case for providing XML feeds.

INTERNATIONAL DEVELOPMENT

UK Companies (Accountability)

Jeremy Corbyn: To ask the Secretary of State for International Development if he will take steps to ensure UK companies are accountable for their impact on *(a)* communities and *(b)* the environment in developing countries. [7460]

Mr. Thomas: All companies should operate within the laws of the country in which they are operating. UK companies operating in developing countries should be accountable to the Government and citizens of those countries. DFID recognises that, in many developing countries, the systems for monitoring and regulating business activity are weak. Our priority is to support countries' efforts to develop an appropriate legal framework, including protection of the environment and community rights, and to strengthen their capacity to enforce these laws. An example is the pathways to environmental action in Kenya where DFID supports work with local regulatory authorities and the private sector to find the best means of meeting environmental standards.

There are of course certain fundamental issues, such as respect for human rights, which are universal. At the global level, we encourage countries to sign up to the existing international agreements in this area—in particular, the Organisation for Economic Co-Operation and Development (OECD) guidelines for multinational enterprises, the global compact and the International Labour Organisation (ILO) core conventions on labour standards. At the international level, we are also working with the International Finance Corporation (IFC) on their environmental and social safeguards revision process.

Improved reporting mechanisms also give UK companies the opportunity to report on their impacts both at home and abroad. The new operating and financial review, which applies to financial years beginning on or after 1 April 2005 requires quoted companies to report on factors affecting the performance and future prospects of their company. They will be required to consider their impacts on environmental and community matters if this is relevant to an assessment of the company. This is a step forward in ensuring greater corporate transparency and accountability.

TRADE AND INDUSTRY

Commission for Africa

Andrew George: To ask the Secretary of State for Trade and Industry what assessment he has made of the Commission for Africa's observations on the merits of using trade agreements to achieve growth and poverty reduction in developing countries. [6755]

Ian Pearson: The Government firmly believes that trade liberalisation through preferential, regional or multilateral agreements can play an important role in promoting economic growth and poverty reduction. As the Commission for Africa report highlights, it is essential that improvements are made to the supply capacity of African countries if they are to benefit fully from the potential gains that trade liberalisation brings.

Company Directors

Jeremy Corbyn: To ask the Secretary of State for Trade and Industry if he will make it his policy to allow company directors the discretion to forgo commercial advantage for ethical and public objectives. [7575]

Alun Michael: Company law provides a flexible framework which can be used by both commercial companies and companies formed for an altruistic purpose. We will be codifying directors' general duties in our proposed Company Law Reform Bill. In the case of a commercial company, directors have a duty to promote the success of the company for the benefit of its members. This means that the directors should put commercial considerations first, but, in doing so, they should foster effective relationships with employees, customers and suppliers, and in the community more widely. They need to pay regard to the long run as well as the short term consequences of their actions. We believe that this approach can both drive long-term company performance and maximise overall competitiveness and ensure that directors pay regard to the company's impact on the community and the environment.

Corruption

Malcolm Bruce: To ask the Secretary of State for Trade and Industry how many allegations of overseas bribery and corruption by British companies have been received by his Department since May 2004. [6481]

Ian Pearson: The Department of Trade and Industry has received one allegation of overseas bribery and corruption by a British company since May 2004, and ECGD have received two allegations.

Export Credits Guarantee Department

Mr. Arbuthnot: To ask the Secretary of State for Trade and Industry pursuant to the answer of 13 June 2005, *Official Report*, columns 78–9W, on Export Credits Guarantee Department, when he expects to report on the consultation; and if he will make a statement. [6185]

Ian Pearson *[holding answer 21 June 2005]*: The Export Credits Guarantee Department expects to report on the consultation in September 2005.

Mr. Arbuthnot: To ask the Secretary of State for Trade and Industry when the Government's response to the consultation, Estimating the Economic Cost of the ECGD to the DTI, will be published; and if he will make a statement. [6219]

Ian Pearson: The methodology to estimate the economic cost of ECGD, which was set out alongside Budget 2005, will be reviewed as part of, and published alongside, the 2006 Spending Review. Comments submitted by any interested party will continue to be taken into account before publishing the final method and economic cost figure.

Andrew George: To ask the Secretary of State for Trade and Industry how much the Export Credits Guarantee Department has allocated to *(a)* fossil fuel projects and *(b)* renewable energy in each of the last five years. [6797]

Ian Pearson: I refer the hon. Member for St. Ives to the answer given on 7 February 2005, *Official Report*, column 1263W. I will write to the hon. Member with up-to-date information as soon as it is available.

MG Rover

Mr. Willetts: To ask the Secretary of State for Trade and Industry what issues he has asked the inspectors Messrs Guy Newey and Gervase MacGregor to investigate in their inquiry into MG Rover; whether he has asked them to limit their inquiry to specific areas; when he expects them to present their report to him; and whether he plans to publish the report. [6667]

Ian Pearson: I refer the hon. Member to the answer I gave to my hon. Friend the Member for Birmingham, Selly Oak (Lynne Jones) on 15 June 2005, *Official Report*, column 412W.

Miners Compensation

John Mann: To ask the Secretary of State for Trade and Industry what assessment he has made of the implications of the proposed transfer of miners' compensation claims by the UDM from AMS Law Solicitors to Moss Solicitors in February. [7263]

Malcolm Wicks: The Department has not been informed by the UDM of any mass transfer of miners' compensation claims from AMS Law Solicitors to Moss solicitors.

John Mann: To ask the Secretary of State for Trade and Industry for what reasons his Department signed an agreement in 1999 on chronic obstructive pulmonary disease with the Union of Democratic Mineworkers following the signing of the January 1999 agreement on vibration white finger with Vendside Ltd. [7267]

Malcolm Wicks: Vendside is wholly owned by the Union of Democratic Mineworkers. It makes no practical difference to the claims handling arrangements which of the two is named in them.

Monopsonies/Oligopsonies

John Hemming: To ask the Secretary of State for Trade and Industry what plans he has to deal with monopsonies and oligopsonies with particular reference to *(a)* supermarkets, *(b)* disintermediation and *(c)* small shops. [7727]

Mr. Sutcliffe: The prime responsibility for operating our competition regime rests with the independent competition authorities. In the specific case of supermarkets it is the Office of Fair Trading, which is currently responsible for keeping under the review the Code of Practice governing supermarkets' relations with their suppliers and for dealing with any other competition issues in the sector.

Onshore Wind Technology

Mr. Sarwar: To ask the Secretary of State for Trade and Industry what action he is taking to support newly emerging renewable technologies other than onshore wind farms. [6906]

Malcolm Wicks: The Government are providing just over £500 million of support between 2002–08 to help develop emerging renewable and low carbon technologies. This will take the form of spending on R&D and funding for capital grants. Onshore wind is not eligible for capital grants, except in the case of small community schemes supported under Clear Skies.

Funding includes grants of £117 million for offshore wind, over £60 million for energy crops and biomass, £31 million for PV, £12.5 million for community schemes and as announced last year, £50 million for the setting up of a Marine Renewables Deployment Fund.

On 14 June, it was announced that a £40 million–four year funding package to support demonstrations of carbon abatement technologies (£25 million) and hydrogen and fuel cell technologies (£15 million).

Total public expenditure on research and development for renewable energy sources for 2003–04 was estimated at over £29 million.

Opencast Mining (Scotland)

Sandra Osborne: To ask the Secretary of State for Trade and Industry what discussions he has had with the Scottish Executive on the implications of new planning guidelines for opencast mines in relation to meeting Scotland's future energy requirements. [6103]

Malcolm Wicks: None. At the Scottish Executive's invitation, officials commented on the draft Review of National Policy Guideline 16 before it was submitted to Scottish Executive Ministers ahead of the public consultation period.

Timeshares

Stewart Hosie: To ask the Secretary of State for Trade and Industry if he will bring forward legislation to make it illegal for a timeshare operation to dispose of timeshare development without offering full compensation based on the true value of each owner's holiday week. [7194]

Mr. Sutcliffe: I have no plans to bring forward legislation of the type described by the hon. Member. The conditions under which a timeshare resort owner is able to sell a resort will be a matter of the contracts he holds with the timeshare owners. The cross-border nature of the industry and the difficulties which this can cause in cases where individual timeshare owners feel they have a case to pursue against their resort supplier are such that issues of the type alluded to in the question are best considered in the European context.

I have written recently to Commissioner Kyprianou to urge him to ensure that the projected review of the operation and scope of the Timeshare Directive (implemented in the UK by the Timeshare Act 1992 as amended) is given urgent attention. Industry and consumer stakeholders will have the opportunity to present the Commission with evidence of failings in the regime in the course of the review, as will the Department and the Office of Fair Trading.

Wind Farms

Mr. McGovern: To ask the Secretary of State for Environment, Food and Rural Affairs what assessment she has made of the risk to sea birds of placing a large wind farm in the Thames Estuary; and if she will make a statement. [7011]

Malcolm Wicks: The potential impacts of offshore wind farm projects are considered in detail during the process that determines whether to grant consent for those projects. In support of an application for consent, the applicant will undertake an assessment of a wide range of impacts of the project, the results of which will be submitted in the form of an environmental statement with the application.

My right hon. Friend the Secretary of State will, in determining the application, consider the results of a wide ranging public consultation exercise on the applicant's assessment that will include English Nature and other relevant bodies as necessary.

The Department of Trade and Industry has commissioned and part-funded with Defra and wind farm developers, a comprehensive programme of aerial bird surveys in each of the three strategic areas used for

Round 2 of offshore wind farm leasing including the Thames Estuary. The programme is already providing valuable information about bird populations in those areas which will be utilised by developers, regulators and consultees in their deliberations of wind farm impacts.

TRANSPORT

Concessionary Fares

1. **Mr. Andrew Turner:** To ask the Secretary of State for Transport what estimate he has made of the cost to his Department of the concessionary travel fare scheme for pensioners. [7334]

Mr. Darling: The Government will provide an extra £350 million in 2006–07 which they believe will be sufficient to fund the cost to local authorities.

Crossrail (London Olympic Bid)

14. **Angela Watkinson:** To ask the Secretary of State for Transport what discussions he has had with the Secretary of State for Culture, Media and Sport on the implications of the Crossrail project for the London Olympic Bid. [7347]

Derek Twigg: Discussions were held as part of preliminary work, before the decision to bid was made in May 2003. Crossrail is not, and never has been part of London's Olympic Bid.

Rail Utilisation Strategy (West Midlands)

15. **Dr. Tony Wright:** To ask the Secretary of State for Transport if he will make a statement on the West Midlands Rail Utilisation Strategy. [7348]

Dr. Ladyman: The document is currently being finalised and it will be published soon.

Road Fund Tax

16. **Ann Winterton:** To ask the Secretary of State for Transport what estimate he has made of current levels of evasion of the road fund tax. [7349]

Dr. Ladyman: Vehicle excise duty evasion is measured by annual roadside surveys of around 1 million vehicles. The 2004 survey indicated that vehicle excise duty evasion stood at 3.4 per cent. of the revenue due (around £129 million per annum).

National Road Pricing System

17. **Mr. Carmichael:** To ask the Secretary of State for Transport if he will make a statement on the introduction of a national road pricing system. [7350]

Dr. Ladyman: In line with their manifesto commitments, the Government are examining the potential of moving away from the current system of motoring taxation towards a national system of road pricing.

Road Improvements

19. **Greg Clark:** To ask the Secretary of State for Transport when he expects work to begin to dual the A21 between Tonbridge and Pembury if the project is prioritised by the South East England Regional Assembly. [7352]

Dr. Ladyman: If the current regional prioritisation exercise should give this scheme a high priority the earliest that construction could start is 2008. In the meantime the Highways Agency will continue to develop the scheme towards publication of draft orders and, if necessary, public inquiry.

Road Improvements

Mr. Laurence Robertson: To ask the Secretary of State for Transport what recent discussions he has had with the Highways Agency about plans to improve the A417 between Nettleton Bottom and Brockworth bypass, Gloucestershire; and if he will make a statement. [7353]

Dr. Ladyman: Although the Secretary for State has had no recent discussions with the Highways Agency he is aware that the Agency has been developing this scheme. The scheme is not currently in the Government's Targeted Programme of Improvements.

The trunk road network has been divided into two categories: routes of national importance and routes of predominantly regional significance, with the intention of getting greater regional input into transport spending decisions. The A417 is an important regional road, so the next step will be for the South West Region Planning Body to advise where this scheme should rank alongside other transport schemes in the region. Ministers will then decide whether the scheme should be added to the programme.

A38

Mr. Robathan: To ask the Secretary of State for Transport what the outcome of the noise hotspots assessment was for the *(a)* A38 Shobnall Road, *(b)* A38 Wyggeston, *(c)* M6 Western Downs, *(d)* A38 Branston and Ashmole—Branston B—Near A38 Junction and *(e)* A38 Branston and Ashmole—Branston A—Lichfield Road. [7684]

Dr. Ladyman: The A38 Wyggeston Road; M6 Western Downs between Junctions 12 and 13; and A38 Branston and Ashmole (sites A and B) are eligible for future funding as they meet some of the criteria. The A38 Shobnall Road received quieter noise resurfacing works as part of the Burton By-pass renewals scheme. This was completed January 2005.

A40

Mr. Crabb: To ask the Secretary of State for Transport (1) how many accidents occurred in each year between 1984 and 2004 on the A40 road between Carmarthen and St. Clears; [6910]

(2) how many accidents occurred in each year between 1984 and 2004 on the A40 road between St. Clears and Haverfordwest. [6911]

Dr. Ladyman: The information requested is shown in the following table. Figures for 2004 are not yet available.

Number of accidents (involving personal injury) on the A40: 1984–2003

	Section between Carmarthen and St. Clears	*Section between St. Clears and Haverfordwest*
1984	30	17
1985	12	24
1986	19	27
1987	8	33
1988	9	30
1989	14	46
1990	17	51
1991	22	33
1992	15	30
1993	19	33
1994	18	30
1995	15	39
1996	14	34
1997	13	39
1998	9	37
1999	13	26
2000	11	31
2001	9	19
2002	10	29
2003	9	22

Air Displays

Mr. Dismore: To ask the Secretary of State for Transport what assessment he has made of the impact on air displays of the proposed increase in fees for an Article 70 display permission; and if he will make a statement. [7060]

Ms Buck: The Secretary of State has made no such assessment. The Civil Aviation Authority (CAA) commenced a 12 week consultation on proposals for its safety regulation charging schemes on Friday 10 June. This covers the charging period from 1 January 2006 to 31 March 2007. In due course, the CAA Board will seek the Secretary of State's approval for the revised schemes, as required by the Civil Aviation Act 1982.

Aircraft Pollution

Paul Flynn: To ask the Secretary of State for Transport what proposals he has to reduce pollution from aircraft. [6216]

Ms Buck: The Government are committed to tackling pollution from aircraft. The measures we are taking are set out in Chapter 3 of "The Future of Air Transport" White Paper. They include pressing for the inclusion of aviation in the European Union emissions trading scheme from 2008, or as soon as possible thereafter.

We have introduced the Civil Aviation Bill which clarifies and strengthens the measures available to airports for dealing with aircraft noise. This includes a greater ability to introduce and enforce noise amelioration measures beyond airport boundaries and an ability to impose penalties where aircraft stray from routes designed to mininise noise. The Bill also makes explicit the powers of airports to set charges which reflect local emissions from aircraft.

These plans build on Government action pressing for tighter international emissions standards, funding research and promoting sustainability within the sector.

Crossrail

Andrew Rosindell: To ask the Secretary of State for Transport whether Crossrail is exempt from the provisions of the Freedom of Information Act 2000. [7490]

Derek Twigg: Cross London Rail Links Ltd. (CLRLL) is not wholly owned by any one public authority, and as such is not covered by the Freedom of Information Act 2000 (FOIA). I understand from CLRLL that the board of directors have undertaken that the company should behave as though it has to conform to the Act.

Andrew Rosindell: To ask the Secretary of State for Transport what criteria were used to decide that the Romford Crossrail Depot Option required a dive-under. [7491]

Derek Twigg: Due to the high frequency of trains running at speeds of up to 80 miles per hour on the main lines past the proposed Crossrail depot, a grade separated crossing is required in order for Crossrail trains to enter and leave the depot and access the electric lines on which Crossrail services will operate.

Double-deck Trains

Keith Vaz: To ask the Secretary of State for Transport (1) on what train lines the Government is planning to introduce double-deck trains; [7797]

(2) whether the existing UK rail network can accommodate double-deck trains; [7798]

(3) what assessment the Government has made of the merits of *(a)* introducing double-deck trains and *(b)* lengthening platforms and adding extra carriages to trains. [7799]

Derek Twigg: The Department will be looking at a variety of options for increasing rail capacity both over the short term and the longer term. Among other options, this will include an assessment of the potential costs and benefits of using double-decker trains in the UK.

Durham Roads Budget

John Cummings: To ask the Secretary of State for Transport what central funding has been allocated to Durham county council roads budget in each year since 1997. [6884]

Ms Buck: The Department has approved over £103 million of block funding to Durham county council between April 1997 and March 2005. Of this, £46.115 million was for capital maintenance, £35.697 million was for Integrated transport and £21.382 million was for major transport projects.

The funding provided to Durham county council over the above-mentioned period is shown in the following table.

Durham CC central funding for roads

£ million

	Capital maintenance	*Integrated block*	*Major schemes*	*Total*
1997–98	0.956	0.480	0	1.436
1998–99	0.658	0.370	0	1.028
1999–2000	4.238	4.871	0	9.109
2000–01	5.24	2.190	4.200	11.63
2001–02	8.555	5.397	1.955	15.907
2002–03	9.103	6.440	6.117	21.66
2003–04	8.008	8.054	1.007	17.069
2004–05	9.357	7.895	8.103	25.355
Total	46.115	35.697	21.382	103.194

Gatwick Express

Mr. Peter Ainsworth: To ask the Secretary of State for Transport when he last met *(a)* the Strategic Rail Authority and *(b)* the British Airports Authority to discuss the future of the Gatwick Express; and if he will make a statement. [5036]

Derek Twigg *[holding answer 16 June 2005]*: Officials from the Department for Transport and Strategic Rail Authority meet regularly to discuss the Brighton Mainline. They have also recently held a series of meetings with the British Airports Authority to specifically discuss the future of the Gatwick Express.

Heathrow

Dr. Cable: To ask the Secretary of State for Transport what estimate he has made of the number of passengers at Heathrow who were *(a)* UK residents on business trips, *(b)* overseas residents on business trips to the UK, *(c)* overseas residents on business trips transferring or transiting at Heathrow en route to an overseas destination, *(d)* UK residents on leisure trips, *(e)* overseas residents on leisure trips to the UK and *(f)* overseas residents on leisure trips transferring or transiting at Heathrow en route to an overseas destination, in each of the last five years. [6465]

Ms Buck: The following table shows terminal (terminating and transfer) and transit passengers at Heathrow who were UK and overseas residents on business or leisure trips by routes.

Terminal and transit passengers at Heathrow 2000–04

Answer:		*2000*	*2001*	*2002*	*2003*	*2004*
A	Business trips by UK residents	11.7	11.0	10.4	10.3	11.5
B	Business trips to/from the UK by overseas residents	8.6	7.7	7.7	7.4	7.7
C	Overseas residents on business trips transferring at Heathrow between an overseas origin and an overseas destination	4.0	3.8	4.6	4.6	4.7
D	Leisure trips by UK residents	17.4	16.7	17.9	18.0	19.0
E	Leisure trips to/from the UK by overseas residents	12.4	10.7	10.1	11.0	11.5
F	Overseas residents on leisure trips transferring at Heathrow between an overseas origin and an overseas destination	9.6	9.8	11.6	11.6	12.3
Transit passengers (million)		0.3	0.3	0.3	0.3	0.2

Illegal Drivers

Mr. Drew: To ask the Secretary of State for Transport if he will estimate the number of drivers who have never taken a driving test. [7240]

Dr. Ladyman: It is not known how many full driving licence holders have never taken a driving test. The Road Traffic Act 1934 provided that all new applicants would have to undertake a test of competence to drive. The Act provided an exemption from the need to take a driving test for those drivers who had held a provisional licence prior to 1 April 1934. In addition between 18 February 1947 and 17 February 1948 provisional licences obtained during the second world war were converted to full licences without the requirement to sit a driving test. Records kept at this time did not distinguish between full licence holders who obtained full entitlement as a consequence of passing a test and those who relied on the exemptions contained in the appropriate Acts.

M18

Mr. Greg Knight: To ask the Secretary of State for Transport what plans he has to erect fencing alongside the carriageways of the M18 motorway. [7427]

Dr. Ladyman: There are currently no plans to erect any new boundary or noise fencing alongside the carriageways of the M18 motorway.

Rail Freight

Dr. Kumar: To ask the Secretary of State for Transport what steps are being taken to encourage the transporting of freight by rail. [5901]

Derek Twigg: Rail plays a crucial role in goods transport and we wish to see freight travelling by rail instead of road wherever this makes sense. This is delivered most effectively by a competitive and dynamic private sector rail freight industry, with our role to maintain the conditions where the industry can flourish.

We plan to provide approximately £24 million of grants in each of the next two years, and the industry also benefits from the current unprecedented level of investment in the network, including some investment specifically supporting rail freight traffic, for instance the £30 million Felixstowe gauge enhancement completed last year.

In addition, the ORR has recently published its policy on long-term contracts, providing a platform for continued investment by the industry and greater commercial confidence for their customers.

Rail Passengers

Mr. Hoyle: To ask the Secretary of State for Transport what estimate his Department has made of the number of passengers who used the London to Scotland sleeper in each of the last three years; and at which stations it stopped in this period. [6636]

Derek Twigg: The London to Scotland sleeper service is part of the Scotrail franchise and is the responsibility of the Scottish Executive.

Figures for the number of passengers using sleeper services between London and Scotland in each of the last three years are not held centrally. However, industry data shows the following level of patronage:

Fiscal year	*Passenger journeys*
2002–03	234,000
2003–04	237,000
2004–05	236,000

Rail Projects

Mr. Hayes: To ask the Secretary of State for Transport if he will make a statement on Government funding for the *(a)* Euston rail development and *(b)* extension of the Eurostar route. [5220]

Derek Twigg: The Government has no plans to fund the extension of Eurostar services which will transfer to St. Pancras upon completion of Section 2 of the Channel Tunnel Rail Link in 2007, but the connection from new St. Pancras International station to the West Coast Main Line is being built under the CTRL Project.

Railway Stations

Mr. Hoyle: To ask the Secretary of State for Transport which railway stations in Lancashire have CCTV. [6638]

Derek Twigg: I have been advised by the Strategic Rail Authority (SRA) that the following railway stations in Lancashire have CCTV:

Blackpool North
Blackburn
Chorley
Church and Oswaldtwistle
Wigan Wallgate
Lancaster
Preston
Carnforth

Bob Spink: To ask the Secretary of State for Transport if he will commission a feasibility study into the provision of a new parkway rail station for Canvey Island linking into the Fenchurch Street line at Pitsea. [7383]

Derek Twigg: There are no plans for a new parkway station for Canvey Island. The hon. Member may wish to refer to the Strategic Rail Authority's document, New Stations: A Guide for Promoters (copy in the Library of the House) which outlines the process to be followed by third party sponsors of new stations. Improvements are being made to Pitsea station at a cost of £1 million.

Railways

Meg Hillier: To ask the Secretary of State for Transport what progress there has been towards a higher frequency train service on the North London line. [6926]

Derek Twigg: The Department for Transport (DfT) and Transport for London (TfL) are working on opportunities to give the London Mayor more responsibility for the delivery of the North London line. It is hoped that agreement will be reached over the course of the summer on how the Mayor will play an increased role in specification and delivery and he is now considering how enhancements to the current service can be achieved to deliver value for money.

Kerry McCarthy: To ask the Secretary of State for Transport what the average increase was in long distance fares charged by each of the rail franchise holders operating in England between 2004 and 2005. [6945]

Derek Twigg: The information is not available in the form requested. The Strategic Rail Authority publishes a Rail Fares Index in its 'National Rail Trends', of which a copy has been placed in the Library of the House. This indicates that the real terms change in average prices for all the long distance operators between 2004 and 2005 was 1.5 per cent.

David Taylor: To ask the Secretary of State for Transport what recent studies his Department has *(a)* carried out and *(b)* evaluated into the viability of introducing passenger community rail services on a seasonal basis. [6973]

Derek Twigg: The Strategic Rail Authority's "Community Rail Development Strategy" provides the flexibility for local initiatives to reflect seasonal requirements in planning timetables. The cost of providing additional resources solely for seasonal services is high and may not always represent value for money.

Mr. Dismore: To ask the Secretary of State for Transport if he will make a statement on the report from the Association of Train Operating Companies advocating a congestion charge for the railways at peak hours. [7054]

Derek Twigg: There are no plans to introduce a congestion charge for the railways.

Bob Spink: To ask the Secretary of State for Transport what constraints exist on an increase in passenger capacity on the Fenchurch street to Shoeburyness rail line; and if he will make a statement. [7083]

Derek Twigg: The rolling stock formations now in use on the Fenchurch street to Shoeburyness rail line are sufficient to accommodate demand within the limits prescribed to control overcrowding. Constraints that would place a limit on increased passenger capacity include the number of trains available; the fact that platforms on the Tilbury loop section of the c2c network cannot accommodate trains longer than 8 cars; and signalling headways and therefore the number of trains that can stop in the West Ham area.

Mr. Drew: To ask the Secretary of State for Transport how many *(a)* rail bridges and *(b)* embankments there are over roads in the Stroud constituency; and what measures have been put in place to improve safety around them. [7242]

Ms Buck: This information is not held centrally in the Department. Rail infrastructure is a matter for Network Rail.

Mr. Milburn: To ask the Secretary of State for Transport pursuant to the answer of 16 June 2005, *Official Report*, column 535W on Railways, how many prosecutions there were for trespassing on railways in the UK in each of the last five years. [7969]

Derek Twigg: I refer my right hon. Friend to the answer given on 21 June 2005, *Official Report*, column 920W.

Road Safety

Colin Challen: To ask the Secretary of State for Transport what research has been conducted in the last five years into the safety of re-surfaced roads in all weather conditions; and what the key findings were. [7568]

Dr. Ladyman: Following the concerns expressed by Derbyshire county council in 2001 regarding the skid resistance on newly laid surfaces that were based on their own specification, the Highways Agency carried out an initial assessment of the skid resistance properties of newly laid modern surfaces. These findings were inconclusive and therefore a further phase of measurements and assessment were instigated in 2003. The findings are to be reported shortly. The Highways Agency also commissioned research in early 2005 regarding the accident risks on the modern surfaces. Findings will be reported in 2008.

The Department for Transport, on behalf of the UK Roads Board has commissioned best practice guidance for local authorities on how and where thin surfacings and stone mastic asphalts can be applied. The results of this research will be available in the autumn.

Speed Limits

Ann Winterton: To ask the Secretary of State for Transport what criteria his Department uses in its national policy on implementing speed limits on roads; and if he will make a statement. [6791]

Dr. Ladyman: The Government is responsible for setting the national speed limits—the maximum limits for the different categories of roads, namely:

70 mph for motorways and dual carriageways;

60 mph for single carriageway roads;

30 mph for urban street-lit roads ('restricted roads').

The Government also sets the lower speed limits which apply to defined categories of heavy vehicles.

Traffic authorities (local highway authorities and the Highways Agency) have the powers to set local speed limits through section 84 of the Road Traffic Regulation Act 1984, where they feel that the national limit is not appropriate, being best placed to manage their road network and set appropriate speed limits, taking into account local needs and considerations.

To help ensure consistency in the setting of local speed limits, the Department has issued guidance, currently set out in Circular Roads 1/93.

Many developments have taken place in speed management since 1993, and the Department consulted on draft updated guidance on setting local speed limits at the end of 2004. As well as further improving clarity and consistency, the draft seeks to incorporate important wider factors such as quality of life through, for example, striking a more sensible balance between road safety, accessibility and environmental objectives, especially in rural areas, and taking better account of the needs of more vulnerable road users.

The consultation prompted a considerable number of wide-ranging comments, which are currently being analysed. The updated guidance on the setting of local speed limits will be published later this year.

Mr. Duncan: To ask the Secretary of State for Transport what plans he has to review statutory speed limits on UK roads. [7110]

Mr. Darling: The Government has no current plans to review the national speed limits for which it is responsible, namely:

70 mph for motorways and dual carriageways;

60 mph for single carriageway roads;

30 mph for urban street-lit roads ('restricted roads').

And the lower speed limits which apply to defined categories of heavy vehicles.

The Department is however in the process of updating its guidance to Traffic authorities (local highway authorities and the Highways Agency) on the setting of local speed limits, which are set through section 84 of the Road Traffic Regulation Act 1984 when the national limit is not appropriate.

Taxis

Mr. Hancock: To ask the Secretary of State for Transport what his timetable is for publishing accessibility regulations for taxis under Part 5 of the Disabilities Discrimination Act 1995; and if he will make a statement. [7559]

Ms Buck: The Government's proposals to introduce Taxi Accessibility Regulations under Part 5 of the Disability Discrimination Act 1995 (DDA) were announced in the House on 26 October 2003. These would see the phasing in from 2010 (for all newly licensed vehicles), of regulations in specified licensing areas (those which meet one or more of the following criteria: a licensing authority area population of a least 120,000 people; a major transport interchange; a major tourist attraction or an existing mandatory policy resulting in 100 per cent. accessible vehicles). Full compliance would be required by 2020.

The 2010 date has been proposed to accommodate a full public consultation process, to give sufficient time for vehicle manufacturers and converters to produce new models that meet the regulations, and to give the trade sufficient time to adapt to the change.

We are currently developing the technical specification which will form the basis for the regulations. To assist this process, the Department recently held a seminar for stakeholders from industry, organisations representing disabled people and licensing authorities to discuss both the technical and policy implications of the proposals. The views expressed at the seminar will be used to shape the final consultation package.

In the period before regulations are introduced, local licensing authorities remain free to introduce their own accessibility policies and many have done so already.

Train Operating Companies

Mr. Dismore: To ask the Secretary of State for Transport if he will ensure that train operating companies that plan to operate a congestion charge for commuters at peak hours are not awarded rail franchises. [7351]

Derek Twigg: A wide range of fares are regulated. This includes the majority of peak commuter fares including season tickets and travelcards. Overall, regulated fares are capped so that they cannot increase by more than RPI + 1 per cent. a year. Other fares are entirely a matter for train operators, and will continue to be set on a commercial basis.

Violence Against Transport Personnel

Mr. Clappison: To ask the Secretary of State for Transport how many *(a)* railway employees, *(b)* bus drivers and conductors and *(c)* taxi drivers have been the victims of offences of violence in each of the last 10 years. [4944]

Derek Twigg: *(a)* The number of railway staff assaulted while on duty over the last seven financial years, and recorded by the British Transport Police (BTP), is as follows:

	Number
1998–99	1,225
1999–2000	1,392
2000–01	1,329
2001–02	1,438
2002–03	1,925
2003–04	2,240
2004–05	2,769

Notes:

1. Due to changes in Home Office counting rules in recording crime, introduced in April 1998, data prior to that date is non-comparable.
2. The introduction by the Home Office of a National Crime Recording Standard (NCRS) had the effect of increasing the number of recorded crimes by an average of 22 per cent. in all police forces in England and Wales. The BTP adopted the NCRS in April 2002.
3. Figures include England, Scotland and Wales.

(b) The number of assaults on bus crews, including conductors and inspectors, since 1995 is as follows:

	Number
1995	1,938
1996	2,154
1997	1,899
1998	1,594
1999	1,680
2000[1]	1,260
2001	2,638
2002	2,874
2003[2]	953

[1] Data for 2000 is considered unreliable owing to poor level of reporting.

[2] Data for 2003 excludes London operators for which no report was made by TfL.

Notes:

1. Data for London provided by Transport for London (TfL).
2. Data for outside London provided by a panel of large bus operators selected by DfT.
3. Data for 2003 is the latest available.
4. Figures include England, Scotland and Wales.

(c) No information is available on assaults on taxi drivers.

Virgin Trains

Mr. Hoyle: To ask the Secretary of State for Transport what estimate his Department has made of the proportion of passengers who had no seat on Virgin trains from London to the North West in the last period for which figures are available. [6635]

Derek Twigg: I would refer my hon. Friend to the train operator, Virgin Trains.

TREASURY

Aid Provision

Tony Baldry: To ask the Chancellor of the Exchequer what steps are being taken to improve EU member states' targeting of aid to the poorest countries; and if he will make a statement. [7673]

Mr. Ivan Lewis: The European Union has made an historic commitment to double EU aid by 2010, as part of a timetable to reach 0.7 oda/GNI by 2015. This agreement will raise aid from last year's levels of around US$40 billion to, by 2010, over $80 billion. The agreement also includes a commitment that at least 50 per cent. of new aid will go to Africa.

The European Commission is currently reviewing its international aid policy. The UK is lobbying to improve the poverty focus of EC aid, and to ensure that a greater proportion is spend in low-income countries.

Aviation Taxation

Mr. Carmichael: To ask the Chancellor of the Exchequer what his policy is on the introduction of new taxes on *(a)* domestic and *(b)* international UK flights to fund development aid for Africa; and if he will make a statement. [5602]

Mr. Ivan Lewis *[holding answer 21 June 2005]:* At the 10–11 June G8 Finance Ministerial, Ministers agreed:

"to continue our work programme on the IFF and its pilot, the IFF for Immunisation; some of the revenue proposals from the Landau report, including a pilot project, supported and led by France and Germany, for a contribution on air travel tickets to support specific development projects and to refinance the IFF".

Burma (Imports)

Vera Baird: To ask the Chancellor of the Exchequer what tonnage of goods has been imported to the UK from Burma through *(a)* Teesport, *(b)* Harwich, *(c)* Felixstowe and *(d)* London per year on average over the past five years. [7696]

Dawn Primarolo: The tonnage of goods imported to the UK from Burma through *(a)* Teesport, *(b)* Harwich, *(c)* Felixstowe and *(d)* London are shown in the table:

UK imports from Burma: general trade 2000–04

Tonnes

Port	*2000*	*2001*	*2002*	*2003*	*2004*[1]	*Average (2000–04)*
Teesport[2]	0.0	0.0	0.0	0.0	0.0	0.0
Harwich	0.0	0.0	0.0	0.0	0.0	0.0
Felixstowe	5,624.5	6,982.3	7,259.9	7,480.1	6,478.7	6,765.1
London seaport[3]	6,697.1	5,012.2	1,375.9	1,714.7	53.5	2,970.7
London airports[4]	404.8	409.5	810.4	930.5	104.8	532.0

[1] Figures for 2004 are provisional.
[2] Teesport includes Hartlepool and Middlesbrough.
[3] London seaport includes Tilbury.
[4] London airports includes Heathrow, Gatwick, Stansted and Luton.

Overseas Trade Statistics, HM Revenue and Customs

Cost Recovery

Bob Spink: To ask the Chancellor of the Exchequer when he intends to update his guidance on full cost recovery for voluntary and community sector organisations; and what impact he expects this will have on *(a)* adult and *(b)* children's hospice funding. [7075]

Mr. Ivan Lewis: The Government will publish during 2005 a second edition of Guidance to Funders, which will include detailed guidance to those issuing public funds on how to implement full cost recovery.

The NHS should be working with both children's and adults' hospices towards agreed levels of service, ensuring that the price for the agreed level of service reflects the full cost of the service to be provided, including the legitimate portion of overhead costs.

Further information for the voluntary palliative care sector on the principles of full cost recovery, together with Healthcare Resource Groups and Payment by Results, is being prepared by The National Partnership Group for Palliative Care.

Customs and Excise (Fraud)

Gregory Barker: To ask the Chancellor of the Exchequer whether he plans to review previous criminal investigations into cases of fraud by staff working for Customs and Excise; and if he will make a statement. [6644]

Dawn Primarolo *[holding answer 23 June 2005]:* The Internal Investigation Division of HMRC, together with the Professional Standards Unit of Law Enforcement Investigation, is currently reviewing a number of historic criminal cases involving officers of HM Customs and Excise. If the hon. Member has information pertinent to a specific case we would be pleased to look into the matter.

Customs and Excise Staff (Criminal Investigations)

Gregory Barker: To ask the Chancellor of the Exchequer if he will list the criminal investigations which have been undertaken by Customs and Excise in respect of which legal proceedings are not ongoing into allegations of fraud and other malpractice by staff working for Customs and Excise in the last 10 years; and what the dates were of each. [7574]

Dawn Primarolo: Over the last five years HMCE have conducted 12 criminal investigations where serving officers have been identified as potential suspects. Of these cases three have been put before the courts and have been finalized. The dates and outcomes of these cases is as follows:

2001—Officer acquitted of fraudulent evasion of VAT charge.

2004—Officer sentenced to two years and six months for conspiracy to cheat the Revenue.

2005—Officer sentenced to 15 years imprisonment for conspiracy to import controlled drugs.

Of the remaining cases:

Three have been concluded with no action being taken against the officers, as there was insufficient evidence.

One case was dealt with as a disciplinary matter.

Five cases are currently before the courts or awaiting trial.

Between 1995 and 2000 criminal investigations involving members of staff would have been undertaken by the national investigation service (NIS) of HMCE, or regional criminal investigation units (CIU). These investigations would have been restricted to matters assigned to HMCE, such as VAT or Excise duty evasion and the importation of prohibited or restricted goods.

Finance Bill

Mr. Austin Mitchell: To ask the Chancellor of the Exchequer pursuant to the oral statement of 7 June 2005, *Official Report*, column 1133, on the Finance Bill, what model was used to estimate the VAT gap. [7707]

Dawn Primarolo: A detailed explanation of the technical approach for measurement of VAT losses was provided in "Measuring Indirect Tax Losses", published in November 2002, alongside the pre-Budget report 2002. An updated version of this paper entitled "Measuring and Tackling Indirect Tax Losses" was published in December 2003 and the latest update was published in December 2004. Copies of all these publications can be obtained from the House Library.

HM Revenue and Customs

Adam Price: To ask the Chancellor of the Exchequer for what reasons HM Revenue and Customs has not yet announced its restructuring plans; and when these plans will be announced. [7356]

Dawn Primarolo: Details of the emerging structure and organisation of the new Department have been published in the spring departmental report 2005, which was published on 16 June 2005.

Adam Price: To ask the Chancellor of the Exchequer how much HM Revenue and Customs and its predecessor bodies spent on consultancy projects in each of the last four years for which figures are available. [7354]

Dawn Primarolo: Information is not available for 2001–02 and could be obtained only at a disproportionate cost. In respect of 2002–03 and 2003–04, I refer the hon. Gentleman to the answer the former Financial Secretary (Mr. Timms) gave to the hon. Members for Stratford-upon-Avon and New Forest East on 25 October 2004, *Official Report*, columns 1055–6W. In 2004–05, expenditure by the Inland Revenue and HM Customs and Excise was £74 million and £61 million, respectively.

Hospital Infections

Mr. Burstow: To ask the Chancellor of the Exchequer how many deaths have been recorded in each year since 2001 where *(a) Clostridium difficile*, *(b)* glycopoptide resistant enterococci, *(c)* small round structured viruses and *(d)* Acinetobacter was (i) mentioned on the death certificate and (ii) also the underlying cause of death. [7220]

John Healey: The information requested falls within the responsibility of the National Statistician, who has been asked him to reply.

Letter from Len Cook to Mr. Paul Burstow, dated 28 June 2005:

As National Statistician, I have been asked to reply to your recent Parliamentary Question asking how many deaths have been recorded in each year since 2001 where *(a) Clostridium difficile*, *(b)* glycopeptide resistant enterococci, *(c)* small round structured viruses and *(d)* Acinetobacter was (i) mentioned on the death certificate and (ii) also the underlying cause of death. (7220)

In the Tenth Revision of the International Classification of Diseases (ICD-10), deaths involving enterocolitis due to *Clostridium difficile* can all be identified from the code A04.7. Enterocolitis is the commonest illness caused by *C. difficile* infection. For causes other than enterocolitis that are also known to be associated with *C. difficile*, it is not possible to identify from ICD codes alone the number of deaths where *C. difficile* actually contributed to the death. For this reason, the only routinely available mortality statistics on *C. difficile* are those where it was associated with enterocolitis. These figures were provided in answer to a question from Mr David Lidington MP, Hansard Written Answer 3764, page 49W on 13 June.

Figures for glycopeptide resistant enterococci, small round structured viruses and Acinetobacter are not available from routine death certification data. These are laboratory classifications of microorganisms. Such microbiological detail is rarely used in describing the illnesses from which patients suffer or die. Furthermore, as the ICD is not designed to capture microbiological detail, there are no specific codes in ICD-10 to check whether there are any deaths for which these conditions were mentioned on the death certificate.

Mr. Burstow: To ask the Chancellor of the Exchequer what the *(a)* remit, *(b)* time scale and *(c)* reporting date are for the special study the Office for National Statistics is undertaking with the Health Protection Agency to identify the total number of deaths where *Clostridium difficile* was mentioned on the death certificate. [7221]

John Healey: The information requested falls within the responsibility of the National Statistician. I have asked him to reply.

Letter from Len Cook to Mr. Paul Burstow, dated 28 June 2005:

As National Statistician, I have been asked to reply to your recent Parliamentary Question asking about the remit, timescale and reporting date for the special study the Office of National Statistics is undertaking with the Health Protection Agency to identify the total number of deaths where *Clostridium difficile* was mentioned on the death certificate.

The remit of the special study currently being undertaken is to assess whether information on the number of deaths associated with *C. difficile*, beyond that available routinely, can be obtained by examining the text of death certificates with mention of illnesses other than enterocolitis that may be caused by this organism. This work is likely to take several months.

Initial identification of the likely number of deaths requiring manual checking will be completed in July. Only when this is complete will it be possible to estimate the timescale for the manual checking and subsequent release of the results of the study.

Income Tax Returns

Dr. Cable: To ask the Chancellor of the Exchequer what his estimate is of the total amount of financial penalties that have been collected by Her Majesty's Revenue and Customs for late filing of income tax self assessment returns for each of the last five years for which information is available, broken down by *(a)* fines, *(b)* interest charges and *(c)* other charges; and if he will make a statement. [7086]

Dawn Primarolo: The amount raised in respect of penalties paid for failure to submit self assessment tax returns, by the due date, in each year since 2000 is shown in the following table. The years relate to the former Inland Revenue accounting years that run to the end of October each year. Interest on late payment of penalties is not included in the table as the vast majority of interest charges arise because of late payment of the tax. There are no other charges.

Year to end of October	Penalties paid (£ million)
2000	33.01
2001	36.20
2002	36.45
2003	37.78
2004	37.38

Inheritance Tax/Stamp Duty

Mrs. Spelman: To ask the Chancellor of the Exchequer (1) what the average inheritance tax paid in *(a)* England, *(b)* Wales, *(c)* the UK and *(d)* each Government Office region has been in each year since 1997; [7434]

(2) what the average *(a)* stamp duty and *(b)* inheritance tax in London has been in each year since 1996. [7436]

Dawn Primarolo: 94 per cent. of estates do not pay inheritance tax. For estates that have paid tax, the average amount of inheritance tax in the UK is shown in the following table rounded to the nearest £1,000:

	Average UK inheritance tax bill (£000)
1996–97	85
1997–98	94
1998–99	97
1999–2000	97
2000–01	98
2001–02	103
2002–03	92
2003–04	81
2004–05	[1]83

[1] provisional

Equivalent figures are not available for individual counties or regions.

Estimates of average stamp duty arising from residential land and property transactions by country and region from 1996–97 are given in the following table. These estimates supersede figures which were given in *Hansard* in column 394W on 15 June 2005.

Averages £

	1996–97	1997–98	1998–99	1999–2000
North East	220	330	320	400
North West	320	300	400	540
Yorkshire and the Humber	320	350	360	510
East Midlands	330	330	420	600
West Midlands	410	380	490	700
East of England	520	620	800	1,080
London	960	1,130	1,630	2,600
South East	730	800	1,210	1,700
South West	490	550	670	1,030
Wales	260	350	370	470
Scotland	n/a	n/a	n/a	n/a
Northern Ireland	200	240	320	470

	2000–01	2001–02	2002–03	2003–04
North East	500	770	790	1,030
North West	610	730	1,010	1,250
Yorkshire and the Humber	510	570	990	1,360
East Midlands	720	740	1,200	1,760
West Midlands	880	1,090	1,450	1,880
East of England	1,530	1,960	2,370	3,150
London	3,830	4,420	4,910	5,880
South East	2,220	2,720	3,240	3,900
South West	1,380	1,560	2,080	2,820
Wales	530	580	1,060	1,380
Scotland	n/a	n/a	n/a	1,210
Northern Ireland	730	1,000	800	1,080

Inland Revenue Offices

Adam Price: To ask the Chancellor of the Exchequer whether it is his Department's policy to maintain a physical presence at local inland revenue offices. [7359]

Dawn Primarolo: HM Revenue and Customs is preparing business plans to meet its efficiency savings for 2005–08. These plans will ensure that HM Revenue and Customs still provides a face-to-face service at least as good as at present for customers who need it. It is too early to say how the plans might affect any particular office.

Managed Expenditure

Mr. Herbert: To ask the Chancellor of the Exchequer what the increase in total managed expenditure between 1999–2000 and 2007–08 inclusive was in real terms. [7950]

Mr. Des Browne: Total managed expenditure in real terms from 1999–2000 to 2007–08 is shown in table 1.2 of "Public Expenditure Statistical Analyses (PESA) 2005" (CM6521).

Pension Funds

Mike Penning: To ask the Chancellor of the Exchequer what the total tax receipts from pension funds has been in each year since 1997; and if he will make a statement. [7644]

Mr. Ivan Lewis: Pension funds held by approved pension schemes do not normally pay tax. The only exceptions are where a pension fund is involved in an activity outside the terms of tax approval and that approval is withdrawn; on very rare occasions where schemes pay tax on a part of their income for instance if they are trading or have an unreduced surplus; or if they make a taxable payment to a sponsoring employer or scheme member. The amount of tax paid by pension funds under these circumstances is not known. However, the Government continue to give generous tax relief to encourage pension savings—worth over £11 billion net in 2003–04.

Research Projects

Mr. Jack: To ask the Chancellor of the Exchequer if he will list the research projects being undertaken by *(a)* the Treasury and *(b)* Inland Revenue and Customs which are being paid for out of public funds. [1172]

Dawn Primarolo: The Treasury is undertaking four research projects at present which are being paid for out of public funds:

micro foundations of optimal fiscal stabilisation policy;

national Institute of Economic and Social Research (NIESR) fiscal instruments project;

a series of research seminars on the Chinese economy; and

quantitative research to attitudes to local taxation.

For research activity funded by the HMRC external research budget the information can be found at: http://www.hmrc.gov.uk/research/activities.htm

Tax Avoidance Schemes

Mr. Austin Mitchell: To ask the Chancellor of the Exchequer (1) what additional taxation revenue has been collected as a consequence of the introduction of the requirement for sellers of tax avoidance schemes to register the schemes with his Department; [7585]

(2) what tax loopholes have been closed since 1997; and how much additional tax revenue that has been generated by such action. [7622]

Dawn Primarolo: Changes to taxation are set out in successive Financial Statement and Budget reports, alongside estimates of the effects on Government revenues anticipated at the time of their introduction. Given that tax measures interact and have complex behavioural and economic effects, it is extremely difficult to separately identify the revenue implications of past tax changes of this type for current levels of revenues.

Mr. Austin Mitchell: To ask the Chancellor of the Exchequer how many accountancy firms have been prosecuted by his Department for selling aggressive tax avoidance schemes since 1997. [7708]

Dawn Primarolo: HMRC has not prosecuted any accountancy firms for selling aggressive tax avoidance schemes; selling an avoidance scheme would not normally involve activity that amounts to a criminal offence.

Tax Credits

Mr. McFall: To ask the Chancellor of the Exchequer how many awards for *(a)* child and *(b)* working tax credit there were in the constituency of West Dunbartonshire in (i) 2003–04 and (ii) 2004–05; how many awards were (A) underpaid and (B) overpaid at (1) 5 April 2004 and (2) 5 April 2005; and what the total amounts involved were in each case. [7526]

Dawn Primarolo: HMRC publications include estimates of numbers of in-work families (broken down by families with and without children) in each region, local authority and constituency with tax credits for 2003–04 awards, including information on underpayments and overpayments, based on final family circumstances and incomes for 2003–04. HMRC publications also provide more recent provisional estimates of numbers of in-work families, as at selected dates in 2004–05 for these areas. The constituency level breakdown refers to the constituencies that existed during the periods that the awards were in payment, but do not yet reflect constituency changes that occurred at the last general election. HMRC is currently producing new estimates based on the new constituency boundaries and hope to include them in the above publications very shortly.

The above mentioned publications can be found on the HMRC web site at http://www.hmrc.gov.uk/stats/personal-tax-credits/cwtc-geog-stats.htm.

Estimates of numbers of overpayments or underpayments for 2004–05 awards at 5 April 2005 will not be available until after family circumstances and incomes for 2004–05 have been finalised.

Keith Vaz: To ask the Chancellor of the Exchequer how much was paid in tax credits in 2004–05; and how much of that sum was overpayment now being claimed back. [7939]

Dawn Primarolo: Estimates of numbers of overpayments or underpayments for 2004–05 awards at 5 April 2005 will not be available until after family circumstances and incomes for 2004–05 have been finalised. The most recent estimates available for the net amount paid in tax credits and the net amount of overpayments is for awards at 5 April 2004 based on final family circumstances and incomes for 2003–04. They appear in the HMRC publication "Child and Working Tax Credits Annual statistics. 2003–04 Payments." The estimates are based on samples and are subject to significant sampling uncertainty. This publication can be found on the HMRC website at http://www.hmrc.gov.uk/stats/personal-tax-credits/cwtc-quarterly-stats.htm

Mr. Frank Field: To ask the Chancellor of the Exchequer what proportion of the sum overpaid in tax credits in 2003–04 is estimated to be due to fraud. [7994]

Dawn Primarolo: HM Revenue and Customs are currently reviewing a random sample of finalised 2003–04 awards—the first year of working tax credit and child tax credit—to measure the level of fraud and claimant error. However they will only be in a position to give an estimate of the level of fraud or error in next year, when the exercise has been completed.

Mrs. James: To ask the Chancellor of the Exchequer how many people in Swansea East have received *(a)* tax credits and *(b)* child tax credits since each was introduced. [7357]

Dawn Primarolo: Estimates of the number of in-work families (broken down by families with and without children) in each region, local authority and constituency with tax credits for 2003–04 awards, based on final family circumstances and incomes for 2003–04, appear in the HMRC statistical publication "Child and Working Tax Credits Annual statistics. 2003–04 Geographical analyses." More recent provisional estimates for in-work families, as at selected dates in 2004–05, in each such area appear in the publication "Child and Working Tax Credit Geographical Statistics." The estimates are based on samples and are subject to significant sampling uncertainty. These publications can be found on the HMRC web site at http://www.hmrc.gov.uk/stats/personal-tax-credits/cwtc-geog-stats.htm.

Tax-related Convictions

Mr. Austin Mitchell: To ask the Chancellor of the Exchequer if he will bring forward proposals for legislation under which accountancy firms would be required to declare tax-related convictions when filing tax returns for their clients. [7582]

Dawn Primarolo: That an accountancy firm had been prosecuted for tax-related offences is information that would already be known to HM Revenue and Customs and would be information in the public domain.

VAT

Dr. Cable: To ask the Chancellor of the Exchequer what the scale of unpaid VAT as a percentage of the theoretical liability for VAT has been in each of the last 10 years for which data are available; and if he will make a statement. [7088]

Dawn Primarolo: I refer the hon. Member to "Measuring and tackling indirect tax losses 2004", a copy of which is available in the Library of the House and available on the HM Revenue and Customs website.

Lady Hermon: To ask the Chancellor of the Exchequer how many *(a)* churches, *(b)* religious institutions and *(c)* sacred places in Northern Ireland have made use of the reduced VAT scheme introduced in the 2004 Budget. [7157]

Mr. Ivan Lewis: Since the introduction of the Listed Places of Worship Grant Scheme in April 2001, grants to refund VAT costs have been paid to 128 listed places of worship in Northern Ireland.

Since the extension of the scheme, from 1 April 2004, 57 listed places of worship in Northern Ireland have received grants covering the full amount of VAT paid on eligible works.

Working Tax Credit

Mr. Laws: To ask the Chancellor of the Exchequer how many people over state pension age have received working tax credit in the last two years, broken down by region; and what proportion of all childless recipients of working tax credit they represent in each case. [7683]

Dawn Primarolo: Estimates of the number of childless recipients of working tax credit by region at selected dates since July 2003 appear in the HMRC publication "Child and Working Tax Credit Geographical Statistics." Estimates of the number of families with at least one member over state pension age who were receiving working tax credit as at April 2004 and April 2005, and the proportion of all childless family recipients of working tax credit they represent, are listed below. Both of these estimates are based on samples and are subject to significant sampling uncertainty, which is described in the above mentioned publication. This publication can be found on the HMRC web site at http://www.hmrc.gov.uk/stats/personal-tax-credits/cwtc-geog-stats.htm.

Number and proportion of pensioner couples receiving WTC at for April 2004 and April 2005

	April 2004		April 2005	
Region	Pensioner Families Numbers (thousands)	Proportion Percentage	Pensioner Families Numbers (thousands)	Proportion Percentage
North East	0.7	4	0.7	3
North West	0.8	5	1.7	4
Yorks and The Humber	1.3	5	1.3	4
East Midlands	1.0	5	1.1	5
West Midlands	1.3	6	1.4	6
East	0.7	5	0.8	5
London	0.5	4	0.5	3

South West	1.5	7	1.8	7
Wales	1.3	7	1.5	7
Scotland	1.2	4	1.3	4
Northern Ireland	0.5	6	0.8	8
All (including Unknown)	12.6	5	14.0	5

World Bank/IMF

Tony Baldry: To ask the Chancellor of the Exchequer if he will press the World Bank and International Monetary Fund to end the practice of placing economic conditions on aid, loans and debt relief to developing countries. [7672]

Mr. Ivan Lewis: The Government have recently published a new policy paper, "Partnerships for Poverty Reduction: rethinking conditionality", which sets out our position on conditionality. Many developing countries and NGOs have expressed concerns about the use of conditionality in aid programmes. As set out in the policy paper, the Government believe that the relationship between donors and each developing country should be a partnership, based on shared commitments and priorities taken from the country's own poverty reduction strategy, and that progress should be measured against benchmarks from that strategy.

The UK is working to ensure that this is reflected in all the UK's bilateral programmes with developing countries. The World Bank and IMF are both undertaking reviews of their approach to conditionality this year. In the context of these reviews, the UK will work to ensure that these institutions support country-owned programmes and that conditions are not imposed externally.

Young Mothers

John Hemming: To ask the Chancellor of the Exchequer how many mothers in each age cohort from 12 to 19 have given birth in each year since 2000-01. [7493]

John Healey: The information requested falls within the responsibility of the national statistician. I have asked him to reply.

Letter from Len Cook to Mr. John Hemming, dated 28 June 2005:

As National Statistician I have been asked to reply to your recent Parliamentary Question asking how many mothers in each age cohort from 12 to 19 have given birth in each year since 2000–01. (7493)

The table below shows maternities by age of mother in the UK for each calendar year from 2000 to 2003.

Maternities by age of mother, 2000–03, United Kingdom

Age	*2000*	*2001*	*2002*	*2003*
12	5	10	13	9
13	40	40	50	29
14	274	258	241	204
15	1,348	1,290	1,202	1,152
16	4,374	4,254	4,082	4,109
17	10,172	9,748	9,802	9,882
18	15,588	14,981	14,715	15,171
19	20,221	19,553	19,039	19,322

EDUCATION AND SKILLS

Adult Education

Mr. Frank Field: To ask the Secretary of State for Education and Skills whether her Department will fully fund courses for adults at level 3 in Wirral in 2006–07. [7512]

Bill Rammell: The Department allocates funds for education and training in the post-16 learning and skills sector to the Learning and Skills Council (LSC). In the Department's Grant Letter of 15 November 2004, the LSC was allocated £6.8 billion in 2006–07 for learning participation, which includes funding for adult education.

The White Paper "Skills: Getting on in Business, getting on at work" published in March 2005 set out our commitment to introduce a new National Employer Training Programme (NETP) based on the successful Employer Training Pilots. The new programme will commence from April 2006 and offer employers access to the full range of training solutions they need from including free Skills for Life and first full level 2 provision. Level 3 provision will be available through it but employers will need to make a contribution.

The White Paper also gives a commitment to trial, in two regions, providing an additional element of subsidy alongside a contribution from the employer for level 3 training delivered flexibly through NETP. We will invest an additional £20 million per year in 2006–07 and 2007–08 to assess the impact of that way of operating prior to taking final decisions on the routing of public funds for level 3 training through the National Employer Training Programme.

We are currently working with the LSC and others to identify the regions for the trials and expect to make an announcement shortly.

Catering

Mr. Burstow: To ask the Secretary of State for Education and Skills what representations she has received about the content of the Level 1 Vocationally Related Qualification in Healthier Catering. [7244]

Jacqui Smith: We have not received any representations about the content of the Level 1 Vocationally Related Qualification (VRQ) in Healthier Catering. The qualification was developed by the Department together with the Food Standards Agency and People 1st, the Sector Skills Council for the hospitality industry. People 1st are taking the lead in accrediting the qualification with the Qualifications and Curriculum Authority, and representations relating to content of the qualification have been made directly to them.

Chemistry Students

Mr. Stephen O'Brien: To ask the Secretary of State for Education and Skills pursuant to the Answer of 14 June 2005, *Official Report*, column 370W, on student numbers, what her assessment is of the factors behind the uptake of chemistry by undergraduate students in higher education institutions in England since 1995–96. [6760]

Bill Rammell: Chapter 6 of the Government's "Science and innovation investment framework 2004–14" (HMSO, July 2004) discusses this in detail. Factors affecting the demand from students include teachers and their style of teaching; the teaching environment; the curriculum; public and media perception; and careers advice. There is also a perception by young people that science subjects are "more difficult".

Action being taken in response by Government and others includes: enhancing the quantity and quality of teachers in science and maths in schools and in further education with teacher training bursaries and "Golden Hellos"; supporting teachers' development through science learning centres; widening the variety of learning options to young people through curricular reforms; and raising the quality of careers education and guidance through partnership with schools and the Connexions Service.

City Academies

Helen Jones: To ask the Secretary of State for Education and Skills if she will place in the Library a copy of the admissions policy of each city academy; and which academies use the national normal distribution curve of ability as part of their admissions procedure. [6585]

Jacqui Smith: The funding agreements for each academy, including their agreed admissions policies, will shortly be made publicly available on the DfES website. I will notify the Library when this has been completed and will provide the web address from where they can be obtained.

There are no academies operating banding systems which use the national normal distribution curve of ability. The earliest academies opened in 2003, well after

the introduction of the requirement for fair banding contained within the Schools Standards and Framework Act 1998.

Dartington Tech

Mr. Steen: To ask the Secretary of State for Education and Skills what funds have been made available to *(a)* the National Learning and Skills Council and *(b)* Dartington Tech in each of the of the last three years; and how much will be made available to Dartington Tech in this financial year. [5965]

Bill Rammell *[holding answer 21 June 2005]:* The budgets allocated to the Learning and Skills Council in each of the last three financial years, as notified in the relevant grant letters to the LSC are as follows:

Learning and skills council budgets 2002–2005

	Total (£ million)
2002–03	7,310.890
2003–04	8,095.374
2004–05	8,674.103

The funds allocated to Dartington Tech from all sources by the Learning and Skills Council are:

Dartington tech funding 2002–2005

	Total (£ million)
2002/03	1.78
2003/04	2.56
2004/05	2.88

Provisional budgets for 2005/06 are estimated to be £2.22 million.

Dyslexia

Mr. Fabian Hamilton: To ask the Secretary of State for Education and Skills what support is given to primary schools to help them identify children with dyslexia. [5250]

Maria Eagle: When dealing with dyslexia, as with other recognised special educational needs, schools and local authorities are expected to have regard to the SEN Code of Practice, published in November 2001, which gives practical advice on carrying out their statutory duties to identify, assess and make suitable provision for children with SEN. However, the precise arrangements for any screening and assessment arrangements are for local determination.

Under the Primary National Strategy, the Department has produced an extensive range of specific guidance material for schools on evidence-based interventions for children with significant literacy and numeracy difficulties. A three wave model of intervention has been developed, designed to identify and support those children experiencing difficulty in literacy and/or mathematics, a good many of whom are likely to fall somewhere on the dyslexia spectrum. We have also produced guidance material on classroom strategies to enable dyslexic pupils to access learning and have recently released a new interactive CD-ROM based in-service training resource, "Learning and teaching for dyslexic children". This has been developed in collaboration with the British Dyslexia Association (BDA) and the Dyslexia Institute (DI). The resource is designed to help school staff increase their awareness and understanding of the barriers to learning presented by dyslexia, and the teaching strategies that can be used to overcome them.

The Department continues to work closely with both the BDA and DI to help raise awareness of dyslexia and encourage early intervention. We have, for example, given grant aid for the production of the BDA's "Achieving Dyslexia Friendly Schools" pack which promotes a whole-school approach to supporting pupils with dyslexia and provides examples of best practice. My right hon. Friend the Secretary of State provided the foreword for the latest edition.

All schools receive a School Development Grant which can be used to support improvement in any aspect of teaching and learning, including the training of staff in SEN. Local authorities may retain a proportion of this grant, under certain circumstances, to provide specific training and development for SEN and disabilities.

Mr. Fabian Hamilton: To ask the Secretary of State for Education and Skills what procedures are in place to detect dyslexia in children below school age. [5251]

Maria Eagle: Dyslexia is extremely difficult to identify in very young children until they begin to develop their literacy skills, and therefore signs of language delay is a more appropriate indicator term in early years. Early signs of dyslexia could include difficulties with speech and language, particularly with rhyming. All early education settings, in receipt of Government funding, must have regard to the Special Educational Needs (SEN) Code of Practice, published in November 2001. This gives practical advice to those settings in carrying out their statutory duties to identify, assess and make suitable provision for children with SEN, including those with specific learning difficulties such as delayed language development.

The Curriculum Guidance for the Foundation Stage, for children aged 3–5 years, of the National Curriculum makes clear that monitoring of each child's progress is essential and that any particular difficulties in any areas of learning are identified and addressed. This should form part of the statutory Foundation Stage Profile, and the reception teacher's on-going observational assessment of individual children to record their achievements in working towards their Early Learning Goals. These set out expectations as to what most children should achieve by the end of the Foundation Stage.

We are also working with the National Assessment Agency to provide materials to support the effective use of the Foundation Stage Profile for head teachers, and to help Year 1 teachers to continue to meet diverse learning needs.

Where children do not make the expected progress, or demonstrate difficulties acquiring language skills, then practitioners should be able to refer to the Area Special Educational Needs Co-ordinator (SENCO) or Speech and Language Therapist for additional support and advice. The most effective procedures will be

implemented via the Area SENCO who should be supporting practitioners to observe and assess children's progress, particularly where there is cause for concern, and then plan for next steps in learning. Local authority training to support children with difficulties (via Area SENCOs and SEN support services) will also assist in early identification.

As part of its Primary National Strategy, the Department has issued guidance on the early teaching of phonics, "Playing with sounds", which includes specific guidance on early identification and support for children who demonstrate the phonological difficulties often associated with dyslexia.

The Department has also issued guidance for the Foundation Stage practitioners in the form of a checklist of early indicators of potential dyslexia, through its Primary National Strategy professional development materials, "Learning and teaching for children with dyslexia".

EU Students

Mr. Stephen O'Brien: To ask the Secretary of State for Education and Skills pursuant to the answer of 14 June 2005, *Official Report*, column 356W, on EU students, what her estimate is of the cost of maintenance support for 6,000 full time EU students studying in English institutions in academic year 2006/07 as a result of the changes made by her Department to regulations in the light of the ECJ ruling. [6750]

Bill Rammell: It is difficult to estimate the costs of maintenance support for EU students who may become eligible for support as a result of the regulation changes in the light of the ECJ ruling. As explained in the answer to PQ3979 there is uncertainty around forecasting numbers of students and we have limited information on the income distribution of EU students in order to estimate their entitlement to elements of the student support package. Based on that limited data we estimate that the additional cost of providing maintenance support for EU students that may become eligible for support as a result of the change in regulations would be around £10 million[1] in resource terms in financial year 2006–07[2].

[1] Rounded to the nearest £10 million

[2] This estimate covers part of the costs of students becoming eligible in Academic Year 2006/07 and part of the costs of students eligible in Academic Year 2005/06 because of phasing of payments.

Faith Schools

Mrs. Ellman: To ask the Secretary of State for Education and Skills what commitments were given in the recent re-organisation of primary schools in Vauxhall and Everton concerning the proposed *(a)* Trinity Roman Catholic primary school and *(b)* Faith primary school; and if she will make a statement. [6879]

Jacqui Smith: I am pleased to report that we are making a large commitment to the three voluntary aided schools that form part of the reorganisation in Vauxhall and Everton. Officials have been working with the Archdiocese of Liverpool and the local authority on how to proceed with the construction of the new schools. Discussions around Trinity Roman Catholic primary school are more advanced because of the urgency of the need at that school. With regard to Faith primary school, we have not yet been able to agree the design of the new school buildings and the precise level of funding, but it will be contained within the overall sum of £13 million allocated to three voluntary aided schools. This confirmation will mean that the design work can proceed as soon as possible.

Further and Higher Education

Mr. Stephen O'Brien: To ask the Secretary of State for Education and Skills what her estimate is of the *(a)* proportion of the total of and *(b)* contribution from public funds to adult education courses which focused on (i) leisure activities and (ii) Australian cake decorating in 2003–04. [6747]

Phil Hope: I have set out as follows information in the form requested for Adult and Community Learning provided through local education authorities in 2003–04, taken from the LSC's annual report for that year. These courses include a wide range of provision for personal and community development. Precise figures for leisure learning are not available. Information about individual course titles is not collected centrally.

2003–04

	£000	*Pecentage of adult programme expenditure*
Total LSC Adult programme expenditure	2,866,232	
Adult and community learning (LEAs)	172,129	6.0
Neighbourhood learning in deprived communities	26,849	0.9
Family learning and adult learning promotion	10,869	0.4
Total ACL related expenditure	209,847	7.3

Mr. Andrew Smith: To ask the Secretary of State for Education and Skills how many times the Secretary of State has modified trust deeds or other instruments in exercise of the powers in section 46 of the Further and Higher Education Act 1992. [7046]

Bill Rammell: Section 46 of the Further and Higher Education Act 1992 permits the Secretary of State to modify trust deeds or other instruments relating to institutions within the further education (FE) sector. There have been no instances to date where the Secretary of State has exercised this power.

Honours

Mr. Pope: To ask the Secretary of State for Education and Skills how many officials currently in the Department received honours in the recent Queen's birthday honours list; and at what rank of honour. [5119]

Maria Eagle: I refer my hon. Friend to the reply given by my right hon. Friend the Minister for the Cabinet Office on 22 June 2005, *Official Report*, column 1059W.

Lancashire Education Authority

Mr. Hoyle: To ask the Secretary of State for Education and Skills how much the Government have allocated to Lancashire education authority in 2005–06; and how much of this sum is for school buildings. [7657]

Jacqui Smith: In 2005–06 Lancashire education authority has been allocated a total of £743.4 million. That includes Education Formula Spending (including the Schools Formula Spending Share and the LEA Formula Spending Share) of £624.2 million; Standards Fund support of £41.3 million; School Standards Grant of £22.7 million; Teachers Pay Reform Grant of £24.0 million; and schools capital funding of £31.2 million for school buildings.

Leadership Incentive Grant

John Cummings: To ask the Secretary of State for Education and Skills if she will make a statement on the future of the leadership and training grant; and whether she plans to extend the life of the grant. [6882]

Jacqui Smith: The Leadership Incentive Grant, which began in April 2003, is a three year pump-priming initiative designed to raise standards, strengthen leadership and stimulate collaboration among communities of schools to improve teaching and learning. There are no plans to extend the grant beyond March 2006.

NVQs

Mr. Stephen O'Brien: To ask the Secretary of State for Education and Skills what *(a)* funding and *(b)* training system is available for workplace assessors for NVQ level qualifications. [6602]

Phil Hope: The qualifications that are necessary to become an NVQ assessor are eligible for funding through the Learning and Skills Council (LSC). It is for local LSCs and providers to agree provision which meets the needs of local areas. In addition, other sources of funding, for example private funding, can be used to fund these qualifications.

Overseas Students

Mr. Clappison: To ask the Secretary of State for Education and Skills what estimate she has made of the proportion of graduates from English universities from EU member states who went to work outside the UK following graduation in each of the last five years; and if she will make a statement. [4847]

Bill Rammell: For 2002/03, of EU domiciled full time first degree graduates from English HE institutions whose destinations were known, my Department estimates that 21 per cent. were employed overseas six months after graduation.

For 2001/02 and earlier years, estimates are 13 per cent., 15 per cent., 16 per cent. and 13 per cent. for 2001/02, 2000/01, 1999/2000 and 1998/99 respectively.

Estimates for 2002/03 are not comparable with estimates for 2001/02 and earlier because of changes in the source information.

The available information on which these estimates were based, is shown in the tables.

EU[1,2] domiciled full time first degree graduates from English HE institutions by first destination six months after graduation, 1998/99 to 2001/02

First destination	*1998/99*	*1999/2000*	*2000/01*	*2001/02*
Employment in the UK[3]	1,035	910	1,000	965
Employment overseas[3]	855	925	925	715
Further Study in the UK[3]	2,385	2,355	2,220	2,270
Further Study overseas[3]	450	490	600	540
Overseas students returning overseas	1,220	815	815	590
Other[4]	495	355	520	600
Total	6,440	5,845	6,080	5,670
Survey response rate (percentage)	61	53	53	54

[1] Covers EU domiciled overseas students.
[2] Figures are rounded to the nearest 5, hence constituent parts may not sum due to totals.
[3] Location is only collected from employment and study.
[4] Includes those students with destinations of "Not available for employment", "Assumed unemployed", 'Other" and a small number of those employed or studying whose location is unknown.

Higher Education Statistics Agency (HESA) First Destination Supplement

Plater College

Mr. Andrew Smith: To ask the Secretary of State for Education and Skills how much money Plater college has received from *(a)* her Department and *(b)* the bodies for which it is responsible in each of the last 20 years. [7045]

Bill Rammell: The Learning and Skills Council allocated funds to Plater college as follows:

	£
2000–01	573,546
2001–02	590,033
2002–03	657,189
2003–04	742,206
2004–05	900,000

Information regarding the funding provided to Plater college from other sources or in previous years is not held centrally and cannot be readily retrieved without incurring disproportionate costs.

Mr. Andrew Smith: To ask the Secretary of State for Education and Skills what the date was of the Secretary of State's confirmation that there was proper governing documentation in place to enable Plater college to enter the further education sector in accordance with section 29 of the Further and Higher Education Act 1992. [7047]

Bill Rammell: Plater college is one of a small group of specialist designated colleges within the further education (FE) sector. This group of colleges were designated as suitable to receive funding and entered the FE sector in 1993. The approval of the Plater college governing documentation was part of the designation process. The college was designated as an institution in the FE sector by statutory instrument 1993/435 which came into effect on 1 April 1993.

School Build (Waltham Forest)

Mr. Gerrard: To ask the Secretary of State for Education and Skills how much public funding has been spent on *(a)* building and *(b)* repairing schools in Waltham Forest in each year since 1997. [6110]

Jacqui Smith: Decisions on how capital resources should be invested in schools are taken by the local education authority in accordance with locally prepared asset management plans. The following table shows capital resources allocated to Waltham Forest local education authority and its schools since 1997:

Capital resources allocated to Waltham Forest since 1997

	£000
1997–98	1,838
1998–99	2,823
1999–2000	[1] 23,199
2000–01	8,116
2001–02	9,613
2002–03	[2] 66,949
2003–04	10,364
2004–05	10,260
2005–06	10,752

[1] Including £18.5 million PFI credit
[2] Including £53.6 million PFI credit

The Department is in discussions with the Waltham Forest LEA about its revenue expenditure figures. I will write to my hon. Friend when these are available.

School Meals

Mr. Hoyle: To ask the Secretary of State for Education and Skills how many school children in Lancashire *(a)* receive free school meals and *(b)* pay for school meals, broken down by district. [6605]

Jacqui Smith: The available information about take up and eligibility for free school meals is given in the tables. Information about the number of children who pay for school meals is not collected centrally.

Source:
Annual Schools Census

Julia Goldsworthy: To ask the Secretary of State for Education and Skills whether schools that have opted out of local authority catering contracts will be eligible for access to the £280 million package to improve school dinners announced by her Department on 30 March. [7150]

Jacqui Smith *[holding answer 27 June 2005]:* Over the three years 2005–06 to 2007–08 all maintained schools in England, regardless of their type of school meal provision, will receive a share of the £220 million set aside to help local education authorities and schools strengthen their support for healthy eating and to provide better quality food. Of this, £30 million each year will go to schools to help them meet transitional costs, and £30/£50/£50 million will go to LEAs to enable them to support schools to improve the quality of their meals, with an emphasis on schools in deprived areas and schools starting from a low base.

The first instalment of this additional funding will be available to schools and LEAs this autumn. Further details about the distribution of both grants between individual local authorities and schools will be announced over the summer.

Mr. Burstow: To ask the Secretary of State for Education and Skills in *(a)* what circumstances and *(b)* in how many cases in the past three years she and her predecessor exercised powers to direct a school to meet school lunch standards. [7245]

Jacqui Smith: We have not directed any school to meet school lunch standards during the past three years.

Special Schools

Mr. Amess: To ask the Secretary of State for Education and Skills how many special schools have closed since 1997. [5932]

Jacqui Smith: There have been 240 special school closures in England within the period January 1997 to January 2005, with some 121 schools opening in the same period (nine of which subsequently closed and are counted above) giving a net reduction in special schools of 119 in the period. This compares to 234 closures between 1986–97.

Spending per Pupil

Mr. Burstow: To ask the Secretary of State for Education and Skills what the spending per pupil was in *(a)* primary, *(b)* secondary and *(c)* special schools in (i) 1985 and (ii) in the last year for which figures are available. [7213]

Jacqui Smith: The information is as follows.

School based expenditure[1] per pupil[2] in cash terms 1985–86 and 2003–04[3,4] in England—as reported by LEAs as at 23 June 2005

£

	1985–86	2003–04
Primary	820	2,750
Secondary	1,180	3,550
Special	4,040	14,050

[1] School based expenditure includes only expenditure incurred directly by the schools. This includes the pay of teachers and school-based support staff, school premises costs, books and equipment, and certain other supplies and services, less any capital items funded from recurrent spending and income from sales, fees, charges, rents and rates. This excludes the central cost of support services such as home to school transport, local authority administration and the financing of capital expenditure.
[2] Pupil numbers include only those pupils attending LEA maintained schools and are drawn from the DfES Annual Schools Census adjusted to be on a financial year basis.
[3] 1999–2000 saw a change in data source when the data collection moved from the R01 form collected by the ODPM to the section 52 form from the DfES. 2003–04 is the latest year for which figures are available.
[4] The main difference between 1985–86 and 2003–04 is that meals and milk are no longer excluded and that no adjustments for balances are now made. However, 1985–86 also includes all premature retirement compensation (PRC) and Crombie payments, mandatory payments and other indirect employee expenses, while in 2003–04 only the schools element of these categories is included. Also, for some LEAs, expenditure that had previously been attributed to the school sectors was reported within the LEA part of the section 52 form in 2003–04 and would therefore be excluded, though this is not quantifiable from existing sources.
Note:
Figures are rounded to the nearest £10 and are in cash terms.

Sure Start

Mrs. Ellman: To ask the Secretary of State for Education and Skills whether she expects the current level of Sure Start provision in Everton to continue. [6901]

Beverley Hughes *[holding answer 27 June 2005]:* Everton in Liverpool has benefited from both the trailblazer Sure Start West Everton and Breckfield local programme approved in 1999 and the Everton Early Childhood Centre (EEC) approved in February 2001

which are based on the same site. The building was developed with local and national Government funding including both the Sure Start and Early Excellence programmes. The Sure Start local programme and the EEC were brought together and designated as one of the first integrated children's centres in June 2003.

For 2005/06 the Sure Start revenue funding for this children's centre is currently:

	Amount (£)
Sure Start Local Programme Revenue	787,623
Early Excellence Centre Revenue	75,647
Total Revenue Funding 2005/06	863,270

From 2006/07 funding will begin to taper for the "trailblazer" local programmes as part of the planned process of incorporation in to mainstream services. Everton's Sure Start local programme funding for 2006/07 will be £590,717. Early Excellence Centres have been funded until March 2006. However, Liverpool local authority will receive children's centre funding of £2,955,804 for 2004–06 and £9,025,886 for 2006–08. This is to support existing children's centres like Everton as well as to develop more. We expect Early Years provision to be maintained and to grow through children's centres, so that by 2010 there is a children's centre for every community. The Sure Start budget will more than double to £1.8 million by 2008. Exactly how and when this funding is used to support children's centres is a matter for the local authority to decide based on their assessment of existing provision, levels of deprivation and families needs.

Tuition Fees

Jim Cousins: To ask the Secretary of State for Education and Skills how much was raised from higher education tuition fees in each education authority in England in *(a)* 2002–03, *(b)* 2003–04 and *(c)* 2004–05; from how many students the sums were raised in each case; and what the average payment was in each year. [6328]

Bill Rammell: The information requested has been placed in the Libraries.

HOME OFFICE

Abduction of African children

Tim Loughton: To ask the Secretary of State for the Home Department what measures his Department has taken to prevent abduction of African children in England and Wales. [4649]

Paul Goggins: Under section 1(1) of the Child Abduction Act 1984, it is an offence for a person connected with a child under the age of 16 (for example a parent or guardian) to take or send the child out of the UK without the appropriate consent.

The Act also criminalises abduction by other persons. Under section 2(1) of the 1984 Act, a person commits an offence if, without lawful authority or reasonable excuse, he takes or detains a child under 16 so as to: *(a)* remove him from the lawful control of any person having lawful control of the child; or *(b)* keep him out of the lawful control of any person entitled to lawful control of the child.

Ultimately, it is for the police to decide whether to prefer any charges and the Crown Prosecution Service to determine whether to proceed with a prosecution. Only the courts can decide if an offence has been committed.

The maximum penalty, on summary conviction, for an offence of abduction is six months' imprisonment or a fine not exceeding the statutory maximum or both. The maximum penalty, on conviction on indictment, is seven years' imprisonment.

Anti-terrorism Legislation

Keith Vaz: To ask the Secretary of State for the Home Department whether he plans to implement the recommendations made by Lord Carlile of Berriew QC in his review of the operation of anti-terror laws. [3567]

Mr. Charles Clarke: I will shortly be placing copies in the House Library of the Government response to Lord Carlile. This will outline progress made on the recommendations made in his report on the operation in 2004 of the Terrorism Act 2000.

I am grateful to Lord Carlile for the work that he has undertaken which has found that overall the Act continues to be fit for purpose.

Biometric Information

Mr. Austin Mitchell: To ask the Secretary of State for the Home Department what information he has collated on which other countries are *(a)* planning and *(b)* using biometric information on (i) passports and (ii) identification cards. [6161]

Andy Burnham: All the Schengen states will be required to use biometrics in passports under Council Regulation 2252/2004. These biometric are facial images and finger prints, which will be introduced by 18 months and three years respectively for the date of adoption. Non-Schengen states may choose to follow the requirements, though they would not be bound by the timetable. Similar information has not been collated for Non-EU states. All ED member states which issue identity cards are considering introducing biometrics to increase security. This is part of a world-wide move towards using biometrics in travel and other identity documents, not an EU requirement as there is no legal basis for the Community to act on identity cards. Our information on current procedures is that biometric information is only currently stored on the Italian national identity card. Among non-EU states, Hong Kong currently includes biometric information on its national identity cards and Thailand is planning their introduction.

Lynne Jones: To ask the Secretary of State for the Home Department when the Passport Service expects to issue biometric passports in accordance with US requirements. [6178]

Andy Burnham: The UK Passport Service plans to commence the introduction of biometric passports in February 2006 and to be producing the new passport for all its customers by end of July 2006. The new passport

will comply in all respects to the International Civil Aviation Organisation (ICAO) standards for biometric passports.

Lynne Jones: To ask the Secretary of State for the Home Department what his estimate is of the cost of producing biometric passports *(a)* to comply with US requirements and *(b)* with a facial recognition biometric obtained in the most cost-effective manner. [6187]

Andy Burnham: The UK Passport Service has not finally completed commercial negotiations with its security printers Security Printing and Systems Ltd on the production of the biometric passport, so is not in a position to provide the cost estimate requested.

Mr. Khan: To ask the Secretary of State for the Home Department what assessment he has made of the accuracy of biometric readings. [4137]

Mr. McNulty: We have taken a number of steps to assess the accuracy of biometric readings. We have closely reviewed leading scientific evidence in the field; consulted with biometric experts from academia and industry; sought to build on the experience and knowledge of other organisations, such as IND, PITO and Communications-Electronic Security Group's (CESG's) biometric readings group and we have conducted a review of the experiences of other examples of biometric systems, including systems holding millions of sample records. Current thinking is that three separate biometrics will be recorded (iris image; fingerprints and facial recognition) which would increase the accuracy of biometric readings from individuals. In addition, we will keep emerging research in this field under constant review and it is envisaged we will hold performance tests during procurement and the early phase of implementation of the ID card scheme.

Lynne Featherstone: To ask the Secretary of State for the Home Department what assessment he has made of the merits of automatic face recognition technology; and if he will make a statement. [4796]

Mr. McNulty: The Home Office and UKPS (UK Passport Service) have examined the use of facial recognition as part of the biometric enrolment trial. This was not a technology evaluation but supported the view that facial recognition has applications in 1-to-1 matching but is not suitable for matching against very large numbers of records. Facial recognition is still being considered as one of the biometric technologies which may be used for Identity Cards. Police Information Technology Organisation (PITO) has an active biometrics programme and maintains awareness of many biometric and human identification technologies, including facial recognition. PITO is engaged in producing a facial images database for identification purposes as part of the Facial Images National Database (FIND) project which should complete in 2006. UKPS is currently assessing the suitability of automatic face recognition technology for use within the passport application process for detecting fraudulent applications. A standalone Automatic Face Recognition (AFR) system is being deployed in the UKPS's seven fraud and intelligence units to help prove the concept and to establish the benefits of using AFR, and assist in the development of technical and operational specifications for full system integration. The UKPS plan to complete their assessment by the end of 2005.

CCTV Cameras

Tim Loughton: To ask the Secretary of State for the Home Department how many CCTV cameras are currently operated by police in England and Wales. [4608]

Hazel Blears: CCTV cameras in England and Wales are operated by a wide variety of organisations including the police, as well as local authorities, the retail sector and train operating companies. Information on the number of cameras operated by the police is not held centrally.

Criminal Assets

Bob Spink: To ask the Secretary of State for the Home Department how much each police force recovered from the proceeds of crime in the last year for which figures are available; and if he will make a statement. [5793]

Hazel Blears: Police force performance on recovering the proceeds of crime is measured by the value of cash forfeitures and confiscation orders obtained by a force. The value of orders obtained by each police force in 2004–05 is shown in the table.

Police force	*Total value of cash forfeitures and confiscation orders obtained by the police service in 2004–05*
Metropolitan Police Service	26,426,648.39
National Crime Squad	11,940,373.79
Lancashire Constabulary	3,743,146.94
Greater Manchester Police	3,453,431.70
Merseyside Police	2,908,711.21
Cambridgeshire Constabulary	2,695,434.41
Derbyshire Constabulary	2,540,453.70
West Yorkshire Police	2,265,457.57
City of London Police	2,211,123.08
West Midlands Police	2,053,433.63
Avon and Somerset Constabulary	1,959,930.23
Kent Police	1,926,936.62
Police Service of Northern Ireland	1,769,094.32
Nottinghamshire Police	1,336,612.41
South Yorkshire Police	1,330,077.48
Devon and Cornwall Constabulary	1,182,881.95
Cumbria Constabulary	1,124,156.05
Northamptonshire Police	1,063,417.47
Dorset Police	1,050,401.06
Sussex Police	1,002,181.72
West Mercia Constabulary	999,467.06
Norfolk Constabulary	911,868.06
Northumbria Police	909,645.62
Leicestershire Constabulary	891,588.29
Thames Valley Police	750,663.61
Surrey Police	648,947.84
Cheshire Constabulary	541,557.19
Wiltshire Constabulary	482,559.71
Durham Constabulary	477,399.45
Gwent Police	442,673.90
Hertfordshire Constabulary	440,353.93
Suffolk Constabulary	430,715.69
South Wales Police	400,577.52
Gloucestershire Constabulary	390,468.23
Hampshire Constabulary	333,792.86
Lincolnshire Police	307,912.23
British Transport Police	281,376.94
Staffordshire Police	260,405.82
Humberside Police	255,656.67
Cleveland Police	230,220.07
North Yorkshire Police	205,081.94
Dyfed-Powys Police	201,061.20

Police force	Total value of cash forfeitures and confiscation orders obtained by the police service in 2004–05
Essex Police	192,804.57
Bedfordshire Police	154,828.69
North Wales Police	109,758.12
Warwickshire Police	57,357.29

Criminal Records Bureau

Harry Cohen: To ask the Secretary of State for the Home Department if he will make a statement on the progress of implementing the Basic Disclosure by the Criminal Records Bureau and if he will bring forward legislation to activate the offence of Enforced Subject Access under Section 56 of the Data Protection Act 1998. [4576]

Andy Burnham: The Criminal Records Bureau (CRB) will undertake a feasibility study into the launch of a Basic Disclosure service during the current financial year. The offence of Enforced Subject Access under Section 56 of the Data Protection Act will be commenced in England and Wales at such time as the CRB is providing a Basic Disclosure service.

Identity Cards

Mr. Austin Mitchell: To ask the Secretary of State for the Home Department what assessment he has made of the robustness of available technology to meet the requirements of the proposed identity card scheme. [6162]

Andy Burnham: Given constant advancement of biometric technology and the need to conduct a fair and thorough procurement process, rather than focus on the technology available at the present time, much of which may be superseded by the time cards are first issued, we are working with other Departments and with expert advisers to set the requirements for performance of future technology. However, naturally, this work has included a review of baseline technologies available now. In particular this has included: a review of the technology used elsewhere in government; engagement with other governments with experience in the field (e.g. US, Hong Kong, Philippines, UAE); in depth review of current and emerging scientific evidence in the field; engagement with independent experts in the field (e.g. Communications-Electronic Security Group, National Physical Laboratory, San Jose University, National Institute of Standards and Technology, PA consulting).

Mr. Austin Mitchell: To ask the Secretary of State for the Home Department what information he has collated on which other countries have an identity card scheme; and when each scheme was introduced. [6163]

Andy Burnham: Information collated by the Home Office on other countries with an identity card scheme, which includes some introduction dates, is available in the publication Entitlement Cards and Identity Fraud—A Consultation Paper [CM 5557]

Mr. Austin Mitchell: To ask the Secretary of State for the Home Department how many digits he expects to be printed on identity cards; and what information he has collated on the number of digits required on passports and identity cards by other countries. [6164]

Andy Burnham: No fingerprints will be printed on the face of the identity card. Biometric information, including under current plans 10 fingerprints, will be held securely on the National Identity Register. Some of the fingerprint data could be held in an encrypted form on the card chip. All the Schengen states will be required to use biometrics in passports under Council Regulation 2252/2004. Fingerprint biometrics (rather than just fingerprints) will be introduced within three years of adoption. Non-Schengen states may choose to follow the requirements, although they would not be bound by the timetable. Other EU member states which issue identity cards are considering introducing biometrics to increase security and some, for example Greece, Italy, Portugal and Spain, already collect one or more fingerprints as part of their national identity card schemes. Among non-EU states, Hong Kong and the Philippines currently include fingerprint information on their identity card schemes.

Lynne Jones: To ask the Secretary of State for the Home Department whether the assumption in CM 6020 that once the validity period expires, an automatic replacement identity card would be provided free of charge, remains the Government's policy. [6179]

Andy Burnham: No such assumption was made in CM 6020 on 12 November 2003 and decisions have yet to be taken about the detailed fee structure for ID cards.

Lynne Jones: To ask the Secretary of State for the Home Department pursuant to the answer of 6 June 2005, *Official Report*, columns 320–21W, on on-line identity verification, whether the costs of infrastructure additional to the parts of the central IT infrastructure which will support identity verification services is included in the £584 million figure. [6201]

Andy Burnham: The current best estimate of the total average annual running costs for issuing passports and ID cards to UK nationals and running a verification service is £584 million at 2005–06 prices and has been published in the Regulatory Impact Assessment (RIA). This includes the cost of operating and maintaining the verification services. As outlined in the RIA user organisations will be expected to cover the cost of biometric readers.

Lynne Jones: To ask the Secretary of State for the Home Department pursuant to the answer of 13 June 2005, *Official Report*, columns 157–58W, on identity cards, (1) if he will disaggregate the total average annual running costs for issuing passports and identity cards to show the estimated costs for *(a)* online verification to validate identity cards and other identity enquiries from user organisations, *(b)* operating and maintaining (i) those parts of the central IT infrastructure that will support identity verification services and (ii) additional central infrastructure and *(c)* recording and matching face, fingerprint and iris biometric information; [6202]

(2) what his estimate is of the cost of *(a)* introducing and *(b)* maintaining a database containing (i) facial biometrics and (ii) facial, iris and fingerprint biometrics in combination for the population of the UK who are 16 years and over. [6377]

Andy Burnham: It would not be appropriate to release this information in advance of procurement as this may put at risk the Department's ability to secure value for money.

Mr. Garnier: To ask the Secretary of State for the Home Department what information will be held on the national identity card register to establish a person's entitlement to free NHS treatment. [6733]

Mr. McNulty: The information to be kept on the National Identity Register is set out in Schedule 1 of the Identity Cards Bill. Entitlement to free treatment is not included in the Schedule, neither is it a registrable fact as defined in Clause 1(5) of the Identity Cards Bill. This means that such information could not be held on the National Identity Register unless approved by further primary legislation. However, information contained on the National Identity Register, for example about a person's immigration status, could be relevant to decisions on whether an individual is entitled to free NHS treatment.

Tim Loughton: To ask the Secretary of State for the Home Department with which commercial companies his Department has held discussions about the proposed identity card scheme. [4606]

Andy Burnham: The Identity Cards programme is currently in the pre-procurement "development" phase. In conducting its activities, discussions have taken place with a range of commercial organisations. These discussions have, to date, focused on technical feasibility, benefits case development and general communications with the market as part of the "early market engagement" recommended by the Office of Government Commerce (OGC) as best practice in public sector procurements. The ultimate aim of conducting these discussions is to ensure that an appropriate and effective procurement strategy is developed resulting in a competitive procurement and successful implementation.

Mr. Khan: To ask the Secretary of State for the Home Department what plans he has to issue identity cards to newly arrived asylum seekers. [4146]

Mr. McNulty: There are no plans to issue newly arrived asylum seekers with Identity Cards as it is difficult to check the biographical footprint of asylum seekers as they arrive in the UK without any documents to confirm their identity. Asylum seekers are issued with biometric Asylum Registration Cards (ARC) which contains a fingerprint of the individual that it has been issued to. The biometric ARC card is used to prevent an individual lodging multiple applications for asylum. Clause 2(4) of the Identity Cards Bill allows an entry for an individual to be made in the Register (whether or not he has applied to be, or is entitled to be entered in it) if the Secretary of State considers that the addition of the entry to the Register would be consistent with the statutory purposes. This clause will allow a failed asylum seeker to be entered into the Register to ensure that they cannot assume a different identity while they remain in the UK or if they make a subsequent attempt to enter the UK. An asylum seeker who is granted leave to remain will be entitled to be registered on the ID cards scheme.

Mr. Khan: To ask the Secretary of State for the Home Department what mechanisms will be put in place to ensure the security of the National Identity Register. [4171]

Andy Burnham: In the interests of maintaining the security of the National Identity Register, it is not possible to reveal any proposed security mechanisms for the Scheme. However, the National Identity Register will be a highly secure system, and will be formally Security Accredited in accordance with Government policy. The policy can be found at http://www.cabinetoffice.gov.uk/cisa/publications/index.asp. The National Identity Register will also comply with the Data Protection Act and other relevant legislation.

The programme is working with acknowledged security specialists, Communication Electronic Security Group, National Infrastructure Security Co-ordination Centre and other organisations to ensure appropriate measures are in place to maintain a secure and resilient system.

The Identity Cards Bill includes a clause which makes it a criminal offence to disclose information without lawful authority. This includes information relating to the Register, the issuing of ID Cards or the functions of the National Identity Scheme Commissioner. This is set out in clause 29 of the Bill. A person found guilty of an offence under this section is liable for up to two years imprisonment. A separate offence of tampering with the Register attracts a maximum penalty of 10 years imprisonment.

Ms Butler: To ask the Secretary of State for the Home Department what steps the Department will take to ensure that identity cards will not be required to be produced by those subject to stop and search, with particular reference to stop and search of black and ethnic minority individuals. [4406]

Andy Burnham: There will be no requirement to carry an ID card at all times, this is specifically prohibited in the Identity Cards Bill, in addition police officers do not have a power under the Bill to stop someone and demand to see an identity card although there is nothing to prevent an individual choosing to provide an identity card voluntarily.

Ms Butler: To ask the Secretary of State for the Home Department what contingency plans the Department is making in the event that the identity card technology goes wrong. [4409]

Andy Burnham: We are planning for the scheme to comply with industry best practice business continuity and disaster recovery processes to ensure that the core business is able to function in the event of a major disruption or loss of technical infrastructure

Ms Butler: To ask the Secretary of State for the Home Department what assessment the Department has made of the extent to which the introduction of identity cards will eliminate identity theft perpetrated over the telephone. [4412]

Andy Burnham. The Identity Cards Programme team is working closely with experts in the field of remote authentication (i.e. verifying people's identities when using the internet, telephone and post) in order to establish a more secure method of verifying an identity than currently possible.

Reference research has shown that use of the ID card with certain processes will permit an improvement in the level of assurance possible via remote authentication.

This research to date has focused on the concept of a "challenge response" process, which allows for the generation of a one-off password for a person to use for an individual transaction. Due to the one-time nature of the response generated, anyone trying to impersonate another individual to obtain information about others for criminal purpose or to perpetrate fraud will be greatly hindered.

Specific details regarding the research cannot be made public due to issues of commercial sensitivity prior to procurement.

Mr. Drew: To ask the Secretary of State for the Home Department whether he expects information held on individuals under the proposals in the Identity Cards Bill to be shared with *(a)* international agencies and *(b)* other governments. [6778]

Andy Burnham *[holding answer 23 June 2005]*: The Identity Cards Bill does not allow for information in the National Identity Register to be provided without the consent of the individual other than in the specific circumstances outlined as follows.

There are very strictly limited circumstances, outlined in Clause 20(2) of the Identity Cards Bill, when information could be provided without consent for any of the purposes specified in sections 17(2)*(a)* to *(d)* of the Anti-Terrorism, Crime and Security Act 2001. This would allow for the disclosure of information for the purposes of prevention and detection of crime overseas. This may involve the provision of information to international agencies or other governments.

However, provision of this information can only be made subject to the rules laid out in Clause 23 of the Identity Cards Bill. In addition, under Clause 20(3), the Secretary of State can prohibit the provision of information without consent for use in overseas proceedings, under the Anti-Terrorism, Crime and Security Act 2001, as specified in section 18 of that Act. For example the Secretary of State might do this if he considered that it would be more appropriate for these proceedings to be conducted in a court of the United Kingdom.

David Howarth: To ask the Secretary of State for the Home Department whether he expects biometric details of victims of *(a)* domestic violence, *(b)* rape and *(c)* sexual abuse would be removed from the National Identity Register to protect the individual. [6787]

Andy Burnham *[holding answer 23 June 2005]*: Removing the biometrics of these victims would not add any additional protection to the individual. Thus, biometrics would not be removed from the National Identity Register—they are necessary to ensure that a person does not attempt to enrol into the Scheme more than once. However, we recognise the importance of security of personal details to vulnerable members of society. Our processes are being designed to ensure this is maintained.

For example, once enrolled, biometrics are used for two purposes: (1) to verify that a person is the authentic card holder, and (2) to authorise release of information during a verification check. In each of these instances, there would be security measures in place to ensure that person conducting the transaction is the actual cardholder and is providing their own biometric. A release of information in the second instance can usually only happen with consent of the individual involved.

In cases where information is provided without consent those requesting information are strictly limited and traceable.

Those responsible for administering the scheme including administration staff will not themselves be authorised to perform a search for a cardholder's individual records. As the National Identity Register will be held at a high protective marking, only security cleared staff will have access to the National Identity Register. The independent oversight and auditing of working processes in data centres would detect any such search in real-time and identify those responsible. Clause 29 of the Identity Cards Bill makes it a criminal offence, subject to imprisonment for up to two years and/or a fine, for any person to provide without lawful authority, information from the scheme to a third party.

Lynne Jones: To ask the Secretary of State for the Home Department pursuant to the answer of 13 June 2005, *Official Report*, columns 157–58W on identity cards, if he will disaggregate the total average annual running costs for supporting users of the on-line verification service via a helpdesk. [7227]

Andy Burnham: It would not be appropriate to release this information in advance of procurement as this may put at risk the Department's ability to secure value for money.

Lynne Jones: To ask the Secretary of State for the Home Department what components are included by the current best estimate of £93 for the unit cost of an adult passport and identity card given in paragraph 22 of the Identity Cards Bill Regulatory Impact Assessment. [7228]

Andy Burnham: The estimate of £93 includes all the operational costs for issuing Identity Cards and passports to UK nationals for the 10 year validity period. It excludes the costs of the verification service and equipment, such as card readers, required by user organisations. It includes allowance for contingency, optimism bias and non-recoverable VAT.

Lynne Jones: To ask the Secretary of State for the Home Department what estimate he has made of the set-up costs that will be incurred after the first identity cards and biometric passports are issued as referred to in paragraph 19 of the Regulatory Impact Assessment on the Identity Cards Bill. [7229]

Andy Burnham: It would not be appropriate to release this information in advance of procurement as it is commercially sensitive. The identity cards programme is in the pre-procurement phase, during procurement this information could be used by suppliers to estimate what

we expect to pay for the contracts they are bidding for. This would prejudice the Department's ability to secure value for money solutions from the market.

Lynne Jones: To ask the Secretary of State for the Home Department if he will make a statement on how married people who wish to use both their pre-marriage and post-marriage name will be dealt with under the proposed identity card scheme; and whether it will be possible for them to have two cards. [7230]

Andy Burnham: Final decisions have not yet been taken regarding the name policy for the Identity Cards scheme. However, we are aware of the needs of those who use both their pre-marriage and post-marriage names. The Identity Cards Bill allows for a person to include "other names by which they are Known" on the National Identity Register and we are looking at various solutions on how to represent this on the card for UK citizens. We continue to investigate how both names could be used for verification purposes. Current work indicates that it should not be necessary to provide two cards to enable married people to use both their pre-marriage and post-marriage names. In the case of foreign nationals, their name on the card will be required to match what is on their passport for immigration purposes.

Lynne Jones: To ask the Secretary of State for the Home Department whether a decision has been made on the *(a)* number and *(b)* location of centres where biometric information may be collected. [7231]

Andy Burnham: We are currently planning a network of enrolment centres where applicants to the ID cards scheme will have a biometrics recorded and a short meeting with a member of the new agency's staff. Work on defining the number and location of centres is not yet complete. On 21 December 2004, *Official Report*, column 171WS, my right hon. Friend the Member for Kilmarnock and Loudoun (Mr. Browne) provided a written statement to the House announcing "some 70" new offices being required for the first phase of the UKPS Authentication by Interview (ABI) project, while this forms part of the building blocks towards the identity cards programme these offices do not necessarily form part of the enrolment centre provision. The identity cards programme enrolment network is being designed to enable people to obtain a card with minimum inconvenience. The number and location of centres is being developed based on: Convenience for applicant, considering travel distance and time, travel to work areas, public transport availability and patterns: Minimum workable size of centre, considering staffing issues, security and avoiding collusion: Overall cost of the enrolment centre network. In addition to the enrolment centres the identity cards programme enrolment plans also include the use of mobile facilities, although at this stage it is not yet known how many of these facilities there will be.

Mr. Gordon Prentice: To ask the Secretary of State for the Home Department what failure rate in recognising biometric data in the proposed identity cards would be considered acceptable. [3174]

Mr. McNulty: The level of acceptability in relation to biometric check failure rates is a balance between biometric performance and system cost. The exact level is still being determined through stakeholder consultation. Current thinking is that several biometric readings will be recorded, i.e. fingerprint, iris image and facial recognition, which would increase the accuracy of any biometric checks.

Identity Fraud/Theft

Sir Paul Beresford: To ask the Secretary of State for the Home Department how much of his estimate of the total cost of identity fraud constitutes *(a)* credit card fraud and *(b)* identity theft. [5839]

Andy Burnham *[holding answer 20 June 2005]*: The Cabinet Office study published in 2002 estimated that the minimum cost of identity fraud to the economy is in excess of £1.3 billion per annum. The study estimates that £370 million of the overall figure is attributable to credit card fraud. This includes use of counterfeit cards, cards lost or stolen and card not present fraud. All of the costs estimated in the Cabinet Office study are associated with identity theft. Losses, however, are not generally incurred until a criminal has obtained a victims personal details through identity theft and used them to commit fraud.

David Davis: To ask the Secretary of State for the Home Department what *(a)* methodology and *(b)* sources were used for the calculation of the cost of identity theft in Appendix B of Identity Fraud: A Study, of July 2002. [6916]

Mr. Charles Clarke: The Cabinet Office formed a cross-departmental team to estimate the cost of identity fraud to the UK economy. The study involved examination of direct financial losses, such as those incurred when false identities are used to fraudulently obtain credit. It also examined the costs incurred by enforcement and other agencies that encounter individuals who use false identities to obtain services fraudulently. This included costing the resources needed to carry out investigations. The sources that were used for the calculation of the cost of identity fraud were, HM Customs and Excise (now HM Revenue and Customs), Department of Health, Department of Work and Pensions, Immigration Service, Association of Payment Clearing Services, insurance companies and CIFAS, the UK's Fraud Prevention Service.

Illegal Labour

Dr. Pugh: To ask the Secretary of State for the Home Department which sections of commerce, agriculture or industry feature most prominently as employers of illegal labour. [4554]

Mr. McNulty: This information is not collected but the immigration service carries out visits to employers in relation to illegal migrant working on an intelligence-led basis, and the breakdown of this operational activity provides the best available indicator of which sectors feature most prominently as employers of illegal labour. During the financial year 2004–05, the main business sectors visited were: hospitality (42 per cent. of visits); carwashes and garages (8 per cent.); food production (6 per cent.); retail (6 per cent.); employment and cleaning agencies (5 per cent.); factories and warehouses (5 per cent.); sex industry (5 per cent.); nursing and care homes (1 per cent.); construction industry (1 per cent.);

sports entertainment (1 per cent.); horticulture and agriculture (1 per cent.); other sectors (4 per cent.). A further 15 per cent. of visits were made to the home addresses of individuals suspected of working in the United Kingdom illegally in various sectors.

Immigration

David Davis: To ask the Secretary of State for the Home Department what steps he plans to take to tackle forgery of indefinite leave to remain documents. [302]

Mr. Charles Clarke: In order to promote effective end-to-end migration control and ensure that the UK's borders are secure, tackling forgery of indefinite leave to remain documents is a priority for the immigration and nationality directorate (IND).

In line with the EU free movement of persons directive (directive 2004/38/EC), with which IND must comply by 30 April 2006, steps are being taken to replace the current system of residence documentation issued to EEA nationals and their family members with a new suite of secure documents. Close consultation with the national document fraud unit (NDFU) has established consideration of document security at the very forefront of the design and procurement process. The prevention of forgery and abuse is an issue that will continue to determine the format that these new residence documents will take.

In 2003 the United Kingdom issued a new form of secure residence permit sticker for other foreign nationals. This is a common-format permit issued by all member states of the European Union and European economic area and is produced to a design in which the United Kingdom participated. The permit contains a digital image of the holder and is applied in their passport after the document's authenticity and the holder's entitlement have been verified. To date no falsifications of this document have been identified.

David Davis: To ask the Secretary of State for the Home Department what guidance is given to immigration officials on assessing whether passports and other immigration documents are genuine. [303]

Mr. Charles Clarke: The lead role in protecting the United Kingdom from the use of fraudulent travel documentation is taken by the immigration and nationality directorate intelligence service (INDIS), national document fraud unit (NDFU), which is recognised both at home and abroad as a leader in its field.

Forgery detection training is provided to all new immigration officers, assistant immigration officers and entry clearance (or visa) officers as part of their induction courses. The NDFU delivers a comprehensive range of intermediate and advanced level training to the immigration service's (IS) forgery officers, who provide consolidation training to their IS colleagues at local ports and enforcement offices.

The NDFU provides IS staff and forgery officers with up to date detection equipment and frequent information about all aspects of travel document abuse. It also provides other staff working within the immigration and nationality directorate (IND) with training and forgery detection information and equipment.

Lynne Jones: To ask the Secretary of State for the Home Department what the backlog is of applications for each category of leave to remain in the UK; and if he will make a statement. [6919]

Mr. McNulty: As at 31 May 2005, there were 57,792 outstanding non-asylum applications for further leave to remain. These consisted of 20,107 charged applications, which represents a normal work in progress level which we expect to decide in line with our current service standards as shown on the immigration and nationality directorate website, and 37,685 non-charged applications. The non-charged cases include 10,074 European cases, 8,538 European Community Association Agreement (ECAA) cases and 12,731 indefinite leave from exceptional leave cases. ECAA casework was suspended until recently and has now resumed which has caused these applications to be delayed.

Mr. Oaten: To ask the Secretary of State for the Home Department in how many cases the detention of children under immigration law for more than 28 days has been subject to ministerial authorisation since 1 January 2004; and if he will make a statement. [4678]

Mr. McNulty: The information requested is not part of the published statistics in the public domain.

Children are usually detained for very short periods. We only seek to detain children over 28 days in exceptional circumstances.

Iranian Repatriation

Mrs. Curtis-Thomas: To ask the Secretary of State for the Home Department what his Department's current policy on the repatriation of Iranian nationals who are seeking asylum in the United Kingdom is. [4487]

Mr. McNulty: Asylum and human rights claims by Iranian nationals are, like those of all claimants, from all countries, considered on their individual merits in accordance with our obligations under the 1951 UN Refugee Convention and the European Convention on Human Rights (ECHR). If the claimant meets the definition of a refugee in the 1951 Refugee Convention, they are granted asylum. If they do not qualify for asylum, but there are other circumstances that make them particularly vulnerable and engage our obligations under the ECHR, they are granted humanitarian protection or discretionary leave.

Passports

David Howarth: To ask the Secretary of State for the Home Department what the minimum technical requirements are for a biometric passport to conform to the International Civil Aviation Organisation recommendations; and what estimate he has made of *(a)* the lowest possible total cost of enabling the Passport Service to issue such passports and *(b)* the unit cost for each such passport issued, broken down by main component. [6784]

Andy Burnham *[holding answer 23 June 2005]:* The minimum technical requirements to meet ICAO standards in addition to the requirements for security features and the presentation of personal data are as follows:

1. Use of a contact-less micro-processor chip. The chip must conform to the ISO 14443 standard.

2. The data within the chip to be arranged within an agreed file structure in accordance with the ICAO Specification on the Logical Data Structure.

3. The photo image to be stored in accordance with the emerging ISO Facial Standard 19794–5.

4. The chip embedded data to be protected by a Public Key Infrastructure (PKI) developed in accordance with the ICAO PKI Specification.

The UK Passport Service have not finally concluded commercial negotiations with its security printers Security Printing and Systems Ltd. on the production of the biometric passport, and is not in a position to provide an estimate of the unit cost of the passport.

Police (Hertfordshire)

Mike Penning: To ask the Secretary of State for the Home Department if he will make a statement on funding to facilitate the establishment of an anti-corruption policy for Hertfordshire constabulary. [5411]

Hazel Blears: The Government have put significant extra resources into the police service in England and Wales. Expenditure on policing to be supported by Government grant or spent centrally on services for the police has risen by over 39 per cent. or £3 billion between 2000–01 and 2005–06.

No specific provision is made available to tackle local corruption. The resources that each force allocates to tackle this problem is an operational matter for the chief constable. You may therefore wish to redirect your query to him.

Prevention of Terrorism Act

David Davis: To ask the Secretary of State for the Home Department how many people have been subject to the control orders introduced by the Prevention of Terrorism Act 2005; and how many of those individuals were previously detained under existing powers relating to terrorism. [1389]

Mr. Charles Clarke: I refer the right hon. Member to my statement of 16 June when I made my first three monthly report to Parliament on the exercise of control order powers.

Proceeds of Crime Act

Mr. Denham: To ask the Secretary of State for the Home Department what the value is of the funds so far recovered under the Proceeds of Crime Act 2002 as a result of the actions of law enforcement agencies in Hampshire. [5637]

Hazel Blears: Information is not available in the form requested. The total value of cash forfeiture orders and confiscation orders obtained by Hampshire constabulary since implementation of the Proceeds of Crime Act 2002 in March 2003 is £155,425. In addition, between 2003–04 and 2004–05 Hampshire constabulary obtained confiscation orders under earlier legislation with a total value of £476,816. Information on the value of orders obtained by Her Majesty's Revenue and Customs in Hampshire is not available.

Retinal Scans

John Hemming: To ask the Secretary of State for the Home Department what plans the Department has to allow the use of retinal scans in the police national computer database. [4617]

Hazel Blears: At present there are no requirements to retain retinal scan data. If a case was made retention of such data would be on IDENT1 (the police service identification platform).

Sexual Offences Act 2003

Mr. Burstow: To ask the Secretary of State for the Home Department pursuant to the answer of 6 June 2005, *Official Report*, column 244W, on Sexual Offences Act 2003, what data will be collected to evaluate the effectiveness of the Act. [4766]

Paul Goggins: To evaluate the effectiveness of the Sexual Offences Act 2003, we will collect statistical data relating to recorded crime, prosecutions and convictions, as well as evidence from statutory and non-statutory bodies who work within the field of sexual offending.

Vehicle Checks

Sarah Teather: To ask the Secretary of State for the Home Department how many road-side vehicle checks were carried out by the Metropolitan Police in each year since 1997. [2513]

Paul Goggins: Information is not collected in the broad terms requested.

NORTHERN IRELAND

Big Lottery Fund

Mr. Dodds: To ask the Secretary of State for Northern Ireland what consultations he has on the appointment of a person to represent Northern Ireland on the Big Lottery Fund. [7095]

Mr. Hanson: The appointment of a person to represent Northern Ireland will be considered once the Big Lottery Fund has been legally established. There will be discussions with DCMS about the arrangements for making this appointment.

Bombardier C-Series Programme

Lady Hermon: To ask the Secretary of State for Northern Ireland what assistance is provided by his Department to Bombardier's C-Series programme. [7055]

Angela E. Smith: The UK Government have signed a Letter of Intent with Bombardier Inc. and Short Brothers plc agreeing in principle to provide a combination of Launch Investment and Selective Financial Assistance towards the development and production of wings, engine nacelles and composite

empennage structures for the Bombardier C-Series aircraft programme. The total package of up to £180 million comprises a £25 million repayable Launch Investment contribution and £30 million Selective Financial Assistance from Invest NI and £125 million repayable Launch Investment from DTI. This is subject to a programme launch decision by Bombardier.

Business Grants

Mark Durkan: To ask the Secretary of State for Northern Ireland how much funding has been allocated to *(a)* Business Start Up, *(b)* Promoting Entrepreneurs and *(c)* Enterprise Northern Ireland in each of the last three years. [7662]

Angela E. Smith: The information is as follows.

(a) Invest NI has allocated the following funding to start-ups broken down by three market segments targeted by entrepreneurs, ie Global, Export, and Locally focused within Northern Ireland.

£

Market segment	*2002–03*	*2003–04*	*2004–05*	*Total*
Externally focused	3,724,721.00	4,073,934.00	2,915,158.00	10,713,813.00
Globally focused	0.00	0.00	2,169,167.00	2,169,167.00
Locally focused (Start A Business Programme)	2,211,735.00	2,610,307.00	3,068,017.00	7,890,059.00
Total	5,936,456.00	6,684,241.00	8,152,342.00	20,773,039.00

(b) Invest NI spend on the Entrepreneurship Development Team over the last three years is:

	£
2002–03	4,000,000
2003–04	4,600,000
2004–05	7,000,000
Total	15,600,000

In the same year Invest NI spend associated with the Accelerating Entrepreneurship Strategy/Go For It campaign is:

	£
2002–03	770,000
2003–04	2,450,000
2004–05	1,720,000
Total	4,940,000

However almost every aspect of Invest NI work involves entrepreneurial activity so the real figure for entrepreneurial activity is much higher.

(c) Invest NI has provided the following fees to Enterprise Northern Ireland for the delivery of the Start A Business programme:

	£
2002–03	1,438,658.19
2003–04	2,027,818.46
2004–05	2,755,184.79
Total	6,221,661.44

Child Poverty

Mr. Dodds: To ask the Secretary of State for Northern Ireland what research his Department has carried out into the levels of child poverty in North Belfast; and if he will make a statement. [5345]

Angela E. Smith: The Northern Ireland Multiple Deprivation Measure 2005 Report was published by the Northern Ireland Statistics and Research Agency on 26 May 2005 (a copy is available in the Library). The report details levels of deprivation in 890 small areas (namely super output areas, or SOAs) covering Northern Ireland, with an average SOA population of just under 2,000 people. North Belfast constituency was one of the areas included in this report.

The following table lists the 40 super output areas that lie in the Belfast, North constituency, along with the Income Deprivation Affecting Children measure (IDAC) and their SOA ranking within Northern Ireland. The SOAs in Belfast, North range from New Lodge_1, the third most deprived SOA in Northern Ireland where 87 per cent. of children experience income deprivation, to Cavehill_2 (rank 839) where 4 per cent. of children experience income deprivation. Measured by the IDAC, 15 of the 40 SOAs in North Belfast are in the top 10per cent. of most deprived SOAs in Northern Ireland.

The Office of the First Minister and Deputy First Minister is currently producing a ten-year strategy for children and young people. It will be firmly rooted in the UN Convention on the Rights of the Child and expressed in terms of five high level outcomes for children covering: health; education, learning and enjoyment; economic and environmental well-being; making a positive contribution to society and safety and stability.

It will be underpinned by the availability of quality research and information, support for parents, families and communities and the involvement of children and young people in decisions affecting their lives. A children's research database is being compiled which will focus on a wide range of issues including poverty levels experienced by children.

Government are currently consulting on an Anti-Poverty Strategy will also bring a focus to child poverty issues and the Northern Ireland Regional Action Plan, which will be the main vehicle for monitoring and reporting progress on tackling poverty and social exclusion issues across Northern Ireland Departments, will contribute to the UK Government's target of halving child poverty by 2010 and eradicating it by 2020. A copy of the consultation document has been placed in the Library.

Income deprivation affecting children—North Belfast[1]

SOA name	Income deprivation affecting children Score	Rank
New Lodge_1	0.87	3
New Lodge_3	0.83	6
Crumlin_2_Belfast	0.76	13
New Lodge_2	0.74	15
Water Works_1	0,74	17
Ardoyne_3	0,72	23
Ardoyne_2	0.69	26
Ardoyne_1	0,69	28
Duncairn_1	0,68	30
Crumlin_1_Belfast	0.67	35
Woodvale_3	0.67	37
Woodvale_2	0,64	44
Water Works_3	0.58	65
Ballysillan_1	0.55	84
Duncairn_2	0.55	86
Water Works_2	0.51	95
Woodvale_1	0.51	98
Cliftonville_1	0.50	99
Chichester Park_1	0,50	104
Legoniel_1	0.44	138
Bellevue_2	0.43	146
Castleview_1	0.41	161

Fortwilliam_3	0.13	607
Fortwilliam_1	0.07	730
Cavehill_1	0,06	764
Castleview_2	0.06	772
Cavehill_3	0.06	781
Cavehill_2	0,04	839

[1] For every super output area in North Belfast parliamentary constituency where a rank of 1 is the most deprived SOA and a rank of 890 is the least deprived SOA in Northern Ireland.
One of the deprivation measures relates specifically to children; the Income Deprivation Affecting Children (IDAC) measure. This measures the percentage of a SOA's children under 16 who were living in households in receipt of income support or income based job seekers allowance or in families in receipt of working families tax credit/disabled persons tax credit whose equivalised income was below 60 per cent. of the UK median before housing costs.

Counterfeit Medicines

Lady Hermon: To ask the Secretary of State for Northern Ireland what strategy is being pursued by the Chief Pharmacist in combating the counterfeiting of *(a)* medical and *(b)* veterinary pharmaceutical products in Northern Ireland [7137]

Mr. Woodward: The Department's Pharmaceutical Inspectorate, under the Chief Pharmaceutical Officer, investigates all reports of manufacture and sale of illegal human and veterinary medicines including counterfeit products.

The Inspectorate conducts routine and ad-hoc "announced" and "unannounced" inspections of manufacturers and wholesale dealers of medicinal products to assess compliance with Good Manufacturing Practice (GMP) and Good Distribution Practice (GDP). This work is undertaken on behalf of, and in liaison with, the Medicines and Healthcare products Regulatory Agency (MHRA). In addition, there is a regular programme of inspection of pharmacies and of registered agricultural merchants and saddlers for compliance with relevant legislation and current good practice.

The Department seeks to create public awareness through publicising criminal convictions and notable seizures of illegal and counterfeit products, which are considered to pose a significant threat to public health.

The Inspectorate undertakes regular training in counterfeit medicines detection methods and techniques in co-operation with the MHRA who also provide analytical services in relation to enforcement cases. There are also good collaborative links with international drug regulatory authorities and, more locally, the Inspectorate works closely with the Irish Medicines Board in relation to human medicines and with the Irish Department of Agriculture and Food (DAF) for veterinary medicines in the conduct of joint-investigations, exchange of experience and the sharing of intelligence.

Departmental Budget

Mr. Lidington: To ask the Secretary of State for Northern Ireland what the reasons are for the differences between the figures for Northern Ireland Departmental Administration Costs Limits for 2005–06 published as Table 4 of his Priorities and Budget document 2005 to 2008 and the figures for departmental net administration costs for the same year published in the Northern Ireland Estimates 2005–06. [6984]

Angela E. Smith: The following table reconciles the figures within individual Departmental Estimates and the departmental totals within Table 4 of the Priorities and Budget document:

	£ million
Total departmental admin costs per estimates booklet	1,105.3
Less notional charges	−72.1
Pension changes	−23.4
Admin receipts	−99.1
AME costs	−7.5
Admin costs per Table 4, Priorities and Budget Document[1]	903.2

[1] Figure for departments only—excludes the £6.8 million miscellaneous adjustment

Explanations for the reconciling items are as follows:

1. Notional charges—The estimates include notional charges, which are "non-budget" items and thus do not appear in the Budget figurework.

2. Pension changes—In late December 2004, HM Treasury provided details of changes required to Northern Ireland budgets as a result of a change in methodology for determining employers' contribution rates for the Civil Service Pension Scheme and the Teacher's Pension Scheme. These changes were not available at the time of publication of the Priorities and Budget document, but have been included in the estimates document.

3. Admin receipts—The departmental administration figures in column 1 of the estimates are on a gross basis, with any associated receipts being included in the Accruing Resources figures in column 5. The administration cost limits in the Priorities and Budget are presented on a net basis after allowing for any associated administration receipts.

4. AME—The administrative element of Annually Managed Expenditure (AME) is included in the Estimates, but not included in Table 4 of the Priorities and Budget, which focuses on the Departmental Expenditure Limit (DEL).

Education Strike

Lady Hermon: To ask the Secretary of State for Northern Ireland what steps he is taking to avert strike action by teachers, classroom assistants and other education personnel in Northern Ireland. [5555]

Angela E. Smith: I met with schools, boards, political parties and the NI Committee of the Irish Congress of Trades Unions to discuss their concerns with regard to education funding in Northern Ireland. As a result of these meetings, strike action has been suspended by the Unions. I announced additional resources of £12.5 million for education of which £3.5 million will go to address pressures in special education, £2.5 million to improve the nutritional standards of school meals and £2.5 million to schools' maintenance. I have also made £4 million available to help the boards develop shared services and re-shape the schools' estate in line with falling pupil numbers. Savings in these areas will release valuable resources for front-line services in schools.

EU Funding (North Belfast)

Mr. Dodds: To ask the Secretary of State for Northern Ireland what EU funds from *(a)* mainstream funds and *(b)* special programmes and initiatives have been allocated to North Belfast in each year since 1997. [4385]

Angela E. Smith: The amount of money from mainstream EU programmes and special programmes and initiatives allocated[1] to North Belfast since 1997 was as follows:

[1] The figures relate to projects with an address in the North Belfast parliamentary constituency. Where the project address is insufficient to allocate a postcode, organisation address details are used. If this is the case it is important to note that the impact of any project may extend beyond the geographical location of the project itself. In addition, a project may not be situated within the same geographical area as the applicant organisation.

£

	(a) Mainstream EU programmes[1]	*(b) Special programmes and initiatives*[2]
1997	12,435,782	7,516,653
1998	3,982,376	6,067,460
1999	3,203,191	11,812,038
2000	2,204,060	1,846,856
2001	1,013,339	1,936,814
2002	6,005,602	12,992,496
2003	1,705,678	21,978,660
2004	9,005,801	11,888,575
2005	—	405,624

[1] The EU programmes included in this category are the 1994–99 single programme document and the 2000–06 programme for building sustainable prosperity.

[2] The EU programmes included in this category are Peace I 1995–99, Peace II 2000–06 and the Community Initiatives Urban I, SMEs, Employment and Adapt for the period 1994–99 and Urban II, Equal and Interreg IIIA for the funding period 2000–06.

A list of projects and grants awarded under the current round of EU funding 2000–06 extracted from the EU structural funds database has been placed in the Library.

EU Peace Funds

Mr. Dodds: To ask the Secretary of State for Northern Ireland what steps he is taking to ensure that communities from a Protestant and Unionist background receive a fair share of EU Peace funds. [7100]

Angela E. Smith: No shares of EU PEACE funds are set aside for either community. Recent research shows that both communities are deriving substantial benefit with Protestant share estimated at 48.6 per cent. and Catholic share estimated at 51.4 per cent. This research has also shown that Protestants are less likely to apply and every effort will be made to encourage applications from that community. Actions will include:

allocation of an additional £1 million per annum to the Weak Community Infrastructure measure in the PEACE II extension period;

Capacity Building Support for Protestant/Unionist Community Umbrella Groups;

programme publicity and information events throughout Northern Ireland;

specific reference through advertising and publicity events encouraging applications from the Protestant/Unionist community; and

all Implementing Bodies will be required to take action to try to address any instances where under representation of any group is identified.

Fuel Poverty

Mark Durkan: To ask the Secretary of State for Northern Ireland what estimate he has made of the number of deaths attributable to fuel poverty in 2004–05; and if he will make a statement. [7635]

Mr. Hanson: There is no estimate available for the number of deaths attributable to fuel poverty. It is estimated that the average number of deaths, due to cardiovascular and respiratory causes, where low climatic temperature was a factor was approximately 2,050 per annum in the period 1980–2001. These deaths occurred in all seasons of the year and to people of all ages. They are not necessarily attributable to low home temperatures nor can they be attributed directly to fuel poverty. There has been a general decline in death from cardiovascular and respiratory causes, and it is estimated that a comparable figure for 2003–04 would be approximately 1,020.

Honours

Mr. Pope: To ask the Secretary of State for Northern Ireland how many officials currently in the Department received honours in the recent Queen's Birthday Honours List; and at what rank of honour. [5113]

Mr. Hain: I refer my hon. Friend to the answer given by my right hon. Friend the Chancellor of the Duchy of Lancaster, on 22 June 2005, *Official Report*, column 1059W.

House Fire Fatalities

Lady Hermon: To ask the Secretary of State for Northern Ireland how many people have died in house fires in Northern Ireland *(a)* in each month so far in 2005 and *(b)* in the last three years for which figures are available. [7161]

Mr. Woodward: Information provided by the Northern Ireland Fire and Rescue Service shows that in 2005 to date there have been three deaths in accidental dwellings fires in January and 1 in May. In the calendar years 2002, 2003 and 2004, total accidental dwelling fire fatalities were 12, 9 and 10, respectively.

Nitrates Directive (Slurry)

Lady Hermon: To ask the Secretary of State for Northern Ireland what financial assistance his Department will provide to farmers in Northern Ireland to build new slurry tanks following implementation of the EU Nitrates Directive. [7138]

Angela E. Smith: To assist farmers to comply with the Action Programme to implement the EU Nitrates Directive the Department of Agriculture and Rural Development is providing capital grant support through the Farm Nutrient Management Scheme. Funding of £45 million is available to assist with investment in new and improved slurry and manure storage facilities.

Olympic Games

Mr. Dodds: To ask the Secretary of State for Northern Ireland what assessment he has made of the benefits to Northern Ireland so far of the 2012 Olympic bid. [7097]

Mr. Hanson: In the event of London 2012 winning the Olympic bid, it is expected that Northern Ireland could benefit through volunteering, hosting of pre-games training camps, increase in tourism, increased awareness of the benefits of participating in sport, economic and business procurement opportunities. It is also anticipated that competitors from Northern Ireland will compete in the games, which will bring added value in support to local elite athletes.

In Northern Ireland, a regional co-ordinating group has been established to raise awareness of the bid and to consider how to maximise benefits arising from a successful bid throughout the Province.

Mr. Dodds: To ask the Secretary of State for Northern Ireland what discussions he has had with the Secretary of State for Culture, Media and Sport on the benefits to Northern Ireland of the London bid to host the 2012 Olympic Games. [7631]

Mr. Hanson: There is regular liaison with the Department of Culture, Media and Sport (DCMS) in support of the London bid and the benefits for Northern Ireland. A regional co-ordinating group has been established in Northern Ireland to raise awareness of the bid and to consider how to maximise benefits arising from a successful bid.

Northern Ireland could anticipate benefits through volunteering, hosting of pre-games preparation camps, increase in tourism, increased awareness of the benefits of participating in sport, economic and business procurement opportunities.

Out of School Provision

Lady Hermon: To ask the Secretary of State for Northern Ireland whether funding for the expansion of out-of-school provision in Northern Ireland was included in the recent announcement by the Secretary of State for Education and Skills. [7052]

Angela E. Smith: No, the announcement related to England.

My Department is, however, pursuing a number of developments, such as Education Action Zones, and provision within the Belfast Board area that will be supported through the Integrated Development Fund. These envisage schools as the learning hubs of their communities, supporting and encouraging provision throughout the extended school day; breakfast clubs, homework clubs, sports and a range of other activities are already offered in many schools before and after school hours.

Under the Peace II Programme extension 2004–06 out of school childcare provision and other activities can continue to be supported under Measure 1.5, Positive Action for Women.

Pensioners

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland how many pensioners there are in the Strangford constituency. [6680]

Mr. Hanson: In answering this question I have assumed the word "pensioners" relates to those people who are in receipt of retirement pension.

The number of people as of March 2005 in receipt of Retirement Pension in the Strangford constituency was 16,268.

Pharmaceutical Counterfeiting

Lady Hermon: To ask the Secretary of State for Northern Ireland how many staff are engaged within the Department of Health, Social Services and Public Safety in combating the counterfeiting of pharmaceutical products; and what plans he has to increase these numbers. [7147]

Mr. Woodward: There are currently four full-time members of staff which form the Pharmaceutical Inspectorate within the Pharmaceutical Branch, engaged in inspection and enforcement across the whole range of medicines (human and veterinary) and related pharmaceutical legislation, including action against those engaged in dealings in counterfeit products. One of these officers is exclusively dedicated to investigative work.

There will shortly be a meeting between the Department and the Department of Agriculture and Rural Development on the future operational arrangements following the introduction of new Veterinary Medicines Regulations which are due to come into force on 30 October 2005. The implications of this for staffing levels will be considered following the results of those discussions.

School Transport

Mr. McGrady: To ask the Secretary of State for Northern Ireland what assessment he has made of the criteria used to determine children's eligibility for free school transport. [7670]

Angela E. Smith: Free transport provision is available to pupils who have been unable to gain a place in suitable schools within specific distances of their home i.e. two miles for primary and three miles for secondary age pupils. While there are no plans to change this criterion the Department of Education is currently undertaking a review of the current arrangements.

Sinn Fein (Remuneration)

Lady Hermon: To ask the Secretary of State for Northern Ireland how much has been paid in *(a)* salaries and *(b)* office allowances to Sinn Fein Assembly members since 29 April 2004; and if he will make a statement. [6151]

Mr. Hain: The total amount paid to Sinn Fein Assembly Members in respect of salaries from 29 April 2004 to 31 May 2005 was £823,239. For the same period, Sinn Fein Assembly members received Office Allowance Costs of £1,211,141.

Lady Hermon: To ask the Secretary of State for Northern Ireland if he will make a statement on the effectiveness of the first direction given under section 51B(2) of the Northern Ireland Act 1998 against Sinn Fein removing its entitlement to payments under the Financial Assistance for Political Parties Scheme for the 12 months from 29 April 2004. [6152]

Mr. Hain: The first Direction removed Sinn Fein's entitlement to financial assistance for 12 months from 29 April 2004. The assistance Sinn Fein might otherwise have received is approximately £120,000.

Lady Hermon: To ask the Secretary of State for Northern Ireland for what reasons he declined to exercise his powers under section 47 of the Northern Ireland Act 1998 to make a determination in relation to the salaries of Sinn Fein Assembly members following the 1st Report of the Independent Monitoring Commission in April 2004. [6153]

Mr. Hain: The Direction made by my right hon. Friend the Member for Torfaen in April 2004 concerned party funding. In his statement to the House of Commons on 20 April 2004 he said that having considered the Independent Monitoring Commission's Report, he was persuaded that it would be right to remove for a period the entitlement to the block financial assistance paid to Assembly parties.

He said that the powers he had taken to enable him to make a Direction in the absence of a sitting Assembly would also permit him to act to reduce Members' salaries if he saw fit to do so in the light of a future IMC report. My right hon. Friend had therefore concluded that action against party funding was the appropriate response to the report.

Smoke Alarms

Mr. Gregory Campbell: To ask the Secretary of State for Northern Ireland what estimate he has made of the number of homes in Northern Ireland which are not fitted with a working smoke alarm; and what steps are being taken to increase the numbers of homes with working smoke alarms. [7539]

Mr. Woodward: The Northern Ireland Fire and Rescue Service (NIFRS) has based its estimates of working smoke alarms on the findings of the June 2004 Northern Ireland Omnibus Survey (NIOS). This found that 96 per cent. of respondents had a smoke alarm in their home. Of these, 72 per cent. reported checking their alarms as least weekly or monthly. Taking into account the likelihood of those who tested their alarms less frequently, or never tested, having working alarms, NIFRS estimates that 19 per cent. of homes may not have a reliable, working smoke alarm.

NIFRS has undertaken a number of initiatives to increase public awareness of the need to maintain smoke alarms. These have included the "Touch for Life" television advert, shown every Monday throughout the year, which promotes smoke detector maintenance. Billboard and Adshel posters accompanied the television and radio campaign. NIFRS has also circulated a multi-lingual fire safety leaflet targeting minority ethnic groups. NIFRS has also conducted 3,527 community development initiatives in the past year, including fire safety talks in schools, highlighting the importance of smoke alarm maintenance, and 1,421 home safety visits giving advice on fire safety arrangements, as well as the installation and maintenance of smoke alarms.

Mr. Gregory Campbell: To ask the Secretary of State for Northern Ireland how many people in Northern Ireland have *(a)* died and *(b)* suffered injury as a result of house fires where there was a non-working smoke alarm in each of the last five years. [7540]

Mr. Woodward: The following table shows the numbers of deaths in the last five years in house fires where no working smoke alarm was fitted:

	Total fatalities in house fires	*Fatalities where no working smoke alarm fitted*
2000	14	11
2001	14	8
2002	12	5
2003	9	1
2004	10	5

Figures for the numbers of serious injuries are not readily available. I will write to the hon. Gentleman when these are to hand.

Strangford Lough Fishing Ban

Lady Hermon: To ask the Secretary of State for Northern Ireland how many people have been awarded compensation by his Department since the ban on fishing with mobile gear in Strangford Lough came into force; and what has been the total cost of this compensation. [7140]

Angela E. Smith: No compensation has yet been awarded.

Lady Hermon: To ask the Secretary of State for Northern Ireland what criteria were used by his Department when awarding compensation following the ban on fishing with mobile gear in Strangford Lough. [7141]

Angela E. Smith: No compensation has yet been awarded and therefore no assessment criteria have been applied.

Tennis

Lady Hermon: To ask the Secretary of State for Northern Ireland what proportion of the recently-announced lottery funding for sport in Northern Ireland has been earmarked specifically to develop tennis. [7165]

Mr. Hanson: The recent announcement of £6.4 million lottery funding was for projects under the Big Lottery Fund's PE and Sport programme. The PE and Sport programme does not make awards to specific sports, as it is primarily for capital investment. However five of the 14 projects that have recently received awards totalling £4.5 million have indicated in their sports development plan that they will offer sports development opportunities in tennis.

Trading Standards

Lady Hermon: To ask the Secretary of State for Northern Ireland how many Trading Standards offences were recorded in Northern Ireland in each of the past five years; and how many people were prosecuted as a result. [7167]

Angela E. Smith: The following table gives the numbers of recorded Trading Standards offences and prosecutions from 1 April 2000 to 31 March 2005.

Year (1 April-31 March)	*Number of Trading Standards offences recorded*[1]	*Number of Trading Standards prosecutions*
2000–01	812	14
2001–02	1265	20
2002–03	1279	14
2003–04	1493	14
2004–05	308	15

[1] Recorded offences include many instances of non-compliance where remedial action was taken on the spot by the trader.

Lady Hermon: To ask the Secretary of State for Northern Ireland how many Trading Standards officers were employed in Northern Ireland in each of the past five years, broken down by rank. [7166]

Angela E. Smith: The following table gives details of the staffing of Trading Standards Officers in the last five years.

Trading Standards Officers by rank in past five years

Grades	*2000*	*2001*	*2002*	*2003*	*2004*	*2005*
Chief Inspector of Weights and Measures	1	1	1	1	1	1
Deputy Chief Trading Standards Officer	1	2	2	2	2	2
Senior Inspector	1	1	1	1	0	0
Area Inspector	7	7	7	7	7	7
Trading Standards Inspector	12	12	12	11	10	10
Enforcement Officer	10	10	11	11	12	14
Trainee Inspector	0	0	6	6	6	6
Total	32	33	40	39	38	40

Velcade

Lady Hermon: To ask the Secretary of State for Northern Ireland what plans he has to make Velcade available on the NHS in Northern Ireland; and for what reasons it has not been available to date. [7169]

Mr. Woodward: Velcade was licensed for use in all areas in the UK in April 2004. Clinicians are in a position to prescribe Velcade within its licensed indications and in the context of local prescribing budgets.

Additional funding of £5 million has been allocated in 2005–06 for specialist hospital drugs. It is for the Health and Social Services Boards, as commissioners of services, to prioritise how funding is used, taking into account the competing demands and pressures in their areas and the strategic objectives and priorities of my Department.

The Department will continue to seek to improve access to specialist medicines, which offer the potential for significant improvement in patient care.

CONSTITUTIONAL AFFAIRS

Civil Legal Aid Budget

Mr. Djanogly: To ask the Minister of State, Department for Constitutional Affairs what allocations she has made to the civil legal aid budget for each of the next five years. [7957]

Bridget Prentice: There is no set budget for civil legal aid for the next five years. Civil legal aid forms part of the overall total funding available for all legal aid (excluding asylum which is part of the Single Asylum Fund). The resource budget for legal aid is set for three years at each Spending Review and these stand at £1,825 million, £1,872 million and £1,920 million for 2005–06 to 2007–08 respectively.

Prior to the commencement of each financial year the Lord Chancellor is required to direct how much may be paid into the Community Legal Service Fund (which funds civil legal aid). As priorities change throughout the course of the year this amount may be changed by way of an amending direction.

Coroners (Bridgend/Teesside)

Mrs. Moon: To ask the Minister of State, Department for Constitutional Affairs if she will instruct the Bridgend coroner, Mr. Walters, to provide doctors at the Oaktree Surgery in Bridgend with copies of post mortems carried out on their patients. [6918]

Ms Harman: Coroners have been encouraged to provide doctors with copies of post mortem reports in relation to their patients but the decision is a matter for the coroner alone and not one where the Secretary of State can direct.

Vera Baird: To ask the Minister of State, Department for Constitutional Affairs what the contents are of the monthly reports which the Lord Chancellor has been receiving from the coroner of Teesside. [7692]

Ms Harman: The monthly information reports received by the Lord Chancellor from the coroner for Teesside since June 2004 contain the number of coroner cases (including inquests) in the region and specifically the numbers of cases received, disposed of and outstanding on a monthly basis.

Vera Baird: To ask the Minister of State, Department for Constitutional Affairs on what basis the Lord Chancellor will decide whether he requires the Teesside coroner to continue to send him monthly reports. [7693]

Ms Harman: The Lord Chancellor will decide whether he requires the coroner for Teesside to continue to send him monthly reports based upon the performance of the coroner's office for Teesside during the review period.

Vera Baird: To ask the Minister of State, Department for Constitutional Affairs if the Lord Chancellor will require the Teesside coroner to undergo extra training to ensure that there is no recurrence of delays. [7698]

Ms Harman: The Lord Chancellor has not required the coroner to undergo extra training as part of the review period. The Lord Chancellor will consider what further action, if any, is required after the end of June 2005.

Immigration and Asylum

Graham Stringer: To ask the Minister of State, Department for Constitutional Affairs what studies her Department has undertaken into the effect of the new legal aid control on the immigration and asylum system. [6978]

Bridget Prentice: The reforms introduced in April 2004 addressed serious concerns about increasing costs and poor quality work. They were designed to target resources on cases with merit and to drive up the quality of publicly funded legal services in the field of asylum and immigration. Now that the reforms have been in place for a year, there is sufficient information available to commence an analysis of their impact and DCA officials will be working with the Legal Services Commission (LSC), Home Office and the Asylum and Immigration Tribunal on this. The operation of the new cost controls was subject to a review involving key stakeholders from the legal professions in July 2004.

In most areas of the country there are an adequate number of suppliers and the LSC acts to ensure that any local gaps in supply are addressed as quickly as possible. The LSC is undertaking a needs analysis exercise to further match supply to demand. Since the changes were introduced, the number of firms and organisations undertaking this work has fallen, but during 2004–05 the net reduction was less than 10 per cent. This is in the context of a significant fall in asylum numbers from a peak of 84,000 to 32,000 in 2004–05.

Jury Service (Northern Ireland)

Lady Hermon: To ask the Minister of State, Department for Constitutional Affairs how many people were called to jury service in Northern Ireland in each of the last three years; and what the average length of time served as a juror was in Northern Ireland in each of these years. [7168]

Bridget Prentice: The number of people called to jury service in Northern Ireland is:

	Number
2003–04	17,405
2004–05	18,345

Statistics for 2002–03 and information on the average length of time served as a juror are recorded manually and could only be provided at disproportionate cost.

Law Society

Mr. Djanogly: To ask the Minister of State, Department for Constitutional Affairs whether she has been consulted about the Law Society's Training Framework Review. [7521]

Bridget Prentice: The Law Society is currently consulting on proposed changes to the pre-qualification training framework for solicitors. Any recommendations the Law Society makes as a result of that consultation will then be considered by the Lord Chancellor and Secretary of State for Constitutional Affairs, whose approval would be needed, in accordance with Schedule 4 of the Courts and Legal Services Act 1990.

Magistrates

Mr. Allen: To ask the Minister of State, Department for Constitutional Affairs if she will make it her policy to collect data on magistrates residency by constituency in order to identify areas where extra recruitment is required. [7386]

Ms Harman: There are no plans to collect data on magistrates residency by constituency. The Lord Chancellor's and Secretary of State's Advisory Committees on Justices of the Peace are responsible for the recruitment of magistrates. There are 101 Advisory Committees covering England and Wales. Data on the number of magistrates are recorded for each bench and Advisory Committees are responsible for recruiting sufficient magistrates for each bench. The Magistrates' National Recruitment Strategy Implementation Paper published on 11 March 2005 sets the action for increasing recruitment.

Solicitors (Newly Qualified/Trainee)

Mr. Djanogly: To ask the Minister of State, Department for Constitutional Affairs what the average salary has

been of a one-year qualified solicitor *(a)* conducting civil legal aid work and *(b)* in non-publicly funded firms, in each of the last 10 years, broken down by region; [7955]

Bridget Prentice: The specific information requested is not collated or held centrally by this Department and therefore an answer cannot be given. The issue of salaries paid to solicitors is a matter for solicitors' partnerships/practices and the individual solicitors concerned.

Mr. Djanogly: To ask the Minister of State, Department for Constitutional Affairs what the average salary has been of a trainee solicitor *(a)* conducting civil legal aid work and *(b)* in non-publicly funded firms, in each of the last 10 years broken down by region. [7956]

Bridget Prentice: The specific information requested is not collated or held centrally by this Department and therefore an answer cannot be given. The issue of salaries paid to solicitors is a matter for solicitors' partnerships/practices and the individual solicitors concerned.

Tolerance Work Contracts

Mr. Djanogly: To ask the Minister of State, Department for Constitutional Affairs what steps she has taken to review legal aid advice under contracts for tolerance work. [7954]

Bridget Prentice: The Legal Services Commission plan to review tolerance work contracts later in the year as part of a major consultation on their supplier management strategy.

FOREIGN AND COMMONWEALTH OFFICE

Consultants

Mrs. Dean: To ask the Secretary of State for Foreign and Commonwealth Affairs what plans he has to issue guidance on effective commissioning for those in the public and voluntary sectors who are commissioning work from external consultants. [7032]

Mr. Straw: The Foreign and Commonwealth Office (FCO) has comprehensive guidance on commissioning consultants contained within its procurement guidelines. This guidance is accessible to all staff via the FCO's own internal intranet.

European Armaments, Research and Military Capabilities Agency

Harry Cohen: To ask the Secretary of State for Foreign and Commonwealth Affairs what the role is of the European Armaments, Research and Military Capabilities Agency; when it was established; how it is financed; what the UK contribution was in the last year for which figures are available; and if he will make a statement. [2879]

Mr. Ingram: I have been asked to reply.

The European Defence Agency was formally established under that title on 12 July 2004 by a unanimous decision by Heads of State and Government. It was established under the Council Joint Action 2004/551/CFSP according to the provisions of the treaty on European Union.

The Agency's mission is "to support member states in their effort to improve the European defence capabilities in the field of crisis management and to sustain the ESDP as it stands and develops in the future". To fulfil this role, the Agency has been assigned four functions: the development of defence capabilities in the field of crisis management; the promotion and enhancement of European armaments co-operation; working to strengthen the defence technological and industrial base and for the creation of an internationally competitive European defence equipment market; and the enhancement of the effectiveness of European defence research and technology.

The Agency is financed by contributions from participating member states, whose share is based on assessments of gross national income. The UK contributed 17.28 percent. (equating to €308,775.51) of the budget for 2004, which covered the period from its formal establishment in July to the end of that year. For the calendar year 2005, the UK contribution is 18.07 percent., equating to €3,596,803. The 2005 budget includes non-recurring costs associated with the initial set-up of the Agency.

The Government are a strong supporter of the European Defence Agency. The Agency will drive forward work on improving European defence capabilities by encouraging and supporting the efforts of individual EU member states. By developing proposals to rationalise and harmonise capability requirements, and linking those directly to industrial and research efforts, the Agency will significantly strengthen both the European security and defence policy and Europe's contribution to NATO.

India

Mark Simmonds: To ask the Secretary of State for Foreign and Commonwealth Affairs what discussions his Department has had with the Government of India regarding Sikh separatism in the Punjab. [7366]

Dr. Howells: The Government have not raised the issue of Sikh separatism in the Punjab with the Government of India. We continue regularly to raise the issue of religious minorities, at official level, with the Indian authorities.

Iran

Mr. Hancock: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on the Bahá'í community in Iran. [7527]

Dr. Howells: The Bahá'ís are the largest non-Muslim religious group in Iran yet, unlike Christians, Jews and Zoroastrians, are not recognised in Iran's constitution. Members of the Bahá'í community have suffered intimidation and harassment, had property confiscated and been denied access to education and employment, apparently on account of their faith. A number of Bahá'í sites have been demolished, organisers of Bahá'í community activities have reportedly been harassed and the Bahá'í faith has been denigrated in the state-owned media. Many of these acts appear to have been carried

out by, or with the support or acquiescence of, the Iranian authorities. We have raised our concerns about the situation of the Bahá'ís in Iran with the Iranian authorities on many occasions, and will continue to do so, bilaterally and with our European Union partners.

Mr. Marshall-Andrews: To ask the Secretary of State for Foreign and Commonwealth Affairs what proposals the EU3 has made on *(a)* nuclear co-operation, *(b)* technological and economic co-operation and *(c)* security issues during negotiations with the Iranian Government. [7636]

Dr. Howells: In an agreement reached with Iran in Paris in November 2004, the UK, France and Germany (the "E3"), supported by the EU High Representative, proposed a framework for negotiating long-term arrangements for Iran's nuclear programme and co-operation in other areas. Iran agreed to suspend fully all uranium enrichment related and reprocessing activities while the discussions continue; the agreement makes clear that this is essential to the continuation of the process. The discussions have been taken forward by a Steering Committee and three Working Groups covering nuclear issues, political/security issues, and technology/co-operation. Both sides have put forward ideas. Following a ministerial meeting in Geneva on 25 May, the E3 have now agreed to present further ideas in late July or early August. These are still under internal discussion.

Iraq/Afghanistan (Human Rights)

Mr. Tyrie: To ask the Secretary of State for Foreign and Commonwealth Affairs whether the 2005 Annual Human Rights report will *(a)* set out the steps which the UK have taken to ensure that human rights are respected by military personnel in Iraq and Afghanistan and *(b)* include a discussion of human rights violations alleged to have been committed by the UK. [7922]

Ian Pearson: The Foreign and Commonwealth Office's Annual Report on Human Rights 2005 is currently being edited and is due for publication as a Command Paper next month. It contains sections on Iraq and Afghanistan, including human rights, security forces and allegations of abuse.

Kashmir

Miss McIntosh: To ask the Secretary of State for Foreign and Commonwealth Affairs what progress has been made towards an improvement in the human rights situation in Kashmir. [6967]

Dr. Howells: We remain concerned by continued credible reports of human rights abuses in Kashmir, including acts reportedly perpetrated by members of the Indian security forces. My right hon. Friend the Foreign Secretary raised this with the Indian Minister of Home Affairs during his visit to India in February 2005. The UK condemns all acts of violence that bring suffering to the people of Kashmir, and believes that only through dialogue between India and Pakistan will a durable solution to the Kashmir issue be reached. We welcome the Indian Chief of Army Staffs public commitment to "reach out to the Kashmiri People", and the UK will continue to encourage the Indian Government to implement such pledges to improve the human rights situation in Kashmir.

Miss McIntosh: To ask the Secretary of State for Foreign and Commonwealth Affairs what progress has been made in reducing external support for militants in Kashmir. [6992]

Dr. Howells: It is important that Pakistan does all it can to fulfil President Musharraf's commitment, made at the South Asian Association for Regional Co-operation (SAARC) Summit in Islamabad in January 2004, not to permit any Pakistani territory to be used to support terrorism. My right hon. Friend the Foreign Secretary raised the need for Pakistan to fulfil this commitment during his visit to Islamabad in February 2005, and the UK continues to make this point clearly to senior Pakistani interlocutors.

Middle East

Mark Simmonds: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on the Government's policy towards Israel's plans to build a Gaza sea barrier. [7361]

Dr. Howells: We are seeking clarification from the Government of Israel on its reported plans to build a sea barrier. We fully support Israel's right to defend itself against terrorism, which the UK condemns absolutely. But we would expect the construction of any such sea barrier to comply with international law.

Lynne Jones: To ask the Secretary of State for Foreign and Commonwealth Affairs what assessment he has made of whether Israel is fulfilling human rights commitments made to the EU. [7374]

Dr. Howells: Along with our EU partners, we have followed a policy of constructive engagement with Israel on humanitarian and human rights issues. We have raised our concerns on human rights violations both bilaterally and through the institutions established by the EU/Israel Association Agreement. This happened most recently at the EU/Israel Association Committee on 14 April in Jerusalem. Our primary concerns are the impact on human rights of barrier construction, restrictions imposed on the freedom of movement and settlement expansion. My right hon. Friend the Foreign Secretary raised these issues with the Israeli Prime Minister, Ariel Sharon, during his visit to Israel and the Occupied Territories on 7–8 June.

Mr. David Hamilton: To ask the Secretary of State for Foreign and Commonwealth Affairs what discussions he has had with the Israeli Government on the timetable for Israeli withdrawals from Gaza. [7384]

Dr. Howells: We have had ongoing discussions with the Israeli Government on the timetable for Israeli withdrawal from Gaza and part of the West Bank. Most recently my right hon. Friend the Foreign Secretary discussed this with Israeli Prime Minister Sharon, Vice Prime Minister Olmert and Foreign Minister Shalom during his visit to the region on 7–8 June.

Saddam Hussein

Mr. Robathan: To ask the Secretary of State for Foreign and Commonwealth Affairs what effects the

(a) possibility of Saddam Hussein receiving a capital sentence and *(b)* implications of the European Convention on Human Rights have had on the provision of information by the UK Government into the investigations into Saddam Hussein's alleged crimes. [7846]

Dr. Howells: The British Government have not provided any information into the investigations into Saddam Hussein's alleged crimes.

Our opposition to the death penalty is well known.

Mr. Robathan: To ask the Secretary of State for Foreign and Commonwealth Affairs pursuant to the oral answer of 21 June 2005, *Official Report*, column 650 on Saddam Hussein, whether the Government plans *(a)* to make all relevant evidence available to and *(b)* co-operate in all ways with the investigation into and the trial of Saddam Hussein. [7949]

Dr. Howells: The Government supports the efforts of the Iraqi Special Tribunal (IST) to bring members of the former regime to justice and has provided training for the judiciary. Should the Government be approached by the IST with a request for cooperation in support of investigations or trials, we would of course give that request full consideration. Thus far, we have received no such request.

Saudi Arabia

Mark Simmonds: To ask the Secretary of State for Foreign and Commonwealth Affairs what recent discussions he has had with the Government of Saudi Arabia regarding democratic reform. [7363]

Dr. Howells: We support the emerging momentum for change and modernisation that is developing in Saudi Arabia. My right hon. Friend the Foreign Secretary jointly hosted with HRH Prince Saud, the Saudi Foreign Minister, a conference in London on 23 February to consider Saudi reform issues. The Foreign Secretary had a further meeting with HRH Prince Saud on 22 June at which they again discussed reform. We have established, with Saudi Arabia, a follow-up process to the conference to develop practical steps we can take together to support Saudi Arabia's reform efforts.

Student Visas

Mark Williams: To ask the Secretary of State for Foreign and Commonwealth Affairs what discussions he has had with ministerial colleagues about the effect of increases in visa charges on numbers of applications from overseas students to universities in the United Kingdom. [7268]

Dr. Howells: My right hon. Friend the Foreign Secretary was involved in correspondence discussions on the matter of the increase in visa fees for overseas students with my right hon. Friends the Home Secretary and the Secretary of State for Education and Skills. In addition, he has discussed this issue with the previous and current Parliamentary Under-Secretaries of State for Foreign and Commonwealth Affairs (respectively Mr. Mullin and Lord Triesman of Tottenham).

Sudan

Mr. Drew: To ask the Secretary of State for Foreign and Commonwealth Affairs what recent discussions he has had with the Justice and Equality Movement of Darfur (JEM); and whether the JEM has recently visited the UK. [7847]

Ian Pearson: Through the Sudan Unit in the Foreign and Commonwealth Office in London and our Embassy in Khartoum, we are in regular contact with the Justice and Equality Movement (JEM). The then UK Special Representative met Dr Khalil, the leader of the JEM in London on 19 April. During this meeting we urged them to abide by their commitments under the Abuja protocols, to prevent attacks and to negotiate a political settlement.

My right hon. Friend the Secretary of State for International Development (Hilary Benn) met representatives of the JEM during his visit to Darfur on 13 June. He pressed them to respect their commitment to the ceasefire, noting that responsibility for the majority of ceasefire violations in recent weeks have been laid at the rebels' door. He urged them to negotiate constructively in Abuja.

To this end we welcome the resumption of peace talks in Abuja. A UK observer at the talks is in contact with the JEM on a daily basis. We continue to press them to negotiate in good faith and find a solution to the conflict in Darfur.

DEPUTY PRIME MINISTER

Business Rates

Mrs. Spelman: To ask the Deputy Prime Minister what the average business rate in London has been in each year since 1997. [7399]

Mr. Woolas: I refer the hon. Member to the answer given on 16 June 2005, *Official Report*, column 542W.

Council Tax

Dr. Kumar: To ask the Deputy Prime Minister if he will take steps to limit regional variations in council tax. [7301]

Mr. Woolas: Council tax levels are primarily for local authorities to determine, although the Government have made it clear that they will not hesitate to use their capping powers to protect council tax payers from excessive increases.

Mrs. Spelman: To ask the Deputy Prime Minister what the average *(a)* Band D and *(b)* per dwelling council tax bill has been in (i) London and (ii) each London borough in each year since 1997–98. [7398]

Mr. Woolas: Details of the average *(a)* Band D and *(b)* per dwelling council tax bill in (i) London and (ii) each London borough in each year since 1998–99 are published on the Office of the Deputy Prime Minister's website and can be found under the heading "Information For Taxpayers—Council Taxes" at: http://www.local.odpm.gov.uk/finance/ct.htm.

Mrs. Spelman: To ask the Deputy Prime Minister if he will make a statement on the Government's plan for *(a)* council tax on and *(b)* planning permission for second homes. [7402]

Mr. Woolas: The information is as follows.

(a) From the financial year 2004–05, the Office of the Deputy Prime Minister has given local billing authorities the discretion to set the council tax discount offered on second homes at any point between 10 per cent. and 50 per cent. No further changes are planned.

(b) I refer the hon. Member to the answer given to the hon. Member for Westmorland and Lonsdale (Tim Farron) on 13 June 2005, *Official Report*, column 127W.

Mrs. Spelman: To ask the Deputy Prime Minister what the estimated gross revenue generated in England by reducing the council tax discount on *(a)* second homes and *(b)* empty homes was in the last year for which figures are available. [7404]

Mr. Woolas: It is estimated that the additional amounts of council tax generated in 2004–05 as a result of billing authorities reducing council tax discounts for properties in their area were £88 million for second homes and £49 million for long-term empty homes.

Mrs. Spelman: To ask the Deputy Prime Minister what the definition is of a second home for the purposes of setting council tax bills. [7405]

Mr. Woolas: For the purpose of setting council tax bills, a second home is a chargeable furnished dwelling which is no one's sole or main residence.

E-projects (Funding)

Robert Key: To ask the Deputy Prime Minister if he will list the projects for e-enabling parish councils and local community groups that his Department is funding; what the *(a)* central funding and *(b)* partnership contribution is for each project; and if he will make a statement. [6557]

Mr. Woolas: The Office of the Deputy Prime Minister's Local e-Government programme does not directly support the e-enablement of parish councils and local community groups. However, through a number of projects we have funded, local authorities have been given the tools to support their local groups. Local authorities are encouraged to do so through the Local e-Gov Priority Outcomes guidance as part of their community leadership role.

The five projects we funded are:

	Name of project	*Area of interest*	*ODPM stream of funding (£)*	*Partnership contribution (£)*
2005–06	Local Directgov—workstream 2	Neighbourhoods and parish councils	350,000	n/a
2005–06	East of England Regional Partnership	E-enabling Parish Councils	300,000	n/a
2004–05	ENCORE—workstream 4	E-Community Services	531,200	n/a
2004–05	The Local Link	Online services to build web pages for first tier councils	170,000	170,000
2004–05	Community Heritage Stores	Community Heritage Store	68,000	68,000

EU Funding (West Midlands)

Paul Farrelly: To ask the Deputy Prime Minister how much EU funding has been secured for projects in the west midlands since 1997, broken down by *(a)* parliamentary constituency and *(b)* local authority. [7717]

Yvette Cooper: The west midlands region has secured over £1.2 billion of funding from the European Union since 1997, via a package of structural funds programmes, namely

£

Programme	*ERDF*	*ESF*	*EAGGF*	*Total*
Objective 2 (1997–99)	226.10 million	77.49 million	—	303.59 million
Urban (1997–99)	1.95 million	0.88 million	—	2.83 million
Leader II (1997–99)	1.0 million	0.25 million	0.25 million	1.50 million
Objective 2 (2000–06)	515.26 million	100.00 million	—	615.26 million
Objective 3 (2000–06)	—	318.09 million	—	318.09 million
Leader + (2000–06)	—	—	1.13 million	1.13 million
Grand total	—	—	—	1.2424 billion

These sums are in addition to the £335 million of EU funding allocated to the region under the earlier programmes (1994–95), part of which was still available to spend up to 2001.

European funding is allocated on a national/regional basis for projects operating in eligible programme areas which are agreed with the Commission at the start of the programming period. EU funds are not allocated on a sub-regional basis in the west midlands region, so the above allocations cannot be broken down to a parliamentary constituency or local authority level.

Paul Farrelly: To ask the Deputy Prime Minister how much *(a)* objective 2, *(b)* objective 3 and *(c)* other EU funding has been secured in the West Midlands in 2005–06, broken down by (i) parliamentary constituency and (ii) local authority area. [7718]

Yvette Cooper: European Structural Funds programmes operate on the basis of calendar years. Between 1 January and 31 December 2005, the West Midlands has been allocated a total of £110.4 million in European funding, broken down as follows:

£ million

Programme	ERDF	ESF	EAGGF	Total
Objective 2	60.92	14.50	—	75. 42
Objective 3	—	34.70	—	34.70
Leader +	—	—	0.28	0.28
Grand total	—	—	—	110.40

EU funds are not allocated on a sub-regional basis in the West Midlands, so the above allocations cannot be broken down to a parliamentary constituency or local authority area.

Home Ownership

Sarah Teather: To ask the Deputy Prime Minister pursuant to his written statement of 25 May 2005, *Official Report*, column 17WS, on home ownership, how many people in each region he expects to be eligible for the shared home ownership schemes. [6485]

Yvette Cooper: It is not possible to estimate at the moment how many people in each region will be eligible for our new HomeBuy shared equity proposals as set out in our consultation document "HomeBuy—Expanding the Opportunity to Own".

We want to ensure that our support is directed at people most in need of assistance. Our consultation document proposes that social tenants and those on housing registers, key workers and other first time buyers identified by Regional Housing Boards should be eligible for assistance. Final eligibility criteria will therefore be dependent on the recommendations of Regional Housing Boards.

The consultation closes on 24 June and we intend to put the new arrangements in place by April 2006.

Sarah Teather: To ask the Deputy Prime Minister pursuant to the written statement of 25 May 2005, *Official Report*, column 17WS, on home ownership, how many of the shared home ownership schemes he expects to be in place by April 2009; and how many people he expects to have participated in them. [6486]

Yvette Cooper: "Sustainable Communities: Homes for All", a copy of which can be found in the Library of the House, indicated that over 80,000 households will be helped into home-ownership through low cost home ownership schemes by 2010. This total could increase to as many as 110,000 through a deal being negotiated with the Council of Mortgage Lenders that would involve the Government funding equity loans jointly with private lenders.

However, it is too early to say how many people will have participated in shared ownership schemes between now and April 2009. Decisions on the overall level of funding for affordable housing in each region in 2006–07 and 2007–08 will be taken over the summer in the light of advice from the Regional Housing Boards. The allocation of these funds across the regions, which will be announced early next year, will reflect advice from the boards and the quantity and value for money of bids to the Housing Corporation. The delivery of outputs from 2008–09 will be dependent upon the outcome of the next Spending Review in 2006.

House Prices

Mrs. Spelman: To ask the Deputy Prime Minister pursuant to the answer of 21 June 2005, *Official Report*, column 878W, on house prices, what the average house price for England was in *(a)* 1993 and *(b)* 2004. [7546]

Yvette Cooper: Mix-adjusted house prices for the UK, constituent countries and the Government Office regions from 1993 are published as Live Table 507 on the Office of the Deputy Prime Minister's website at:

http://www.odpm.gov.uk/stellent/groups/odpm_housing/documents/page/odpm_house_604092.xls

House Sales (Islamic Financing)

Sarah Teather: To ask the Deputy Prime Minister (1) how many homes have been sold in each year since 1997 under *(a)* shared ownership and *(b)* right-to-buy schemes using the principles of Islamic financing; [6408]

(2) what provision has been made by his Department to enable the purchase of homes under *(a)* shared ownership and *(b)* right-to-buy schemes that are compliant with Islamic financing principles. [6409]

Yvette Cooper: The Office of the Deputy Prime Minister (ODPM) is exploring options with the Housing Corporation and other regulators to ascertain whether it is possible for shared equity products to comply with Islamic law. The issues are complex and we want a solution which protects both the rights of individuals and provides security for Government funds.

In March 2005, the ODPM published a consultation paper, "Non-standard mortgages for purchasing social dwellings", on its proposal to issue a General Consent under section 32 of the Housing Act 1985 to facilitate the use of finance that complies with Sharia principles by secure tenants of local authorities who wish to buy their homes. The paper is available on the ODPM website, at: http://www.odpm.gov.uk/stellent/groups/odpm_housing/documents/page/odpm_house_035962.hcsp

The closing date for responses was 20 June 2005. We will consider the responses received before taking any action.

Housing Initiatives

Dr. Cable: To ask the Deputy Prime Minister what assessment he has made of the proportion of *(a)* shared owners and *(b)* Homebuy purchasers who expect to own their own home outright eventually. [6451]

Yvette Cooper: On 6 June the Office of the Deputy Prime Minister published a supporting annex to our consultation document "HomeBuy—expanding the opportunity to own" (April 2005). This summarised key research into our existing shared ownership and Homebuy schemes. Research included the "Evaluation of the Low Cost Home Ownership Programme (ODPM 2002)" which found that over 80 per cent. of shared owners and 53 per cent. of Homebuy purchasers expected to own their current home outright eventually.

Dr. Cable: To ask the Deputy Prime Minister what assessment he has made of the potential costs to *(a)* public funds and *(b)* mortgage lenders of properties

purchased under the Homebuy Joint Shared Equity Loan with Mortgage Lenders scheme being sold at below the original purchase price. [6454]

Yvette Cooper: The Office of the Deputy Prime Minister is currently consulting on the details of our proposals for a range of new HomeBuy products, as set out in the consultation document "HomeBuy—Expanding the Opportunity to Own" (a copy of which is available from the Library of the House). This includes proposals for the joint public/private funding of equity loans.

Under these proposals a proportion of the equity loan assistance currently offered by the Government under the HomeBuy scheme will be replaced with funding from a private mortgage lender. For example, if a buyer purchases 75 per cent. of a home through their own means the Government will fund 12.5 per cent. and the private lender the remaining 12.5 per cent.

Subject to the outcome of the consultation exercise the Open Market HomeBuy scheme will be modified in this way. This will enable the Government's funding allocated to the scheme to go further and help more people into home ownership. It is not our intention that there will be any overall increase in costs to public funds as a result of these proposals.

The Office of the Deputy Prime Minister has made no assessment of the potential costs to lenders of operating this scheme; that is a primarily a matter for lenders themselves.

Key Workers

Sarah Teather: To ask the Deputy Prime Minister what definition of key worker his Department uses. [6417]

Yvette Cooper: For the purposes of the Key Worker Living (KWL) programme, a key worker is someone employed by the public sector in health, education or community safety delivering an essential public service in a role where there are serious recruitment and retention problems. Within this broad definition sponsor Government Departments and Police and Fire Authorities specify the groups at which help should be targeted based on recruitment and retention issues in critical frontline services. The sector specific eligibility criteria can be found in Annex B of the KWL Capital Funding Guide on the Housing Corporation's website at http://www.housingcorp.gov.uk/resources/cfg.htm

Local Authorities (Performance)

Mrs. Spelman: To ask the Deputy Prime Minister what extra powers the Government will offer local authorities rated *(a)* excellent and *(b)* good in the revised Comprehensive Performance Assessment regime. [7444]

Mr. Woolas: Under the current Comprehensive Performance Assessment regime excellent and good authorities benefit from a number of additional freedoms, including new powers to trade and streamlined requirements for best value performance plans. The Office of the Deputy Prime Minister is currently consulting on provisions allowing good and excellent authorities to spend income from fixed penalty notices from dog fouling and litter on any service. Excellent authorities benefit from further freedoms from statutory plan requirements, significant reductions in levels of inspection and reduced ring fencing. These freedoms will remain under the revised CPA system and we will be considering what further freedoms can be provided before the first scores under the revised system are published at the end of the year.

Local Authority Budgets

Mrs. Spelman: To ask the Deputy Prime Minister what the timetable is for capping local authority budgets. [7447]

Mr. Woolas: The Office of the Deputy Prime Minister is currently considering the challenges made by the nine authorities which were designated on 23 March.

In year capping is subject to a capping Order being approved by the House of Commons. If any such Order is approved, it is intended that it should come into effect before the summer recess.

Mobile Phone Masts

Mr. Mates: To ask the Deputy Prime Minister for what reasons the Government did not proceed with its undertaking to make all telephones masts the subject of normal planning procedures. [7951]

Yvette Cooper: In 2000 the Independent Expert Group on Mobile Phones (Stewart Group) recommended that telecommunication development should be subject to the normal planning process. The Group made this recommendation in order to improve local consultation. The arrangements we put in place following the Group's report provide for the same consultation on mobile phone masts up to 15 m in height as is required by full planning permission.

Mr. Mates: To ask the Deputy Prime Minister what percentage of planning appeals for mobile phone masts were decided *(a)* for and *(b)* against the appellant in the most recent year for which figures are available. [7952]

Yvette Cooper: The Office of the Deputy Prime Minister do not hold information about mobile phone masts specifically, and it could only be obtained at a disproportionate cost.

Mr. Mates: To ask the Deputy Prime Minister when research into mobile phone use and the necessity for masts in the future, announced on 4 April, is expected to be completed. [7991]

Yvette Cooper: The 4 April announcement stated the Government's intention to commission further research to identify the future direction of mobile phone technology and the future need for mast developments. We will announce further details of the research in due course.

Property Values

Mrs. Spelman: To ask the Deputy Prime Minister what *(a)* year and *(b)* month's house prices were used to assess property values in the original valuation of properties for council tax in England. [7407]

Mr. Woolas: Domestic properties were assessed for council tax based on the value that would have been realised if they were sold on 1 April 1991.

Mrs. Spelman: To ask the Deputy Prime Minister what the timetable was for the original valuation of residential properties for council tax in England. [7408]

Mr. Woolas: Following the Local Government and Finance Act 1991 the Valuation Office had to deliver draft valuation lists to local (charging) authorities by 1 December 1992 and compiled lists by 1 April 1993.

Mrs. Spelman: To ask the Deputy Prime Minister if he will place in the Library a copy of the methodology used for the original valuation of properties for council tax in England. [7409]

Mr. Woolas: Information on the methodology used in valuing domestic properties for council tax purposes has been placed in the Library of the House. This is contained in the National Audit report, published in March 1994, entitled "Council Tax Valuations in England and Wales".

Additional information can be obtained from the Valuation Office Agency (VOA) website at www.voa.gov.uk and selecting council tax at the top of the home page and from the next page "How your property is valued".

Public Conveniences

Mrs. Spelman: To ask the Deputy Prime Minister pursuant to the answer of 21 June 2005, *Official Report*, column 879W, on public conveniences, in what year public conveniences first became liable for business rates; and what the average rate on a public convenience was in the last year for which figures are available. [7494]

Mr. Woolas: Public conveniences have been liable for business rates at least as far back as 1950. This is when the responsibility for compiling and maintaining valuation lists transferred to valuation officers, at that time officials of the Inland Revenue. Information on the average rate bills for public conveniences is not held centrally and could be provided only at disproportionate cost.

Rates (Collection)

Mrs. Spelman: To ask the Deputy Prime Minister what the collection rate for *(a)* business rates and *(b)* council tax has been in each local authority in each year since 1996–97. [7446]

Mr. Woolas: Details of the collection rate for *(a)* non-domestic rates and *(b)* council tax in each local authority in each year since 1997–98 are published on the Office of the Deputy Prime Minister's website and can be found under the heading "Information For Taxpayers—Council Tax Collection Rates" at: http://www.local.odpm.gov.uk/finance/ct.htm

Second Home Discount

Mr. Drew: To ask the Deputy Prime Minister how much revenue was accrued through the change in the second home discount in the last year for which figures are available, broken down by local authority; and how much of that money was ringfenced for housing purposes. [6814]

Mr. Woolas: A table giving estimates of the amounts of additional council tax generated for 2004–05 for each billing authority area as a result of reductions in the discount for second homes has been placed in the Library of the House.

None of the additional money generated was ring-fenced for housing purposes. Local authorities are free to use the additional revenue generated for whatever purposes they feel most appropriate. Some may use it to keep down their increase in council tax for other council taxpayers. In other areas, local authorities have indicated their intention to apply the proceeds to specific purposes, such as the provision of more affordable housing.

South East England Regional Spatial Strategy

Anne Milton: To ask the Deputy Prime Minister to what timetable he expects the South East England Regional Spatial Strategy to be completed. [3367]

Yvette Cooper: The South East England Regional Assembly has written to Ministers requesting an extension to the timetable of the South East Plan. The proposal is currently being considered.

Standards Board

Mr. Dismore: To ask the Deputy Prime Minister (1) if he will require the Standards Board to record the amount of staff time spent on each investigation; and if he will make a statement; [7056]

(2) if he will require the Standards Board to record the post held by a local government officer making a complaint against a councillor; and if he will make a statement; [7057]

(3) if he will require the Standards Board to record the political affiliation of *(a)* a complainant councillor and *(b)* a respondent councillor, in respect of complaints; and if he will make a statement; [7058]

(4) if he will require the Standards Board to record the outcome of cases referred to it, by category of complainant; and if he will make a statement. [7059]

Mr. Woolas: The Standards Board for England has recently introduced a system to record the amount of staff time spent on individual cases. The board records the numbers of allegations made by monitoring officers, but does not distinguish between the numbers submitted by other local authority officers. We have no plans to require the board to undertake any further monitoring of the kind referred to.

WORK AND PENSIONS

Incapacity Benefit

Mr. Frank Field: To ask the Secretary of State for Work and Pensions what percentage of claimant off-flows from jobseeker's allowance were due to the

claimant claiming incapacity benefit for each of the last 10 years in *(a)* the UK, *(b)* England and Wales and *(c)* Birkenhead. [7993]

Mrs. McGuire: Information is not available prior to 1998; the available information is in the table.

Jobseekers allowance (JSA) off-flows due to the claimant claiming incapacity benefit (IB), May 1998 to May 2005: United Kingdom, England, Wales and Birkenhead parliamentary constituency

	United Kingdom		England	
	JSA off-flow to IB	Percentage of total JSA off-flow	JSA off-flow to IB	Percentage of total JSA off-flow
May 1998	12,235	4.2	9,375	4.0
May 1999	15,410	4.8	11,580	4.5
May 2000	9,805	4.1	7,305	3.9
May 2001	9,345	4.4	6,970	4.2
May 2002	9,615	4.2	7,220	4.0
May 2003	7,870	4.0	5,975	3.8
May 2004	9,465	3.8	7,240	3.6
May 2005	7,560	4.0	5,725	3.7

	Wales		Birkenhead parliamentary constituency	
	JSA off-flow to IB	Percentage of total JSA off-flow	JSA off-flow to IB	Percentage of total JSA off-flow
May 1998	870	5.4	30	4.6
May 1999	1,070	5.8	45	5.7
May 2000	675	5.0	25	4.1
May 2001	655	5.3	30	5.7
May 2002	625	5.1	35	6.0
May 2003	530	5.0	15	3.3
May 2004	600	4.5	25	4.4
May 2005	525	5.2	20	3.8

Notes:

1. Figures have been rounded to the nearest 5.
2. Percentages have been given to 1 decimal place.
3. Figures do not include a small number of clerical cases.
4. There a small number of claimants who flow off JSA with an unknown destination recorded—it is possible that some of these claimants may have also flowed from JSA to IB. Therefore the above figures may be a slight undercount.

Count of unemployment-related benefits, jobcentre plus computer systems.

Local Housing Allowance

Mr. Laws: To ask the Secretary of State for Work and Pensions what estimate he has made of levels of fraud and error in connection with payment of housing benefit within the local housing allowance pilot areas. [922]

Mr. Plaskitt: The information is not available as requested as data is not available below national level. Our latest estimates of fraud and error in housing benefit are published in "Fraud and Error in Housing Benefit April 2002 to March 2004", which is available in the Library.

We are continuing to evaluate the local housing allowance within the pathfinder areas. Qualitative data will be gathered for local authority staff as part of the evaluation programme. However, this will not include data on fraud and error.

Medical Examination Centres

Judy Mallaber: To ask the Secretary of State for Work and Pensions (1) what assessment he has made of the impact on benefit claimants in *(a)* Amber Valley and *(b)* Derbyshire of the decision to close the medical examination centres in Derbyshire; and if he will make a statement; [4818]

(2) what requirements were placed by his Department on Atos Origin for determining the provision of medical examination centres for claimants of *(a)* incapacity benefit and *(b)* industrial injuries benefit; and if he will make a statement; [4819]

(3) how many Amber Valley residents claiming *(a)* incapacity benefit and *(b)* industrial injuries benefit travelled to medical examination centres in (i) Derby, (ii) Chesterfield, (iii) Mansfield and (iv) Nottingham in each of the last five years. [4820]

Mrs. McGuire: As part of detailed discussion following the award of a new medical services contract the Department and Atos Origin are discussing a range of proposals including an estates strategy that will both improve service standards and secure investment in other areas. Further information will be made available once these discussions have been concluded.

Pension Credit

Mr. Ian Austin: To ask the Secretary of State for Work and Pensions how many pensioners in *(a)* Dudley, North and *(b)* Dudley as a whole are in receipt of the pension credit; how much they receive on average; how many people he estimates are eligible; and what steps are (i) in train and (ii) planned to encourage those who are not claiming pension credit to do so. [6957]

Mr. Timms: Information on the number of people in receipt of pension credit in Dudley, North and the local authority area of Dudley, and average awards, is set out in the following table. Information on the number of people who are eligible for pension credit is not available in respect of individual constituencies or local authority areas.

The focus of the pension credit take-up campaign now concentrates on those people likely to be entitled but who have not responded to approaches so far. New marketing campaigns have been developed, which maximise the use of available data and which are carefully targeted on the regions and on demographic groups under-represented in relation to the volume of pension credit applications received. We are continually reviewing how the most eligible pensioners are responding to us and assessing alternative ways of contacting them.

Pension credit recipients, Dudley, March 2005

	Households	Individuals	Average award (£)
Dudley, North constituency	6,030	7,635	39.17
Dudley local authority area	18,085	22,955	38.56

Notes:

1. Figures are rounded to the nearest five.
2. Figures relate to the end of the month.

3. Individuals comprise claimants and partners and may contain a small number of partners aged under 60.
4. Parliamentary constituencies and local authority areas are assigned by matching postcodes against the relevant ONS directory.
5. The figures for March 2005 are the latest available.
Source:
Information Directorate, Department for Work and Pensions, 100 per cent. sample

Pension Protection Fund

Mr. Drew: To ask the Secretary of State for Work and Pensions how employers will be informed of their expected contribution levels to the Pension Protection Fund; and if he will list the expected 10 largest contributors to the Fund. [6828]

Mr. Timms: Employers will receive an invoice for their Pension Protection Fund initial levy via The Pensions Regulator.

It is not possible to disclose the details of the 10 largest contributors to the Pension Protection Fund. This is "restricted information", held by the Pensions Regulator, where onward disclosure is only permitted to specified bodies for specific purposes in accordance with the provisions of the Pensions Act 2004.

Pensions

Mr. Laws: To ask the Secretary of State for Work and Pensions pursuant to the answer of 14 June 2005, *Official Report*, column 264W, on pensions, if he will list those representatives of the pensions industry with whom the issue of contracting-out was discussed. [7572]

Mr. Timms: My colleagues and I have recently had meetings with various representatives of the pensions industry. These have included representatives from the Association of British Insurers, the Pensions Commission, Watson Wyatt and the National Association of Pension Funds. Contracting out was amongst the issues discussed.

Mike Penning: To ask the Secretary of State for Work and Pensions if he will make a statement on planned changes *(a)* to increase the minimum financial holdings contained within pension reserves and *(b)* to prohibit inappropriate use of pension funds. [7637]

Mr. Timms: The new scheme funding requirements set out in the Pensions Act 2004, and due to come into effect later this year, will require the trustees of private sector defined benefit schemes to adopt a funding strategy appropriate to the circumstances of their scheme. This strategy must provide for the scheme's pension commitments to be funded on a sufficiently prudent basis as required by the European Directive on the Activities and Supervision of Institutions for Occupational Retirement Provision.

New regulations governing occupational scheme investments, due to come into force later this year, will incorporate the prudent person principle explicitly into pensions legislation, in particular by requiring trustees to exercise their investment powers to ensure the security, quality, liquidity and profitability of the portfolio as a whole as required by the European Directive mentioned above. These provisions build on the existing fiduciary duty of pension scheme trustees to act in the best interest of their members, and statutory safeguards which require trustees to have regard to the suitability of proposed investments and the diversification of scheme assets, and the maintenance of a written statement of investment principles.

Since April this year, the Pensions Regulator has been able to apply to the High Court for an injunction (in Scotland to the Court of Session for an interdict), which the court may grant where it is satisfied that there is a reasonable likelihood that a person will do an act which constitutes a misuse or misappropriation of assets of an occupational or personal pension scheme; or a person has done any such act and that there is a reasonable likelihood that he will continue or repeat the act or do a similar act.

Mike Penning: To ask the Secretary of State for Work and Pensions (1) if he will make a statement on the applicability of the Pensions Protection Fund to Dexion pensions holders; [7638]

(2) if he will make a statement on planned state support for the Dexion pension holders; [7642]

(3) if he will make a statement on the timeframe for action by his Department on support for Dexion pensions holders. [7645]

Mr. Timms: The Pension Protection Fund (PPF) came into force on 6 April 2005. Members of pension schemes that began winding up before that date are not eligible for compensation form the PPF, but may be eligible for support from the Financial Assistance Scheme (FAS). The Dexion Group Pension and Assurance Scheme was included in the indicative list, published on 22 February, of schemes which may be eligible for the FAS. Final decisions on whether schemes are eligible for FAS will be made as soon as possible after the FAS regulations have come into force. Draft regulations were laid on 22 June and are awaiting parliamentary approval.

Mike Penning: To ask the Secretary of State for Work and Pensions if he will make a statement on plans to modify the cap on support for individuals in collapsed pensions schemes. [7639]

Mr. Timms: The level of the Pension Protection Fund compensation cap is prescribed in regulations and will be increased annually in line with earnings. The level of the proposed cap on Financial Assistance Scheme payments is set out in the draft regulations which were laid on 22 June.

Mike Penning: To ask the Secretary of State for Work and Pensions if he will make a statement on the taxable status of compensatory pensions for Dexion pension holders. [7640]

Mr. Timms: Any payment received by members of the Dexion pension scheme from the Financial Assistance Scheme will be treated for tax purposes in broadly the same way as payments from an occupational pension scheme.

Mike Penning: To ask the Secretary of State for Work and Pensions (1) how many company pensions have failed in each year since 1997; how many pension holders were affected; what the nominal pension reserve was in each case; whether withdrawals had been made

from each pension fund at the time of the collapse of the business; how much and what proportion of the pension fund remained in each such case; and if he will make a statement; [7641]

(2) how many pension funds have collapsed since 1997. [7643]

Mr. Timms: The information is not available in the format requested.

Such information as is available from the register of pension schemes maintained by the Pensions Regulator indicates that around 720 private sector defined benefit schemes (with around 140,000 members in all) started to wind up between January 2000 and October 2004. These figures do not include schemes which completed wind-up during that period. The figures do not distinguish between schemes connected to solvent and insolvent employers. Information in the register on schemes which started to wind up before January 2000 does not show whether wind-up started before or after 1997. The register does not hold the information requested on scheme funding.

In addition, data collected to inform development of the Financial Assistance Scheme, and published on 22 February, indicates that at least 380 defined benefit schemes with an insolvent employer started to wind up between January 1997 and December 2004. Only very limited data was collected on scheme funding.

Mike Penning: To ask the Secretary of State for Work and Pensions how many former Dexion *(a)* workers and *(b)* retired workers he estimates are principally reliant on state pensions. [7721]

Mr. Timms: The information requested is not available.

Mike Penning: To ask the Secretary of State for Work and Pensions if he will make a statement on the backdating of compensatory Government payments for Dexion pension holders. [7722]

Mr. Timms: The draft regulations for the Financial Assistance Scheme were laid on 22 June 2005 and are awaiting parliamentary approval. These contain a provision for payments to be backdated to the date we announced the Financial Assistance Scheme (14 May 2004) or the day on which the qualifying member reached the age of 65, whichever is the later. Arrears payments are likely to be in the form of a lump sum.

Vera Baird: To ask the Secretary of State for Work and Pensions what level of basic state pension a person must have before a full state second pension added onto it will bring them outside eligibility for current pension credit. [5648]

Mr. Timms: "A person who is entitled to the maximum amount of Additional State Pension (SERPS and State Second Pension), currently around £140 per week, would also be entitled to a basic state pension of more than half the current rate thus producing an income of at least £180 per week. A single person with income at this level would not normally be eligible for pension credit. However, people with severe disability, caring responsibility and housing costs could still be eligible."

Return to Work

Mr. McFadden: To ask the Secretary of State for Work and Pensions what steps he is taking to help people with adverse health conditions and disabilities to return to work. [5043]

Margaret Hodge *[holding answer 20 June 2005]:* We are reforming the benefit system to encourage and promote work for those who are able to work and security for those for whom work is not an option. For people with adverse health conditions and disabilities, work is a real option if they are offered appropriate support in a timely way. Evidence shows the longer people remain on benefit the less likely they are to make the transition back to work.

Early evidence from the innovative Pathways to Work approach is very positive. Around 20 per cent. of all those attending work-focused interviews (WFIs) take up one of the forms of back-to-work help available in Pathways areas. This is nearly six times higher than the level accessing back to work help elsewhere. It compares to around 4 per cent. in Jobcentre Plus pathfinder districts and around 2 per cent. nationally. By the end of March 2005, around 13,400 people have been helped back to work in the Pathways areas.

Skills Shortages

Mr. Stephen O'Brien: To ask the Secretary of State for Work and Pensions what estimate he has made of the number of job vacancies that remained unfilled because of skills shortages in each year between 2001–02 and 2003–04. [7391]

Phil Hope: I have been asked to reply.

No estimate is made of the total number of skill shortage vacancies over the period of a whole year but estimates are made of the level of such vacancies at a particular point in a year. My Department estimated that there were 159,000 vacancies that remained unfilled because of skills shortages at the time of the survey in 2001 and 135,000 in 2003. No estimate was made in 2002.

HEALTH

Acrylamide (Foodstuffs)

Norman Baker: To ask the Secretary of State for Health if she will make a statement on the public health implications arising from the presence of acrylamide in foodstuffs, with particular reference to potato crisps. [7043]

Caroline Flint *[holding answer 27 June 2005]:* Acrylamide occurs naturally in a wide range of home-cooked and processed food including potato crisps. It has been found to cause cancer in laboratory animals. Research into the effects on humans is on-going. Whilst encouraging initiatives to reduce acrylamide levels in food, the Food Standards Agency continues to recommend that people should eat a balanced healthy diet, including plenty of fruit and vegetables.

Adverse Incidents

Steve Webb: To ask the Secretary of State for Health how many *(a)* fatal and *(b)* non-fatal adverse incidents occurred in hospitals in the NHS in each year since 1997, broken down by month. [5941]

Jane Kennedy: The Department does not collect this information centrally.

However, the Department is concerned about national health service patients affected by adverse events and that is why it established the National Patient Safety Agency in July 2001 and asked it to set up a national reporting and learning system for patient safety incidents. This system is now in place across the NHS and will in time enable us to understand the nature and extent of patient safety incidents and take further action to prevent or minimise their reoccurrence.

Alzheimer's Disease

Mr. Lancaster: To ask the Secretary of State for Health what assessment she has made of the availability of drugs for patients with moderately severe to severe Alzheimer's disease in Milton Keynes. [6974]

Caroline Flint: The National Institute for Health and Clinical Excellence (NICE) is currently reviewing its 2001 appraisal of Alzheimer's drugs. Until NICE completes this review and issues new guidance, the 2001 guidance remains extant and those benefiting from the drugs in question will continue to do so.

NICE is also pursuing an appraisal of non-Alzheimer pharmaceutical treatments. This appraisal has been halted while NICE awaits further information on drug licensing and marketing.

NICE is also producing a comprehensive guideline on the treatment and care of those with dementia. This will take account of the appraisals being done on drug treatments for dementia. A draft of the guideline will be consulted on in 2006.

The Milton Keynes primary care trust (PCT) carries out assessments for the use of Alzheimer's drugs using the NICE guidelines and prescribes according to them. The PCT will consider future practice when the NICE consultation has concluded and recommendations are made.

Lynne Featherstone: To ask the Secretary of State for Health what the expenditure on drugs available on the NHS for Alzheimer's disease was in Hornsey and Wood Green in the latest year for which figures are available; how many Alzheimer's disease patients are being treated by primary care trusts in Hornsey and Wood Green; how much was spent by the NHS on drug treatments for advanced Alzheimer's disease patients in Hornsey and Wood Green in the latest year for which figures are available; and what assessment she has made of the availability of drugs for patients with moderately severe to severe Alzheimer's disease in Hornsey and Wood Green. [6703]

Jane Kennedy: The information requested is not collected centrally.

Ambulance Service

Mr. Drew: To ask the Secretary of State for Health what account was taken of *(a)* the impact on tri-service arrangements, *(b)* rural issues and *(c)* the future of patient transport in the report on the possible reconfiguration of the ambulance trusts for Avon, Gloucestershire and Wiltshire; what (i) patient and (ii) public involvement there were in the preparation of the report; and if she will make a statement. [6812]

Caroline Flint: The review of ambulance services that have taken place across the Avon, Gloucestershire and Wiltshire Strategic Health Authority (SHA) area, is centred around the ambulance service's main role of emergency care and its management structure.

The future of tri-service arrangements will be for the new organisation to decide while ensuring the preservation of good local services as a priority.

The rural nature of large parts of Avon, Gloucestershire and Wiltshire SHA have been a significant factor in the review, however, patient transport is not part of the review criteria.

The steering group overseeing the review has been made up of all key stakeholders, not members of the public as this is a management report. The SHA is undertaking a period of communication with all key stakeholders, including staff and patients, over the summer period. It will take on board the views of people across the Avon, Gloucestershire and Wiltshire SHA area. Changes to management and organisational structure do not require formal consultation as part of Section 11 of the Health and Social Care Act 2001. However, a discussion is planned to take place with national health service staff, the boards of all organisations involved and key stakeholders on the preferred option. A draft discussion document will be presented to the Avon, Gloucestershire and Wiltshire SHA board for approval on 7 July 2005. A special board meeting is planned for 20 October 2005 to consider the results.

Audiology Services

Malcolm Bruce: To ask the Secretary of State for Health what steps she is taking to reduce the number of people waiting *(a)* to be assessed for their first NHS hearing aid and *(b)* to switch from analogue to digital aids. [6463]

Mr. Byrne: Through the modernising hearing aids (MHAS) programme, which was completed in March 2005, the Department has taken several steps to help the national health service increase the capacity of the hearing aid services to reduce waiting lists for assessment and provision of digital hearing aids. These include:

The establishment of the national framework contract public private partnership (PPP). MHAS estimates that by 2006, 52,950 patients will have been fitted with digital hearing aids through PPP.

Development of a new degree to help to address the shortage of audiologists—180 students started the audiology BSc. course in 2004–05.

Setting up pilot sites for "Hearing Direct". These offer follow-up care and advice for selected hearing aid users and reduces the patient journey time. Research suggests it may be suitable for one third of all NHS hearing aid patients.

"Forget Me Not" Report

Mr. Burstow: To ask the Secretary of State for Health what progress has been made against the priorities for action set out in the Audit Commission's Forget Me Not report in 2002. [6401]

Mr. Byrne: The recommendations in the "Forget Me Not" report were principally addressed to local health and social care agencies. It is for these local agencies to decide on their priorities in the light of local circumstances.

Autism

Mr. Laurence Robertson: To ask the Secretary of State for Health what support services are provided for people who suffer from autism; and if she will make a statement. [7741]

Mr. Byrne: It is for local authorities and health service providers to determine how best to provide services to meet the needs of individuals with autism, including those with autistic spectrum disorder.

British Pregnancy Advisory Service

David T.C. Davies: To ask the Secretary of State for Health pursuant to the answer of 14 June 2005, *Official Report*, column 302W on the British Pregnancy Advisory Service; when she expects to complete her consideration of the Chief Medical Officer's report on the BPAS. [6915]

Caroline Flint: As my reply of 14 June stated, it would be inappropriate to comment any further at this stage.

Broomfield Tip (Fire)

Mr. Neil Turner: To ask the Secretary of State for Health what research her Department has undertaken into the effect of benzen particulates and gases emanating from the fire at Broomfield Tip, Standish, on the health of residents in the vicinity. [7289]

Mr. Byrne *[holding answer 27 June 2005]:* This is a matter for the Director of Public Health at the Ashton, Wigan Primary Care Trust and the Health Protection Agency.

Bt 10 Maize

Norman Baker: To ask the Secretary of State for Health what quantities of Bt 10 maize have been imported into the UK; over what period; and what quantities she estimates have been consumed by *(a)* animals and *(b)* humans. [5880]

Caroline Flint: The exact quantity of Bt 10 maize imported into the United Kingdom is not known. It is estimated that up to 0.025 per cent., of the 2001–04 United States of America maize harvests may have contained Bt 10 maize and imports into the EU during this period may have contained Bt 10 maize at this level. The European food industry has stated to the commission that it only uses US maize products that are from protected non-genetically modified sources. The quantities of Bt 10 maize imported to the UK for food use should therefore be nil. Maize in the form of corn gluten feed and brewers' grains is imported from the US for animal feed. However, the amount of Bt 10 maize potentially consumed by animals is not known.

Burns Units (London)

Lynne Featherstone: To ask the Secretary of State for Health how many specialist burns services units there are in the Greater London region. [6698]

Jane Kennedy: Chelsea and Westminster Hospital is the only specialist burns service unit within Greater London.

Cancer (Waiting Times)

Mr. Crabb: To ask the Secretary of State for Health what the mean waiting time in days from the time of diagnosis by consultant to hospital admission for treatment was for *(a)* cancer of the brain, *(b)* cancer of the prostate, *(c)* cancer of the ovary and *(d)* cancer of the liver in (i) 1997–98 and (ii) 2003–04. [4938]

Ms Rosie Winterton: The data are not collected centrally in the format requested.

Cancer Treatment

Helen Jones: To ask the Secretary of State for Health which NHS trusts have contracts with private companies for the examination of cervical cancer smear tests; which companies are involved; and whether any send smear tests outside the UK for screening. [6584]

Ms Rosie Winterton: We do not centrally collect data on the use of independent sector providers of cervical screening services, and we are not aware that any cervical screening slides are sent outside of the United Kingdom to be interpreted. Primary care trusts (PCTs) are responsible for commissioning cervical screening services for their local populations to explicit national quality standards. It is a matter for individual PCTs to decide on who provides their local service, whether in the national health service or the independent sector.

The advisory committee on cervical screening has agreed a set of standards for laboratories reporting cervical screening slides outside of the NHS, including overseas.

Mr. Jim Cunningham: To ask the Secretary of State for Health (1) if she will make a statement on the availability of antibody treatment for cancer in the NHS; [7713]

(2) what research she has evaluated on antibody treatment for cancer. [7714]

Ms Rosie Winterton: There are several monoclonal antibodies that are licensed for the treatment of cancer and can be prescribed to patients on the national health service. These are cetuximab for the treatment of advanced colorectal cancer; trastuzumab for the treatment of advanced breast cancer, alemtuzumab for the treatment of chronic lymphocytic leukaemia and rituximab for the treatment of follicular non-Hodgkin's lymphoma.

The National Institute for Clinical Excellence (NICE) has appraised two of these drugs—trastuzumab for advanced breast cancer and rituximab for the treatment

of follicular non-Hodgkin's lymphoma. These appraisals included an evaluation of the available research evidence. NICE is now in the process of appraising cetuximab for advanced colorectal cancer. This guidance is expected to be published in November 2006.

Care Homes

Mr. Amess: To ask the Secretary of State for Health if she will make a statement on the Office of Fair Trading's report on care homes for older people. [6029]

Mr. Byrne: The Office of Fair Trading published a report on care homes for older people on 18 May 2005. The report made a number of recommendations to the Government, which are currently under consideration.

Care Provision Funding

Tom Levitt: To ask the Secretary of State for Health what contribution to the cost of care provision came from *(a)* equity release and *(b)* other property based loans in (i) absolute and (ii) percentage terms, in the last period for which figures are available; and what plans she has to bring forward proposals to change this proportion. [5953]

Mr. Byrne: This information is not collected centrally.

We made a manifesto commitment to provide the right framework to make staying at home an attractive option for people in need of long-term care for schemes, through schemes such as equity release. We are considering how to take forward this commitment.

Clinical Negligence Claims

David Howarth: To ask the Secretary of State for Health how many clinical negligence claims were made against NHS bodies in each year since 1996. [1353]

Jane Kennedy *[holding answer 6 June 2005]:* Centrally collected data from the NHS Litigation Authority is shown in the following table:

Total number of clinical negligence claims reported to the NHSLA based upon date reported to the NHSLA scheme member, as at 31 March 2005

	Number
1996–97	4,136
1997–98	6,932
1998–99	6,916
1999–2000	7,036
2000–01	6,915
2001–02	7,215
2002–03	6,257
2003–04	4,844

Notes:

1. Clinical negligence scheme for trusts (CNST) claims are those in respect of liabilities occurring on or after 1 April 1995. Existing liability scheme (ELS) claims are those open at 1 April 1996, where the incident pre dates 1 April 1995. Former Regional health authority (RHA) claims are pre-April 1996 and are cases against the former RHAs, fully funded by the NHSLA.
2. The year a claim is notified to the NHSLA has no relevance to the year the incident giving rise to a claim occurred.

Clostridium Difficile

Steve Webb: To ask the Secretary of State for Health when the first statistics will be published from the mandatory surveillance of *(a) Clostridium difficile* infections and *(b)* surgical site infections. [5940]

Jane Kennedy: Data from the mandatory surveillance system for *Clostridium difficile* associated diarrhoea will be available this summer and information for orthopaedic surgical site infections will be published in the autumn. This data is likely to be published annually.

Continuing Care

Sandra Gidley: To ask the Secretary of State for Health (1) what steps she has taken to assess the legality of the guidance given to strategic health authorities concerning the provision of free continuing care since publication of recommendation 15 of the Health Committee Report of 5 April; [7742]

(2) what guidance she has given to social service departments concerning the regulations issued in 2001 that self-funders cannot be required to sell their homes in their own lifetime since the then Minister's evidence on the subject to the Health Select Committee on 17 March; [7743]

(3) what steps she has taken to secure compliance by strategic health authorities with recommendation 17 of the Health Committee Report of 5 April on the assessment of patients with continuing needs before they leave hospital; [7744]

To ask the Secretary of State for Health what action she has taken to secure compliance by strategic health authorities with her Department's guidance recorded in paragraph 151 of the Health Committee report of 5 April concerning assessment for continuing care. [7760]

Mr. Byrne: The Government are considering the Committee's report and we will publish our response before the summer recess.

Dementia

Helen Jones: To ask the Secretary of State for Health what discussions she has had, and with whom, on the recommendations made in the report of the Royal College of Psychiatrists and the Alzheimer's Society on early onset dementia; and if she will make a statement. [5105]

Mr. Byrne: There have been no discussions on this report. I understand the report will be published in its final form in the autumn. We are working with the Royal College of Psychiatrists and the Alzheimer's Society to improve mental health services for older people.

Digital Hearing Aids

Mr. Laurence Robertson: To ask the Secretary of State for Health what the average time patients diagnosed as having hearing problems waited to be fitted with digital hearing aids was in the last year for which figures are available; what the figures were in each region; and if she will make a statement. [7739]

Mr. Byrne: This information is not held centrally.

Drug Rehabilitation (Portsmouth)

Mr. Hancock: To ask the Secretary of State for Health which drug rehabilitation centres are available to residents of Portsmouth within a 10-mile radius of the city centre. [6588]

Caroline Flint: I am advised by Portsmouth City Primary Care Trust that the rehabilitation centres are:

ANA Portsmouth

Two Saints Foster Road

Phoenix Alpha House, Droxford.

ECT Treatment

Mr. Burstow: To ask the Secretary of State for Health how many people in England have undergone electroconvulsive therapy in each of the past five years; and how many were *(a)* 50 years or over and *(b)* 65 years or over. [6395]

Ms Rosie Winterton: The information is not available in the requested format. The latest information available on electro-convulsive therapy (ECT) is that contained in the Department's publication "Statistical Bulletin Electro Convulsive Therapy: Survey covering the period from January 2002 to March 2002, England". This was a follow-up to an earlier survey of the period January to March 1999. Both surveys were undertaken to provide data on ECT that are not currently available elsewhere.

The 2002 survey confirmed the continuing downward trend in the number of administrations of ECT. It collected information from national health service and independent sector care settings, including nursing homes, on the total number of administrations of ECT in NHS and independent sector care settings including data on sex, age, ethnicity, legal status and method of consent.

It found that in the period January to March 2002:

2,300 patients received ECT treatment compared to 2,800 in 1999; there were 700 male patients receiving treatment, compared with 1,600 female patients; there were 12,800 administrations of ECT compared to 16,500 in January to March 1999; of the 2,272 patients in England who underwent ECT in 2002, 1,709 were aged 45 and over, and 1,053 were aged 65 and over. This compares to figures of 2,079 and 1,176, respectively, of the total of 2,835 in the 1999 survey.

Copies of the 2002 survey and the earlier 1999 survey are available in the Library.

Edgware Hospital

Mr. Dismore: To ask the Secretary of State for Health if she will make a statement on the progress over the proposed MRI scanner for Edgware hospital. [5831]

Jane Kennedy: A site for an magnetic resonance imaging scanner has been identified at Edgware hospital, but further work is necessary before final decisions can be taken.

Epidermolysis Bullosa

Lynne Featherstone: To ask the Secretary of State for Health what steps she has taken to improve *(a)* awareness of and *(b)* training on epidermolysis bullosa for health professionals; and if she will make a statement. [6702]

Mr. Byrne: The Department is not responsible for setting curricula for health professional training. However, we do share a commitment with statutory and professional bodies that all health professionals are trained, so that they have the skills and knowledge to deliver a high quality health service to all groups of the population with whom they deal, whatever their condition.

Post-registration training needs for national health service staff are determined against local NHS priorities, through appraisal processes and training needs analyses informed by local delivery plans and the needs of the service.

Food Procurement

Mr. Paice: To ask the Secretary of State for Health how much was spent by her Department on public procurement of food in the most recent year for which figures are available; and what proportion of that expenditure was covered under Crown immunity on food safety matters. [5786]

Jane Kennedy: The Department has a catering contract which is maintained at nil subsidy and covers four headquarters buildings. The contractor is responsible for ensuring that all his staff are fully trained in food safety procedures. As the contractor is not a Crown body, it is are not covered by Crown immunity.

General Practitioners

Steve Webb: To ask the Secretary of State for Health pursuant to her answer of 8 June 2005, *Official Report*, column 587W, on general practitioner appointments, how many patients were included in the monitoring data; and what definition of patients is used for the purposes of the monitoring exercise. [5904]

Mr. Byrne: The Department holds data on the appointment arrangements which each general practice offers to its patients. This data is collected monthly by primary care trusts and the results are converted into numbers of patients using each practiced registered list size. For April, the total number of patients was 52,786,540.

Steve Webb: To ask the Secretary of State for Health what percentage of patients have not had the opportunity to book advance GP appointments, in each month since the monitoring process began. [6563]

Mr. Byrne: The data requested is shown in the table.

Month	*Patients who cannot book more than two days in advance (percentage)*
November 2004	12.4
December 2004	7.6
January 2005	6.5

Month	Patients who cannot book more than two days in advance (percentage)
February 2005	5.4
March 2005	3.6
April 2005	1.5
May 2005	1.3

GM Food

Norman Baker: To ask the Secretary of State for Health what recent assessment she has made of the implications for human health of the consumption of GM foods containing antibiotic resistance marker genes. [5884]

Caroline Flint: In the European Union, all genetically modified (GM) foods are subject to a mandatory pre-market safety assessment before they can be permitted to enter the food chain. This assessment is the responsibility of the European Food Safety Authority (EFSA) and is based on a wide body of scientific evidence submitted in support of each application, including data on the presence of antibiotic resistance marker genes (ARMs). The significance of the presence of these genes is assessed on a case by case basis.

In April 2004, the EFSA scientific panel on genetically modified organisms published an opinion on the use of ARMs in GM plants. The UK advisory committee on novel foods and processes (ACNFP) considered this opinion at its meeting in May 2004. The Committee agreed with EFSA's conclusion that the safety of ARMS should take into account both the prevalence of resistance to the antibiotic among bacteria, in the intestine or in the environment, and the extent of use of the antibiotic and its importance for clinical human or animal therapy.

Mr. Drew: To ask the Secretary of State for Health what account has been taken of Food Standards Agency research in formulating the Government's policy on genetically modified food; and if she will make a statement. [6811]

Caroline Flint: The Food Standards Agency (FSA) were set up as a non-ministerial Government Department in April 2000 and has the objective of protecting public health from risks associated with consumption of food, and otherwise protecting the interests of consumers in relation to food. Government policy on genetically modified food is formulated through discussion among all the relevant Government Departments, including the FSA.

Health Authority for London

Mr. Dismore: To ask the Secretary of State for Health what plans she has to create a Health Authority for London; and if she will make a statement. [5829]

Jane Kennedy: There are currently five strategic health authorities (SHAs) in London. As stated in "Creating a Patient-Led NHS" (March 2005), the Department expects a reduction in the number of SHAs as more national health service trusts move to NHS foundation trust status. However, no decisions about the future of London SHAs, including whether there should be a single health authority, have been taken.

Health Care Demand (London)

Mr. Dismore: To ask the Secretary of State for Health what assessment she has made of *(a)* the current and *(b)* the expected growth in demand for maternity services in London; and if she will make a statement. [7067]

Jane Kennedy: In line with the Department's "Shifting the Balance of Power" policy, any assessment on current and expected demand for local maternity services would be for strategic health authorities and primary care trusts to consider.

Health Development Agency

Mr. Hands: To ask the Secretary of State for Health what budget was allocated to the Health Development Agency in each year since its inception. [5687]

Jane Kennedy: The information requested is shown in the following table.

Health Development Agency Allocations[1]: information taken from HDA published accounts

£ thousand

	Total allocations from Government sources
2000–01	11,288
2001–02	12,261
2002–03	11,015
2003–04	11,992
2004–05[2]	12,943

[1] The Health Development Agency was abolished on 31 March 2005 and its functions transferred to the National Institute for Health and Clinical Excellence on 1 April 2005.

[2] The final accounts for the HDA's last year of operation have not yet been completed. The figure quoted is from the Department of Health's cash limit allocation letter to the HDA.

Health Finance (Oxfordshire)

Tony Baldry: To ask the Secretary of State for Health (1) how much and what percentage of the Oxfordshire Mental Healthcare Trust budget she expects to come from *(a)* primary care trusts and *(b)* other sources; and from which other sources she expects such funds to come; [6799]

(2) how much and what percentage of the Oxford Radcliffe NHS Trust budget for 2005–06 she expects to come from *(a)* primary care trusts, *(b)* reserve funding, *(c)* funding on a consequence of the John Radcliffe being a teaching hospital and *(d)* other sources; and from which other sources she expects such funding to come. [6800]

Caroline Flint: The table shows data for 2003–04, which is the latest year for which figures are available.

The Department has no information relating to reserve funding or to funding on a consequence of the John Radcliffe being a teaching hospital.

Income of the Oxfordshire Mental Healthcare National Health Service Trust and the Oxford Radcliffe NHS Trust, 2003–04

£000

	Oxfordshire Mental Healthcare NHS Trust	Oxford Radcliffe NHS Trust
Income from activities—income received from:		
Strategic health authorities	0	1,841
NHS trusts	307	31
Primary care trusts	55,184	318,297
Local authorities	47	0
Non NHS: private patients	47	12,140
Non-NHS: overseas patients (non-reciprocal)	0	102
Road Traffic Act	3	1,165
Non NHS: other	0	2
Total income from activities	55,588	333,578
Other operating income—income received from:		
Education, training and research	6,400	40,514
Charitable and other contributions to expenditure	0	2,449
Transfers from the donated asset reserve in respect of depreciation, impairment and disposal of donated assets	22	1,938
Other income, for example, charges to staff, income from the Department for non-patient care services	19,975	45,462
Total other operating income	26,397	90,363
Total income	81,985	423,941

Source:

Audited summarisation schedules of the Oxfordshire Mental Healthcare NHS Trust and the Oxford Radcliffe NHS Trust, 2003–04.

Tony Baldry: To ask the Secretary of State for Health what the formula is on which funding is allocated to the *(a)* Cherwell Vale Primary Care Trust, *(b)* North East Oxfordshire Primary Care Trust and *(c)* Oxford City Primary Care Trust. [6801]

Caroline Flint: A weighted capitation formula is used to determine each primary care trust's (PCTs) target share of available resources, to enable them to commission similar levels of health services for populations in similar need.

The components of the formula are used to weight each PCTs "crude" population according to their relative need (age and additional need) for healthcare and the unavoidable geographical differences in the cost of providing healthcare (the market forces factor).

Tony Baldry: To ask the Secretary of State for Health by how much she expects *(a)* Oxford Radcliffe NHS Trust, *(b)* Oxfordshire Mental Healthcare NHS Trust and *(c)* primary care trusts in Oxfordshire to overspend in the 2005–06 financial year. [6803]

Caroline Flint: The financial plans for 2005–06 have not yet been finalised, but national health service organisations are expected to plan to live within their revenue resource, capital resource and cash limits each and every year.

Hepatitis C

Mr. Ellwood: To ask the Secretary of State for Health how many people have been diagnosed with hepatitis C in England in each of the last seven years. [7276]

Caroline Flint: The information requested is available on the Health Protection Agency's website at: www.hpa.org.uk/infections/topics_az/hepatitis_c/data.htm

Mr. Ellwood: To ask the Secretary of State for Health how many fibre scan machines used to diagnose hepatitis C there are in England. [7277]

Caroline Flint: The information requested is not held centrally. FibroScan(r) is used to measure the degree of liver fibrosis (scarring) from any cause. It is not used to diagnose hepatitis C.

Mr. Laurence Robertson: To ask the Secretary of State for Health what progress has been made in the establishment of managed clinical networks to provide accessible specialist assessment and treatment for people with hepatitis C infection since the publication of the National Hepatitis C Strategy for England. [6139]

Caroline Flint: In line with "Shifting the Balance of Power", decisions about networks and their funding are for local determination. We understand that managed clinical networks have so far either been established or are being considered in London, South West peninsula, East Anglia, West Midlands, Trent, Liverpool and North East England.

Mr. Laurence Robertson: To ask the Secretary of State for Health what role she plans for screening in the process of controlling the spread and progression of hepatitis C infections. [6140]

Caroline Flint: Testing of those at current or past risk of hepatitis C infection by the national health service and other key stakeholders is one of the key areas for action set out in the Department's "Hepatitis C Action Plan for England", which is available in the Library and on the Department's website at www.dh.gov.uk/assetRoot/04/08/47/13/04084713.pdf.

Mr. Laurence Robertson: To ask the Secretary of State for Health what plans she has to improve data collection relating to the spread of hepatitis C in England. [6141]

Caroline Flint: Actions to improve the epidemiological surveillance of hepatitis C are set out in the Department's "Hepatitis C Action Plan for England", which is available in the Library and on the Department's website at www.dh.gov.uk/assetRoot/04/08/47/13/04084713.pdf.

Mr. Laurence Robertson: To ask the Secretary of State for Health what assessment she has made of the level of monitoring of disease progression of hepatitis C among sufferers with mild liver disease. [6142]

Caroline Flint: The Department has not made such an assessment. The monitoring of individual patients with hepatitis C who have mild disease is a matter for clinical judgement.

In 2001, The Royal College of Physicians of London and the British Society of Gastroenterology published "Clinical guidelines on the management of hepatitis C". This is available on the Gut website at http://gut.bmjjournals.com/cgi/content/full/49/suppl_1/I1

Hospital Beds

Mr. Lansley: To ask the Secretary of State for Health whether it is her policy to reduce bed occupancy levels in NHS trusts to 82 per cent. [2278]

Mr. Byrne: The Department does not set targets for bed occupancy for national health service trusts. Appropriate occupancy levels, which vary depending on the range and type of services they provide, and the way in which the admission and discharge of patients is managed, are for the NHS to determine locally.

Hospital Cleaning

Lynne Featherstone: To ask the Secretary of State for Health (1) how many cleaners in hospitals in England are employed by *(a)* the NHS and *(b)* private contractors providing services to the NHS; and if she will make a statement; [6736]

(2) how many cleaners are employed at each hospital in England; and if she will make a statement. [6737]

Jane Kennedy: National health service organisations make decisions locally on the number and supplier, either NHS-employed or contracted out, of cleaners for their estate, consistent with their requirements.

The latest headcount figure for the number of staff who undertake cleaning in the NHS is 55,000 for 2003–04. This figure excludes managers, administrative and supervisory staff who do not physically carry out cleaning functions as a main part of their work. In collecting this data from the NHS, no distinction is made between NHS employees and contracted out staff.

Other staff groups may also carry out cleaning in addition to their main role; these staff are not included. For instance, in some trusts nurses may be responsible for cleaning patient equipment and for dealing with spillages out of hours.

Information on the breakdown of this figure, by individual NHS hospital trust, has been placed in the Library.

Hospitals

Steve Webb: To ask the Secretary of State for Health if she will make a statement on proposals *(a)* to reduce bed numbers and *(b)* to change service provision at the West Herts Hospital Trust's Hemel Hempstead and Watford hospitals. [6570]

Ms Rosie Winterton: In line with our policy of "Shifting the Balance of Power", the configuration of local services is a matter for the local national health service, working in partnership with its local community.

The reconfiguration of services at West Hertfordshire Hospital Trust is part of the wider reconfiguration of services in both Bedfordshire and Hertfordshire, known as "Investing in Your Health". The strategic outline case for this major reconfiguration of services was approved in July 2004 by the then Secretary of State for Health.

John Cummings: To ask the Secretary of State for Health how many nurses employed in *(a)* Sunderland Royal Hospital, *(b)* Hartlepool University Hospital and *(c)* Durham University Hospital were recruited from outside the UK. [6880]

Mr. Byrne: The Department does not collect this information centrally. While information is collected on the country of qualification of nurses, this does not equate to their location when recruited to work in the national health service.

John Cummings: To ask the Secretary of State for Health how many palliative care beds there have been in *(a)* Sunderland Royal Hospital, *(b)* Hartlepool University Hospital and *(c)* Durham University Hospital in each year since 1997. [6883]

Mr. Byrne: The table shows the numbers of beds and those specifically identified as palliative beds for the trusts concerned. It should be noted that beds may be used for palliative care without being specifically designated as such.

Average daily number of available beds, NHS organisations in England, 2003–04

	1997–98		*1998–99*

Intensive Care/High Dependency (Costs)

Mr. Burrowes: To ask the Secretary of State for Health what the cost of *(a)* intensive care and *(b)* high dependency care in Enfield was in the most recent year for which figures are available; and what percentage this represented of the overall budget for NHS hospital beds in Enfield in that year. [7615]

Mr. Byrne: The national average cost of an occupied bed day in a discrete critical care unit is collected in the annual national health service reference costs exercise, directly from NHS providers. There are two hospitals in Enfield; Chase Farm hospital, part of Barnet and Chase Farm hospitals NHS trust and North Middlesex university hospitals NHS trust.

Data provided by these organisations for the reference costs 2004 collection, with regard to discrete critical care services, is shown in table 1.

Table 1: costs per occupied bed day in each type of discrete unit

	Barnet and Chase Farm NHS trust		North Middlesex university hospitals NHS trust	
Unit type	*Cost per occupied bed day (£)*	*Number of occupied bed days*	*Cost per occupied bed day (£)*	*Number of occupied bed days*
Intensive therapy unit/intensive care unit	1,208	4,744	1,235	2,792
Cardiac intensive care unit	478	5,309	n/a	n/a
High dependency unit	n/a	n/a	517	1,354
Neonatal intensive care unit—level 1	750	1,672	938	449
Neonatal intensive care unit—level 2	n/a	n/a	420	5,073

Table 2 shows the total cost of critical care services and that cost as a percentage of the overall expenditure for each of the NHS providers located in Enfield. It also shows details of the calculated total picture for Enfield.

Table 2: total cost of critical care services

	Total costs of discrete critical care services (£ thousand)	*Percentage of overall expenditure*
Barnet and Chase Farm NHS trust	9,526	4.6
North Middlesex university hospitals NHS trust	6,701	6.0
Enfield calculated total	16,227	5.1

Jarvis plc (Private Finance Initiative)

Steve Webb: To ask the Secretary of State for Health if she will list the private finance initiative contracts that exist between NHS organisations and Jarvis plc. [5939]

Mr. Byrne: In January 2005 Jarvis's shareholding in national health service private finance initiative (PFI) projects was ended when the infrastructure investment group secondary market infrastructure fund bought out its equity interests in two project companies which hold PFI contracts with NHS bodies—the Whittington hospitals NHS trust and Birmingham hospitals NHS trust. Jarvis subsidiary companies continue to provide construction and long-term facilities management (FM) services at these schemes, under a subcontract with the project companies.

Jarvis is also a subcontractor of a charitable trust which has entered into a PFI contract with Newbury and Community primary care trust. Jarvis group companies acted as the construction contractor and are now providing FM services.

Leukaemia

Mr. Walker: To ask the Secretary of State for Health if she will meet the charity Children with Leukaemia to discuss the implications of the Draper report; and if she will make a statement. [6190]

Caroline Flint: There are currently no plans to meet the charity Children with Leukaemia. The recent publication in the British Medical Journal by Dr. Draper and colleagues found a statistically increased incidence of leukaemia for children whose home address at birth was near power lines compared with those further away. The work was funded by the Department and has significantly added to the body of knowledge built up over the last few years regarding this very important subject. The work will continue with an investigation of the electromagnetic field (EMF) exposures at the addresses studied.

A number of population studies in the past have linked magnetic field exposure with a raised incidence of childhood leukaemia. This has led to the International Agency for Cancer Research to classify extremely low frequency fields or ELF, such as those associated with power lines and domestic wiring as a "possible carcinogen". The World Health Organisation and indeed the Health Protection Agency have recommended additional research and the need for further precautionary measures to be considered.

The stakeholder advisory group on electromagnetic ELF fields (SAGE) set up last year has already enabled Government officials to engage in detailed discussions with industry, regulators, professional bodies and interest groups about how to respond to this complex issue. The intention of the process is to offer carefully considered recommendations in the interests of society as a whole, which can be found on R.K. Partnership's website at: www.rkpartnership.co.uk/sage

Hair Dyes (Cancer Risk)

Keith Vaz: To ask the Secretary of State for Health if she will commission research into possible links between the use of hair dye and lymphoma. [6430]

Caroline Flint: There has been some research which suggested a weak link between occupational use of hair dyes and increased risk of cancer, although overall the epidemiological literature is unclear whether an association exists between use of hair dyes and lymphoma.

The European Union initiated a review of hair dyes a few years ago. Advice on the standards of testing and research to be undertaken by industry in order to support continued use of hair dyes was provided by the EU's Scientific Committee on Cosmetic Products and Non-Food products intended for consumers (SCCNFP). The SCCNFP has subsequently been replaced by the Scientific Committee on Cosmetic Products (SCCP). The SCCP is continuing the review of hair dyes and its agendas, minutes and opinions are available at http://europa.eu.int/comm/health/ph risk/committees/04 sccp/04 SCCP en.htm.

Mental Health

Tim Loughton: To ask the Secretary of State for Health how many children have been treated by child and adolescent mental health services in each of the last eight years. [4646]

Mr. Byrne: Since 2002, some data about the overall child and adolescent mental health service (CAMHS) case load in England has been collected by the annual CAMHS mapping exercise. This includes a snapshot of the total CAMHS case load in England in a four-week

period. The case load is defined as the number of active cases that CAMHS teams worked with during the four-week period. The table shows a headcount of children and young people who have received support, treatment and care from specialist CAMHS professionals.

Finished consultant episodes under mental illness specialities in national health service hospitals by age at end of episode: Children and adolescents, 1996–97 to 2003–04[1]

Data year	*Aged 18 and under*	*All episodes*
2003–04[1]	5,780	187,540
2002–03[1]	5,170	197,070
2001–02	5,400	206,910
2000–01	5,140	213,840
1999–2000	5,120	224,300
1998–99	5,200	228,170
1997–98	5,770	236,000
1996–97	6,180	237,370

[1] Data for the years 2002–03 and 2003–04 have not yet been adjusted for shortfalls in data and unknown/invalid clinical data, ie the data are ungrossed.

Notes:

1. Disclosure rules apply due to the sensitive nature of the data; therefore, figures have been rounded to the nearest 10.
2. In the four-week period in 2002 a total of 80,602 children and young people were seen and this increased to 86,521 in 2003. The 2004 CAMHS mapping will be published shortly.

Source:

Hospital Episode Statistics (HES), NHS Health and Social Care Information Centre.

Tim Loughton: To ask the Secretary of State for Health what plans she has to reduce violent and threatening behaviour within mental health wards. [5995]

Jane Kennedy: At national level a head of mental health and learning disabilities has been appointed by the NHS Security Management Service (NHS SMS) to lead on a specific programme of work, aimed at providing safe, secure and therapeutic environments in mental health and learning disability settings. The post holder has extensive clinical experience in these environments and was formerly a professional advisor to the Nursing and Midwifery Council on violence against staff. The head is responsible for the development of professionally trained and accredited local security management specialists for mental health and learning disability settings, which will be fully implemented in these areas by summer 2006.

The local security management specialists, supported by the NHS SMS, will ensure that each mental health and learning disability trust has access to professional and specialist skills to tackle issues such as violence in these settings. This role includes developing preventative measures as well as managing violent incidents when they occur.

The NHS SMS has also developed a training syllabus on non-physical intervention techniques for those working in mental health and learning disability settings. This syllabus will be rolled out in autumn 2005 and will complement the National Institute for Mental Health in England's (NIMHE) work on physical interventions.

Guidance developed by NIMHE, "Developing Positive Practice to Support the Safe and Therapeutic Management of Aggression and Violence in Mental Health In-patient Settings" (February 2004) and by the National Institute for Health and Clinical Excellence "The Short-term Management of Disturbed/Violent Behaviour in In-patient Psychiatric Settings and Emergency Departments" (February 2005) has already been made available to national health service bodies. A key role for the LSMS will be to ensure that this guidance is implemented where appropriate.

Tim Loughton: To ask the Secretary of State for Health what guidance is given to primary care trusts on the provision of *(a)* alternative and *(b)* cognitive behavioural therapies in mental health wards. [5997]

Ms Rosie Winterton: Psychological therapies, which include cognitive behavioural therapy, were included alongside drug treatments in the national service framework for mental heath (1999) to reflect their importance alongside drug treatments, and their popularity with some service users. In 2001, an evidence based guideline, "Treatment choice in psychological therapies and counselling" was published in 2001 to help general practitioners and other professionals know more about the most effective treatments for particular conditions. A booklet for service users and carers, "Choosing talking treatments?", was also published in 2001 to help them know the questions to ask when seeking a talking treatment. The Department also published a best practice guide entitled "Organising and delivering psychological therapies" (2004) in order to help local services deliver acceptable, accessible, equitable, cost effective and safe psychological therapy services.

As stated in the national director for mental health's recent report on the implementation of the national service framework for mental health, "Five years on", published in 2004, the Department is planning to commission a review of evidence of effectiveness of complementary healthcare for mental health problems. This review will inform the development of a national framework for supporting local innovation in mental health services to make them more responsive to individual needs.

Tim Loughton: To ask the Secretary of State for Health what plans she has to increase provision to *(a)* train and *(b)* recruit psychologists for inpatient mental health wards. [6036]

Ms Rosie Winterton: Within the context of implementing the "National mental health workforce strategy" (2004), the Department will continue with its drive to increase the numbers of staff who can deliver psychological therapies which has contributed to an almost 75 per cent. increase in the number clinical psychologists and a 125 per cent. increase in the number of non-medical psychotherapists working in the national health service since 1997.

In addition, as set out in the national director for mental health's report on the implementation of the national service framework for mental health, "Five years on" (2004), a new programme of work in the National Institute for Mental Health in England will explore ways of expanding the availability of talking treatments. These are likely to include improved psychological therapy skills in frontline staff, new staff who are trained in brief interventions of proven effectiveness, self-help technologies and a broader

choice of providers of therapy in the national health service and the independent sector. These initiatives are being supported by the Department's guidance entitled "Organising and Delivering Psychological Therapies" (2004).

Tim Loughton: To ask the Secretary of State for Health what measures are being implemented following the publication of the national service framework for mental health—"Five years on". [6144]

Ms Rosie Winterton: The Department will continue with the implementation of the national service framework for mental health (1999), take forward the recommendations of the Social Exclusion Unit's report on mental health (2004), help challenge discrimination against people with mental health problems through a new anti-stigma programme, eradicate unsuitable mental health wards and work to improve mental health care for ethnic minorities. The Department will put greater emphasis on improving the mental health and well-being of the community as a whole and explore ways of expanding the availability of talking treatments. The Department will continue to work towards its public service agreement target to reduce mortality rates from suicide and undetermined injury by at least 20 per cent. by 2010.

Methadone/Buprenorphine

John Mann: To ask the Secretary of State for Health what guidance she has issued to drug actions teams on the use of *(a)* methadone and *(b)* buprenorphine. [6857]

Caroline Flint *[holding answer 27 June 2005]:* The Department and the National Treatment Agency, as part of their commitment to appropriate substitute prescribing, have produced a number of pieces of work in support of this objective. These are:

"Clinical Guidelines on the Management of Drug Dependence" (Department of Health, 1999), which is based on an expert review of the evidence. This is a key document underpinning standards of treatment interventions, including substitute prescribing, expected of professionals.

"Research Into Practice: Prescribing Services for Drug Misuse" (National Treatment Agency, January 2003). This document provided recommendations in relation to recommended guiding principles of an effective prescribing regime and the recommended components of an effective prescribing service.

A Chief Medical Officer letter (January 2001) relating to a change in national health service regulations that allowed for the instalment dispensing of buprenorphine. This regulation change was seen as being effective in increasing prescribers' willingness to prescribe buprenorphine as the risk of overdose and diversion was reduced substantially.

As part of our continuing commitment to develop the evidence base in this area as part of our objective to increase the effectiveness of treatment, the National Institute for Clinical Excellence, as part of its 10th wave, has agreed to do an appraisal of methadone and buprenorphine in the treatment of drug addiction. This important work, which will be completed by the end of 2006, is likely to be influential in the development of appropriate and effective substitute prescribing in future years.

MMR (Students)

Mr. Lansley: To ask the Secretary of State for Health (1) what advice the Department has given to *(a)* general practitioners and *(b)* medical centres covering university campuses about the MMR vaccination for students; [3349]

(2) what steps are being taken to ensure that unprotected university students are able to receive the MMR vaccination; and if she will make a statement. [3365]

Caroline Flint: The Department continues to support locally organised catch-up campaigns through supplying the MMR vaccine free of charge, and providing supplies of a leaflet containing information on this issue.

The Department sent a Public Health Alert to general practitioners in May 2004, alerting them to the risk posed by cases of mumps occurring at an international student's sports event in Spain. The Department also wrote to immunisation co-ordinators on MMR and older children in January 2005.

The Department's advice remains that all children need two doses of MMR vaccine to be protected against measles, mumps and rubella.

Mr. Lansley: To ask the Secretary of State for Health how many cases of *(a)* mumps and *(b)* measles among students there were in each of the last five years for which figures are available. [3364]

Caroline Flint: Data showing the number of laboratory confirmed cases of measles and mumps for the age groups 15 to 19 years, 20 to 24 years, and total cases for the years 2000–04 are shown in the table.

There is no way of knowing exactly how many of these cases relate specifically to university students, but it is likely many will be students in further education institutions.

The increase in mumps cases is predominantly in a particular cohort of children (those born between 1983 and 1987) who would not have been routinely offered MMR. During the last five years the mumps outbreaks have moved from older secondary school students to university/college students (percentage of total cases for each age group show this). We know that many of the mumps cases reported in 2003 to 2005 have been from university and college outbreaks, or linked to these.

Laboratory confirmed cases of measles and mumps : 2000–04

	Mumps					*Measles*

Mobile Phone Risks (Children)

Dr. Kumar: To ask the Secretary of State for Health (1) what assessment she has made of the possible risk posed by mobile phones to young children; and if she will make a statement; [5845]

(2) what measures are being taken to reduce the number of young children being exposed to mobile phones. [5846]

Caroline Flint: The comprehensive research reviews in this country undertaken for the Stewart report in 2000 and for the "Health Effects from Radiofrequency Electromagnetic Fields" do not suggest there are adverse health effects from the use of mobile phone technologies. Most reviews, however, note there are gaps in our scientific knowledge and therefore recommend continued research and the adoption of a precautionary approach with respect to children in particular.

Our advice to parents of children and young people under 16 on the use of mobile phones is set out in the leaflet "Mobile phones and Health", available on the Department's website at: www.dh.gov.uk/PublicationsAndStatistics/Publications/fs/en. It states:

> "the UK Chief Medical Officers strongly advise that where children and young people do use mobile phones, they should be encouraged to use mobile phones for essential purposes only and keep all calls short."

The advice adds that:

> "if parents want to avoid their children being subject to any possible risk that might be identified in the future, the way to do it is to exercise their choice not to let their children use mobile phones."

In line with the Stewart report's precautionary approach, the mobile phone operators reviewed their marketing policies to ensure they do not actively market mobile phones to the under-16s.

A more recent report from the National Radiological Protection Board, now the Health Protection Agency's radiation protection division, issued in January 2005, entitled "Mobile Phones and Health 2004", recommends that limiting the use of mobile phones by children remains an appropriate precautionary measure.

MRSA

Ms Diana R. Johnson: To ask the Secretary of State for Health what measures the Government plans to take to combat the threat of MRSA in hospitals. [6230]

Jane Kennedy: Tackling meticillin resistant Staphylococcus aureus (MRSA) and other healthcare associated infections is a top priority.

Our wide ranging programme to tackle these infections includes:

- a target to halve MRSA blood stream infections by 2008;
- the first national hand hygiene campaign;
- trials of a rapid review MRSA screening test to show if new methods can improve patient care;
- consultation on a new hygiene bill;
- materials for NHS staff such as "Saving Lives: a delivery programme to reduce healthcare associated infections including MRSA".

Needle Exchange Projects (Hepatitis C)

Mrs. Dean: To ask the Secretary of State for Health what assessment she has made of the effect of needle exchange projects on the prevention of hepatitis C infection in *(a)* the Burton constituency and *(b)* England. [4395]

Caroline Flint: Injecting drug use is a main route of transmission of hepatitis C. Needle exchange services, when provided with a range of other measures including the provision of information and advice about risk and accessible specialised drug treatment services, reduce the risk of transmission of hepatitis C and other blood borne virus infections, such as HIV infection. Needle exchange services are available in over 90 per cent. of local authorities in England. As part of the Department's "Hepatitis C Action Plan for England", a national audit of needle exchange schemes is under way which will contribute to monitoring of provision and effectiveness.

In the Burton constituency area, action has been taken to reduce the risks of transmission of hepatitis C through the provision of needle exchange services and other harm reduction services. The Staffordshire drug action team is working with other local partners, including general practitioners and primary care trusts, to develop an intervention strategy for ensuring that this provision remains effective for addressing local needs.

NHS Dentistry

Mr. Hancock: To ask the Secretary of State for Health which dentists in the Portsmouth area are accepting new NHS *(a)* children and *(b)* adult patients. [6005]

Ms Rosie Winterton: Information on which practices are currently taking on new national health service patients is not centrally collected. This information should be available from local primary care trusts or by contacting NHS Direct.

NHS Direct

Mr. Burstow: To ask the Secretary of State for Health if she will list the 10 most common reasons for calls to NHS Direct in the most recent year for which figures are available. [5176]

Mr. Byrne: I understand from the Chair of NHS Direct that the 10 most common reasons for calls to NHS Direct where a clinical assessment had been conducted between April 2004 to March 2005 were: abdominal pain; toothache; chest pain; headache; diarrhoea; vomiting; toxic ingestion; fever (age one to four years); sore throat and rash (age one to four years).

Julia Goldsworthy: To ask the Secretary of State for Health what assessment she has made of the impact of NHS Direct on staff recruitment in accident and emergency; and if she will make a statement. [6285]

Mr. Byrne: There is no evidence to suggest that NHS Direct has an impact on recruitment in accident and emergency departments.

Julia Goldsworthy: To ask the Secretary of State for Health what assessment she has made of the impact of NHS Direct on continuity of care; and if she will make a statement. [6286]

Mr. Byrne: NHS Direct is now a multi channel organisation providing access to the service through the online website, digital television and the telephone service. This ensures that all sectors of the population have access to accredited health advice.

During the out-of-hours period, NHS Direct is able to transfer patient information electronically to the out-of-hours provider to enable continuity of care, thus ensuring patients receive appropriate timely advice.

NHS Spending

Lynne Featherstone: To ask the Secretary of State for Health by what amounts NHS spending was *(a)* above and *(b)* below planned levels in the financial year (i) 2003–04, (ii) 2004–05 and (iii) 2005–06 to date; and if she will make a statement. [3074]

Mr. Byrne: The national health service plans to break even each year. In 2003–04 the NHS finished the year with a small surplus of £73 million.

Unaudited figures for the financial year ending 2004–05, show that the NHS is likely to be in deficit by around £140 million, this represents a fraction of the total budget, at around 0.2 per cent. Audited information in respect of the 2004–05 financial position of all strategic health authorities (SHAs), primary care trusts (PCTs) and NHS trusts will be published in their individual annual accounts, and will be available centrally in autumn 2005.

The financial position for 2005–06 will be available next year.

NHS Staff

Tim Loughton: To ask the Secretary of State for Health what the *(a)* vacancy rates and *(b)* full role calculations for (i) radiographer and (ii) consultant radiologist posts are in each hospital trust. [5498]

Mr. Byrne: Information on vacancy rates and full-role calculations on three month vacancy rates for radiographer and consultant radiologist posts in each hospital trust has been placed in the Library. Vacancy rates for radiographers fell between March 2003 and March 2004. Vacancy rates for consultant radiologists fell between March 2002 and March 2004.

NHS Trusts (Finances)

Norman Lamb: To ask the Secretary of State for Health what the financial position of each *(a)* primary care trust, *(b)* hospital trust and *(c)* other health service trust was at the end of the last financial year. [5673]

Mr. Byrne: Information showing the position for 2003–04, the latest year for which audited data is available, has been placed in the Library.

Nurses

Mr. Hoyle: To ask the Secretary of State for Health how many nurses have finished training in Lancashire teaching hospitals in each of the last three years. [7597]

Mr. Byrne: The responsibility for the training of nurses rests with higher education institutions rather than national health service trusts. Trusts do however provide clinical placements for student nurses and continuing professional development opportunities. This information is not collected centrally.

David Davis: To ask the Secretary of State for Health how much was spent on *(a)* agency nurses and *(b)* bank nurses in Hull and East Riding (i) Hospitals NHS Trust and (ii) Community Health NHS Trust in each of the last three years. [6549]

Mr. Byrne: The table shows expenditure on agency nurses in both the Hull and East Yorkshire Hospitals National Health Service Trust and the Hull and East Riding Community Health NHS Trust. Figures are not collected centrally for bank nurses.

Expenditure on agency nurses (£)

	Hull and East Yorkshire Hospitals NHS Trust	*Hull and East Riding Community Health NHS Trust*
2001–02	309,187	281,161
2002–03	551,525	923,245
2003–04	566,582	1,468,029

Note:
Agency nurses—non-NHS nursing, midwifery and health visiting staff
Source:
Annual financial returns of NHS trusts

David Davis: To ask the Secretary of State for Health (1) how many NHS nurses left the Hull and East Riding *(a)* Hospitals NHS Trust and *(b)* Community Health NHS Trust in each of the past five years; [6551]

(2) how many nurses employed by Hull and East Riding *(a)* Hospitals NHS Trust and *(b)* Community Health NHS Trust were recruited from outside the United Kingdom. [6553]

Mr. Byrne: The information requested is not collected centrally.

Nutrition (Staff Training)

Paul Flynn: To ask the Secretary of State for Health what requirements in respect of knowledge of nutrition and malnutrition are placed on registrants by each health and social care regulatory body. [5292]

Mr. Byrne: It is the responsibility of the appropriate regulatory bodies that set standards for health and social care education and training to determine how much knowledge registrants require of specific health and social care issues such as nutrition and malnutrition. My hon. Friend may find it helpful to contact the regulatory bodies direct to obtain this information in respect to those health and social care professions about which he is interested.

Older People

Mr. Lansley: To ask the Secretary of State for Health what plans she has to establish a central information source about care for older people, as recommended in the Office of Fair Trading report, Care homes for older people in the UK. [5597]

Mr. Byrne: The Office of Fair Trading published a report on care homes for older people on 18 May 2005. The report made a number of recommendations to the Government, which they are currently considering.

Mr. Burstow: To ask the Secretary of State for Health (1) what percentage of people over 75 years taking four or more medicines have their medicines reviewed at least every six months; [6663]

(2) what percentage of people over 75 years have their medicines reviewed at least annually. [6664]

Mr. Byrne: The Department do not collect centrally the data requested.

The national medicines management collaborative use medication reviews as measures for assessing improvements in patient care. They have monitored medication reviews for older people undertaken through general practitioner surgeries and also within care homes. Historic data for both measures, collected from the 146 primary care trusts taking part in the programme, suggest that there have been significant and sustained improvements in the number and quality of medication reviews.

Outpatient Appointments

Mr. Lansley: To ask the Secretary of State for Health how many outpatient appointments were missed *(a)* in England and *(b)* in each NHS trust in the most recent year for which figures are available; how many appointments with a general practitioner were missed (i) in England and (ii) in each primary care trust in the most recent year for which figures are available; what proportion of the total number of appointments this represented in each case; and what estimate she has made of the cost to the NHS of such missed appointments. [3441]

Mr. Byrne: The total number of missed outpatient appointments for the year 2004-05 in England was 5,707,288, or 11.3 per cent. Data for individual trusts are available in the Library.

The Department has not made an estimate of the cost of such missed appointments. However, the new choose and book system, which is being implemented across the national health service will help give patients greater certainty and choice over the time and date of their hospital appointment and will help to reduce the number and cost of missed appointments.

The Department does not collect data on the number of missed general practice appointments, but there is some evidence to suggest the number of missed appointments are falling.

PBDE

Norman Baker: To ask the Secretary of State for Health what steps she is taking to reduce exposure to the brominated flame retardant PBDE; and if she will make a statement on levels of this chemical in the bloodstream. [7042]

Caroline Flint *[holding answer 27 June 2005]*: The brominated flame retardant Pentabromodiphenyl ether (PBDE) has been banned in the European Union since 15 August 2004 under the EU's marketing and use directive for all uses, except for a temporary derogation until March 2006 for its use in aircraft emergency evacuation slides. This ban is implemented in Great Britain by Statutory Instrument 2004/3278 and in Northern Ireland by SI 2004/509.

The Health Protection Agency is developing a programme of biomonitoring research on persistent organic chemicals.

Plano Lenses

Mr. Don Foster: To ask the Secretary of State for Health if she will provide support to individuals with reading difficulties who could benefit from using plano lenses; and if she will make a statement. [6107]

Mr. Byrne: Plano tinted lenses may be prescribed by the hospital eye service for patients who have a recognised clinical need for them.

Although there are indications that some children and adults with reading difficulties may benefit from tinted lenses, these need to be provided as part of a proper scheme of assessment and treatment or many people could receive them unnecessarily.

National health service help through optical vouchers is for people who, following a sight test, have been given a prescription to correct a defect of sight. Parents of children with reading difficulties are encouraged to have their sight tested by an optometrist to check that there are no refractive problems or eye disease which may be contributing to the difficulties. The NHS provides children under 16 with free sight tests at community opticians' premises.

Mr. Don Foster: To ask the Secretary of State for Health if she will make plano lenses available to those with multiple sclerosis; and if she will make a statement. [6108]

Mr. Byrne: Plano tinted lenses may be prescribed by the hospital eye service for patients who have a recognised clinical need for them. These lenses could be prescribed to help someone with multiple sclerosis, if this was felt to be necessary.

Primary Care

Mr. Lancaster: To ask the Secretary of State for Health by how much she expects Milton Keynes primary care trust to overspend in the 2005–06 financial year. [7225]

Caroline Flint: The financial plans for 2005–06 have not yet been finalised, but national health service organisations are expected to plan to live within their revenue resource, capital resource and cash limits each and every year.

Royal National Orthopaedic Hospital (Stanmore)

Mr. Dismore: To ask the Secretary of State for Health if she will make a statement on the plans to redevelop the Royal National Orthopaedic Hospital, Stanmore. [5835]

Jane Kennedy: The Royal National Orthopaedic Hospital National Health Service Trust is currently progressing their proposals to redevelop the hospital. The £121 million scheme is a single-phase development of modern, purpose built, facilities linked to the provision of a new clinical service model, involving the re-provision of buildings that are more than 60 years old. The scheme will provide:

A modern, patient-focused environment for the continued delivery of clinical services.

Educational and research excellence and a secure future for an NHS centre of excellence, working in partnership with a top performing university.

A protected elective facility, designed to meet the needs of neuro-musculoskeletal patients, and focused on continued throughput of non-emergency cases.

The scheme will also release surplus land for housing and re-investment of the proceeds into health services.

It is anticipated that the outline business case will be considered by the North Central London Strategic Health Authority in September this year.

Schizophrenia

Mr. Burstow: To ask the Secretary of State for Health how many *(a)* 50 to 64-year-olds, *(b)* 65 to 74-year-olds and *(c)* over 75-year-olds were diagnosed with schizophrenia in each of the last five years. [6657]

Ms Rosie Winterton: Information is not available in the requested format. Information on the number of live discharges with a primary psychiatric diagnosis of schizophrenia of people aged 50 to 64 years, 65 to 74 years and over 75 years at the end of episode in each of the last five years is shown in the table.

Live discharges with a primary psychiatric diagnosis of schizophrenia (ICD-10[1]), England, by age at end of episode, 1999–2000 to 2003–04[2]

[1] Diagnoses are made using chapter five (mental and behavioural disorders) of the 10th revision of the international classification of diseases (ICD-10). The relevant codes used here are F20 to F29: schizophrenia, schizotypal and delusional disorders.

[2] Figures are grossed for both coverage and missing/invalid clinical data, except for 2002–03, and 2003–04, which are not adjusted for shortfalls.

	Age at end of episode			
	50 to 64 years	*65 to 74 years*	*75 years and over*	*All live discharges*
2003–04[1]	5,330	1,860	1,510	32,540
2002–03[1]	5,420	1,940	1,600	33,260
2001–02	5,470	1,940	1,620	32,800
2000–01	5,270	1,990	1,580	32,700
1999–2000	5,400	2,160	1,700	34,120

[1] Figures are grossed for both coverage and missing/invalid clinical data, except for 2002–03 and 2003–04, which are not adjusted for shortfalls.

Note:

Disclosure rules apply due to the sensitive nature of the data; therefore, figures have been rounded to the nearest 10.

Source:

Hospital Episode Statistics (HES), NHS Health and Social Care Information Centre

Sexually Transmitted Diseases (Drug Use)

Dr. Kumar: To ask the Secretary of State for Health (1) what research she has *(a)* commissioned and *(b)* evaluated on whether there is a link between the use of illegal substances and the spread of sexually transmitted infections and diseases; [5847]

(2) what measures are in place to warn recreational drug users of the dangers of contracting sexually transmitted diseases while under the influence of substances. [5849]

Caroline Flint: The Department keeps all of its sexual health promotion work under review, taking account of emerging research evidence to ensure the effectiveness of health promotion messages, using the best means to reach our target audience.

The Department commissioned the national addiction centre to review the evidence of harms associated with drugs of abuse and to summarise this in the Department's publication, "Dangerousness of drugs", which was published in September 2003.

This reports that a number of illicit drugs are associated with disinhibition and unsafe sexual practices including amyl nitrite and other nitrites, amphetamine type stimulants and novel synthetic drugs, such as MDMA/Ecstasy or GHB, opiates, benzodiazepines, volatile solvents, and that there is a possibility of high risk sexual behaviour in cocaine use.

The Department is currently developing its major new media campaign to promote safer sex, and this will be firmly based on the evidence base. Primary care trusts are responsible for undertaking sexual health promotion which meets the needs of their local populations and the Department supports them in this work by publishing best practice guidance on sexual health promotion, which includes work with drug users, and commissioning services.

South Tees Hospitals NHS Trust

Miss McIntosh: To ask the Secretary of State for Health (1) which areas of funding South Tees Hospitals

NHS Trust is expected to reduce over the next three years; and what changes in staffing levels she expects as a result; [6683]

(2) if she will ensure *(a)* that the Friarage hospital in Northallerton is not closed and *(b)* that the accident and emergency ward at the Friarage hospital in Northallerton is not (i) reduced in size and (ii) closed as a result of the funding settlement for South Tees Hospitals NHS Trust over the next three years; [6684]

(3) what measures she has put in place to ensure that reductions in funding by South Tees Hospitals NHS Trust do not impact negatively on the standard of care provided to the people of North Yorkshire. [6685]

Mr. Byrne: The South Tees Hospitals National Health Service Trust savings plan for 2005–06 was made public at a board meeting on 7 June 2005. The trust is conducting a major review of the costs of all its services to see where efficiencies can be achieved. Any proposals will be subject to full consultation. Of course, throughout this time patient care and safety remains paramount.

Both the South Tees Hospitals NHS Trust and Hambleton and Richmondshire Primary Care Trust (PCT) are committed to securing the Friarage hospital's services for the future.

Professor Ara Darzi's report on the Tees services review and its implications for the wider health economy, including the Friarage hospital, is due to be published shortly.

Stem Cell Research

Dr. Kumar: To ask the Secretary of State for Health what financial commitment her Department plans to make to stem cell research in each year from 2005 to 2008. [6633]

Jane Kennedy: The Department funds stem cell research through allocations made annually to national health service providers for research and development to meet the priorities and needs of the NHS and to meet the costs to the NHS of hosting research supported by external funders. The total amount allocated to NHS providers in 2005–06 for research and development is £500 million.

In the 2005 Budget, my right hon. Friend, the Chancellor of the Exchequer announced the launch of the United Kingdom stem cell initiative. This high-level review will report by the time of the 2005 pre-Budget report and inform future investment by the Department in stem cell research.

Thimerosal

Dr. Tony Wright: To ask the Secretary of State for Health whether thimerosal is used in vaccines in the NHS; and what assessment she has made of whether there are health risks associated with it. [5979]

Jane Kennedy: The only licensed vaccines currently in routine use in the United Kingdom which contain in their formulation thiomersal, also known as thimerosal, are some influenza and some hepatitis A and B vaccines.

As with all medicinal products, vaccine safety is continually monitored by the Medicines and Healthcare products Regulatory Agency (MHRA) with advice from the Committee on Safety of Medicines (CSM). The CSM and/or its expert working group on vaccine safety have thoroughly reviewed the safety of thiomersal-containing vaccines, including alleged links with neurodevelopmental disorders, and keep this under close review.

Several large studies have found no evidence of a link between thiomersal-containing vaccines and neurodevelopmental disorders. The advice of CSM remains that there is no evidence of harm from the very small quantities of thiomersal contained in some vaccines, with the exception of possible allergic reactions, typically skin rashes or local swelling at the site of injection. This view concurs with that of the World Health Organisation, the United States Institute of Medicine and the European Medicines Agency (EMEA).

Treatment Overseas (E111 Form)

Mr. Don Foster: To ask the Secretary of State for Health what measures the Government have taken to alert British citizens to the fact that E111 forms issued before August 2004 have been invalid since 31 December 2004; how much has been spent on *(a)* television advertising, *(b)* radio advertising, *(c)* newspaper advertising, *(d)* leaflets, *(e)* campaigns involving airlines and *(f)* other campaigns; and if she will make a statement. [2357]

Ms Rosie Winterton: A marketing campaign to inform the public about the changes to the E111 arrangements and the forthcoming introduction of the European Health Insurance Card is under way. This includes public information films and messages on television and radio using free airtime, press advertising, leaflets and other activities. Costs to date are:

	£
Television advertising	113,288
Radio advertising	19,897
Press advertising	677,836
Leaflets	280,411
Other activities	143,437

Tuberculosis

Steve Webb: To ask the Secretary of State for Health how many cases of tuberculosis were diagnosed *(a)* in England and *(b)* in each region in each year since 1997. [6567]

Caroline Flint: The number of notifications of tuberculosis made to the Health Protection Agency by region since 1997 are shown in the table.

Tuberculosis notifications by region, England, 1997–2004

Region	*1997*	*1998*	*1999*	*2000*	*2001*	*2002*	*2003*	*2004*[1]
East Midlands	384	428	442	440	464	502	337	423
East of England	232	268	228	254	326	333	341	417
London	2,411	2,444	2,493	2,834	2,886	2,839	2,745	2,569
North East	178	167	149	143	194	161	154	173
North West	631	690	720	671	672	636	610	636
South East	425	437	418	487	528	590	601	609
South West	212	213	209	226	198	239	226	267
West Midlands	610	673	712	723	692	789	797	870
Yorkshire and the Humber	581	595	567	601	611	538	572	616
Total	5,664	5,915	5,938	6,379	6,571	6,627	6,383	6,580

[1] Provisional figures.
Source:
Statutory notifications of infectious diseases.

Steve Webb: To ask the Secretary of State for Health how many people have received *(a)* BCG immunisations and *(b)* related skin tests in each of the last 24 months. [6568]

Caroline Flint: The number of people who have received bacillus calmette-guerin (BCG) vaccination and related skin tests are published annually in the Department's statistical bulletin, "NHS Immunisation Statistics, England".

The number of BCG vaccinations and skin tests given in 2002–03 can be found in "NHS Immunisation Statistics, England: 2002–03". Copies are available in the Library, and on the Department's website at: www.doh.gov.uk/public/sb0316.htm.

The number of BCG vaccinations and skin tests given in 2003–04 can be found in "NHS Immunisation Statistics, England: 2003–04". Copies are available in the Library, and on the Department's website at: www.publications.doh.gov.uk/public/sb0416.htm.

Steve Webb: To ask the Secretary of State for Health what the availability is of *(a)* magnetic Heaf heads and *(b)* purified protein derivative solution required to carry out skin tests prior to BCG vaccinations; and if she will make a statement. [6569]

Caroline Flint: Due to manufacturing constraints adult and paediatric heaf test heads are available on a limited basis.

Mantoux strength purified protein derivative for skin testing prior to receiving bacillus calmette-guerin (BCG) vaccination is available.

Vacancies (Accident and Emergency)

Julia Goldsworthy: To ask the Secretary of State for Health how many staff vacancies there are in Accident and Emergency departments in each NHS trust; and what percentage of the complement this represents in each case. [6284]

Mr. Byrne: The information requested is not collected centrally.

Work Placements

Mr. Todd: To ask the Secretary of State for Health whether she plans to make payments to students while on work placements within the NHS. [7516]

Mr. Byrne: A national health service bursary is provided for students on NHS funded courses. The bursary covers the living costs and provides other allowances for students during their course, which includes periods on clinical placement.

Written Answers to Questions

Wednesday 29 June 2005

PRIME MINISTER

Laptop Computers

Lynne Featherstone: To ask the Prime Minister how many laptop computers have been used by *(a)* Ministers, *(b)* special advisers and *(c)* officials in his Office in each year since 1995; how many have been (i) lost and (ii) stolen in that period; what the cost was of the use of laptops in that period; and if he will make a statement. [4112]

The Prime Minister: For these purposes my office forms part of the Cabinet Office. I refer the hon. Member to the answer given to her by my right hon. Friend the Chancellor of the Duchy of Lancaster today.

CULTURE, MEDIA AND SPORT

Consultants

Mrs. Dean: To ask the Secretary of State for Culture, Media and Sport what plans she has to issue guidance on effective commissioning for those in the public and voluntary sectors who are commissioning work from external consultants. [7019]

Mr. Lammy: I refer my hon. Friend to the answer given to her on 27 June 2005, *Official Report*, column 1286W by my hon. Friend the Financial Secretary to the Treasury.

Libraries (London)

Sarah Teather: To ask the Secretary of State for Culture, Media and Sport how many books were borrowed from libraries in each London borough in each year since 1997. [7475]

Mr. Lammy: The aggregate number of books issued by library authorities across inner and outer London for each year between 1997–98 and 2003–04 is shown in the following table. These figures are drawn from the Chartered Institute of Public Finance and Accountancy's annual Public Library Statistics (Actuals) which also contain figures for individual library authorities. Copies are available in the House of Commons Library.

Thousand

	Number of books issued
1997–98	55,246
1998–99	52,667
1999–2000	48,142
2000–01	45,771
2001–02	42,626
2002–03	41,727
2003–04	39,774

National Lottery

Lynne Featherstone: To ask the Secretary of State for Culture, Media and Sport if she will make a statement on differences in amounts received by constituencies from grants to good causes from the national lottery. [8073]

Mr. Caborn: Policy directions issued by the Department for Culture, Media and Sport state that lottery funding must be accessible to all sections of the population and all areas of the country (especially those at risk of social exclusion).

Ensuring equality of access does not, however, mean that every constituency will receive exactly the same amount. And nor should it. The distribution of national lottery funds was always intended to respond to particular needs and to ensure that areas of significant disadvantage are first to benefit.

Women's Football

Mr. Amess: To ask the Secretary of State for Culture, Media and Sport if she will take steps to promote women's football in England. [8378]

Mr. Caborn: The Government have sought to help promote the women's game by working closely with the football authorities and other sporting organisations to raise its profile in this country.

Sport England on behalf of the Government funds the Football Foundation which invests in a wide range of projects that benefit women's football. Sport England has also directly funded girls' football in recent years through the Active Sports programme which has contributed to the 53 per cent. increase in the number of girls playing the game since 2001.

The Government place much importance on women's football and football in general. The sport is a key deliverer of our aims to increase participation in sport, improve social inclusion, community cohesion and the health of the nation.

Work-related Stress

Lynne Featherstone: To ask the Secretary of State for Culture, Media and Sport how many cases of work-related stress have been reported in her Department in each of the last three years; how much compensation was paid to employees in each year; how many work days were lost due to work-related stress in each year; at what cost; what procedures have been put in place to reduce work-related stress; at what cost; and if she will make a statement. [7858]

Mr. Caborn: The Department records the number of stress related absences, but the records do not distinguish between stress and work-related stress. The number of stress related cases identified for the last three years are as follows:

	Number of cases	*Days lost*
2002–03	9	712
2003–04	6	251
2004–05	[1]—	176

[1] This information has been suppressed on grounds of confidentiality.

DCMS has a legal obligation to provide a safe working environment for all employees and guidance is available for staff and managers on how to manage stress effectively.

No compensation has been paid to employees for any stress related cases in the last three years.

As part of our larger managing attendance, health and welfare programme for staff we have a range of policies and procedures in places to reduce work-related stress.

These include: Stress Management policy: Sickness Absence policy, which includes guidance on making reasonable adjustments; full range of flexible work patterns to support work-life balance; dedicated stress management channel on DCMS Intranet; health awareness pages on Intranet; access to welfare services, onsite gym and yoga classes.

The Department does not hold details of costs for absences resulting from work-related stress or procedures put in place to tackle it.

ENVIRONMENT, FOOD AND RURAL AFFAIRS

Animal Welfare

Miss Widdecombe: To ask the Secretary of State for Environment, Food and Rural Affairs (1) what assessment she has made of the welfare conditions of animals used in circuses; and if she will make a statement; [7035]

(2) what plans she has to bring the welfare standards for circus animals up to the same standard as for animals kept in zoos; and if she will make a statement. [7036]

Mr. Bradshaw: The Government are aware of anecdotal evidence that there are certain welfare problems associated with circuses. The Government's preliminary conclusion is that any such problems can be addressed through better regulation.

Proposals under the Animal Welfare Bill will improve significantly the welfare of animals in circuses. The Bill will introduce a 'duty of care' requiring that the owner or keeper of an animal takes reasonable steps to ensure its welfare and enables action to be taken before any suffering occurs. This will strengthen protection for circus animals.

It is also our intention, through secondary legislation under the Bill, to regulate all trainers of performing animals. No decisions have been taken as to what form the regulation will take but any proposals will be subject to public consultation.

Miss Widdecombe: To ask the Secretary of State for Environment, Food and Rural Affairs what assessment she has made of the legislative position in other European countries in respect of the use of wild animals in circuses; and if she will make a statement. [7448]

Mr. Bradshaw: The Department is aware that animal welfare laws, including those relating to circuses, vary across Europe.

Badger Deaths (Surrey)

Mr. Breed: To ask the Secretary of State for Environment, Food and Rural Affairs when she plans to publish statistics on roadside badger deaths in Surrey; and if she will make a statement. [7360]

Mr. Bradshaw: As Surrey is not one of the seven counties in which DEFRA is conducting its Road Traffic Accident survey, we do not have data on the numbers of badgers killed on Surrey roads.

Energy Technology List (Kilns)

Joan Walley: To ask the Secretary of State for Environment, Food and Rural Affairs if she will take steps to include kilns on the Energy Technology List of the Enhanced Capital Allowance Scheme; and if she will make a statement. [7395]

Mr. Morley: The Carbon Trust is responsible for providing the Government with technical advice on technologies for the Energy Technology List (ETL). Each proposal for a new technology group is considered and prioritised based on the potential to save carbon dioxide emissions and ease of incorporation within the scheme. To date we have not received any detailed or quantitative proposals to include kilns on the ETL from the relevant industry representatives and our own market assessment indicates that kilns offer relatively low EGA accessible abatement potential compared to other technologies not yet listed. Therefore we have no plans to undertake a detailed evaluation of kilns for the ETL at the moment.

Environment Agency Helpline

Sarah Teather: To ask the Secretary of State for Environment, Food and Rural Affairs how many calls the Environment Agency emergency helpline received in each year since 1997, broken down by the type of problem being reported. [7152]

Mr. Morley: The Environment Agency does not record the number of calls to the incident hotline, or keep a central log of those calls by subject. Preparing the information from the manually completed record sheets would could be done only at disproportionate cost.

The following schedule shows an approximation of the number of calls received, based on information supplied by BT concerning the total duration of all calls

to the hotline, divided by an average duration calculated using figures for April 2005. Unfortunately this information is only available since June 2002.

	Number of calls
2002 (June to December)	66,322
2003	136,785
2004	163,696
2005 (January to May)	76,417

Flood Defences

David Davis: To ask the Secretary of State for Environment, Food and Rural Affairs how much is budgeted for expenditure on flood defences in the East Riding of Yorkshire in the next five years; and to which projects funding will be allocated. [6547]

Mr. Morley: DEFRA funds most of the Environment Agency's flood management activities in England and provides grant aid on a project by project basis to the other operating authorities (local authorities and internal drainage boards) to support their investment in improvement projects to manage flood and coastal erosion risk. Defra does not build defences, nor direct the authorities on which specific projects to undertake.

I understand from the Environment Agency that their budget for expenditure on flood risk management in East Riding of Yorkshire over the next five years is approximately £41 million (at September 2004 prices). This is made up as follows:

Activity/Project	*Forecast expenditure (£000)*
Ongoing capital investment	
Tickton refurbishment	300
Number Estuary Coastal Authorities Group SMP Review	80
Number Monitoring 2	570
Number Estuary Shoreline Management Plan 3	260
Number Land Purchase	3,760
East Clough-Brough Haven	3,130
Little Humber-Thorngumbald	240
Reedness Slips at Reedness	1,200
Goole Slips-River Ouse (Hook Road)	850
Saltmarshe Embankment 2	400
Bank House Slips/Saltmarshe	800
Airmyn and Rawcliffe	2,000
Burstwick Drain	630
Total	14,220
Capital projects resulting from number strategy	
Paull Village	3,300
BAe to East Clough	2,900
Old Goole	500
Swinefleet	5,800
Erosion Control (Stoning)	2,100
Monitoring and maintenance	1,100
Further studies	1,700
Contingency for urgent work	2,100
Total	19,500
Asset improvements	1,090
Routine maintenance	2,800
COW expenditure	1,135
Support costs	2,325
Grand total	41,070

For local authorities and internal drainage boards, the forward programme is not budgeted at regional level. DEFRA does however hold forecasts of expenditure of individual approved flood risk management improvement projects covering the period from April 2005 to March 2008. These forecasts total approximately £1 million and are made up as follows:

Authority	*Project name*	*Forecast expenditure (£000)*
Cowick IDB	Cowick IDB First Five Year Strategy	94
Goole and Airmyn IDB	Hook Clough Pumping Station	150
Goole and Airmyn IDB	Downs Ground Pumping Station	235
Goole and Airmyn IDB	Downs Ground Pumping Station Refurbishment	300
Market Weighton IDB	Oxmardyke Pumping Station	70
Market Weighton IDB	Foss Dyke and Tributaries	2
Rawcliffe IDB	Rawcliffe First Five Year Strategy	187
Total		1,038

In addition to this list of approved projects for local authorities and internal drainage boards, there are also a number of planned improvement projects that meet the current priority score thresholds but which have not yet been approved for grant aid by the Department.

Mr. Dismore: To ask the Secretary of State for Environment, Food and Rural Affairs if she will make a statement on progress with the Silkstream Flood Defence scheme, Edgware. [7053]

Mr. Morley: The Environment Agency is promoting this flood alleviation project. I understand that two of the six flood storage areas have been constructed, these being Temple Pond and Prince Edward Playing Fields (Harrow). Construction work is programmed to commence in autumn 2005 for Summerhouse Lake and Stoneywood Lake. Design and land negotiations for the final two sites, Edgwarebury Park and Bury Farm, are being progressed and underpinned by a Compulsory Purchase Order procedure.

The completion of all flood storage areas is still on target for year 2007, subject to securing the necessary funding and successful negotiations with landowners.

Energy-efficient Housing

Dr. Stoate: To ask the Secretary of State for Environment, Food and Rural Affairs how many households have been assisted by the Home Energy Efficiency and Warm Front schemes in the borough of Dartford in each year since June 2000; and what the average size of grant was in each financial year. [7904]

Mr. Morley: Between the launch of the Warm Front Scheme in June 2000 and the end of the March 2005 the number of households assisted in the borough of Dartford were:

	Number
2000–01	101
2001–02	298
2002–03	210
2003–04	157
2004–05	198
Total	964

The average size of grant in each financial year for the Dartford constituency was:

Scheme year	*Average grant*
2000–01	290
2001–02	324
2002–03	596
2003–04	1,019
2004–05	1,030

Simon Hughes: To ask the Secretary of State for Environment, Food and Rural Affairs what steps her Department has taken towards implementing the requirements of section 217 of the Housing Act 2004. [7953]

Mr. Morley: We are working across Government and with key stakeholders to implement the policies detailed in our 2004 Energy Efficiency Action Plan, which will lead to economy-wide annual savings of 12.1 million tonnes of carbon by 2010. We are looking at ways to further strengthen our energy efficiency policies through the joint HM Treasury/Defra Energy Efficiency Innovation Review and the Climate Change Programme Review, due to conclude later this year.

Sewerage and Water Bills

Julia Goldsworthy: To ask the Secretary of State for Environment, Food and Rural Affairs what the average water sewerage bills are as a proportion of average income in each region. [6293]

Mr. Morley: Information on water and sewerage bills is not available by economic region. The attached table sets out the average water and sewerage bill as a proportion of average household income in each water and sewerage company area.

2005–06

Regionally	*Bill as a proportion of average income (percentage)*
Anglian	1.2
Dwr Cymru	1.5
Northumbria	1.2
Severn Trent	1.1
South West	1.8
Southern	1.1
Thames	0.8
United Utilities	1.2
Wessex	1.2
Yorkshire	1.2
Wocs	1.0
Industry average	1.0

Timber

Dr. Whitehead: To ask the Secretary of State for Environment, Food and Rural Affairs what assessment she has made of the potential for the recovery of construction and demolition timber as a renewable energy source. [7282]

Mr. Morley: Information is not available on the amount of construction and timber waste produced each year. Current estimates for all types of wood waste vary from 1.9 to 7.5 million tonnes per annum. This includes municipal, commercial and industrial waste as well as that from construction and demolition. A significant proportion currently goes to landfill, which could be used instead as a valuable energy source. As part of the current review of the renewables obligation, the Government has just consulted on options for incentivising a broader range of mixed waste energy projects. The Biomass Study Task Force, led by Sir Ben Gill, is looking at the barriers to developing biomass energy and will recommend ways to overcome the problems. The use of wood waste as an energy source is one of the areas they are looking at and we will consider the way forward in the light of their recommendations.

INTERNATIONAL DEVELOPMENT

Aid Conditionality

6. **David Taylor:** To ask the Secretary of State for International Development what steps have been taken to reduce the conditionality of overseas aid; and if he will make a statement. [7786]

Hilary Benn: The UK Conditionality Policy which I launched in March this year aims to reduce the overall burden of conditionality on developing countries. UK aid will be subject to only three fundamental conditions, which ensure that aid is used to reduce poverty, is not misused through corruption and supports good governance and human rights. We will no longer make UK aid conditional on specific policy choices by partner governments—including in sensitive economic areas such as privatisation or trade liberalisation.

11. **Ms Barlow:** To ask the Secretary of State for International Development what steps he is taking to encourage bilateral and multilateral donors to adopt the UK's policy of not placing economic conditions on the aid, loans and debt relief given to developing countries. [7791]

Hilary Benn: I published a UK policy paper on conditionally in March 2005. Increased transparency about DFID's approach to conditionally and about the conditions that we use will help us to achieve change in other organisations. Last year, I pressed the World

Bank to carry out a review of its conditionality. The review will be finalised before the Annual Meetings in September 2005. We have had good discussions with our Nordic Plus partners who are in broad agreement with the principles set out on our policy paper. At country level, when working with other donors, we will encourage others to adopt the approach and principles laid out in our conditionality policy.

HIV/AIDS (Africa)

7. **Mr. Evans:** To ask the Secretary of State for International Development what discussions he has had with Ministers in recipient countries in relation to HIV/AIDS aid in sub-Saharan Africa. [7787]

Hilary Benn: Over the past few months my hon. Friend the Parliamentary Under-Secretary of State and I have met with Ministers and others in a number of African countries to discuss ways of doing more to fight HIV and AIDS prevention, provide better treatment and care, improve and encourage research into protective microbicides and vaccines.

Debt Relief

8. **Mr. McFall:** To ask the Secretary of State for International Development what measures he plans to put in place to ensure that heavily indebted poor countries receiving debt relief do not incur heavy debts in future. [7788]

Hilary Benn: Heavily indebted poor countries that have demonstrated a commitment to poverty reduction are receiving substantial debt relief, and would receive more under the G8 proposal agreed recently.

It is essential that these countries do not build up unsustainable debts again. We have therefore agreed a new arrangement—the Debt Sustainability Framework—to determine whether new assistance should be in the form of loans or grants. We will discuss with partners whether the framework should be adjusted in light of the multilateral relief proposed by the G8.

We are also providing assistance directly to countries to strengthen their debt management capacity.

10. **Sir George Young:** To ask the Secretary of State for International Development what steps he is taking to ensure that funds released by debt relief are used to reduce poverty. [7790]

Hilary Benn: Debt relief under the heavily indebted poor countries (HIPC) initiative, as well as proposed in the recent G8 deal, will go only to countries that have demonstrated their commitment to poverty reduction and good public expenditure management.

On average, 65 per cent. of the savings from HIPC debt relief are used on health and education. There are already many excellent examples of the difference this debt relief can make—after receiving HIPC debt relief in 2001 Ghana has increased spending on reducing poverty by almost 50 per cent. In Uganda, debt relief has seen spent on reducing poverty rise by 75 per cent. since 2000, and access to health services and immunisation rates have almost doubled.

Zimbabwe

9. **Ann Winterton:** To ask the Secretary of State for International Development what steps his Department is taking to assist people in Zimbabwe's urban areas. [7789]

Hilary Benn: It is estimated that 66,000 households (approaching 330,000 people) have been affected by the callous destruction of people's homes and livelihoods by the government of Zimbabwe. DFID have responded to this man-made disaster by providing US$450,000 so far in humanitarian assistance to the most vulnerable. A further contribution is imminent. To date nearly 10,000 families have been reached with food, blankets, soap and other forms of assistance. Where appropriate emergency water and sanitation facilities have been provided. We will continue to press the Government of Zimbabwe to respect human rights and to put a stop to these cruel evictions and arrests.

Palestinian Territories

12. **Mr. McGovern:** To ask the Secretary of State for International Development what aid programmes his Department has in the Palestinian territories. [7792]

Hilary Benn: The Department for International Development is working with partners to help end conflict and create a viable Palestinian state that will reduce poverty. The central themes of our programme are to enhance the prospects for peace, promote effective and accountable Palestinian institutions and make international aid and development assistance more effective. We plan to spend £30 million in bilateral aid during 2005–06. Half of our funding will help the United Nations Relief and Works Agency deliver education, health and social services to Palestinian refugees. We will also continue to provide budget support to the Palestinian Authority.

Iraq

13. **Mr. David Anderson:** To ask the Secretary of State for International Development what assistance the Department is providing to Iraq in 2005–06. [7793]

Hilary Benn: DFID plans to provide £65 million in assistance to Iraq in 2005–06. Our programme is focused on improving infrastructure, including power and water supplies in southern Iraq, and support for public administration, economic reform and participation in the political process in Iraq.

Full details of DFID's programme of assistance in Iraq since April 2003 can be found on the Departments website at www.dfid.gov.uk/countries/asia/iraq.asp

User Fees (Education)

14. **Ann McKechin:** To ask the Secretary of State for International Development what steps his Department is taking to ensure that user fees for education are abolished in all countries not on track to meet the millennium development goals. [7794]

Mr. Thomas: DFID supports governments to develop education policies that reduce the financial burden of education for poor families. In Kenya, the recent removal of user fees resulted in over 1 million extra

children going to school. We will continue to support countries not on track to meet the education Millennium Development Goals in their efforts to remove user fees for basic education. Over the next three years, DFID plans to spend £1.4 billion supporting education in developing countries. Removing school fees must be part of a plan to ensure the quality of primary education for children is improved.

Asian Tsunami

15. **Simon Hughes:** To ask the Secretary of State for International Development if he will make a statement on reconstruction in the tsunami-affected regions. [7795]

Mr. Thomas: Following a successful humanitarian relief effort, reconstruction after the Asian Tsunami will take several years. Progress is now being made.

In Sri Lanka, 30,000 transitional homes replacing temporary shelters have been constructed so far. Of 182 schools damaged, contracts have been signed to rebuild 176; and roads, railways and electricity supplies have been restored. The recently agreed Joint Mechanism between the Government, the LTTE and Muslims will aid reconstruction in the North East.

Indonesia is still essentially in the relief phase but reconstruction is now beginning through the Aceh Reconstruction Agency. I announced during my recent visit £30 million to be made available to the Indonesian Multi Donor Trust Fund from the £65 million for reconstruction.

Fossil Fuels (International Funding)

Andrew George: To ask the Secretary of State for International Development how much has been invested in *(a)* fossil fuel projects and *(b)* renewable energy projects by the (i) World Bank Group, (ii) European Bank for Reconstruction and Development, (iii) European Investment Bank, (iv) Asian Development Bank, (v) African Development Bank and (vi) Inter American Development Bank in each of the last five years. [6837]

Hilary Benn *[holding answer 23 June 2005]:* The following summary table details investment in fossil fuel and renewable energy projects across the major multilateral development banks in the last five years.

Multilateral development bank renewable energy and fossil fuel investments: financial year 2000–04

US$ million

Sub-sector	*2000*	*2001*	*2002*	*2003*	*2004*
World Bank Group					
Renewable energy	764	26	349	342	272
Coal (incl mine closure)	51	111	194	75	160
Oil and gas	490	592	601	448	415
Power	1,163	1,169	1,555	852.2	570.2
Other energy sub-sector	176	175	55	170	128
Total fossil fuel	1,880	2,047	2,405	1,545	1,273
Energy efficiency and district heating	254	189	37	68	48
European Bank for Reconstruction and Development					
Renewable energy	0	16	0	0	0
Coal (incl mine closure)	0	0	0	72	0
Oil and gas	142	27	153	35	124
Total fossil fuel	142	27	153	108	124
Energy efficiency and district heating	21	64	92	121	242

Multilateral development bank renewable energy and fossil fuel investments: financial year 2000–04

US$ million

Sub-sector	*2000*	*2001*	*2002*	*2003*	*2004*
European Investment Bank					
Renewable energy	78	206	734	375	459
Coal (incl mine closure)	n/a	n/a	n/a	n/a	n/a
Oil and gas	n/a	n/a	n/a	n/a	n/a
Total fossil fuel	285	285	285	285	669
Energy efficiency and district heating	n/a	n/a	n/a	n/a	n/a
Asian Development Bank					
Renewable energy	58	6	161	0	0
Coal (incl mine closure)	0	0	0	0	187
Oil and gas	0	0	73	0	0
Total fossil fuel	0	0	73	0	187
Energy efficiency and district heating	n/a	n/a	n/a	n/a	n/a
African Development Bank					
Renewable energy	102	79	2	0	0
Coal (incl mine closure)	0	0	0	0	0
Oil and gas	0	0	115	82	0
Total fossil fuel	0	0	115	82	0
Energy efficiency and district heating	n/a	n/a	n/a	n/a	n/a
Inter-American Development Bank					
Renewable energy	338	186	3	14	75
Coal (incl mine closure)	0	0	0	0	0
Oil and gas	713	192	0	0	0
Total fossil fuel	713	192	0	0	0
Energy efficiency and district heating	n/a	n/a	n/a	n/a	n/a

Notes:

1. Figures shown are commitment amounts and not disbursements.
2. Renewable energy is generally defined as hydropower, wind, solar, geothermal and biomass projects.
3. Sub-sector project definitions may vary across institutions and are not directly comparable.
4. Although projects are in fossil fuel sector, this does not necessarily imply a net increase in fossil fuel use. More efficient fossil fuel investments will displace other inefficient fuel or production methods.
5. Coal projects include costs to close mines in an environmental and socially acceptable manner.
6. Figures excludes sole technical assistance projects although technical assistance is a component of loans described.
7. Figures exclude projects solely to support power transmission and distribution.
8. World Bank renewable energy projects include IBRD/IDA/IFC commitments, MIGA guarantees, Bank GEF projects and IBRD carbon finance.
9. EIB investments are for EU members, and also two projects in Swaziland and Morocco.
10. ADB, AfDB, EIB and IDB energy efficiency project information not shown in table.
11. The energy efficiency component of EBRD industrial projects was not recorded before 2002.
12. EBRD and EIB lending figures converted to US$ at $ per Euro 1.205.
13. AfDB figures converted from Unit of Account to US$ at $ per UA 1.4752.
14. IDB loans include loan amounts placed by IDB Private Sector Department with other lenders.
15. IDB renewable energy includes investment in cogeneration facilities.

SOLICITOR-GENERAL

Domestic Violence

Vera Baird: To ask the Solicitor-General how many prosecutions for domestic violence in the jurisdiction of the Teesside combined courts have *(a)* come to court and *(b)* resulted in conviction in the last 12 months. [7685]

The Solicitor-General: The Crown Prosecution Service (CPS) records are held according to the CPS unit responsible for proceedings, rather than the court in which the case was heard.

The following table shows the number and outcome of proceedings for domestic violence handled by the Teesside Criminal Justice Unit and the Trials Unit in magistrates courts during the year ending March 2005. During this period, 152 defendants were convicted for domestic violence in the magistrates courts, representing 54.7 per cent. of the total proceeded against. Proceedings in respect of 10 defendants were dismissed after a full trial. All of these prosecutions may be regarded as having come to court. Proceedings in respect of a further 114 defendants were discontinued, while bench warrants for the arrest of two more defendants remained outstanding. These cases may be regarded as not having come to court.

Prosecutions in Teesside Crown court are handled by three CPS units: Durham Trials Unit, Teesside Trials Unit and York Trials Unit. However, CPS units are also responsible for prosecutions in other Crown courts, and it is not possible to disaggregate figures to isolate those relating to Teesside Crown court alone.

A further table shows the number of defendants proceeded against for domestic violence in the crown court by each of the relevant CPS units during the year ending March 2005, and the outcome of the proceedings. The table also shows the proportion of cases resulting in an unsuccessful outcome and in a conviction. In total, 100 defendants were convicted for domestic violence: (73.5 per cent. of the total proceeded against).

All of the Crown court cases shown in the following tables may be regarded as having come to court, with the exception of the one case which could not proceed owing to the death of the defendant.

CPS proceedings for domestic violence in the Crown court 2004–05

	Durham Criminal Justice Unit/Trial Unit South	%	*Teesside Trial Unit*	%	*York Trial Unit*	%	*Total*	%
Defendant died	1	2.0	0	0.0	0	0.0	1	0.7
Judge ordered acquittal	7	14.3	12	18.8	4	17.4	23	16.9
Judge directed acquittal	0	0.0	2	3.1	0	0.0	2	1.5
Jury acquittal	2	4.1	6	9.4	2	8.7	10	7.4
Total unsuccessful outcomes	10	20.4	20	31.3	6	26.1	36	26.5
Guilty plea	38	77.6	43	67.2	11	47.8	92	67.6
Guilty verdict	1	2.0	1	1.6	6	26.1	8	5.9
Total convictions	39	79.6	44	68.8	17	73.9	100	73.5
Total	49	100.0	64	100.0	23	100.0	136	100.0

CPS proceedings for domestic violence in magistrates courts Teesside: 2004–05

	Number	*Percentage*
Outstanding bench warrants	2	0.7
Discontinued	114	41.0
Dismissed after full trial	10	3.6
Total unsuccessful outcomes	126	45.3
Guilty plea	142	51.1
Guilty verdict	10	3.6
Total convictions	152	54.7
Total	278	100.0

Sexual Offences

Vera Baird: To ask the Solicitor-General how many prosecutions for rape and sexual offences have *(a)* been brought to court and *(b)* resulted in conviction in the jurisdiction of the Teesside combined courts in the last 12 months. [7686]

The Solicitor-General: The Crown Prosecution Service (CPS) records are held according to the CPS unit responsible for proceedings rather than the court in which the case was heard.

The following table shows the number and the outcome of proceedings for sexual offences handled by the Teesside Criminal Justice Unit and the Trials Unit in magistrates courts during the period from September 2004, when the present analysis was introduced, to March 2005. During this period, 26 defendants were convicted for sexual offences in magistrates courts, representing 78.8 per cent. of the total proceeded against. Proceedings were discontinued in respect of the remaining seven defendants, whose cases may be regarded as not having been brought to court.

Prosecutions in Teesside Crown court are handled by three CPS units: Durham Trials Unit, Teesside Trials Unit and York Trials Unit. However, these CPS units are also responsible for prosecutions in other crown courts, and it is not possible to disaggregate figures to isolate those relating to Teesside Crown court alone.

A further table shows the number of defendants proceeded against for sexual offences in the Crown court by each of the relevant CPS units. The table also shows the proportion of cases resulting in an unsuccessful outcome and in a conviction. In total, 72 defendants were convicted for sexual offences: (59.5 per cent. of the total proceeded against).

All of the cases shown in the tables for crown court proceedings may be regarded as having been brought to court, with the exception of two cases in which a bench warrant for the arrest of the defendant remained unexecuted.

While CPS records provide an analysis of the number and the outcome of proceedings for sexual offences, these figures cannot be further disaggregated to show the outcome of proceedings for rape.

Information from the Home Office Court Proceedings Database shows that in 2003, in the Teesside Crown Court, 28 defendants were proceeded against for rape of a male and rape of a female, of which nine were found guilty. Data for 2004 will be available in the autumn.

CPS proceedings for sexual offences in the Crown court—September 2004-March 2005

	Durham Criminal Justice Unit/Trial Unit South	%	Teesside Trial Unit	%	York Trial Unit	%	Total	%
Outstanding bench warrants	0	0.0	1	1.9	1	2.4	2	1.7

CPS proceedings for sexual offences in magistrates courts Teesside: September 2004-March 2005

	Number	Percentage
Discontinued	7	21.2
Total unsuccessful outcomes	7	21.2
Proved in absence	1	3.0
Guilty plea	24	72.7
Guilty verdict	1	3.0
Total convictions	26	78.8
Total	33	100.0

TREASURY

Council Tax

Sarah Teather: To ask the Chancellor of the Exchequer how many *(a)* successful and *(b)* unsuccessful appeals against council tax banding have been received in each year since 1997; and how many properties were moved down (i) one, (ii) two and (iii) three or more bands following successful appeals. [7151]

Dawn Primarolo: The information is as follows:

Appeals settled in each year for England since 1999–2000[1]

	Unsuccessful	Successful
1999–2000	19,580	26,036
2000–01	14,252	22,205
2001–02	12,808	17,906
2002–03	11,998	17,992
2003–04	12,356	15,364
2004–05	12,350	15,753

[1] The first year this information is available in this form.

Information on specific levels of banding changes relating to these appeals is not currently available.

Sarah Teather: To ask the Chancellor of the Exchequer what the average cost of an appeal against council tax banding has been in each year since 1997. [7172]

Dawn Primarolo: The average costs of an appeal against council tax banding from 2001–02—the first year for which information is available—are:

	£
2001–02	280
2002–03	280
2003–04	300
2004–05	320

Sarah Teather: To ask the Chancellor of the Exchequer how many staff *(a)* are, *(b)* have been and *(c)* will be (i) employed and (ii) contracted out by the Valuation Office Agency to carry out the council tax revaluation process. [7210]

Dawn Primarolo: The number of staff employed by the Valuation Office Agency for the council tax revaluation process for England is:

(a) 2005–06: 1, 610

(b) 2004–05: 729

(c) 2006–07: 1,419

(ii) There are no current plans to contract out work from the Valuation Office Agency.

Mrs. Spelman: To ask the Chancellor of the Exchequer what the sources are of the house sales price data the Valuation Office Agency is using for computer modelling as part of the council tax revaluation process. [7586]

Dawn Primarolo: The Valuation Office Agency has access to property transaction information from the Stamp Taxes Office of HM Revenue and Customs and from HM Land Registry.

Mrs. Spelman: To ask the Chancellor of the Exchequer what proportion of dwellings will be assessed by the Valuation Office Agency using the automated valuation model during the council tax revaluation in England. [7587]

Dawn Primarolo: The Automated Valuation Model will be used to support the revaluation of the majority of properties within England. Valuation Office Agency staff will use their expertise to review all the outputs.

Mrs. Spelman: To ask the Chancellor of the Exchequer if he will place in the Library the specification and technical documentation relating to the automated valuation model used by the Valuation Office Agency for the council tax revaluation. [7590]

Dawn Primarolo: The Automated Valuation Model (AVM) is still under development, and so its specification and associated technical documentation is not yet finalised. The Valuation Office Agency will however publish information on this in due course.

Mrs. Spelman: To ask the Chancellor of the Exchequer what estimate the Valuation Office Agency has made of the number of appeals which are likely to be made following the council tax revaluation in England. [7711]

Dawn Primarolo: The number of appeals which may be received following a revaluation are dependent upon a number of issues, which include the characteristics of the banding scheme, the extent of information provided to individual taxpayers about how their assessment has been arrived at, and also the level of payments to be made including whether any transitional relief scheme will apply. A number of these issues are currently under consideration by the Inquiry being undertaken by Sir Michael Lyons which is due to report in December 2005. It is therefore too speculative to provide estimates of appeal rates at this stage.

Faith Communities

Mr. Paul Goodman: To ask the Chancellor of the Exchequer what recent consultations have been carried out by his Department with representatives of faith communities; and if he will make a statement. [3231]

John Healey: Comprehensive information relating to consultations with representatives of faith communities is not readily available and could be obtained only at disproportionate cost.

Treasury Ministers are concerned to ensure that the views of all sectors of society, including faith communities, are taken fully into account in the process of policy development and analysis. Recent examples of active engagement with faith groups include the tax treatment of Islamic (Shari'a compliant) financial products and the refund of VAT on repairs to listed places of worship.

Flight Charges (African Development)

Mr. Carmichael: To ask the Chancellor of the Exchequer what discussions EU finance ministers have had on introducing additional charges on domestic and international flights to fund international development in Africa; what the UK's position is; and if he will make a statement. [5143]

Mr. Ivan Lewis *[holding answer 20 June 2005]:* EU finance minister discussions on innovative mechanisms for financing development, including the IFF, the IFF for Immunisation, and an air ticket levy that could support specific development projects and refinance the IFF, are on-going.

The 16–17 June European Council invited "the Council to pursue its consideration of the most promising options for innovative sources of funding for development, so as to increase the resources available in a sustainable and predictable manner."

Gershon Review

Dr. Cable: To ask the Chancellor of the Exchequer what *(a)* value for money savings consequent on the Gershon review, *(b)* procurement savings and *(c)* reduction in civil service posts each Department is expected to make in the fiscal year 2004–05; and if he will make a statement. [7710]

Mr. Des Browne: Efficiency targets were set out for each Department in the Spending Review 2004 White Paper. Progress was reported in Budget 2005 and Departments will report on further progress in their annual reports.

Home Owners

Sarah Teather: To ask the Chancellor of the Exchequer pursuant to the answer of 9 June 2005, *Official Report*, column 681W, on home ownership, what economic analysis was undertaken to underpin the target of one million more homeowners by 2010. [6429]

John Healey: The Government expect one million people to enter home-ownership over the next five years. This is based upon analysis of recent trends in house-building and new owner-occupiers. It also takes into account the impact that the domestic economic stability delivered by the Government's macroeconomic framework will have had on numbers entering into homeownership.

Insurance Fraud

Gregory Barker: To ask the Chancellor of the Exchequer what representations he has received regarding allegations of fraud by insurance companies using the insurance premium tax. [7964]

Mr. Ivan Lewis: The Treasury has received no representations regarding allegations of insurance premium tax (IPT) fraud by insurance companies in the past year. Some allegations of underpayment of IPT have been received regarding one particular business and these have been investigated by HM Revenue and Customs.

Mortgage Interest Tax Relief

Mrs. Spelman: To ask the Chancellor of the Exchequer what the average tax deduction due to Mortgage Interest Tax Relief was in April 1997. [7433]

Dawn Primarolo: Estimates can be made from data available on the HMRC website:

http://www.hmrc.gov.uk/stats/mir/mir_t03_1.htm

Property-based Loans

Tom Levitt: To ask the Chancellor of the Exchequer what contribution to the cost of participation in central Government schemes and services came from equity release or other property-based loans to service users in *(a)* absolute and *(b)* percentage terms in the latest period for which figures are available; and what assessment he has made of how this proportion will change over the next 10 years. [6583]

John Healey: The Treasury does not hold this data centrally.

Tax Avoidance Schemes

Mr. Austin Mitchell: To ask the Chancellor of the Exchequer (1) how many tax avoidance schemes have been withdrawn or otherwise ceased to operate since legislation was brought into force requiring sellers to secure prior clearance from his Department; [7583]

(2) if he will bring forward legislation to require *(a)* providers and *(b)* purchasers of tax avoidance schemes to provide a complete inventory of their schemes to his Department. [7584]

Dawn Primarolo: The Government are committed to protect the tax system against tax avoidance when and where necessary, ensuring that all taxpayers pay their fair share, and protecting revenues for essential public services. The disclosure rules for direct tax and VAT are a success, informing a number of anti-avoidance measures in the summer Finance Bill.

However, the disclosure rules do not require promoters of schemes to notify HMRC if a tax avoidance scheme has been withdrawn or otherwise ceased, so this information is unavailable.

The Government continue to keep the disclosure rules under review, and will bring forward any further proposals at the appropriate time.

Mr. Austin Mitchell: To ask the Chancellor of the Exchequer what action his Department has taken against PricewaterhouseCoopers for selling tax avoidance schemes; and if he will make a statement. [8128]

Dawn Primarolo: The Government are committed to protect the tax system against tax avoidance when and where necessary, ensuring that all taxpayers pay their fair share, and protecting revenues for essential public services. The Government introduced the disclosure rules for direct tax and VAT in 2004. The disclosure rules are a success, informing a number of anti-avoidance measures in the summer Finance Bill. Among other things, the direct tax rules require promoters to disclose to HMRC that they have made available a scheme or arrangement as defined in the rules. This legislation applies to PricewaterhouseCoopers as it does to any other promoter.

Tax Credit Fraud

Mr. Evans: To ask the Chancellor of the Exchequer how many prosecutions the Inland Revenue has brought for fraudulent tax credit claims in each year since 1997. [4377]

Dawn Primarolo: The Government introduced tax credits (working families tax credit, disabled person's tax credit and children's tax credit) in 1999. These were replaced in April 2003 by the new tax credits of working tax credit and child tax credit. There has been a steady increase in prosecutions brought by the Inland Revenue in each year since 1999 as shown in the table. A number of factors contribute to the significant increase in prosecutions:

As more people are eligible to benefit form the new generation of tax credits so there is more scope for fraudulent claims.

HMRC's tax fraud investigators have become increasingly proficient at discovering and preventing fraudulent tax credit claims.

There has been a lead in times from payments being issued, fraud identified and investigated to cases being taken through the court system.

Since the introduction of tax credits in 1999, the Inland Revenue (now HM Revenue and Customs) has prosecuted the following numbers of suspects.

	Number
1999–2000	0
2000–01	2
2001–02	28
2002–03	35
2003–04	59
2004–05	211

Valuation Office Agency

Mrs. Spelman: To ask the Chancellor of the Exchequer how many full-time equivalent staff of the Valuation Office Agency will be employed for the purposes of the council tax revaluation in *(a)* 2005–06 and *(b)* 2006–07. [7435]

Dawn Primarolo: The number of full-time, equivalent staff, employed by the Valuation Office Agency for the council tax revaluation process in England is:

(a) 2005–06: 1,610

(b) 2006–07: 1,419.

Work-related Stress

Lynne Featherstone: To ask the Chancellor of the Exchequer how many cases of work-related stress have been reported in his Department in each of the last three years; how much compensation was paid to employees in each year; how many work days were lost due to work-related stress in each year; at what cost; what procedures have been put in place to reduce work-related stress; at what cost; and if he will make a statement. [7874]

John Healey: The figures for reported cases of work-related stress in the department for the last three years are;

2002: 13 cases resulting in 467 workdays lost

2003: 22 cases resulting in 408 workdays lost

2004: 14 cases resulting in 139 workdays lost

There are no recorded cases of compensation being paid to employees for work-related stress.

A stress audit was carried out in the Treasury in 2000 at a cost of £20,000. To measure progress against the 2000 stress audit, a follow up well being survey was carried out in 2003 at a cost of £15,000. A staff group was set up to assess its recommendations and to take forward an action plan.

TRANSPORT

A39

Mr. Rogerson: To ask the Secretary of State for Transport what assessment he has made of the adequacy of the funding of the new section of the A39 at Camelford; and if he will make a statement. [7921]

Dr. Ladyman: The A39 Camelford Distributor Road was provisionally approved by the Department in December 2000 at a cost of £6.8 million subject to the completion of the relevant statutory procedures and final approval by Ministers.

We are aware that costs for the scheme have increased significantly and are now estimated to be £14.4 million.

We therefore asked Cornwall county council to critically review the current benefit and cost assessment of this scheme in order to satisfy themselves that the scheme can be delivered to minimal additional cost and with a robust BCR. They are currently undertaking this work and future progress of the scheme will depend on the results of this assessment.

A49

Daniel Kawczynski: To ask the Secretary of State for Transport what steps he is taking to reduce road accidents on the A49 between Ludlow and Shrewsbury. [7925]

Dr. Ladyman: A number of initiatives have been taken to address safety on the A49 and a Route Management Strategy (RMS) was published in December 2004.

The Highways Agency has recently completed two schemes:

A roundabout junction improvement at Craven Arms

Traffic signal improvements and a vehicle activated speed limit sign at Church Stretton.

A further scheme has been proposed to install a pedestrian crossing facility on the Ludlow Bypass.

In addition, studies have been proposed for 2005–06. These include:

An accident analysis at the Stapleton Crossroads junction south of Shrewsbury and the A49/B4361 junction at the southern end of the Ludlow Bypass

A speed management strategy study for the route as a whole.

Air Services/Travel

Mrs. James: To ask the Secretary of State for Transport what assistance the Government provide to regional airports to establish scheduled services. [7358]

Ms Buck: The Department for Transport does not directly provide any financial assistance to regional airports to establish regional air services. However, funding contributions can be made by the devolved Administrations and appropriate regional authorities in certain carefully defined circumstances, provided such funding complies with relevant EU state aid guidelines.

John Hemming: To ask the Secretary of State for Transport what discussions his Department has had with the Department for Environment, Food and Rural Affairs on the environmental impact of increasing capacity for air travel. [7729]

Ms Buck: The Air Transport White Paper, published in December 2003, set out an approach, agreed across Government, which provides a strategic framework for development of airport capacity, supporting economic prosperity, while managing and mitigating the environmental impacts of aviation. The Department for Transport and DEFRA keep in regular contact on aviation and environment issues.

Mr. Hands: To ask the Secretary of State for Transport what estimate he has made of how many extra aircraft *(a)* per day and *(b)* per night would (i) fly in and out of Heathrow airport and (ii) pass over Hammersmith and Fulham if the third runway is built at Heathrow. [5893]

Ms Buck: Assessments of the additional capacity of Heathrow airport with a short third runway were made in connection with the preparation of the Air Transport White Paper and are set out in the supporting paper "Passenger Forecasts—Additional Analysis" available on the DfT website. It is not possible to be specific about how many additional daily flights would pass over Hammersmith and Fulham, since arrival and departure patterns are subject to air traffic control and meteorological conditions. Night-time traffic would be constrained by the night flying restrictions applying at the time at Heathrow.

Dr. Cable: To ask the Secretary of State for Transport how many passengers transferred or transited at Heathrow between *(a)* two overseas destinations and *(b)* an overseas destination and a UK destination in each of the last five years. [6464]

Ms Buck: The following table shows passengers transferred at Heathrow between two overseas destinations, an overseas destination and a UK destination in each of the last five years.

Transfer and transit passengers at Heathrow, 2000–04

Million

	2000	*2001*	*2002*	*2003*	*2004*
Transfer					
International to International	13.7	13.7	16.4	16.4	17.3
International to Domestic	2.8	2.7	3.0	3.1	3.0
Domestic to International	2.4	2.3	2.9	3.4	2.9
Transit					
International to International	0.3	0.3	0.3	0.3	0.2

Aviation Policy

Mr. Peter Ainsworth: To ask the Secretary of State for Transport what recent representations he has received from the Sustainable Development Commission regarding the sustainability of the Government's aviation policies; and if he will make a statement. [7394]

Ms Buck: The Sustainable Development Commission have recently requested a meeting to discuss the proposals in their input to the Climate Change Programme Review. Their proposals include transport issues. A meeting will take place shortly.

Blue Badge Scheme

Mr. Burstow: To ask the Secretary of State for Transport what progress has been made in his review of the operation of the blue badge scheme. [8065]

Ms Buck: We are working to implement the recommendations for changes to the scheme made by our statutory advisers, the Disabled Persons Transport Advisory Committee.

These changes involve amendment to both primary and secondary legislation as well as further research in some areas and revised guidance to local authorities.

Primary legislation

Provision for a power to inspect blue badges has been made through Section 94 of the Traffic Management Act 2004. We will be consulting on the guidance for enforcement officers and badge holders during the

summer. The new power will be introduced later this year by commencement order once the necessary guidance is in place.

Two other changes have been included in the Disability Discrimination Act 2005. One to change the term 'institution' used in existing blue badge legislation to 'organisation' and another to allow for reciprocity with European Union member states and other countries. These measures are due to be introduced by commencement order at the end of June.

Secondary legislation

We are working on the recommendations requiring changes to regulations (including extending the scheme to children under the age of two and those with temporary disabilities) and we will consult on the draft regulatory package during the summer this year.

Research

We have recently let contracts for the following projects:

Feasibility study into setting up a national database of blue badge holders;

Looking into the independent mobility needs of certain groups of people (e.g. those with autism or mental health problems) to determine whether there is a need for extending the eligibility for a badge; and

Examination of the provision and use of parking spaces for disabled people in the central London area.

Two of the projects are scheduled for completion in December this year and the central London project in February next year, when final reports should be available.

Guidance

New guidance for issuing authorities and badge holders will be produced to cover all aspects of the scheme and issued when changes have been introduced.

Laptop Computers

Lynne Featherstone: To ask the Secretary of State for Transport how many laptop computers have been used by *(a)* Ministers, *(b)* special advisers and *(c)* officials in his Department in each year since 1995; how many have been (i) lost and (ii) stolen in that period; what the cost of the use of laptops in that period was; and if he will make a statement. [4116]

Ms Buck: The information requested on the use of laptop computers by officials in each year since 1995 is not available centrally or in the form requested, and could be provided only at disproportionate cost. The number of laptop computers available for use by Ministers, special advisers and their offices since the establishment of the Department for Transport on 29 May 2002 is as follows:

2002: 3 available for use by Ministers and their offices, 2 available for use by special advisers and their offices.

2003: 4 available for use by ministers and their offices, 2 available for use by special advisers and their offices.

2004: 4 available for use by Ministers and their offices, 2 available for use by special advisers and their offices.

2005: 4 available for use by Ministers and their offices, 2 available for use by special advisers and their offices.

Departmental records show the following numbers of lost or stolen laptop computers since the establishment of the Department for Transport on 29 May 2002:

	Lost	*Stolen*
Department for Transport	4	7
Driving Standards Agency	—	11
Highways Agency	1	10
Maritime and Coastguard Agency	6	5
Vehicle Certification Agency	—	2
Vehicle and Operator Services Agency	—	13

Railways

Miss McIntosh: To ask the Secretary of State for Transport when he expects a direct rail link between Thirsk and London to be established; and if he will make a statement. [7726]

Derek Twigg: The Office of Rail Regulation is examining an application from Grand Central Railway to operate a direct rail service from Sunderland to London Kings Cross calling at Thirsk and will announce its findings in due course.

Mr. Duncan: To ask the Secretary of State for Transport what plans his Department has for the future of sleeper train services in the UK; and if he will make a statement. [7105]

Mr. Darling: There is no general policy in relation to sleeper services. When considering the specification for each new franchise the value for money and affordability of all services currently provided by that franchise will be considered.

Mr. Duncan: To ask the Secretary of State for Transport how much money his Department has spent on preparatory work on light rail projects in *(a)* Manchester, *(b)* Liverpool, *(c)* Leeds and *(d)* Portsmouth. [7113]

Mr. Darling: My Department has provided £119 million to Greater Manchester Passenger Transport Executive towards the scheme costs for Phase III of Manchester Metrolink. An additional £80 million has been provided to allow GMPTE to buy out the concession for Metrolink.

We are providing £4.2 million towards the preparatory costs incurred for developing the Merseytram Line 1 proposal.

We have provided £6 million to West Yorkshire Passenger Transport Executive towards the scheme costs for Leeds Supertram proposal.

We have provided £3 million to the promoters of South Hampshire Rapid Transit towards the scheme costs.

Road Schemes

Mr. Maude: To ask the Secretary of State for Transport how much was spent on *(a)* capital projects, *(b)* maintenance and *(c)* improvement schemes on (i) motorways and (ii) trunk roads in (A) West Sussex,

(B) Kent, (C) Durham, (D) East Riding of Yorkshire and (E) each English county in each of the last eight years. [7968]

Dr. Ladyman: The information cannot be provided as records are not readily available in the format requested and could be obtained only at disproportionate cost.

David Davis: To ask the Secretary of State for Transport what the *(a)* cost and *(b)* location was of each by-pass scheme approved in each of the past 15 years. [6545]

Dr. Ladyman: The following table provides information on by-passes that have been fully approved through the Local Transport Plan programme or have entered the Highways Agency's Targeted Programme of Improvements. Information is not held on trunk road by-passes prior to 1997 and prior to 2000 for major local road schemes.

Scheme	*(b) Location*	*(a) Cost (£ million)*
Derby Southern By-pass and Derby Spur	Derbyshire	19.8
Blackburn Southern By-pass Contract I	Lancashire	66
Blackburn Southern By-pass Contract II	Lancashire	80
Stratton By-pass (DBFO)	Wiltshire/Gloucestershire	[1]104.6

Stations

Mr. Burstow: To ask the Secretary of State for Transport which train operating companies are participating in the secure station scheme. [8072]

Ms Buck: The following 19 train operating companies, including the London Underground, are participating in the secure stations scheme:

Arriva Trains Wales
C2C
Eurostar
First Great Western
Gatwick Station Services
GNER
London and Continental Stations and Property
London Underground—the Tube
Merseyrail
Midland Mainline
Northern Rail
Network Rail
One Railway
Serco Docklands Ltd
Silverlink
Southern
South West Trains
Thameslink
Virgin

Approximately two thirds of all overground rail journeys, one tenth of London Underground journeys and 90 per cent. of DLR journeys involve passengers starting or finishing their journey at a secure station.

Martin Linton: To ask the Secretary of State for Transport what discussions he has had with Network Rail in the last six months about upgrading stations; and if he will make a statement. [5682]

Derek Twigg: Ministers are exploring with Network Rail what the company might do proactively to further address capacity problems at the larger stations across the network by working with private developers to realise additional development gain. Network Rail advises that further proposals are anticipated for a number of London mainline stations in the near future and that it is working on next stage development projects for smaller stations. These schemes will require

works to Network Rail specification, but will build in scope for bidders to reduce the net cost by exploiting development potential.

Vehicle Registration

Mr. Burstow: To ask the Secretary of State for Transport what the penalties are for failing to have a V5C Vehicle Registration document; and from when they apply. [6720]

Dr. Ladyman: A keeper of a vehicle commits an offence for failing to produce a vehicle registration document (V5), or a vehicle registration certificate (V5C) for inspection, if required to do so at any reasonable time, to a police constable or a person acting on behalf of the Secretary of State. A vehicle keeper, if found guilty of this offence, is liable on summary conviction to a maximum fine of £500.

There is no specific penalty for not having the new vehicle registration certificate.

WORK AND PENSIONS

Council Tax

Alison Seabeck: To ask the Secretary of State for Work and Pensions if he will raise the lower earnings level at which council tax benefit starts to fall below the maximum to the level of the income tax personal allowance; and if he will estimate the cost of making such a change. [7271]

Mr. Plaskitt: An individual's earnings is only one of several factors affecting council tax benefit entitlement and we have no plans to make such a change.

Mr. Hands: To ask the Secretary of State for Work and Pensions what proportion of pensioner households paid *(a)* more than 5 per cent. *(b)* more than 10 per cent. and *(c)* more than 15 per cent. of their gross income in council tax in the most recent year for which figures are available. [6766]

Mr. Plaskitt: The proportion of pensioner households paying *(a)* more than 5 per cent. *(b)* more than 10 per cent. and *(c)* more than 15 per cent. of their household income in council tax for 2003–04, in Great Britain is presented in the following table:

Thresholds	*Percentage of pensioner households with spending on council tax bills as a proportion of household income above thresholds*
(a) 5 per cent.	47
(b) 10 per cent.	12
(c) 15 per cent.	3

Note:
Thresholds are calculated as quotients. The numerator 'council tax spent' is taken as the expenditure on council tax bill net of council tax benefit. The denominator is total household income net of council tax benefit.
Source:
Family Resources Survey (FRS), 2003–04

Home Responsibilities Protection

Vera Baird: To ask the Secretary of State for Work and Pensions whether a woman who works for a short time during a year when she is otherwise engaged in full-time child care is eligible for continued home responsibilities protection. [7331]

Mr. Timms: Yes, provided she is entitled to child benefit throughout the tax year.

Housing Allowance/Benefit

Jim Cousins: To ask the Secretary of State for Work and Pensions if he will list flat rate housing allowances in each of the allowance pilot areas; what uprating methods are used for each allowance; and how many claimants of each flat rate allowance there are in each pilot area. [6323]

Mr. Plaskitt: Local housing allowance rates are set according to broad rental market areas and the number of rooms a claimant is eligible to have under the size criteria.

Local housing allowance rates are reviewed monthly by The Rent Service and the amount of local housing allowance payable is the rate that applies at the date of claim for benefit. Local housing allowance is awarded for one year unless a relevant change of circumstances occurs and triggers an earlier review.

The information is in the tables.

Local housing allowance (LHA) rate in Pathfinder areas, by broad market rental area (BRMA) and by type of LHA—June 2005

Local authority statistical returns.

Mr. Paul Goodman: To ask the Secretary of State for Work and Pensions what safeguards are in place to protect vulnerable claimants in the housing benefit pathfinders; and if he will make a statement. [5460]

Mr. Plaskitt: One of the aims of the Local Housing Allowance (LHA) is to promote personal responsibility and financial inclusion. As such the majority of customers will receive their LHA direct, and make their own arrangements to pay their rent to their landlord.

However, in recognition of the risk that some tenants may struggle with this responsibility, safeguards have been put in place. Pathfinder authorities have the discretion to make the payment to the landlord in certain circumstances, where there is a history of vulnerability or failure to pay their rent.

The local authorities implementing LHA have received guidance on when paying LHA to the tenant is likely to be inappropriate, but have the discretion to decide each case on its merits.

In addition, current regulations allow for housing benefit to be paid directly to the landlord where a tenant accrues at least eight weeks rent arrears; this provision is extended to the LHA scheme.

Mr. Paul Goodman: To ask the Secretary of State for Work and Pensions what estimate he has made of the proportion of benefit claimants who have *(a)* lost and *(b)* gained as a result of the introduction of the local housing allowance, broken down by Pathfinder area; and how much on average such claimants have (i) lost and (ii) gained, broken down by Pathfinder area. [5461]

Mr. Plaskitt: There are no losers on the Local Housing Allowance in the Pathfinder areas. Claimants who would have been financially worse off under the Local Housing Allowance compared to the old housing benefit system are transitionally protected.

Information on those who are financially better off under the Local Housing Allowance compared to under the old housing benefit system is currently not available.

The Department has commissioned a comprehensive, independent evaluation of the Local Housing Allowance Pathfinders. This will provide information on the impact of the Local Housing Allowance, including information about gainers. The first interim findings of the evaluation are being published over the summer and the results of the final evaluation will be published at the end of next year.

Mr. Paul Goodman: To ask the Secretary of State for Work and Pensions what the average time taken to process a housing benefit claim was when a rent officer determination *(a)* was involved and *(b)* was not involved in the last period for which figures are available, broken down by local authority area. [5466]

Mr. Plaskitt: The information is not available.

Mr. Paul Goodman: To ask the Secretary of State for Work and Pensions what percentage of housing benefit claimants rent from the private sector in each of the housing benefit Pathfinder areas. [5471]

Mr. Plaskitt: The information is in the table.

Housing benefit private tenants[1] by Pathfinder—February 2005

Local authority	*All private[1] tenants*	*Percentage of total housing benefit recipients that are private[1] tenants*
Blackpool	9,100	62.1
Brighton and Hove	9,900	42.7
Conwy	2,700	39.9
Coventry	5,300	24.2
Edinburgh	7,300	21.5
Leeds	7,500	13.9
Lewisham	5,200	18.2
North East Lincoln	4,900	40.1
Teignbridge	2,500	44.3

[1] Excluding registered social landlords.

Notes:

1. The data refer to benefit units, which may be a single person or a couple.
2. The caseloads are rounded to the nearest hundred and percentages are given to one decimal place.
3. Figures for any non-responding authorities have been estimated.
4. Housing benefit figures exclude any extended payment cases.

Source:

Housing Benefit and Council Tax Benefit Management Information System Quarterly 100 per cent. caseload stock-count taken in February 2005.

Mr. Paul Goodman: To ask the Secretary of State for Work and Pensions how many housing benefit recipients in the pathfinder areas have built up rent arrears of eight weeks or more following the introduction of direct payment; in which pathfinder areas they are located; and what the total amount of arrears is in each pathfinder since the introduction of the local housing allowance. [5475]

Mr. Plaskitt: The information is not available for housing benefit. The available information for the local housing allowance is in the table.

Local housing allowance recipients in the pathfinder areas who built up rent arrears of eight weeks or more, February 2005

Pathfinder areas	*Number of LHA claimants*	*Number of LHA claimants with 8 weeks or more rent arrears*	*Proportion of LHA claimants with 8 weeks or more rent arrears (%)*
Blackpool	8,140	630	8
Brighton and Hove	8,210	200	2
Conwy	1,990	30	2
Coventry	3,600	100	3
Edinburgh	5,940	50	1
Leeds	5,900	280	5
Lewisham	3,670	190	5
North East Lincolnshire	4,220	110	3
Teignbridge	1,870	30	1
All pathfinders	4,540	1,620	4

Notes:

1. There are differences between local authorities in classifying rent arrears. Therefore, the data reported may be over or underestimate of the actual situation.
2. The reported percentages in pathfinder areas vary between 1 per cent. and 8 per cent. and the average may be over or under estimated.
3. The data reported is a snapshot (mid February 2005) and not a full count of a quarter.

Source:

DWP administrative data for Pathfinder areas. February 2005.

Mr. Paul Goodman: To ask the Secretary of State for Work and Pensions what the average standard housing allowances are in each of the housing benefit pathfinder areas, broken down by household type. [5478]

Mr. Plaskitt: The available information is in the table.

Average local housing allowance amount for claimants in each Pathfinder area broken down by household type

£ per week

	Couple (under 60) with children	*Couple (under 60) no children*	*Single (under 60) with children*	*Single (under 60) no children*	*Single pensioner*	*Couple pensioner*	*All*
Blackpool	114	79	105	72	75	79	86
Brighton	193	127	176	106	117	130	129
Conwy	96	71	89	62	65	68	73
Coventry	119	91	107	73	79	89	92
Edinburgh	171	111	147	94	99	114	120
Leeds	119	84	109	72	77	88	88
Lewisham	247	151	223	115	131	164	158

Average local housing allowance amount for claimants in each Pathfinder area broken down by household type

£ per week

	Couple (under 60) with children	*Couple (under 60) no children*	*Single (under 60) with children*	*Single (under 60) no children*	*Single pensioner*	*Couple pensioner*	*All*
North East Lincs	87	67	79	64	64	66	73
Teignbridge	126	87	114	75	81	82	95
All	144	94	129	88	89	91	105

Notes:
1. Household status refers only to the claimant.
2. Local housing allowance amount refers to the maximum amount a claimant is eligible to receive. The amount of benefit a claimant actually receives may differ because of their circumstances.
3. Due to data concerns the table does not include the full local housing allowance caseload.

Source:
DWP administrative data for Pathfinder data November 2004, DWP income support data October and November 2004, DWP pension credit data Nov 2004, DWP jobseeker's allowance data Nov 2004.

Mr. Paul Goodman: To ask the Secretary of State for Work and Pensions (1) what the level of *(a)* fraud and *(b)* error in housing benefit payments was as a percentage of housing benefit expenditure in each year since 1997; and what sums were involved in each case in each year, broken down by (i) region and (ii) local authority area; [5487]

(2) what the total amount of overpayments of housing benefit was in each year since 1997, broken down by region. [5452]

Mr. Plaskitt: The Department has undertaken continuous measurement of housing benefit fraud and error since 2002–03. The latest available headline information was published in the report "Fraud and Error in Housing Benefit, April 2002 to March 2004, Part One" on 24 February 2005.

Information is not available at local authority level. Information at regional level is contained within the supplementary report, "Fraud and Error in Housing Benefit, April 2002 to March 2004, Part Two", which was published on 26th May 2005.

Both reports are in the Library.

Mr. Laws: To ask the Secretary of State for Work and Pensions what plans he has for further changes to the single room rent restriction. [5630]

Mr. Plaskitt: There are no current plans to change the housing benefit single room rent restriction. However, under the local housing allowance, young people who would otherwise have been subject to the single room rent are entitled to the new shared room rate. This is based on a more generous definition than the existing single room rent.

The impact of this new rate will be assessed as part of the evaluation of the local housing allowance in nine pathfinder local authority areas. This evaluation will help inform national roll out.

Mr. Laws: To ask the Secretary of State for Work and Pensions what his most recent estimate is of the effect on the level of average housing benefit of the single room rent restriction. [5632]

Mr. Plaskitt: The information is not available in the format requested. However, as at February 2005 the average weekly housing benefit award for cases assessed under the single room rent was £48.73.

Jim Cousins: To ask the Secretary of State for Work and Pensions what the average housing benefit payment in each housing authority area in the North East was in November *(a)* 2000, *(b)* 2001, *(c)* 2002, *(d)* 2003 and *(e)* 2004. [6324]

Mr. Plaskitt: The information is in the table.

Average weekly amount of housing benefit in north-east local authorities: November 2000 to 2004

£

	2000	*2001*	*2002*	*2003*	*2004*
North East GOR	40.19	42.36	45.78	45.06	47.68
Alnwick	37.26	38.64	40.56	42.46	43.72
Berwick upon Tweed	36.27	38.66	40.14	42.25	43.78

Tynedale	38.41	41.46	43.99	45.79	47.14
Wansbeck	33.14	35.10	36.79	38.96	40.25
Wear Valley	39.15	41.10	45.45	45.34	46.85

Notes:
1. The data refer to benefit units which may be a single person, couple or family.
2. The figures are shown to the nearest penny.
3. Figures for any non-responding authorities have been estimated.
4. Housing benefit figures exclude any extended payment cases.

Source:
Housing Benefit and Council Tax Benefit Management Information System Quarterly 100 per cent. caseload stock-count taken November 2000 to 2004.

Sarah Teather: To ask the Secretary of State for Work and Pensions what the average time in England was for processing *(a)* initial housing benefit claims, *(b)* changes of circumstances in existing claims, *(c)* claims for council tax benefit and *(d)* changes of circumstances for council tax benefit, in the last year for which figures are available, broken down by local authority. [6415]

Mr. Plaskitt: The information has been placed in the Library.

Rent Arrears

Mr. Paul Goodman: To ask the Secretary of State for Work and Pensions (1) what the total amount of rent arrears of housing benefit recipients was in each year since 1997, broken down by local authority area; [5437]

(2) how many housing benefit recipients have been evicted for rent arrears in each year since 1997, broken down by local authority area; [5438]

(3) what estimate he has made of the number of households which accumulated rent arrears as a result of the time taken to process housing benefit claims in each year since 1997, broken down by local authority area. [5446]

Mr. Plaskitt: The information is not available.

Unemployment Levels

Mr. Laws: To ask the Secretary of State for Work and Pensions (1) what estimate he has made of the effect on levels of unemployment since 1997 of *(a)* the new deal and *(b)* Jobcentre Plus initiatives; and if he will make a statement; [814]

(2) what his estimate is of the effect of the new deal on the claimant count for unemployment; and if he will make a statement. [967]

Margaret Hodge: The development of Jobcentre Plus is building on the high quality service already provided by social security offices and Jobcentres. The new offices deliver a single, integrated service with a clear focus on work to all people of working age. As a result of a strong economy and our active labour market policies, we have record levels of employment and the lowest sustained levels of unemployment for 30 years. The new deal has helped well over a million people to find jobs, and is giving people in all areas of the country the help and support they need to move off benefits and into work.

The Jobcentre Plus client base has changed considerably over the past few years. Since May 1997 claimant unemployment has roughly halved and, as at April 2005, the UK claimant count stands at 839,400, down 782,200 (48 per cent.) since the 1997 election. The claimant unemployment rate is 2.7 per cent.; down 2.7 percentage points since the 1997 election.

ILO unemployment in the UK stands at 1.40 million (January-March 2005), down 654,000 (32 per cent.) since the 1997 election. The ILO unemployment rate is 4.7 per cent. down 2.5 percentage points since the 1997 election.

The number of lone parents on benefit is down 20 per cent. to 763,000. Youth claimant unemployment has fallen by two-fifths, to its lowest level for 30 years; the number of 18 to 24-year-old claimants unemployed for more than a year has fallen by over 90 per cent.; and long-term adult unemployment (two year plus) has been cut by three quarters to its lowest level for 30 years.

HOUSE OF COMMONS COMMISSION

Work-related Stress

Lynne Featherstone: To ask the hon. Member for North Devon, representing the House of Commons Commission how many cases of work-related stress have been reported among House staff in each of the last three years; how much compensation was paid to employees in each year; how many work days were lost due to work-related stress in each year; at what cost; what procedures have been put in place to reduce work-related stress; at what cost; and if he will make a statement. [7867]

Nick Harvey: The Parliamentary Occupational Health, Safety and Welfare Service (OHSWS) have been recording cases of work-related stress as a separate category from other cases of stress only since the latter part of 2003; therefore accurate statistics are only available for 2004. In that year six cases were dealt with, representing approximately 0.38 per cent. of the House work force. Subsequent benchmarking has confirmed this to be a relatively low figure. Departments of the House and the OHSWS have proactively sought to support such staff, and consequent absence from work has been low. Long-term absence has been the exception rather than the rule. In most cases of reported stress, work is one of a number of contributory factors, including personal problems. No cases have resulted in civil action and resultant compensation.

Over the past year OHSWS have been leading a review of how the House manages and supports staff concerning issues of stress and wellbeing. Extensive research, benchmarking and gap analysis shows that appropriate support mechanisms are in place for staff. The House is committed to continuous improvement and implementing best practice, and the arrangements for minimising, recognising and managing stress at work are currently under review.

No estimate has been made of the cost of days lost as a result of work-related stress, or of the measures to deal with it.

DEFENCE

Bullying/Harassment

Mr. Hancock: To ask the Secretary of State for Defence (1) how many of the complaints under Army redress procedures upheld or partially upheld between 1997 and 2003 related to issues of bullying or harassment; and how many *(a)* officers, *(b)* non-commissioned officers and *(c)* private soldiers were disciplined as a result; [2061]

(2) how many complaints have been considered by the Army Board from soldiers who are serving, or who have served, at *(a)* Deepcut Barracks and *(b)* ITC Catterick since 1997; and how many of these complaints related to issues of bullying or harassment. [2055]

Mr. Touhig: Bullying is not a criminal offence, nor a clearly defined form of behaviour; there are various definitions that cover all forms of harassment, abuse or intimidation. Furthermore, complainants do not use a

standard form of words and cases are recorded using the wording adopted by those making a complaint or seeking redress. Consequently, we are unable to identify every allegation, complaint or investigation that involves bullying without conducting a trawl of individual case records and archives, held in various databases and paper files. Our records do not lend themselves to the kind of analysis which these questions demand. Essentially, we would need to examine every case considered by the Army Board and make a judgment as to whether bullying or harassment were significant factors in the complaint. This would be extremely time consuming and it may not be immediately apparent whether this is the case or not. The scope for interpretation may also be quite wide. However, we have undertaken a rudimentary electronic search of our databases and spreadsheets to ascertain which complaints record allegations of bullying or harassment. This has highlighted eight cases, none of which relate to complaints upheld or partially upheld, by the Army Board.

None of the eight cases referred to relate to incidents alleged to have taken place at either Deepcut or Catterick.

Dentistry

Mike Penning: To ask the Secretary of State for Defence if he will make a statement on the availability of military dental practitioners in the services to practise on reserve forces personnel; and whether his Department's policy has changed on the use of military dental practitioners by reserve forces personnel. [5320]

Mr. Touhig: Reserve forces personnel are entitled to treatment on operations and exercises and during periods of military training. Dental teams are established at Chilwell to undertake initial dental examination and to provide urgently required treatment (if time allows) for reserve forces personnel called forward for deployment. There is no spare capacity within the Defence Dental Services to routinely treat reserve forces personnel.

Military Readiness

Mr. Robathan: To ask the Secretary of State for Defence if he will make a statement on the finding of the National Audit Office report Assessing and Reporting Military Readiness, paragraph 2.22, concerning the land contribution to any Joint Rapid Reaction Force; what land contribution the UK is able to make to such a force; what units are potentially available at the moment in extremis; and what limitations are being imposed by the factors mentioned in the paragraph. [7550]

Mr. Ingram: It is accepted that our continued commitment to operations in Iraq is impacting on the Army's ability to recuperate all land elements of the Joint Rapid Reaction Force (JRRF). Under routine circumstances, the Army would maintain the following contingent land forces: a brigade sized grouping held at High Readiness; and two Strategic Reserves—the Spearhead Land Element (SLE) held at Extremely High Readiness and the Airborne Task Force (ABTF) held at Very High Readiness.

Since Operation Telic commenced the High Readiness Brigade has been routinely deployed to Iraq and has therefore been unavailable to the JRRF. Nonetheless, the SLE and ABTF have been maintained throughout.

Napalm Weapons (RAF Fairford)

Mr. Drew: To ask the Secretary of State for Defence if he will ensure that United States planes flying out of RAF Fairford do not use MK 77 napalm weapons. [7275]

John Reid: The operational use of the United Kingdom bases, including RAF Fairford, by the United States forces is a matter for joint decision by the UK and US Governments. It is not our practice to speculate or comment on specific aspects, such as weapons systems.

RAF Relocations

Mr. Gerald Howarth: To ask the Secretary of State for Defence what the cost will be of the re-locations of other service units located at RAF Innsworth following the relocation of Personnel and Training Command to RAF High Wycombe; and if he will list the proposed locations of these units. [6709]

Mr. Ingram: An element of the Armed Forces Personnel Administrative Agency (AFPAA) is located at RAF Innsworth. AFPAA are carrying out a separate investment appraisal into the options for their relocation from Innsworth. The results of this will not be known before the end of the year.

Regimental Uniforms

Ann Winterton: To ask the Secretary of State for Defence pursuant to the answer of 24 May 2005, *Official Report*, column 56W, on regimental uniforms, what the life expectancy is of each uniform; what the initial outfit allowance is for the *(a)* English, *(b)* Welsh and *(c)* Scottish Infantry regiments; when the last increase in initial outfit allowance was made; and what the previous allowance was. [3254]

Mr. Touhig: An Officers' Outfit Allowance is awarded on commissioning to allow officers to purchase their first uniform. Officers joining the majority of English and Welsh infantry regiments receive the standard allowance of £2,122.

For those joining certain regiments the allowance is adjusted in line with the type, and therefore cost, of their uniform, which varies across the Infantry. Those English, Welsh and Scottish infantry regiments where the Officers' Outfit Allowance differs from the standard rate are the Foot Guards (£2,774), the Lowland Regiments (£2,057), the Highland Regiments (£2,510), the Royal Regiment of Fusiliers and the Parachute Regiment (both £2,032).

The Officers' Outfit Allowance was raised to its current level in 1994. Before this all newly commissioned officers into the infantry regiments received an allowance of £1,945 with the exception of those joining the Foot Guards (£2,706), the Lowland Regiments (£1,930) and the Highland Regiments (£2,330).

Officers' uniforms do not have a specific life expectancy as such. All uniforms are chosen on the basis that they are hard wearing and suitable for the tasks demanded of them. Officers are expected to keep their uniform in good order and maintain and replace accordingly. To do this an annual tax credit is awarded, based on the initial Outfit Allowance. This allows officers to purchase a new Service uniform approximately every five years.

Trafalgar Class Vessels

Mr. Hancock: To ask the Secretary of State for Defence pursuant to the answer of 13 June 2005, *Official Report*, column 18W, on Trafalgar Class Vessels, what the theoretical safety concern and safety justification involved were; and if he will make a statement. [6035]

Mr. Ingram: It is an essential, mandatory and routine requirement to operate a Royal Navy nuclear submarine, that a safety justification is maintained which demonstrates it is safe to do so. This requires any issues potentially affecting the safe operation of the submarine, including theoretical ones, to be considered.

The theoretical safety concern on HMS Torbay and HMS Tireless centred on the potential effect of a number of small manufacturing imperfections in their nuclear reactor plant. A previous analysis had indicated that these imperfections were acceptable but a more modern analysis, using the latest information on material properties and component stress values, showed an increased theoretical risk of failure in some of these components. While there was no new defect, as part of the Royal Navy's commitment to safety, the decision was taken that the two submarines should not be operated further until the technical aspects had been fully examined and their continued safe operation could be justified. For HMS Torbay a safety justification is now in place to allow the operation of her nuclear reactor plant. The safety justification work required for HMS Tireless will be undertaken during her programmed maintenance and upgrade period, which is under way at Devonport.

TRADE AND INDUSTRY

Airbus A350

Richard Burden: To ask the Secretary of State for Trade and Industry what assessment he has made of the requests he has received regarding launch investment for the development of the Airbus A350; what assessment he has made of the implications of this project for the UK economy; and if he will make a statement. [7297]

Ian Pearson: Airbus UK has formally submitted an application for launch investment, the terms of which are strictly confidential. It would not be appropriate to make a statement at this stage.

Broadband (East Sussex)

Gregory Barker: To ask the Secretary of State for Trade and Industry what representations he has received regarding broadband access in East Sussex; and if he will make a statement. [7855]

Alun Michael: I am not aware of any recent correspondence relating specifically to East Sussex, though there is considerable correspondence about broadband. Great progress has been made in terms of broadband across the country, by the end of this summer over 99 per cent. of the population will have access. Activity to address the remaining gaps in coverage is taking place regionally.

I am pleased to say that access in East Sussex is extensive. All telephone exchanges except one are enabled for broadband and that one (Isfield) has a commercial wireless service which was installed about a month ago.

MG Rover

Charles Hendry: To ask the Secretary of State for Trade and Industry if he will publish *(a)* the written recordings of conversations and *(b)* correspondence between (i) Ministers and (ii) officials from his Department and senior members of MG Rover's management that took place in the week commencing Monday 4 April. [5867]

Ian Pearson: It would be inappropriate to release this information at this time as it would breach commercial confidentiality and may prejudice the position of the administrators.

Charles Hendry: To ask the Secretary of State for Trade and Industry whether *(a)* he and *(b)* officials in his Department are in continuing discussions with the Shanghai Automotive Industry Corporation. [5872]

Ian Pearson: Since SAIC made it clear they were not interested in pursuing a deal in the week following MG Rover's entry into administration, there has been no contact with SAIC by the Secretary of State or DTI officials as regards MG Rover.

Charles Hendry: To ask the Secretary of State for Trade and Industry whether he is in continuing discussions with the former senior managers of MG Rover. [5873]

Ian Pearson: There has been no ongoing contact between the Secretary of State and the former directors of Phoenix Venture Holdings since MG Rover's entry into administration.

Charles Hendry: To ask the Secretary of State for Trade and Industry what assessment he has made of the impact of the collapse of MG Rover on Rover dealerships; and if he will make a statement. [5874]

Ian Pearson: The collapse of MG Rover has had a devastating effect on MG Rover retailers. In response to this a sub-Group of the MG rover task force was set up. The sub-Group is chaired by Digby Jones, director general of the CBI and its membership is drawn from senior industry figures, the key trade associations, and Government officials. The sub-Group's role is to consider the impact of recent events on franchised dealerships and other retailers and service providers in the retail automotive sector. Progress to date includes:

Advantage West Midlands have agreed to extend access to the Advantage Transition Bridge Fund' to franchised dealers. Loans of £50,000 to £500,000 will be available to those facing financial difficulty and having a viable recovery plan but insufficient finance from normal sources to implement it;

HM Revenue and Customs are now applying the same approach to retailers as to suppliers as regards 'time to pay agreements' on VAT and PAYE, including to address the impact of VAT payable on bad debt. This includes pro-active calls to vulnerable retailers to discuss possible assistance;

The Learning and Skills Council are ensuring that apprentices released by MGR retailers will be found alternative placements and funding;

Job Centre Plus has agreed that those made redundant from retailers will be provided with their enhanced rapid response service, as being provided to MGR employees and those of suppliers; and

Business Link has confirmed that they stand ready to provide business planning and other advice to the retail sector via their regional network

The sub-Group continues to meet to monitor the situation and make recommendations to the Secretary of State on appropriate action to address the particular circumstances of the retail sector.

Charles Hendry: To ask the Secretary of State for Trade and Industry if he will publish the findings of the Financial Reporting Council concerning MG Rover; and if he will make a statement. [5875]

Ian Pearson: I refer the hon. Member to the answer I gave to my hon. Friend the Member for Birmingham, Selly Oak (Lynne Jones) on 15 June 2005, *Official Report*, column 412W.

Permanent Secretary

Mr. Willetts: To ask the Secretary of State for Trade and Industry what the reasons were for the decision by his Department in February to delay the appointment of a permanent secretary until later in the year; whether this decision was announced publicly; and when he expects to announce the appointment of a new permanent secretary. [6639]

Mr. Hutton: I have been asked to reply.

The decision not to appoint was taken in light of the need to consider the broader picture of permanent secretary moves over the summer including the retirement of Sir Andrew Turnbull. Both No. 10 and Department of Trade and Industry issued press notices on 8 February 2005. The appointment will be settled in the next few months.

HOME OFFICE

Crime (Middlesbrough)

Dr. Kumar: To ask the Secretary of State for the Home Department how many cases of identity fraud have been recorded in Middlesbrough South and East Cleveland constituency in each of the last three years. [5903]

Andy Burnham: Offences of identity fraud cannot be separately identified in the recorded crime series and the information requested is therefore not available centrally.

Identity Cards Bill

David Howarth: To ask the Secretary of State for the Home Department whether a registered person would have the right to see the audit trail of information held on him under Schedule 1, paragraph 9 of the Identity Cards Bill. [6785]

Andy Burnham *[holding answer 23 June 2005]*: Schedule 1, paragraph 9 of the Identity Cards Bill allows for a record of every occasion on which information has been provided to a third party, and details of who that third party was, to be kept on the National Identity Register.

Private organisations requesting verification of identity from the National Identity Register can only do so with the consent of the registered individual. Information can only be supplied without consent in the specific circumstances outlined in Cl. 19-23 of the Identity Cards Bill.

The individual will always have subject access rights under the Data Protection Act 1998, subject to any exemptions within that Act, to information in their entry. This would include the information held on that individual under Schedule 1, paragraph 9 of the Identity Cards Bill.

David Howarth: To ask the Secretary of State for the Home Department for what percentage of persons registered in the National Identity Register he estimates *(a)* no biometric information and *(b)* no biometric information other than the face biometric would be recorded, broken down by (i) ethnicity, (ii) socio-economic group, (iii) occupation and (iv) age. [6786]

Andy Burnham: As biometric technology is constantly evolving and improving, it is not possible to give a precise estimate until technology performance requirements are established and equipment is procured for the Identity Card Scheme. The most recent research figures are from the UKPS biometric trial. However, this was not intended as a test of technology and the equipment used will have evolved significantly by the time the Identity Cards Scheme is introduced. Nevertheless, the trial did demonstrate that the number unable to record any biometric information is statistically small and special arrangements, including improved enrolment facilities are being considered for this group. Specifically, the result of this trial demonstrated that, of the total sample, 99.954 per cent. of participants could successfully record at least one biometric successfully. 0.29 per cent. of the entire sample were only able to record the facial biometric on its own. The following tables show the enrolment rates broken down by ethnicity, age and socio-economic group. References in the tables to the face failure rate refers only to the first attempt—virtually all individuals were successful after multiple attempts but these figures are not available in the report. The iris and fingerprint figures were for multiple attempts. In addition, the trial results provided some breakdowns for successful enrolment of each individual biometric by ethnicity, socio-economic group and age, although no breakdown provided for the provision of all three and there is no breakdown by occupation. Nor were there breakdowns for the requested groups for those who could provide no biometric information other than face. The relevant information which was recorded during the trial is shown in the following tables. Reference to face failure

rate refers to only the first attempt—virtually all were successful after multiple attempts but no figures were provided in the evaluation report.

Successful enrolment rates

Ethnicity	*Percentage* *Fingerprint*	*Iris*	*Face*
Asian	99.07	88.09	96.91
Black	97.72	81.01	93.06
Chinese/East Asian	100.00	85.05	95.50
White	99.37	91.33	95.24
Other	99.25	90.11	96.22

Note:
Figures from Quota and Opportunistic Groups

Age	*Percentage* *Fingerprint*	*Iris*	*Face*
18–24	98.96	90.89	97.63
25–34	99.10	93.48	97.16
35–44	99.46	94.41	95.89
45–54	99.46	92.23	95.58
55–59	99.07	91.31	95.06
60–64	99.41	86.81	94.92
65 plus	99.32	78.27	95.95

Note:
Figures from Quota and Opportunistic Groups

Socio-economic group	*Fingerprint percentage*
A	100.00
B	98.70
C1	98.39
C2	99.48
D	98.00
E	97.30

Notes:
1. Figures for Quota Group only.
2. Iris and face successful enrolment rates broken down by socio-economic group were not part of the terms of reference for this part of the study.

Unsuccessful enrolment rates

Ethnicity	*Percentage* *Fingerprint*	*Iris*	*Face*
Asian	0.93	11.91	3.09
Black	2.28	18.99	6.94
Chinese/East Asian	0.00	13.95	4.50
White	0.63	8.67	4.76
Other	0.75	9.89	3.78

Note:
Figures from Quota and Opportunistic Groups.

Age	*Percentage* *Fingerprint*	*Iris*	*Face*
18–24	1.04	9.11	2.37
25–34	0.90	6.52	2.84
35–44	0.54	5.59	4.11
45–54	0.54	7.77	4.42
55–59	0.93	8.69	4.94
60–64	0.59	13.19	5.08
65 plus	0.68	21.73	4.05

Note:
Figures from Quota and Opportunistic Groups

Mobile Fingerprint Technology

Ms Butler: To ask the Secretary of State for the Home Department what plans the Department has to enable the police to fit mobile fingerprint technology to their vehicles. [4411]

Hazel Blears: Work on introducing mobile fingerprint technology and fitting them to police vehicles is being taken forward by the Police Information Technology Organisation (PITO) in conjunction with the police service. At present an operational demonstrator has been fitted to a number of vehicles in a pilot force.

Muggings

John Hemming: To ask the Secretary of State for the Home Department how many people in each year since the introduction of the Crime and Disorder Act 1998 in each age cohort under the age of 18 have been issued with reprimands or final warnings for muggings; and how many of those have later been convicted of another offence. [3796]

Hazel Blears: It is not possible to distinguish 'muggings' from other forms of robbery. Available information from the Home Office Court Proceedings database on the number of persons in each age cohort under the age of 18 who have been issued with a reprimand or final warning since the introduction of the Crime and Disorder Act 1998, for robbery are contained in the table. It is not possible to identify those offenders who have then later been convicted of another offence. Statistics for 2004 will be available in the autumn.

Number of juveniles issued with a reprimand or final warning for robbery, by age cohort, England and Wales 1999–2003[1]

Offence: Robbery *Statute: Theft Act 1968 Sec 8*	*Age cohorts* *10–11 years*	*12–14 years*	*15–17 years*
1999	53	233	191
2000	66	266	187
2001	39	228	195
2002	36	182	121
2003	44	188	128

[1] These data are on the principal offence basis

Recreational Drugs

Dr. Kumar: To ask the Secretary of State for the Home Department what research he has *(a)* commissioned and *(b)* evaluated concerning the effects of using Viagra as a recreational drug along with amyl nitrates. [5852]

Jane Kennedy: I have been asked to reply.

Before a medicine can be marketed in the United Kingdom, the manufacturer is required to conduct extensive clinical trials, the results of which are carefully evaluated by the Medicines and Healthcare products Regulatory Agency on behalf of the Licensing Authority. The Licensing Authority decides whether a marketing authorisation (product licence) can be granted and is advised on this matter by an independent advisory body, the Committee on Safety of Medicines. As independent experts, they undertake a thorough examination of the extensive scientific and technical information supplied in support of the application.

The manufacturer, in conjunction with the Licensing Authority, has provided guidance on prescribing and use of Viagra in the summary of product characteristics for healthcare professionals and patient information leaflet (PIL) for patients. These documents provide full up-to-date information on correct use of Viagra, including contraindicating (prohibiting) the use of Viagra in combination with nitrates. The PIL states:

"Do not take Viagra if you are taking medicines containing nitrates, or nitric oxide donors such as amyl nitrite ("poppers"). Viagra can cause a serious increase in the effects of these medicines. Tell your doctor if you are taking any of these medicines."

CABINET OFFICE

DirectGov

Rosie Cooper: To ask the Chancellor of the Duchy of Lancaster if he will make a statement on the launch of the DirectGov internet portal for Government services. [7897]

Mr. Jim Murphy: I refer the hon. Member to the response I gave the hon. Member for Loughborough (Mr. Reed) on 28 June 2005, *Official Report*, column 1387W.

Laptop Computers

Lynne Featherstone: To ask the Chancellor of the Duchy of Lancaster how many laptop computers have been used by *(a)* Ministers, *(b)* special advisers and *(c)* officials in his Department in each year since 1995; how many have been (i) lost and (ii) stolen in that period; what the cost was of the use of laptops in that period; and if he will make a statement. [4125]

Mr. Hutton: The number of laptops used, lost and stolen in the Department in the period 2000 to 2004 are shown in the table.

	Number used	*Number lost*	*Number stolen*
2000	222	0	0
2001	540	0	1
2002	629	0	0
2003	731	6	3
2004	813	2	4

In addition the Cabinet Office Ministerial Support Group currently has a pool of 12 laptops for the use of Ministers, special advisers and officials within the group.

FOREIGN AND COMMONWEALTH OFFICE

Antarctic Consultative Meeting (Swedish Proposal)

Norman Baker: To ask the Secretary of State for Foreign and Commonwealth Affairs what policy positions the Government advocated at the 28th Antarctic Consultative Meeting, with particular reference to the Swedish proposal regarding the remedying of pollution. [5879]

Mr. Douglas Alexander *[holding answer 20 June 2005]:* A new annex on Liability Arising from Environmental Emergencies to the Protocol on Environmental Protection to the Antarctic Treaty was adopted at the 28th Antarctic Treaty Consultative Meeting, held this year in Stockholm from 6 to 17 June 2005.

This new annex has been the subject of negotiations among Antarctic Treaty Consultative Parties for the past 12 years. The UK has been actively and constructively engaged in all negotiations and is fully committed to the implementation of the new annex.

UK-led initiatives on other issues that were agreed in Stockholm included Site Guidelines for Visitors to Antarctica and a Management Plan for Deception Island.

Bosnia and Herzegovina

Mr. Martyn Jones: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on the prevalence of provocative nationalism by local authorities in Bosnia and Herzegovina. [6738]

Mr. Douglas Alexander: Nationalist sentiments among all three constituent peoples in Bosnia and Herzegovina (BiH) continue to obstruct the reform process, notably on public broadcasting, police restructuring and defence reform, all of which are requirements for BiH's further progress towards the European Union and NATO. We have made representations to the Bosnian authorities about the need to tackle this problem.

As we approach the 10th anniversary of the Srebrenica massacre, it is important that the constituent peoples of BiH and all the countries of the region turn away once and for all from nationalism and work to promote lasting reconciliation.

Mr. Martyn Jones: To ask the Secretary of State for Foreign and Commonwealth Affairs what his assessment is of the rate of return of displaced groups to their homes in Bosnia and Herzegovina. [6739]

Mr. Douglas Alexander: According to the Office of the United Nations High Commissioner for Refugees' (UNHCR) figures, the rate of return of displaced persons to their pre-war homes has dropped in the last five years, as most of those willing to return have now done so. The overall number of returns has, however, continued to increase slowly. By September last year, a million refugees and displaced people had returned to their homes, from an estimated 2.2 million displaced by the conflict of the 1990s.

Mr. Martyn Jones: To ask the Secretary of State for Foreign and Commonwealth Affairs what assessment he has made of the segregation of minority returnees in Bosnia and Herzegovina. [6740]

Mr. Douglas Alexander: Of the approximately one million refugees and displaced people who had returned to their pre-war homes by January 2005, over 450,000 had returned to areas where they were not the ethnic majority. But there is more work to be done. Some minority returnees still face discrimination in access to jobs in public services and private employment and to education, health and social security. The failure to bring to justice all war crimes indictees has also reduced confidence in the return process. Economic development remains a priority to ensure the sustainable return of minority returnees.

Burma

Daniel Kawczynski: To ask the Secretary of State for Foreign and Commonwealth Affairs what recent discussions he has held with the Burmese authorities on encouraging increased democracy in Burma; and if he will make a statement. [7907]

Ian Pearson: I refer the hon. Member to the reply I gave to the hon. Member for Buckingham (John Bercow) on 25 May 2005, *Official Report*, column 132W.

Burundi

Mark Simmonds: To ask the Secretary of State for Foreign and Commonwealth Affairs what assistance the Government provides to the Regional Peace Initiative for Burundi; and if he will make a statement. [7362]

Ian Pearson: The Regional Peace Initiative for Burundi (RPI) is chaired by Ugandan President Museveni and comprises representatives of the Governments of Ethiopia, Kenya, Rwanda, Somalia, South Africa and Tanzania. The Government of Burundi, the African Union and the UN are party to its discussions. It meets on an ad hoc basis.

The UK and EU partners provide political support to the RPI, and provide development support to Burundi in order to help it carry out the recommendations of the RPI. Total UK development assistance to Burundi in financial year 2005–06 will be around £10 million.

EU Committees

Angus Robertson: To ask the Secretary of State for Foreign and Commonwealth Affairs how many times during the *(a)* Italian, *(b)* Irish and *(c)* Dutch Presidency of the EU the (i) Joint Committee (EEC-India), (ii) Joint Committee (EC-Laos) and (iii) Joint Committee (EEC-Macao) met; when and where these meetings took place; what UK Government expert was present; and if he will make a statement. [573]

Mr. Douglas Alexander: The EEC-India Joint Committee met once under the Dutch Presidency on 10 September 2004 in Brussels. It did not meet under the Italian or Irish Presidencies.

The EEC-Laos Joint Committee met once under the Irish Presidency on 7 Jan 2004 in Vientiane. It did not meet under the Italian and Dutch Presidencies. The EEC-Macao Joint Committee met once under the Irish Presidency on 3 March 2004 in Macao. It did not meet during the Italian or Dutch Presidencies. These are Commission led groups, which the Presidency of the day attends as observers only, representing other member states. As such there were no British officials present at these meetings.

Angus Robertson: To ask the Secretary of State for Foreign and Commonwealth Affairs how many times during the *(a)* Italian, *(b)* Irish and *(c)* Dutch presidency of the EU the (i) EEC-Mercosur Joint Advisory Committee, (ii) Joint Committee (EEC-Argentina) and (iii) Joint Committee (EEC-Brazil) met; when and where these meetings took place; what UK Government expert was present; and if he will make a statement. [627]

Mr. Douglas Alexander: The EEC-Mercosur Joint Advisory Committee did not meet under the Italian, Irish or Dutch presidencies. The EEC Argentina Joint Committee met once during the Dutch presidency on 13 December 2004 in Buenos Aires. The UK was represented by staff of the British embassy in Buenos Aires. It did not meet under the Italian or Irish presidencies. The EEC-Brazil Joint Committee did not meet during the Italian, Irish or Dutch presidencies.

Angus Robertson: To ask the Secretary of State for Foreign and Commonwealth Affairs how many times during the *(a)* Italian, *(b)* Irish and *(c)* Dutch presidency of the EU the (i) Joint Committee (EEC-Vietnam), (ii) Joint Committee (EEC-Central America) and (iii) Joint Committee (EEC-Mexico) met; when and where these meetings took place; what UK Government expert was present; and if he will make a statement. [632]

Mr. Douglas Alexander: The EEC-Vietnam Joint Committee met once during the Italian presidency on 21 November 2003 in Brussels. This is a Commission led group, which the presidency of the day attends as observer only, representing other member states. As such there were no British officials present at these meetings. It did not meet under the Irish or Dutch presidencies of the EU. The EEC-Central America Joint Committee met once during the Italian presidency on 3 October 2003 in Brussels. The UK was represented by staff from the UK representation in Brussels. It did not meet under the Irish or Dutch presidencies. The EEC-Mexico Joint Committee met twice, once under the Italian presidency on 11 November 2003 in Brussels and once during the Dutch presidency on 10 November 2004 in Mexico. The UK was represented at the 2003 meeting by staff from the UK representation in Brussels and at the 2004 meeting by staff from the British embassy in Mexico City. It did not meet during the Irish presidency.

Angus Robertson: To ask the Secretary of State for Foreign and Commonwealth Affairs how many times during the *(a)* Italian, *(b)* Irish and *(c)* Dutch presidency of the EU the (i) Joint Committee (EEC-Nepal), (ii) Joint Committee (EEC-Pakistan) and (iii) Joint Committee (EEC-Sri Lanka) met; when and where these meetings took place; what UK Government expert was present; and if he will make a statement. [635]

Mr. Douglas Alexander: The EEC-Nepal Joint Committee met once under the Dutch presidency in September 2004 in Kathmandu. It did not meet under the Italian or Irish presidencies. The EEC-Pakistan Joint Committee did not meet under the Italian, Irish or Dutch presidencies. The EEC-Sri Lanka Joint Committee met once under the Dutch presidency on 29 October 2004 in Brussels. No meetings took place during the Italian or Irish presidencies. These are Commission led groups, which the presidency of the day attends as observers only, representing other member states. As such there were no British officials present at these meetings.

EU Constitution

Mr. Davidson: To ask the Secretary of State for Foreign and Commonwealth Affairs (1) whether it is his policy that the creation of an EU External Action

Service, as proposed in Article III-296(3) of the Treaty Establishing a Constitution for Europe, could be agreed without ratification of the Treaty; [4220]

(2) pursuant to his statement of 6 June 2005, *Official Report*, column 1000, on the EU Constitutional Treaty, whether it is his policy that the changes to the system of qualified majority voting proposed in the Treaty Establishing a Constitution for Europe, could be agreed without ratification of the Treaty; [4221]

(3) whether it is his policy that the creation of a President of the EU, as proposed in the Treaty Establishing a Constitution for Europe, could be agreed without ratification of the Treaty. [4894]

Mr. Douglas Alexander: The creation of a President of the EU as proposed in the Treaty Establishing a Constitution for Europe, the changes in respect of the voting system and the provision of an EU External Action Service could not be agreed without ratification of the Treaty or of an amendment of the existing EU Treaties by all the member states in accordance with their respective constitutional requirements.

EU Linguistic Regime

Mr. MacNeil: To ask the Secretary of State for Foreign and Commonwealth Affairs whether the Government will implement the EU linguistic regime, agreed at the General Affairs Council of 13 June, with respect to any of the UK's languages in addition to English. [6979]

Mr. Douglas Alexander *[holding answer 27 June 2005]:* The General Affairs and External Relations Council of 13 June adopted conclusions, on a proposal from Spain, for a degree of official recognition in the EU of all languages that have official status in member states, either through their constitutions or national law. This means that member states may enter into administrative arrangements with the EU institutions over which languages may be used in relations with them, with the member state meeting all the direct or indirect costs incurred. Member states have agreed that any such arrangement should not have any effect on the otherwise efficient functioning of the institutions or on the legal status of the existing official languages of the Union. At the moment, Spain is the only country to have requested such arrangements for its regional languages. The Government have no current plans to make similar provisions for UK languages.

European Parliament

Mr. Brady: To ask the Secretary of State for Foreign and Commonwealth Affairs pursuant to the oral answer, of 21 June 2005, *Official Report*, column 653, on European Union (Finances), whether it is his Department's policy that the European Parliament should continue to meet in Strasbourg; and if he will make a statement. [6977]

Mr. Douglas Alexander *[holding answer 27 June 2005]:* Strasbourg was chosen as a site for the European Parliament (EP) in 1958, well before the UK joined the EU. It was chosen as a symbol of Franco-German reconciliation. While the Government believe that the splitting of the EP's sites is far from ideal, any change to the status quo would need the unanimous agreement of all 25 member states. That looks unlikely for the foreseeable future.

Human Rights

Dr. Starkey: To ask the Secretary of State for Foreign and Commonwealth Affairs whether the informal meeting of EU Foreign Ministers in South Wales on 1–2 September will include discussion of pan-European attitudes to human rights. [6847]

Mr. Douglas Alexander: The agenda for the meeting has not yet been set.

IT Contracts

Mr. Godsiff: To ask the Secretary of State for Foreign and Commonwealth Affairs what the *(a)* projected cost at the time of tender and *(b)* actual cost at the time of completion was for each IT contract commissioned by his Department in the last five years. [2577]

Mr. Straw: The Foreign and Commonwealth Office (FCO) has a devolved procurement structure covering the UK and its overseas posts (over 200). As such there is no central database of all the Information Communication Technology (ICT) contracts in the FCO. We have recently installed a new Electronic Resource Management (ERM) system in London and are in the process of installing this system in all our posts overseas. Until this is complete, and our new reporting systems are in place, we are unable to produce the information requested without exceeding the disproportionate cost threshold. We are, however, able to provide information on our major ICT contracts (in excess of £1 million) as required by the question. A full list of contracts, including costs, will be made available in spreadsheet format to the Library of the House.

Moldova

Mr. Hancock: To ask the Secretary of State for Foreign and Commonwealth Affairs what plans he has to visit Moldova. [6478]

Mr. Douglas Alexander: Foreign engagements for my right hon. Friend the Foreign Secretary and other Ministers are kept under constant review. It is not our practice to announce such visits until they are firm. Because of the unpredictable nature of world events, final decisions on overseas visits are often not possible until very shortly before the day of travel.

Russia

Mr. Arbuthnot: To ask the Secretary of State for Foreign and Commonwealth Affairs what recent meetings he has had with Russian authorities to discuss British investment in Russia; and if he will make a statement. [6704]

Ian Pearson: My right hon. Friend the Foreign Secretary has not recently met with Russian authorities to discuss British investment in Russia.

However Russia offers many investment opportunities. Some notable UK investments include BP's $6.75 billion joint ventures with the Russian oil company TNK, Pilkington's €165 million investment to build a glass production plant in Moscow and Shell's

operation in the $10 billion Sakhalin II project. Total foreign direct investment into Russia was $40.9 billion, a 36.4 per cent. increase on 2003, of which $7 billion is attributed to the UK.

Mr. Arbuthnot: To ask the Secretary of State for Foreign and Commonwealth Affairs what recent representations his Department has received about media independence in Russia; and if he will make a statement. [6705]

Mr. Douglas Alexander: Since June 2004, the Foreign and Commonwealth Office (FCO) has received one letter about the murders of journalists in Russia and three parliamentary questions about media freedom in the Russian Federation. The FCO's contacts with the NGO community reinforce the conclusion that media freedom is an important issue in the democratic development of Russia.

We are actively engaged in a bilateral human rights dialogue with the Russian Government. The latest round of talks was held in Moscow on 23 May 2005 and included discussion of media freedom in Russia.

We are also engaged, with our European partners, in biannual EU-Russia human rights consultations. The first session of consultations took place in Luxembourg on 1 March 2005. Media freedom in Russia was discussed. The next round of consultations is scheduled to take place under the UK Presidency of the EU on 8 September 2005.

In addition to this, staff at our Embassy in Moscow continue to raise our concerns with their interlocutors in the Russian Government, including with official institutions in Russia that exist to protect and promote human rights.

Mr. Arbuthnot: To ask the Secretary of State for Foreign and Commonwealth Affairs what recent discussions his Department has had with the Russian Government about Russia's accession to the World Trade Organisation; and if he will make a statement. [6706]

Mr. Douglas Alexander: We have not had any recent discussions with Russia concerning World Trade Organisation accession, on which negotiations between the EU and Russia were concluded in May 2004.

Sudan

Mark Simmonds: To ask the Secretary of State for Foreign and Commonwealth Affairs what discussions his Department has had with the Government of Sudan concerning reports of fighting along its border with Eritrea; and if he will make a statement. [7376]

Ian Pearson *[holding answer 28 June 2005]:* We are concerned by recent reports of fighting around the town of Tokar in Eastern Sudan between the Government of Sudan and the Eastern Front, supported by the Justice and Equality Movement (JEM). Our ambassador in Khartoum raised this issue with the Government of Sudan and the Eastern Front on 23 June.

The UK special representative for Darfur raised this matter with the JEM in Abuja on 21 June. We have re-iterated to the Eastern Front that co-operation with the JEM in military operations unnecessarily complicates the issues in the East and undermines their claims of commitment to a peaceful resolution.

We have made clear to all parties that any attacks are totally unacceptable, and there is no military solution to the problems in the East, nor to those elsewhere in Sudan. The Comprehensive Peace Agreement provides the framework for a political solution throughout the country, including Darfur and the East. The Government of Sudan have stated its readiness to engage in consultations with the Eastern Front. We are pressing the Eastern Front to do the same.

Uzbekistan

Mr. Hands: To ask the Secretary of State for Foreign and Commonwealth Affairs what efforts he is making to lobby for an end to the 'sizdan ugina, bizdan bugina' culture of public officials in Uzbekistan; and if he will make a statement. [6749]

Mr. Douglas Alexander: Good governance, both economic and political, is a key aspect of our dialogue with Uzbekistan. We have consistently and repeatedly brought to the attention of senior Government figures the importance of transparency in governance and the negative effects of corruption. In a speech to the Centre for Strategic and International Studies in Washington DC on 18 May 2005, my right hon. Friend the Foreign Secretary called upon the Uzbek Government to develop a much more open and pluralistic society in order to address the root causes of the recent disturbances in Andizhan. This message has also been taken forward in Uzbekistan. On 15 May, our ambassador to Tashkent raised with Deputy Foreign Minister Nematov the importance of political and economic reform in the light of events in Andizhan.

Mr. Hands: To ask the Secretary of State for Foreign and Commonwealth Affairs what representations he has made to the Kyrgyz authorities to protest against the apparent forced return of Uzbek refugees in early June to their home country; and if he will make a statement. [6768]

Mr. Douglas Alexander: I refer my hon. Friend to the reply I gave on 20 June 2005, *Official Report*, column 733W to my hon. Friend the Member for Clwyd, South (Mr. Jones).

Mr. Hands: To ask the Secretary of State for Foreign and Commonwealth Affairs what visits the UK ambassador in Tashkent has made to *(a)* Andijan and *(b)* the Fergana Valley since 17 May. [6769]

Mr. Douglas Alexander: David Moran, our ambassador to Tashkent, has made two visits to Andizhan (Andijan) since 17 May 2005.

The first was on 18 May, when he accompanied a group of diplomats, members of international organisations and the media. Mr. Moran's lobbying had been instrumental in prompting the Uzbek authorities to organise this visit. The event was tightly controlled, and Mr. Moran was unable to engage members of the public. Having pressed Uzbek Deputy Foreign Minister Nematov on these restrictions, Mr. Moran secured agreement that he and EU colleagues could return unaccompanied.

On 26 and 27 May, Mr. Moran returned to Andizhan. He visited the central Yangi bazaar, and the city's central square. There was a high security service presence, and members of the public appeared afraid to approach Mr. Moran. He had a similar experience at the Kyrgyz border near Pakhtaabad, and at the border town of Karasu. This represented a distinct change from public behaviour in early May, when people had gathered around the visiting Defence Attaché's car, and asked him to pass news of events in Andizhan outside Uzbekistan.

Mr. Hands: To ask the Secretary of State for Foreign and Commonwealth Affairs (1) what his policy is on the OSCE's efforts to promote a public inquiry into the events of 13 May in Andijan in Uzbekistan; [6770]

(2) how many people he estimates have died in the apparent uprising in Andijan in Uzbekistan on 13 May; [6771]

(3) what efforts he has made to investigate the events of 13 May in Andijan in Uzbekistan; and if he will make a statement. [6772]

Mr. Douglas Alexander: We were extremely disturbed by reports of Uzbek troops firing on demonstrators in Andizhan (Andijan). When my right hon. Friend the Foreign Secretary first heard these reports, he urged the Uzbek Government to allow an independent, international investigation. We are pleased that the US, the UN, the Organisation for Security and Co-operation in Europe (OSCE), and NATO have all done the same. The UK was at the forefront in condemning the indiscriminate and disproportionate use offeree by the Uzbek Government.

Islam Karimov, Uzbek President, responded to our repeated calls for an inquiry by creating a Parliamentary Committee to investigate the unrest. We, and our European Union (EU) partners, have made clear that we consider this an insufficient response. On 13 June, the General Affairs External Relations Council (GAERC) called on the Uzbek Government to reconsider its position, giving a deadline of 30 June. Failure to do so will lead to punitive EU measures, including partial suspension of the Partnership and Co-operation Agreement (PCA).

It is not possible to say how many people died during the unrest in Andizhan, but the recent OCSE Office for Democratic Institutions and Human Rights' (ODIHR) report, which was published on 20 June, estimated that between 300 and 500 were killed.

Mr. Drew: To ask the Secretary of State for Foreign and Commonwealth Affairs what assessment he has made of whether the situation in Andijan, Uzbekistan has been stabilised; and if he will make a statement. [6829]

Mr. Douglas Alexander: Staff from the British Embassy in Tashkent have made five visits to Andizhan (Andijan) and the surrounding region since the unrest began. David Moran, our Ambasssador to Tashkent, visited first on 18 May when he accompanied a group of diplomats, members of international organisations and the media. Mr. Moran's lobbying had been instrumental in prompting the Uzbek authorities to organise this visit. The event was tightly controlled, and Mr. Moran was unable to engage members of the public. Having pressed Uzbek Deputy Foreign Minister Nematov on these restrictions, Mr. Moran secured agreement that he and EU colleagues could return unaccompanied.

He visited Andizhan again on 26 May, when he saw the central Yangi bazaar, and city's central square. On the same visit, he also went to the border town of Karasu, where he observed brisk market trading. Since the visits made by Embassy staff earlier in May, however, he noticed a significant increase in security service presence, and commented that members of the public appeared afraid to approach him.

Mr. Drew: To ask the Secretary of State for Foreign and Commonwealth Affairs what recent discussions *(a)* he and *(b)* his officials have had with those conducting the investigations into the Andijan uprising. [7272]

Mr. Douglas Alexander: In late May 2005, Uzbek President Karimov responded to repeated calls for an independent, international inquiry by creating a Parliamentary Committee to investigate the events of 12–13 May in Andizhan (Andijan), inviting diplomats from the US, France, Russia, China and Uzbekistan's regional neighbours to observe its work. On 13 June, at the General Affairs External Relations Council (GAERC), we and our EU partners rejected Karimov's proposal, and reaffirmed our call for an independent international investigation, giving a deadline of 30 June. In view of this, we have made no attempt to contact the Uzbek Parliamentary Committee.

We are, however, continuing to monitor closely the situation in Andizhan. Members of staff from the British Embassy, Tashkent, have visited the area five times since 13 May. We are also aware of the reports published by the US-based NGO Human Rights Watch, and the Organisation for Security and Co-operation in Europe's (OSCE) Office for Democratic Institutions and Human Rights (ODIHR), which suggest that the Uzbek authorities used indiscriminate and disproportionate force in Andizhan. These reports, which include interviews with eye witnesses now on the Kyrgyz side of the border, further underline the need for a comprehensive, international and independent inquiry in Uzbekistan.

NORTHERN IRELAND

Crime (Commercial Premises)

Lady Hermon: To ask the Secretary of State for Northern Ireland what has been the recorded level of crime involving commercial premises in each Belfast police district in each of the past five years with reference to *(a)* burglary, *(b)* robbery, *(c)* armed robbery, *(d)* theft and *(e)* shoplifting. [7160]

Mr. Woodward: The statistics requested are as in the following tables. Figures relating to thefts from commercial premises have not been provided as it is not possible to differentiate between personal and business victims.

Crimes recorded by the police

Offence type	*2000–01*	*2001–02*	*2002–03*	*2003–04*	*2004–05*
East Belfast District command Unit					
Non-domestic burglary	410	403	518	358	283
Robbery—business	20	25	23	8	8
Armed robbery—business	58	106	106	78	35
Shoplifting	413	290	265	226	223
North Belfast District Command Unit					
Non-domestic burglary	320	454	426	389	294

Crime Reporting

Lady Hermon: To ask the Secretary of State for Northern Ireland what research has been carried out by his Department into the change in the level of non-reporting of crime in Northern Ireland in the last five years; and if he will make a statement. [7159]

Mr. Hanson: Change in the level of reporting of crime in Northern Ireland is most frequently measured by the Northern Ireland Crime Survey (NICS), the most recent published results for which relate to the 1998, 2001 and 2003–04 sweeps. In addition, the 2000 International Crime Victim Survey (ICVS) compared crime reporting rates across 17 industrialised countries or regions, including Northern Ireland.

Although, typically, less than half of crime is reported to the police, Northern Ireland tends to have a higher reporting rate than England and Wales and it had the highest rate of all countries participating in the 2000 ICVS. Reporting rates can fluctuate for a number of reasons, including, changes in the level or mix of crime occurring or in the level of confidence in the police and the wider criminal justice system.

Information from the NICS and ICVS on the levels of crime reported to the police is contained within the Northern Ireland Office Research and Statistical Bulletins 1/2001 "International Crime Victimisation Survey 2000: Key Findings for Northern Ireland" and 4/2005 "Crime Victimisation in Northern Ireland: Findings from the 2003/04 Northern Ireland Crime Survey", copies of which are available from the House of Commons library. The bulletins can also be downloaded from the internet (http://www.nio.gov.uk/index/statistics-research/publications.htm).

Elections

Lady Hermon: To ask the Secretary of State for Northern Ireland what the cost was of distributing 2005 election communications via the Royal Mail in Northern Ireland. [2256]

Mr. Hanson: This is an operational matter and is the responsibility of the Chief Electoral Officer who is writing to the hon. Lady. The text of the letter reads:

> The cost of providing the Royal Mail service to distribute election material on behalf of candidates at both the Parliamentary General Election and the 28 district council elections was £507,479.51.

A copy of the letter will be placed in the Library.

Lady Hermon: To ask the Secretary of State for Northern Ireland what the total costs were of the 2005 *(a)* local council and *(b)* Westminster elections in Northern Ireland. [2257]

Mr. Hanson: Final figures are not yet available for the cost of each election. The estimated cost of the district council elections is £1.75 million and the estimated cost of the parliamentary general election in Northern Ireland is £2.5 million.

Fuel Poverty

Mr. Dodds: To ask the Secretary of State for Northern Ireland how many people *(a)* below the age of 18 and *(b)* over the age of 60 years have been living in fuel-poor households in Northern Ireland in each year since 1997. [7632]

Mr. Hanson: Figures on fuel poverty, which are classified in terms of households rather than by age groups, are collected through the Northern Ireland Housing Executive's House Condition Survey and not on an annual basis. The last survey, completed in 2001, indicated that *(a)* 54,920 households, where there were children, and *(b)* 102,039 households, where the head of household was over the age of 60, were living in fuel poverty.

Invest Northern Ireland

Mr. Dodds: To ask the Secretary of State for Northern Ireland how much has been spent by Invest Northern Ireland on new road layouts in each of the sites that they own in *(a)* North Belfast, *(b)* South Belfast, *(c)* East Belfast and *(d)* West Belfast in each year since 2003. [7852]

Angela E. Smith: In 2003, Invest NI spent £190,000 on infrastructure including roads at the Springfield Road. In 2004 it spent £3.26 million on infrastructure works including roads at Spring Vale, Springfield Road and Forthriver Business Park. To date in 2005 it has spent £810,000 at Forthriver Business Park. All of these sites are in West Belfast. Invest NI did not incur any expenditure on road works in any other of its properties in Belfast.

Religious Hatred Prosecutions

Lady Hermon: To ask the Secretary of State for Northern Ireland how many successful prosecutions there have been in Northern Ireland under the prevention of incitement to religious hatred legislation since its introduction in 1987. [7579]

Mr. Hanson: Data prior to 1993 are not available; data beyond 2003 will be available later in 2005.

During the period 1993 to 2003, there were no prosecutions for incitement to religious hatred. There was one prosecution and subsequent conviction for distributing written material to incite hatred.

Sentencing

Lady Hermon: To ask the Secretary of State for Northern Ireland what recent research has been conducted by his Department to compare the severity of sentencing in Northern Ireland courts with those in England and Wales for similar offences; and if he will make a statement. [7156]

Mr. Hanson: Given the different sentencing practices across jurisdictions and the number of variable factors in individual cases, formal comparisons of the severity of sentencing in Northern Ireland courts and those in England and Wales have not been undertaken. The recently completed consultation on the Sentencing Framework in Northern Ireland will however provide an opportunity to consider issues relating to the disposals available to the courts in Northern Ireland and the types of sentences handed down.

Tennis

Lady Hermon: To ask the Secretary of State for Northern Ireland if he will initiate an independent review of whether tennis as a sport in Northern Ireland is best promoted and developed under its current affiliation to Tennis Ireland. [7049]

Mr. Hanson: I have no plans to initiate an independent review of whether tennis as a sport in Northern Ireland is best promoted and developed under its current affiliation to Tennis Ireland as this is not a matter for me, but a matter for the Ulster Branch of Tennis Ireland and its members. I am aware, however, that following recent meetings with the Sports Council for Northern Ireland, the Ulster Branch of Tennis Ireland has agreed to enter into exploratory discussions on possible options for any player that might prefer a different affiliation.

Voting (General Election)

Lady Hermon: To ask the Secretary of State for Northern Ireland what estimate he has made of the number of those eligible to vote in each parliamentary constituency in Northern Ireland who were unable to vote at the general election on 5 May as a result of not having a correct form of identification. [323]

Mr. Hanson: According to figures provided by the Chief Electoral Officer, 3,818 electors were originally turned away from polling stations without valid photographic identification. Of those electors, 1,555 subsequently returned before the close of poll with an alternative, correct form of ID and were able to cast their vote. The remaining 2,263 electors were unable to vote because of a failure to produce valid identification.

The totals recorded for those who were originally turned away, per constituency, were as follows:

Constituency	*Number originally turned away for invalid ID*
Belfast, East	162
Belfast, North	193
Belfast, South	187
Belfast, West	164
East Antrim	167
East Londonderry	174
Fermanagh and South Tyrone	368
Foyle	199
Lagan Valley	163
Mid-Ulster	239
Newry and Armagh	352
North Antrim	301
North Down	124
South Antrim	175
South Down	187
Strangford	166
Upper Bann	263
West Tyrone	234
Total	3,818

Lady Hermon: To ask the Secretary of State for Northern Ireland what estimate he has made of the number of disabled voters in each parliamentary constituency in Northern Ireland who were unable to vote at the general election as a result of access restrictions at polling stations. [344]

Mr. Hanson: This is an operational matter and is the responsibility of the Chief Electoral Officer who is writing to the hon. Member. The text of the letter reads:

"The Electoral Office has no indication that significant numbers of disabled electors were unable to vote on 5 May because of access restrictions at polling stations. While we do seek to ensure that every polling place is readily accessible by all electors and have, for some time, been working with the Equality Commission and owners of property to encourage compliance with the Disability Discrimination Act, adjustments take time. In the interim, we do keep the polling station scheme under constant review and encourage anyone with local knowledge who may be aware of more suitable premises to put forward their ideas. In addition, as you know a public consultation exercise on the scheme was carried out earlier this year and all comments received were taken into account before finalising arrangements for this year's elections".

A copy of the letter will be placed in the Library.

DEPUTY PRIME MINISTER

Affordable Housing

Mr. Steen: To ask the Deputy Prime Minister what advice he has received from the Regional Housing Board on the amount of affordable housing needed in Devon *(a)* at the latest date for which figures are available and *(b)* over the next 10 years. [7678]

Yvette Cooper *[holding answer 27 June 2005]:* The provision of affordable housing is a local authority responsibility and should be made on the basis of robust local assessments of needs. Policy ST18 in the adopted Structure Plan for Devon 2001–16 highlights the strategic importance of the need to provide for

affordable housing and establishes a consistent basis for the development of local plan policies throughout Devon.

The South West Housing Body has however made the provision of additional affordable housing in Devon and across the region its number one priority, and its forthcoming advice to my right hon. Friend the Deputy Prime Minister on the allocation of capital funding for affordable housing for 2006–07 and 2007–08 will reflect this situation. Further work will be undertaken by the Regional Housing Body to improve the evidence base for affordable housing need and provision on a consistent basis through the promotion of sub-regional housing assessments.

Mr. Steen: To ask the Deputy Prime Minister (1) how much social housing grant has been allocated in Devon in each of the last five years; and what proportion was in support of section 106 schemes in each year; [7679]

(2) how much the Housing Corporation has allocated for the provision of affordable housing for each district in Devon in each of the last five years. [7680]

Yvette Cooper *[holding answer 27 June 2005]:* Expenditure on affordable housing in Devon provided through the Housing Corporation broken down by local authority, in the last five years, is detailed in the following tables. The programmes included in the table are the Approved Development Programme (ADP), the Local Authority Social Housing Grant (LASHG) and Transitional LASHG, the Safer Communities Supported Housing Fund (SCSHF), and the Starter Home Initiative (SHI).

The amount supporting section 106 is only available for 2004–05. The total proportion for Devon is 14 per cent.

Breakdown by local authority in Devon for the last five years

Housing Corporation.

Broadband (East Sussex)

Gregory Barker: To ask the Deputy Prime Minister what progress has been made towards targets for broadband access in East Sussex. [7965]

Alun Michael: I have been asked to reply.

I refer the hon. Member to the answer I gave him today to his question number 7855.

Building Regulations

David Howarth: To ask the Deputy Prime Minister what measures he plans to introduce to ensure full compliance with Part L of the Building Regulations; and whether they will include random pressure testing of new homes. [5664]

Yvette Cooper *[holding answer 20 June 2005]:* The Government are pursuing the commitments made in the Energy White Paper to raise the energy performance standards in the Building Regulations and to work with building control bodies to see how enforcement can

be improved. After extensive consultations with stakeholders, the Office of the Deputy Prime Minister have developed proposals for improving technical standards, including sample pressure testing of new homes, and for simplifying the compliance processes. There will also be a programme of dissemination, training and supporting help desks to give every opportunity to become acquainted with the new provisions and so improve compliance.

David Howarth: To ask the Deputy Prime Minister what robust standard details he requires under Part L of the Building Regulations for thermal bridging in new homes; and what changes he plans to make to those standards. [5665]

Yvette Cooper *[holding answer 20 June 2005]:* Builders are not required to use particular details but the guidance in Approved Document L offers the use of robust details as a way of showing compliance. These were developed by the Office of the Deputy Prime Minister with expert assistance and published by The Stationery Office. A new edition is planned to accompany the next amendment to Part L later this year. The new edition will include additional robust details, and the aim is to revise all the details to include more information and to facilitate their electronic transfer into builders' drawings. The accompanying design and construction guidance will also be improved and checklists added to assist compliance.

Council Housing

Sarah Teather: To ask the Deputy Prime Minister what the average time taken to re-let a local authority dwelling was in each English region in each year since 1997. [2437]

Yvette Cooper: The following table provides estimates for 2002–03 and 2003–04. Data in the form asked for are not available for other years.

Average days to re-let a local authority dwelling

Region	*2002–03*	*2003–04*
East Midlands	50	45
East	39	35
London	41	37
North East	56	50
North West	57	55
South East	38	39
South West	43	44
West Midlands	53	44
Yorkshire and the Humber	59	49
England	51	45

Note:
Approximate estimates because data is not available for all local authorities.
Sources:
HRA Subsidy Base Data returns for 2004–05 and 2005–06; Business Plan Statistical Appendices 2004.

Disabled Facilities Grant

Gregory Barker: To ask the Deputy Prime Minister what representations he has received on progress with the review of the disabled facilities grant. [7958]

Yvette Cooper: Representations have been received from 32 hon. Members in the last month. The Office of the Deputy Prime Minister has also received a number of representations from local authorities and organisations representing disabled people. In relation to progress with the review, I refer the hon. Member to the answer given on 15 June 2005, *Official Report*, columns 402–03W.

Lady Hermon: To ask the Deputy Prime Minister if he will recommend the abolition of the means testing of parents of disabled children as part of the disabled facilities grant process, as is currently the case in Northern Ireland and is soon to be the case in Wales. [7124]

Yvette Cooper: The disabled facilities grant programme is subject to an interdepartmental review and a team from Bristol university are currently looking at the operation of the programme including the means test. The review is continuing and Ministers will put forward any proposals for change later in the year.

Fines (London)

Sarah Teather: To ask the Deputy Prime Minister how much was collected in *(a)* parking fines and *(b)* fines for fly-tipping in each London borough in each year since 1997. [2501]

Jim Fitzpatrick: The information is as follows:

(a) The information requested in relation to parking fines for the periods from 1996–97 to 1999–2000 has been made available in the Library of the House. The figures for the periods from 2000–01 are a matter for the Mayor of London.

(b) The information requested is not held centrally and could be provided only at disproportionate cost. All fines in this period have been issued by the courts and collected by the courts.

Fire Service

Lynne Featherstone: To ask the Deputy Prime Minister whether his Department plans to conduct an impact assessment of the recent changes in fire cover in the Greater London area; and if he will make a statement. [7697]

Jim Fitzpatrick: No. Fire and Rescue Authorities are required by the Fire and Rescue Service National Framework to have in place and maintain an Integrated Risk Management Plan. It is, therefore, for the London Fire and Emergency Planning Authority to determine appropriate fire cover in its area.

Lynne Featherstone: To ask the Deputy Prime Minister if he will list the fire stations that have had a fire engine removed in each of the last 10 years; to which fire station a fire engine was re-located in each case; and whether a fire engine was replaced at each such station within (i) two years, (ii) three years, (iii) four years, (iv) five years and (v) more than six years. [7699]

Jim Fitzpatrick: The information requested is not held centrally and could be provided only at disproportionate cost.

Sarah Teather: To ask the Deputy Prime Minister what proportion of fires were caused by accumulations of litter in the last year for which figures are available; and if he will make a statement. [7211]

Jim Fitzpatrick: Information is collected centrally on fires involving all loose refuse and fires in refuse containers.

The latest figures for the year ending 30 September 2004 show that 143,800 fires, which is 37.5 per cent. of fires attended by the fire and rescue service in England, were refuse fires.

This is 7 per cent. fewer than in the previous year (which included 15 strike days). The majority of these fires (93 per cent.) are classified as secondary fires—not involving property or casualties.

Flood Risk Assessments

Bob Spink: To ask the Deputy Prime Minister what *(a)* conditions and *(b)* costs will be placed on developers for access to strategic flood risk assessments prepared by (i) the Environment Agency and (ii) local planning authorities. [6893]

Yvette Cooper: Strategic flood risk assessment information will be made available to developers preparing site-specific flood risk assessments. The precise administrative arrangements for access to strategic flood risk assessments are for the authorities undertaking them to determine. The Environment Agency is keen to facilitate the provision of information on flood risk at reasonable cost.

Bob Spink: To ask the Deputy Prime Minister if he will list areas for which flood risk assessment data is assessed as being necessary; and which of these data are available to developers. [6894]

Yvette Cooper: Paragraph 62 of planning policy guidance note (PPG)25 sets out the criteria for determining whether a flood risk assessment should accompany an application for planning permission. Some of these relate to the circumstances of the site and some to the flood plain maps prepared by the Environment Agency and provided to local authorities, as specified in paragraph 24 of PPG25. The Environment Agency flood plain maps are available to developers.

Bob Spink: To ask the Deputy Prime Minister what discussions his Department has had with *(a)* planning authorities and *(b)* the Environment Agency on the preparation of flood risk assessment data. [6895]

Yvette Cooper: Planning policy guidance note (PPG)25 advises those proposing developments in flood risk areas to carry out a flood risk assessment, which should be appropriate to the location, scale and nature of the development and should be submitted with the application. Local planning authorities and the Environment Agency were consulted in 2000 and 2001 on the draft of PPG25 and in autumn 2004 on the question of whether to review it. The Environment Agency was closely involved in drafting PPG25. Within the framework of guidance provided by PPG25, it is for local authorities to discuss with developers and the Environment Agency the data that would be appropriate in an individual flood risk assessment.

Bob Spink: To ask the Deputy Prime Minister what his estimate is of the additional cost to a developer of undertaking a flood risk assessment before building a house. [7081]

Yvette Cooper: Flood risk assessments should be proportionate to the location, scale and nature of the development and the apparent type and degree of risk. The cost will be site-specific, reflecting these factors.

Bob Spink: To ask the Deputy Prime Minister when the Thames Gateway Flood Risk Assessment, covering Canvey Island, will be available. [7076]

Yvette Cooper: The Thames Gateway South Essex Partnership intends to complete its Strategic Flood Risk Assessment work by the end of the 2005–06 financial year.

HIP Energy Reports

Mr. Love: To ask the Deputy Prime Minister what assessment has been made of the likely *(a)* switching in use of domestic fuel that will result from the proposed home information pack energy reports and *(b)* environmental effects of the consequential change in external costs. [6302]

Yvette Cooper: The Government do not anticipate that there will be any significant switches in use of domestic fuel resulting directly from the proposed HIP energy reports. The energy reports will primarily provide information to a potential buyer on the energy efficiency of the home in question. The reports will also include recommendations for the cost-effective improvement of the energy performance of the building which if carried out, would have environmental benefits.

Homelessness

Sarah Teather: To ask the Deputy Prime Minister if he will list guidance and advice sent by his Department to local authorities in the last year on homelessness. [7145]

Yvette Cooper: The Office of the Deputy Prime Minister have issued the following guidance and advice to local authorities:

Housing Quality Network Report: "Local Authorities' Homeless Strategies Evaluation and Good Practice" Published: November 2004.

"Effective Co-operation in Tackling Homelessness: Nomination Agreements and Evictions Guidance" Published: November 2004.

Homelessness and Health Information Sheet Number 3: "Dental services".

Homelessness and Health Information Sheet Number 4: "Hospital discharge".

There was statutory guidance, issued under section 182 of the Housing Act 1996, on section 11 of the Asylum and Immigration (Treatment of Claimants, etc.) Act 2004 (which amends the local connection provisions of the homelessness legislation).

In addition we have published the following documents which are available on our website:

Policy Brief 8: "Homeless Statistics Homeless Statistics March 2004 and Improving the Quality of Hostels and other Forms of Temporary Accommodation"

Policy Brief 9: "Homelessness Strategies : Moving Forward"

Policy Brief 10: "Homelessness Statistics September 2004 and Delivering on the Positive Outcomes"

Policy Brief 11: "Providing More Settled Homes"

A Strategy for Tackling Homelessness: "Sustainable Communities: Settled Homes; Changing Lives"

Houses in Multiple Occupation

Mrs. Spelman: To ask the Deputy Prime Minister what assessment the Government have made of the regulatory impact of their plans for licensing of houses in multiple occupation. [7442]

Yvette Cooper: The Government carried out a regulatory impact assessment on the effect of licensing of houses in multiple occupation (HMOs) during the formation of the policy. The report of the assessments were published and made available via the Libraries of the House and placed on the Office of the Deputy Prime Minister's website in December 2003.

The Government will also be publishing later this year further regulatory impact assessments to accompany each of the pieces of secondary legislation needed to implement the licensing of HMOs.

London Boroughs (Communication)

Sarah Teather: To ask the Deputy Prime Minister how much was spent per 1,000 population on external communication by each London borough in each of the last five years. [7461]

Jim Fitzpatrick: The amount spent per 1,000 population on external communication by each London borough in each of the last five years is not available centrally and could be provided only at disproportionate cost.

Phone Masts

Mrs. Spelman: To ask the Deputy Prime Minister if he will list the planning permissions for mobile phone mast sites that have been refused by the local planning authority but were granted on appeal by *(a)* the Planning Inspectorate and *(b)* the Secretary of State since the last revision of PPG 8. [7411]

Yvette Cooper: PPG 8 was last revised in August 2001.

The Planning Inspectorate does not hold information about mobile phone masts specifically, and it could be obtained only at a disproportionate cost.

HEALTH

Actrapid Insulin

Mr. Sanders: To ask the Secretary of State for Health (1) if she will make a statement on the supply of actrapid (basal) insulin; [5666]

(2) if she will discuss with her EU counterparts Novo Novalisk's intention to discontinue the supply of actrapid insulin in the United Kingdom; [5667]

(3) what her most recent estimate is of the prescribing costs of *(a)* animal based insulins, *(b)* actrapid (basal) insulins, *(c)* humalog (analogue) insulins and *(d)* other insulins; [5770]

(4) what her estimate is of the number of diabetics prescribed *(a)* animal based insulins, *(b)* actrapid based insulins, *(c)* analogue insulins and *(d)* other insulins in the last period for which figures are available; [5771]

(5) what steps she has taken to identify alternative *(a)* manufacturers and *(b)* suppliers of the insulin products that Novo Nordisk are proposing to withdraw from the United Kingdom. [5772]

Jane Kennedy: Novo Nordisk has informed the Department that it is planning to discontinue Actrapid Penfill insulin in December 2005. The vial presentation of Actrapid insulin will remain available. We have not sought an alternative supplier for the items being discontinued as there remains a number of different insulins and delivery devices available from various manufacturers. It is up to the clinician, in consultation with the patient, to decide which is most suitable. We are in discussion with Novo Nordisk to ensure a smooth transfer for patients to alternative products. We have no plans to consult with other European governments on Novo Novalisk's intention to discontinue the supply of Actrapid insulin.

We do not know the number of people prescribed either animal or human insulin, however, available information covers the number of prescription items and net ingredient cost of insulin dispensed in the community in England. The figures shown in the table were extracted from the prescription cost analysis system for 2004, supplied by the Prescription Pricing Authority.

Insulin	*Items (million)*	*Net ingredient cost (£ million)*
Animal derived	0.1	3.4
Human analogue	4.1	193.4
Total	4.2	196.8

Ambulance Service

Mr. Burstow: To ask the Secretary of State for Health pursuant to her answer of 20 June 2005, *Official Report*, column 794W, on the London Ambulance Service, what representations she has received concerning independent ambulances. [7251]

Jane Kennedy: The Department has received correspondence on this issue from patients' forums, independent ambulance organisations and national health service trusts. We have also received feedback at stakeholder consultation events and informally from NHS colleagues.

Mr. Burstow: To ask the Secretary of State for Health pursuant to her answer of 20 June 2005, *Official Report*, column 794W, on the London Ambulance Service, when the guidance on ambulance livery will be issued. [7252]

Mr. Byrne: There are already clear rules on the use of the national health service logo and crown badge by third party organisations. The law is similarly clear that green and yellow retro-reflective markings should only be used by NHS ambulance services.

We will communicate over the summer how these existing rules apply to independent ambulance services.

Mr. Lansley: To ask the Secretary of State for Health what assessment she has made of the reasons for the change in the number of emergency calls to ambulance services in the last five years. [7459]

Mr. Byrne: The number of emergency calls to ambulance services has increased by around 6 to 7 per cent. a year since 2000–01. During this time, the number of calls per incident has increased. This is largely attributed to greater use of mobile phones.

Asylum Seekers

Mr. Malins: To ask the Secretary of State for Health what her policy is on restricting provision of medical care to failed asylum seekers; and if she will make a statement. [3864]

Jane Kennedy: The Government are committed to providing protection for those individuals found to be genuinely in need. All applications for asylum are considered individually and on their own merits by the Home Office in line with the United Kingdom's obligations under the 1951 United Nations Refugee Convention and the European Convention on Human Rights (ECHR). However, any individual of any nationality who is found by the Home Office and the independent Immigration Appellate Authority not to be in need of asylum or international protection is expected to leave the UK.

Anyone is entitled to receive emergency or immediately necessary treatment to save life or to prevent a condition from becoming life-threatening, where in the clinical opinion of a health professional this is required. In the case of hospital treatment, however, they may be asked to pay for it if they are no longer eligible to receive it free of charge. A failed asylum seeker, who is receiving hospital treatment at the time their status was determined, will continue to receive that course of treatment free of charge until that course of treatment has been completed, or until they leave the country. Failed asylum seekers seeking routine elective hospital treatment will be expected to pay for it in the same way as any other chargeable overseas visitor.

General practices currently have the same discretion to accept or refuse applications from failed asylum seekers to join their lists of national health service patients as they have for applications from other people.

Audiology Services

Malcolm Bruce: To ask the Secretary of State for Health (1) what progress audiology clinics are making towards the Government's target that no one will wait longer than 18 weeks for treatment, including diagnostics, by 2008; [6462]

(2) how she plans to ensure that audiology departments meet the Government's target that no one will wait longer than 18-weeks for their treatment, including diagnostics, by 2008. [6471]

Mr. Byrne: Progress towards meeting the 18-week target will be assessed by monitoring activity and waiting time data against the trajectories in strategic health authorities' (SHAs) local delivery plans. These data returns will for the first time, subject to successful piloting, include activity and waiting times for pure tone audiometry. SHAs are working with primary care trusts to develop their plans.

Care Homes

Mr. Lansley: To ask the Secretary of State for Health how many *(a)* private, *(b)* voluntary and *(c)* local authority (i) care homes and (ii) care home places there have been in each year since 1997. [5598]

Mr. Byrne: The table shows the number of care homes and places in England by provider for people aged 18 and over as at 31 March 1997 to 2001.

I understand from the Chair of the Commission for Social Care Inspection (CSCI) that figures for later years were collected by the National Care Standards Commission, and now CSCI, but comparable details are not available.

Number of care homes and places, as at 31 March 1997 to 31 March 2001, England

Rounded numbers

		Residential			Nursing[1]
	Total	*Local authority*	*Voluntary*	*Private*[2]	*Independent*
Homes					
1997	28,850	2,260	3,850	16,830	5,920
1998	28,950	2,230	3,930	16,610	6,180
1999	28,680	2,070	3,860	16,640	6,110
2000	28,320	2,030	3,950	16,460	5,880
2001	27,480	1,870	3,940	15,980	5,680
Places					
1997	534,410	65,820	59,170	213,140	196,270
1998	553,490	63,980	60,790	223,130	205,590
1999	546,190	59,030	58,720	226,290	202,150
2000	539,240	55,460	60,720	229,720	193,330
2001	528,000	50,860	61,970	228,340	186,830

[1] Nursing home figures include places in general nursing homes, mental nursing homes, private hospitals and clinics.

[2] Includes private homes and small homes.

Notes:

1. Dual registered homes are included under nursing.
2. Figures may not sum due to rounding.

Sandra Gidley: To ask the Secretary of State for Health what assessment she has made of the nutritional quality of food in care homes. [7935]

Mr. Byrne: A number of measures and strategies are in place to manage, monitor and screen the quality in care homes.

The Commission for Social Care Inspection (CSCI) regulates care homes in accordance with statutory regulations and national minimum standards to ensure they provide for the needs of their residents. The Care Homes Regulations require homes to provide adequate quantities of suitable, wholesome and nutritious food for service users; and to maintain records of the food provided for service users in sufficient detail to enable inspectors to determine whether the diet is satisfactory, in relation to nutrition and otherwise.

Standard 19 of the national standards for care homes for older people sets out what care homes are expected to do to ensure residents are properly fed.

The CSCI will take swift action where it has concerns about the welfare of residents.

Childhood Development Reviews

Mrs. Dean: To ask the Secretary of State for Health what advice she has given to primary care trusts on the ages at which children should receive development reviews. [7649]

Mr. Byrne: Standard one of the national service framework for children, young people and maternity services sets out the key elements of the child health promotion programme, including developmental reviews and other health promotion services, and the ages at which these interventions would normally take.

Commission for Social Care Inspection

Mr. Burstow: To ask the Secretary of State for Health what representations her Department has received on the proposal to abolish the Commission for Social Care Inspection. [5613]

Mr. Byrne: Right hon. and hon. Members have tabled several questions on this topic recently. In addition, departmental Ministers have held exploratory discussions with both the Healthcare Commission and the Commission for Social Care Inspection.

Community Hospitals

Tony Baldry: To ask the Secretary of State for Health pursuant to her answer of 16 June 2005, *Official Report*, column 635W, on community hospitals, whether the decision on which services will be provided by each new community hospital will be made by *(a)* the Government and *(b)* primary care trusts. [6798]

Mr. Byrne: The Department is in the early stages of developing its policy on community hospitals. Preliminary thinking is that the decision on the provision of services in community hospitals will be a joint one, involving the Department, strategic health authorities and primary care trusts working in partnership and informed by the forthcoming public consultation on services outside of hospitals.

Computer Crime

Mr. Burstow: To ask the Secretary of State for Health how many cases of computer *(a)* hacking, *(b)* fraud and *(c)* theft her Department recorded in each year since 2001–02; and for each year on how many occasions computer systems have been illegally accessed by computer hackers (i) within and (ii) outside her Department. [6952]

Jane Kennedy: There have been no reported incidents of computer hacking or fraud on the Department's information technology (IT) systems either within or outside the Department since 2001–02 year.

The Department does not differentiate between losses and thefts nor do we record whether the theft was by an insider or outsider. The losses of IT equipment recorded since 2001–02 are shown in the table.

Financial year	*Number of incidents*	*Total cost (£)*
2001–02	77	70,500.00
2002–03	81	66,004.00
2003–04	70	56,917.00
2004–05	44	39,877.00

Dentistry

Mr. Drew: To ask the Secretary of State for Health what plans she has to increase access to NHS dentistry in Stroud constituency. [4345]

Ms Rosie Winterton: Cotswold and Vale Primary Care Trust (PCT), which commissions dental services for the Stroud constituency, has received £363,000 in capital grants and £155,000 in dental access money, which should lead to approximately 12,000 new national health service registrations.

One new dental surgery has opened in Stonehouse. In addition, negotiations are under way with two dentists, one in Stonehouse and the other in Cam, regarding expansion of their practices using currently vacant dental chairs, with a view to filling them with dentists recruited through the Department's overseas recruitment programme. The PCT is also currently looking to set up a new two-dentist surgery in the Stroud area.

Mr. Hancock: To ask the Secretary of State for Health how many NHS dentists are practising in Portsmouth; and how many patients are registered with each. [6007]

Ms Rosie Winterton: As at the end of May 2005, there were 75 national health service dentists practising in Portsmouth City Primary Care Trust (PCT) area. Of these, the numbers of patients shown in the table were registered with each practice. Due to data protection rules, the individual dentists cannot be named, but are referred to as dentist 1, dentist 2, etc.

Each dentist in Portsmouth City PCT and the number of patients registered with each as at 31 May 2005

Dentist number	*Number of children registered*	*Number of adults registered*	*Total number registered*
1	859	3,356	4,215
2	657	3,102	3,759

72	0	0	0
73	0	0	0
74	0	0	0
75	0	0	0

Notes:
1. The data are snapshot information at the end of each month.
2. The information includes any dentist who had at least one active registration.
3. There are various reasons why a dentist may not have any registrations: in particular, specialists such as orthodontists.
4. It should be understood that personal dental service PDS "registrations" generally have a longer re-registration period than general dental service (GDS) registrations. This means that a patient "registered" under PDS might not have been still registered under GDS, had the dentist remained in GDS.

Departmental Union Representation

Mr. Jenkins: To ask the Secretary of State for Health how many trade union learning representatives there are in her Department. [3316]

Jane Kennedy: There are currently no trade union learning representatives in the Department. However, the Department is very positive about this initiative and the trade union side plan to pursue this issue again in the near future.

General Practitioners

Mr. Dismore: To ask the Secretary of State for Health what the ratio between the number of general practitioners to population was for each NHS region in the last year for which figures are available. [7063]

Mr. Byrne: The number of general practitioners (GPs), excluding GP retainers and GP registrars, per 100,000 population in each Government office region as at December 2004 is shown in the table.

General medical practitioners (excluding retainers and registrars)[1] by strategic health authority per 100,000 population, as at 31 December 2004—England

Number (headcount)

		All practitioners (excluding retainers and registrars)[1]	Population[2,3]	All practitioners (excluding retainers and registrars)[1] per 100,000 population
	England	31,798	49,855,700	64

NHS Health and Social Care Information Centre General and Personal Medical Services Statistics

Mr. Lansley: To ask the Secretary of State for Health how many *(a)* formal and *(b)* self-construct general practitioner trainee places have been offered (i) in total and (ii) in each deanery in England in each year since 1997. [7455]

Mr. Byrne: Decisions about how many general practitioner trainee places are to be offered each year are made locally by postgraduate deaneries, in consultation with their strategic health authorities. This information is not held centrally.

Andrew Selous: To ask the Secretary of State for Health how much funding has been made available for self construct general practitioner registrar training in *(a)* the Eastern Deanery, *(b)* Bedfordshire and Hertfordshire and *(c)* England in 2005–06; how much was made available in 2004–05; and if she will make a statement. [6195]

Mr. Byrne *[holding answer 21 June 2005]:* Funding for trainee general practitioners is part of the overall national health service training budgets allocated to strategic health authorities. The amounts that postgraduate deaneries actually receive is determined locally in the light of local priorities and national work force targets. This information is not held centrally.

HIV/AIDS

Tony Lloyd: To ask the Secretary of State for Health (1) what categories of people *(a)* are and *(b)* are not entitled to free testing and treatment for HIV/AIDS on the NHS; [4216]

(2) to what categories of people it is planned to give access to free testing and treatment for HIV/AIDS; and whether those not resident in the UK will be given such access. [3744]

Jane Kennedy *[holding answers 13 and 15 June 2005]:* Anyone who is ordinarily resident in the United Kingdom is eligible to receive national health service hospital treatment free of charge (subject to any statutory charges that may apply, such as prescription charges).

The national health service (charges to overseas visitors) regulations 1989, as amended, specify that anyone who is not ordinarily resident in the UK must be treated as an overseas visitor, and is liable to pay for any NHS hospital treatment received unless they meet one of the exemption criteria in the regulations. One such exemption covers the initial diagnostic testing for HIV/AIDS and any associated counselling, so that these are free to all irrespective of residency status. Subsequent treatment, however, should the test prove positive, is not free to all and an overseas visitor who is not otherwise

exempt under one of the other criteria is expected to pay for any HIV/AIDS treatment they receive. This has been the case since these regulations first came into force.

Hospital Beds

Mr. Burstow: To ask the Secretary of State for Health what the average daily number of general and acute beds open overnight bed was in each of the last three years for (i) England and (ii) each NHS trust; and what the bed occupancy rate was. [7198]

Mr. Byrne: The data requested are available on the Department's website at: www.performance.doh.gov.uk/hospitalactivity/data_requests/beds_open_overnight.htm.

Mr. Burrowes: To ask the Secretary of State for Health what the average daily cost of *(a)* an intensive care and *(b)* a high dependency bed is. [7614]

Mr. Byrne: The national average cost of an occupied bed day in a discrete critical care unit is available in the annual reference costs publication.

The national schedule of reference costs for 2004 (the latest year available) shows that for activity undertaken within an national health service trust in England, the costs of an occupied bed day in different types of discrete critical care units are shown in the following table.

£

Unit type	*National average cost per occupied bed day*
Intensive therapy unit/intensive care unit	1,328
Burns intensive care unit	1,039
Neurosurgical intensive care unit	1,017
Spinal injuries intensive care unit	779
Renal intensive care unit	370
Cardiac intensive care unit	1,025
High dependency unit	584
Paediatric intensive care unit	1,702
Neonatal intensive care unit—level 1	838
Neonatal intensive care unit—level 2	560

A copy of the reference costs publication is available in the Library.

Hospital-acquired Infections

Lynne Featherstone: To ask the Secretary of State for Health what *(a)* advice is given on and *(b)* precautions are taken against the spread of MRSA in ambulances; and if she will make a statement. [6699]

Jane Kennedy: All national health service organisations, including ambulance trusts, should have systems in place to minimise the risk to patients from health care associated infections as required by Standards for Better Health (July 2004). Infection control policies and any particular precautions for reducing the spread of methicillin-resistant Staphylococcus aureus (MRSA) are a matter for individual trusts. Advice on appropriate precautions to reduce the spread of infection has been published by the Department in the Health Service Circular 2000/02 and in "Winning Ways—Working together to reduce Hospital Acquired Infection in England" (December 2003).

The Ambulance Service Association published "Infection Prevention and Control: Managing Healthcare Associated Infection and Control of Serious Communicable Diseases", in June 2004. The guidance was reviewed recently by the Health Protection Agency, the National Patient Safety Agency and the Department's inspector of microbiology and is deemed to be suitable and sufficient, if used with robust auditing, to control MRSA and other health care associated infections. Additionally, the training and common core syllabus for ambulance personnel covers infection control, including reference to MRSA.

Hospitals (North-East)

John Cummings: To ask the Secretary of State for Health how many cleaners in *(a)* Sunderland Royal Hospital, *(b)* Hartlepool University Hospital and *(c)* Durham University Hospital are employed by (i) the NHS and (ii) private contractors. [6881]

Mr. Byrne: Information is not gathered centrally on the number of cleaners employed by private contractors. The table shows the available data for the trusts concerned.

National health service hospital and community health services: Hotel, property and estates support workers in specified trusts as at 30 September 2004

		Headcount
City Hospitals Sunderland NHS Foundation Trust	RLN	393
County Durham and Darlington Acute Hospitals NHS Trust	RXP	356
North Tees and Hartlepool NHS Trust	RVW	303
Tees and North East Yorkshire NHS Trust	RVX	44

Note:
Hotel, property and estates support workers include maintenance and works staff working in areas such as laundry, catering, domestic services and gardens.
Source:
Health and Social Care Information Centre Non-Medical Workforce Census

Identity Cards

Mr. Garnier: To ask the Secretary of State for Health what estimate she has made of the cost of equipping NHS premises with identity card readers. [6732]

Jane Kennedy: As part of the broader Home Office-led identification cards programme, the Department is considering the costs and benefits of using ID cards within the national health service, including the cost of card readers. No decisions on the deployment, and hence the costs, of such readers have been made.

Midwifery Vacancies

Sarah Teather: To ask the Secretary of State for Health how many midwife vacancies there are in each *(a)* London primary care trust and *(b)* London strategic health authority. [7463]

Jane Kennedy: There are no current midwife vacancies recorded by primary care trust (PCT), as PCTs generally do not employ midwifery staff.

Information showing the latest figures available for midwifery vacancy rates and staff in post for London national health service trusts and strategic health authorities has been placed in the Library.

Ministerial Powers

Mike Penning: To ask the Secretary of State for Health (1) if she will list the reserve powers she holds to take control of *(a)* primary care trusts, *(b)* hospital trusts, *(c)* ambulance trusts, *(d)* strategic health authorities and *(e)* mental health trusts; which section of the relevant legislation gives her each such power; under what circumstances each can be activated by her; and if she will make a statement; [6649]

(2) on how many occasions her reserve powers to take control of *(a)* primary care trusts, *(b)* hospital trusts, *(c)* ambulance trusts, *(d)* strategic health authorities and *(e)* mental health trusts have been used; if she will list the institutions involved; and if she will make a statement. [6650]

Mr. Byrne *[holding answer 23 June 2005]:* The legal powers that enable the Department to require individual trusts to change their senior management are contained within Section 13 of the Health and Social Care Act 2001. This states that the Secretary of State may make an intervention order if she is not satisfied that a national health service body is performing one or more of its functions adequately or at all, or that there are significant failings in the way that the body is being run. The order would specify the extent to which changes to senior management would have to be made.

The legal powers contained within Section 13 of the Health and Social Care Act 2001 that enable the Secretary of State for Health to require individual organisations to make senior management changes have not had to be used yet.

National Institute for Health and Clinical Excellence

Mr. Hands: To ask the Secretary of State for Health (1) how much funding has been allocated to the National Institute for Health and Clinical Excellence in each year since its inception; [4833]

(2) what budget was allocated to the National Institute for Clinical Excellence in each year since its inception. [5686]

Jane Kennedy: The funding allocated to the National Institute for Health and Clinical Excellence (NICE) by the Department and the Welsh Assembly Government is show in the table. The figures also include the allocation to NICE's funding for capital charges.

	NICE running cost budget (£)
1999–2000	10,511,000
2000–01	11,158,000
2001–02	12,613,000
2002–03	14,771,000
2003–04	17,494,000
2004–05	19,391,000
2005–06	29,298,000

Notes:
1. Figures for 1999–2000 to 204–05 relate to the National Institute for Clinical Excellence, the predecessor of NICE.
2. The figure for 2005–06 reflects the incorporation of functions of the former Health Development Agency and the transfer of funding for the three confidential inquiries to the National Patient Safety Agency.

National Service Framework for Older People

Mr. Burstow: To ask the Secretary of State for Health what progress has been made against the milestones set in Standard 7 of the national service framework for older people. [6399]

Mr. Byrne: The Healthcare Commission is currently looking at progress in implementing the national service framework (NSF) for older people. There will be a particular focus on mental health services for older people. The Healthcare Commission's report will be published later in the year.

The Department's national clinical directors for older people's services and mental health services, Professor Louis Appleby and Professor Ian Philp, will shortly be launching a vision for the future of older people's mental health services, outlining the key components of a model service and building on the service developments the NSF for older people has initiated.

NHS Acute Hospital Trusts

Frank Dobson: To ask the Secretary of State for Health which NHS acute hospital trusts have financial deficits; and what the deficit is in each case. [7012]

Mr. Byrne *[holding answer 27 June 2005]:* The latest year for which audited data on the financial position of national health service organisations are available is 2003–04. The financial position for all NHS trusts with deficits is shown in the table.

£000

NHS trust name	*2003–04 deficit position*
Addenbrooke's NHS Trust	(921)
Airedale NHS Trust	(1,448)

2003–04 summarised accounts.

NHS Finances

Steve Webb: To ask the Secretary of State for Health if she will list the deficit or surplus at year end for 2004–05 for *(a)* the NHS in England, *(b)* each strategic health authority, *(c)* each NHS trust and *(d)* each primary care trust. [5782]

Mr. Byrne: The latest year for which audited data on the financial position of national health service organisations is available is 2003–04. Information showing the financial position for the NHS in England—strategic health authorities (SHAs), NHS trusts and primary care trusts (PCTs)—has been placed in the Library.

Audited information in respect of the 2004–05 financial position of all SHAs, PCTs and NHS trusts will be published in their individual annual accounts and will be available centrally later this year.

NHS Patients (Overseas Treatment)

Tim Loughton: To ask the Secretary of State for Health how many NHS patients were treated abroad in each of the last five years; and in what countries. [4621]

Ms Rosie Winterton: Under patient choice, overseas treatment direct referral scheme approximately 890 patients had been referred for treatment since 2003. In addition, primary care trusts may also contract with healthcare providers abroad on an individual needs basis but this information is not collected by the Department.

Data on United Kingdom patients treated in the European Economic Area under the E111/112 schemes are not available in the format requested.

Physiotherapy

Mr. Rogerson: To ask the Secretary of State for Health what measures she is taking to ensure adequate retention to fill senior physiotherapy posts; and if she will make a statement. [8139]

Mr. Byrne: It is the responsibility of local national health service employers and strategic health authorities to ensure there are sufficient numbers of physiotherapists to meet service needs. The Department is working closely with the Chartered Society of Physiotherapy, the NHS work force review team and NHS organisations to ensure that local managers have access to a range of strategies across recruitment and retention, commissioning and skill mix.

Radiographers

Jim Cousins: To ask the Secretary of State for Health how many *(a)* radiographers of all grades and *(b)* radiographer trainees were employed in the NHS on average in (i) 1996, (ii) 2000 and (iii) 2004; and what estimate she has made of the numbers who were working on contracts requiring less than the standard 37.5 hours in 2004. [6317]

Mr. Byrne: The information requested is shown in the table.

The standard hours for radiographers employed under Whitley Council terms and conditions are 35 hours. "Agenda for Change" replaces these arrangements and, under the new terms and conditions, the standard hours for all staff are 37.5. Implementation of "Agenda for Change" started in December 2004.

National health service hospital and community health services: Radiography staff in England by area of work, level and each specified contract as at 30 September in specified years

Headcount

	1996	Of which: part-time	2000	Of which: part-time	2004	Of which: part-time

Residential Care

Mr. Burstow: To ask the Secretary of State for Health how many adults were placed in residential care out of area in each of the last five years; and what proportion of state funded adult placements this represented in each year. [7200]

Mr. Byrne: The number and percentage of residential and nursing care residents funded by councils with social service responsibilities (CSSRs) placed outside their CSSR in England, 2000 to 2004, is shown in the table.

Number and percentage of residential and nursing care residents funded by CSSRs placed outside their CSSR in England, 2000–04—England, as at 31 March

Rounded numbers

	Total		Residential care[1]		Nursing care[2]	
	Number	Percentage[3]	Number	Percentage[4]	Number	Percentage[5]
2000	43,800	17	29,700	16	14,100	19
2001	44,000	17	29,800	16	14,100	20
2002	46,700	18	31,800	17	14,900	20
2003	47,700	17	31,800	15	15,900	20
2004	49,100	18	33,700	17	15,500	20

[1] Includes local authority staffed, voluntary and private care homes and small or unstaffed homes.
[2] General and mental nursing homes only.
[3] As a percentage of all CSSR supported residents.
[4] As a percentage of all CSSR supported residents in residential care.
[5] As a percentage of all CSSR supported residents in nursing care.

Note:
Figures may not add up due to rounding.

Source:
SR1 form.

Rural Services

Tim Farron: To ask the Secretary of State for Health if she will amend the health service's funding formula to take account of costs incurred in delivering health services to sparsely populated rural areas. [7763]

Mr. Byrne *[holding answer 28 June 2005]:* The funding formula provides the best available measure of health need in all areas. In calculating health need in rural areas, it takes account of the effects of access, transport and poverty.

The advisory committee on resource allocation (ACRA), which is made up of national health service managers, academics and general practitioners, oversees the weighted capitation formula. ACRA has looked at the issue of rurality on many occasions and has recommended that no further adjustment is needed to reflect rural areas. ACRA will continue to oversee the development of the formula, and look to ensure equity in resource allocation.

Scanner (North Durham)

Mr. Kevan Jones: To ask the Secretary of State for Health (1) what progress has been made by Alliance Medical in identifying a suitable site for a scanner in North Durham; [7553]

(2) who Alliance Medical has consulted during their search for an appropriate site for a scanner in North Durham. [7554]

Mr. Byrne *[holding answers 27 June 2005]:* Alliance Medical Ltd. (AML) has been working alongside County Durham and Tees Valley Strategic Health Authority's (SHA) assistant director of performance to establish an appropriate site for the mobile unit. I understand that both AML and the trust radiology department consider the site suitable and that they are awaiting confirmation from the SHA that the Consett site will be commissioned.

Sexual Health

Mr. Todd: To ask the Secretary of State for Health what recent assessment she has made of the capacity of sexual health clinics; and if she will make a statement. [7517]

Caroline Flint: The Department has commissioned the Medical Foundation for AIDS and Sexual Health to undertake a two-year national review of genito urinary medicine (GUM) services, which will help to assess capacity issues and disseminate good practice. This began in autumn 2004 and will cover all GUM clinics. Visits to services are already under way in nine strategic health authorities, and reports are being fed back to the primary care trusts as the review proceeds.

The Health Protection Agency (HPA) collects and publishes data on waiting times for GUM services. The HPA have published two reports to date, for May and November 2004, and these are available from their website at www.hpa.org.uk

Sandra Gidley: To ask the Secretary of State for Health if she will take steps to ensure that the full amount of funding allocated to sexual health reform in the Public Health White Paper is spent on sexual health and HIV services. [7758]

Caroline Flint: Improved sexual health performance management has been introduced to ensure that the new investment of £300 million over three years, provided through the Public Health White Paper, achieves the desired outcomes. In addition to the public service agreement target to reduce the under-18 conception rate by 50 per cent., by 2010 as a part of a broader strategy to improve sexual health, primary care trusts must now include sexual health in their local delivery plans. These plans must include measures to achieve improved genito-urinary medicine (GUM) clinic waiting times, reduced gonorrhoea rates and improved uptake of Chlamydia screening. In addition, the Department has commissioned the Medical Foundation for AIDS and Sexual Health to undertake a national review of GUM services, which is now under way. A national audit of contraceptive services is also in preparation and we are working to strengthen the monitoring role of strategic health authorities. Data collection is being improved, to provide information against which performance can be measured, including the Health Protection Agency's published data on GUM waiting times.

Suicide

Mr. Burstow: To ask the Secretary of State for Health what measures are in place to reduce the incidence of suicide in people aged *(a)* 50 years or over and *(b)* 65 years or over. [6397]

Ms Rosie Winterton: The suicide prevention strategy annual report of progress 2004 sets out the actions that are under way to reduce the number of suicides in the general population. Although there are no specific actions under way targeting those 50 years or over, many of the measures in place will help prevent suicides among all age groups.

The our healthier nation target is to reduce the overall death rate from suicide and undetermined injury from a baseline rate of 9.2 deaths per 100,000 population in 1995-97 to 7.4 deaths per 100,000 population in 2009-11. The latest available data for the three years 2001-03 show a rate of 8.6 deaths per 100,000 population—a reduction of 6 per cent. from the baseline. The latest data in the 50 and over age group show that this rate has fallen from the baseline rate of 10.6 deaths per 100,000 population to 10.1 deaths, a fall of 5 per cent. over the period. For the 65 and over age group the rate has fallen from the baseline rate of 10.1 deaths per 100,000 population to 8.91 deaths, a fall of 11.4 per cent. over the period.

Taxis

David T.C. Davies: To ask the Secretary of State for Health how much the Department has spent on taxis in each of the last five years. [6513]

Jane Kennedy: The table shows the amounts the Department spent on its central contract for taxis.

	Amount (£000)
2000-01	270
2001-02	312
2002-03	337
2003-04	403
2004-05	550

Other taxi fares may be claimed through staff expenses, but this information cannot be made available without disproportionate cost.

EDUCATION AND SKILLS

Adoption

John Hemming: To ask the Secretary of State for Education and Skills how many people by Government office region were rejected as potential adopters because they were overweight in *(a)* 2002, *(b)* 2003 and *(c)* 2004. [7879]

Maria Eagle: The information requested is not collected centrally.

Adult Literacy

Sarah Teather: To ask the Secretary of State for Education and Skills what assessment she has made of the level of adult literacy in each London borough. [7474]

Bill Rammell: The "Skills for Life Survey: A national needs and impact survey of literacy, numeracy and ICT skills" (DfES, October 2003) provides the latest estimates of literacy levels across England. The survey assessed the literacy, numeracy and ICT skills of around 8,000 adults aged 16 and above in England.

The findings for the London boroughs are shown in the table. The proportion of adults with literacy skills below level 1 varies from 38 per cent. in Newham to 4 per cent. in the City of London. The assessment levels correspond to the new literacy and numeracy core curriculum and National Standards: Level 1 is broadly equivalent to a lower grade GCSE (grade D-G) and Level 2 to a higher grade GCSE (grade A*-C).

A copy of the survey report is available in the House of Commons Library and on the DfES website: www.dfes.gov.uk

Adult Literacy levels across London drawn from the Skills for Life Survey[1]

Literacy	Total entry level		Level 1 skills		Level 2 skills	
	Number	Proportion (%)	Number	Proportion (%)	Number	Proportion (%)

Arson

Sir Michael Spicer: To ask the Secretary of State for Education and Skills how many arson attacks there were on schools in England in 2004. [7355]

Jacqui Smith: The most recent data published by the Office of the Deputy Prime Minister is for the year ending 30 September 2004. In that year there were a total of 688 reported deliberate fires in schools in England.

Behaviour Improvement Programme

Mr. Hoban: To ask the Secretary of State for Education and Skills how much the Government are spending in 2005–06 on behaviour and attendance-related activities and projects. [7705]

Jacqui Smith: Schools and local authorities use their core funding to varying degrees to support behaviour and attendance, but the amounts spent on these activities are not separately identified. In addition to these sums, the Government make available specific funding—through the Standards Fund or through direct grant support, earmarked for behaviour and attendance related activities. In the 2005–06 financial year, this funding is expected to amount to about £310 million through the Behaviour Improvement Programme, the Learning Mentor and Learning Support Unit strands of Excellence in Cities, and the Behaviour and Attendance strands of the Primary and Secondary National Strategies.

Class Sizes

Mr. Maude: To ask the Secretary of State for Education and Skills what the average class size in *(a)* primary and junior schools and *(b)* secondary schools in (i) West Sussex, (ii) Kent, (iii) Durham, (iv) the East Riding of Yorkshire and (v) each English county was in each of the last eight years. [7915]

Jacqui Smith: The information requested is shown in the table.

Maintained primary and secondary schools[1]*: average class size*[2]
Position as at January each year: 1998 to 2005 (provisional)—
by each English county local education authority and East Riding of Yorkshire local education authority

Computer Crime

Mr. Burstow: To ask the Secretary of State for Education and Skills how many cases of computer *(a)* hacking, *(b)* fraud and *(c)* theft her Department recorded in each year since 2001–02; and for each year, on how many occasions computer systems have been illegally accessed by computer hackers (i) within and (ii) outside her Department. [7188]

Bill Rammell: The number of cases of computer hacking detected in the Department for Education and Skills was nil in 2001–02, 2002–03 and 2003–04. There was one case of computer hacking in 2004–05 which was perpetrated by an outsider. The number of cases of fraud detected was three in 2001–02 and two in 2002–03. All were perpetrated by persons outside the Department. There was no fraud, internal or external, in 2003–04 or 2004–05. The number of cases of computer theft detected was nine in 2001–02, six in 2002–03 all perpetrated by insiders, 23 in 2003–04 of which 22 were perpetrated by insiders and one by persons outside the Department and 14 in 2004–05—all were perpetrated by insiders.

Education (South Devon)

Mr. Steen: To ask the Secretary of State for Education and Skills how many young people are expected to be on the Prince's Trust Teams programme run by Dartington Tech in this financial year; how many there were in each of the last three years; and if she will make a statement on education funding in South Devon. [6262]

Bill Rammell *[holding answer 22 June 2005]:* The number of young people on Prince's Trust Teams in programmes run by Dartington Tech is as follows.

	Number
2002–03	195
2003–04	175
2004–05	215

Devon and Cornwall Learning and Skills Council have set out specific priorities for the coming year, in line with national and regional activities. These include ensuring access to education and training opportunities for 16 to 18-year-olds; increasing the take-up of apprenticeships; tackling basic literacy and numeracy problems; and providing first-time Level 2 opportunities.

In addition, the local LSC has a significant range of co-financed (European Social Fund) projects tackling skills shortages and addressing issues of social inclusion on top of activities funded from mainstream resources.

Taken together, this provides a significant response to the learning and skills needs in the local LSC area.

Educational Psychologists

Annette Brooke: To ask the Secretary of State for Education and Skills (1) what plans she has to increase the supply of educational psychologists; [7853]

(2) what progress she is making in her consultation on the role of educational psychologists; [7854]

(3) how many vacancies there were for educational psychologists in England in *(a)* April 2004 and *(b)* April 2005. [7963]

Maria Eagle: Decisions on the recruitment, retention or deployment of educational psychologists (EPs) are matters for local authorities as employers to determine in light of local circumstances and available resources.

The terms of reference for the proposed review of the functions and contribution of EPs are currently being developed in consultation with representatives of the local authority employers. Subject to any points arising from these contacts, we would expect to invite tenders for the work shortly.

Vacancy information for EPs is collected in January of each year. In 2004 there were 113 vacant full-time permanent posts and 2,100 full-time equivalent EPs in service. Provisional estimates indicate that there were 100 vacant full-time permanent posts in 2005 and 2,160 in service. Posts were regarded as vacant where there was no permanent appointee and where they were advertised prior to the survey date.

Family Resolutions Project

Mrs. May: To ask the Secretary of State for Education and Skills (1) what estimates her Department had made of the number of likely participants prior to the setting up of the Family Resolutions Project; [4686]

(2) what the estimated costs of running the Family Resolutions Project are; [4687]

(3) how many parents have taken part in the Family Resolutions Pilot Project to date; and how many have accepted mediation services as part of the project. [4688]

Maria Eagle *[pursuant to the reply, 15 June 2005, Official Report, c. 483W]:* Confirmed expenditure on the Family Resolutions Pilot Project is £190,628, up to 31 May 2005. This replaces the previous figure given of £173,669 for spend to 14 June 2005. Costs for June cannot yet be confirmed.

Foster Care

John Hemming: To ask the Secretary of State for Education and Skills what the total cost was of the most expensive external foster care placement in each Government Office region in *(a)* 2002, *(b)* 2003 and *(c)* 2004. [7733]

Maria Eagle: Information about the cost of individual placements is not collected centrally.

John Hemming: To ask the Secretary of State for Education and Skills what the average cost per child of external foster care for local authorities was in each Government office region in *(a)* 2002, *(b)* 2003 and *(c)* 2004. [7880]

Maria Eagle: The average gross weekly expenditure to local authorities, per looked after child, of foster care provided by others from 2001–02 to 2003–04 is set out in the table:

£000

Year ending	Average gross weekly expenditure per looked after child in foster care provided by others March 2002	Average gross weekly expenditure per looked after child in foster care provided by others (including respite and short term placements and placed for adoption) March 2003	March 2004
North East	1,031	696	808
North West	774	579	652
South East	905	973	933
East Midlands	1,536	757	832
East	748	693	686
South West	695	848	744
West Midlands	695	727	790
Yorkshire and the Humber	783	592	797
London	626	817	791

John Hemming: To ask the Secretary of State for Education and Skills what the total expenditure on external foster care by local authorities was in each Government office region in *(a)* 2002, *(b)* 2003 and *(c)* 2004. [7881]

Maria Eagle: The gross total cost to local authorities for children looked after in foster care placements provided by others from 2001–02 to 2003–04 is shown in the table:

Gross total cost for children looked after in foster care provided by others

£000

	Year ending 31 March 2002	2003	2004
North East	5,806	9,216	10,815
North West	13,713	18,901	25,802

West Midlands	30,614	31,198	34,220
Yorkshire and the Humber	7,398	10,539	20,022
London	71,292	94,749	104,734

Milton Keynes Academy

Mr. Lancaster: To ask the Secretary of State for Education and Skills what assessment she has made of the implications of the withdrawal from the Milton Keynes academy project of Global Education Management Systems for the academy's ability to deliver future academy projects. [7432]

Jacqui Smith: Global Education Management Systems (GEMS) supports the aims and the ethos of the Academies' Programme and has a proven track record in supporting and managing schools. My officials are continuing their discussions with GEMS and expect to identify suitable academy proposals which would benefit from GEMS' support and experience.

New Schools

Mr. Maude: To ask the Secretary of State for Education and Skills how many new *(a)* primary and *(b)* secondary schools were built in each English county in each of the last eight years. [7913]

Jacqui Smith: The construction of new schools is decided upon by each local authority in accordance with its asset management plan. Figures on how many new

(a) primary and *(b)* secondary schools were built in each English county in each of the last eight years are not held centrally.

Postgraduate Science Degrees

Mr. Stephen O'Brien: To ask the Secretary of State for Education and Skills how many *(a)* UK, *(b)* EU and *(c)* non-EU students are studying science postgraduate degrees in England in 2004–05; and what proportion of all postgraduate students this represents in each case. [8033]

Bill Rammell: Figures for the 2003/04 academic year are given in the table below; data for 2004/05 are not yet available.

Enrolments[1] on postgraduate science courses in English HEIs in 2003/04

	United Kingdom	European Union	Other overseas
Science postgraduates[2]	89,755	11,230	30,040
All postgraduates	269,320	27,490	80,340
Science as a percentage of total postgraduates	33	41	37

[1] Figures stated are given on a full-person equivalent basis, which is the proportion of an enrolment's activity in that subject area.
[2] Science includes medicine and dentistry, subjects allied to medicine, biological sciences, veterinary, agriculture and related sciences, physical sciences, mathematical and computing sciences, architecture and related studies and engineering and technology.
Note:
Figures are on a DfES whole-year basis and are rounded to the nearest 5.

Higher Education Statistics Agency (HESA)

Press Officers

Mr. Burstow: To ask the Secretary of State for Education and Skills how many press officers the Department and its predecessors employed in each year since 1997; and what the cost was in each year. [8138]

Bill Rammell: The information requested is set out in the table:

	Staff numbers	Spend (£000)
1996–97	19	702
1997–98	20.5	729
1998–99	29.5	969
1999–2000	28	997
2000–01	28	1,307
2001–02	28	1,097
2002–03	23.4	1,314
2003–04	18.5	1,352
2004–05	18	1,200

Religious Education

Dr. Kumar: To ask the Secretary of State for Education and Skills if she will introduce compulsory religious education in all schools which focuses equally on all the main religions in England. [7298]

Jacqui Smith: All maintained schools must provide religious education (RE) for all registered pupils. Locally agreed RE syllabuses must reflect the fact that religious traditions in the country are in the main Christian while taking account of the teaching and practices of other principal religions. The new national framework for RE will provide opportunities to develop pupils knowledge and understanding of Christianity, other principal religions, other religious traditions and other world views, in line with Government's goals of inclusion, tolerance and diversity.

School Building

Mr. Burstow: To ask the Secretary of State for Education and Skills what assessment has been made of the need for school building maintenance, updated for current price levels for *(a)* primary, *(b)* secondary and *(c)* other schools in each London borough, in the last five years. [7249]

Jacqui Smith: Data on school buildings maintenance have been supplied to the Department twice; firstly in 2000–01 and secondly in 2003. The following table shows, for the two data collections, primary, secondary and other schools figures for each London local education authority. Costs have been updated to current costs. In addition to backlog repair work, the figures cover work needed over a five year period from the dates of the assessments, including cyclical and scheduled maintenance.

Central Government capital support for investment in schools has increased from under £700 million in 1996–97 to £5.5 billion this year and will rise further to £6.3 billion by 2007–08. Progress is being made year-by-year in improving the quality of the school building stock.

Schools maintenance requirements

School Funding

Mr. Maude: To ask the Secretary of State for Education and Skills what the funding per pupil in *(a)* primary and junior schools and *(b)* secondary schools in (i) West Sussex, (ii) Kent, (iii) Durham, (iv) the East Riding of Yorkshire and (v) each English county was in each of the last eight years. [7914]

Jacqui Smith: The figures requested are expressed in real terms and set out in the following tables:

Pupils aged three to 10

Notes:

1. Price Base: Real terms at 2003–04 prices, based on GDP deflators as at 23 March 2005.
2. Figures reflect relevant sub-blocks of education SSA/EFS settlements and exclude the pensions transfer to EFS.
3. Total funding also includes all revenue grants in DfES Departmental Expenditure Limits relevant to pupils aged three to 10 and 11 to 15 and exclude Education Maintenance Allowances and grants not allocated at LEA level. For those LEAs in receipt of advance of grant under the transitional support arrangements for 2004–05, advance grant funding is included in the year of payment (2004–05). There will be a consequential reduction in DfES grant for these LEAs in future years (either 2006–07 and 2007–08 or 2006–7 to 2008–9, depending on the terms on which the advance was given to the LEA).
4. The pupil numbers used to convert £ million figures to £ per pupil are those underlying the SSA/EFS settlement calculations plus PLASC three-year-old maintained pupils and estimated three to four-year-olds funded through state support in maintained and other educational institutions where these are not included in the SSA pupil numbers.
5. Rounding: Figures are rounded to the nearest 10.
6. Status: 2005–06 figures are provisional as some grants have not yet been finalised/audited.

School Meals

Mr. Burstow: To ask the Secretary of State for Education and Skills pursuant to her Answer of 9 June 2005, *Official Report*, column 698W, on school meals, *(a)* when she expects to decide how best to capture information about schools meals provision and *(b)* what information about school meals provision is collected by (i) her Department and (ii) other Government departments. [7214]

Jacqui Smith: Our intention is to send schools a questionnaire covering the relevant information about school meals provision before they break for the summer holidays.

The Department for Education and Skills collects information on eligibility and take-up of free school meals. Other Government departments do not collect information about school meals.

Mr. Burstow: To ask the Secretary of State for Education and Skills when she expects the School Meals Review Panel to publish its draft school lunch standards for the school year starting in September. [8058]

Jacqui Smith: The Department for Education and Skills will publish the draft version of the school lunch standards for public consultation this September, the final version will be mandatory by September 2006.

Schools (Sutton)

Mr. Burstow: To ask the Secretary of State for Education and Skills how many children are attending schools in the London borough of Sutton in the 2004–05 academic year, broken down by *(a)* local authority and *(b)* (i) primary, (ii) secondary and (iii) special school. [7248]

Jacqui Smith: The requested information is given in the table:

Maintained primary, secondary and all special schools[1]: number (headcount) of pupils[2]—as at January 2005 (provisional)—Sutton local education authority area, by local authority area

Headcount of pupils

	Primary	*Secondary*	*Special*		*Total*	*Total*
			Maintained	*Non-maintained*		
Sutton local authority	14,790	14,740	270	80	350	29,880
Epsom and Ewell local authority	260	1,220	n/a	n/a	n/a	1,480
Sutton local education authority	15,050	15,960	270	80	350	31,360

n/a = not applicable.
[1] Includes middle schools as deemed.
[2] Excludes dually registered pupils.
Note:
Pupil numbers nave been rounded to the neatest 10. There may be discrepancies between the sum of constituent items and totals as shown.
Source:
Annual Schools Census

Special Educational Needs

Mr. Hoyle: To ask the Secretary of State for Education and Skills what the average time taken to statement a pupil in Lancashire education authority was in the last period for which figures are available. [6604]

Maria Eagle: The Department for Education and Skills does not hold data on the average time taken to issue a statement for pupils with special educational needs in local education authorities. Relevant data is however available from the Audit Commission. The LEA Best Value indicator BV 43b shows that 67.1 per cent. of draft statements of SEN in Lancashire were prepared within 18 weeks during 2003–04. If cases covered by the statutory exceptions to the time limits—as set out in the Education (Special Educational Needs) (England) (Consolidation) Regulations 2001, Section 12(7)—are excluded, 89.7 per cent. were prepared within the 18 week period (Indicator BV 43a).

Mr. Truswell: To ask the Secretary of State for Education and Skills what steps will be taken to consult parents of children with special educational needs (SEN) in the national audit of SEN specialist services. [7299]

Maria Eagle: The national audit of low incidence special needs support, services and provision is currently under way. The questionnaires have been issued to all local authorities and responses are being received and followed up. Structured workshops have been established in each Region to discuss the questionnaire findings and add to the audit data collection. The workshop participants are from local authorities, health and social care as well as the non-maintained, private and voluntary sectors and include representatives from organisations such as the parent partnerships.

James Brokenshire: To ask the Secretary of State for Education and Skills if she will make a statement on the implementation of the Special Educational Needs and Disability Rights Act 2001 in *(a)* hospitals and *(b)* primary care centres in respect of deaf people and people suffering from hearing impairment. [7377]

Maria Eagle: The remit of the Special Educational Needs and Disability Act 2001 does not cover hospitals or primary care trusts. The Act amended the Education Act 1996 to strengthen the right to a mainstream education for pupils with special educational needs where parents want it and where it is compatible with the efficient education of other children. It also amended Part 4 of the Disability Discrimination Act 1995 to require local education authorities, schools, colleges, universities and providers of adult education not to discriminate against disabled people in their access to education for reasons relating to their disability and to require local education authorities and schools to plan to increase progressively, and overtime, access to schools by disabled pupils and prospective pupils.

Student Debt

Mr. Stephen O'Brien: To ask the Secretary of State for Education and Skills (1) what the total amount was of debt repaid by *(a)* UK and *(b)* EU students who graduated from English universities in each year since 1994; and what proportion of debt remains outstanding for each year; [8029]

(2) what the average proportion of student loan debt repaid by United Kingdom borrowers entering repayment status was in each financial year since 1999. [8030]

Bill Rammell: Borrowers with income-contingent loans repay 9 per cent. of income over £15,000. They may voluntarily pay more. Borrowers enter repayment status in the April after they have graduated, or otherwise left their course.

The table shows the amount repaid on UK publicly-owned student loans by financial year.

£ million

Financial year	*Amount repaid*
1994–95	27.4
1995–96	50.5
1996–97	86.1
1997–98	133.6
1998–99	134.5
1999–2000	131.2
2000–01	178.4
2001–02	266.8
2002–03	332.6
2003–04	413.0

Student Loans Company

Figures include repayments on both income-contingent and mortgage-style loans. Note that the figures are repayments posted during the financial year from all borrowers, regardless of when they entered repayment status or are due to enter repayment status. It would be misleading to show these repayments as a proportion of the total amount outstanding at the end of the year, as a significant part of the outstanding amount is loans that are not yet in repayment status. EU students are not eligible for maintenance loans in the UK. Figures are not available separately for UK students in English universities.

In general, repayments of income-contingent loans are collected through the tax system. Repayments are notified to the Student Loans Company (SLC) after the end of the tax year, after which SLC reconcile the repayments notified with their records. Therefore there will be some repayments that have been made but are not yet reflected in the figures.

The following table shows repayments of income-contingent loans, and amounts outstanding and repaid as a percentage of the total, for cohorts of borrowers. The table shows the position reported in June 2005; figures will change as further repayments are recorded for each cohort.

Year borrower entered repayment status (cohort)	*Repayments (£ million)*	*Percentage of amount outstanding*	*Percentage of amount repaid*
2000	24.3	86	14
2001	39.8	90	10
2002	121.6	92	8
2003	115.3	95	5
2004	83.5	97	3

Source:
Student Loans Company

The first cohort of income contingent borrowers entered repayment status in April 2000. The earnings of graduates are likely to rise in the years after leaving higher education, therefore the repayments of income-contingent loans will be lower in the early years. This is reflected in the table. Information in this format is not held centrally for mortgage-style borrowers.

Student Loans

Mr. Clappison: To ask the Secretary of State for Education and Skills what legal powers are available to the Student Loans Company to obtain repayments of loans in respect of top-up fees from graduates from EU member states working outside the UK; what estimate she has made of the likely total value of such loans in each year; and if she will make a statement. [4830]

Bill Rammell: The Student Loans Company will have the power to recover loans which are not recoverable through income tax in the UK, as a debt through litigation in the courts, if there is a breach of the terms. We anticipate relying on European Council regulation 44/2001 in support of this.

We estimate that the annual resource cost of fee loans issued to EU students who would work outside the UK on graduation could be around £25 million[1] (steady state at 2006/07 terms). This assumes that 91 per cent. of EU students are charged the full £3,000 fee, 9 per cent. charged £2,000, 80 per cent. of them take out a fee loan and around 75 per cent. of EU students work outside the UK after graduation. The latter assumption has been derived from data on the first destination of EU students on graduation. These data indicate that a large proportion of EU students do not go into work on graduation, the majority of these undertaking further study. In the absence of any data about the eventual employment of this group of students, we have assumed that they all enter employment outside the UK and hence, the £25 million figure could be an over-estimate.

The estimate presented here is in resource terms. This is the resource cost to the Department of loans—specifically of providing an interest subsidy and of writing-off some loans. It is on a different basis to (Commons Written) PQ 3057, which concerned the cost to the Department of issuing loans for fees to all EU students, not just those who move outside the UK after graduation, and uses an updated discount rate to calculate resource costs[2].

[1] Figure rounded to the nearest £5 million.

[2] Resource cost estimates updated using latest 2.2 per cent. discount rate.

Teacher Recruitment

Mr. Stephen O'Brien: To ask the Secretary of State for Education and Skills what the targets for recruitment to *(a)* science, *(b)* mathematics and *(c)* modern foreign languages teacher training courses were in each year between 1994 and 2004; and what the performance against those targets was in each year. [7393]

Jacqui Smith: The number of places allocated and the number of people recruited to science, mathematics and modern foreign languages in England from 1994 to 2004 are given in tables 1, 2 and 3.

Table 1: Science

	Places	*Recruitment*	*Difference*
1993/94	2,615	2,397	218
1994/95	3,200	2,918	282
1995/96	3,402	2,794	608
1996/97	3,700	2,937	763
1997/98	3,300	2,789	511
1998/99	3,050	2,279	771
1999/2000	2,390	2,362	28
2000/01	2,690	2,413	277
2001/02	2,810	2,594	216
2002/03	2,850	2,701	149
2003/04	3,225	2,871	354

Table 2: Mathematics

	Places	*Recruitment*	*Difference*
1993/94	1,755	1,790	-35
1994/95	2,230	1,950	280
1995/96	2,267	1,795	472
1996/97	2,550	1,653	897
1997/98	2,250	1,464	786
1998/99	2,150	1,120	1,030
1999/2000	1,680	1,302	378
2000/01	1,850	1,290	560

Table 2: Mathematics

	Places	*Recruitment*	*Difference*
2001/02	1,940	1,553	387
2002/03	1,940	1,674	266
2003/04	2,315	1,942	373

Table 3: Modern foreign languages

	Places	*Recruitment*	*Difference*
1993/94	1,665	1,550	115
1994/95	2,060	1,789	271
1995/96	2,092	1,790	302
1996/97	2,250	1,720	530
1997/98	2,650	1,799	851
1998/99	2,300	1,657	643
1999/2000	2,200	1,469	731
2000/01	2,050	1,635	415
2001/02	2,050	1,705	345
2002/03	2,050	1,732	318
2003/04	2,050	1,819	231

The number of places allocated and the number of people recruited do not take into account the Fast Track scheme or employment-based routes into teaching.

University Students (Counselling)

Dr. Kumar: To ask the Secretary of State for Education and Skills what changes to provision of counselling services for university students has been made to meet the changes in demand arising from broadening access. [7500]

Bill Rammell: Provision of Counselling Services is a matter for individual higher education institutions. Counselling Services in UK universities have responded positively to the changes in student populations resulting from the HE Widening Participation agenda. The Government have supported a number of initiatives to improve all core support services to students, such as the "Developing Modern Higher Education Careers Services", report in 2001. A key focus of "Developing Modern Higher Education Careers Services" was the need to ensure greater and more targeted access to those students and graduates who might be disadvantaged and/or in need of support. The follow-up report "Modernising HE Careers Education—a framework for good practice" showed that universities had reviewed their provision of support services, and recognised the need to improve their standards of service.

Written Answers to Questions

Thursday 30 June 2005

ENVIRONMENT, FOOD AND RURAL AFFAIRS

Bovine TB

Mr. Steen: To ask the Secretary of State for Environment, Food and Rural Affairs how many cattle have been infected with bovine TB in each of the last three years in *(a)* Devon, *(b)* Cornwall, *(c)* Somerset and *(d)* Dorset; and how many cattle were destroyed during the foot and mouth epidemic in each county. [5964]

Mr. Bradshaw *[holding answer 21 June 2005]:* If an animal reacts positively to the skin test it is generally considered to have bovine TB. However, it is not always possible to confirm infection in any particular animal by post-mortem examination at the slaughterhouse, or by culturing *Mycobacterium bovis* in the laboratory. This is because in the early stages of the disease, it is not always possible to see lesions with the naked eye, and, due to the fastidious nature of the organism, it is not possible to culture from samples in every case.

Therefore, the number of cattle slaughtered under bovine TB control measures in the four counties requested in the last three years is provided as follows:

	2002	*2003*	*2004*
Devon	3,022	3,657	4,674
Cornwall	2,917	2,414	2,351
Somerset	907	1,033	928
Dorset	383	399	408

The number of cattle destroyed as a result of foot and mouth in each of the counties is as follows:

Devon	3,267
Cornwall	3,310
Somerset	992
Dorset	445

Notes:
1. The number of cattle slaughtered under bovine TB control measures comprises the number of reactors to the TB test and those cattle that have been in direct contact.
2. TB data downloaded from the State Veterinary Service database on 19 May 2005.
3. All data are provisional and subject to change as more data become available.

Mr. Steen: To ask the Secretary of State for Environment, Food and Rural Affairs how many farms in the South West have been affected by bovine TB in each of the last three years; how many cattle in England have been slaughtered due to bovine TB in each year; how much was paid by the Government to farmers in *(a)* Devon, *(b)* Cornwall, *(c)* Somerset and *(d)* Dorset in compensation for bovine TB in each of the last three years; what steps she has taken to eradicate TB in cattle; and what steps she is proposing to take. [6264]

Mr. Bradshaw *[holding answer 22 June 2005]:* The information requested is as follows:

Number of farms affected by TB and the cattle slaughtered

The number of holdings affected by bovine TB breakdowns in each of the last three years, as well as the number of cattle slaughtered under TB control measures in England between 2001 and 2004 are detailed in the following tables.

Table 1: Number of holdings affected by TB incident by county

	Number of farm holdings			*Number of herds under movement restrictions*[1]		
County	*2002*	*2003*	*2004*	*2002*	*2003*	*2004*
Devon	630	856	915	648	912	981
Cornwall	540	619	589	560	680	638
Somerset	203	279	253	213	294	262
Dorset	102	131	107	105	140	115

[1] Data downloaded from the State Veterinary Service database on 22 June 2005. All data provisional and subject to change as more data become available.

Table 2: Cattle slaughtered in England

Year[1]	*Cattle slaughtered*[2]
2001[3]	4,284
2002[3]	17,851
2003	17,096
2004	16,955

[1] TB Reactors plus Direct Contacts
[2] Data downloaded from State Veterinary Service database on 19 May 2005. All data provisional and subject to change as more data become available.
[3] In 2001, the TB testing and control programme was largely suspended due to the foot and mouth Disease (FMD) outbreak. When testing resumed in 2002, resources were concentrated on herds with overdue TB tests which would have had a longer period in which to contract the disease. Also the proportion of high risk herds tested immediately after the FMD outbreak was greater than that prior to the outbreak. As a result, data for 2001 and 2002 are not comparable with other years.

Compensation

The amount of compensation for Bovine TB paid to farmers in the four counties is not collected/available in the format requested, and can be obtained only at disproportionate cost.

The amount of compensation paid in Great Britain over the last three years is detailed in the following table.

Table 3: Compensation paid in Great Britain

£ million

Financial year	*Expenditure*
2001–02	9.2
2002–03	31.9
2003–04	34.4
2004–05	[1]35.0

[1] Forecast.

Action to control TB

The Government are committed to finding the best way to combat bovine TB, backed by available scientific evidence and taking account of all interested parties, including the taxpayer. We published our 10-year strategy for the control of bovine TB in March. This places emphasis on keeping clean areas clean and achieving a sustained and steady reduction of TB in hotspot areas. Specific disease control policies will be

tailored to reflect the control of bovine TB in March. This places emphasis on keeping clean areas clean and achieving a sustained and steady reduction of TB in hotspot areas. Specific disease control policies will be tailored to reflect the regional variation in disease and risk, and adjusted to make best use of emerging scientific findings.

We are prepared to cull badgers to control bovine TB if evidence shows it is cost-effective, practicable and sustainable. The strategic framework sets out a process for decision-making on badger culling. However, vaccination for cattle or badgers is still a long-term goal and we have recently approved the first field trial of a TB vaccine for badgers and a new study by the Veterinary Laboratories Agency to prepare for similar field trials in cattle.

British Waterways (Surplus Land)

Danny Alexander: To ask the Secretary of State for Environment, Food and Rural Affairs what steps she has taken to ensure that British Waterways make available surplus land at less than market value for development of affordable housing. [7136]

Jim Knight: The Department looks to British Waterways to provide affordable housing in its developments as part of its commitment to corporate social responsibility. The amount is determined by local planning requirements and individual circumstances. As at 31 March 2005, 1,998 units of social housing are planned to be built on BW development sites.

Consultants

Mrs. Dean: To ask the Secretary of State for Environment, Food and Rural Affairs what plans she has to issue guidance on effective commissioning for those in the public and voluntary sectors who are commissioning work from external consultants. [7021]

Jim Knight: I refer the hon. Member to the answer given by the Financial Secretary to the Treasury, my hon. Friend the Member for Wentworth (John Healey) on 28 June 2005, *Official Report*, column 1286W.

Departmental Relocation

Mr. Gale: To ask the Secretary of State for Environment, Food and Rural Affairs how many of her Department's posts *(a)* have been relocated and *(b)* are under consideration for relocation from London to the deprived areas of the South East. [6255]

Jim Knight: The Department is implementing the Lyons Review recommendations to relocate 390 posts out of London and the South East by 2010. This will not exclude consideration of relocating some posts to relatively deprived areas in the South East. So far, the Department has not identified any posts suitable for transfer to deprived areas in the South East.

Emissions Trading Scheme

Norman Baker: To ask the Secretary of State for Environment, Food and Rural Affairs if she will estimate the level of penalties that will have been collected after year one of the EU emissions trading scheme. [8608]

Mr. Morley: All operators of installations that do not surrender sufficient allowances to cover their annual emissions will be liable to a penalty. In the first phase of the scheme (2005–07), the penalty will be €40 for each tonne of carbon dioxide equivalent emitted by that installation for which the operator has not surrendered allowances. The penalty will rise to €100 per tonne for the second phase. The extent of the penalties for year one of the scheme will only be known after 20 April 2006, once reconciliation has taken place. We expect all installations will comply with the regulations.

Fish Merchants (Buyer's Licences)

Mr. MacNeil: To ask the Secretary of State for Environment, Food and Rural Affairs under what circumstances a buyer's licence can be withdrawn from a UK fish merchant. [8557]

Mr. Bradshaw: Under the terms of the Registration of Fish Buyers and Sellers and Designation of Fish Auction Sites Regulations 2005, the Secretary of State may suspend the registration of a buyer where the registered buyer has not:

complied with a condition of registration; or

conducted his business in a manner that complies with the requirements of Article 9 of Council Regulation 2847/93 (the Control Regulation), Article 22 of Council Regulation 2371/2002 (the Common Fisheries Policy) in regard to the submission of sales notes.

In addition, a court may revoke the registration of a buyer either totally or for a specified period upon conviction for the following offences:

where a person knowingly or recklessly makes a false statement for the purposes of an application for registration;

where a registered fish buyer fails to comply with a condition of his registration;

where a registered fish buyer fails to keep, or to produce on request by a British sea fishery officer, the necessary sales records.

Fly Tipping

Mr. Burstow: To ask the Secretary of State for Environment, Food and Rural Affairs how many reported incidents of fly-tipping there were in each *(a)* local authority and *(b)* region in the last period for which figures are available; and what costs were incurred in removing fly-tipped waste. [7217]

Mr. Bradshaw: The number of reported incidents of fly-tipping and the cost of clearance and disposal reported between April 2004 and March 2005 are given by *(a)* waste collection authority and *(b)* region in tables made available in the Library of the House.

These data are from the Flycapture database, which records fly-tipping incidents dealt with by waste collection authorities and the Environment Agency. The figures are likely to be an underestimate and should increase as authorities improve their data collection and reporting performance.

Gangmasters

Andrew George: To ask the Secretary of State for Environment, Food and Rural Affairs when she expects the Gangmasters Licensing Authority to commence operation. [7176]

Jim Knight: The Gangmasters Licensing Authority commenced operation on 1 April 2005. One of the Authority's first tasks will be to establish the conditions to be attached to a licence and the operational aspects of the licensing scheme. These will be set out in rules orders and the Authority will be consulting on these as a matter of urgency.

Andrew George: To ask the Secretary of State for Environment, Food and Rural Affairs what plans she has to extend the provisions of the Gangmasters (Licensing) Act 2004 to other sectors and industries. [7177]

Jim Knight: The Gangmasters (Licensing) Act 2004 applies to gangmasters operating in the agricultural, shellfish gathering and associated food/fish processing and packaging sectors. I have no plans to extend the scope of the Act to other sectors and industries.

Andrew George: To ask the Secretary of State for Environment, Food and Rural Affairs what her latest assessment is of the number of *(a)* legally operational and *(b)* illegal gangmaster organisations in the UK. [7178]

Jim Knight: Based on a DEFRA commissioned study, the Gangmasters Licensing Authority (GLA) expects to issue 1,000 licences to gangmaster organisations operating legitimately in the agricultural, shellfish gathering and associated food and fish processing and packaging sectors in the UK. The GLA anticipates inviting licence applications from spring 2006.

By its very nature, it is very difficult to quantify illegal gangmaster activity. Once the licensing scheme is operational, the GLA's compliance role and enforcement activities undertaken on behalf of DEFRA will generate more accurate data on the numbers of gangmasters engaged in illegal business practices.

Landfill Sites

Norman Baker: To ask the Secretary of State for Environment, Food and Rural Affairs how many *(a)* complaints, *(b)* court actions and *(c)* fines against landfill sites for problems related to (i) odours, (ii) water pollutions, (iii) air pollution and (iv) human health impact there were in each year since May 1997, broken down by region. [4603]

Mr. Bradshaw: I refer the hon. Member to the answer given on 7 September 2004, *Official Report*, column 944W which outline the limitations when producing this data. The following sets of data update the figures previously provided.

Complaints

Tables 1, 2 and 3 give information of incidents that were reported to the Environment Agency and were recorded on the National Incident Recording System (NIRS). It is important to note that NIRS records incidents and not complaints.

Table 1: Incidents where the pollutant was recorded as landfill odour (categories 1–3)

Region	July 2004 to April 2005
Anglian	51
Midlands	32
North East	42
North West	55
Southern	29
South West	29
Thames	55
EA Wales	50

Table 2: Incidents which had impact to water (categories 1–3)

Region	July 2004 to April 2005
Anglian	1
Midlands	4
North East	9
North West	2
Southern	2
South west	5
Thames	2
EA Wales	3

Table 3: Incidents which had impact to air (categories 1–3)

Region	July 2004 to April 2005
Anglian	45
Midlands	42
North East	58
North West	81
Southern	21
South West	21
Thames	57
EA Wales	24

The NIRS system has no designated means of recording incidents in terms of their impact on human health. Specific and accurate data concerning complaints against landfill sites for problems related to human health can not therefore be derived from NIRS.

Court actions and fines

Information concerning *(b)* court actions and *(c)* fines are kept separately, on the National Enforcement Database. The following prosecutions were taken between 1 July 2004 and 31 May 2004.

Updated figures 1 July 2004 to 31 May 2005

Llancloudy

Mr. Keetch: To ask the Secretary of State for Environment, Food and Rural Affairs if she will instruct her officials to meet the hon. Member for Hereford and residents and landowners in Llancloudy in Hereford constituency before a decision is made on the route for lorries from the farm in Llancloudy to the main road; and if she will make a statement. [5672]

Mr. Bradshaw *[holding answer 20 June 2005]:* The hon. Member should be aware that there is ongoing litigation between the current owners and occupiers Mrs. Georgina Hawkins and Mr. Kevin Feakins and the Rural Payments Agency and Defra in connection with (1) sums owed by Mr. Feakins to the RPA in respect of the sheep meat clawback scheme; and (2) Defra's activities on the farm during the 2001 foot and mouth disease outbreak.

My officials are fully aware of the concerns of local residents and they have been in correspondence with the Llancloudy Residents Association over the proposals for the removal of farmyard manure and other seized materials from Hill Farm Llancloudy. The current situation is that Defra has agreed to remove these seized materials and to reinstate the land. However, in order to fulfil this undertaking the Department needs to agree a licence with Mr. Feakins and Mrs. Hawkins, as the owners and occupiers of the land, in order to gain access to the land. This licence will also include detailed method statements for the operations required. Defra's preferred access route is along the main farm access drive, a route which would minimise the impact on the majority of Llancloudy residents—this route has not been agreed by Mr. Feakins and Mrs. Hawkins.

Given the failure to agree access routes, my officials do not believe that an on-site meeting would be helpful, since until the exact access route is agreed, contractors cannot prepare the detailed working protocols and risk assessments that will be required and officials would not be able to address the concerns of residents. However given the understandable concerns of residents, my officials would be pleased to meet with the hon. Member in London, together with a representative of the Llancloudy Residents Association in London to explain the current situation and to outline the steps the Department has taken to agree access and will take to ensure that the impact on residents will be minimised.

Munitions/Fireworks Production

Lynne Featherstone: To ask the Secretary of State for Environment, Food and Rural Affairs what research she has commissioned on the duration of damage to *(a)* soil and *(b)* ground water on land that was used for (i) munitions production and (ii) fireworks production; and if she will make a statement. [6360]

Mr. Bradshaw: The Environment Agency has published two documents regarding the potential for contamination of land at former explosives manufacturing sites (including fireworks). Both deal with the characteristics of the potential contaminants at such sites. This includes their solubility and biodegradability which can be used to indicate the likelihood of them persisting at the site and the methods required to investigate and remediate such contamination.

These reports are:

R&D Technical Report P5-042/TR/03—Land Contamination: Technical Guidance on Special Sites: Explosives Manufacturing & Processing Sites.

Project Record P5-036/01—Collation of Toxicological Data and Development of Guideline Values for Explosive Substances, Collation of Physicochemical data.

This second document is the first step in the production of Contaminated Land Exposure Assessment (CLEA) Soil Guideline Values.

The agency has also produced general guidance on the assessment of natural attenuation (the dispersion or breakdown) of contaminants in groundwater:

R&D Publication 95—Guidance on the Assessment and Monitoring of Natural Attenuation of Contaminants in Groundwater.

Defra has two publications in its "Industry Profiles" series on munitions and firework production. This series provides information on the processes, materials and waste associated with individual industries, with respect to land contamination:

Chemical Works: explosives, propellents and pyrotechnics manufacturing works;

Engineering Works: mechanical engineering and ordnance works.

Rats

Sarah Teather: To ask the Secretary of State for Environment, Food and Rural Affairs what estimate she has made of the rat population of England and Wales in *(a)* 1997 and *(b)* 2005. [7153]

Jim Knight: The most recent estimate of the Norway rat population in England was a minimum of 5,240,000 individuals. This figure was established by a review that assessed the population and conservation status of all British mammals, published in 1995. The only recent objective national survey of rat presence is within the English House Condition Survey (EHCS). The 1996 survey revealed that 0.23 per cent. of properties had rats indoors and 1.6 per cent. had rats present outside. A report on the rodent element of the 2001 EHCS will be published this summer.

Rural Housing Commission

Mrs. Spelman: To ask the Secretary of State for Environment, Food and Rural Affairs what the *(a)* timetable for the establishment, *(b)* remit and *(c)* membership will be of the proposed Rural Housing Commission. [7397]

Jim Knight: This is a high priority for the Government. I am working closely with Ministerial colleagues to take this plan forward and hope to make an announcement shortly.

Single Payment System

Mr. Drew: To ask the Secretary of State for Environment, Food and Rural Affairs what criteria will be used in deciding whether to undertake a Single Payment System inspection. [6826]

Jim Knight: The criteria for selection for inspection depends on whether the inspection relates to scheme eligibility or to cross-compliance. Where inspections relate to eligibility criteria, the relevant regulation requires that member states must make a random selection from the population of applicants, and a risk-based selection to highlight cases of irregularity. The latter must take account of:

the amount of aid involved;

the number of agricultural parcels and the area for which aid is requested;

changes from the previous year;

the findings of checks made in past years;

for farmers who had no hectares in the single payment Scheme reference period, compliance with the condition that at least 50 per cent. of the agricultural activity maintained in the reference period expressed in livestock units has been maintained; and

other factors to be defined by the member states.

Where inspections relate to cross-compliance conditions, the relevant regulation requires that member states select all inspections on the basis of a risk analysis appropriate to the cross compliance requirements and standards or to the existing legislation.

Tyres

Norman Baker: To ask the Secretary of State for Environment, Food and Rural Affairs how many tyres were *(a)* purchased, *(b)* reused and *(c)* disposed of by (i) landfill, (ii) incineration, (iii) illegal fly-tipping and (iv) other means in each year since 2001. [4527]

Mr. Bradshaw: Figures from tyre manufacturers and importers show replacement tyre sales of around 28 million car and truck units in 2003. It is estimated a further 15 million units were introduced on newly registered vehicles.

The information requested, is set out in the following table, and is based on information supplied to the Used Tyre Working Group (UTWG). Figures from the UTWG can be found on www.tyredisposal.co.uk. Full 2004 figures are not yet available.

	2001	*2002*	*2003*
Used tyre arisings (tonnes)	481,000	447,000	444,000
Re-use	118,000	105,000	105,000
Materials recovery	107,000	105,000	160,000
Energy recovery	40,000	48,000	78,000
Engineering uses	16,000	29,000	15,000
Exports	10,000	13,000	13,000
Landfill	144,000	99,000	85,000
Other	47,000	47,000	-7,000

The ban on the landfill of whole tyres at all existing hazardous waste landfill sites and all new landfill sites on 16 July 2003 passed without significant effect on tyre collection or recovery capacity. The next key date will be 16 July 2006 when shredded tyres will be banned from landfilling. Whole tyres can continue to be used for landfill engineering for both hazardous and non-hazardous landfills. The numbers of tyres disposed to landfill is reducing, and 2004 returns from members of the Tyre Recovery Association, which represents tyre collectors and reprocessors and accounts for a significant proportion of overall used tyre activity, indicate that landfill disposal reduced sharply in 2004.

There are no figures kept on the number of tyres that are flytipped.

Waste Recycling

Mr. Burstow: To ask the Secretary of State for Environment, Food and Rural Affairs how many recycling centres there are in each London borough. [7218]

Mr. Bradshaw: The number of recycling centres in each London borough is shown in the table.

	Number
Barking and Dagenham	60
Barnet	75
Bexley	84
Brent	113
Bromley	50
Camden	153
Corporation of London	14

Total	4,055

White-tailed Sea Eagle

Mr. Willis: To ask the Secretary of State for Environment, Food and Rural Affairs if she will make a statement on plans to release white tailed sea eagles in the UK; and what assessment has been made of the likely impact of their releases on *(a)* other wildlife and *(b)* livestock. [7279]

Jim Knight: Plans to release white-tailed eagles in the UK English Nature is considering plans to reintroduce white-tailed eagles for the following reasons:

The white-tailed eagle is a red listed bird of conservation concern in the UK and has unfavourable conservation status in Europe.

Much needs to be done to restore it to its former global status, including conservation action in the UK

White-tailed eagles are still absent from much of their former range which encompassed all of Europe including the length of Britain, wherever there was suitable habitat, particularly coastal and freshwater wetlands.

Conservation management applied to other species of raptors has demonstrated that population increase and range expansion can be achieved most rapidly by active intervention.

What assessment has been made of the likely impact of their releases on *(a)* other wildlife and *(b)* livestock.

The species is considered to be a potentially suitable candidate for a reintroduction programme. However unless a detailed feasibility study demonstrates the likely success of any proposed reintroduction then it will not take place. The feasibility study must include an assessment against IUCN (The World Conservation Union) criteria for species reintroductions.

Plans are at such an early stage that no feasibility study has been completed. This study will need to consider a range of biological and social-economic requirements, including the impact on other wildlife and livestock. Note the following extracts from the IUCN reintroduction criteria:

The species, if any, that has filled the void created by the loss of the species concerned, should be determined; an understanding of the effect the re-introduced species will have on the ecosystem is important for ascertaining the success of the re-introduced population.

Socio-economic studies should be made to assess impacts, costs and benefits of the re-introduction programme to local human populations.

DEPUTY PRIME MINISTER

Casinos

Mr. Don Foster: To ask the Deputy Prime Minister (1) when he intends to implement a change in the use class of casinos; and if he will make a statement; [6969]

(2) what consultation his Department has undertaken since 1 November 2004 on the use class of casinos; which organisations were consulted; on what dates that consultation occurred; and if he will make a statement. [6970]

Yvette Cooper: On 1 November 2004, my right hon. Friend the Secretary of State for Culture, Media and Sport announced that the Government were minded to make a change in the Use Classes Order in respect of casinos.

The Office of the Deputy Prime Minister commissioned consultants to look into the case for changes to the Use Classes Order and the implications of such a change. We are considering the consultants report. No change will be made without full public consultation.

Computer Crime

Mr. Burstow: To ask the Deputy Prime Minister how many cases of computer *(a)* hacking, *(b)* fraud and *(c)* theft his Department recorded in each year since 2001–02; and for each year, on how many occasions computer systems have been illegally accessed by computer hackers (i) within and (ii) outside his Department. [7182]

Jim Fitzpatrick: The Office of the Deputy Prime Minister was established on 29 May 2002. For ODPM-owned systems instances of hacking, fraud, theft and illegal access recorded in each complete year since that date are as follows:

	Hacking	*Fraud*	*Theft*	*Illegal access*
2002–03	0	0	2	0
2003–04	0	0	2	0
2004–05	0	0	2	0

Employees (Assaults)

Sarah Teather: To ask the Deputy Prime Minister what estimate he has made of the number of local authority employees who have been assaulted at work in each London borough in each year since 1997. [7468]

Jim Fitzpatrick: The information requested is not held centrally and could only be provided at disproportionate cost.

EU Funding (West Midlands)

Paul Farrelly: To ask the Deputy Prime Minister whether appraisals of priority projects on the reserve list for Objective 2 funding in the West Midlands are continuing following the extraordinary meeting of the West Midlands Objective 2 Programme Monitoring Committee held on 18 May. [7719]

Yvette Cooper *[holding answer 28 June 2005]*: At the Extraordinary meeting of the West Midlands Objective 2 Programme Monitoring Committee on 18 May it was agreed that:

The appraisal of priority projects on the reserve list requiring Advantage West Midlands (the Regional Development Agency) match funding is suspended until a full application is submitted to and accepted by AWM. These projects will then be subject to a joint appraisal approach.

Programme resource will not be committed to priority projects on the reserve list until the MG Rover package of projects has been approved and then subject to resource availability, the confirmation of all match funding and necessary planning approvals being in place.

The Programme Monitoring Committee will monitor the situation, on the basis of progress reports supplied by the European secretariat in the Government Office for the West Midlands.

Fire Brigade

Sarah Teather: To ask the Deputy Prime Minister what the average response time was to an emergency call to the fire brigade in each London borough in each year since 1997. [7473]

Jim Fitzpatrick: The available information has been supplied by the London Fire and Emergency Planning Authority (LFEPA). This shows the average response time for emergency calls in each London borough averaged over the period April 1999-September 2003.

Average time for first appliance to arrive at an incident

Borough	*Minutes and seconds*
Barking and Dagenham	6:13
Barnet	6:28
Bexley	6:22
Brent	5:56
Bromley	6:36

Source:

LFEPA Incident Recording Information System (IRIS) Aril 1999 to September 2003

Mr. Hoyle: To ask the Deputy Prime Minister how many fire crews have trained for Lancashire fire brigade in each of the last three years; and how many are on the waiting list for training. [7655]

Jim Fitzpatrick: This is a matter for the local fire and rescue service. The information requested is not held centrally and could be provided only at disproportionate cost.

Housing

Jim Cousins: To ask the Deputy Prime Minister when he expects the licensing scheme for houses in multiple occupation to come into force; and when he expects to announce his decisions on the outcome of the consultation on licensing in the private sector. [8648]

Yvette Cooper: The Office of the Deputy Prime Minister is proposing that the licensing scheme for Houses in Multiple Occupation (HMOs) comes into force in October 2005.

Decisions on the key issues arising from the consultation exercise on HMO licensing were announced by my right hon. Friend, the former Minister for Housing and Planning on 6 April. Decisions on the remaining issues will be announced before the summer recess.

Sarah Teather: To ask the Deputy Prime Minister how many, and what proportion of, *(a)* privately rented and *(b)* privately owned homes in each English region do not meet the Decent Homes Standard; and what steps his Department is taking to improve these homes. [7143]

Yvette Cooper: The English House Condition Survey 2001: Regional Report (ODPM, 2003) includes details of the numbers of private sector homes that did not meet the decent homes standard in 2001. Separate data are not available for privately rented and privately owned homes. The report is available on the Office of the Deputy Prime Minister website.

We are fully committed to improving the quality of private sector housing stock by encouraging, through financial support and guidance, the development of innovative housing renewal policies by local authorities through the powers made available to them by the Regulatory Reform Order (Housing Assistance) (England and Wales) Order 2002. The Housing Act 2004 contains measures to tackle private sector non-decency through the implementation of the new housing health and safety ratings system, and licensing on homes in multiple occupancy.

Sarah Teather: To ask the Deputy Prime Minister what the total expenditure on the Starter Homes Initiative was; and how many people were helped to buy a home in each year of its operation. [7173]

Yvette Cooper: The total expenditure on the Starter Home Initiative was the original budget of £250 million, plus £53 million of extra funding from the ADP in March 2004 to help those key workers whose purchases were in the pipeline when SHI finished.

The numbers of key workers who were helped to buy a home in each year of operation:

	Number
2001–02	107
2002–03	2,616
2003–04	5,998
2004–05	1,295

There were also 306 cases where a second key worker was assisted in the same household.

Sarah Teather: To ask the Deputy Prime Minister what the total expenditure on the Key Worker Living scheme has been in each year since its inception; how many key workers have benefited from the scheme in each year; and what resources have been allocated to the scheme for future years. [7174]

Yvette Cooper: Key Worker Living (KWL) began in April 2004. In 2004–05 expenditure was £265 million and 4,015 key workers benefited from the scheme. £374 million has been allocated for 2005–06 which has so far helped another 930 key workers since April 2005 and £86 million is allocated for 2006–07. The KWL target is to help 16,348 key workers by March 7. The

Office of the Deputy Prime Minister is currently awaiting recommendations from regional housing boards on future funding levels for key workers.

Lynne Jones: To ask the Deputy Prime Minister how many homes available for rent through *(a)* Birmingham city council and *(b)* registered social landlords in Birmingham have been (i) demolished and (ii) built in each of the last 10 years. [6104]

Yvette Cooper: The information is as follows.

	Birmingham city council		*Registered social landlords*[1]
	Demolitions[2]	*New Build/ Acquisition*[3]	*New Build*
1996–97	[4]—	32	573
1997–98	[4]—	32	849
1998–99	[4]—	43	814
1999–2000	[4]—	58	497
2000–01	694	16	481
2001–02	1,239	36	455
2002–03	1,310	70	532
2003–04	857	14	788
2004–05[5]	1,337	[4]—	[4]—

[1] RSL new build completions data taken from Birmingham city council website "Development in Birmingham 2003–04".
[2] Local authority demolitions data taken from city council's business plan statistical appendix—ODPM database.
[3] New build/acquisition local authority data provided by Birmingham city council housing department
[4] No data
[5] 2004–05 demolition data taken from the draft HRA business plan, and is the planned demolitions figure, not outturn

The Housing Corporation, the funding and regulatory body for registered social landlords (RSLs) sponsored by the Office for the Deputy Prime Minister, only collects demolition data on a national level and therefore it is not possible to provide the information requested for RSL demolitions in the Birmingham area.

Dr. Cable: To ask the Deputy Prime Minister what eligibility criteria will be used to determine access to the Homebuy Joint Shared Equity Loans with Mortgage Lenders scheme. [6455]

Yvette Cooper: The Office of the Deputy Prime Minister is currently consulting on the details of our proposals for a range of new HomeBuy products, as set out in the consultation document 'HomeBuy—Expanding the Opportunity to Own' (a copy of which is available from the Library of the House).

Under our proposals the eligibility criteria for the public/private funded equity loans variant of HomeBuy will remain the same as under our proposals for Open Market HomeBuy. We will receive advice for Regional Housing Boards on eligibility. Subject to the outcome of the consultation exercise the programme will, as at present, be focussed on assisting key public sector workers such as teachers, nurses and police officers. Some social tenants and those on housing registers (ie those waiting for a council or housing association home to rent) may also be eligible.

Laptop Computers

Lynne Featherstone: To ask the Deputy Prime Minister how many laptop computers have been used by *(a)* Ministers, *(b)* special advisers and *(c)* officials in his Department in each year since 1995; how many have been (i) lost and (ii) stolen in that period; what the cost was of the use of laptops in that period; and if he will make a statement. [4122]

Jim Fitzpatrick: The number of laptop computers used by Ministers and special advisers since the creation of the Office of the Deputy Prime Minister on 29 May 2002 is as follows:

Number

	Ministers	*Special advisers*
2002	2	2
2003	2	2
2004	2	2
2005	2	2

The information requested on the use of laptop computers by officials, and associated costs, in each year since that date is not available centrally in the form requested, and could be provided only at disproportionate cost.

Departmental records show the following numbers of lost or stolen laptop computers across the Office of the Deputy Prime Minister since 29 May 2002:

	Lost			*Stolen*		
	Ministers	*Special advisers*	*Officials*	*Ministers*	*Special advisers*	*Officials*
2002–03	—	—	—	—	—	2
2003–04	—	—	—	—	—	2
2004–05	—	—	—	—	—	2
2005–06	—	—	2	—	—	[1]1

[1] Recovered

Letting Schemes

Alison Seabeck: To ask the Deputy Prime Minister how many choice-based lettings schemes have been established by local authorities in England since 2001, broken down by region. [7270]

Yvette Cooper: The following table shows the number of local authorities which indicated that they operate a choice-based lettings scheme as at April 2004. As some authorities are jointly involved in the same choice-based lettings scheme, the figures more accurately represent the number of local authorities which have adopted a choice based lettings approach rather than the number of choice-based lettings schemes in operation.

Number of local authorities involved in a choice-based letting scheme as at April 2004

North East	2
North West	17
Yorkshire and the Humber	5
East Midlands	7
West Midlands	7
East of England	7
London	18
South East	7
South West	8
England	78

Source:
ODPM's Housing Strategy Statistical Appendix

Information on choice based letting schemes has been collected since 2002; only the latest figures are shown as previous year's data are not thought to be reliable.

Local Area Agreements

Mrs. Spelman: To ask the Deputy Prime Minister what plans the Government have to extend local area agreements to lower-tier authorities. [7438]

Mr. Woolas: Lower-tier authorities are already included in Local Area Agreements (LAAs) in two-tier areas. Whilst county councils lead the development of LAAs, they must work closely with lower-tier authorities in their areas in doing so. Precisely how this engagement takes place is down to local arrangements.

Local Government Finance

Mrs. Spelman: To ask the Deputy Prime Minister if he will place in the Library a copy of the questionnaire sent to local authorities by his Department on the impact of implementing different variations of local government finance reform. [5589]

Mr. Woolas: The Office of the Deputy Prime Minister has made available in the Library of the House copies of a questionnaire issued to a small selection of local authorities about possible practical and timing issues for Local Authorities and IT suppliers related to council tax revaluation in England. We have also provided a summary of the responses which have been submitted to Lyons.

As the questionnaire makes clear, the list of reform scenarios it contains was a way of exploring some of the technical parameters relating to practical implementation of council tax revaluation. It should not be taken in any sense as an indication of likely reform options.

Lyons Review

Mrs. Spelman: To ask the Deputy Prime Minister how many full-time equivalent employees are employed in relation to the Lyons Review. [4269]

Mr. Woolas: The Lyons Inquiry team comprises 11.9 full-time equivalent employees. The efficiency and relocation team, in the Office of the Deputy Prime Minister, works on both the implications for the Office of the Lyons relocation review as well as the Gershon review. The team has three full-time members of staff and they spend about a third of their time specifically on Lyons relocation review-related work. Other members of staff across the Office of the Deputy Prime Minister, including in the regional development group, and in our non-departmental public bodies and executive agencies undertake specific work as necessary.

New Homes

Mr. Drew: To ask the Deputy Prime Minister how many new homes have been built by each local housing authority that has opted for *(a)* large scale voluntary transfer, *(b)* arm's length management organisation and *(c)* private finance initiative in each year since it did so. [6813]

Yvette Cooper: Most local housing authorities have not built any dwellings following large scale voluntary transfer, except those tabled as follows. Most social housing provision will have been through registered social landlords. Local housing authorities opting for arm length management organisation have reported no subsequent local authority house building. Local authorities with signed Housing Revenue Account private finance initiatives contracts have not reported any subsequent local authority house building.

Local authorities reporting 'local authority' house building following large scale voluntary transfer (dwellings/year)

[1] Numbers may include some registered social landlord dwellings due to misclassification.

Pensioner Home Improvements

Mr. Drew: To ask the Deputy Prime Minister what steps he has taken to ensure that local authorities adopt appropriate practices for delivering home improvements for pensioners to meet their community safety objectives; and what discussions his Department has had with the Home Office on this subject. [7191]

Mr. Woolas: Under the Regulatory Reform (Housing Assistance)(England and Wales) Order 2002 local authorities were given wide ranging new powers to provide financial assistance to home-owners and others to improve living accommodation. The Office of the

Deputy Prime Minister's circular 05/2003 advised local authorities on how they could be used to align housing renewal policies with wider strategic objectives such as the reduction of crime and antisocial behaviour.

Section 17 of the Crime and Disorder Act 1998 places a duty on named agencies to do all they can to reasonably prevent crime and disorder in their area. The decisions and activities of local bodies and organisations can have an important impact on levels of crime and disorder in communities. In recognition of this, section 17 aims to place crime and disorder reduction at the heart of local decision-making and to give it a focus across the wide range of local services that influence and impact on community safety.

Ministers and official in ODPM are in constant touch with colleagues in the Home Office to discuss these important strategic issues and how effective policies can best be delivered.

Regional Fire Control Centres

Mr. Fallon: To ask the Deputy Prime Minister how much his Department has spent on *(a)* consultancy and *(b)* other fees relating to the proposed regional fire control centres. [4936]

Jim Fitzpatrick: The FiReControl project commenced in January 2004. To the end of May 2005, the Office of the Deputy Prime Minister has spent £10,385,447 on consultancy and £2,524,472 on other fees related to the project. Some of these costs relating to building design are eligible to be reclaimed from selected accommodation developers.

Reviews (Funding)

Mrs. Spelman: To ask the Deputy Prime Minister if he will publish the budget for the conduct of *(a)* the Lyons Review and *(b)* the Balance of Funding Review. [4241]

Mr. Woolas: The Lyons Inquiry spent £239,565 in 2004–05 and has an estimated spend of £731,400 for 2005–06. The team working in the Office of the Deputy Prime Minister on the implications of the Lyon's relocation review and the Gershon efficiency review is projected to cost £110,785 in 2005–06. About £37,000 of this can be attributed to Lyon's relocation review related work.

For the Balance of Funding Review £118,789 was spent on externally commissioned research. The net cost of producing the report was about £1,000 taking account of sales. Other, administrative costs were not separately identified.

Thames Gateway Flood Risk Assessment

Bob Spink: To ask the Deputy Prime Minister if he will make it his policy to delay the need for developers to provide a flood risk assessment for each new development until the Thames gateway flood risk assessment is available. [7077]

Yvette Cooper: In line with planning policy guidance note (PPG) 25, those proposing developments in flood risk areas should carry out a flood risk assessment appropriate to the location, scale and nature of the development and should submit this with the application.

The strategic flood risk assessment currently being undertaken by the Thames Gateway South Essex Partnership will provide information allowing local authorities in the area to work together to develop land use allocation strategies for managing flood risk. It will not remove the necessity for site-specific flood risk assessments which will still be needed to consider the specific risk of flooding to the development over its expected lifetime and address issues such as surface drainage and rainwater collection and discharge, as well as risks associated from fluvial or tidal flooding.

CULTURE, MEDIA AND SPORT

Chess

Sarah Teather: To ask the Secretary of State for Culture, Media and Sport what recent assessment she has made of the case for chess to be recognised as a sport; and if she will make a statement. [8366]

Mr. Caborn: The criteria that the sports councils use to decide whether an activity should be recognised as a sport are derived from their Royal Charters, and ultimately from the Physical Training and Recreation Act 1937. Legal advice has stated that chess does not fall within the meaning of the word "sport" for the purposes of the Royal Charter, or the meaning of "physical training and recreation" in the Act. Recognition of chess would therefore require amendments to the Act.

Sport is now a devolved matter, so a change in the current position would require the unanimous support of both the Devolved Administrations (DAs) and the sports councils, before any progress could be made. It would be necessary to put a case to the DAs and the sports councils for legislative change that would include chess, and if necessary other "mind games", within the criteria for recognition as a sport. The case put forward must be able to convince them that chess provides the same benefits to the public, such as improved health and fitness, as recognised sports, in order to merit equal status and the financial support that comes with it.

Departmental Press Release

Mrs. May: To ask the Secretary of State for Culture, Media and Sport when she was first informed that her departmental press officer had disseminated a press release on behalf of her husband; and who authorised the press officer to take this action. [7293]

Tessa Jowell: The press officer, acting on his own initiative, e-mailed a single newspaper with a statement on behalf of Mr. Mills. He was not asked or encouraged to do so, and I was made aware later that day that he had done so.

National Lottery

Lynne Featherstone: To ask the Secretary of State for Culture, Media and Sport which constituencies have received *(a)* less than 10 per cent. and *(b)* less than

15 per cent. of the national average for constituencies of grants to good causes from the national lottery; and if she will make a statement. [8074]

Mr. Caborn: This answer is based on the latest commercially available constituency boundary information, which does not include the boundary changes made in Scotland for the 2005 general election.

The following constituencies have received less than 10 per cent. of the average (mean) amount awarded in each constituency:

Hornchurch
Birmingham, Hall Green
Birmingham, Hodge Hill
Southend West
Romford
Hamilton South
Billericay

Constituencies that have received less than 15 per cent. of the average (mean) amount awarded in each constituency include the seven listed above, and the following eight:

Aberdeen South
Hayes and Harlington
Croydon South
Luton North
Newport East
Birmingham, Erdington
Birmingham, Yardley
Rayleigh

However the mean average of £23.9 million per constituency is distorted because of very large grants in a few constituencies. If the median average of £13.3 million is used, no constituencies have less than 10 per cent. of this and only Hornchurch and Birmingham, Hall Green have received less than 15 per cent.

The two lists of constituencies are derived from the Department's Lottery Awards Database which is based on information supplied by the lottery distributors.

Swimming Pools

Sarah Teather: To ask the Secretary of State for Culture, Media and Sport how many swimming pools there have been in each London borough in each year since 1997. [8209]

Mr. Caborn: The information requested is provided in the following table. The information includes swimming pools provided by public and private operators.

		Of which: "x" built in								
London borough	*Total number of pools*	*1997*	*1998*	*1999*	*2000*	*2001*	*2002*	*2003*	*2004*	*2005*

TRANSPORT

Buses

Mr. Amess: To ask the Secretary of State for Transport which local authorities in England subsidise the running of bus services. [8603]

Ms Buck: The majority of subsidy for bus services outside London is provided by local transport authorities, that is county councils, unitary authorities and in metropolitan areas, passenger transport authorities. In some areas district councils also contribute to funding for bus services.

Computer Crime

Mr. Burstow: To ask the Secretary of State for Transport how many cases of computer *(a)* hacking, *(b)* fraud and *(c)* theft his Department recorded in each year since 2001–02; and for each year, on how many occasions computer systems have been illegally accessed by computer hackers (i) within and (ii) outside his Department. [7186]

Ms Buck: The Department and its Agencies recorded no cases of computer hacking in 2001–02, 30 cases in 2002–03, 71 cases in 2003–04, 31 cases in 2004–05 (internal source) and one case to date in 2005–06 (external source). Of these, the number of recorded cases attributed to fraud were 30 in 2002–03, 71 in 2003–04 and 30 in 2004–05.

The Department and its Agencies has recorded six cases of theft in 2001–02, 23 cases in 2002–03, 23 cases in 2003–04, 18 cases in 2004–05 and four cases to date in 2005–06. These cases were perpetrated by persons outside the Department and its Agencies.

Container Traffic

Vera Baird: To ask the Secretary of State for Transport what his most recent estimate is of the percentage of container traffic which entered the UK through *(a)* Harwich, *(b)* Felixstowe and *(c)* London which had final destinations north of the M62 and which was transported to those destinations by train. [7694]

Dr. Ladyman: The Department does not collect information about the destination of containers that enter UK ports and which are transported onwards by train.

Vera Baird: To ask the Secretary of State for Transport what his most recent estimate is of the tonnage of container traffic which entered the UK through *(a)* Harwich, *(b)* Felixstowe and *(c)* London which went to destinations north of the M62 by lorry. [7695]

Dr. Ladyman: Separate information is not available for individual ports. However, it is estimated that in 2003 about 650,000 tonnes of container traffic entered the UK by lorry through ports in Essex, Greater London or Suffolk and had a final destination north of the M62[1].

[1] Including Greater Manchester, Merseyside and West Yorkshire Metropolitan Areas.

Source:
"Continuing Survey of Road Goods Transport 2003"

Departmental Finance and Payroll Contract

John McDonnell: To ask the Secretary of State for Transport when the Partners Achieving Change Together (PACT) contract was let; and whether PACT work was offered to open competition via a notice in the *Official Journal of the European Community* prior to being let. [6556]

Ms Buck: The PACT contract was let in September 2002. It was tendered under OJEC competitive procurement rules, supported by the OGC gateway review process. Nine respondents were long-listed, three were short-listed and negotiations undertaken with two.

Leeds Supertram

Greg Mulholland: To ask the Secretary of State for Transport when he plans to make an announcement on the proposed Supertram scheme in Leeds; and if he will make a statement. [8382]

Derek Twigg: The Secretary of State made clear the position on the Supertram scheme in his Oral statement last summer on 20 July 2004, *Official Report*, column 159. Since then revised proposals have been submitted for consideration and will be decided upon in due course.

Light Rail Schemes

Mr. Duncan: To ask the Secretary of State for Transport how many light rail schemes have been completed and opened since 1997. [9016]

Mr. Darling: The following light rail schemes have been completed and opened since 1997:

Midland Metro—1999

Docklands Light Railway extension to Lewisham—1999

Croydon Tramlink—2000

Manchester Metrolink Phase II (to Eccles)—2000

Tyne and Wear Metro Sunderland extension—2002

Nottingham Express Transit—2004

Railways

Sarah Teather: To ask the Secretary of State for Transport how many passengers per train there were on the North London line in each year since 1997. [8392]

Derek Twigg: This information is not held centrally by the Department or the Strategic Rail Authority.

Andrew Rosindell: To ask the Secretary of State for Transport how many rail passengers travelled from Shenfield to Heathrow in each month since 2003. [8537]

Derek Twigg: This information is not held centrally by the Department or the Strategic Rail Authority.

Repatriation (Airline Failures)

Dr. Cable: To ask the Secretary of State for Transport what meetings have taken place between officials in his Department and officials in the Foreign and

Commonwealth Office to discuss arrangements to repatriate UK passengers in the event of a major airline failure. [8395]

Ms Buck: The Government have in place contingency plans to deal with crises, including a major airline failure, and officials from this Department have met Foreign and Commonwealth Office officials on a number of occasions to discuss these arrangements.

Secure Station Scheme

Mr. Burstow: To ask the Secretary of State for Transport how many stations there are in Greater London; if he will list those which have been accredited since 1998 under the secure station scheme; and what the *(a)* date of accreditation, *(b)* the dates of re-accreditation and *(c)* when accreditation lapsed was in each case. [8075]

Ms Buck: Stations are awarded secure stations status for a two year period once they have met the required accreditation standards on station design, station management, crime management, and passenger perceptions.

There are 615 rail stations in Greater London, including 34 Docklands Light Rail and 257 London Underground stations. Of these stations 131 have been accredited since 1998 under the secure stations scheme, consisting of 55 first time accreditations, 31 re-accreditations and 45 lapsed stations. A list detailing these stations along with their respective accreditation, re-accreditation and lapsed dates has been placed in the Libraries of the House.

Travel Industry

Dr. Cable: To ask the Secretary of State for Transport what recent discussions he has held with *(a)* the Association of British Travel Agents, *(b)* the Federation of Tour Operators and *(c)* the Association of Independent Tour Operators on the regulatory burden on the travel industry. [8305]

Ms Buck: On 23 June 2005 I met representatives of the Association of Independent Tour Operators to discuss their concerns on the regulatory burden in the travel industry. On 3 May 2005 officials from this Department met representatives of the Association of British Travel Agents and the Federation of Tour Operators to discuss the same issue.

Vehicle Excise Duty

Tom Brake: To ask the Secretary of State for Transport what the *(a)* total value and *(b)* percentage of total expected revenue of vehicle excise duty evasion is estimated to have been in each year since 1997–98. [5185]

Dr. Ladyman: Estimates of vehicle excise duty (VED) evasion are made by national roadside surveys undertaken by DfT statisticians. Surveys were carried out in 1994, 1999, 2002 and the latest survey took place in June 2004.

	Estimated value of loss through VED evasion (£ million)	*Estimated percentage of revenue due*
1994	200	4.1
1999	191	3.9
2002	206	4.8
2004	129	3.4

SOLICITOR-GENERAL

BAE Systems

Malcolm Bruce: To ask the Solicitor-General whether the Serious Fraud Office (SFO) asked the Defence Export Services Organisation for *(a)* information and *(b)* co-operation in respect of the SFO's investigation into allegations of bribery and false accounting concerning BAE Systems and Saudi Arabian officials. [8129]

The Solicitor-General: The question relates to an ongoing criminal investigation by the Serious Fraud Office (SFO). In the circumstances, it would not be appropriate to either confirm or deny whether the SFO has approached a particular individual or entity.

Crown Prosecution Service

Mr. Djanogly: To ask the Solicitor-General how much has been spent on the Crown Prosecution Service in each of the last 10 years. [6575]

The Solicitor-General: The following table gives the net expenditure on the Crown Prosecution Service in each of the last 10 years. Expenditure is reported in cash terms from 1995–96 to 2000–01 and in resource terms thereafter.

	£000
1995–96	296,002
1996–97	299,412
1997–98	299,691
1998–99	307,417
1999–2000	308,774
2000–01	343,382
2001–02	427,975
2002–03	459,665
2003–04	525,619
2004–05	575,554

WORK AND PENSIONS

Autism

Mr. Laurence Robertson: To ask the Secretary of State for Work and Pensions what steps the Government are taking to help people with autism find employment; and if he will make a statement. [7740]

Mrs. McGuire *[holding answer 28 June 2005]:* Our specialist Disability Employment Advisers (DEAs), who are based in jobcentres, receive training and guidance to help them support people with health conditions and disabilities into employment, including people with autism. The support provided by DEAs includes advice

on jobs and training, as well as information on in-work support, and specialist programmes to help overcome barriers to employment associated with disability.

All our Jobcentre Plus advisers have access to a Disability Awareness Open Learning Handbook, which includes information on autistic spectrum disorders; the effects they have on individuals, the implications for work, and the possible types of support an individual might need in employment. This information was approved by the National Autistic Society and is recommended learning for all advisers, and mandatory learning for DEAs. We are currently working with the society on further enhancements.

All Jobcentre Plus staff, including DEAs, also have access to information on a range of disabilities, including autism, through guidance on our Intranet.

Incapacity Benefit

Mr. Frank Field: To ask the Secretary of State for Work and Pensions how many people declared part-time earnings while claiming incapacity benefit in each of the last five years. [8497]

Mrs. McGuire: The information is not available.

Jobcentres

Mr. Swire: To ask the Secretary of State for Work and Pensions (1) what representations he has received about the reduction of staff numbers in local job centres; [7306]

(2) what plans he has to reduce the number of staff at Jobcentre Plus offices. [7307]

Margaret Hodge *[holding answer 29 June 2005]:* The administration of Jobcentre Plus is a matter for the acting chief executive, Lesley Strathie. She will write to the hon. Member.

Letter from Lesley Strathie to Mr. Hugo Swire, dated 30 June 2005:

The Secretary of State has asked me to reply to your questions concerning what representations he has received about the reduction of staff numbers in local Jobcentres, and what plans he has to reduce the number of staff at Jobcentre Plus offices. This is something which falls within the responsibilities delegated to me as Acting Chief Executive of Jobcentre Plus.

As announced in the 2004 Spending Review, the Department has plans to reduce overall staff numbers by 30,000 by 31 March 2008. Jobcentre Plus has agreed with the Department that its contribution towards that overall reduction would be a headcount target for March 2008 of 65,672 Full Time Equivalent (FTE) staff. To provide some context for that figure, at the end of May 2005 Jobcentre Plus employed 72,888 FTE staff.

There have been several representations to the Secretary of State on this subject. In addition, we are consulting closely with our recognised trade unions on the steps we are taking to meet our efficiency challenge. We consulted them whilst developing our Human Resources policies and procedures and reached a formal agreement in November 2004 on avoiding or, if that is not possible, minimising compulsory redundancies.

I hope this is helpful.

Mental Capacity Act

Mr. Burstow: To ask the Secretary of State for Work and Pensions what steps are being taken to bring appointeeships in line with the principles of the Mental Capacity Act 2005. [7082]

Mrs. McGuire: Officials are currently discussing the Act's draft Code of Conduct with officials of the Department for Constitutional Affairs, who are responsible for the implementation of the Act. They will also have discussions with the Making Decisions Alliance in the near future.

TREASURY

Tax Credits

13. **David T.C. Davies:** To ask the Chancellor of the Exchequer what recent representations he has received regarding the operation of the tax credit system. [8154]

Dawn Primarolo: Since April 2005 tax credits have been the subject of debate or statements on a number of occasions in both Houses:

6 April 2005, Westminster Hall Debate (column 437WH)

7 June 2005, Westminster Hall Debate (column 47WH)

26 May 2005, Paymaster General's statement (column 23WS)

22 June 2005, Paymaster General's statement (column 801)

22 June 2005, Paymaster General's statement repeated in the House of Lords. (column 1677)

Various representations have been made on each of these occasions, to which Ministers responded at the time.

I have also answered several questions in the House and replied to letters from Members and others.

The Ombudsman's Office and Citizens Advice have also sent me copies of their reports published on 22 June.

22. **Mr. Wallace:** To ask the Chancellor of the Exchequer how much in overpayment of *(a)* working tax credit and *(b)* working family tax credit is owed to Her Majesty's Revenue and Customs. [8163]

Dawn Primarolo: Estimates of numbers and values of child tax credit and working tax credit overpayments for 2003–04 awards at 5 April 2004, appear in the HMRC publication, "Child and Working Tax Credits Statistics. Finalised Awards 2003–04. Supplement on payments in 2003–04." The estimates are based on samples and are subject to significant sampling uncertainty. This publication can be found in the Library.

Working families' tax credit awards were based on a snapshot of income and circumstances around the time of claim, and were then fixed at a specific amount regardless of any rise or fall in income for 26 weeks.

23. **Mr. Dunne:** To ask the Chancellor of the Exchequer if he will simplify the tax credits system so that it can be explained to applicants in significantly fewer pages of guidance notes than at present. [8164]

Dawn Primarolo: I refer the hon. Member to the written statement I made to the House on 26 May 2005, *Official Report*, columns 22–23WS, setting out six measures to improve tax credits and, in particular, with regard to how HMRC communicate with families about their tax credits award.

Mr. Amess: To ask the Chancellor of the Exchequer what recent representations he has received on the operation of the tax credits system. [8140]

Dawn Primarolo: I refer the hon. Gentleman to the answer I gave to the hon. Member for Buckingham (John Bercow) in the Chamber this morning.

Child Poverty

14. **Mr. Kidney:** To ask the Chancellor of the Exchequer what progress he has made towards the target of eradicating child poverty within a generation; and what further action he intends to take in furtherance of meeting this target. [8155]

Dawn Primarolo: Child poverty more than doubled between 1979 and 1997, and was higher in the UK than anywhere else in the EU.

This Government's policy is that every child should have the opportunity to fulfil its potential. We have already lifted more than half a million children out of relative poverty, and are broadly on track to eradicate child poverty by reducing child poverty by a quarter in a quarter of the time.

Our strategy was set out in the Child Poverty Review last summer. We intend to go further by:

helping more people who want to work find work;

by providing financial support to help families with the costs of children;

by implementing our 10 Year Strategy for Childcare;

and by investing in our children's future so that by 2007–08 total funding for schools will be 60 per cent. higher than in 1996–97.

Debt Relief

15. **Ms Angela C. Smith:** To ask the Chancellor of the Exchequer if he will make a statement on his proposals for debt relief at the G8 summit. [8156]

Mr. Ivan Lewis: Last month G7 finance ministers agreed a detailed plan to match 100 per cent. bilateral debt write off with 100 per cent. multilateral debt cancellation for the 38 heavily indebted poor countries.

This covers debts owed to the World Bank, International Monetary Fund and African Development fund of some $55 billion. 18 countries will have their debts cancelled immediately, worth around $40 billion once the plan is agreed by IMF and World Bank boards.

21. **Mrs. Moon:** To ask the Chancellor of the Exchequer what progress is being made towards 100 per cent. multilateral debt relief. [8162]

Mr. Ivan Lewis: Last month G7 Finance Ministers agreed a detailed plan to match 100 per cent. bilateral debt write off with 100 per cent. multilateral debt cancellation for the 38 heavily indebted poor countries.

This covers debts owed to the World Bank, International Monetary Fund and African Development fund of some 55 billion dollars. 18 countries will have their debts cancelled immediately, worth around 40 billion dollars once the plan is agreed by IMF and World Bank boards.

Borrowing Forecast

16. **Mark Pritchard:** To ask the Chancellor of the Exchequer what changes he expects in the level of Government net borrowing in the next five years. [8157]

Mr. Des Browne: Budget projections show that net borrowing is expected to fall to a prudent level of 1.5 per cent. of GDP by 2009–10.

Shared Appreciation Mortgages

17. **Sir Nicholas Winterton:** To ask the Chancellor of the Exchequer if he will make a statement on shared appreciation mortgages. [8158]

Mr. Ivan Lewis: The Government understand the concerns of people who purchased shared appreciation mortgages in the mid 1990s. However, to date no evidence of mis-selling has been found by the Financial Ombudsman Service.

G8 (Economic Objectives)

19. **Mr. Simon:** To ask the Chancellor of the Exchequer if he will make a statement on his economic objectives for the Gleneagles summit. [8160]

Mr. Ivan Lewis: At their meeting on 10–11 June chaired by the Chancellor, Finance Ministers prepared the economic and financial aspects of the G8 summit. They agreed: that vigorous action was required by each member country to support a smooth adjustment to more balanced growth; a wide-ranging set of actions to improve the operation of the oil market to manage high and volatile prices; and a comprehensive package of measures on debt relief, aid and development. All these agreements will be reflected in discussions at Gleneagles.

Foreign Currency Reserves

20. **Mr. Hollobone:** To ask the Chancellor of the Exchequer what his latest estimate is of the value of the foreign currency reserves of the UK. [8161]

Mr. Ivan Lewis: Details of the UK Official Holdings of International Reserves are released monthly and are available from the Treasury website. The latest figures for the end of May, were gross reserves of $47,718 million, equivalent to £26,183 million when converted using the (4 pm) closing market rate of £1 = $1.8225 on 31 May.

National Insurance

Anne Main: To ask the Chancellor of the Exchequer, how much was raised from national insurance contributions in 2004–05. [8153]

Mr. Ivan Lewis: As set out in the Budget, national insurance contribution receipts for 2005–05 are forecasted to be £77.9 billion.

Stamp Duty

Mr. Bellingham: To ask the Chancellor of the Exchequer How much tax was raised from stamp duty in the *(a)* 1997–98 and *(b)* 2004–05 financial years. [8159]

Mr. Ivan Lewis: Stamp duty on property transactions raised £1.5 billion in 1997–98, and stamp duty land tax, which replaced stamp duty in 2003, raised £6.3 billion in 2004–05.

Stamp duty on transactions in the shares of UK incorporated companies raised £1.96 billion in 1997–98. The figure for the 2004–05 financial year will be published in September.

Sustainable Development

Norman Baker: To ask the Chancellor of the Exchequer, what recent discussions he has had with other Departments on sustainable development. [8149]

John Healey: I regularly meet DEFRA and other Ministers to discuss a range of issues including sustainable development. HM Treasury is also actively involved in discussions on this important issue.

HOME OFFICE

Cherie Blair (Security Arrangements)

David T.C. Davies: To ask the Secretary of State for the Home Department (1) what arrangements were made to ensure the safety of the Prime Minister's wife when she visited the US in June; and what the costs were; [7536]

(2) what security arrangements have been put in place for the Prime Minister's wife's visit to the Starhill Boutique complex in Kuala Lumpur on 31 July; and what the estimated costs are. [7545]

Mr. Charles Clarke: We seek to ensure the most effective and efficient protective security arrangements for public figures in the light of the changing threat from terrorism and other continuing risks. It is not our policy to comment on the details or costs of protective security arrangements for any individual, as to do so could compromise his or her security.

Civil Servants

Dr. Cable: To ask the Secretary of State for the Home Department what value for money procurement savings were identified and what reduction in civil service posts occurred in his Department in 2004–05. [4545]

Mr. Charles Clarke: In pre-Budget report 2004, the Chancellor reported Office for Government Commerce (OGC) value for money gains in central civil Government procurement for 2003–04 of £2 billion. OGC value for money procurement gains for 2004–05 are being calculated and will be published in the 2005 Treasury autumn performance report.

In Budget 2005, the Chancellor announced a headcount reduction of 12,500 posts by the end of 2004–05, towards the Government's target of a gross reduction of 84,000 civil service and administrative posts by 2008. My Department's performance was reported in the 2005 Home Office annual report (Cm 6528); the size of the Department's headquarters was reduced by 876 full time equivalent posts.

Correspondence

Sir Gerald Kaufman: To ask the Secretary of State for the Home Department when he will answer the letter dated 10 May 2005 from the right hon. Member for Manchester, Gorton with regard to Fanny Garvey. [7929]

Mr. Charles Clarke: I replied to my right hon. Friend on 28 June.

Sir Gerald Kaufman: To ask the Secretary of State for the Home Department when he will answer the letter dated 10 May 2005 from the right hon. member for Manchester, Gorton with regard to Ms. Zeinab Abdulrahman al-Hashmi. [7930]

Mr. Charles Clarke: I wrote to my right hon. Friend on 9 June.

Crime Figures

Mr. Burstow: To ask the Secretary of State for the Home Department how many *(a)* reported incidents and *(b)* judicial disposals of (i) violent crime, (ii) car crime, (iii) robbery and (iv) burglary there were in each of the last three years for each London borough; and what the percentage change in each case was in each year. [4776]

Hazel Blears: The available information relates to offences recorded and detected by each London borough. The statistics, including percentage changes, are available from the following web-links:

http://www.homeoffice.gov.uk/rds/pdfs04/cdrptabs.xls

http://www.homeoffice.gov.uk/rds/pdfs2/hosb703sup1.xls

Departmental Relocation

Mr. Gale: To ask the Secretary of State for the Home Department how many of his Department's posts *(a)* have been relocated and *(b)* are under consideration for relocation from London to the deprived areas of the South East. [6268]

Mr. Charles Clarke: Following the recommendations of the Lyons Review, the Home Office is developing plans to relocate up to 2,200 posts out of London and the South East by 2010. This will not exclude consideration of moving some posts to relatively deprived areas of the South East.

Prison Education

Mr. Kidney: To ask the Secretary of State for the Home Department what plans he has for improving education services in prisons. [3709]

Fiona Mactaggart: The way in which education and training are delivered in prisons, and the content of the learning offered, are changing. From August 2005, the Learning and Skills Council (LSC) will in three regions (the North West, North East and South West) take responsibility for delivering an integrated learning and skills service for offenders both in custody and the community, linking it much more explicitly with mainstream provision for post-16 learners. A greater focus on skills will lead to greater employability on release, thereby making a significant contribution to reducing re-offending. The remaining six regions in England will follow in August 2006.

The new service has at its heart the principle that education and training for offenders should be more flexible and learner centred. Literacy, language and numeracy will rightly continue to be a high priority for offender learning, but the new service will for the first time bring together the Education Service with

vocational training, in the context of a broader curriculum. The key change in the new arrangements is early, intense focus on assessing the offender learner's needs and preparing an individual learning plan that will set out learning needs—and achievements—as the individual moves through the criminal justice system, creating a seamless learning journey for offenders across prisons and probation and up to release.

The key features of the new learning and skills service are outlined in a document called the "Offender's Learning Journey", available at www.dfes.gov.uk/offenderlearning (you have to select the initiatives hyperlink to view the new delivery section.) The "Offender's Learning Journey" specifies the content of the learning and skills service to be supported by the LSC from August 2005.

Mr. Stephen O'Brien: To ask the Secretary of State for the Home Department how many and what percentage of the *(a)* adult and *(b)* youth prison population were in education in each year between 1994 and 2004. [3247]

Fiona Mactaggart: The Prison Service do not collect centrally individual information on prisoners participating in learning and skills through its contracts with education providers.

However, the Youth Justice Board target is to provide all young people in young offender institutions with 25 hours per week of education, training and personal development.

For adults, a 2003 report published by the Learning and Skills Development Agency ('Education, Training, Assessment and Learner Support in HM Prisons and Young Offender Institutions'), found that 39 per cent. of prisoners were engaged in education and training.

Home Detention Curfew Scheme

Lynne Featherstone: To ask the Secretary of State for the Home Department if he will make a statement on the Home Detention Curfew Scheme. [3977]

Fiona Mactaggart: The Government consider the Home Detention Curfew Scheme (HDC) is working well and has no proposals for change.

The HDC scheme enables prisoners, primarily those serving sentences of between three months and under four years, to return to the community up to 135 days earlier than their normal release date (half-way point of the sentence). Prisoners must have a suitable address and pass a risk assessment before release can be granted. If considered suitable, prisoners are released under licence and are subject to an electronically monitored curfew, normally for 12 hours a day, at an address within England and Wales. If they breach the licence conditions they are liable to be returned to prison to serve the remaining custodial portion of their sentence in custody.

Certain categories of prisoners are statutorily excluded from HDC, including prisoners subject to the registration requirements of the Sexual Offences Act 2003 and prisoners serving extended sentences. In addition, prisoners with any history of sexual offending or serving sentences for certain serious offences are presumed unsuitable for release on HDC unless there are exceptional reasons to grant release.

Prisoners serving determinate sentences of four years or more whose offences were committed on or after 4 April 2005 are not statutorily excluded from HDC but they will be presumed unsuitable for release on HDC unless the governor considers there are exceptional circumstances.

Lost/Stolen Passports

Mr. Oaten: To ask the Secretary of State for the Home Department how many passports have been recorded as *(a)* lost and *(b)* stolen since the introduction of secure delivery. [6375]

Mr. Charles Clarke: The secure delivery of passports commenced on 9 February 2004. Since that time, almost 8.25 million deliveries have been completed. Up to 31 March 2005 a total of 683 passports have been recorded as lost or stolen in the post and have not reached the intended customer. Of these, 217 have been confirmed as stolen, 77 passports have subsequently been recovered and the remaining 389 are considered lost, but remain under investigation by UKPS or SMS, as they are likely to have been misposted and may yet be returned. In comparison in the final year of the Royal Mail contract 3,593 passports were reported lost or stolen.

National Probation Directorate (Risk Assessment)

Mrs. Gillan: To ask the Secretary of State for the Home Department if he will publish the risk assessment commissioned by the National Probation Directorate in March. [4967]

Fiona Mactaggart: The Home Office published the National Probation Service (NPS) risk register, as agreed with the NPS Audit committee, identified as part of the 2005–06 Business Plan on the NPS website on 29 March. The summary of the risk was also published in the booklet that explains in detail the content of the 2005–06 Business Plan.

Victims of Crime (Online Information)

Mr. Oaten: To ask the Secretary of State for the Home Department when the project to make it possible for victims of crime to track the progress of their case online was initiated; what stage the project has reached; whether it is on schedule; and what the latest estimate of the cost of the project is. [4998]

Fiona Mactaggart: The facility for victims of crime to track the progress of their case online was a target for the CJS IT programme in the SR2002 period (commencing 2003–04).

The "No Witness No Justice" (NWNJ) initiative is setting up witness care units that provides trained intermediaries, who understand the needs of victims and witnesses and will be more responsive to their individual requirements. The IT tool to support the witness case officers is being rolled out now, with the first release available from 20 June 2005. This offers officers access to existing case data stored on the Crown Prosecution Service's case management system plus the ability to search by witnesses. Enhancements will be available in November 2005 that will allow the officers to add/amend case details relating to victims and witnesses.

This IT support is being funded from within the CJS IT ring-fence, with allocations of £1.2 million in 2004–05 and £6.5 million in 2005–06.

Police (Assaults)

Mr. Hancock: To ask the Secretary of State for the Home Department how many policemen have been hospitalised following assaults while on active duty in each of the last five years. [5226]

Hazel Blears: The information requested is not collected centrally.

Prisons

Lynne Featherstone: To ask the Secretary of State for the Home Department how many additional prison places have been provided, and at what cost, in each of the last six years; what the average cost of building a new prison place is; and if he will make a statement. [4611]

Fiona Mactaggart: The number of prison places provided in each financial year since 2000–01, and the cost of providing these places, is provided in the table. These figures include both expansions at existing establishments and the construction of new prisons.

The average cost for providing these prison places is £99,839, also including both the costs of capacity expansions at existing prisons and the construction of new prisons.

Annex A

	Number of places provided	*Cost (£ million)*
2005–06	1,120	[1] —
2004–05	2,571	291.4
2003–04	1,372	136.5
2002–03	1,818	158.8
2001–02	1,013	105.2
2000–01	680	52.3

[1] The number of places for 2005–06 includes all places currently scheduled for delivery during 2005–06. Full details of costs for 2005–06 are not yet available.

Helen Jones: To ask the Secretary of State for the Home Department how many young people were held in adult prisons on the latest date for which figures are available. [2725]

Fiona Mactaggart *[holding answer 9 June 2005]:* On 30 April 2005 there were 3,287 young persons aged under 21. This includes some 21-year-olds who have not yet been reclassified as adults held in prison establishments which also hold adults, as recorded on the Prison Service IT system.

John Battle: To ask the Secretary of State for the Home Department what plans he has to change the maximum length of prison sentence that can be passed by a magistrate; and if he will make a statement. [1722]

Fiona Mactaggart: The maximum custodial penalty a magistrate can pass is currently six months for a single offence; the Criminal Justice Act 2003 increases this to 12 months. Implementation will be in September 2006.

Mr. Drew: To ask the Secretary of State for the Home Department whether he has plans to penalise the contractors at HMP Rye Hill following its recent inspection and controller reports. [3874]

Fiona Mactaggart: Recent events, including the forthcoming HMIP inspection report of HMP Rye Hill, will be given due consideration by the Office for Contracted Prisons in deciding whether to penalise the contractor for failing to deliver against the contract. All available options will be considered, including the imposition of financial penalties.

Mr. Drew: To ask the Secretary of State for the Home Department how many instances of the finding of illicit alcohol there were at Rye Hill Prison during 2004–05 [3876]

Fiona Mactaggart: A total of 72 finds of illicit alcohol (fermenting liquid) were reported at HMP Rye Hill during the 2004–05 financial year.

Private Finance Initiative

Mr. Philip Hammond: To ask the Secretary of State for the Home Department if he will list the private finance initiative and public private partnership projects his Department is undertaking; and what the status of each is. [2372]

Mr. Charles Clarke: The table lists the private finance initiative and public private partnership projects which the Home Department is currently engaged and their status.

Home Office PFI/PPP projects

Commissioning body/project name	*Signed*	*Operational*
Home Office/IT 2000 (Sirius)	Yes	Yes

Prison Service/HES 2	Yes	Yes

Probation Service/Resources

Lynne Featherstone: To ask the Secretary of State for the Home Department what ratio of staff to clients is operated by the London Probation Service; and if he will make a statement. [2865]

Fiona Mactaggart: For every operational member of staff there are 60 offenders of whom 25 will be in prison and 35 in the community.

Mr. Oaten: To ask the Secretary of State for the Home Department what plans he has to target probation resources at *(a)* high risk and *(b)* very high risk offenders. [4994]

Fiona Mactaggart: The National Offender Management Model, sent to all probation areas in January, embodies the principle that resources should follow risk and, in particular, that greater resources should be devoted to those offenders who are assessed as being of high and very high risk of re-offending and of causing harm to the public. There is a tiering framework that helps offender managers to allocate offenders to the appropriate level of risk and resource.

All probation areas are required to implement the Model and have it fully operational for all community sentences by March 2006. The Model will then be used for all custodial sentences by March 2008.

The Multi-Agency Public Protection Arrangements (MAPPA), established by the Criminal Justice and Courts Services Act 2000 to reduce the serious re-offending behaviour of sexual and violent offenders and to protect the public, also embody the principle that resources follow risk.

Publication Costs

David Davis: To ask the Secretary of State for the Home Department how much his Department has spent on producing publications in each year since 1997. [7006]

Mr. Charles Clarke: The amount spent by the Home Office on the printing of publications was:

	£
1999–2000	2,626,032.15
2000–01	3,128,079.64
2001–02	2,994,877.00
2002–03	2,492,883.96
2003–04	2,986,017.11
2004–05	2,233,511.70

The costs provided are those recorded centrally by the Home Office Communication Directorate. These are printing costs only. Other costs involved in production e.g. design, artwork have not been recorded centrally.

Data are not available before 1999 as prior to this date, publications spend was not recorded centrally.

Rape Crisis Organisations

Mr. Paul Goodman: To ask the Secretary of State for the Home Department how many rape crisis organisations, and other organisations helping female survivors of sexual violence, received funding from his Department in *(a)* 2001, *(b)* 2002, *(c)* 2003 and *(d)* 2004; and how much each organisation received. [1519]

Fiona Mactaggart: The Home Office funded the rape crisis federation, an umbrella body for some 43 local rape crisis groups, from April 2001 until its closure in November 2003. Funding in the financial years between 2001 and 2004 was as follows:

	£
(a) 2001–02	406,000
(b) 2002–03	432,000
(c) 2003–04	209,800

In 2004 additional funding of £4 million over two financial years was placed in the victims fund to support the development of services for victims of sexual offending. In 2004–05 financial year, 45 organisations received funding to provide a range of community-based services to male and female victims of sexual violence. Of those, 34 organisations provide women-only or gender-neutral services. Details of victims fund awards for the 2004–05 financial year are set out in the table.

Victims fund—2004–05 grant funding

Organisation	*Client Group*	*Awarded funding (£)*
Breaking Free	Women victims and survivors of childhood sexual abuse	10,284
CIS'ters	Female adult survivors of childhood sexual abuse	23,350
Colchester Rape Crisis Line (CRCL)	Female victims of sexual violence	35,450
Cornwall Rape and Sexual Abuse Centre (CRASAC)	All victims of sexual violence and abuse	8,120
Coventry Rape and Sexual Abuse Centre (CRASAC)	Female victims of sexual violence and abuse	4,910
Croydon Rape and Sexual Abuse Support Centre	All survivors of rape and/or childhood sexual abuse	27,080
Doncaster Rape and Sexual Abuse Counselling Centre	All victims of sexual violence (aged 14 plus)	3,066
East Kent Rape Line	Female victims of sexual violence	9,688
Family Matters	All victims of childhood sexual abuse	5,752
Grimsby and Scunthorpe Rape Crisis	All adult victims of sexual violence	6,102
Helping Everyone Abused Live (HEAL)	All victims of childhood sexual abuse	10,286
The Jigsaw Project	All victims of sexual violence	9,975
Lilith Project	Women experiencing violence	14,329
Merseyside Rape and Sexual Abuse Centre	Female victims of sexual violence	12,672
National Association for People Abused in Childhood (NAPAC)	Adult survivors of childhood sexual abuse	15,000
New Pathways	All victims of sexual violence	16,500
The NIA Project	Female victims of physical/sexual violence	8,960
North West Wales Rape and Sexual Abuse Support Centre	All victims of sexual violence	7,685
One in Four	Adult victims of sexual violence	24,993
The Quetzal Project	Female victims of sexual abuse	46,000
Rape Crisis Co-ordination Group (RCCG)	All victims of sexual violence	18,200
Rape and Sexual Violence Project	All victims of sexual violence	12,500
Rights of Women	Female victims of sexual violence and abuse	21,000
Sexual and Domestic Abuse and Rape Advice Centre	All victims of sexual or domestic violence	18,036
Sheffield Women's Counselling and Therapy Service	Female victims of childhood sexual abuse.	12,500

Victims fund—2004–05 grant funding

Organisation	*Client Group*	*Awarded funding (£)*
Southampton Rape Crisis and Sexual Abuse Counselling Service (SRC)	All victims of sexual violence	3,700
South Essex Rape and Incest Crisis Centre (SERICC)	Female victims of sexual violence (aged 13 plus)	31,520
The Survivors Trust	Represents specialist voluntary sector organisations	32,800
Warrington Rape and Sexual Abuse Centre	All victims of sexual violence	5,995
Warrington Rape and Sexual Abuse Centre (linked with above recommendation)	All victims of sexual violence	7,745
Women's Counselling Service	Female victims of sexual violence	2,000
Women's Counselling and Therapy Service Leeds	Adult female survivors of childhood sexual abuse	670
Women and Girls Network	Female victims of sexual, physical or emotional violence	31,700
Women's Support Network	Female victims of domestic/sexual violence	19,450
Worcestershire Rape and Sexual Abuse Support Centre (WRSASC)	Adult female victims of sexual violence	23,439

Rehabilitation of Offenders Act

Mr. Oaten: To ask the Secretary of State for the Home Department what steps he has taken to implement the recommendations of the 2002 review of the Rehabilitation of Offenders Act 1974. [4680]

Fiona Mactaggart: The Government response to the 2002 review of the Rehabilitation of Offenders Act 1974, was published in April 2003.

The Government accepted the majority of the review's recommendations and proposes to legislate as soon as there is an appropriate parliamentary opportunity.

UK-US Data Transfer

Mr. Oaten: To ask the Secretary of State for the Home Department if he will list the memoranda of understanding governing the exchange of information between the UK and US *(a)* governments and *(b)* law enforcement agencies. [4676]

Mr. Charles Clarke: The Home Office does not hold a comprehensive list of all agreements with the United States, and law enforcement agencies can negotiate memoranda of understanding with other countries on their own initiative.

Young Offenders

Mr. Malins: To ask the Secretary of State for the Home Department how many crimes have been committed on school premises by persons under 18 years in each of the last five years for which figures are available, broken down by category of offence. [5825]

Hazel Blears *[holding answer 20 June 2005]:* The Home Office recorded crime statistics do not separately identify those offences which took place on school premises and so the information requested is not available.

Mr. Stephen O'Brien: To ask the Secretary of State for the Home Department what the target is of the Youth Justice Board for the number of hours a week young offenders should spend in education; and how many juvenile establishments met this target in (i) 2002–03 and (ii) 2003–04. [4496]

Fiona Mactaggart: The targets for education in the custodial establishments for juvenile offenders with which the Youth Justice Board had contractual arrangements or service level agreements in 2002–03 and 2003–04 were as follows:

2002–03

Prison Service young offender institutions: 15 hours a week

Contracted-out young offender institution: no target

Secure training centres: 25 hours a week

Local authority secure children's homes: no target

2003–04

Prison Service young offender institutions: 20 hours a week

Contracted-out young offender institution: 30 hours a week

Secure training centres: 25 hours a week

Local authority secure children's homes: 25 hours a week

The Youth Justice Board reports performance against target as follows:

2002–03

14 of the 15 young offender institutions run by the Prison Service met the target.

Apart from one centre for a period in September, all secure training centres met the target.

There are no centrally-collected data relating to educational performance of local authority secure children's homes or the contracted-out young offender institution in 2002–03.

2003–04

10 of the 13 young offender institutions run by the Prison Service met the target.

All secure training centres met the target.

There is no centrally-collected data relating to educational performance of local authority secure children's homes or the contracted-out young offender institution in 2002–03.

INTERNATIONAL DEVELOPMENT

Aid Missions

Mr. McGovern: To ask the Secretary of State for International Development what provision the Government have made to continue aid missions in countries without British embassies. [7007]

Hilary Benn: DFID uses a number of management arrangements to administer its overseas aid programmes. A limited number of aid programmes are managed from the UK, while the majority are managed from offices in the country concerned. DFID Country Offices may be co-located with a British Embassy or High Commission, or may operate from stand-alone premises, depending on local circumstances. Were an Embassy to close in a country where we are already operating, we would review management arrangements. However, our aid programmes are not contingent on the presence of a British Embassy. Examples of countries where DFID operates successfully, but where there is no British Embassy, are Nicaragua and Kyrgyzstan.

Computer Crime

Mr. Burstow: To ask the Secretary of State for International Development how many cases of computer *(a)* hacking, *(b)* fraud and *(c)* theft his Department recorded in each year since 2001–02; and for each year, on how many occasions computer systems have been illegally accessed by computer hackers (i) within and (ii) outside his Department. [7185]

Hilary Benn: The numbers of cases of computer hacking, fraud and theft in DFID were as follows:

	Hacking	*Fraud*	*Theft*
2001–02	0	0	8
2002–03	0	0	7
2003–04	1	0	7
2004–05	1	0	4

DFID computer systems were accessed illegally by computer hackers from outside the Department on one occasion in each of the years 2003–04 and 2004–05.

Debt Relief

Mark Simmonds: To ask the Secretary of State for International Development what bilateral and multilateral discussions have taken place regarding debt relief for *(a)* Bolivia, *(b)* Guyana, *(c)* Honduras, *(d)* Lao People's Democratic Republic and *(e)* Nicaragua. [6939]

Mr. Thomas: There have been extensive bilateral and multilateral discussions on debt relief for these countries. Most recently, both the Chancellor and I met President Jagdeo of Guyana to discuss debt relief among other issues.

Bolivia, Guyana, Honduras, the Lao People's Democratic Republic (LAO PDR), and Nicaragua are all classified as Heavily Indebted Poor Countries (HIPC). They are therefore eligible for the debt relief being provided to HIPC countries that have demonstrated their commitment to poverty reduction. Bolivia, Guyana, Honduras and Nicaragua have all successfully completed the HIPC process. As part of this, their progress in reducing poverty and implementing economic reforms was discussed a number of times at the World Bank and other financial institutions. The Lao PDR is not opting for debt relief at present, so no such discussions have taken place.

Recently, G8 Finance Ministers agreed a further debt relief initiative which, when agreed by the Boards of the World Bank, the International Monetary Fund (IMF) and the African Development Bank, would cancel up to $55 billion worth of debt stock for 38 countries. Bolivia, Guyana, Honduras and Nicaragua are among 18 countries that would qualify for this assistance immediately. The proposal will be discussed at the World Bank and the IMF Annual Meetings.

Education (Millennium Development Goal)

Mr. Martyn Jones: To ask the Secretary of State for International Development what recent assessment he has made of progress towards the Millennium Development Goal to provide universal primary education in Africa. [5693]

Hilary Benn *[pursuant to the reply, 23 June 2005, Official Report, c. 1134W]:* There was a factual error in the final sentence of my original response. DFID has committed to providing £1.4 billion to education globally over the next three years, rather than to Africa alone as stated.

Everything but Arms Agreement

Keith Vaz: To ask the Secretary of State for International Development what the remit of the Everything but Arms agreement is; and what assessment has been made of its effectiveness. [5621]

Hilary Benn: The Everything but Arms initiative (EBA) is the EU scheme to give all least developed countries duty and quota free access to the EU market for all products, except armaments. The scheme was introduced in February 2001. Three products, however, were deemed sensitive enough for the EU not to open its borders to them immediately. Full, unrestricted market access for these products—sugar, rice and bananas—is being phased in gradually and will be completed in 2009.

There have been several assessments of the effects of the scheme, including by the World Bank who concluded that the impact of EBA has been relatively limited, partly because the vast majority (some 99 per cent.) of EU imports from the LDCs are in products that the EU had already liberalised, and the complete removal of barriers to the key remaining products, rice, sugar and bananas has been delayed. There is a group of the LDCs for whom EU trade preferences on existing exports are not significant since these exports are mainly of products where the normal rate of duty is already zero. Export diversification is the key issue for these countries. For other LDCs, EU preferences have the potential to provide a more substantial impact on trade.

However, the World Bank assessment shows that only 50 per cent. of EU imports from those eligible LDCs, who are not from the African, Caribbean and Pacific (ACP) grouping, actually request preferential access to the EU. The prime reason for this low level of utilisation would appear to be the rules of origin—how or where a product can be produced in order to qualify for a preference. This is because in many cases, the criteria are set so that in practice an LDC must produce a product entirely within its borders, including any inputs or components, in order to qualify for preferential treatment. This requirement is beyond the

production capacity of most LDCs, and indeed does not reflect modern business and production patterns, where components or other inputs such as yarn or fabric are imported from the most competitive sources wherever they may be. The World Bank, and indeed many others, recommends more simple and liberal rules of origin to enhance the impact of EU trade preferences both in terms of improving market access and in stimulating diversification towards a broader range of exports. We have already seen this effect in certain African exports to the US, and some Asian exports to Canada.

The EU is currently reviewing its Rules of Origin, with a view to changing them. Building on the evidence available, the UK will be pressing to ensure that the changes better reflect current business practices and support, rather than hinder, the operation of preference schemes and the economic development these schemes are intended to stimulate.

Female Education (Africa)

Mr. Jim Cunningham: To ask the Secretary of State for International Development what recent assessment he has made of progress towards access to education for women in Africa. [6985]

Hilary Benn *[holding answer 27 June 2005]:* The most recent assessment of progress towards all the Millennium Development Goals (MDG)s) is a United Nations report published in June 2005.

The picture of girl's access to education is not uniform across Africa. As reported in the United Nations Millennium Development Goal Report (2005), Sub-Saharan Africa has made limited progress towards increasing girl's access to education. The most recently available figures from 2001 indicate that 86 girls per 100 boys are enrolled at primary school and 79 girls per hundred boys are enrolled in secondary school. The UN's 2004 chart shows that this region is not on track to meet the equal girls enrolment in primary and secondary school MDG targets by 2015 without dramatically scaled up efforts. However the picture is quite different in Northern Africa, with 93 and 96 girls per 100 boys enrolled in primary and secondary schools respectively and the region on track to meet both these MDG targets.

DFID puts a high priority on expanding primary school enrolment and promoting girls education in Africa.

Health Care (Developing Countries)

Andrew George: To ask the Secretary of State for International Development (1) what discussions he has had with the World Bank on its policy on charging user fees for health care in developing countries; [6752]

(2) what plans there are to discuss charging of user fees for health care in developing countries at the G8 summit in July; [6753]

(3) what assessment he has made of the merits of charging user fees for health care in developing countries. [6754]

Hilary Benn: DFID's recent assessments are that official user fees contribute minimal amounts to the financing of public services. Additionally, official user fees are a significant barrier to poor people's access to basic health services. In the poorest countries, there has been little success implementing fee exemptions and waivers targeted to poor people. Evidence from Uganda and elsewhere suggests that removing official fees boosts access to services. Therefore, DFID strongly supports the removal of official user fees for basic health care.

Other fees and charges such as those for medicines, for transport to clinics, and informal or private charges for service, can be more significant in scale, both as a barrier to access and in terms of the revenue they generate. DFID supports the removal of other fees and charges, and helps countries to identify alternative sources of finance for basic health care.

The G8 summit will discuss financing of health care as part of the Africa agenda. To make improved access to services a reality, we are encouraging the removal of user fees and we are seeking significantly increased resources for health. At Gleneagles we are calling for an extra $50 billion a year in development assistance. DFID has regular policy discussions with the World Bank at both Headquarters and country level. This includes discussions on options for financing of health services—the World Bank does not have a blanket policy on user fees. We will continue to work with the World Bank, and other partners such as the World Health Organisation, in supporting countries to make progress towards universal access to basic health services.

International Development Organisations (Subscriptions)

Andrew George: To ask the Secretary of State for International Development how much the Government have committed to the *(a)* World Bank Group, *(b)* European Bank for Reconstruction and Development, *(c)* European Investment Bank, *(d)* Asian Development Bank, *(e)* African Development Bank and *(f)* Inter American Development Bank in each of the last five years, broken down by (i) subscribed funds, (ii) unsubscribed funds and (iii) sums paid in capital. [6843]

Hilary Benn *[holding answer 23 June 2005]:* The financing arrangements of the World Bank Group, Asian Development Bank (AsDB), African Development Bank (AfDB) and Inter-American Development Bank (IaDB) are broadly similar in structure. Capital subscriptions were paid in when the UK joined these institutions, and further amounts are held by the UK, and other shareholders, as "callable" capital—that is money which the bank can draw upon if necessary. There have been no demands by these institutions on the UK's callable capital in the last five years.

These institutions make loans on different terms. Loans at or near market rates are provided to better-off countries, and are self-financing. In addition, each of these institutions has a concessional lending arm that provides low interest, long-term loans and grants to poorer countries. The funding for these concessional resources is supplemented—replenished—by donor governments on roughly three-year cycles. The following table shows the amounts committed by the UK to the replenishments over the last five years. There have been no replenishments for the Inter-American Development Bank during this time.

£ million

	International Development Association of the World Bank	African Development Fund of the AfDB	Asian Development Fund of the AsDB
2000–01	—	—	—
2001–02	—	—	84.7
2002–03	1,000	121.8	—
2003–04	—	—	—
2004–05	1,330	178.7	114.1

Note:
Commitments shown under 2004–05 are subject to parliamentary approval.

In addition to the amounts shown, "incentive" contributions have been agreed, which are conditional on progress being achieved in key areas. The amounts are £100 million for the World Bank and £27.5 million for the African Development Bank. The case for an additional contribution to the Asian Development Bank will be considered at the end of 2006.

The European Bank for Reconstruction and Development was established in 1991. The UK share of the bank's capital is 8.5 per cent., which is around €1.7 billion. Of this, €446 million is paid-in capital, and the Government are making annual instalments of around £16 million to fulfil this commitment; the total amount will have been paid by 2009. EBRD does not make concessional loans.

After the enlargement of the European Union in 2004, the European Investment Bank's (EIB) capital was increased to €164 billion. The UK has a share of 16.3 per cent., which is €26.6 billion. Of this amount, only 5 per cent. is paid-in capital. In the last five years, there have been increases in the UK's share of the subscribed and paid-in capital but these have been fully paid from the European Investment Bank's Reserves. EIB lending is predominately non-concessional.

In addition to the contributions we provide to these institutions' core budgets, DFID provides funding to forward particular objectives or to finance specific projects and activities. Such financing includes country specific trust funds, for example for Afghanistan; funding for research and analysis; and resources for centrally-managed initiatives such as the Heavily Indebted Poor Countries' Trust Fund, which channels donor resources to assist multilateral organisations provide their share of debt relief to countries.

Iraq

Mark Simmonds: To ask the Secretary of State for International Development what assistance his Department has provided to the government of Iraq in developing *(a)* running water, *(b)* sanitation *(c)* electricity and *(d)* gas services. [6936]

Hilary Benn: DFID has committed more than £70 million in bilateral assistance towards improved water, electricity and fuel supplies in southern Iraq, to the benefit of over five million people. £20 million was spent on an Emergency Infrastructure Programme in 2003 and 2004, and a further £18 million has been committed for quick-impact emergency infrastructure rehabilitation in 2004 and 2005. A new £40 million power, water and fuel project began in April 2005, which will provide technical advice to the Ministry of Electricity in Baghdad on the development of a national energy strategy as well as improving infrastructure in southern Iraq.

DFID also funds a team of technical advisers to help co-ordinate reconstruction projects in line with Iraqi priorities in southern Iraq, working closely with the UK military, the US Project and Contracting Office (PCO) and other donors.

Further DFID support for essential services in Iraq has been channelled through UN agencies. Full details of DFID's contribution to reconstruction in Iraq can be found at www.dfid.gov.uk/countries/asia/iraq.asp.

Latin America

Mark Simmonds: To ask the Secretary of State for International Development if he will make a statement on Latin America's progress towards reaching the millennium development goals by 2015; and if he will make a statement. [7364]

Mr. Thomas: Latin America's progress towards the Millennium Development Goals (MDGs) has been very uneven. Each country has made different degrees of progress towards different targets, and at widely varying speeds.

The region appears to be on track to meet its 2015 targets for education, access to water and sanitation, and reducing hunger. In particular, rapid progress has been made towards reducing the prevalence of underweight children, universalising net enrolment in primary schools, reducing child and infant mortality, and increasing the proportion of the population with access to improved water sources. Insufficient progress has been made, however, on getting all children to actually complete primary school, halting the spread of HIV, and reversing the loss of environmental resources. Mixed progress has been made on income poverty and hunger reduction, the coverage of improved sanitation, and the various indicators of gender equity. While the proportion of the region's population living in slums has fallen slightly, absolute numbers have actually increased. Because of data limitations, it is very difficult to assess progress on improving maternal health.

Even within countries, there tend to be marked differentials between ethnic groups and different geographic regions. Because Latin America has such high levels of inequality, it is important not to let national average figures obscure these pockets of poverty and social exclusion.

Mark Simmonds: To ask the Secretary of State for International Development what progress his Department has made in working with the *(a)* Inter-American Development Bank and *(b)* World Bank to improve the access of poor and excluded people in Latin America to (i) local and national markets and (ii) international trade. [7369]

Mr. Thomas: DFID has recently concluded the design of a new £7.6 million programme (the Latin America Markets and International Trade programme) to help the Inter-American Development Bank (IDB) and World Bank to better facilitate increased access of poor

people in Latin America to markets and the benefits of international trade. The design of the programme has involved extensive dialogue with these Banks as well with non-governmental organisations and other partners. It will be implemented over the next four years and will be evaluated in 2006–07 and at its conclusion in 2008–09.

The programme will build on other existing and planned co-operation between DFID and the Banks. In Bolivia, for example, the IDB's participation in DFID's 'Making Markets Work for the Poor' project has provided lessons for a large IDB project to support access to markets of poor, small-scale farmers. In Nicaragua, DFID will be supporting greater access of poor people to markets in the eco-tourism sector in a way that is intended to influence both IDB municipal development projects as well as a World Bank competitiveness project in the country.

Mark Simmonds: To ask the Secretary of State for International Development what his Department's *(a)* bilateral and *(b)* ultilateral expenditure has been in each year since 1997 in (i) each country in Latin America and (ii) Latin America; and if he will ake a statement. [7370]

Hilary Benn: DFID's bilateral expenditure for prior years was as follows:

£ million

Country	*1997–98*	*1998–99*	*1999–2000*	*2000–01*	*2001–02*	*2002–03*	*2003–04*

Chile	1.14	1.03	0.41	—	0.10	0.15	0.40
Colombia	2.23	2.62	1.54	1.73	0.93	0.60	0.40
Ecuador	1.52	1.10	0.75	0.54	0.28	0.36	0.19
Paraguay	0.20	0.26	0.26	0.18	0.09	0.07	—
Peru	4.07	3.73	4.51	4.30	8.17	3.40	2.82
Uruguay	0.22	0.25	0.30	—	—	—	—
Venezuela	0.18	0.18	0.94	0.04	—	—	—
Latin America Regional	0.35	0.85	0.17	0.22	0.53	1.45	1.37

Figures are not yet available for 2004–05. It is not possible to disaggregate funding through our regional programmes on a country basis. However, most countries in Central and Latin America will have benefited from our regional programmes.

Multilateral institutions record funding by calendar year. The UK share of funding of grants and concessional lending by these institutions was as follows:

£ million

Country	*1997*	*1998*	*1999*	*2000*	*2001*	*2002*
Central American countries						
Costa Rica	0.28	0.89	0.38	0.32	0.29	0.25
El Salvador	1.90	2.27	1.41	2.31	2.02	2.04
Guatemala	2.90	3.39	3.10	3.36	2.58	3.73
Honduras	5.28	5.49	5.05	4.65	12.54	1.73
Mexico	1.05	1.06	1.09	1.00	3.00	1.16
Nicaragua	5.79	10.71	5.94	10.65	9.88	3.31
Panama	0.43	0.50	0.50	0.59	0.50	1.31
Latin American Countries						
Argentina	1.50	2.56	3.63	3.25	15.71	[1]-6.07
Bolivia	9.88	8.47	2.41	6.58	11. 54	0.68
Brazil	3.05	4.51	5.66	8.78	14.12	11.17
Chile	2.19	0.70	0.49	0.98	1.18	[1]-0.74
Colombia	2.65	1.25	1.64	2.43	2.11	1.80
Ecuador	0.93	1.63	1.29	1.25	0.83	1.07
Paraguay	0.80	0.51	0.57	0.78	0.96	0.98
Peru	2.42	9.29	3.50	4.02	3.06	1.91
Uruguay	0.37	0.49	0.37	0.44	0.35	0.31
Venezuela	0.48	0.85	0.51	1.52	0.79	0.90

[1] Debt repayments on concessional lending exceeded new grants and concessional loans to these countries.

Figures are not yet available for calendar years 2003 and 2004.

Malarial Infection

Mr. Ian Austin: To ask the Secretary of State for International Development how much his Department has invested in research into the role fungal spores may play in combating malarial infection. [7732]

Hilary Benn: Neither DFID nor the EC have invested in research specifically into the role that fungal spores can play in combating malarial infection. Research in this area was funded in the UK by the Wellcome Trust. The possible use of fungal spores is a recent addition to the range of interventions which play a role in malaria control, of which DFID funds research into new drug development, improved health systems and bed nets totalling £2 million per year.

Medical Staff (Developing World)

Rosie Cooper: To ask the Secretary of State for International Development if he will make a statement on the UK's recruitment of medical staff from the developing world. [7896]

Hilary Benn: The UK is the only developed country to have implemented and reviewed policies that explicitly prevent the targeting of developing countries for recruitment of health workers. The Code of Practice for International Recruitment of Healthcare Professionals

(available at http://www.dh.gov.uk), prevents the NHS from actively recruiting healthcare professionals from low and middle-income countries unless there is a government-to-government agreement in place. The code of practice was revised and strengthened last year to widen its scope to include temporary workers and to enable all healthcare organisations, including in the independent sector, to sign up to its principles.

Middle East

Richard Burden: To ask the Secretary of State for International Development what assessment he has made of the potential danger from asbestos and other materials in the rubble of settlement buildings cleared by Israel in connection with the Gaza disengagement plan; and what sources have offered funding to tackle the problem. [7480]

Hilary Benn: DFID takes very seriously the potential danger from asbestos and other materials caused by the demolition of settlement buildings by Israel during its disengagement from Gaza. We understand that a World Bank expert is in place to advise Israeli and Palestinian authorities on the issue of rubble disposal. We have no current plans to carry out our own assessment. DFID is supporting the Rapid Action Programme being drawn up by James Wolfensohn, the Quartet's Special Envoy for Disengagement.

Millennium Development Goals

Mark Simmonds: To ask the Secretary of State for International Development if he will make a statement on the progress made towards achieving the Millennium Development Goals by 2015. [6938]

Hilary Benn: Progress towards the Millennium Development Goals varies. The world is on track to meet the poverty reduction goal. The number of people in Asia living on less than $1 a day dropped by nearly a quarter of a billion between 1990 and 2001. However progress toward the other seven goals is more varied. Sub Saharan Africa in particular will not meet any of the goals by 2015 if current rates of progress continue. The Commission for Africa chaired by the Prime Minister has set out plans for faster progress including action by African governments, and stronger support by international partners. The UK has made Africa central to our presidency of the G8 this year. We are looking for the Gleneagles G8 summit next week, and the Millennium Review Summit in September, to further strengthen international support to Africa through aid, debt relief and trade.

The recently published United Nations Millennium Development Goals Report is a comprehensive account of progress to date on each of the goals, and how great an effort remains necessary to meet them. It can be found at http://unstats.un.org/unsd/mi/mi_dev_report.htm. DFID also published a report in January 2005 titled The UK's contributions to achieving the Millennium Development Goals'. A copy of the report is available in the House of Commons Library.

DEFENCE

Afghanistan

Sir Menzies Campbell: To ask the Secretary of State for Defence what plans the Government have for the further deployment of British troops to Afghanistan. [6934]

Patrick Mercer: To ask the Secretary of State for Defence (1) where the additional *(a)* air forces and *(b)* ground forces will be based when additional UK forces are deployed in Afghanistan; and in what numbers; [7608]

(2) when the planned reinforcement of UK forces in Afghanistan will begin. [7607]

John Reid: It remains our intention to deploy the HQ Allied Rapid Reaction Corps for nine months from May 2006 in command of the International Security Assistance Force in Afghanistan, as announced by the Prime Minister last June. The Government keep the deployment of our armed forces to Afghanistan under constant review.

Catterick Infantry Training Centre

Patrick Mercer: To ask the Secretary of State for Defence (1) what the maximum capacity for recruits is of each Catterick Infantry Training Centre battalion; [7611]

(2) how many recruits are under training at Catterick Infantry Training Centre (ITC) *(a)* broken down by divisions of infantry and *(b)* in each ITC battalion. [7610]

Mr. Touhig: The maximum capacity for recruits at the Infantry Training Centre (Catterick) (ITC(C)) is limited by the number of bed spaces available to recruits.

Currently, these are as follows:

Battalion	*Bed spaces*
1st	810
2nd	850
3rd	710
4th (For those temporarily medically unfit)	130

In addition, there are 400 surge bed spaces available at Wathgill Camp, some 10 miles from ITC(C).

The numbers of recruits under training at ITC(C) as at 24 June 2005, broken down by Division, are as follows:

Division	*Number under training*
Kings	180
Queens	190
Light	130
1st Battalion total	490
Scottish	150
Prince of Wales	160
2nd Battalion total	310
Guards	210
Paras	100
Gurkha	230
3rd Battalion total	540

Notes:
1. There are also currently 90 soldiers in 4th Battalion who are temporarily medically unfit.
2. All data has been rounded to the nearest 10.

Patrick Mercer: To ask the Secretary of State for Defence how many infantry combatant's courses at Catterick Infantry Training Centre have been cancelled over the past 12 months. [7612]

Mr. Touhig: In the last 12 months, three Combat Infantryman's Courses, scheduled to start on 2, 16 and 30 August 2004, were cancelled at the Infantry Training Centre (Catterick). All applicants for these courses have, however, been offered alternative courses, and none has been turned away.

Departmental Relocation

Mr. Gale: To ask the Secretary of State for Defence how many of his Department's posts *(a)* have been relocated and *(b)* are under consideration for relocation from London to the deprived areas of the South East. [6253]

Mr. Touhig: The Ministry of Defence is implementing the Lyons Review recommendations to relocate 3,900 posts out of London and the South East by 2010. This will not exclude from consideration relocation of some posts to relatively deprived areas in the South East. So far, the Ministry of Defence has not identified any posts suitable for transfer to such areas.

First World War Medal Index Cards

Mr. Don Foster: To ask the Secretary of State for Defence (1) what steps he has taken to ensure that the information contained on both sides of first world war medal index cards is digitally stored; and if he will make a statement; [7985]

(2) what steps he has taken to ensure that digital copies of first world war medal index cards are of good quality; and if he will make a statement. [7986]

Mr. Touhig: The index cards to the first world war army medal rolls are already preserved in a microfilmed format, an activity commenced by The National Archives in 1985, and available to researchers at The National Archives (in Class WO 372) and through the National Archives website online. The microfilming process captured the information held on the front of the cards, all but a very small percentage of the backs of the cards being blank.

The Ministry of Defence has no further administrative use for the cards and, with The National Archives, has actively sought to identify a suitable institution prepared to accept the original cards, understanding the value attached to such records by many people. The Imperial War Museum has accepted the women's cards and the remainder of the collection has been transferred into the custody of the Western Front Association.

Mr. Don Foster: To ask the Secretary of State for Defence (1) what institutions his Department has approached with a view to finding a home for the original first world war medal index cards; and if he will make a statement; [7987]

(2) when he expects to make a decision on whether to retain the original first world war medal index cards; and if he will make a statement. [7988]

Mr. Touhig: The Ministry of Defence, together with The National Archives, has held discussions with the Imperial War Museum (IWM), the National Army Museum, the Fleet Air Arm Museum, the Women's Library and with representatives of Lancashire Military Museums. The future of the cards has also been discussed with the Western Front Association, into whose custody the majority of the cards have now been transferred. The women's cards have been passed to the IWM.

Front-line Fitness

Mr. Moore: To ask the Secretary of State for Defence how many *(a)* male and *(b)* female (i) officers and (ii) other ranks have been declared unfit for front line duty in the (A) Army, (B) Royal Navy, (C) Royal Air Force and (D) Royal Marines in each year since 1997. [6994]

Mr. Ingram: Data on the number of downgraded personnel are not available prior to 2002. Available statistics on medical downgrading are shown in the following table. This table shows all personnel who are not fully deployable. Some personnel are classified as having limited deployability, so may be deployed overseas and make a contribution to deployed operational capability.

Trained UK regular forces[1]: numbers medically downgraded by gender

Number

	1 April 2002			*1 April 2003*		
	Total	*Male*	*Female[2]*	*Total*	*Male*	*Female[2]*
Officers						
Royal Navy[3]	[4]	[4]	[4]	250	200	50
Royal Marines[3,5]	[4]	[4]	[4]	20	20	[4]
Army[5]	[4]	[4]	[4]	[4]	[4]	[4]
Royal Air Force	520	390	120	580	420	160
Other Ranks						
Royal Navy[3]	[4]	[4]	[4]	2,090	1,690	400
Royal Marines[3]	[4]	[4]	[4]	540	540	10
Army	9,450	8,270	1,190	10,290	9,010	1,280
Royal Air Force	3,350	2,690	660	3,560	2,840	720

	1 April 2004			*1 January 2005*		
	Total	*Male*	*Female[2]*	*Total*	*Male*	*Female[2]*
Officers						
Royal Navy[3]	260	210	60	280	210	60
Royal Marines[3,5]	20	20	[4]	10	10	[4]
Army[5]	[4]	[4]	[4]	1,020	820	200
Royal Air Force	590	430	160	580	420	160
Other Ranks						
Royal Navy[3]	2,370	1,910	460	2,340	1,860	480
Royal Marines[3]	710	700	10	600	600	10
Army	11,720	10,250	1,460	12,970	11,420	1,560
Royal Air Force	3,760	2,980	780	3,860	3,040	820

[1] UK regular forces includes nursing services and excludes full-time reserve service personnel, Gurkhas, the home service battalions of the Royal Irish Regiment, mobilised reservists and naval activated reservists.
[2] Female downgrades include personnel medically downgraded due to pregnancy.
[3] Data for medically downgraded personnel within the Royal Navy and Royal Marines are not available prior to April 2003.
[4] Denotes not available

[5] There are no female Royal Marine officers.
[6] Denotes not applicable
[7] Army officer data are not available prior to August 2004 due to inaccurate classification of a high proportion of untrained and newly trained officers.
Note:
1. All figures have been rounded to the nearest 10.
2. Due to the rounding methods used, figures may not always equal the sum of the parts.
3. When rounding to the nearest 10, numbers ending in 5 have been rounded to the nearest multiple of 20 to prevent systematic bias.

DASA (Tri-Service)

Iraq

Harry Cohen: To ask the Secretary of State for Defence what assessment his Department has made of lessons to be learned on the provision of appropriate and adequate security arrangements by UK troops in Iraq from the experiences at Camp Breadbasket; and if he will make a statement. [2717]

Mr. Ingram: The Ministry of Defence constantly reviews its security arrangements in the light of lessons learned on operations. In the case of Breadbasket, the Chief of the General Staff, General Sir Mike Jackson, has appointed a senior military officer to assess what lessons might be learned. It is intended to publish the findings once all the trials of alleged deliberate abuse of Iraqis have been completed.

Sir Menzies Campbell: To ask the Secretary of State for Defence what discussions he or his officials have had with the United States about the future withdrawal of troops from Iraq; and if he will make a statement. [6933]

John Reid: I hold regular discussions with our coalition partners, including the United States, about progress in establishing a free, stable and democratic Iraq. We have made it very clear during these discussions that the United Kingdom is committed to Iraq for as long as the Iraqi Government judge that the coalition is required to provide security and to assist the Iraqi Security Forces.

Patrick Mercer: To ask the Secretary of State for Defence what plans there are for handing back provinces within Multinational Division (South Central)'s Area of Responsibility to Iraqi security forces' command and control. [7604]

Mr. Ingram: Transitional issues in Multinational Division (Centre-South) are a matter for Poland as the framework nation for this area. Coalition forces across Iraq are working closely with the Iraqi Transitional Government and the Iraqi Security Forces (ISF) to ensure that the ISF have the necessary capability and capacity to take control of security in all areas of Iraq as soon as possible.

Patrick Mercer: To ask the Secretary of State for Defence what plans he has for operational control of areas of Multinational Division (South Central)'s Area of Responsibility once Polish forces withdraw from Iraq. [7605]

John Reid: We currently have no plans to deploy UK forces to MND (Centre-South) or other areas outside the boundaries of the UK's present area of responsibility in Multinational Division (South East).

Mr. Tyrie: To ask the Secretary of State for Defence how many representations have been made to UK military authorities in Iraq by prisoners of war of *(a)* Iraqi and *(b)* other nationality in relation to rights under article 78 of the third Geneva convention. [7901]

Mr. Ingram: The United Kingdom does not hold any Prisoners of War in Iraq. The UK holds a number of security internees at the Divisional Temporary Detention Facility (DTDF) in Southern Iraq. The conditions of internment of security internees are governed by Geneva convention IV. Article 101 of Geneva convention IV covers the rights of internees to express complaints about their conditions of internment.

Security internees regularly make representations regarding their conditions of internment. Such representations are generally made directly with the staff at the DTDF and are not held centrally. They are taken seriously, and reasonable requests from internees, for example for changes to the menu, are accommodated where possible. Internees also have the right to make representations to the International Committee of the Red Cross (ICRC) about any issue related to their internment. The ICRC have regular and unrestricted access to the DTDF and to all internees held there.

Sir Menzies Campbell: To ask the Secretary of State for Defence what the legal basis for the bombing of Iraq by RAF aircraft in the second half of 2002 was; and what proportion of ordnance was released in response to actual or imminent attack. [7262]

John Reid *[holding answer 28 June 2005]:* The legal basis for the operation of the No Fly Zones over Iraq was the need to avert an immediate and overwhelming humanitarian catastrophe threatened by the then Iraqi Government against the people living on the ground in those zones. This was combined with a need to monitor the effect of UNSCR 688 which demanded that Saddam Hussein cease the repression of his people. RAF aircraft attacked only targets which were an actual or imminent threat to coalition aircraft or were contributing to such a threat, namely air defence related assets. Thus, all the ordnance released was in response to an actual or imminent attack on coalition forces.

Jet Pilots (Flying Hours)

Mr. Gerald Howarth: To ask the Secretary of State for Defence what estimate he has made of effects on cost of the temporary reduction in the monthly flying hours for RAF fast jet pilots from 17.5 hours to 16.5 hours during 2005–06. [7889]

Mr. Ingram: About £20 million will be saved as a result of the temporary reduction of average monthly flying hours for RAF fast jet pilots from 17.5 to 16.5 hours a month in 2005–06.

Mr. Gerald Howarth: To ask the Secretary of State for Defence whether he plans to increase flying hours for RAF fast jet pilots to 17.5 hours per month. [7891]

Mr. Ingram: On current plans, yes.

Joint Strike Fighter

Mr. Jack: To ask the Secretary of State for Defence if he will list, with dates, those occasions when UK

Government Ministers have discussed with the US Administration issues relating to technology transfer on the Joint Strike Fighter project. [6833]

Mr. Ingram: Regular discussions take place at all levels with the US Administration on all aspects of JSF including technology transfer. MOD and other Ministers continue to raise this issue during their discussions with key members of the US Administration.

Mr. Jack: To ask the Secretary of State for Defence whether full technology transfer on the Joint Strike Fighter project is a prerequisite for the UK remaining a part of this programme; and if he will make a statement. [6835]

Mr. Ingram: The Ministry of Defence has set out the information access required to enable the United Kingdom to operate, sustain and upgrade the Joint Strike Fighter. Negotiations are at an early stage, and the United States understands that these issues will be a key consideration as the UK makes further commitments in the Joint Strike Fighter programme.

Joint US Operations

Mr. Gerald Howarth: To ask the Secretary of State for Defence in how many joint operations with US forces UK aircraft have been involved since May 2003. [6889]

Mr. Ingram: British fast jet aircraft have been deployed on two major coalition operations alongside US forces in the wider middle east—Operation Telic, concentrated in Iraq, and Operation Herrick, in Afghanistan. In the conduct of these wider operations, numerous smaller operations are routinely undertaken by US and UK forces working together.

Kosovo (Troop Deployment)

Mr. Robathan: To ask the Secretary of State for Defence what plans he has to send additional troops to Kosovo in 2005; and if he will make a statement. [8365]

Mr. Ingram: The United Kingdom has no plans to send additional troops to Kosovo in 2005.

The UK contributes some 180 troops to the NATO operation in Kosovo. In addition we provide a battalion to the Balkans-wide over the horizon operational reserve force, along with Germany and Italy. Should NATO request the deployment of this asset to Kosovo the UK would respond accordingly, just as we did in March 2004 and March 2005.

Nuclear Submarines

Mr. Hancock: To ask the Secretary of State for Defence if he will make a statement on the incidents resulting in spillages of radioactive material during recent work on Vanguard class submarines. [6795]

Mr. Ingram: On 7 and 10 June 2005, during the preliminary commissioning of the Primary Circuit Decontamination (PCD) facility, which will be used during the Long Overhaul Period (Refuel) of HMS Victorious at Devonport, two small leakages of water occurred. Some parts of the equipment had previously been used in the overhaul of another nuclear-powered submarine and, as a result, the water contained very low levels of radioactivity, barely above background levels. The water was contained within the dry dock and no radioactivity was released to the environment.

Nuclear safety remains of paramount importance and while these incidents were minor and did not present any hazard to the workforce or to the public, they could have been avoided. For this reason, the Environment Agency served an Enforcement Notice on the nuclear site licensee, Devonport Royal Dockyard Ltd. (who trade as Devonport Management Ltd.), which required the company to review and, where appropriate, improve the arrangements for controlling the release of radioactive waste to the environment. Accordingly, DRDL suspended PCD commissioning activities. These recommenced on 23 June 2005 once the recommendations from the review had been implemented. The PCD equipment is not due to be connected to HMS Victorious for some weeks and there should therefore be no long term impact on her programme.

Official Residences

Mr. Prisk: To ask the Secretary of State for Defence what plans his Department has to dispose of official residential properties. [6182]

Mr. Touhig *[holding answer 27 June 2005]:* There are currently 37 posts worldwide that attract Official Service Residences (OSRs) status as a result of hosting and entertainment duties. Although the number of posts attracting this status is kept under constant review, there are currently no plans to change the present number of posts attracting OSR status.

Two of the properties currently occupied by OSR status post holders have been identified for eventual disposal. The two post holders concerned would be transferred, if necessary, into alternative accommodation befitting the entitlement of the occupant and OSR status.

RAF (Staff Levels)

Mr. Gerald Howarth: To ask the Secretary of State for Defence what the staff levels against targets are for RAF *(a)* aircrew, *(b)* weapons systems operators, *(c)* ground crew, *(d)* technicians and intelligence staff. [7890]

Mr. Ingram: As at 1 May 2005 the following staff levels (trained strength) against targets (requirement) were reported.

	Trained strength	*Requirement*	*Surplus/ deficit*
Junior officer aircrew	1,435	1,555	-120
Junior officer weapons system operators	630	660	-30
Junior officer ground crew	70	60	+10
Squadron leader flying branch	705	720	-15
Technicians and intelligence	1,635	1,735	-100

Note:
Figures are rounded to the nearest 5.

RAF Menwith Hill

Norman Baker: To ask the Secretary of State for Defence how many *(a)* US Army, *(b)* US Navy, *(c)* US Marines, *(d)* US Airforce, *(e)* US civilians and *(f)* US contractors are working at RAF Menwith Hill. [7813]

Mr. Ingram: As of 1 June 2005 there were: 202 US Army personnel, 103 US Navy personnel, 34 US marines, 178 US Air Force personnel, 269 US Department of Defense civilians and 536 US contractors working at RAF Menwith Hill.

Norman Baker: To ask the Secretary of State for Defence how many *(a)* GCHQ, *(b)* Ministry of Defence Police Agency, *(c)* Ministry of Defence Guarding Service, *(d)* Royal Air Force and *(e)* other UK personnel are working at RAF Menwith Hill. [7814]

Mr. Ingram: As of 1 June 2005 there were 125 Ministry of Defence Police Agency personnel, 33 Ministry of Defence Guarding Service personnel, one Royal Air Force Officer and 231 other UK personnel working at RAF Menwith Hill. I am withholding the number of GCHQ personnel working at RAF Menwith Hill in accordance with Government policy of not commenting on intelligence matters.

Norman Baker: To ask the Secretary of State for Defence if he will make a statement on the planned expansion of facilities at RAF Menwith Hill. [7815]

Mr. Ingram: A master plan covering the long-term development of RAF Menwith Hill is in the process of being produced by a joint UK/US team at RAF Menwith Hill. In order to maintain the operational effectiveness of the station it will be necessary to improve some of the ageing infrastructure on the site. This may lead to the demolition of some older buildings and their replacement by expanded modern facilities that, wherever possible, will be more in keeping with the rural landscape. There are no plans to alter the station's current role and mission.

Royal Hospital Haslar

Mr. Hoban: To ask the Secretary of State for Defence how much was spent on *(a)* maintenance and *(b)* capital costs at the Royal Hospital Haslar in 2003–04; and what the estimate is for each year to 2008. [7562]

Mr. Touhig: The expenditure details requested in respect of the Royal Hospital Haslar are as follows:

£ million

	Maintenance	*Capital*
2003–04	2.1	0.3
2004–05[1]	2.1	2.0
2005–06[1]	2.2	0.2
2006–07[1]	2.2	0.2
2007–08[1]	0	0

[1] Estimated

The 2004–05 expenditure figures are shown as estimated because they are still subject to final audit by the National Audit Office. The estimate of nil expenditure for 2007–08 is due to the Ministry of Defence's planned withdrawal from management of the Royal Hospital Haslar site by 31 March 2007.

Work-related Stress

Lynne Featherstone: To ask the Secretary of State for Defence how many cases of work-related stress have been reported in his Department in each of the last three years; how much compensation was paid to employees in each year; how many work days were lost due to work-related stress in each year; at what cost; what procedures have been put in place to reduce work-related stress; at what cost; and if he will make a statement. [7859]

Mr. Touhig: Ministry of Defence records on sickness absence for civilian employees do not distinguish between work related and non-work related stress. There are no centrally collated data recorded on work-related stress for Service personnel. The information requested on the number of cases, the numbers of days lost, and the cost of those working days due to work-related stress is not therefore available.

The compensation paid to MOD employees (service and civilian), for work- related stress, in each of the last three financial years was:

	£000
2002–03	10,568
2003–04	61,594
2004–05	226,730

The MOD has over the last three years operated a stress policy laid down in Joint Service Publication 375. This publication can be found on the internet, at http://www.mod.uk/dsef/ohs/jsp375.htm. This policy is supplemented by procedures that were designed to assist with stress reduction when identified in an individual, these procedures are:

Confidential advice from a member of the Occupational Welfare Service.

Time off for medical appointments and treatment.

Reasonable adjustments to hours of work and the nature on individual's duties

Early involvement and support from our Occupational Health experts.

Gradual rehabilitation including reduced hours and duties.

A comprehensive suite of work/life policies.

The MOD does not hold centrally records on the cost of take-up of the stress related procedures.

EDUCATION AND SKILLS

A/AS Level Exams

Mr. Hoban: To ask the Secretary of State for Education and Skills what steps her Department has taken to reduce the assessment burden at A and AS level. [8474]

Jacqui Smith: As our white paper on the 14–19 reform states; we plan to move from 6 to 4-units of assessment for A level. This will reduce the assessment burden at advanced level by as much as a third and substantially reduce the cost on schools and colleges. This is purely about reducing assessment; there will be no reduction in A level content or standard.

We have also asked QCA to consider the burden of coursework in individual subjects and the cumulative effect across A level when they accredit new specifications.

Antisocial Behaviour

Mr. Hoban: To ask the Secretary of State for Education and Skills what data on antisocial behaviour is collected by her Department relating to *(a)* primary schools, *(b)* secondary schools and *(c)* colleges of further and higher education. [8359]

Jacqui Smith: The Department does not collect data from schools and colleges on antisocial behaviour. We do, however, collect data on exclusions from primary and secondary schools, although the numbers of exclusions do not necessarily reflect the levels of antisocial behaviour in schools. The last set of data on exclusions was published on 23 June and a copy of this publication is in the Library.

Ofsted report that in 2003/04 behaviour was satisfactory or better in 90 per cent. of secondary schools and 99 per cent. of primary schools.

The Department does not collect any data about antisocial behaviour from colleges of further and higher education.

Building Schools for the Future

Kitty Ussher: To ask the Secretary of State for Education and Skills what proportion of the capital costs of building new *(a)* schools that offer A-levels under the Building Schools for the Future programme and *(b)* colleges that predominantly serve 16 to 19-year-olds was financed by her Department in the last year for which figures are available. [2599]

Jacqui Smith: Information on the funding contributions to be made by local authorities to schools in the Building Schools for the Future programme is not held by the department. Local authorities are free to make their own investment decisions in accordance with their asset management plans. Total capital funding of around £2.2 billion per year to 2007–08 has been committed as part of Building Schools for the Future and this will benefit 47 schools that offer A-levels in the first wave (2005–06) of the programme. This information is not yet available for waves 2 and 3.

The Learning and Skills Council administers funding for Further Education capital projects and contributes grant aid towards the costs. Assessments of the appropriate level of contribution are made against affordability criteria. Levels of grant support vary from around 10–50 per cent. of the total project costs, with an average of 35 per cent.

Burnley College

Kitty Ussher: To ask the Secretary of State for Education and Skills if her Department will provide funding to relocate Burnley College. [2596]

Jacqui Smith: The Learning and Skills Council (LSC) determines the appropriate level of funding for capital projects in further education colleges from the funds allocated to it by the Department for capital investment in the post-16 learning and skills sector, including relocation.

This is an operational matter for the LSC. Mark Haysom, the Council's Chief Executive, will write to my hon. Friend on this matter. A copy of his reply will be placed in the House Library.

Letter from Mark Haysom to Kitty Ussher, dated 22 June 2005:

I am writing to you following Jacqui Smith's reply of 30 June to your question regarding funding to support the relocation of Burnley College. As the Minister said this is an operational matter for the LSC.

The LSC has been in discussion with Burnley College regarding its accommodation strategy for some time and the LSC has supported two feasibility studies into the relocation of the college to the amount of £66,000. Regular discussions are taking place involving the college and its property consultants, LSC Lancashire and the regional capital adviser to support the development of a formal proposal.

As I am sure you will appreciate, the LSC has finite capital resources and demand for support is extremely high. To manage this the LSC has developed a set of criteria including consideration of space utilisation, value for money and affordability. This is essential if the LSC is to ensure that limited resources are used in the most cost effective manner. It is only possible to consider these criteria against detailed proposals. Such proposals have not, as yet been submitted by the college but LSC Lancashire has acknowledged the urgent need for a new building on a new site in Burnley as a priority. Once formal proposals have been received full consideration will be given to them against the above criteria.

Child Review 2004

Vera Baird: To ask the Secretary of State for Education and Skills (1) what progress there has been on the commitment in the Child Review 2004 to review the way in which education formulae operate in relation to schools in deprived areas; [6780]

(2) what the spending per pupil was in *(a)* the 10 per cent. least deprived authorities and *(b)* the 10 per cent. most deprived authorities in (i) 1997, (ii) 2002–03, (iii) 2003–04 and (iv) 2004–05' [6781]

(3) what the percentage difference in spending per pupil between the 10 per cent. most deprived authorities and the 10 per cent. least deprived authorities was in *(a)* 1997, *(b)* 2002–03, *(c)* 2003–04 and *(d)* 2004–05. [6782]

Jacqui Smith *[holding answer 23 June 2005]:* The Government target additional resource to authorities where there are higher numbers of pupils living in deprived circumstances because these pupils are more likely to have additional educational needs, and they will require higher levels of funding if they are to have equality of opportunity. At national level, the formula for distributing funding for schools to local authorities comprises a basic entitlement for each pupil of the same age, which is the same across the country, plus top-ups reflecting the relative needs of each area, including a top-up for each pupil with additional educational needs. (The other top-ups are for higher area costs in some areas and sparsity in others). In addition, some specific grants such as Excellence in Cities have been directed towards deprived areas.

The funding that individual schools receive in their budget shares is a matter for local authorities through their local funding formulae. Each authority's local formula should direct resources according to the relative needs of the schools in the area and their pupils. Work on the joint HM Treasury/Department for Education and Skills review of the ways in which local education authorities fund schools for the effects of social deprivation started in the autumn of 2004. The collection of evidence from stakeholders and drafting of the report is largely complete and the review will be published when conclusions have been finalised. As stated in the Child Poverty Review document published in July 2004, those conclusions will need to recognise the priority of maintaining stability and predictability in school funding, while ensuring that funds are accurately targeted according to need.

The table sets out the spending figures for the least and most deprived authorities for 1997–98, 1998–99, 2002–03 and 2003–04. Figures for 2004–05 are not yet available. The figures reflect the Government's commitment to fund adequately pupils living in deprived circumstances.

The figures given include those for 1998–99 because those figures are more comparable with later years. That is because spending in 1997–98 reflected the transfer of monies from local government to central Government for the nursery vouchers scheme: these were returned to local government from 1998–99. Also, because of local government reorganisation some authorities included in the calculations have only existed in their current form since 1998–99.

Combined LEA and school based expenditure[1] per pupil[2]
Cash terms figures as reported by LEAs as at 22 June 2005

	In the top 10 per cent. least deprived local authorities[3] (£) (a)	*In the top 10 per cent. most deprived local authorities[3] (£) (b)*	*Percentage difference[4] (c)*
1997–98[5]	2,670	3,390	27.3
1998–99	2,760	3,580	29.5
2002–03	3,270	4,230	29.2
2003–04	3,680	4,850	32.0
2004–05[6]	—	—	—

[1] The combined LEA and school based expenditure includes all expenditure on the education of children in LEA maintained establishments and pupils educated by the LEA other than in maintained establishments. This includes both school based expenditure and all elements of central LEA expenditure except youth and community and capital expenditure from revenue (CERA). Figures for 1997–98 and 1998–99 are drawn from the Revenue Outturn (RO1) spending returns which local authorities submitted to the Department of Environment, Transport and the Regions. Figures for 2002–03 onwards are drawn from the Section 52 Outturn Statement (Table A) submitted to the DfES.

[2] Pupil figures include all pre-primary pupils, including those under-fives funded by the LEA and being educated in private settings, pupils educated in maintained mainstream schools and other LEA maintained pupils. The pupil data for pupils attending maintained nursery, primary, secondary and special schools are taken from the DfES Annual Schools Census. Private voluntary and independent (PVI) under-five pupil numbers are taken from the Early Years census but are only available since 1999–2000. Other LEA maintained pupils includes all pupils attending schools not maintained by the authority for whom the authority is paying full tuition fees, or educated otherwise than in schools and pupil referral units under arrangements made by the authority drawn from the Form 8b submitted to the DfES. Also included as other LEA maintained pupils are all pupils attending pupil referral units who are not registered at a maintained mainstream school drawn from the DfES Annual Schools Census. All pupil numbers are adjusted to be on a financial year basis.

[3] The AEN Index used in the allocation of Education Formula Spending Shares to LEAs in 2004–05 is used to identify the top and bottom 10 per cent. most deprived local authorities in 2003 and these LEAs have been compared over the years listed in the above table. The Index is calculated using the percentage of children in families in receipt of income support, job seekers allowance and working families tax credit, the percentage of primary pupils with mother tongue other than English and of secondary pupils from low achieving ethnic groups. However, due to local government reorganisation on 1 April 1998, five LEAs included in the 10 per cent. least deprived LEAs and did not exist in 1997–98 and have therefore been excluded for this year.

[4] The percentage difference is defined as the difference between spending per pupil in the 10 per cent. most deprived LEAs and 10 per cent. least deprived LEAs as a percentage of spending per pupil in the 10 per cent. least deprived LEAs (i.e. (column *(b)*—column *(a)*)/(column *(a)*).

[5] Spending in 1997–98 reflects the transfer of monies from local government to central Government for the nursery vouchers scheme. These were returned to local government from 1998–99.

[6] Expenditure data for 2004–05 are not due to be collected by the Department until October 2005.

Note:
Unit cost figures are rounded to the nearest 10.

City Academies

Mr. Gibb: To ask the Secretary of State for Education and Skills pursuant to the answers of 6 June 2005, *Official Report*, column 331W and 21 June 2005, *Official Report*, column 191W, on city academies, how

many lessons in city academies have been inspected by Ofsted in each year since the first city academy was opened. [7940]

Jacqui Smith: The number of lessons in academies inspected by HMI since the first academy was opened is 386. This includes two formal Section 10 inspections of lessons at Greig city academy (December 2004) and Unity city academy (March 2005), as well as a number of monitoring visits. 203 lessons were inspected during 2004 and 183 lessons have been inspected, so far, for 2005.

Mr. Jim Cunningham: To ask the Secretary of State for Education and Skills what plans her Department has to open new academies in Coventry south. [7978]

Jacqui Smith: My officials are currently in discussion about potential academy proposals in the north east and in the centre of Coventry. There are no academy proposals in the south of the authority at this time.

Mr. Jim Cunningham: To ask the Secretary of State for Education and Skills (1) what plans she has to evaluate the admissions policies of academies; [7980]

(2) what steps she is taking to ensure transparency and accountability in the admissions processes of academies. [7982]

Jacqui Smith: Academy admission policies are agreed with the Secretary of State, in consultation with the local education authority, at an early stage during the establishment of an academy. Should an academy wish to change its admissions policy, it is required—through its funding agreement—to seek the Secretary of State's consent to any changes, after first having sought comments on the changes from the local education authority, local schools and any other relevant admissions authority.

Academies are also required to follow the School Admissions Code of Practice, admit pupils in accordance to the local education authority's co-ordinated admissions arrangements and take part in, and have regard to the advice of, the local education authority's Admissions Forum.

Given all of these requirements, we consider that the current processes already ensures full accountability and transparency and do not see a need to add any further requirements or undertake any separate evaluate the admissions policies of academies.

Mr. Jim Cunningham: To ask the Secretary of State for Education and Skills if she will make a statement on academies' obligations concerning applications from students with special educational needs. [7981]

Jacqui Smith: Academies are fully inclusive schools and admit pupils with special educational needs (SEN) on an equal basis with other schools in the area and this is reflected in their admissions policies. Although academies are independent schools, they have regard to the SEN Code of Practice (2001) and statutory guidance on inclusion. This obligation forms part of the funding agreement between each academy and the Secretary of State.

Mr. Jim Cunningham: To ask the Secretary of State for Education and Skills if she will make a statement on teachers' representation on governing boards of academies. [7983]

Jacqui Smith: Academies are independent schools and the composition of their governing bodies, therefore, are principally a matter for the governing bodies themselves. Governance is one of the areas in which we wish academies to innovate; the Department, therefore, prescribes the makeup of academy governing bodies as little as possible.

That said, we are keen, where appropriate, for there to be a wide and varied representation on all governing bodies, including representation from both teaching and non-teaching staff. The majority of academies, therefore, do have within their memorandum and articles of governance provision for the election or co-option of staff governors. The principals of academies also sit on the governing body.

Mr. Jim Cunningham: To ask the Secretary of State for Education and Skills what steps she has taken to protect teachers' rights in academies; and what further steps are planned. [7984]

Jacqui Smith: Teachers who transfer to academies from predecessor schools have their existing pay and conditions of service protected under the Transfer of Undertakings (Protection of Employment) Regulations 1981 (TUPE). Academies are also required to ensure that all teachers they employ have access to the Teachers Pension Scheme and to comply with the statutory provisions underlying the scheme.

We also protect the professional standing of teachers in academies, by requiring that teachers employed at academies are qualified teachers within the meaning of the Education (School Teachers' Qualifications) (England) Regulations 2003 and that they meet the health standards set out in the Education (Health Standards)(England) Regulations 2003.

Education Funding (Birth Rates)

Gregory Barker: To ask the Secretary of State for Education and Skills what assessment she has made of the effect of falling birth rates on the funding that is required for *(a)* primary and *(b)* secondary schools. [8249]

Jacqui Smith: The Department takes account of projected pupil numbers in assessing future spending pressures on schools. The majority of costs in schools are closely related to the number of pupils, but some costs relate more to the existence and functioning of the school. Pupil numbers in primary schools have been falling for some years and in secondary schools will be falling from now on.

Education Services (Worcestershire)

Mr. Michael Foster: To ask the Secretary of State for Education and Skills pursuant to the answer of 28 June 2005 to the hon. Member for Stroud to Question ref 6816, what assessment she has made of the financial impact on Worcestershire local education authority of 443 pupils from the county receiving their schooling in Gloucestershire. [9071]

Jacqui Smith: The school funding formula distributes resources to authorities on the basis of where pupils are counted on the school roll. The 443 Worcestershire pupils who are attending Gloucestershire schools will therefore attract funding, on a per pupil basis, into Gloucestershire LEA's schools formula spending share (SFSS). Nevertheless, Worcestershire retains some residual responsibility for pupils who reside in their area—e.g in relation to SEN statementing—and therefore Worcestershire's LEA formula spending share (LEAFSS) includes an element of funding which is based on pupils' residence.

Grandparents

Sandra Gidley: To ask the Secretary of State for Education and Skills what assessment she has made of the proportion of child care provided by grandparents. [7934]

Beverley Hughes: The Department collects information on the uptake, use of and demand for child care, including that provided by grandparents, via a series of surveys of parents and evaluation of initiatives such as Sure Start local programmes and neighbourhood nurseries.

These studies have shown that grandparents are a significant provider of informal child care (that provided by friends and relatives) and are often the 'glue' that holds different child care arrangements together.

The 2003 Families and Children Survey found that for children in couple families where the mother worked, the most common child care arrangement—after partner/ex-partner—was grandparents (26 per cent.). For children in lone parent families in which the mother worked, grandparents were the most common child care arrangement used (27 per cent.). The survey also found that child care provided by grandparents declined from 36 per cent. for 0 to 2-year-old children to 24 per cent. for 11 to 13-year-olds.

The Government recognise the major contribution that grandparents and other relatives play in child care. In order to support informal carers such as grandparents, Sure Start children's centres will provide support and drop-in facilities.

International GCSE

Mr. Quentin Davies: To ask the Secretary of State for Education and Skills for what reasons maintained secondary schools are not permitted to enter pupils for the international mathematics GCSE examination. [7999]

Jacqui Smith: For qualifications to be taught in the maintained sector they must be accredited by the QCA and approved for use under section 96 of the Learning and Skills Act 2000. The international GCSEs were designed primarily as qualifications for overseas candidates, and have not been put forward for accreditation. IGCSE in Mathematics therefore is not approved for use by pupils in maintained schools and is unlikely to be, since it is not currently aligned to the national curriculum programmes of study.

Leadership Group on Behaviour and Discipline

Mr. Hoban: To ask the Secretary of State for Education and Skills pursuant to the answer of 14 June 2005, *Official Report*, column 357W, on the leadership group on behaviour and discipline, what the costs were of the group's meeting in each year since it was established; and how often the group met. [8492]

Jacqui Smith: The leadership group has met once, on 21 June 2005. The accommodation cost of that meeting was some £1,260. Group members are also entitled to the costs of travel and of supply cover. The total claimed thus far under that heading is some £340.

New Schools

Mr. Hoban: To ask the Secretary of State for Education and Skills (1) pursuant to the answer of 14 June 2005, *Official Report*, column 360W, on new school provision, what criteria her Department will use to distribute the additional money to which she refers; [8485]

(2) pursuant to the answer of 14 June 2005, *Official Report*, column 360W, on new school provision, from which organisations her Department has received representations. [8486]

Jacqui Smith: We have received bids from the majority of maintained boarding schools for the £5 million available through targeted capital funding for boarding provision. Schools were invited to bid for funding towards:

Significant building projects to increase boarding provision;

Significant building projects to make essential improvements in boarding accommodation to meet, for example, health and safety or commission for social care inspection or other statutory requirements;

Significant remedial or enhancement work to boarding buildings; and the provision of equipment vital to the operation of the school.

No decision has yet been reached on the allocation of the funding.

In relation to new provision of small schools, we have received representations from the human scale education movement. As I made clear in my previous reply, decisions about the establishment of new schools are taken locally.

Out-of-hours Learning

Mr. Gibb: To ask the Secretary of State for Education and Skills pursuant to the answer of 21 June 2005, *Official Report*, column 1012W, on out-of-hours learning, who monitors the extent to which the guidance on homework for school pupils set out in her Department's publication, Homework: Guidance for Primary and Secondary Schools is being followed by schools. [7941]

Jacqui Smith: The homework guidance does not have statutory force; therefore it is for schools to make their own decisions in this area. Ofsted inspectors evaluate the extent to which homework is effectively used to reinforce and extend what is learned in school, and reflect their findings in their report on the school. Ofsted

inspections in 2003/04 found that the use of homework was satisfactory or better in 91 per cent. of secondary schools and 97 per cent. of primary schools.

Prison Education

Lynne Featherstone: To ask the Secretary of State for Education and Skills what the *(a)* 2003–04 budget and *(b)* 2003–04 expenditure was for prison education; and if she will make a statement. [8234]

Phil Hope: Funding for prison education and training in 2003–04 was £97.2 million. Expenditure was £96.3 million.

Pupil Behaviour Programmes

Lynne Featherstone: To ask the Secretary of State for Education and Skills what arrangements her Department has made to give professional training on issues facing gay and lesbian pupils to those delivering the programme for improving pupil behaviour. [8247]

Jacqui Smith: We are committed to countering all forms of discrimination in schools, including homophobia. To achieve that:

The anti-bullying charter for action specifically mentions homophobic bullying;

The comprehensive guidance we have given schools on countering bullying includes advice on dealing with homophobic bullying;

The training materials available to staff in schools through our national secondary strategy also cover homophobic bullying;

Secondary strategy behaviour and attendance consultants, of which there is at least one in every local education authority, and primary national strategy leads, have been closely involved in our national "Make The Difference" anti-bullying conferences. These conferences included a close focus on countering homophobic bullying.

Pupil Exclusions

Sarah Teather: To ask the Secretary of State for Education and Skills how many pupil exclusions there were in *(a)* primary and *(b)* secondary schools in each London borough in each of the last five years. [8300]

Jacqui Smith: The information requested is shown in the following tables.

Number of pupils absent for at least one half day due to unauthorised absence, 2000 to 2004—maintained schools in England (excluding special schools and CTCs)

	Primary					
	2000		2001		2002

School Bullying

Mr. Hoban: To ask the Secretary of State for Education and Skills how many schools did not have a school bullying policy in place in 2004–05. [8469]

Jacqui Smith: All schools are required, under section 61 of the School Standards Framework Act 1998, to have an anti-bullying policy in place.

We are not aware of any schools which do not comply with this requirement.

Mr. Hoban: To ask the Secretary of State for Education and Skills pursuant to the answer of 7 June 2005, *Official Report*, column 471W, on bullying, if she will list the items of research to which she refers. [8479]

Jacqui Smith: The information requested is as follows.

School Maintenance

Mr. Maude: To ask the Secretary of State for Education and Skills how much was spent on maintenance and improvement of *(a)* primary and junior schools and *(b)* secondary schools in (i) West Sussex, (ii) Kent, (iii) Durham, (iv) East Riding of Yorkshire and (v) each English county in each of the last eight years. [7967]

Jacqui Smith: Expenditure on maintenance and improvement of *(a)* primary and junior schools and *(b)* secondary schools is determined by local authorities and schools in accordance with their local asset management plans.

School capital allocations to local authorities and schools in (i) West Sussex, (ii) Kent, (iii) Durham, (iv) East Riding of Yorkshire and (v) each English county in each of the last eight years are set out in the following table:

£000

Revenue expenditure figures on the maintenance and improvement of schools are likely to vary from year to year depending on the unique circumstances of a particular LEA. For example, revenue expenditure will increase in years where there have been adverse weather conditions (e.g. repairing storm damage) and is also likely to vary with the number and age of the school buildings within the LEA. Revenue expenditure will also be affected by the amounts of capital allocated to each school.

The available information is contained within the following table:

Maintenance and improvement of school buildings and grounds since 1998[1,2,3,4]

[1] Denotes the change of source from LEAs education Revenue Outturn Statements submitted to ODPM to Section 52 Outturn Statements in 1999–00, and to the review of Section 52 categories in 2002–03 following the introduction of Consistent Financial Reporting (CFR) to schools.

[2] Figures for 1998–99 to 2001–02 cover the repair and maintenance of buildings, fixed plant and grounds which includes all expenditure on non-capital building works, including repairs and maintenance of buildings, and non-capital expenditure on fixed plant and grounds. Figures for 2002–03 and 2003–04 are the combination of the revenue expenditure on building (including fixed plant) maintenance and improvement and grounds maintenance and improvement categories (CFR categories E12 + E13). Any capital expenditure on school buildings is not included in this table.

[3] Figures are provided for the six years to 2003–04, the latest year for which data are available. Data for 1997–98 and earlier are not available for comparable areas due to local government re-organisation. Figures for 2002–03 onwards will not be directly comparable with figures for earlier years as figures for 2002–03 and 2003–04 are not available and have therefore been excluded for these two years. Also, for some LEAs, expenditure that had previously been attributed to the schools sectors was reported within the LEA part of the Section 52 form in 2002–03 and 2003–04 and would therefore be excluded from the totals for

[4] Figures are rounded up to the nearest 1,000.

Sarah Teather: To ask the Secretary of State for Education and Skills how much funding is estimated as necessary for buildings maintenance in 2005–06 in *(a)* each school in Brent and *(b)* in each London borough. [8306]

Jacqui Smith: Decisions on how much funding is needed for buildings maintenance in each school in Brent and each London borough are not made centrally but by local authorities and schools in accordance with their local asset management plans.

School Meals

Mr. Burstow: To ask the Secretary of State for Education and Skills when she expects the School Meal Review Panel to consider the nutritional standards that apply to school breakfasts. [8230]

Jacqui Smith: The Department for Education and Skills will publish draft school lunch standards for public consultation this September, and the final version will become mandatory from September 2006. Once the draft school lunch standards have been published the panel will consider how the standards could be extended to apply to other food and drink provided on school premises.

Schools (Unauthorised Absence)

Mr. Burstow: To ask the Secretary of State for Education and Skills how many pupils in each London borough missed at least half a day due to unauthorised absence in *(a)* primary schools, *(b)* secondary schools, *(c)* special schools and *(d)* pupil referral units, expressed as a percentage of pupils of compulsory school age in each of the last five years. [8059]

Jacqui Smith: The information requested on the number of pupils with unauthorised absence in London boroughs for secondary, primary and special schools is

shown in the following tables. Unauthorised absence includes all unexplained or unjustified absences, such as lateness, holidays during term time not authorised by the school, absence where reason is not yet established and truancy. The department does not currently collect absence data from pupil referral units, although we plan to do so in future, so this information cannot yet be provided.

Number of pupils absent for at least one half day due to unauthorised absence, 2000 to 2004—maintained schools in England (excluding CTCs)

Sixth Forms

Mr. Hoban: To ask the Secretary of State for Education and Skills pursuant to the answer of 14 June 2005, *Official Report*, column 368W, on sixth forms, when the guidance to which she refers will be published. [8482]

Jacqui Smith: We plan to issue the guidance for consultation with stakeholder representative groups later in the summer.

Mr. Hoban: To ask the Secretary of State for Education and Skills pursuant to the answer of 14 June 2005, *Official Report*, columns 368W and 220W, who the national and local stakeholders are, in addition to the Learning and Skills Council and local education authorities. [8483]

Jacqui Smith: Officials have spoken about the establishment of school sixth forms to a very wide range of national and local stakeholders in the context of the five-year strategy and informally in the normal course of business. These include school, college and work-based learning providers and a variety of representative bodies.

Mr. Hoban: To ask the Secretary of State for Education and Skills pursuant to the answer of 14 June 2005, *Official Report*, column 368W, on sixth forms, if she will make a statement on the outcome of the discussions to which she refers. [8484]

Jacqui Smith: Discussions with stakeholders have informed the development of the guidance on the organisation of 16–19 provision that we plan to issue for consultation with stakeholder representative bodies later in the summer.

State Boarding Schools

Mr. Hoban: To ask the Secretary of State for Education and Skills what the cost was of building repairs for state boarding schools in the last year for which figures are available. [8488]

Jacqui Smith: The Department does not hold information on the total cost of repairs carried out to school premises.

Revenue funding and the bulk of schools capital funding is allocated by formula to authorities and schools so that they can address their local priorities, including premises maintenance. Prioritisation of need should be through an open, rigorous and consultative asset management planning process, based on assessments of the needs of all schools.

Central Government capital support for investment in schools has increased from under £700 million in 1996–97 to £5.5 billion this year and will rise further to

£6.3 billion by 2007–08. Progress is being made year-by-year in improving the quality of the school building stock.

Sure Start

Mr. Gibb: To ask the Secretary of State for Education and Skills what estimate she has made of whether local authorities have sufficient capital funding to meet targets for phase two Sure Start children's centres. [6711]

Beverley Hughes: A total of £947 million funding has been made available to local authorities in the second phase of the children's centres programme. This includes £405,523,772 capital funding. We are confident that the individual capital allocations given to local authorities are sufficient for them to achieve the children centres targets we have set for them in the period 2006–08. The funding has been formulated on the premise that children's centres will grow out of a range of existing provision such as Sure Start local programmes, neighbourhood nurseries and primary schools.

Teachers

Mr. Clappison: To ask the Secretary of State for Education and Skills how many teachers have been the victims of offences of violence in each of the last 10 years. [4946]

Jacqui Smith: I will write to the hon. Member with the information requested and place a copy of my reply in the House of Commons Library.

Sarah Teather: To ask the Secretary of State for Education and Skills how many teachers have been assaulted by *(a)* pupils and *(b)* parents in (i) each London borough and (ii) London in each of the last five years. [8299]

Jacqui Smith: The information requested is not collected centrally.

Lynne Featherstone: To ask the Secretary of State for Education and Skills how many *(a)* full-time and *(b)* part-time teachers there were in each of the last five years in each London borough; and if she will make a statement. [8403]

Jacqui Smith: The following tables provide the information requested for January of each year from 1997 to 2004, the latest information available at LEA level.

Number of full-time teachers

Annual survey of teachers in service and teacher vacancies.

Mr. Burstow: To ask the Secretary of State for Education and Skills how many *(a)* full-time teachers and *(b)* full-time equivalent teachers and *(c)* full-time equivalent teaching assistants there were in the London borough of Sutton in (i) 1985 and (ii) the last year for which figures are available. [7246]

Jacqui Smith: The following table provides the available information. The numbers of teaching assistants for 1985 are not available—collection of data comparable with those for 2004 did not commence until 1995 and these have been included in the table.

Teacher and teaching assistant numbers, Sutton LEA

	1985	1995	2004
Teachers			
Full-time[1]	1,140	1,230	1,440
Full-time equivalent[2]	1,210	1,360	1,700
Teaching assistants			
Full-time equivalent	n/a	120	370

n/a = not available

[1] Includes full-time regular qualified teachers.

[2] Includes the full-time equivalent of all regular teachers.

Annual School Census for teaching assistants.

Mr. Jim Cunningham: To ask the Secretary of State for Education and Skills if she will make a statement on the Teaching and Learning Responsibility Payments Scheme. [8543]

Jacqui Smith: The new Teaching and Learning Responsibility payments for teachers, which replace current management allowances from 1 January 2006, will make a positive contribution to improving the performance of our schools by focusing payments to teachers for additional responsibilities on matters related to the teaching and learning of pupils, rather than those management functions which do not require a qualified teacher.

Mr. Jim Cunningham: To ask the Secretary of State for Education and Skills whether the Teaching and Learning Responsibility Scheme increases the pay of teachers with managerial responsibilities. [8544]

Jacqui Smith: It will be for schools to determine the levels of Teaching and Learning Responsibility payments awarded to teachers. Schools will take these decisions in the context of the financial parameters for the award of the two levels of Teaching and Learning

Responsibility payments, the criterion and factors for the award of TLRs and the decisions they have made on their school staffing structure.

Mr. Jim Cunningham: To ask the Secretary of State for Education and Skills how her Department ensures that teachers who undertake managerial responsibilities are appropriately remunerated. [8545]

Jacqui Smith: The school teachers' pay and conditions document provides the framework for the payment of teachers in maintained schools. This is reviewed and updated regularly following recommendations from the independent School Teachers' Review Body, which takes evidence from the national representatives of interested parties, including employers and teachers. The Department strives to work in close cooperation with these partners to ensure that schools have an effective and appropriate framework for rewarding teachers.

Temporary Classrooms

Mr. Drew: To ask the Secretary of State for Education and Skills pursuant to the answer to the hon. Member for Fareham (Mr. Hoban) of 14 June 2005, *Official Report*, column 371W, on temporary classrooms, if she will take steps to obtain information on the numbers of temporary classrooms in the local education authorities who have yet to provide accurate data. [6817]

Jacqui Smith: Authorities are encouraged to supply good quality, comprehensive premises data. However, there are no statutory requirements to do so and no plans to take measures, other than encouragement, in relation to authorities with poor quality, or incomplete data. A new data set has been requested from authorities by the end of 2005.

Truancy

Sarah Teather: To ask the Secretary of State for Education and Skills how many pupils truanted in each London borough in each of the last five years. [8334]

Jacqui Smith: The information requested is shown in the following tables.

These figures relate to unauthorised absence, this includes all unexplained or unjustified absences, such as lateness, holidays during term time not authorised by the school, absence where reason is not yet established and truancy.

Number of pupils absent for at least one half day due to unauthorised absence, 2000 to 2004: maintained schools in England (excluding special schools and CTCs)

University Admissions

Mr. Hoban: To ask the Secretary of State for Education and Skills what steps her Department has taken regarding post-qualification application to university for undergraduate courses. [8471]

Bill Rammell: In September 2004, the Secretary of State announced that work would begin to look at the options for implementing a system of post-qualification application to higher education. Officials have been taking this work forward, consulting widely with interested parties and engaging with Scotland, Wales and Northern Ireland. The Government, of course, respect the autonomy of the HE sector and is absolutely clear that admissions policies are entirely the responsibility of HE institutions. Later this year, we plan to conduct a formal public consultation exercise to seek views on possible reforms to applications procedures.

Mr. Hoban: To ask the Secretary of State for Education and Skills if she will make a statement on the use of aptitude tests for university admissions. [8473]

Bill Rammell: The independent review of admissions to higher education which was led by Professor Steven Schwartz acknowledged that assessing an applicant's

potential for higher education (HE) study, or recognising ability which may not be reflected fully in Level 3 examination results, is a key issue for fair admissions. The steering group's report in September 2004 suggested that a test that is able to predict performance in HE may help to uncover hidden talent. It also acknowledged the potential burden for applicants of up to six sets of admissions requirements and means of assessment. The report therefore recommended a national research study to assess the idea of a national test of potential. We support this as an early task for a new centre of expertise on admissions which the steering group also recommended. The HE sector is discussing the formation of that centre. Whilst we do not believe in tests for tests sake, if there is a genuine need for a national test it would be right to explore the opportunity.

Vocational Learning

Mr. Hoban: To ask the Secretary of State for Education and Skills pursuant to the answer of 14 June 2005, *Official Report*, column 362W, on post-16 education, what action her Department will take to encourage private sector providers of vocational learning to come forward through competitions. [8481]

Jacqui Smith: The LSC already contracts with private sector providers for post-16 learning provision, some selected on the basis of competitive tendering arrangements. We expect the LSC to build on their experience in encouraging high quality private sector providers to enter the new 16–19 competitions where the output specifications are for vocational provision. In addition, the 14–19 White Paper heralded our intention to develop a comprehensive vocational network, including public and private sector providers, that will contribute to delivery of the 14–19 entitlement for all learners by 2015.

FOREIGN AND COMMONWEALTH OFFICE

Iran

Mrs. Gillan: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on reports of the destruction of the Bahá'í cemetery in Yazd in February and the desecration of a Bahá'í corpse; and what assessment his Department has made of the official investigations into these crimes. [7943]

Dr. Howells: We have received reports that a Bahá'í cemetery in Yazd was destroyed. Cars were said to have been driven over graves, leaving human remains exposed. We condemn any such action unreservedly. We are not aware of an official investigation.

We have made clear to the Iranian authorities our serious concern about the situation of the Bahá'í community in Iran. We have also encouraged the EU to take action, doing so most recently on 21 June. We will make support for human rights a priority in the EU's relations with Iran during the UK's presidency of the EU.

Bangladesh

Miss McIntosh: To ask the Secretary of State for Foreign and Commonwealth Affairs what assessment he has made of human rights in Bangladesh; what recent research he has evaluated on the situation; and what representations he has made to the Bangladeshi authorities on action to prevent human rights abuses. [7892]

Dr. Howells: I refer the hon. Member to the statement made in another place by my noble Friend the Parliamentary Under-Secretary of State for Foreign and Commonwealth Affairs (Lord Triesman of Tottenham) on Bangladesh on 23 June 2005, *Official Report*, columns 1780–86. We will continue to raise our concerns with the Government of Bangladesh about the human rights situation and the need to strengthen the rule of law both bilaterally and with our EU partners. We look to the Government of Bangladesh to uphold its international human rights obligations, such as those contained in the International Covenant on Civil and Political Rights, of which Bangladesh is a signatory.

British Embassies

Mr. McGovern: To ask the Secretary of State for Foreign and Commonwealth Affairs how many new British embassies have been opened since 1997. [7009]

Mr. Straw: The Foreign and Commonwealth Office has opened 10 Embassies and High Commissions since 1997. The following table provides further details. In some cases the mission has been opened previously, but not formally as an Embassy or High Commission. The previous status of such missions is shown in the table.

Embassies and high commissions opened since 1997

Mission	*Previous status*
2000–01	
Tripoli	Mission originally represented by British Interests Section of the Italian Embassy.
2001–02	
Pyongyang	
Asmara	Previously opened with local staff only.
Bamako	Previously opened with local staff only.
Dushanbe	
Kabul	
2002–03	
Conakry	Previously opened with local staff only.
Dili	Mission originally opened as mission to the UN in Jakarta
Chisinau	
2004–05	
Baghdad	

In reply to the right hon. Member for Devizes (Mr. Ancram) in answer to a similar written parliamentary question on 11 February 2003, *Official Report*, column 722W, I stated incorrectly that our Embassy in Asmara opened in financial year 2000–01. This should have read 2001–02, as shown in the table. I would like to apologise for the error.

Mr. McGovern: To ask the Secretary of State for Foreign and Commonwealth Affairs how many British embassies have been closed since 1997. [7010]

Mr. Straw: The Foreign and Commonwealth Office has closed five embassies and high commissions since 1997. These were in Bamako, Managua, San Salvador, Tegucigalpa and Asuncion. A further post, Nassau, is scheduled to close on 30 June 2005.

Charlotte Wilson

Justine Greening: To ask the Secretary of State for Foreign and Commonwealth Affairs what assessment he has made of whether the killing in Burundi in December 2000 during which Charlotte Wilson, a British national, was killed, constitutes a war crime prosecutable via the International Criminal Court; and if he will make a statement. [7754]

Ian Pearson: It is possible that the attack in which Charlotte Wilson and many others were murdered could constitute a "war crime" as defined under the Rome Statute of the International Criminal Court (ICC). However, the ICC could not have jurisdiction in this case as the crime pre-dates the coming into force of the Rome Statute on 1 July 2002. It is impossible to refer crimes which took place before this date to the ICC.

Whether to define this attack as a "war crime" can only be decided upon by a competent court. The UK Government will continue to press the Burundian authorities to investigate this crime fully and bring Charlotte Wilson's killers to justice.

Justine Greening: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will take steps through *(a)* the UN, *(b)* the EU and *(c)* diplomatic channels to ensure the December 2000 killings in which British national Charlotte Wilson was killed is fully pursued and its perpetrators are brought to justice and are not given any amnesty; and if he will make a statement. [7755]

Ian Pearson: We will continue to press the Burundian authorities for progress in bringing Charlotte Wilson's killers to justice. Our ambassador to Burundi raised this most recently with the Burundian Interior Minister on 17 June.

We have made clear in recent UN Security Council and European Union statements that the climate of impunity in the Great Lakes region must end. We will continue to push for those that have committed serious human rights abuses to be brought to trial.

We have expressed support for the UN Secretary-General's proposal for a mixed UN and Burundian special chamber to investigate and prosecute those most responsible for such crimes.

Computer Crime

Mr. Burstow: To ask the Secretary of State for Foreign and Commonwealth Affairs how many cases of computer *(a)* hacking, *(b)* fraud and *(c)* theft his Department recorded in each year since 2001–02; and for each year on how many occasions computer systems have been illegally accessed by computer hackers (i) within and (ii) outside his Department. [6948]

Mr. Straw: There is no evidence of any successful hacking attacks being mounted against the Foreign and Commonwealth Office since 2002 nor is there any evidence of computer based fraud.

Details of recorded thefts of computers are as follows:

	Laptops	*Personal computers*
2001–02[1]	—	—
2002–03	4	0
2003–04	2	0
2004–05	3	2

[1] No records exist for this period

Correspondence

Sir Gerald Kaufman: To ask the Secretary of State for Foreign and Commonwealth Affairs when he will answer the letter dated 29 April from the right hon. Member for Manchester, Gorton with regard to Mr Y Abbas. [7886]

Dr. Howells: A reply to my right hon. Friend was sent on 12 May 2005.

Clare Short: To ask the Secretary of State for Foreign and Commonwealth Affairs when he will reply to the letter from the hon. Member for Birmingham, Ladywood on visas dated 21 February 2005 regarding a family reunion for Mr. B. Sargainell. [7970]

Dr. Howells: UKvisas have contacted my right hon. Friend with regard to this case, which is a matter for the Home Office.

European Convention on Human Rights

Mr. Robathan: To ask the Secretary of State for Foreign and Commonwealth Affairs what assessment he has made of the implications of the European Convention on Human Rights for the Government's policy on the provision of information to overseas prosecuting authorities in cases which would lead to the imposition of the death penalty. [7843]

Mr. Douglas Alexander *[holding answer 28 June 2005]:* The opposition of the Government to the death penalty is well known. When deciding whether to provide information to prosecuting authorities abroad the Government takes all relevant factors into account, including the possibility of the death penalty being imposed and our international obligations. Our view is that this policy is in line with the obligations of the UK under the European Convention on Human Rights.

Middle East

Dr. Starkey: To ask the Secretary of State for Foreign and Commonwealth Affairs what discussions he has had with other members of the Quartet about monitoring Israeli withdrawal from the specified settlements in the northern West Bank; which areas are included in this withdrawal; what the timescale is; how the land evacuated will be returned to Palestinian control; and what compensation has been agreed for the former Palestinian landowners for damage incurred. [8052]

Dr. Howells: Quartet (UN, US, EU and Russia) discussions on Israeli withdrawal from the Gaza Strip and part of the West Bank are ongoing. Most recently, Quartet Principals, along with Quartet Special Envoy for Disengagement James Wolfensohn and US Security

Co-ordinator General Ward, met in London on 23 June to discuss these issues, prior to further discussion at the G8 Foreign Ministers Meeting.

The Quartet discussions continue to focus on the geographical areas to be included in the withdrawal, the timescale for withdrawal and how the areas will be returned to Palestinian control. These are also subject to close discussion with and between the parties, assisted by Mr. Wolfensohn. Compensation for former Palestinian landowners has not been agreed at this stage.

Dr. Starkey: To ask the Secretary of State for Foreign and Commonwealth Affairs what discussions his Department has had with other G8 Foreign Ministers about independent monitoring of Israeli and Palestinian authorities' compliance with commitments during the Gaza withdrawal; and what mechanisms have been put in place. [8053]

Dr. Howells: My right hon. Friend the Foreign Secretary hosted a meeting of G8 Foreign Ministers in London on 23 June. Quartet Special Envoy for Disengagement, James Wolfensohn, and US Security Co-ordinator, General William Ward, also attended to discuss the Middle East peace process and Israeli withdrawal from the Gaza Strip and parts of the West Bank. James Wolfensohn set out his plans for assisting disengagement, including to help both parties implement the actions required of them, to encourage them to co-ordinate fully with each other and for the international community to support Palestinian economic and institutional development. G8 Foreign Ministers offered support and appreciation for his work.

Radiological Weapons (Public Education)

Lynne Jones: To ask the Secretary of State for Foreign and Commonwealth Affairs what steps he has taken in response to the recommendation of the Report of the UN Secretary General's High-level Panel on Threats, Challenges and Change, A more secure world: Our shared responsibility, that the public should be educated on the consequences of radiological weapons. [7371]

Dr. Howells: The Government take seriously their responsibility to prepare the public for emergencies, but is careful not to raise the profile of any specific risk disproportionately. General guidance on the steps the public can take to prepare for, and respond to, any major emergency is available on the preparing for emergencies website: (wwvv.preparingforemergencies.gov.uk). More detailed information is also available on the effects of radiological material at: (www.mi5.gov.uk. and wmv.hpa.org.uk).

The emergency services will always issue specific advice at the time of an incident, including any incident involving release of a radiological material.

Russia

Dr. Starkey: To ask the Secretary of State for Foreign and Commonwealth Affairs whether *(a)* he and *(b)* his Department has made representations to the Russian Foreign Minister on issues relating to the ratification of Protocol 6 of the European Convention on Human Rights. [7709]

Mr. Douglas Alexander: The Foreign and Commonwealth Office is actively engaged in a bilateral human rights dialogue with the Russian Government. We have raised Protocol 6 as part of this dialogue. The last round of the dialogue was held in Moscow on 23 May 2005.

We are also engaged, with our European partners, in bi-annual EU-Russia human rights consultations. The first session of consultations took place in Luxembourg on 1 March 2005. Again we raised the implementation in Russia of Protocol 6 of the European Convention on Human Rights. The next round of consultations is scheduled to take place under the UK presidency of the EU on 8 September 2005. We fully expect discussion of Protocol 6 to feature during these consultations.

In addition to this, staff at our embassy in Moscow continue to raise our concerns with their interlocutors in the Russian Government, including with official institutions in Russia that exist to protect and promote human rights.

Weapons in Space

Norman Baker: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on the UK Government policy on the US Administration's intention to base weapons in space. [7816]

Mr. Straw: We are not aware of any US Administration plans to deploy weapons in space.

Work-related Stress

Lynne Featherstone: To ask the Secretary of State for Foreign and Commonwealth Affairs how many cases of work-related stress have been reported in his Department in each of the last three years; how much compensation was paid to employees in each year; how many work days were lost due to work-related stress in each year; at what cost; what procedures have been put in place to reduce work-related stress; at what cost; and if he will make a statement. [7863]

Mr. Straw: My Department does not currently keep statistics on reported cases of work-related stress or on work-related stress as a sickness absence type. No compensation has been paid to employees because of work-related stress in the past three years. All Foreign and Commonwealth Office (FCO) staff, and dependants overseas, can discuss work-related and personal concerns in confidence with a trained welfare officer. Since March 2002, the FCO has also provided a confidential counselling and advice service to staff both in the UK and overseas, and to dependants overseas, through an Employee Assistance Programme (EAP). Work-related stress is one of the issues for which the EAP can provide counselling and support. The cost is approximately £58,000 per annum.

NORTHERN IRELAND

Attention Deficit Hyperactivity Disorder

Mr. Dodds: To ask the Secretary of State for Northern Ireland what measures are in place to assist pupils suffering from attention deficit hyperactivity disorder in *(a)* schools and *(b)* colleges in Northern Ireland. [7836]

Angela E. Smith: Education and Library Boards' psychology services and behaviour support services offer advice to schools in relation to the management of pupils with attention deficit hyperactivity disorder (ADHD). The type of support offered is dependent on the needs of the school or child but can range from advice on writing an individual behaviour plan to placement in a primary or post-primary guidance centre. Most pupils with ADHD have such extremely challenging behaviour that boards maintain statements of special educational need for them and provide funding for additional support to assist the school to meet the pupil's needs.

School staff can also receive advice and training in behaviour management strategies and through specific targeted interventions in the management of pupils with ADHD. These in-service courses are available in some board areas on a whole-school basis on request and through teacher or classroom assistant attendance at courses in teachers' centres.

In 2004, a working group of educational psychologists from across the five Education and Library Boards prepared two information booklets on ADHD which were published by DE—one a practical guide for parents and carers and the other a practical guide for schools.

The Department for Employment and Learning has put in place a range of initiatives and funding streams designed to assist FE college students with learning difficulties and/or disabilities including those suffering from attention deficit hyperactivity disorder. These include the publication of a good practice guide; support for staff development activities for senior management, and financial assistance towards the costs of technical or carer support for learners.

Bus Shelters

Mr. Dodds: To ask the Secretary of State for Northern Ireland how much has been spent on the erection of bus shelters in Northern Ireland in each year since 1997; and how much has been spent on *(a)* repairing and *(b)* replacing such shelters in each year since 2000. [7628]

Mr. Woodward: The Chief Executive of Roads Service (Dr. Malcom McKibbin) has been asked to write to the hon. Gentleman.

Letter from Dr. McKibbin to Mr. Nigel Dodds, dated June 2005:

You recently asked the Secretary of State for Northern Ireland a Parliamentary Question: "how much has been spent on the erection of bus shelters in Northern Ireland in each year since 1997; and how much has been spent on *(a)* repairing and *(b)* replacing such shelters in each year since 2000."

I have been asked to reply as this issue falls within my responsibility as Chief Executive of Roads Service.

You may be aware that, in January 2001, roads service and most district councils entered into a 15-year contract with bus shelter provider Adshel, for the provision of approximately 1500 bus shelters throughout the council areas. The provision and maintenance of these shelters are funded by Adshel through advertising revenue, and are therefore provided at no cost to the Department. The Department has no knowledge of the costs incurred by Adshel in carrying out their contractual commitments.

District councils are still permitted to provide additional bus shelters at their own expense, however, Adshel have the sole advertising rights, and Translink is also permitted to erect bus shelters at their own expense under Permitted Development Rights.

In addition, roads service has a small budget of approximately £1000 per year to maintain the limited number of bus shelters provided by the Department prior to the commencement of the Adshel contract. However, we have not carried out any shelter replacements since 2000.

I hope this information is helpful.

Early Release (Recidivism)

Mr. Dodds: To ask the Secretary of State for Northern Ireland how many prisoners given early release under the terms of the Belfast Agreement have been returned to prison; and for what reasons. [7093]

Mr. Woodward: Of the 447 persons released under the Northern Ireland (Sentences) Act 1988 13 have been returned to prison in accordance with the provisions of section 9 of that Act because the Secretary of State believed they had broken, or were likely to break, their licence conditions.

Equality (Stranmillis University College)

Lady Hermon: To ask the Secretary of State for Northern Ireland what the total number of respondents was to the recent equality impact assessment of the governance arrangements at Stranmillis university college; and how many of these *(a)* supported and *(b)* opposed removing the transferor's representatives from the governing body. [7051]

Angela E. Smith: Ten responses to the recent equality assessment on the governance arrangements that will follow the incorporation of Stranmillis university college were received. Four respondents supported and four opposed removing the transferors' representatives from the governing body. Two made no comment on this issue.

Firearm Certificates

Lady Hermon: To ask the Secretary of State for Northern Ireland what the average time taken for firearm certificate applications to be processed was in each of the last 12 months for which figures are available. [7170]

Mr. Woodward: The Chief Constable of the Police Service of Northern Ireland has released the following information.

Average length of time taken to process an application for a firearm certificate

	Weeks
[illegible]	14
[illegible]	14
August	14
September	14
October	14
November	28
December	
2005	
January	28
February	14
March	14

Average length of time taken to process an application for a firearm certificate

	Weeks
April	14
May	14
June	14

[1] Does not reflect processing time by local police.
[2] Reflects additional time needed for staff training and other preparatory work to facilitate introduction of new computerised licensing system.

Invest Northern Ireland

Mr. Dodds: To ask the Secretary of State for Northern Ireland what insurance arrangements for third parties are in place in respect of premises and properties in the possession of Invest Northern Ireland. [7851]

Angela E. Smith: Invest NI carries public liability insurance on all of its estates.

Pension Credit

Mr. Dodds: To ask the Secretary of State for Northern Ireland how many people in Northern Ireland are in receipt of pension credit; and what the average amount of pension credit is. [7833]

Mr. Hanson: The following table shows the number of people in Northern Ireland in receipt of pension credit and their corresponding average amounts of pension credit, broken down by claimants and partners. The data are taken at May 2005.

	Numbers	*Average amount (£)*
Claimants	90,929	57.64
Partners	19,952	71.29

Safety Cameras

Mr. Dodds: To ask the Secretary of State for Northern Ireland how many speed cameras have been in place in Northern Ireland in each year since 2001. [7830]

Mr. Woodward: During 2001, 2002 and up to June 2003, there were five mobile safety camera vehicles in operation across Northern Ireland.

The launch of the Northern Ireland Safety Camera Scheme on 1 July 2003 saw these resources boosted by the installation of three fixed site safety cameras at locations on the Antrim Road, Saintfield Road and the Upper Newtownards Road and the deployment of an additional three mobile safety camera vehicles.

The installation of a further fixed site safety camera on the Springfield Road in November 2003 means that there are now four fixed site safety cameras and eight mobile safety camera vehicles in operation within Northern Ireland. All are at locations with a history of speeding and collision.

Mr. Dodds: To ask the Secretary of State for Northern Ireland how much has been raised through fines imposed as a result of speeding detected by speed cameras in Northern Ireland in each year since 2001. [7831]

Mr. Woodward: The number of fixed penalty notices (FPNs) issued for excess speed since 2001 that have been paid are:

	FPNs issued	*Fine levied per FPN (£)*	*Revenue generated (£)*
2001	10,750	60	645,000
2002	16,170	60	970,200
2003	12,913	60	774,780
2004	12,010	60	720,600

The fine revenue generated by safety cameras operated in Northern Ireland is paid into the UK Consolidated Fund and at the moment, none of that revenue is returned to the PSNI because of the unique manner in which the PSNI is funded by Treasury.

However, legislation is currently being prepared that will allow the PSNI to recover costs associated with the operation and maintenance of the Northern Ireland Safety Camera Scheme in future and this money will be used to develop the scheme through the identification of further routes and locations where the deployment of additional cameras can be used to maximize the reduction of serious casualties in future.

State Pension

Lady Hermon: To ask the Secretary of State for Northern Ireland what percentage of women in Northern Ireland are entitled in their own right to a full basic state pension; what measures are being taken to increase this percentage; and if he will make a statement. [7390]

Mr. Hanson: As of September 2004, 15.6 per cent. of women of pensionable age were in receipt of a full basic state pension in their own right. The position of female pensioners today is largely a legacy of the past. When looking at the position across the UK of people of working age now there is very little difference between the proportions of men and women accruing state pension rights.

Many of the Government's labour market policies such as the national minimum wage, tax credits and new deals have been particularly helpful in supporting women remaining in, or returning to, employment and enabling them to build up pension entitlement.

The Pensions Commission has been looking at specific issues regarding women, and the Government have also commissioned their own report on women and pensions to be published by the end of this year.

In addition to this the Social Security Agency has an active programme, which includes the provision of forecasts and retirement planners to ensure that future pensioners are better informed and educated about their entitlements to state pension. A further process is also in place to ensure that all pensioners with any entitlement to state pension are identified, encouraged and facilitated to take up that entitlement.

Temporary Classrooms

Mr. Dodds: To ask the Secretary of State for Northern Ireland how many schools in the Belfast Education and Library Board area have had more than five temporary classrooms in each year since 2001. [7829]

Angela E. Smith: The Department does not have the information requested prior to 2004. A survey was carried out in 2004 to ascertain the number of temporary classrooms in the schools' estate. The result of the survey showed that at 31 March 2004, 18 schools in the Belfast Education and Library Board had more than five temporary classrooms. By 31 March 2005 the number stood at 17.

CONSTITUTIONAL AFFAIRS

Computer-related Offences

Mr. Burstow: To ask the Minister of State, Department for Constitutional Affairs how many cases of computer *(a)* hacking, *(b)* fraud and *(c)* theft her Department recorded in each year since 2001–02; and for each year, on how many occasions computer systems have been illegally accessed by computer hackers (i) within and (ii) outside her Department. [7183]

Bridget Prentice: The number of cases of computer hacking, fraud and theft recorded by the Lord Chancellor's Department and Department for Constitutional Affairs in each year since 2001–02 is as follows:

2001–02

	Number
(a) Hacking	2
(b) Fraud	0
(c) Theft	25

Illegal access by computer hackers in 2001–02 was (i) within the Department 1; (ii) outside the Department 1. Neither of the hacking incidents caused damage to the Departmental computer systems.

2002–03

	Number
(a) Hacking	0
(b) Fraud	0
(c) Theft	25

There was no reported illegal access by internal or external computer hackers in 2002–03.

2003–04

	Number
(a) Hacking	0
(b) Fraud	0
(c) Theft	33

There was no reported illegal access by internal or external computer hackers in 2003–04.

2004–05

	Number
(a) Hacking	0
(b) Fraud	0
(c) Theft	35

There was no reported illegal access by internal or external computer hackers in 2004–05.

Data Protection Act

Harry Cohen: To ask the Minister of State, Department for Constitutional Affairs if she will introduce legislation to modify section 7(9) of the Data Protection Act 1998 to provide for a guarantee of the right of access to personal data as required by Article 12 of Directive 95/46/EC; and if she will make a statement. [8056]

Ms Harman: The Government currently have no plans to introduce legislation to modify the Data Protection Act 1998.

Electoral Registration

Lynne Featherstone: To ask the Minister of State, Department for Constitutional Affairs which relevant software suppliers have confirmed that their products will be able to produce EML compliant electoral register data for 1 December 2005 electoral registers; which have said their products will not be able to do so; which have not yet expressed a view; and if she will make a statement. [7700]

Ms Harman: Of the six software companies that supply more than one electoral registration officer with their software, all have indicated that their product will be able to produce EML compliant electoral register data for 1 December 2005 electoral registers. This is on the understanding that the appropriate new version of the EML standard is agreed and published by the end of July 2005. We are currently approaching the small number of electoral registration officers who operate individual 'bespoke' software for their view on the viability of the target date.

Lynne Featherstone: To ask the Minister of State, Department for Constitutional Affairs on what dates marked registers from the 2005 general election were received; what assessment her Department has made of the arrangements for storing the registers securely before being despatched to the Department; and if she will make a statement. [7701]

Ms Harman: Delivery of the marked electoral registers to the Clerk of the Crown in Chancery usually occurs within a three week period after a general election. It is the duty of individual returning officers to arrange the delivery of all general election documentation to the Clerk of the Crown, either personally or through the Royal Mail as the universal service provider. Clear guidance is provided to returning officers covering the way in which documentation is to be packaged to enable secure and safe delivery.

Lynne Featherstone: To ask the Minister of State, Department for Constitutional Affairs if she will list the constituencies which have *(a)* all and *(b)* part of their marked registers from the 2005 general election missing; and if she will make a statement. [7702]

Ms Harman: I refer the hon. Member to the written answer I gave to the hon. Member for Birmingham, Yardley (John Hemming) on 20 June 2005, *Official Report*, column 810W which concerned the marked electoral register for the Woking constituency. Investigations are still continuing.

There have been no other reports of constituencies' marked electoral registers either being mislaid, or missing sections.

Lynne Featherstone: To ask the Minister of State, Department for Constitutional Affairs whether the EML standard for electoral register data will be in place for the 1 December 2005 electoral registers; and if she will make a statement. [7712]

Ms Harman: 1 December 2005 is the latest date we have specified that electoral registration officers should be able to provide electronic copies of their register in compliance with a common EML standard. Suppliers of the relevant software have indicated that that date will be met if an appropriate update to the EML standard can be agreed and published by the end of July 2005. We are currently meeting that target date for a new version of EML.

Chris Ruane: To ask the Minister of State, Department for Constitutional Affairs how much was spent per elector on voter registration for each local authority area in the UK in descending order for the last year in which figures are available. [8556]

Ms Harman: Electoral registration is funded locally, and this information is not available.

General Election (Monitors)

Mr. Tyrie: To ask the Minister of State, Department for Constitutional Affairs how many international election monitors were present *(a)* in polling stations and *(b)* at counts during the 2005 General Election. [7902]

Ms Harman: We are aware that a number of international observers, including a delegation from the Organisation for Security and Co-operation in Europe, were present during the 2005 General Election campaign. Observers' access to the electoral process is at the discretion of individual returning officers, and information about the numbers of observers attending polling stations and counts is not held centrally.

Judges (Sexual Offences Training)

Vera Baird: To ask the Minister of State, Department for Constitutional Affairs (1) if she will list the Court of Appeal judges who have been on a serious sexual offence course; [7687]

(2) what training in serious sexual offences is given to Court of Appeal judges who were promoted from the High Court prior to the introduction of the serious sexual offences course for High Court judges. [7690]

Ms Harman: This question relates to a matter that is the responsibility of the judiciary. The Lord Chief Justice informs me that; seven Court of Appeal judges have attended the serious sexual offences course.

The serious sexual offences seminar is, however, specifically designed for judges who hear rape trials. It is currently a residential two-day (over three days) event and past programmes have included talks on the following:

(1) Research into public attitudes to sexual offending and the views of complainants and victims on the way in which sexual offences proceedings are handled.

(2) The policies and practices of the police and Crown Prosecution Service in handling serious sexual offences.

(3) Issues of evidential and procedural law and practice which bear on the conduct of trials in such cases.

(4) Sentencing issues and the assessment and treatment of sexual offenders in the community and in prison. Also included in the programme is a series of discussions, in small groups, of trial and sentencing issues.

I would remind the hon. Member for Redcar that the Court of Appeal only considers matters of law in relation to sexual offences. It does not hear trials in relation to sexual offences. Therefore, although some Court of Appeal judges have attended the serious sexual offences seminar the Lord Chief Justice in conjunction with the Judicial Studies Board has decided that it is not a compulsory element of their training.

Judges of every rank who sit in crime, including the Court of Appeal, have received training on the provisions of the Sexual Offences Act 2003 as part of a programme of training on the Criminal Justice Reforms that ran between January and March 2005. This was supplemented with written material provided at the time the Act came into force.

Vera Baird: To ask the Minister of State, Department for Constitutional Affairs on how many rape appeals in 2004 there was a tribunal which did not contain a judge who had been on the serious sexual offences seminar. [7688]

Ms Harman: This question relates to a matter that is the responsibility of the judiciary. The Lord Chief Justice informs me that the information cannot be provided without incurring disproportionate cost.

Vera Baird: To ask the Minister of State, Department for Constitutional Affairs which circuit judges who sit in the Court of Appeal Criminal Division have not been on a serious sexual offences training course. [7691]

Ms Harman: This question relates to a matter that is the responsibility of the judiciary. The Lord Chief Justice informs me that all circuit judges who sit in the Court of Appeal Criminal Division have attended the serious sexual offences training course.

Vera Baird: To ask the Minister of State, Department for Constitutional Affairs how long ago each judge of the Court of Appeal attended a serious sexual offences seminar. [7689]

Ms Harman: This question relates to a matter that is the responsibility of the judiciary. The Lord Chief Justice informs me that the seven Court of Appeal judges who have attended the serious sexual offences seminar have done so in the last six years.

Jury Service

Andrew Rosindell: To ask the Minister of State, Department for Constitutional Affairs if she will commission research to assess the ability of juries to understand complex trials. [8519]

Ms Harman: My Department has no plans at the moment to conduct research into the deliberations and requirements of juries. In January 2005 my Department published a Consultation Paper—"Jury Research and Impropriety"—and the relevant consultation period finished on 15 April. The responses are currently being analysed and an announcement of the Government's intentions will be made in due course.

Legal Aid

Mr. Djanogly: To ask the Minister of State, Department for Constitutional Affairs if she will increase remuneration for civil legal aid lawyers. [8350]

Bridget Prentice: There are no immediate plans to increase remuneration for civil legal aid lawyers. Civil legal aid lawyers are paid under a variety of remuneration regimes. In most non-family cases, civil legal aid litigation work would normally be paid at private client rates on the successful conclusion of a case against a privately paying opponent.

The LSC provides additional remuneration for specific priority areas of legal aid work. For example, members of specialist panels in family work, and those undertaking priority housing work are paid guaranteed higher rates. Most Legal Help work has received a 2.5 per cent. increase from April 2005 as part of the Tailored Fixed Fee scheme.

Legal Training

Mr. Djanogly: To ask the Minister of State, Department for Constitutional Affairs what assessment she has made of the adequacy of solicitors' training arrangements. [8329]

Bridget Prentice: I welcome the Law Society's review of solicitors' training. Regular reviews are necessary to ensure training remains up-to-date, fit for purpose and consistent with the wider needs of society.

Mr. Djanogly: To ask the Minister of State, Department for Constitutional Affairs what representations she has received on the Law Society's Training Framework Review. [8335]

Bridget Prentice: It is for the Law Society to consider responses to its review on its Training Framework. Any recommendations the Law Society makes as a result of that consultation will then be considered by the Lord Chancellor and Secretary of State for Constitutional Affairs, whose approval would be needed, in accordance with schedule 4 of the Courts and Legal Services Act 1990.

Mr. Djanogly: To ask the Minister of State, Department for Constitutional Affairs what assessment she has made of the implications for legal services of trainee solicitors being *(a)* graduates, *(b)* law graduates and *(c)* beneficiaries of regulated vocational training. [8357]

Bridget Prentice: Any recommendations the Law Society makes as a result of its consultation on its training framework will be considered by the Lord Chancellor and Secretary of State for Constitutional Affairs, whose approval would be needed, in accordance with Schedule 4 of the Courts and Legal Services Act 1990. It would be premature to make such an assessment before any recommendations have been received.

Mr. Djanogly: To ask the Minister of State, Department for Constitutional Affairs if she will make representations to the Law Society to increase the openness of training arrangements for solicitors to all parts of society. [8358]

Bridget Prentice: The Law Society is fully committed to ensuring training arrangements are flexible and inclusive, while maintaining rigorous standards. The issue of diversity in the profession is of great importance to me and to the Law Society.

Mr. Djanogly: To ask the Minister of State, Department for Constitutional Affairs what assessment she has made of the financial implications of the Law Society's proposals for solicitors' training for *(a)* legal aid, *(b)* legal services and *(c)* the legal profession. [8369]

Bridget Prentice: The implications, including financial implications, of any recommendations the Law Society makes following its consultation on its training framework will be considered, in accordance with the provisions of schedule 4 of the Courts and Legal Services Act 1990. It would be premature to make such an assessment before any recommendations have been received.

Mr. Djanogly: To ask the Minister of State, Department for Constitutional Affairs if she will make representations to the Law Society on the implications for legal services of its Training Framework Review. [8370]

Bridget Prentice: I have no plans to comment on the Law Society's proposals while they are the subject of a public consultation. Any recommendations the Law Society makes as a result of that consultation will be considered by the Lord Chancellor and Secretary of State for Constitutional Affairs, whose approval would be needed, in accordance with schedule 4 of the Courts and Legal Services Act 1990.

Mr. Djanogly: To ask the Minister of State, Department for Constitutional Affairs what reforms her Department proposes to introduce in relation to solicitors' training. [8373]

Bridget Prentice: It is the responsibility of the Law Society to set standards of entry to the solicitors' profession. However, the Lord Chancellor and Secretary of State must approve any proposals for change put forward by the Law Society, in accordance with the provisions of Schedule 4 of the Courts and Legal Services Act 1990.

HEALTH

Alliance Medical

Mr. Kevan Jones: To ask the Secretary of State for Health how many scans Alliance Medical must conduct over the course of its five year contract to provide scanning services in the NHS. [7555]

Mr. Byrne *[holding answer 27 June 2005]:* 630,000 scans will be delivered over the life of the contract.

Alzheimer's Disease

Mr. Burstow: To ask the Secretary of State for Health pursuant to the answer of 6 June 2005, *Official Report*, column 414W, on Alzheimer's, if she will place in the Library copies of the background papers concerning the reviews to which she refers. [5627]

Jane Kennedy: Only limited papers are readily available about past reviews that looked at the list of medical conditions that give exemption from prescription

charges. The cost of searching for all available papers would be disproportionately expensive. The readily available information will be placed in the Library.

An internal review of prescription charges was undertaken by Departmental officials in conjunction with Her Majesty's Treasury as part of the formulation of Government policy for the 1998 comprehensive spending review. This work fed into the outcome of the comprehensive spending review, which was published by Her Majesty's Treasury, pursuant to the answer of 2 February 2005, *Official Report*, column 908W.

Ambulance Services

Sarah Teather: To ask the Secretary of State for Health (1) how many ambulances were available in the NHS in London in each year since 1997; [7470]

(2) how many NHS ambulances there were in London in each of the last five years. [8307]

Jane Kennedy: This information is not collected centrally.

Sarah Teather: To ask the Secretary of State for Health what the average response time was to an emergency call to the ambulance service in each London borough in each year since 1997. [7471]

Jane Kennedy: This information is not collected centrally in the format requested. Data on response times for London Ambulance Service National Health Service Trust is shown in the tables.

Data is available only from 2000–01 which is the year London Ambulance Service NHS Trust introduced prioritisation.

Further information can be found in the statistical bulletin, "Ambulance services, England: 2004–05". Copies are available in the Library and on the Department's website at: http://www.dh.gov.uk/assetRoot/04/11/36/79/04113679.pdf

Percentage of category A calls responded within eight minutes

	London
1997–98	n/a
1998–99	n/a
1999–2000	n/a
2000–01	41.8
2001–02	57.2
2002–03	69.1
2003–04	76.0
2004–05	76.6

n/a = not available.

Percentage of category A calls responded within 14 to 19 minutes

	London
1997–98	n/a
1998–99	n/a
1999–2000	n/a

2002–03	46.7
2003–04	50.0
2004–05	58.0

Appraisals (National Institute for Health and Clinical Excellence)

Mr. Havard: To ask the Secretary of State for Health how many *(a)* medical devices and *(b)* pharmaceutical products were submitted for appraisal to the (i) National Institute for Clinical Excellence in (A) 2003 and (B) 2004 and (ii) National Institute for Health and Clinical Excellence in 2005. [8512]

Jane Kennedy: Details of the appraisal topics referred to the National Institute for Clinical Excellence in 2003 and 2004 and to the National Institute for Health and Clinical Excellence in 2005 are as follows.

In 2003, two work programmes were referred:

Wave 8—April 2003

Pharmaceuticals

Hormonal treatments for early breast cancer

Imatinib (Glivec) for gastro-intenstinal stromal tumours

Gefitinib (Iressa) for non-small cell lung cancer

Statins for prevention of coronary events

Memantine (Ebixa) for moderate to severe Alzheimer's disease

New pharmaceutical treatments for non-Alzheimer dementias

New treatments for venous leg ulcers

New treatments for diabetic foot ulcers

Omalizumab (Xolair) for uncontrolled asthma

Drotecogin (Xigris) and afelimomab (Segard) for severe sepsis

New treatments for moderate to severe psoriasis

Pimecrolimus (Elidel) and tacrolimus (Protopic) for atopic dermatitis (eczema)

Topical steroids in atopic dermatitis (eczema)

Devices

Dual chamber pacing

Other

Parent training programmes, for treatment and prevention of conduct disorder

Wave 9—October 2003

Pharmaceuticals

Adefovir dipivoxil for chronic hepatitis B

Erythropoetin ion chemotherapy-induced anaemia

Etanercept and infliximab for ankylosing spondylitis

Ximelagatran for the treatment of venous thromboembolism

Ximelagatran for the prevention of stroke in patients with atrial fibrillation

Nesiritide for acute decompensated heart failure

Prasterone for systemic lupus erythematosus

Other

Fallers clinics

HealOzone for tooth decay

Thrombophilia screening

2004

Wave 10—June 2004

Pharmaceuticals

Atrasentan for hormone refractory prostate cancer

Cetuximab for head and neck cancer

Pemetrexed disodium in the treatment of mesothelioma

Oxaliplatin, irinotecan and capecitabine as adjuvant therapy in colorectal cancer

Docetaxel for hormone-refractory prostate cancer

Carmustine implants (Gliadel Wafers) for newly diagnosed high grade glioma

Methadone and Bupenorphine as opiate substitutes

Naltrexone as a treatment for relapse prevention

Pegaptanib for age-related macular degeneration

Natalizumab for multiple sclerosis

Adalimumab for rheumatoid arthritis

Lerdelimumab (CAT-152) for prevention of scarring after glaucoma filtration surgery

Strontum ranelate for osteoporosis

Inhaled insulin

Corticosteroids for asthma

Devices

Biventricular pacing (cardiac resynchronisation) for heart failure

Wave 11—April 2005

Pharmaceuticals

Gemcitabine for breast cancer

Docetaxal and paclitaxel for the treatment of early breast cancer

Rituximab for the treatment of low grade non-Hodgkin's lymphoma

Erlotinib and permetrexed for the treatment of non-small cell lung cancer

Cinacalcet HCl for hyperparathyroidism

Ezetimibe for hypercholesteremia

Drugs for the treatment of pulmonary arterial hypertension

Other

Stapled haemorrhoidectomy for the treatment of haemorrhoids

Mr. Havard: To ask the Secretary of State for Health (1) if she will ask the National Institute for Health and Clinical Excellence to look at ways to speed up its appraisal process; and if she will make a statement; [8513]

(2) if she will ask the National Institute for Health and Clinical Excellence to review its criteria for appraising medical devices. [8514]

Jane Kennedy: The National Institute for Health and Clinical Excellence (NICE) is an independent organisation, which develops its guidance after careful consideration of the available evidence and in consultation with stakeholders. The process by which it develops its guidance is a matter for NICE. Its processes have been developed through wide consultation, are transparent and have been endorsed by the World Health Organisation. NICE reviews its processes regularly in order to identify opportunities for efficiencies in the way they are applied.

Bacteriophages

Mr. Lansley: To ask the Secretary of State for Health what funding has been provided in the last five years by her Department's Research and Development Directorate for research into the effectiveness of bacteriophages in controlling health care associated infection. [3348]

Jane Kennedy: None.

Cancer Treatment

Mr. Jim Cunningham: To ask the Secretary of State for Health what assessment she has made of alternatives to traditional chemotherapy treatment; whether such treatments are available on the NHS; and what estimate has been made of the number of people for whom such treatment would be appropriate. [7715]

Ms Rosie Winterton *[holding answer 28 June 2005]:* A national chemotherapy advisory group has been set up to consider all aspects of planning and delivery of chemotherapy services and to advise the national cancer director and the Department on the development and delivery of high quality chemotherapy services. This group will consider developments in the field of chemotherapy and their implications for chemotherapy services in the national health service.

A cancer drugs forward planning group has also been set up to identify and consider new cancer drugs and, using a set of agreed criteria, to prioritise them for consideration by the advisory committee for topic selection for potential referral to National Institute for Healthcare and Clinical Excellence.

Clinical Trials

Mr. Ian Austin: To ask the Secretary of State for Health if she will make a statement on the use of public private partnership initiatives to develop clinical drug trials. [6955]

Jane Kennedy: The Government aims to work in partnership with the public and private sectors to sustain clinical research for the benefit of patients and the public. In 2002, the pharmaceutical industry competitiveness task force concluded a partnership agreement setting out the ground rules for both contract clinical trials and the non-commercial research collaborations to which industry contributes.

In 2004, the research for patient benefit working party drew attention to the immense contribution of United Kingdom research in the field of biomedical sciences and to the benefit to the national health service, patients and the wider public of encouraging internationally competitive clinical research, sponsored by the industry, and carried out in the NHS. It also recommended action to reverse some damaging trends.

To improve the environment for clinical research, the UK clinical research collaboration was created in 2004. It is a partnership between Government, the voluntary sector, patients, research funders and industry. Its work streams include developing networks within the NHS that will provide a platform for industry-contracted and collaborative research alongside NHS research, in areas identified as being critical to establishing the UK as a world leader in clinical research.

Community Pharmacies

Lynne Featherstone: To ask the Secretary of State for Health how many community pharmacies in each London borough *(a)* opened and *(b)* closed in each year since 2000–01; and if she will make a statement. [7801]

Jane Kennedy: Information on the number of community pharmacies opened and closed by London borough is not centrally collected. However, information is available by health authority (HA) prior to 2002 and from 2002, by primary care trust (PCT).

Table 1 shows the number of community pharmacies by London HA prior to 2002 and table 2 shows the number of community pharmacies by London PCTs from 2002 onwards.

Table 1: By London HA—2000–01 to 2001–02

HA	Total number of community pharmacies	Number of community pharmacies 2000–01		Number of community pharmacies 2001–02	
		Opened	Closed	Opened	Closed
Brent and Harrow	129	0	1	0	1
Ealing, Hammersmith and Hounslow	161	0	3	0	2
Hillingdon	62	0	0	0	0
Kensington, Chelsea and Westminster	148	0	2	0	0
Barnet, Enfield and Haringey	194	0	0	0	1
Camden and Islington	111	0	0	0	0
Barking and Havering	79	0	0	0	1
East London and City	166	0	1	0	1
Redbridge and Waltham Forest	108	0	1	0	0
Bexley Bromley and Greenwich	151	0	0	0	0
Lambeth, Southwark and Lewisham	174	0	2	0	0
Croydon	68	0	1	0	0
Kingston and Richmond	75	0	1	0	0
Merton, Sutton and Wandsworth	143	0	0	0	2

Note:
Some HAs served more than one London borough.

Table 2: By London PCT—2002–03 to 2003–04

PCT	Number of pharmacies on establishment of PCTs in 2002	Number of community pharmacies 2002–03		Number of community pharmacies 2003–04	
		Opened	Closed	Opened	Closed
Brent Teaching	71	0	0	0	0
Ealing	69	0	0	1	0
Hammersmith and Fulham	41	0	0	0	1
Harrow	57	0	0	0	0
Hillingdon	62	0	0	0	0
Hounslow	50	0	0	0	0
Kensington and Chelsea	41	0	0	0	0
Westminster	106	0	0	0	1
Barnet	78	0	0	1	0
Camden	63	0	0	0	0

Table 2: By London PCT—2002–03 to 2003–04

PCT	Number of pharmacies on establishment of PCTs in 2002	Number of community pharmacies 2002–03		Number of community pharmacies 2003–04	
		Opened	Closed	Opened	Closed
Islington	47	0	0	0	0
Enfield	59	0	0	0	0
Haringey	57	0	0	0	1
Barking and Dagenham	36	0	0	0	1
City and Hackney	65	0	0	0	0
Havering	43	0	0	0	0
Newham	60	0	0	0	0
Redbridge[1]	39	0	0	11	0
Tower Hamlets	43	0	0	0	1
Walthamstow, Leyton and Leytonstone[2]	46	0	46	—	—
Waltham Forest[3]	—	—	—	58	0
Bexley	47	0	0	0	1
Bromley	57	0	0	0	0
Greenwich	47	0	0	1	0
Lambeth	59	0	0	0	1
Lewisham	52	0	0	0	0
Southwark	63	0	0	0	0
Croydon	68	0	0	0	0
Kingston	29	0	0	0	0
Richmond and Twickenham	45	0	0	0	0
Sutton and Merton	77	0	0	0	0
Wandsworth	65	0	0	2	0

[1] Redbridge PCT previously sat in Redbridge and Waltham Forest HA and the total number of pharmacies for the HA as at 2001–02 was 108. In 2002, Redbridge PCT was established and initially had had 39 pharmacies, increasing by 11 with the establishing of Waltham Forest PCT in 2003, which had 58 pharmacies. It is useful to note that the combined figure of community pharmacies for both Redbridge and Waltham Forest PCTs in 2003–04 is equal to that of the previous HA total of 108.
[2] Walthamstow, Leyton and Leytonstone PCT no longer exists.
[3] Newly established PCT on 1 April 2003.

Dentistry

Mr. Evans: To ask the Secretary of State for Health (1) how many NHS dentists have retired in each year since 1997; [4359]

(2) how many NHS dentists have left the NHS in the last 12 months for which figures are available. [4360]

Ms Rosie Winterton: The number of dentists, who have come off the dental lists held by the Dental Practice Board (DPB) in England in the 12-month period ending 31 March 2005 was 1,008. However, many of these dentists would not have been providing exclusively national health service treatment and therefore the number does not reflect a loss of 1,008 whole time equivalent dentists to the service.

Dentists stop practising in general dental service (CDS) or personal dental service (PDS) for a number of reasons, including retirement and short-term breaks. Some dentists have not left indefinitely and intend to return. There is no requirement for a dentist to indicate why to indicate why they have stopped practising. Neither the Department nor the DPB records the reason why a dentist has stopped practising.

The number of individual dentists in England with open CDS or PDS contracts at 31 March 2005 was 20,088 compared to 19,294 at 31 March 2004.

Tim Loughton: To ask the Secretary of State for Health how many dental practices in Sussex are currently taking on new NHS patients; and how many were open to new NHS patients in 1997. [4472]

Ms Rosie Winterton: Information about dental practices, which were open to new patients in 1997 are not held centrally. Information about practices currently taking on new national health service patients is not centrally collected, but can be assessed either through NHS Direct or through local primary care trusts.

Mr. Hoyle: To ask the Secretary of State for Health how many people in Lancashire are registered with an NHS dentist. [6309]

Ms Rosie Winterton: The information requested for the primary care trusts (PCTs) within the Lancashire area is shown in the table.

Primary care trusts	Number
Cumbria and Lancashire strategic health authority	771,011
Blackburn with Darwen	66,755
Blackpool	71,026
Burnley, Pendle and Rossendale	97,181
Chorley and South Ribble	102,058
Fylde	52,001
Hyndburn and Ribble Valley	46,901
Morecambe Bay	143,653
Preston	68,147
West Lancashire	55,231
Wyre	68,058

Jim Cousins: To ask the Secretary of State for Health how many patients were registered with an NHS dentist in the City of Newcastle-upon-Tyne in each of the last five years; and what percentage of the population that represented in each year. [6322]

Ms Rosie Winterton: The information requested is shown in the table.

Patients registered with a national health service dentist in Newcastle primary care trust as at 30 September

	Number of patients registered	Percentage of population registered with a dentist
2000	n/a	n/a
2001	141,552	53
2002	148,039	56
2003	144,531	54
2004[1]	148,691	56

n/a = not available.
[1] 2004 population data not available at this level—2003 data used.
Sources:
Dental Practice Board and Office for National Statistics.

Haringey Teaching Primary Care Trust

Lynne Featherstone: To ask the Secretary of State for Health how many nurses are employed in each hospital located in the Haringey teaching primary care trust area; and if she will make a statement. [7800]

Jane Kennedy: The information requested is shown in the table.

National health service hospital and community health services: total number of qualified nurses in the specified organisations as at 30 September 2004

	Total nurses	Nurse consultant	Manager	Registered sick nurse
Total nursing staff	4,950	3	117	134
Barnet, Enfield and Haringey Mental Health NHS Trust	1,003	0	39	0
Haringey PCT	324	1	13	0
North Middlesex University Hospital NHS Trust	964	0	49	26
Royal Free Hampstead NHS Trust	1,836	0	1	59
Whittington Hospital NHS Trust	823	2	15	49

	Registered midwife	District nurse	Health visitor
Total nursing staff	353	54	49
Barnet, Enfield and Haringey Mental Health NHS Trust	0	0	0
Haringey PCT	0	54	49
North Middlesex University Hospital NHS Trust	127	0	0
Royal Free Hampstead NHS Trust	72	0	0
Whittington Hospital NHS Trust	154	0	0

Health and Social Care Information Centre Non-Medical Workforce Census 2004.

Hepatitis

Dr. Desmond Turner: To ask the Secretary of State for Health what reports have been made of adverse reactions to hepatitis B vaccination under the yellow card scheme in each year since the introduction of hepatitis B vaccine. [6972]

Jane Kennedy: The safety of all medicines and vaccines, including hepatitis B vaccine, is continuously monitored by the Medicines and Healthcare products Regulatory Agency (MHRA), with expert advice from the Committee on Safety of Medicines. The MHRA uses a variety of data sources for this purpose including reports of suspected adverse drug reactions (ADRs) which are reported through the yellow card scheme, clinical trials, published literature, epidemiological studies and periodic safety update reports from marketing authorisation holders.

The table shows the total number of suspected ADR reports received via the yellow card scheme from 1 January to 31 December for hepatitis B vaccine during each year since the first report was received in 1983.

Number of reports of suspected ADRs received per year for hepatitis B vaccine

Year report received	Number of reports
1983	5
1984	13
1985	14
1986	47
1987	107
1988	310
1989	182
1990	175
1991	168
1992	198
1993	227
1994	251
1995	235
1996	252
1997	226
1998	273
1999	193
2000	161
2001	148
2002	116
2003	122
2004	89
2005	46

It is important to note that a report of a suspected adverse reaction does not necessarily mean that it was caused by the drug or vaccine. Many factors have to be taken into account in assessing causal relationships including temporal association, the possible contribution of concomitant medication or a newly occurring or previously undiagnosed underlying illness.

Honours

Mr. Pope: To ask the Secretary of State for Health how many officials currently in the Department received honours in the recent Queen's Birthday Honours List; and at what rank of honour. [5117]

Mr. Pope: I refer the hon. Member to the reply given by my right hon. Friend, the Chancellor of the Duchy of Lancaster (Mr. Hutton) on 22 June 2005, *Official Report*, column 1059W.

Hospital Beds (London)

Mr. Burstow: To ask the Secretary of State for Health how many *(a)* intensive care and *(b)* high dependency beds there were in each strategic health authority in London in January in each of the last three years. [8011]

Jane Kennedy: The data requested are published on the Department's website at: www.performance.doh.gov.uk/hospitalactivity/data_requests/critical_care_beds.htm.

Hospital Travel Costs Scheme

Dr. Gibson: To ask the Secretary of State for Health what discussions her Department has had with hospital trusts on the implementation of its Hospital Travel Costs Scheme Guidance (2003) with reference to the promotion of the Hospital Travel Costs scheme to patients attending hospital for cancer treatment. [7938]

Ms Rosie Winterton: The Department does not collect any central information or issue guidance regarding the promotion of the Hospital Travel Costs scheme to patients attending hospital for cancer treatment.

Hospital-acquired Infections

Mr. Burns: To ask the Secretary of State for Health what role community matrons play in minimising MRSA in residential care and nursing homes; and if she will make a statement. [5897]

Jane Kennedy *[holding answer 22 June 2005]:* The "Matron's Charter" launched in October 2004, reinforced the matron's role by setting out 10 key commitments to cleanliness, aimed at all staff in the national health service. Although the focus was on care in the hospital setting, many of the principles espoused are applicable across the whole spectrum of health care.

Residential care and nursing homes are not required to have community matrons on staff complements but may receive advice from community matrons on clinical issues.

The care homes regulations set out requirements for hygiene and infection control and care home providers are required to ensure that at all times suitably qualified, competent and experienced staff are working in the care home. These persons should receive training appropriate to their work and infection control is detailed in the induction standards set by Skills for Care and should be used by all new staff and those taking national vocational qualifications.

David Davis: To ask the Secretary of State for Health what research her Department has undertaken into possible links between use of agency and bank nursing staff within the NHS and prevalence of MRSA and other hospital-acquired infections. [6552]

Jane Kennedy: The Department has conducted initial research to examine the links between the use of temporary nursing staff, hospital cleanliness and "methicillin resistant" *Staphylococcus aureus* (MRSA). However, the work is still in progress and results are not yet available.

John Hemming: To ask the Secretary of State for Health what the Department's policy is on the use of *(a)* disinfectants and *(b)* detergents for cleaning, with particular reference to control of hospital infections. [7735]

Jane Kennedy: The use of disinfectants is a local decision and trusts should have local policies on disinfectant use focused on specific infection risks.

The National health service cleaning manual, which is endorsed by experts in cleaning and microbiology, recommends detergents for routine use, but recognises disinfectants are needed in particular circumstances.

As overuse of disinfectants can damage some fabrics and surfaces and may encourage the development of resistant organisms, the Department is supporting research into microfibre cleaning, which requires neither detergents nor disinfectant. Early results are encouraging. The cleaning manual will be updated following the trial.

Lynne Featherstone: To ask the Secretary of State for Health how many staff at the *(a)* Whittington hospital, *(b)* Royal Free hospital Hampstead, *(c)* North Middlesex university hospital and *(d)* Haringey teaching primary care trust St. Ann's hospital have been allocated to the treatment of (i) Methicillin Resistant *Staphylococcus aureus*, (ii) Vancomycin-Intermediate *Staphylococcus aureus*, (iii) *Clostridium difficile* Associated Diarrhoea, (iv) Vancomycin-Resistant *Staphylococcus aureus* and (v) Glycopeptide-Resistant Enterococci in each of the last five years; and what proportion of the budget of each hospital was allocated to the treatment of each in each year. [7751]

Jane Kennedy: The information requested is not collected centrally.

Tim Farron: To ask the Secretary of State for Health what research she has evaluated on possible risks of transmission of MRSA within hospitals on neck-ties worn by doctors and other hospital staff; and if she will make a statement. [7762]

Jane Kennedy *[holding answer 28 June 2005]:* Although studies by Nurkin et al have shown the presence of pathogens on neckties, the evidence indicates that inadequate hand hygiene is the main cause of methicillin resistant *Staphylococcus aureus* (MRSA) transmission. However, health care workers should use appropriate protective clothing such as aprons to prevent transmission of micro-organisms to patients and contamination of their own clothing or skin.

Intensive Care (Enfield)

Mr. Burrowes: To ask the Secretary of State for Health how many *(a)* intensive care and *(b)* high dependency beds there were in Enfield in the most recent year for which figures are available. [7613]

Jane Kennedy: There are two hospitals in Enfield, Chase Farm, which is part of the Barnet and Chase Farm Hospitals National Health Service Trust and North Middlesex university hospital, which is the only hospital in the North Middlesex University Hospital NHS Trust. Data on intensive care and high dependency beds is collected by trusts and the latest available data, as at 13 January 2005, is shown in the table.

Hospital trust	*Number of intensive care beds*	*Number of high dependency beds*
Barnet and Chase Farm	8	6
North Middlesex University	7	4

Meals on Wheels

Mr. Burstow: To ask the Secretary of State for Health which social services authorities provide meals on wheels *(a)* cooked ready to eat, *(b)* frozen, *(c)* comprised of sandwiches and *(d)* cooked and chilled. [7205]

Mr. Byrne: Data is not centrally available in the form requested.

Mental Health Bill

Tim Loughton: To ask the Secretary of State for Health (1) when she expects to publish her response to the pre-legislative security committee on the draft Mental Health Bill; [8345]

(2) when she expects to publish the final version of the Mental Health Bill. [8346]

Ms Rosie Winterton: The Department is currently considering the recommendations of the report of the joint committee on the draft Mental Health Bill and a response will be published shortly. Following the publication of the Government's response, a Mental Health Bill will be presented before Parliament as soon as parliamentary time allows.

Mental Health Services

Mr. Burstow: To ask the Secretary of State for Health (1) what arrangements are in place to ensure that people aged 65 years or over with mental health issues have access to *(a)* bereavement counselling, *(b)* assertive outreach teams, *(c)* crisis resolution teams and *(d)* community mental health teams; [6396]

(2) what reasons older people under the care of assertive outreach teams cease to receive the service when they reach of the age of 65. [7199]

Ms Rosie Winterton: The needs of older people with mental health problems are the focus of a standard in the national service framework for older people (2001), which is designed to ensure that the right services are there to meet the needs of older people with mental health problems whether they live at home, in residential care or are being cared for in hospital. Where an older person has severe mental illness due to a psychotic illness such as schizophrenia, they will require the packages of care set out in the national service framework for mental health, and the same standards should apply as for working age adults. For these people care should be provided within the framework of the care programme approach. Bereavement counselling services should be accessible by people of any age through referral by a general practitioner.

The Department's guidance on functionalised community teams, "Mental Health Policy Implementation Guide (2001)", explains that such services are commonly for adults aged up to 65 years. This guidance specifies that for crisis resolution teams there should be flexibility in every locality to decide to treat those who fall outside this age group where appropriate. For assertive outreach teams, the same guidance states that the boundaries between different health care services should be flexible to respond to different needs. The "Mental Health Policy Implementation Guide" also makes clear that as long as there is evidence of benefit, assertive outreach can continue indefinitely. The "Mental Health Policy Implementation Guide for Community Mental Health Teams (2002)" requires age limits to be determined in line with locally agreed protocols for transitions from adolescent to adult and adult to older adult services.

Mr. Burstow: To ask the Secretary of State for Health what criteria were used to set the priorities for the National Service Framework for Mental Health, with particular reference to the age of sufferers; and what arrangements are in place to ensure that people with mental health problems continue to have access to services once they reach 65 years. [6398]

Ms Rosie Winterton: The national service framework for mental health (1999) concentrates on the mental health needs of working age adults up to 65 and touches on the needs of children and young people, highlighting areas where services for children and adults interact, for example the interface between services for 16 to 18-year-olds, and the needs of children with a mentally ill parent.

The needs of children and adolescents with mental health problems are the focus of a standard in the children's national service framework which gives guidance on what is envisaged in a comprehensive child and adolescent mental health service.

The needs of older people with mental health problems are the focus of a standard in the national service framework for older people (2001), which is designed to ensure that the right services are there to meet the needs of older people with mental health problems whether they live at home, in residential care or are being cared for in hospital. Where an older person has severe mental illness due to a psychotic illness such as schizophrenia, they will require the packages of care set out in the national service framework for mental health, and the same standards should apply as for working age adults. For these people care should be provided within the framework of the care programme approach.

The Department's guidance on the care programme approach, "Effective Care Co-ordination in Mental Health Services" (1999), requires services to have in place clearly identified plans and protocols for meeting the needs of younger and older people moving from one service to another. The priorities and planning framework for the national health service 2003–06 includes a target to ensure that protocols are in place across all health and social care systems for the care and management of older people with mental health problems.

The annual performance ratings of mental health trusts carried out by the Healthcare Commission in 2004 and by the Commission for Health Improvement in 2003 employed performance indicators on the availability of clear protocols for transition between children's, adults' and older people's mental health services.

Missed Appointments (Lancashire)

Mr. Hoyle: To ask the Secretary of State for Health how many patients failed to turn up for *(a)* general practitioner and *(b)* hospital appointments in (i) Chorley and (ii) Lancashire in 2004–05. [7596]

Mr. Byrne: The total number of missed out-patient appointments for the year 2004–05 in England was 5,707,288, or 11.3 per cent. Data for individual national health service trusts are available in the Library.

The Department does not collect data on the number of missed general practice appointments, but there is some evidence to suggest the number of missed appointments are falling.

MRI Scan

Sarah Teather: To ask the Secretary of State for Health what the average waiting time for a MRI scan is at each London hospital. [8204]

Jane Kennedy: The information requested is not collected centrally.

NHS Budget

Lynne Featherstone: To ask the Secretary of State for Health what her estimate is of the annual change in the NHS budget required to meet the higher cost associated with *(a)* an ageing population and *(b)* improved health care technology; and if she will make a statement. [8104]

Mr. Byrne: In the report "Securing our long term health: taking a long term view", Derek Wanless reported that the impact of ageing on future health expenditure is likely to be small compared with other cost drivers. The report also states that medical technology, including drugs and equipment, would contribute two to three percentage points to the annual rate of growth in health spending in the future, compared to an average of two percentage points a year over the previous 20 years.

NHS Staff

Lynne Featherstone: To ask the Secretary of State for Health how many full-time equivalent *(a)* administrative staff and *(b)* temporary staff have been employed at (i) Whittington hospital, (ii) Royal Free hospital Hampstead, (iii) North Middlesex university hospital and (iv) Haringey teaching primary care trust St. Ann's hospital in each of the last five years; and if she will make a statement. [7761]

Jane Kennedy: The information requested is shown in the table. St Ann's hospital is part of the Barnet, Enfield and Haringey Mental Health Trust.

National health service hospital and community health services: Total clerical and administrative staff in Haringey teaching primary care trust area by contractual term as at 30 September each specified year

Full-time equivalent

		2000	*2001*	*2002*	*2003*	*2004*
Total administrative staff		1,326	1,595	1,794	1,979	2,075
Barnet, Enfield and Haringey Mental Health NHS Trust	RRP	n/a	176	249	278	352
Haringey PCT	5C9	n/a	114	114	139	161
North Middlesex Hospital NHS Trust	RAP	291	294	327	391	359
Royal Free NHS Trust	RAL	722	700	778	830	860
Whittington Hospital NHS Trust	RKE	312	311	326	341	342

n/a = not applicable

Note:
Full-time equivalent figures are rounded to the nearest whole number.

Source:
Health and Social Care Information Centre Non-Medical Workforce Census.

Mr. Lansley: To ask the Secretary of State for Health (1) what her estimate is of the total cost of suspending NHS staff in the most recent year for which figures are available; and what the average cost was of suspending one member of *(a)* medical staff and *(b)* non-medical clinical staff per annum for the most recent period for which figures are available; [5625]

(2) how many *(a)* medical and *(b)* non-medical clinical staff in the NHS have been (i) formally suspended and (ii) informally suspended from work in each year since 1997; and what steps she is taking to ensure that suspensions that occur are unavoidable; [5595]

(3) what the average length of time of suspensions from the NHS for *(a)* medical and *(b)* non-medical clinical staff was in the last year for which figures are available. [5596]

Mr. Byrne: The information requested on formal and informal suspensions of medical and non-medical

clinical staff and the length of those suspensions and their cost is not available and could be provided only at disproportionate cost.

The National Audit Office provided information on clinical staff excluded from work in 2001 and 2002 in its report, "The Management of Suspensions of Clinical Staff in NHS Hospital and Ambulance Trusts in England", which is available in the Library.

The most recent data collect by the National Clinical Assessment Service, now part of the National Patient Safety Agency, shows that, in the fourth quarter of 2004, 19 doctors were suspended for six months or more.

Northwick Park Hospital (Maternity)

Sarah Teather: To ask the Secretary of State for Health what assessment she has made of maternity services at Northwick Park hospital; and if she will make a statement. [7465]

Jane Kennedy: The North West London hospitals national health service trust is actively addressing issues at the maternity unit at Northwick Park hospital. Last year, the trust, Brent primary care trust (PCT) and Harrow PCT invited the Healthcare Commission to help the trust with improvements. In April 2005, the Department, on the recommendation of the Healthcare Commission, introduced special measures at the unit to provide additional resource and external clinical support to accelerate the improvement programme.

I understand that the Healthcare Commission will shortly be publishing its report on these issues. The Department will consider the Commission's findings carefully and work with the trust and North West London strategic health authority to ensure that the appropriate action is taken.

Patient Care (Private Companies)

Steve Webb: To ask the Secretary of State for Health (1) if she will make a statement on the monitoring that is undertaken by her Department of the safety and quality of patient care provided by private companies delivering out of hours primary care services; [5949]

(2) how many adverse incidents have been recorded for GP out-of-hours services in each year since 1997; and if she will make a statement; [5950]

(3) if she will make a statement on the monitoring undertaken by her Department of the development of community out-of-hours services under the new GP contract. [5951]

Mr. Byrne: The Department set quality requirements that came into effect from 1 January 2005. These set the minimum standards for the delivery of out-of-hours care. In line with "Shifting the Balance of Power", it is for primary care trusts and strategic health authorities, not the Department, to monitor out-of-hours services against these quality requirements and, where necessary, take action in cases of adverse incidents or complaints.

Primary Care Trusts

Peter Luff: To ask the Secretary of State for Health what the funding per capita was for each primary care trust in England in 2004–05; what the budgeted funding per capita is for each trust in 2005–06; and what the average figure for all trusts is for each year. [4916]

Mr. Byrne: I refer the hon. Member to the reply I gave to the hon. Member for East Worthing and Shoreham (Tim Loughton) today.

Tim Loughton: To ask the Secretary of State for Health what the funding was per head for each primary care trust area in England in 2004–05; and what the expected level is in 2005–06. [4622]

Mr. Byrne: The information requested has been placed in the Library.

Allocations to primary care trusts (PCTs) are based on the population weighted for a number of factors. These factors include:

Age related need—to recognise that people tend to have a greater need as they grow older.

Additional needs—to reflect difference in health need over and above that accounted for by age.

Unavoidable difference in the cost of providing services.

The revenue allocations for PCTs increased from £49.3 billion for 2004–05 to £53.9 billion for 2005–06; and are due to increase further to £64 billion in 2006–07 and £70 billion in 2007–08. Over the two years covered by this further allocation, PCTs will receive an average increase of 19.5 per cent.

Mr. Hoban: To ask the Secretary of State for Health what sanctions are available to her should primary care trusts ignore guidance on the availability of medical treatment issued by her Department. [3950]

Jane Kennedy: The primary responsibility for implementing national guidance rests with the national health service at local level. Compliance with national guidance by NHS organisations will be considered by the Healthcare Commission during their review and performance assessment process.

Retinopathy

Miss McIntosh: To ask the Secretary of State for Health how many people with diabetes were screened for retinopathy on the NHS in *(a)* 2002, *(b)* 2003 and *(c)* 2004. [6671]

Ms Rosie Winterton: Figures from the national health service show that in 2003–04, 835,900 people with diabetes were screened for retinopathy and 1,076,400 in 2004–05. Figures for 2002–03 are not held centrally.

Miss McIntosh: To ask the Secretary of State for Health (1) what quality assurance protocols are in place for retinopathy screening on the NHS; [6672]

(2) how much central funding is planned to be allocated for *(a)* an external and independent quality assurance programme and *(b)* an internal quality assurance programme for retinal screening. [6673]

Ms Rosie Winterton: Quality assurance standards have been developed and piloted by the United Kingdom national screening committee's national screening programme for sight threatening retinopathy. A full list of the quality assurance standards can be found on the national screening programme's website at: www.nscretinopathy.org.uk

There is no central funding for quality assurance at this time. The diabetes national service framework has been fully costed and revenue funding to deliver the national and locally-determined targets has been included in primary care trust allocations.

Ward Sisters

Daniel Kawczynski: To ask the Secretary of State for Health if she will make it her policy to employ ward sisters to improve cleanliness on hospital wards. [7975]

Jane Kennedy: It is already the Department's policy that ward sisters are responsible, within their wards, for agreeing cleaning standards, making sure standards are met and working with cleaning staff to help them fulfil their roles. Ward sisters are responsible for the whole of the clinical and operational management of wards, and ensuring the ward is clean is just one part of their very wide remit.

West Hertfordshire Hospitals Trust

Mr. Clappison: To ask the Secretary of State for Health what assessment she has made of *(a)* the financial situation of the West Herts Hospitals Trust, *(b)* the implications for clinical services of its financial situation and *(c)* proposals for ward closures at Watford hospitals; what plans she has to provide additional (i) financial and (ii) other support to the Trust; and if she will make a statement. [3914]

Ms Rosie Winterton: In line with "Shifting The Balance Of Power" strategic health authorities (SHAs) are responsible for the financial performance management of individual health organisations within their health economy. It is the responsibility of SHAs to deliver both overall financial balance for their local health communities and to ensure each and every body achieves financial balance.

I am advised that the West Hertfordshire Hospital National Health Service Trust is working with primary care trusts to agree a recovery plan to ensure that it delivers national targets, meets the national standards for high quality health care and achieves its statutory duties. Decisions on how this is best delivered within the West Hertfordshire health and social care system is a local decision and thus Bedfordshire and Hertfordshire SHA is working with the local NHS to support them in this process and ensure that there is the management capacity to produce and deliver the recovery plan.

I am also assured that the West Hertfordshire NHS Trust will continue to work hard to meet the standards laid down by the Healthcare Commission and that patient care will not be compromised.

Work-related Stress

Lynne Featherstone: To ask the Secretary of State for Health how many cases of work-related stress have been reported in her Department in each of the last three years; how much compensation was paid to employees in each year; how many work days were lost due to work-related stress in each year; and at what cost; what procedures have been put in place to reduce work-related stress; and at what cost; and if she will make a statement. [7864]

Jane Kennedy: The Department does not hold any data specifically on the number of reported cases of work-related stress. While the Department collects data on sickness absence, which includes stress, it is not possible to identify whether the cause of the stress related illness or anxiety was work related. It is not currently possible, therefore, to identify costs. However, the Department's recording systems are currently being developed in a way that will help identify which cases are potentially work-related at the time they are recorded. This will enable appropriate remedial action to be taken at the earliest opportunity.

The Department's settlement or compensation payments are made in respect of Employment (Industrial) Tribunal cases, which address a number of inter-related circumstances, of which work-related stress is only one element. Compensation payments on the grounds of work-related stress are not recorded separately.

The Department has a number of procedures already in place to help managers and staff to be aware of and reduce work-related stress and it is currently looking at further interventions.

TRADE AND INDUSTRY

Advantage West Midlands

Paul Farrelly: To ask the Secretary of State for Trade and Industry if he will list the projects submitted by the Rover Task Force to *(a)* Advantage West Midlands and *(b)* the Government Office of the West Midlands for possible funding; and how much has been requested to support each project. [7621]

Ian Pearson: Advantage West Midlands (AWM) is the vehicle which co-ordinates the funding directed by the MG Rover Task Force (MGRTF). The funding package is administered by other regional agencies such as the Learning and Skills Councils and Government Office for the West Midlands (GOWM).

To date, the following requests have been made by the MGRTF to AWM:

£250,000 to reopen and man the MG Rover Distribution Centres to allow suppliers to recover the consignment stocks they own;

£150,000 to retain for 12 weeks a team of MGR Human Resources staff, principally to prepare records of employment for all former workers for use when seeking jobs;

£202,000 to pay the wages of apprentices while alternative employment for them is Found;

£40,000 to support for a major jobs fair in Birmingham.

The MGRTF has also approved support of £10 million for the Advantage Transition Bridge Fund.

The MGRTF has also approved proposals from regional agencies for funding which includes:

Support for suppliers to retain employees. £3.7 million has been committed to date and is kept under review by the Task Force;

Establishment of a "Manufacturing Hub" to try to ensure engineering manufacturing skills are not lost to the region by placing workers with such skills into posts requiring such skills and by incentivising businesses to recruit them;

Includes post-recruitment retraining, and assistance with long-distance commuting. Up to a maximum of £3.6 million (dependent on take-up);

Funding for former employees who wish to take up full-time vocational training (cash limited). Up to a maximum of £600,000.

Funding to support potential start-up businesses amongst former employees. Up to a maximum of £900,000.

Government Office for the West Midlands has received funding requests from the following projects to support the work of the MGRTF.

Project name	*ERDF/ESF requested*
Accelerate Extension	£4.94 million
Extension Cluster Action Plan	£1 million
Wage Subsidy Scheme	£5 million ESF
Grants for R and D Extension	£1.5 million
ESF Over 50s	£1.50 million
Road Infrastructure	£5.1 million
Regional Repositioning (now called 'Marketing the Region')	£1.7 million
High Tech Corridor Support	£778,000
Community Network SW	£750,000
Longbridge Masterplanning	£750,000
SME Internationalisation Extension	Up to £1.4 million
Sustainable A38 regeneration employment opportunities	£500,000
Innovation Networks Extension	£430, 000

A number of projects are still under development by the MG Rover Task Force and regional partners.

Export Credits Guarantee Department

Andrew George: To ask the Secretary of State for Trade and Industry how much the Government have allocated to the Export Credits Guarantee Department in each of the last five years. [6792]

Ian Pearson: The cash generated for/(cash cost to) the Exchequer as a result of the Export Credits Guarantee Department's (ECGD's) operating activities, as published in schedule 4 to its Resource Accounts, in each of the last five years, is summarised in the following table. Figures in brackets represent Exchequer cash used to fund ECGD's Operating Activities; figures without brackets represent net cash receipts for the Exchequer, which include recoveries of past claims, interest paid by debtors in respect of those claims and premiums received in respect of ECGD's underwriting activities:

£ million

	Cash generated/(used)
1999–2000	(107.1)
2000–01	(59.8)
2001–02	24.3
2002–03	327.8
2003–04	546.7

Mail Delivery (North London)

Lynne Featherstone: To ask the Secretary of State for Trade and Industry what discussions he has had with Royal Mail on performance in delivery of mail in north London; and if he will make a statement. [7806]

Barry Gardiner: DTI Ministers and officials meet with representatives from Royal Mail on a regular basis to discuss a wide range of issues, including delivery performance issues.

First class quality of service for 2004–05 in the London N postcode area as a whole was:

	Percentage
Q1	88.4
Q2	88.2
Q3	92.4
Q4	91.2
Cumulative	90.2

This was against a target of 92.5 percent. Nationally Royal Mail recorded its highest Q4 performance ever this year with a 92.8 percent. service. Royal Mail's chairman and chief executive have assured Ministers that the company's board will continue to give quality of service top priority.

MG Rover

Charles Hendry: To ask the Secretary of State for Trade and Industry if he will publish *(a)* the written records of conversations and *(b)* correspondence between (i) Ministers and (ii) officials from his Department and senior representatives of the Shanghai Automotive Industry Corporation that took place in the week commencing Monday 4 April. [5868]

Ian Pearson: It would be inappropriate to release this information at this time as it would breach commercial confidentiality.

Minimum Wage

Dr. Kumar: To ask the Secretary of State for Trade and Industry what penalties have been imposed on companies found paying their employees below the minimum wage. [6631]

Mr. Sutcliffe: Since the minimum wage was introduced in April 1999 the Inland Revenue have served 133 penalty notices on employers who they found were not paying their workers the minimum wage.

A penalty notice imposes a financial penalty equal to twice the hourly amount of the adult minimum wage per worker for each day of non-payment of the minimum wage.

Post Offices (Hornsey and Wood Green)

Lynne Featherstone: To ask the Secretary of State for Trade and Industry how many post offices were in operation in Hornsey and Wood Green in each of the last 10 years. [8404]

Barry Gardiner: This is an operational matter for Post Office Ltd. (POL) and the chief executive has been asked to reply direct to the hon. Member.

UK Trade and Investment

Malcolm Bruce: To ask the Secretary of State for Trade and Industry what commercial services UK Trade and Investment provides to companies in relation to identifying potential agents in export markets. [7909]

Ian Pearson: UK Trade and Investment provides information on potential agents in two main ways. First, off the shelf lists of companies may be available in the UK, although the details may not have been recently

validated. Secondly, our Overseas Market Introduction Service (OMIS) provides bespoke lists that can be validated at the request of the customer. Advice on the best ways of doing business in the market concerned is also included. It is for customers themselves to determine the best agent in the light of their individual needs and circumstances.

Unwanted Correspondence

Mr. Fabian Hamilton: To ask the Secretary of State for Trade and Industry if he will take steps to curb the growth of unsolicited postal applications for credit cards. [6962]

Mr. Sutcliffe: Consumers can register with the Mailing Preference Service to have their name and home address removed from lists used by the direct mail industry. On credit cards themselves, the Banking Code provides that customers' names and addresses will not be passed on to any company for marketing purposes unless permission is specifically given by that customer. In addition, since 31 May 2005, all credit card applications must have a separate document detailing the key features of the card. This will enable the consumer to make a more informed decision about the suitability of the product prior to the conclusion of any agreement.

Mr. Sheerman: To ask the Secretary of State for Trade and Industry what discussions he has had with Royal Mail on adopting a service to restrict delivery of harmful or unwanted overseas correspondence; and what representations he has received on this matter. [7908]

Barry Gardiner: I have had no discussions with Royal Mail about this issue, nor received any representations.

Mr. Sheerman: To ask the Secretary of State for Trade and Industry (1) how much unwanted correspondence was withheld from delivery as a result of the co-operation of Royal Mail Holdings plc with the Mail Preference Service (MPS) in the last period for which figures are available; and from how many users of the MPS; [7926]

(2) how many users have been registered with the Mail Preference Service in each of the last 10 years. [7927]

Barry Gardiner: The Government do not hold this information. The Mailing Preference Service is a free service funded by the direct mail industry to enable consumers to have their names and addresses in the UK removed from or added to lists used by the industry.

Mr. Sheerman: To ask the Secretary of State for Trade and Industry what powers are available to limit the delivery of unwanted or harmful mail sent from *(a)* within the UK and *(b)* overseas. [7928]

Barry Gardiner: The Postal Services Act 2000 contains powers that prohibit the sending of certain articles by post and provide postal operators with various powers to detain postal packets, forward them to HM Customs and Excise, refuse transmission of packets, detain and open them, return to sender or forward to their destination or destroy or dispose of packets.

Under section 89 of the Act a universal service provider may make a scheme that contains provisions prohibiting the transmission of certain articles by post.
